DEAKIN UNIVERSITY OPEN DAY 2014

Deakin Open Days are fast approaching! Our Open Days are a great opportunity for your students to come and see for themselves why Deakin is a great place to study.

We welcome your students and their families, as well as anyone interested in postgraduate and cloud (online) learning, people looking to study as mature-age students and current university students thinking of transferring from other tertiary institutions.

To plan their day, your students will be able to download the free Deakin Open Day app from the Apple App Store and Google Play. The Open Day website, openday.deakin.edu.au, is also a great source of information.

Deakin University's Open Day dates:

Warrnambool Campus, Sunday 3 August, 10 am–3 pm
Geelong Warrnambool Campus, Sunday 10 August, 9 am–3 pm
Geelong Waterfront Campus, Sunday 10 August, 9 am–3 pm
Melbourne Burwood Campus, Sunday 24 August, 9 am–4 pm

Questions? Please visit openday.deakin.edu.au.

EVENTS WITH DEAKIN

Deakin will attend Sheepvention in Hamilton and the Limestone Coast Rotary Careers Expo in Mount Gambier in August.

Sheepvention, which is being held on Monday 4 and Tuesday 5 August at Hamilton Showgrounds, is the Hamilton Pastoral and Agricultural Society's biggest farming event.

We will be holding a stall alongside South West TAFE, and have staff and students available to answer questions about courses and how to apply. For more information, please visit www.hamiltonshowgrounds.com.au/sheepvention-single.asp?ID=1.

The Limestone Coast Rotary Careers Expo is being held at South Australia TAFE in Mount Gambier on Friday 8 August. Deakin representatives will be there to assist with questions on course offerings.

For more information, please visit www.lcrotycareerexpo.com.au.

For further information about these events, please contact Jenna McMeel on phone: 03 5563 3444 email: j.mcmeel@deakin.edu.au

SO YOU WANT TO WORK WITH ANIMALS?

Coordinated by the Geelong Careers Teachers Association in partnership with Deakin, come along to an information session to hear from a local vet about the different options available to work with animals.

You will also hear from a careers practitioner about the courses and educational institutions that provide these options. No registration is required for this event.

Monday 21 July, 7 pm
Percy Baxter Lecture Theatre, room D2.194
Deakin University
Geelong Waterfront Campus.

DISCOVER DEAKIN

Thank you to everyone who attended this event. The workshops were well attended and enthusiasm for the day was high. It was a wonderful opportunity for students to learn firsthand about Deakin's study areas.

This two day event in July was held over three of our Campuses, commencing at the Geelong Wairn Ponds Campus and finishing at the Geelong Waterfront Campus and a week later at the Melbourne Burwood Campus.

The days attracted over 500 students and participants, who learned about course information, collected collateral and information about Deakin, attended in-depth workshop sessions (which were pre-registered to be able to attend), and had the opportunity to speak with Deakin representatives from all course areas, as well as making new friends on the days.

Students were able to hear about current students' experiences of studying at Deakin in our Q&A session, which included highlights on fast tracking your course, what they enjoy most about studying at Deakin, work experiences with in their course, the benefits of studying a combined degree and overseas study options. This was a great way for everyone to find out all that Deakin can offer students in their future studies.

If you missed out, look out for more information on our Discover Deakin days coming up in September:

Tuesday 23
Wednesday 24
Thursday 25

More information on Discover Deakin can be found at deakin.edu.au/study-at-deakin/why-choose-deakin/prospective-student-events.

SO YOU WANT TO BE A DOCTOR?

Coordinated by the Geelong Careers Teachers Association in partnership with Deakin, come along to an information session to hear about the different course options and providers available to pursue a career in medicine.

No registration is required for this event.

Tuesday 22 July, 7 pm
Percy Baxter Lecture Theatre, room D2.193
Deakin University, Geelong Waterfront Campus.

PROFESSIONAL DEVELOPMENT OPPORTUNITY

Deakin University's School of Education proudly presents the Education Business Leadership short course, providing critical insights into school finance, resource management and governance.

The course is based on participants' current positions, work situations and contexts, and aims to be an integral part of participants' regular school responsibilities rather than creating an additional workload. It also encourages the formation of a 'community of practice' and network of supportive colleagues upon which future collaborations and problem-solving activities can occur.

Dates: 26–27 August and 17–18 September.

Course participants will undertake two, two-day face-to-face workshops at Deakin University's Geelong Waterfront Campus.

Who should attend?

- Education leaders
- Principals
- Assistant principals
- Aspiring principals and leaders
- Business managers
- Finance and administration staff
- Regional and central support staff
- School counsellors

For more information and to register, visit deakin.edu.au/education-business-leadership.

EXPERIENCE THE FUTURE AT DEAKIN

Deakin University's brand new, world-class carbon fibre facility, Carbon Nexus, is holding an open night for secondary school students and the general public.

Carbon fibre is known as the 'wonder material' of the 21st century and is set to transform aerospace, automotive and a whole range of other industries. It is increasingly replacing traditional materials, such as steel and aluminium.

The night will include a tour of the production plant so you can see it in operation, as well as the opportunity to learn about carbon fibre technology developments and the diverse career opportunities in materials science and engineering.

The General Manager of Carbon Nexus, Steve Atkiss*, and Research Director, Associate Professor Bronwyn Fox^,

will make short presentations during the evening.

Carbon Nexus Open Night

Tuesday 29 July, 5.30–7.30 pm
Large seminar room (na1.417/8)
Geelong Technology Precinct
Building NA Geelong Wairn Ponds
Campus Deakin University

*Steve Atkiss has vast engineering and operational experience, from research and development to full-scale commercial carbon fibre processing.

^Associate Professor Bronwyn Fox has been working on carbon fibre 'since its infancy'. She joined Deakin 13 years ago, after completing her PhD in Engineering and has since driven carbon fibre research at Deakin.

DEAKIN HITS A SIX WITH RAJASTHAN ROYALS PARTNERSHIP

Deakin University was recently announced as the official education partner of the Indian Premier League's Rajasthan Royals cricket team.

The partnership will work on promoting sport education in India, as well as enable research into management and science aspects in sport and facilitate mutual projects such as a case study, IPL internships and scholarship opportunities.

Rajasthan Royals' Chief Executive Officer, Raghu Iyer, says, 'We are excited about our association with the highly respected Deakin University and trust that the partnership will enable us to promote sport education in India while serving as a worthy case for research and learning.'

Deakin University's Vice-Chancellor, Professor Jane den Hollander, says Deakin was honoured to form such a strong partnership with an organisation that shares its commitment to excellence. 'We are delighted to partner with one of the world's best Twenty20 teams. Applying management and marketing theories and business principles within a leisure framework is the defining feature of our sport management degrees.'

'Deakin continues to carry out in-depth research in the area of sport management and we firmly believe students, staff and our partner will benefit greatly from this wonderful new association around sports education in India.'

Australia's High Commissioner to India, Patrick Suckling, has also welcomed the announcement of the pioneering sports education partnership.

'The Rajasthan Royals is one of the most exciting sporting teams in the world, while Deakin University has world class expertise in sport management', says Mr Suckling.

'This agreement will not only promote sports education in India, it will also help to strengthen Deakin University's already impressive record in sport marketing and development.'

Under the partnership Deakin sport management staff will work with the Rajasthan Royals on team branding, sports marketing, and fan engagement. Sport management students will also be given the opportunity to visit India

and complete an internship with the Royals during the 2014 Indian Premier League season.

'This will be an invaluable opportunity for Deakin students to work in one of the most vibrant sporting contests in the world', says Mr Suckling.

Sport Management Course Director, Dr Adam Karg, was also enthusiastic about the partnership and highlighted that the links between Deakin and Indian cricket are well developed, noting that 'the Deakin sport management program has alumni working for prominent cricket organisations in India (Board Of Control For Cricket In India), future Indian sport managers currently studying in our program, and former and current IPL players studying with us'.

'With Deakin's postgraduate program ranked 7th globally for sport management education, we are well placed to play a role in the integration of world class teaching and research activities into this emerging market', says Dr Karg.

BACHELOR OF DESIGN TECHNOLOGY*

There is a worldwide trend towards increasingly agile and adaptable industries, where manufacturing and product development companies are becoming smaller and adopting more diverse interests and product lines.

Most notable, is the shift away from the mass manufacturing approaches of the past towards increased customisation in product development and delivery. As a result, industry needs versatile, technologically-minded professionals with the design, project management and organisational skills to drive the product innovations of the future.

Commencing in Trimester 1, 2015 Deakin's Bachelor of Design Technology is distinctive. Design and innovation are a core focus of the program and, when enabled by the corresponding technologies, will provide graduates with the design and technology acumen that is highly sought-after in this increasingly agile industry. Students will acquire

design skills for application in a technological setting, as well as an understanding of the use of technology in enhancing design and product development processes.

Specialising in either industrial design, sports technology or medical technology, students will have the opportunity to work independently and in teams to create, innovate and design products that satisfy industry needs through Project-Oriented Design Based Learning (PODBL) in collaboration with industry. Beginning in the first trimester of study and continuing throughout the course, this interaction with industry is an integral part of the program and is embedded throughout this three-year degree.

Upon graduating from the Bachelor of Design Technology, students will have the knowledge, skills and competency to pursue a wide range of career options depending on the major sequence they have chosen. Graduates will be able to create and design consumer, sports, medical and industrial products, and produce models and prototypes of these designs for mass or customised production. Graduates may find employment with equipment manufacturers, professional sports associations and research institutions, in medical research, medical instrumentation, prosthetics manufacturing and health organisations.

Course details

Course title: Bachelor of Design Technology

Location: Geelong Warrnambool Campus

Duration: three years of full-time study (or part-time equivalent)

Prerequisites: VCE units 3 and 4 with a study score of at least 25 in English (EAL) or 20 in English other than EAL.

*Formerly titled Bachelor of Engineering Science.

EVER WONDERED WHAT A CAREER IN HEALTH PROMOTION ENTAILS?

People who work in the health promotion industry plan and implement projects to improve the health of individuals and the community.

They can be involved in a number of tasks including:

- planning and coordinating health promotion programs for community groups at local or national level
- providing health education and teaching skills to help people make informed health decisions
- planning and advocating for changes to environments to support healthy lifestyle choices
- supporting organisations to develop policies that build healthier communities, workplaces and environments
- supervising and coordinating community workers and volunteers
- evaluating projects and initiatives to measure their success and improve them for the future.

Careers can include:

- community development worker
- community educator
- community engagement officer
- fundraising manager
- health promotion officer/coordinator
- health promotion planner
- health and social planner
- partnerships manager
- patient programs officer
- policy and health promotion manager
- population health lead
- program coordinator/manager
- project officer/worker
- research assistant
- team leader/project manager
- volunteer coordinator.

Deakin offers a number of options for students interested in pursuing a career in health promotion. In the Bachelor of Health Sciences, you can major in health promotion. You can also choose a second major to specialise in a certain area of health promotion, such as environmental health, nutrition, physical activity and health, or people, society and disability. Deakin also offers the Bachelor of Public Health and Health Promotion, a specialised degree with placement options to give you valuable work experience in a health promotion workplace. Both degrees will enable you to become a member of the Public Health Association of Australia.

HEALTH SCIENCES STUDENT PROFILE

Stephanie Anderson

Bachelor of Health Sciences

‘My name is Stephanie and I am in my final year of the Bachelor of Health Sciences, with majors in nutrition, exercise science and food science. Like most Year 12 students I was unsure of exactly what I wanted to do once I completed my VCE. The only thing I knew for certain was that I had a passion for health and nutrition.

When I came across the Bachelor of Health Sciences degree offered at Deakin University I knew that this was the right path for me. Unlike other health sciences degrees I had looked at, Deakin offered the greatest amount of subjects and majors under the one bachelor’s degree. The study pathways and career options that it offered interested me so, in turn, it became my number one preference.

Throughout my university degree I’ve completed a range of health-related subjects from areas including nutrition, health promotion, food science and exercise science, but there has not been a subject quite like the Netherlands Study Tour that I undertook in November 2013. The unique experience enabled me to understand the career opportunities that are available to me upon the completion of my degree that I previously did not know existed. We were given the privilege of visiting companies and institutes, including private companies such as Unilever and Mars, as well as government bodies such as the Ministry of Health, which would normally not be accessible

Photo: Jadiet Photography, Gie Liem

for students of an undergraduate degree. Not only did this tour provide me with valuable experiences for my future career, it also gave me the opportunity to meet like-minded students who shared the same passion for health and nutrition as I do, as well as getting to know my unit chairs on a personal level.

The study tour gave me the chance to see where my knowledge can apply in a real world scenario, while developing lifelong friends along the way. It was a privilege to be able to represent my University in a foreign country and experience its health industry, proving that Deakin is nothing short of “Worldly”.

DEAKIN GRADUATE ESTABLISHES ZANZIBAR SCHOOL

The island of Unguja in Zanzibar is a long way from Terang or the corridors of Deakin University in Warrnambool. But for former Terang student and Deakin graduate Belinda Johnson the island off the east coast of Africa is now home and a place to create new educational opportunities for local children.

Belinda is running the first international school in Paje, a popular tourist destination on the island of Unguja.

Of seven students in Belinda's international school, only one speaks English as their first language.

French, Spanish, Finnish, Dutch and Swahili dialects flourish but the group has quickly overcome the language barrier.

People on Unguja want to learn English for opportunities in tourism. 'The majority of tourists speak English,' says Belinda. 'If you know English, you're one step ahead of the person next to you if they don't speak English.'

Belinda was raised in Terang and attended Noorat Primary School and Terang College before studying at Deakin. She completed her Bachelor of Education at Deakin's Warrnambool Campus at the end of 2011.

A practical placement during her course in the Northern Territory inspired her to consider remote education. 'I recommend everybody to try volunteering, either locally or abroad.'

After graduating, Belinda returned to work in the Northern Territory for 18 months.

She then intended to work around the Warrnambool area before moving to London. However, a friend had done volunteer teaching

so she investigated that option and was captivated by photos of Zanzibar in east Africa.

During her second volunteer stint she was asked by the mother of a three-year old girl if she would organise an international school. There are international schools in Stone Town, about 20km away, but the roads are treacherous and parents are reluctant to send their children.

So, in mid-2013 Belinda started the Paje School from scratch in a recently built house.

As head teacher, Belinda is responsible for planning all three classes; a pre-school, kindergarten and primary section. 'I asked if we could use the Australian curriculum in the school because I was familiar with it.'

The 2014 school year starts on 1 June.

Find out about education courses at Deakin at deakin.edu.au/study-at-deakin/find-a-course/education-and-teaching.

GO GIRL, GO FOR IT

Are your students aware of the great career opportunities in IT?

There is a declining number of females studying IT at a tertiary level and many female students appear to be unaware of the opportunities that the IT industry offers.

'Go Girl, Go for IT' is a free IT career showcase run by the Victorian ICT for Women network. It aims to bring awareness to IT, highlighting the valuable skills girls can learn and the lucrative career options available.

The showcase allows female high school students to explore the vast range of career opportunities that IT offers. There will be guest speakers and talented young role models who will inspire your students with anecdotes from their successful IT careers. The abundance of information available on the day will help students make informed decisions about a career in IT.

Go Girl, Go for IT is a free full-day event open to all female secondary students from Years 7–12.

Tuesday 12 August
Melbourne Burwood Campus

If your school is interested in registering for the Go Girl, Go for IT event, please complete the registration form on the Go Girl website www.gogirl.org.au/index.php/schools-registration.

Careers practitioners and IT teachers are also encouraged to attend. Regional schools may also qualify for a grant to cover transport costs.

To find out more about Deakin's IT courses, please visit deakin.edu.au/study-at-deakin/find-a-course/information-technology.

INTRODUCING THE BACHELOR OF PLANNING (HONOURS)

The Faculty of Science, Engineering and Built Environment is excited to announce the introduction of the Bachelor of Planning (Honours) from Trimester 1, 2015.

As cities and towns continue to grow, there is increasing demand for planners to manage change. Not only do planners assess development proposals and devise policies to guide future development, they also work in

areas as diverse as housing, energy, health, education, communications, leisure, tourism and transport.

Deakin's new Bachelor of Planning (Honours) is a distinctive course that brings together the disciplines of planning, design, urban studies and society in a single degree program. Comprised of theoretical, practical and project units which enable students to explore ideas in simulated and project-based learning environments, this course also includes a

fourth-year research component*. Throughout this four-year program students will acquire the knowledge and specialist skills required to design and create the vibrant places and spaces in which we live, work and play.

By balancing the built and natural environment with community needs, social equity, cultural significance and economic sustainability, graduates will have the capacity to manage development, infrastructure and services to create new, and revitalise existing, public spaces; conserve places of heritage; and enhance community value as populations continue to grow.

Graduates may find employment in assessing development proposals and devising policies to guide future development, and work in areas as diverse as housing, energy, health, education, communications, leisure, tourism and transport.

Course details

Course name: Bachelor of Planning (Honours)

Location: Geelong Waterfront Campus

Duration: four years of full-time study (or part-time equivalent)

Pre-requisites: VCE units 3 and 4: a study score of at least 25 in English (EAL) or 20 in English other than EAL.

*Students who do not wish to undertake the final-year research component (honours), may exit this course early following successful completion of 24 credit points of study with a Bachelor of Urban Studies.

NURSING AND MIDWIFERY INFORMATION SESSIONS

If you have students who are interested in gaining a greater understanding of nursing and midwifery courses at Deakin, why not suggest they attend one of our upcoming nursing and midwifery information sessions?

Melbourne Burwood Campus

Building Y, room 1.11 A and B
Saturday 26 July, 2.30–4.30 pm

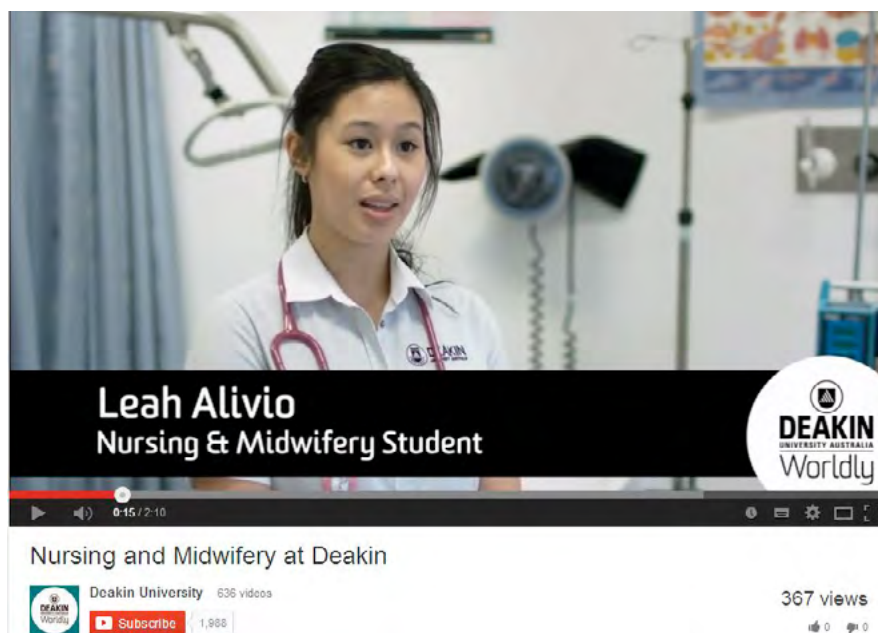

Geelong Waterfront Campus

Building AD, room 2.217
Wednesday 23 July, 6–8 pm
Saturday 26 July, 2.30–4.30 pm

Warrnambool Campus

Deakin University
Warrnambool City Centre Campus
165 Timor Street Warrnambool
Friday 25 July, 7.30 pm

Not able to attend a session but want to know more about these courses? Check out our nursing and midwifery video in your time on the Deakin YouTube channel.

DEAKIN IN WORLD'S TOP FIVE SPORTS MANAGEMENT COURSES, BEST IN AUSTRALIA

Deakin University has helped to cement Melbourne's reputation as an international sporting powerhouse by ranking in the top three sports management masters degrees across the globe.

According to the prestigious SportBusiness International (SBI), which has three times named Melbourne the sporting capital of the world, Deakin University students are the highest paid sport business master's graduates on the planet.

The SportBusiness International 2014 Postgraduate Sports Course Rankings annually grades the quality of 70 sport management master's courses around the world. This year Deakin came in at number three and was the only Australian university in the top 25, ranking as Australia's number one university for sport management.

The SBI rankings found graduates of Deakin University's Master of Business (Sport Management) course have the highest average salaries three years after graduation, compared to their peers around the globe.

'This is an outstanding outcome and affirms the employability of Deakin graduates. It places Deakin's Master of Business (Sport Management) firmly among the world's most recognised sporting institutions,' says Vice Chancellor, Professor den Hollander.

'Deakin is extremely proud to have achieved this highly recognised honour, which reinforces that we produce the best and brightest sports minds in the world right here at Deakin in Victoria.

'It is testament to the hard work and commitment of our staff, students, industry experts and academic leaders within the School of Management and Marketing, which is a key part of our Faculty of Business and Law.

'The course is complemented by the work of our School of Exercise and Nutrition Sciences, in the Faculty of Health, enabling Deakin to have deep, genuine excellence in all aspects of sport management, sport science and exercise and nutrition.

'This honour also comes hot on the heels of Deakin being ranked number one in Victoria, among the top ten in Australia and number 59 in the world by the Times Higher Education's list of the world's top 100 universities under 50 years old.

'In the three years SBI has conducted these rankings, Deakin has jumped from 11th place, to seventh last year and now makes its debut in the top three.'

STUDENT RESIDENCES

Now open 365 days a year, student residences continues to provide a unique opportunity for students to immerse themselves in the Deakin experience.

The recent expansion has meant that each campus has a greater range of unique living experiences, with studio and shared apartments on offer. All accommodation sites remain conveniently located to all campus facilities and now include:

- 24/7 security
- 10 per cent discount when students book for a year
- greater flexibility with check-in dates
- meals options.

Residents have grown to love the following additional services:

- free internet
- free laundry
- a range of common areas including movie rooms
- social activities and more.

Applications for 2015 open Monday 4 August 2014. For further information, please visit deakin.edu.au/residences.

STAFF CHANGES

It is with mixed emotions that the Student Recruitment Team farewells Michelle Berrigan, as she commences a new role at Flinders University. Michelle has been with Deakin for the past five years and in this time she has looked after the schools and careers groups in the Geelong, Bendigo, Sunbury-Gisborne, Central Highlands, Shepparton, Colac, South-West and WRICA regions.

Michelle has met and worked closely with lots of careers practitioners through coordinating numerous events and school visits at both Geelong campuses. We will miss her passion and enthusiasm for education, regional Victoria and supporting students in achieving their course and career goals, as well as her quick wit. All the best in your future endeavours Michelle!
