# CADET – Bringing vision and passion to engineering education

Deakin University's Centre for Advanced Design in Engineering Training (CADET) provides some of the best future-focused engineering and design facilities in the Australian university sector.

Located at Deakin's Geelong Waurin Ponds Campus, CADET offers programs from primary school through to PhD level. It houses virtual and real prototyping facilities, allowing creative design solutions to be developed almost seamlessly from imagination to concept to reality in a single journey. Be it new wind turbines, medical devices, sustainable infrastructure, fuel efficient vehicles or robotic aids, CADET provides the key elements to imagineer the ultimate solution.
