

Deakin University / DEKIN'S Graduate Code 901138

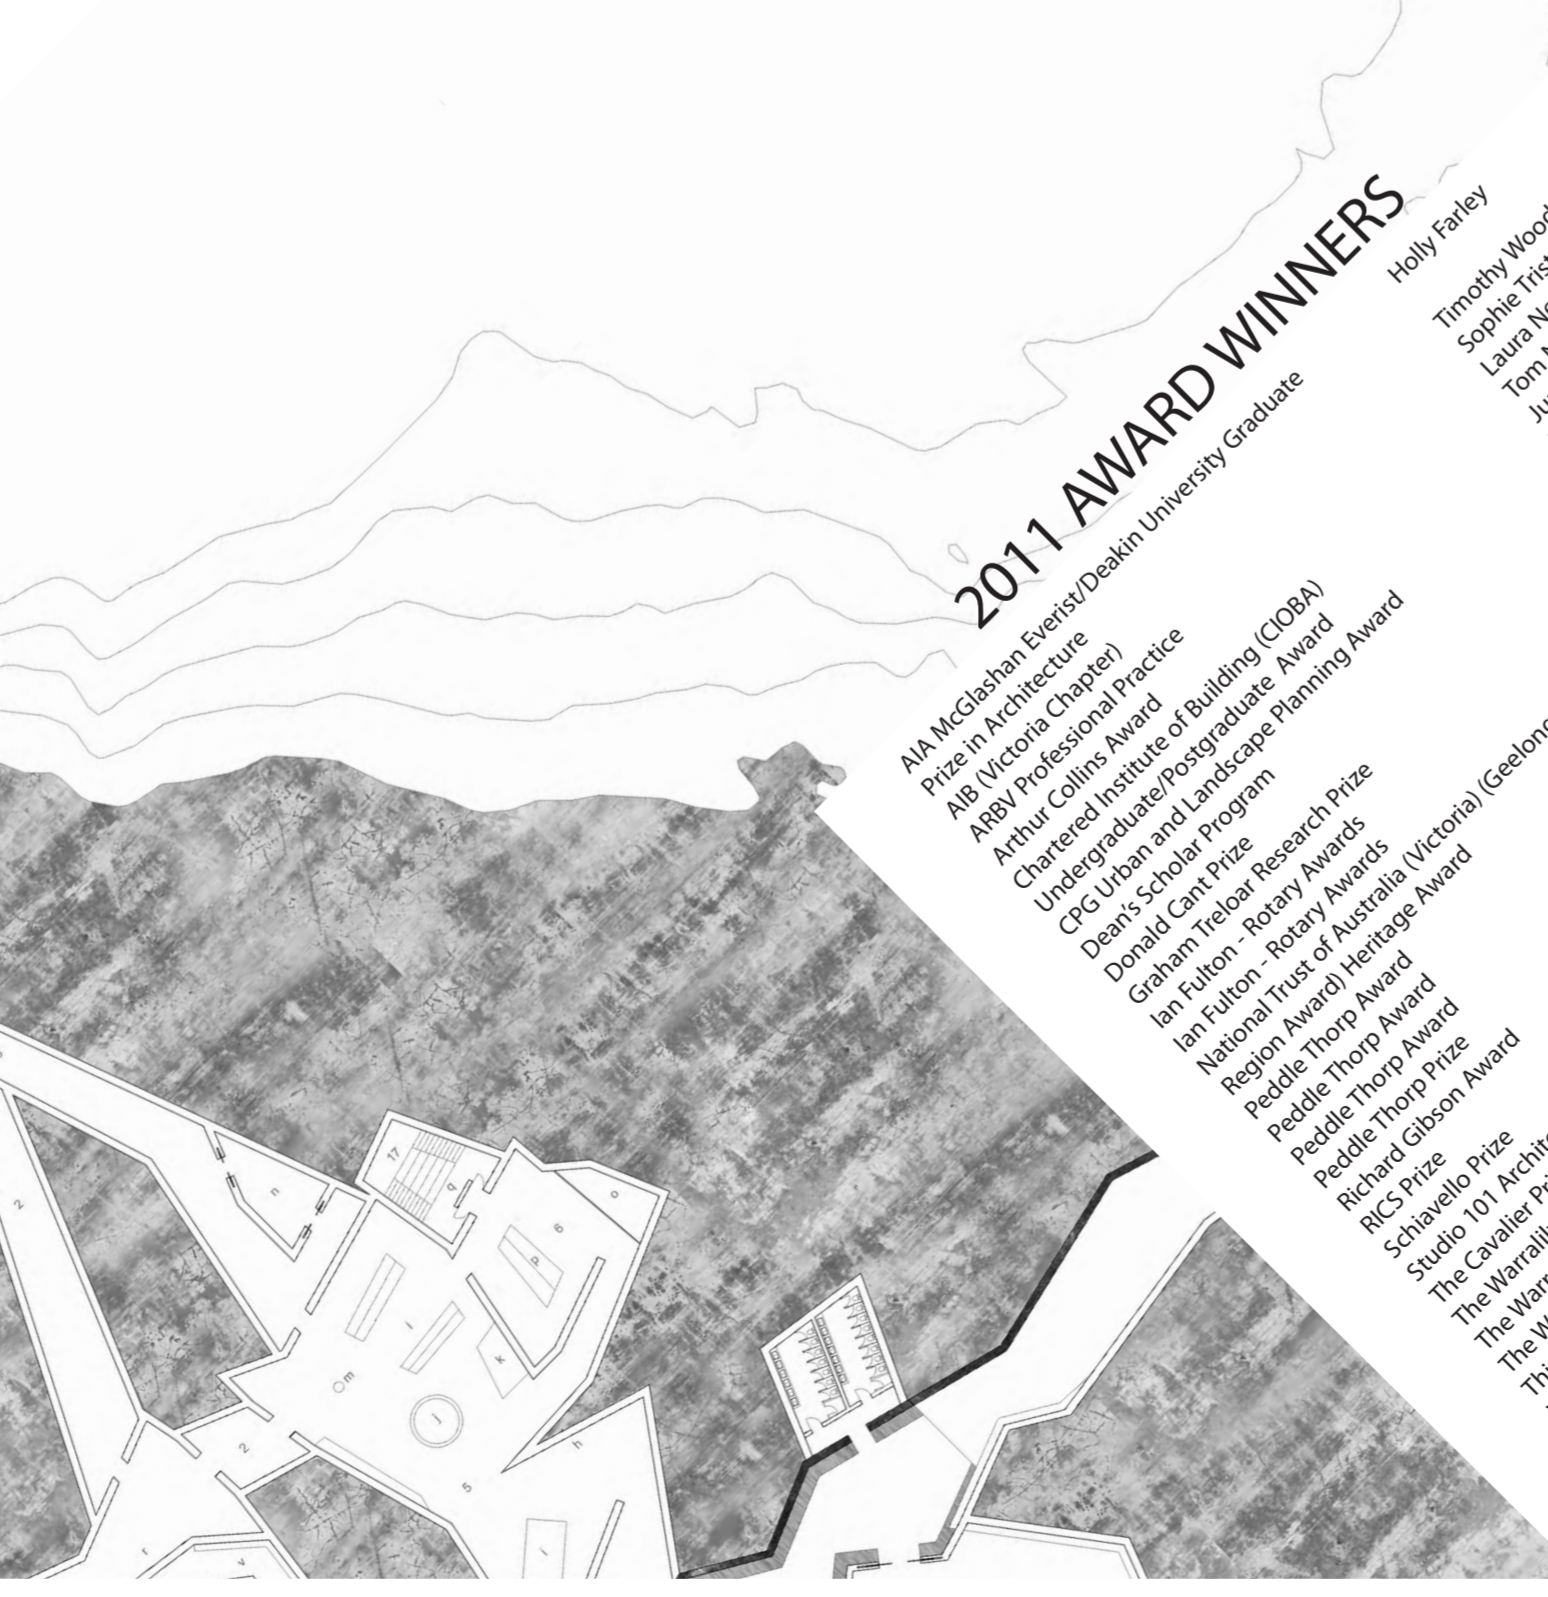

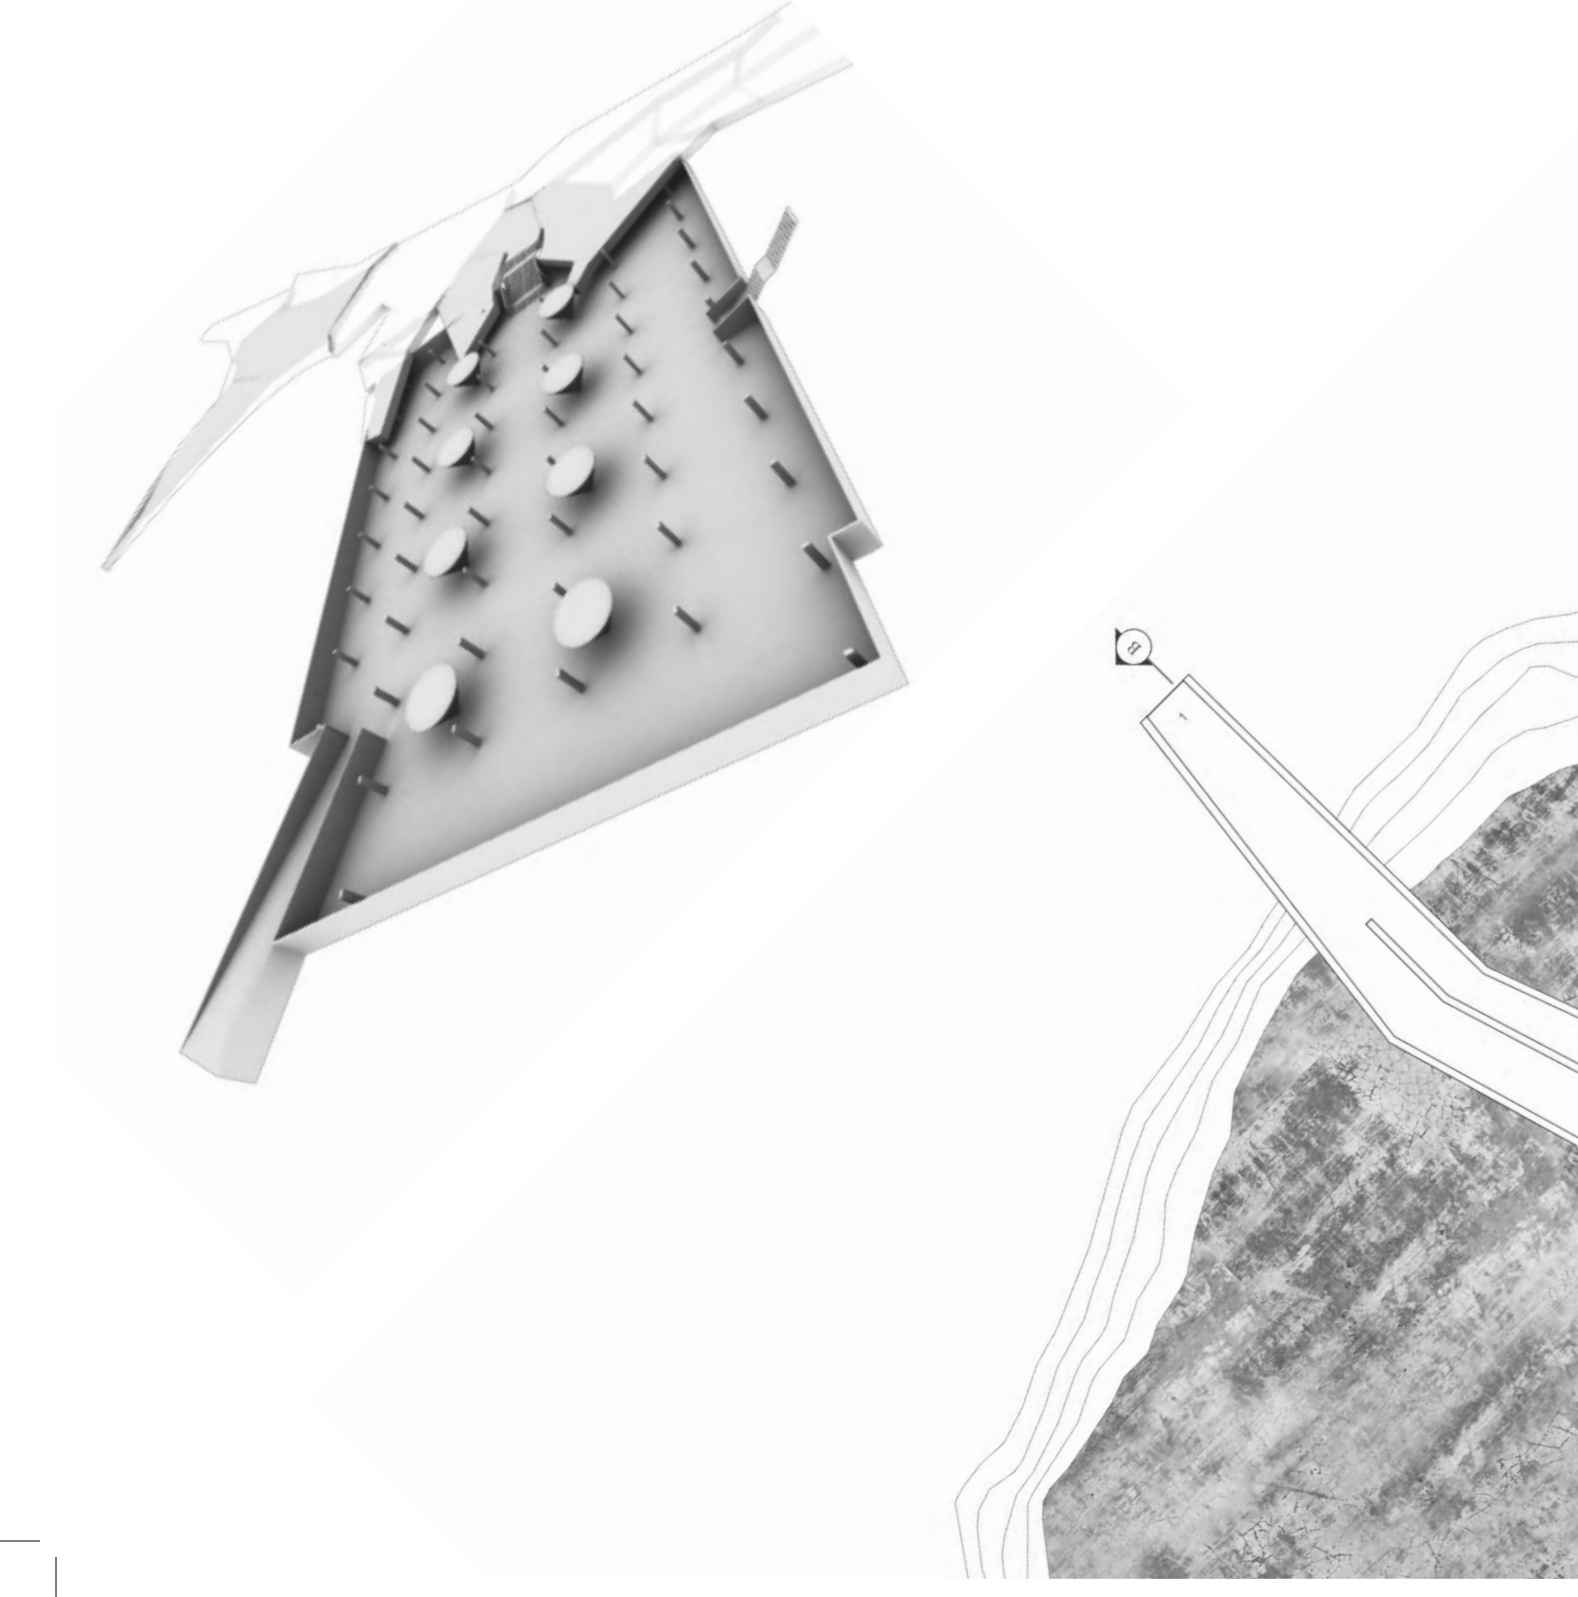

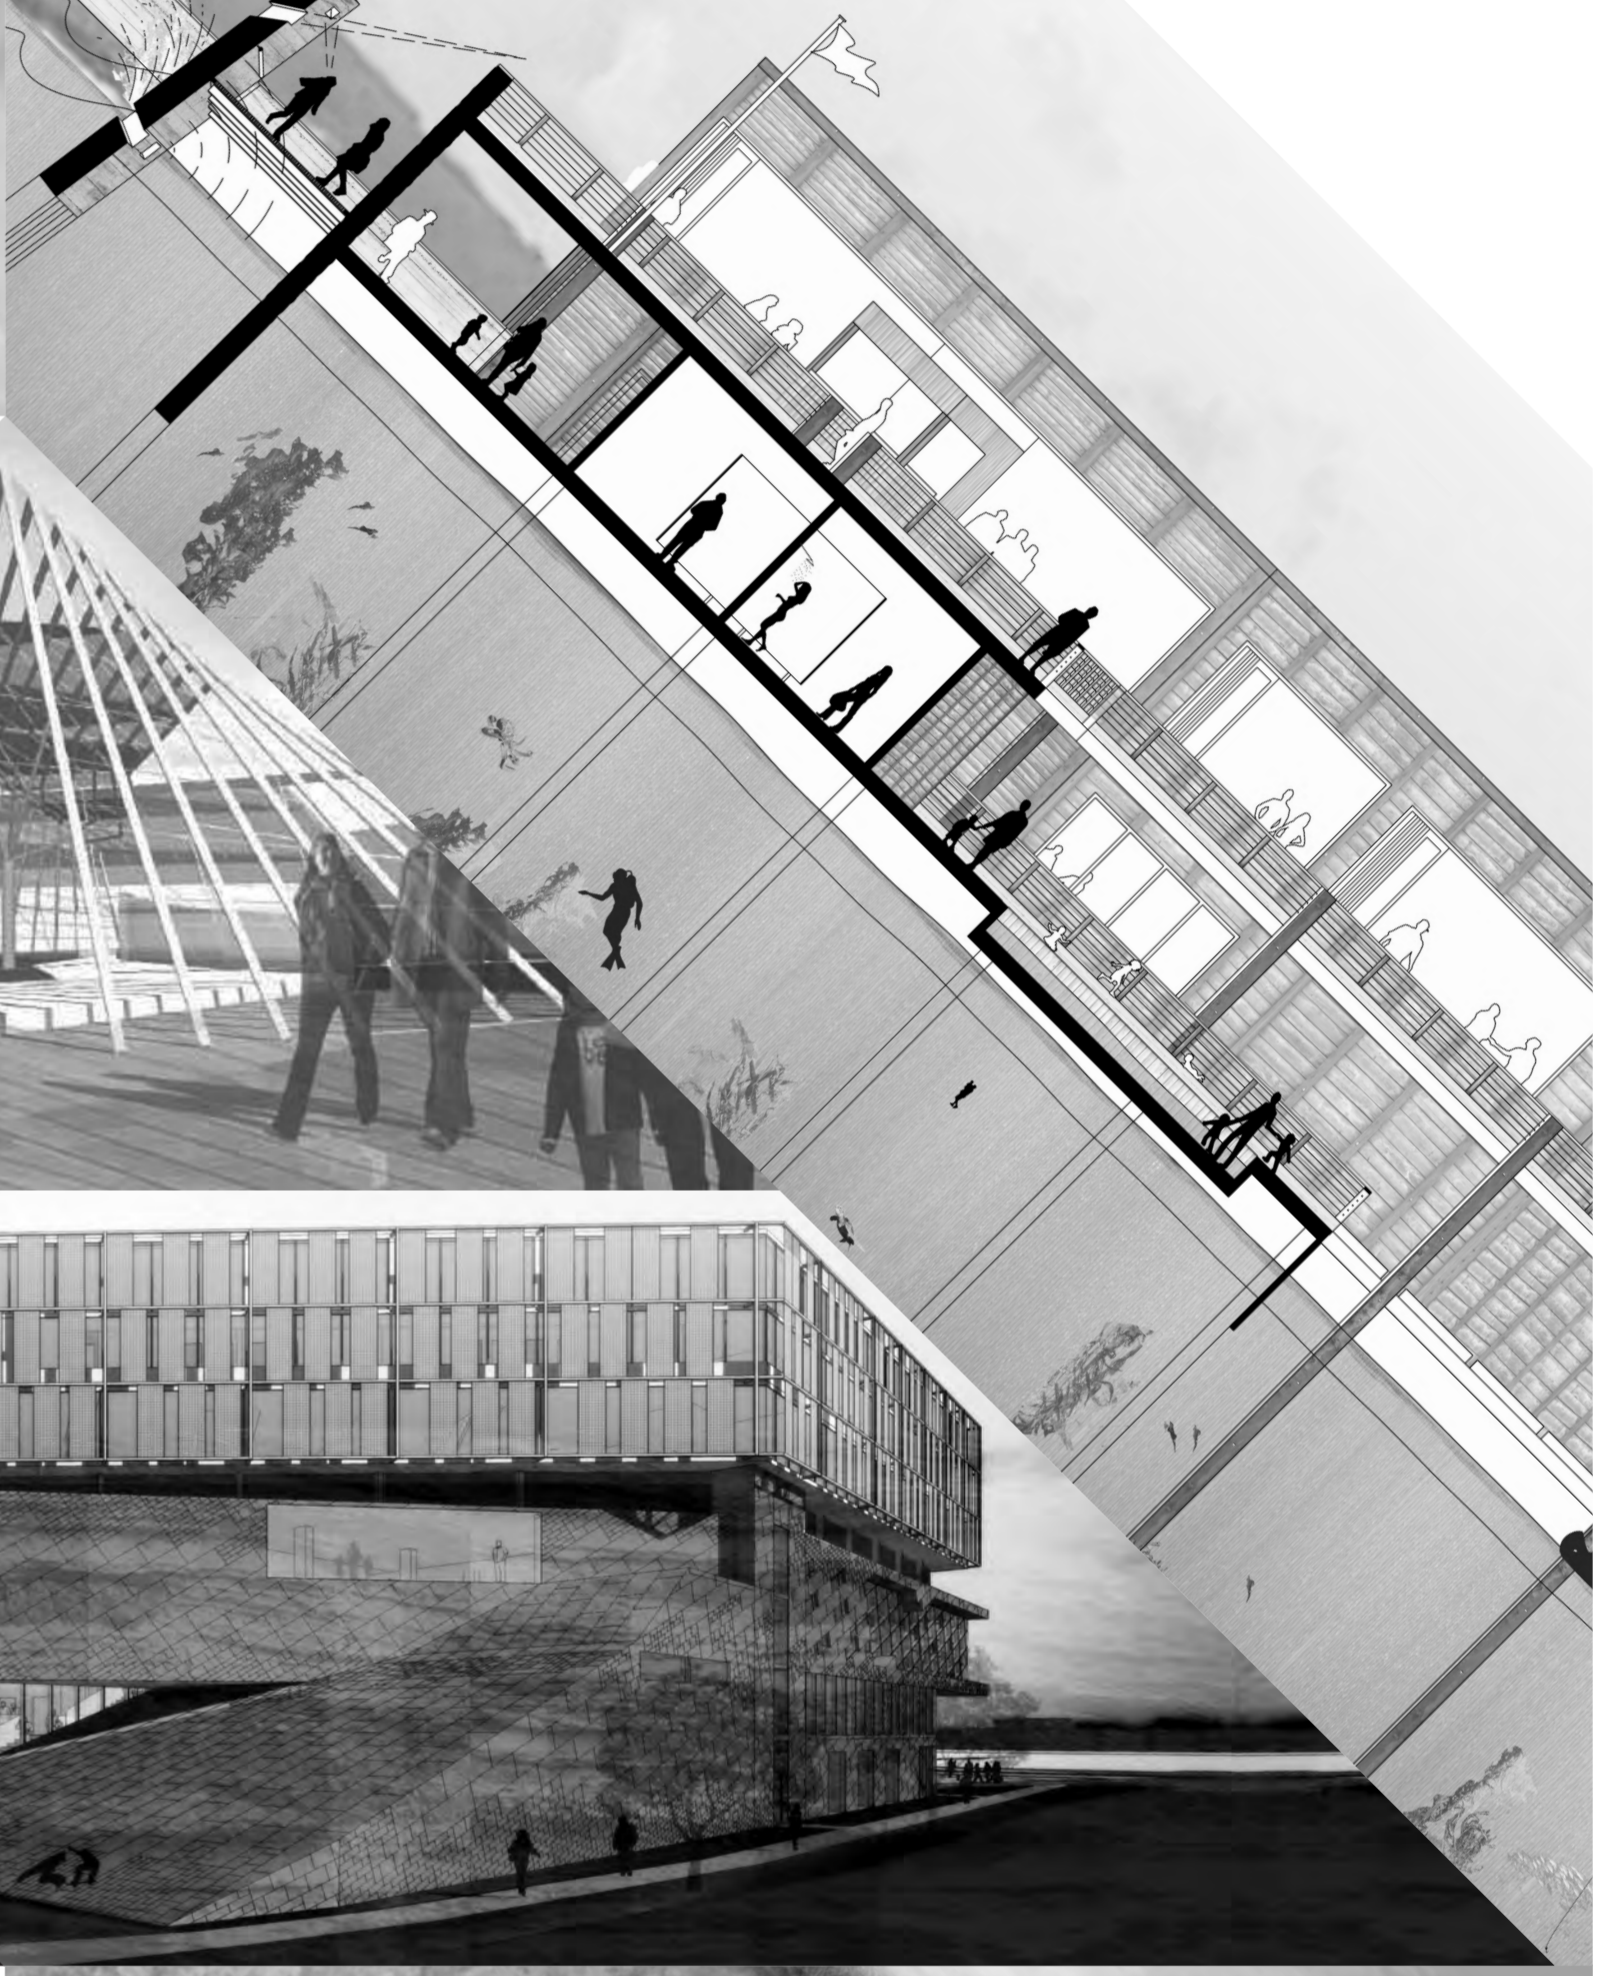

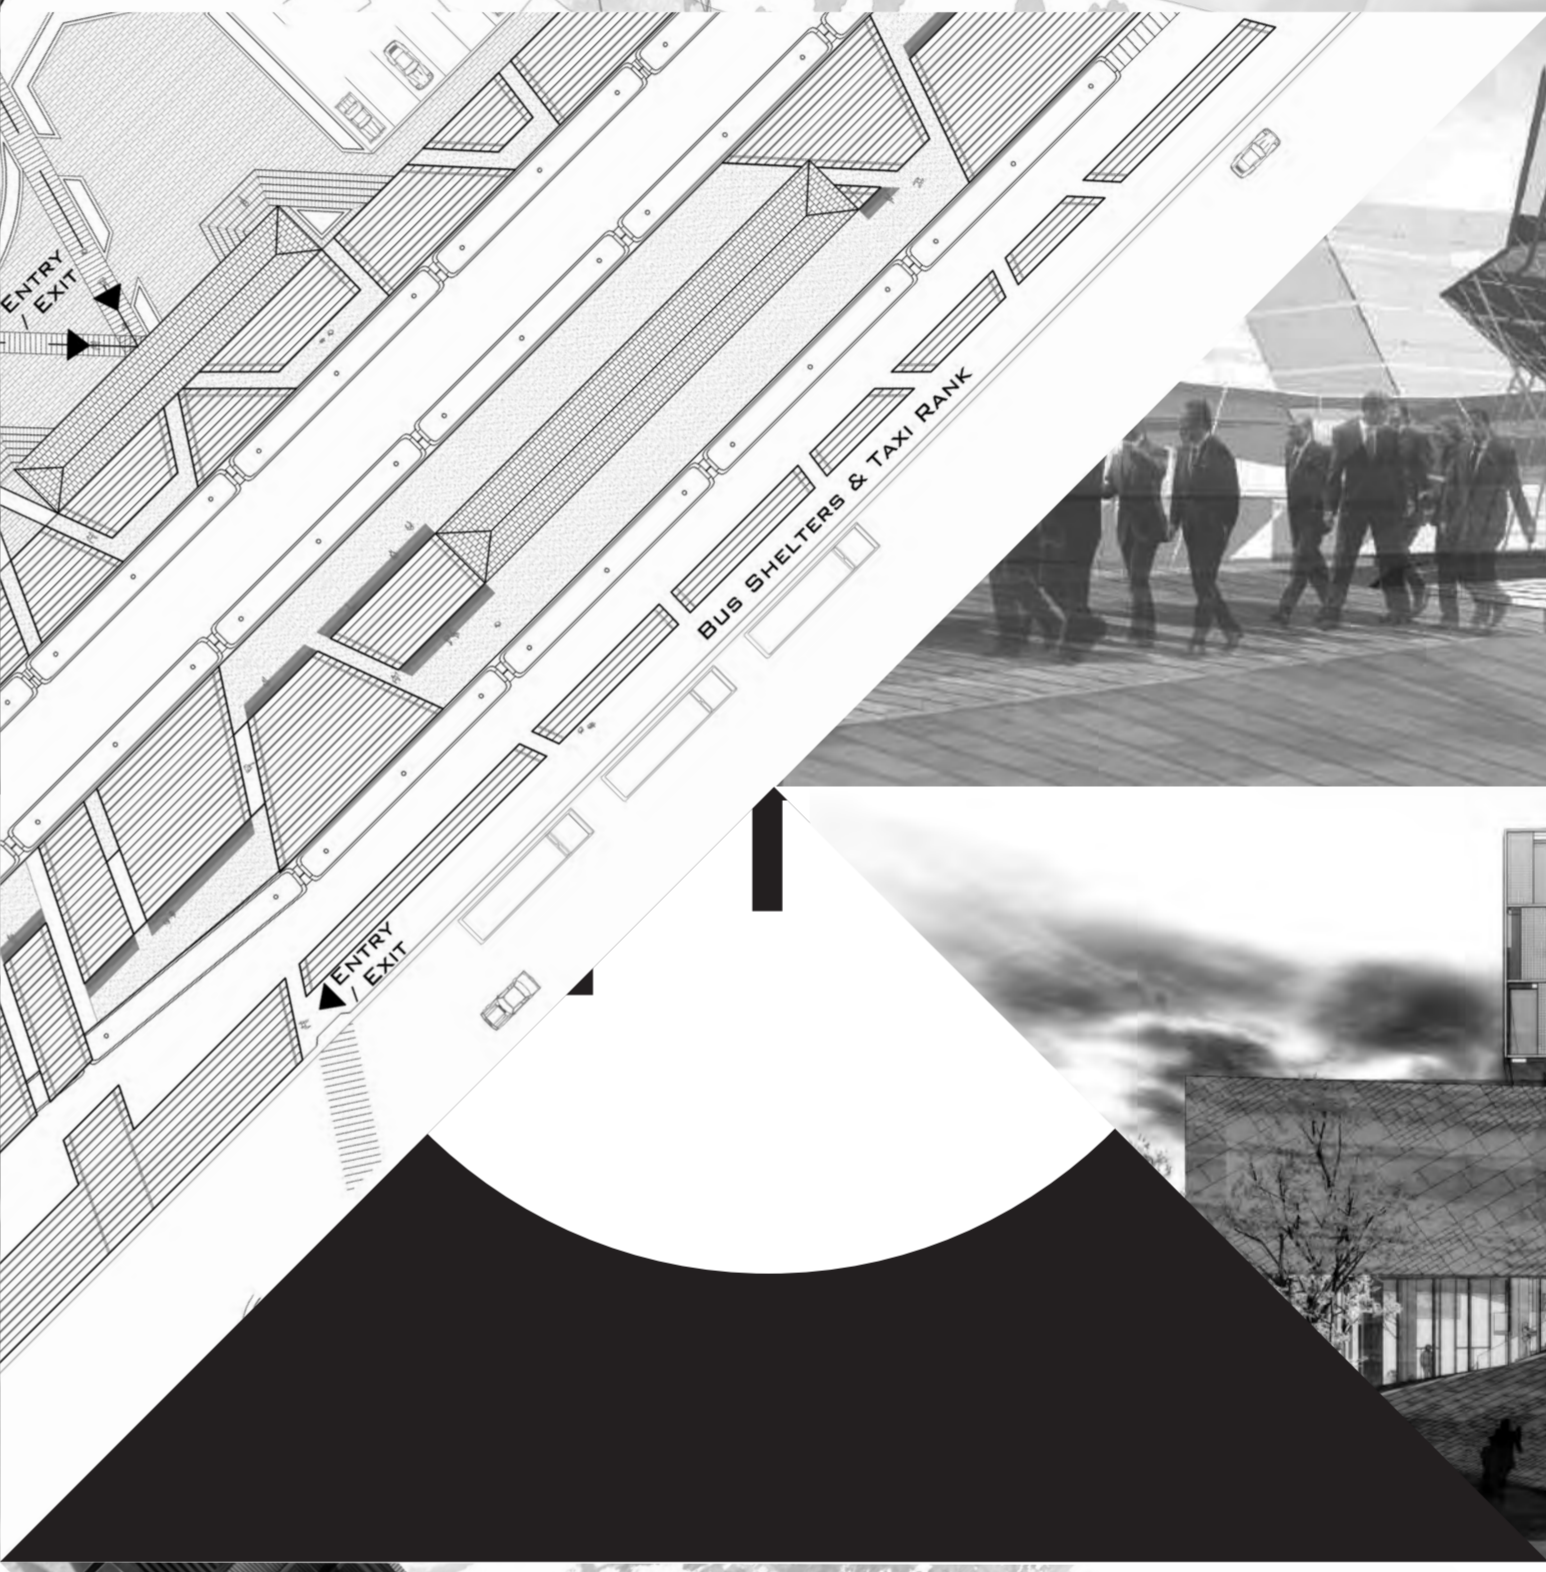

a+b is Deakin University's School of Architecture and Building

At Deakin University students learn how to design, manage and shape the built environment. Teaching staff from all over the world work with students at Geelong's unique Waterfront campus in our modern design studio, fully-equipped workshop, photographic studio and computer labs to produce the excellent work showcased here.

Our undergraduate courses in Architecture, Construction Management and the combined degree prepare students both for the work place and for further study. a+b also offers a graduate matrix of masters programs encompassing the key built environment professions: Architecture, Landscape Architecture, Urban Design, Planning, Construction, Management and Facilities Management.

Deakin's a+b students are creative, well-prepared and all-rounders with the ability to work in teams and across disciplines. They are well on the way to creating a better, more sustainable, and more responsibly integrated built environment.
