BACHELOR OF ARTS (PSYCHOLOGY)

Course Overview

Design a course around your interests and develop critical thinking skills with the Bachelor of Arts (Psychology), focusing on the study of the mind, its processes and mental states.

This degree combines broad studies in the liberal and creative arts with a specialisation in a scientific discipline.

The course will provide you with skills in:
• the theory and practice of social sciences, humanities and/or arts
• interpreting sources of knowledge
• quantitative and qualitative analysis
• critical, creative and systematic thinking.
