

Deakin University, Australia announces Joint PhD program with TERI University

Applications are invited for admission to the regular (full-time) joint PhD program offered jointly by TERI University, New Delhi, and Deakin University, Australia. The joint PhD program is a multi-disciplinary course offered with the aim to promote high quality doctoral research relating to sustainable development in the areas of **Renewable Energy Engineering, Sustainable Agriculture, Water Science and Governance, Nano-biotechnology and Sustainable Architecture**. Selected scholars will be based at TERI University and will be expected to commence the course in 2016. The doctoral degree is awarded jointly by Deakin and TERI University upon successful completion of the course.

Eligibility criteria

- Completion of a postgraduate degree with a substantial research component or Bachelor of Technology or Bachelor Architecture (or equivalent) with a substantial research component from a recognised leading University with aggregate percentage above 70%.
- Preference given to UGC/NET/GATE qualified applicants.
- Preference given to applicants with a publication profile.

How to apply

Eligible applicants must send the completed PhD Application Form (available at www.teriuniversity.ac.in/how-to-apply), detailed CV, statement of purpose, brief concept note, references and any samples of publications to Mr Prem Suresh at TERI University via email (prem.suresh@teriuniversity.ac.in) and / or to Ms Ruby Majumdar via email (ruby.majumdar@deakin.edu.au) by **COB 15 July 2016**. Please mention "Joint PhD TERI-Deakin" in the subject of the email. Selected applicants may be contacted to attend an interview prior to being invited to apply formally for the joint PhD program.
