2. Changes in 2008

Upgraded training database to Release 2007 1.1. Has caused FTP problems for webopac files due to the closure of port 21. New printing methods under investigation.

Release 2006 software updated to synch database times automatically with Network Time Protocol.

Catalogue redeveloped with new interface. Includes WebBridge links to LibrariesAustralia and to book jacket images from Syndetics. Material type icons introduced.

Airpac. Installed and in production.

ERM installed on production. Resource and license fields customised.

Extended Approval Plan installed and being tested. New load tables for firm orders and approval plan through two vendors.

Electronic Serials Invoicing being tested.

ResearchPro. Deinstalled from a local server. Now using WebFeat for federated search.

Label printing. Initial investigation into new procedures using Release 2007 print templates. New PCs allocated for label printing.

Batch deletion of holdings from LibrariesAustralia. New procedures implemented using create lists and export records in data exchange to streamline workflows.

Web Access Management statistics examined and reworked to produce numbers of discrete patrons logging on to databases remotely per month, rather than number of files downloaded. Three new databases added to “databases from home” service.
