## Changes in 2011

- Used Review File Maintenance to rebuild Create Lists into 293 lists, along similar lines to Ballarat (as described in [Rose Counsel's AIUG presentation in 2009](#)). Carried out over Christmas/New Year break.
- Upgraded to Release 2009B 1.4 in June. Intended to participate in integrated beta testing of Release 2011, but current server OS is too old to run it (RHEL 3).
- Trialled Encore Synergy in January/February, along with Summon, WorldCat Local and EBSCO Discovery Service. [EBSCO Discovery Service](#) was selected and implemented.
- Working with ILL on an altered export profile for exporting catalogue data to EDS.
- Self-upgrade to Encore 4.1 scheduled for November.
- Working on virtualisation of Millennium and Encore on VMware ESX infrastructure. Server migration scheduled for December.
