Your future in design

Strong industry links to get you ahead
Design degrees at Deakin are informed by industry leaders across the world. We’re active members of the Design Institute of Australia (DIA) and the International Council of Design (Ico-D) and support the Australian Graphic Design Association (AIGDA). Our design degrees are formally recognised by the DIA and meet industry standards, so that you stand out to employers when you graduate.

Our engineering degrees are developed in collaboration with Engineers Australia. This long-standing partnership ensures that our curriculum’s relevant and you develop skills that employers are looking for.

Our engineering industry connections extend beyond course design to include student placements, projects and our industry advisory group which includes members from:

• Air Radiators
• AusNet Services
• Barwon Water
• Ford
• Iscar
• Norman Disney & Young
• SEW-EURODRIVE
• Thales.

Deakin’s architecture qualifications are recognised nationally by industry through course accreditations and are regularly examined by key professional groups such as Australian Institute of Architects (AIA), Architects Accreditation Council of Australia (AACA) and Architects Registration Board of Victoria (ARBV). Our Bachelor of Design (Architecture) and Master of Architecture are also recognised internationally, for example, by the Board of Architects Malaysia.

Through these courses, you’ll also have an opportunity to undertake a discipline-specific industry placement, so you can get on-the-job training.

#1 university in Victoria for student satisfaction
Year on year, our students are the most satisfied students of all Victorian universities. We’ve ranked this highly for the past 10 years, with students being particularly happy with our:

• teaching
• learning resources
• student support
• skills development
• learner engagement.

1 Australian Graduate Survey 2010–2015, Graduate Outcomes Survey 2016–2019 (GOS), Quality Indicators for Learning and Teaching (QILT).

Your future in design

Get hands-on in state-of-the-art facilities
Learn in purpose-built design facilities across all of our campuses to enhance your knowledge and gain practical skills to prepare you for work once you graduate. Enjoy extensive access to cutting-edge equipment in dedicated design, engineering and architecture studios, with a focus on design and innovative approaches to learning.

Centre for Advanced Design in Engineering Training (CADET)
Access some of the best engineering facilities in Australia to create your designs through combinations of:
- computer simulation
- prototyping
- testing
- manufacturing.

a+b studio
Our open plan design studio is a great place to get creative and collaborate on projects.

Architecture and built environment workshop
Create models in a hands-on environment with:
- laser cutters
- 3D printers
- a full selection of hand and electric tools.

Phoenix Gallery at the Melbourne Burwood Campus
Showcase your talents through mixed-media and pop-up installations.

Dedicated workspaces
Develop your skills in our:
- design studios
- digital photography printing and editing facilities
- photographic darkroom
- creative media labs.

The Project Space at the Geelong Waterfront Campus
Exhibit your work at our contemporary and experimental gallery space.

Gain the skills that employers value
From your first year, you’ll gain practical, hands-on design experience.
- in architecture you’ll:
  - build models
  - examine professional architects’ projects
  - develop drawing, digital design and communication skills.
- As a design student, you’ll collaborate with students across other disciplines to encourage innovation and graduate as a well-rounded creative practitioner.

Learn from leaders in their field
Be inspired, encouraged and supported through every stage of your studies. Our academic staff are experienced industry professionals who are enthusiastic about sharing their skills and knowledge and offering you valuable industry insights.

Travel overseas
Get a head start in your career while gaining credit towards your degree with a work integrated learning experience. You could take up an internship to add to your portfolio while gaining valuable industry contacts and experience. For example, design students (3D animation, digital technologies and visual communication) have the opportunity to travel to Asia for a team internship and explore unique cultures and emerging creative practices.

You can also see the world with an international study tour, volunteer placement or exchange at one of Deakin’s partner universities, in more than 40 countries.

3D animation design
Prepare for a multidisciplinary design career as you discover how motion design can be used as an engaging communication platform and a method for transformative social change. You’ll explore a variety of platforms including augmented reality and virtual reality, film, television, advertising, web, motion capture, motion graphics and game design.

Architecture
Explore the design of our physical environments, from residential and cultural through to commercial and industrial. Architecture at Deakin integrates multiple creative and technical fields, as well as skill sets that examine and shape the places we inhabit, through all building types, spaces and locations. From day one you’ll be engaged by ‘doing’ – building models, studying professional architects’ projects, producing drawings and learning about digital design.

Travel overseas
Get a head start in your career while gaining credit towards your degree with a work integrated learning experience. You could take up an internship to add to your portfolio while gaining valuable industry contacts and experience. For example, design students (3D animation, digital technologies and visual communication) have the opportunity to travel to Asia for a team internship and explore unique cultures and emerging creative practices.

You can also see the world with an international study tour, volunteer placement or exchange at one of Deakin’s partner universities, in more than 40 countries.

Skills to get you a job
Gain a competitive edge in the workplace with real-world expertise and practical skills. Deakin is ranked the #1 university for both generic real-world expertise and practical skills. Deakin is also considered to be the #1 university for both generic real-world expertise and practical skills. Deakin is also considered to be the #1 university for both generic real-world expertise and practical skills.

Digital technologies design
Digital technologies have become an integral part of our everyday lives. Combine strong foundations in design thinking and strategies with the technical skills required to delve into software design, user interface design and design for augmented and virtual realities.

Civil engineering
Learn to inspire the design, construction and management of our cities and maintain the built infrastructure systems that are necessary for our day-to-day lives. Become a design-driven, innovative and entrepreneurial engineer with skills to succeed globally in a rapidly-changing, ever-evolving industry.

Creative technologies
Use your creative and technical skills to explore interactive media design, game design, robotics systems and creative technologies production. Enhance your ability to design and build the innovative computing products that will help meet 21st century needs.

Mechatronics engineering
Robots won’t be the only thing you build when you study mechatronics with us. Learn how to integrate electronic devices with mechanical design and IT to deliver innovative solutions to diverse real-world problems, like the automation of industrial processes using robotics and other cutting-edge technologies, self-driving cars and even artificial hearts.

Visual communication design
Learn the tools, strategies and design thinking methodologies needed to be an adaptable, multidisciplinary communication designer. Shape your ideas into practical and attractive propositions for users, customers and society as a whole.

Your dream course starts here. Take a look through our disciplines (also known as study areas) to choose your area of expertise. Knowing which discipline you’re interested in helps career advisers find the best course for your interests. Corresponding courses are featured in the following pages, so you can learn more about what you’ll study, work experience opportunities and the types of careers you could pursue. When you choose a course, you can then pick which discipline to specialise in within that course. Visit deakin.edu.au for detailed discipline and course information, including a description of the units within each degree.
Courses

Bachelor of Design (3D Animation) embeds animation into design, focusing on the requirements of the client, delivering projects to suit industry standards across digital platforms. Explore design histories and theories and develop creative, technical and analytical skills in animation production through the exploration of computer graphic animation (3D CG modelling, character design and rigging, CG lighting and rendering) and motion capture techniques.

Professional recognition
Deakin’s Bachelor of Design (3D Animation) is recognised by the Design Institute of Australia (DIA), so you’ll be up-to-date with the current industry practices and developments. The DIA also offers student membership and access to some of the biggest design events and experts in the nation.

Careers
As a graduate, you’ll be a well-equipped multidisciplinary designer ready to work in motion design, animation, film, television, web design, augmented reality (AR) and virtual reality (VR). Roles include:
- 2D or 3D animator
- augmented reality designer
- arts editor
- cartoonist
- digital designer
- game developer
- illustrator
- modeler
- motion capture technician
- motion graphics designer
- multimedia developer
- VR designer.

Course structure
This 24-credit-point course consists of 10 common core units, three 3D Animation core units, four 3D Animation course electives and six open elective units.

Trimester 1
- Year 1
  - Design Thinking
  - Design Skills and Technologies 1
  - Designing 3D Environments
  - Course elective from List A
- Year 2
  - Designing User Experience
  - Course elective from List B
  - Elective x 2
- Year 3
  - Individual Design Portfolio
  - Design to Change the World
  - Elective x 2

Trimester 2
- Year 1
  - Design Laboratory
  - Design Skills and Technologies 2
  - Designing 3D Motion
  - Course elective from List A
- Year 2
  - Professional Practice in Design
  - Interactive Animation Design Studio
  - Design Strategies
  - Course elective from List B
- Year 3
  - Collaborative Design Project (2 credit points)
  - Elective x 2

deakin.edu.au/course/bachelor-design-3d-animation

1. Students who are applying to commence in Trimester 3 under a pathway agreement and/or with Recognition of Prior Learning may not receive course credit. Students should seek advice before applying for this course.
2. This course structure should be used as a guide only and advice should be sought when selecting units.
3. These units are available to students who are applying to commence in Trimester 3.
4. Credits in the programme are rounded down to the nearest whole number of credit points.

Bachelor of Design (Digital Technologies)
Creative problem-solvers with a love of design and an aptitude for technical IT skills should explore our Bachelor of Design (Digital Technologies). Learn about User Experience (UX), design strategies, digital technologies and interactive media, to deliver impactful digital solutions for creative and social issues in our changing world.

Professional recognition
Deakin’s Bachelor of Design (Digital Technologies) is recognised by the Design Institute of Australia (DIA), so you’ll be up-to-date with the current industry practices and developments. The DIA also offers student membership and access to some of the biggest design events and experts in the nation.

Course structure
This 24-credit-point course consists of 15 core units, two course elective units and six open elective units.

Trimester 1
- Year 1
  - Design Thinking
  - Design Skills and Technologies 1
  - Design Laboratory
  - Design Skills and Technologies 2
- Year 2
  - Designing User Experience
  - Course elective from List A
  - Elective x 3
- Year 3
  - Individual Design Portfolio
  - Design to Change the World
  - Elective x 2

deakin.edu.au/course/bachelor-design-digital-technologies

1. This course structure should be used as a guide only and advice should be sought when selecting units.
2. Academic Integrity (AM012) is a compulsory 0-credit-point unit that you must undertake as part of this course.
3. Students must visit the current handbook to access a comprehensive list of course rules.

Careers
Graduates are open to many career opportunities, in creative agencies, advertising and design studios and corporate companies, taking up roles as:
- design engineers
- digital designers
- digital media designers
- graphic designers
- industrial designers
- User Interface (UI) designers
- virtual reality experience designers
- web designers.

‘Deakin’s staff are what make the university as a whole so special, memorable and impactful. Not only did I create meaningful relationships with the staff, but they helped and still do help connect me to the industry.’

Caleb Lun
Bachelor of Design (Visual Communication) graduate
Graduates are open to many career opportunities, including in the areas of advertising, graphic design studios, print houses, publishers, corporate companies, government and private practices. Potential careers include:
- communications designer
- art director/creative director
- animation and motion designer
- web designer
- graphic designer
- interactive designer
- illustrator
- packaging (FMCG) designer

**Professional recognition**
Deakin’s Bachelor of Design (Visual Communication) is recognised by the Design Institute of Australia (DIA), so you’ll be up-to-date with the current industry practices and developments. The DIA also offers student membership and access to some of the biggest design events and experts in the nation.

**Course structure**
This 24-credit-point course consists of 10 common core units; two level 1 visual communication units, two level 1 visual communication course electives, three level 2 visual communication units and six open elective units.

---

**Bachelor of Design (Architecture)**

Understand the built environment, ecosystem and community to create meaningful and sustainable designs for everything from houses to skyscrapers – anywhere in the world.

With an eye for detail and a love of drawing, you’ll harness creativity with urban planning to make an impact with your designs.

A folio is not required as part of our admissions process for the Bachelor of Design (Architecture).

**Professional recognition**
When followed by successful completion of an accredited Master of Architecture, the Bachelor of Design (Architecture) is accredited within Australia by the:
- Australian Institute of Architects (AIA)
- Architects Registration Board of Victoria (ARBV)
- Architects Accreditation Council of Australia (AACA)

This course has also been validated and recognised by the Board of Architects Malaysia (Lembaga Arkitek Malaysia), and included on their ‘List of Recognised Architectural Programmes’.

**Careers**
Deakin architecture graduates work across the globe, from the UK, Berlin and Oslo to China, Dubai and the US. Our graduates have pursued the following roles:
- 3D architectural modeller
- architectural consultant or designer
- building designer
- building project manager
- design coordinator
- quantity surveyor
- structural drafter

Once you’ve completed further studies in a Master of Architecture and have gained your registration to practise, you can pursue a career as a practising architect and work in private architectural practices, government organisations, property development, or other building and design fields.

**Work experience**
You can apply to undertake a discipline-specific industry placement as an elective option of your course.

deakin.edu.au/ebel/wil
Courses

Combined course
Bachelor of Design (Architecture)/Bachelor of Construction Management (Honours)

Gain knowledge, skills and practical experience in architecture, design and construction in this unique combined course that explores smart, sustainable design.

Learn to design striking buildings that are economically and environmentally viable and manage projects, no matter what their scale or size.

Professional recognition
The construction management stream of this combined course is professionally accredited by industry.

Graduates qualify for membership of:
• Australian Institute of Building (AIB)
• Australian Institute of Quantity Surveyors (AIQS)
• Chartered Institute of Quantity Surveyors (RICS).

The architecture stream is recognised in Australia by the following organisations, provided graduates go on to complete an accredited Master of Architecture course they will have an accredited academic qualification and on their way to becoming a registered architect:
• Australian Institute of Architects (AIA)
• Architects Registration Board of Victoria (ARBV)
• Architects Accreditation Council of Australia (AACA).

Careers
This cross-discipline course gives you more options for your future career. Career opportunities include:
• 3D architectural modeller
• architectural consultant or designer
• building designer
• building project manager
• construction manager
• drafter
• estimator
• quantity surveyor.

Upon graduating, if you would like to pursue a career as a practicing architect, you will need to complete an accredited Master of Architecture course. This enables you to apply for your registration to practise and work in private architectural practices, government organisations, property development, or building and design fields.

Opportunities include:

• More careers
• A pathway to success

Course structure
This 40 credit-point course consists of 36 core units (totaling 39 credit points) and one elective unit.

The Core acronym stands for Carbon Positive, Zero Waste, Recycled and Sustainable.

Benjamin McKenzie
Bachelor of Design (Architecture)/Bachelor of Construction Management (Honours) student

A pathway to success
Deakin architecture student, Sharyn Blakemore’s (pictured right) pathway to university was quite unique. After graduating from high school, she completed an Advanced Diploma of Building Design, and then worked in industry before starting her course part time. Now in her third year of Deakin’s Bachelor of Design (Architecture), she’s won a coveted industry award, thanks to her passion for building services engineering.

What industry experience did you have before university?
‘I’ve worked as a building designer for the past seven years, and architecture was always the capstone of the career path I wanted to take. My path may not have been the most straightforward, but learning and working within the industry to confirm this was my true passion, before taking this next step, was right for me.’

What was it about building services engineering that captured your attention?
‘Building Services Engineering was part of my course, and I really connected with it. The idea of designing a space, a home or a building that is comfortable, thermally efficient and meets the needs of its occupants is very appealing to me. Incorporating safe, efficient and healthy environments into the design should be a priority for all designers, architects and engineers.’

Get to Geelong easily
If you’re based in Melbourne, the commute to the Geelong Waterfront Campus is quick and easy. From Docklands, a daily ferry takes 90 minutes, or by the regional rail link from Southern Cross station, you’ll be there in under an hour. If you’re driving from Melbourne’s west, you might find your commute’s as short as 40 minutes.

Find out more about our locations at deakin.edu.au/locations and our accommodation options by visiting deakin.edu.au/life-at-deakin/accommodation.
Courses

Bachelor of Civil Engineering (Honours)

Graduate as an industry-ready civil engineer by studying Deakin’s Bachelor of Civil Engineering (Honours). You’ll combine contemporary theory with hands-on projects to develop the skills needed to confidently design, construct and maintain the built infrastructure systems that are vital in our day-to-day lives. Our Bachelor of Civil Engineering (Honours) covers all the four main areas in civil engineering, namely, structural, water, geotechnical, and road and transport engineering.

Professional recognition

This course is accredited by Engineers Australia, which gives graduates international recognition and the ability to practise as professional engineers in many countries around the world.

Professional Engineering Practice is a compulsory unit in all Deakin engineering degrees. This means you’ll have a minimum of 60 days’ work experience in one or more organisations, giving you insight into your future career options. You’ll also study a range of project-oriented design-based learning and project-based learning units, bringing together theory, site studies and laboratory investigations.

CAREERS

With an international skills shortage in the engineering industry, and roles expected to rise significantly in the next five years, Deakin graduates are in demand both in Australia and further abroad.

Not only that, employers seek out Deakin graduates for their forward-thinking, innovative and entrepreneurial qualities.

Graduates can work in a wide range of areas and industries, including:

- construction companies
- councils
- engineering consultancy firms
- road and transport authorities
- water authorities
- mining industry
- government bodies
- public works departments
- also take a wide range of roles, including:
  - geotechnical engineers
  - research engineers
  - road engineers
  - transportation engineers
  - railway engineers
  - infrastructure engineers
  - structural engineers.

Gain a scholarship to help fund your degree

Barwon Water Scholarship

If you’re a Geelong campus-based commencing student studying an undergraduate degree in one of the following disciplines: engineering, commerce, finance, information technology, public relations, journalism or human resource management, we encourage you to apply for this scholarship. This scholarship is valued at $2000 per year, with a total scholarship value of $6000.

deaquin.edu.au/barwon-water-scholarship

Barwon Water Scholarship for Women in STEM

Female students commencing their first year of study in a course offered by the Faculty of Science, Engineering and Built Environment at the Geelong Waurn Ponds Campus or Geelong Waterfront Campus, are encouraged to apply for a Barwon Water Scholarship for Women in STEM. This scholarship is valued at $2000 per year, with a total scholarship value of $6000.

deaquin.edu.au/course/bachelor-civil-engineering-honours

I always wanted to become a civil engineer. Looking at Deakin’s course content, I realised that it’s more industry-oriented and I thought that would provide a great entry into my dream job as a civil engineer.

Raveena Ranepura Dewage

Bachelor of Civil Engineering (Honours) student

1 Cloud Campus students are required to participate in campus-based internship activities each trimester at the Geelong Waurn Ponds Campus.
2 Only the first year of engineering is available at the Melbourne Burwood Campus. Students undertaking first year at the Melbourne Burwood Campus are required to complete their course either at the Geelong Waurn Ponds Campus or Cloud Campus.
3 Trimester 2 intake is only available at the Geelong Waurn Ponds Campus and Cloud Campus.
4 This course structure should be used as a guide only and advice should be sought when selecting units.
5 Academic Integrity (STP050), Career Tools for Employability (STP102) and Introduction to Safety and Project Oriented Learning (SEJ103) are compulsory 0-credit-point units that you must undertake as part of this course.
Engineering (Honours) graduates may find Deakin’s Bachelor of Electrical and Electronics Engineering programmes appealing. This four-year course includes project-based learning units, bringing hands-on experience and theoretical knowledge to tackle energy production in a changing world.

Deakin’s Bachelor of Electrical and Electronics Engineering (Honours) offers a number of scholarships to encourage successful female students into engineering disciplines. The Women in Power Engineering Scholarship is available to women studying the Bachelor of Electrical and Electronics Engineering (Honours), Bachelor of Mechanical Engineering (Honours) or Bachelor of Environmental Engineering (Honours) – with successful applicants receiving a cash payment of up to $50,000 per year for the normal duration of their course.

deakin.edu.au/ausnet-services-women-in-power-engineering-scholarship

Professional Engineering Practice is a compulsory unit in all Deakin engineering degrees. This means you’ll have a minimum of 60 days’ work experience in one or more organisations, giving you insight into your future career options. You’ll also study a range of project-oriented design-based learning and project-based learning units, bringing together theory, site studies and laboratory investigations, including Electrical Systems Engineering Project, Power System Protection Design and Safety.

Coursed

Deakin’s Bachelor of Electrical and Electronics Engineering (Honours) graduates may find employment across a range of roles, including:

- automotive electrician
- clear car engineer
- computer engineer
- design engineer
- electrical design engineer
- electronic test engineer
- industrial engineer
- multimedia systems specialist
- PLC programmer
- power engineer
- research engineer
- robotics engineer and technician
- solar cell technician
- special effects technician
- telecommunications engineer.

Professional recognition

This course is accredited by Engineers Australia, which gives graduates international recognition and the ability to practise as professional engineers in many countries around the world.

deakin.edu.au/course/bachelor-electrical-and-electronics-engineering-honours

deakin.edu.au/design

The learning environment at Deakin is very collaborative. Academic staff are always available for assistance and students work alongside one another.

Jordan Ritchie
Bachelor of Mechanical Engineering (Honours) student
## Courses

### Bachelor of Mechatronics Engineering (Honours)

Deakin’s Bachelor of Mechatronics Engineering (Honours) prepares you to be an industry-ready professional engineer, capable of creating the electronics, robots and autonomous systems that power our future. With ground-breaking facilities and a strong focus on project-based learning, we’re changing the way students train to become engineers.

**Work experience**
Professional Engineering Practice is a compulsory unit in all Deakin engineering degrees. This means you’ll have a minimum of 60 days’ work experience in one or more organisations, giving you insight into your future career options. You’ll also study a range of project-oriented design-based learning and project-based learning units, bringing together theory, site studies and laboratory investigations, including Design Fundamentals, Electrical Systems Engineering Project and Embedded System Design.

### Careers
With an international skills shortage in the industry, and roles expected to rise significantly in the next five years, Deakin graduates are in demand both in Australia and further abroad. Not only that, employers seek out Deakin graduates for their forward-thinking, innovative and entrepreneurial qualities. As a mechatronics engineering graduate, you could be employed in the following roles:
- automation engineer
- biomedical service engineer
- control systems engineer
- electronics test engineer
- robotics engineer

### Professional recognition
This course is accredited by Engineers Australia, which gives graduates international recognition and the ability to practice as professional engineers in many countries around the world.
