Recycling and Clean Energy
Commercialisation Hub

Partner with us to address local and global environmental challenges

Reach beyond what you thought was possible
– together we'll turn your ideas into reality
and create a cleaner, greener future.

deakin.edu.au/reach

- ▶ **REACH** – Collaborating with partners to turn ideas into reality. Together we can develop new products, processes and technologies that will change the way we travel, the energy we use, how our food is made and reduce and reuse the packaging of the things we buy.

Put your business at the forefront of Australia's sustainable manufacturing revolution

Become part of Australia's largest recycling and clean energy advanced manufacturing ecosystem by partnering with Deakin University.

Together we'll drive innovation and grow Australia's sovereign manufacturing capability.

Deakin is ready to work with you to develop greener supply chains and to help your business move from a throughput to a circular economy.

Backed by a \$50 million grant from the Australian Government's inaugural Trailblazer Universities Program, industry and university support take the total REACH program value to around \$380 million.

Deakin is proud to be a trailblazer

- > Deakin is the only Victorian Trailblazer university and one of six universities in the Australian Government's trailblazer program.

Deakin's REACH is expected to:

- > Create \$1.4 billion revenue in the next decade
- > Create 2500 jobs – most of which will be in regional areas.

REACH funding is a tremendous opportunity for Deakin to work with progressive, innovation-driven industry partners to help them leverage enormous market opportunities for recycling and clean energy technologies to deliver carbon-neutral solutions.

Vice Chancellor
Professor Iain Martin

A partnership you can be confident will deliver

By connecting your capabilities and ideas with our researchers, we can develop solutions that are world-first or specific to your business.

We're ready to help you capture market opportunities in:

As a Deakin REACH Partner you'll get access to:

- ✓ World-leading experts who will work with you to solve your challenges
- ✓ Potential co-funding for your project
- ✓ Commercialisation support – including business strategy, plans and project management
- ✓ Multimillion dollar research facilities and cutting-edge advanced manufacturing facilities
- ✓ Workforce training to integrate new technologies into your manufacturing
- ✓ Tap into new talent – host a Deakin intern and/or work with progressive, future-focused graduate researchers.

Be a trailblazer – become part of Australia's largest recycling and clean energy advanced manufacturing ecosystem

- > Explore if your idea can be scaled for production.
- > We help businesses of all sizes, including small and medium enterprises.
- > We've set a target for 80 per cent of our REACH projects to be delivered in regional Australia so we create local jobs, now and into the future.

We're looking to take on projects to build sovereign capability to:

- > advance battery technologies with greater energy density and shorter charge times
- > enhance local capacity to store and use hydrogen across a broad technology base
- > convert organic and inorganic waste into higher-value products to transition current linear waste processes to circular and more sustainable practices.

- Why Deakin is a trusted partner for 500+ leading businesses and government agencies:
