Design the infrastructure of the modern world

Develop the engineering expertise to design infrastructure, power generation and complex mechanical systems. Ranked in the top 1% in the world for engineering and technology1, you’ll get a competitive edge at Deakin. Tackle real-world engineering problems in collaborative projects with industry partners and through work placements.

Your future in engineering

A hands-on approach for a successful career
Gain practical learning experiences throughout your engineering course with our innovative and student-centred teaching method: Project-oriented design-based learning (PODL). In collaboration with industry, PODBL is a key feature of our engineering degrees and will help you graduate ready to excel in your career.

As well as theory-based classes, you’ll spend 50% of every trimester learning via team-based projects, taking real-world industry problems, and designing, researching, testing and evaluating solutions, with the support of an academic.

Work integrated learning gives you the chance to undertake a full-time or part-time industry placement as part of your studies.

To learn more about industry placements, visit deakin.edu.au/sebe/wil.

Gain professional accreditation
The School of Engineering’s long-standing partnership with Engineers Australia is an important relationship and informs our teaching program. This ensures our curriculum is relevant and that you’ll graduate with the skill set that employers want. Study civil, electrical and electronics, mechanical or mechatronics engineering and you’ll get a degree that’s professionally accredited and internationally recognised – so you’ll be able to practise as a professional engineer in numerous countries around the world.

Experience state-of-the-art facilities
Gain access to world-class facilities located within the Centre for Advanced Design in Engineering Training (CADET).

CADET features over $8 million worth of teaching equipment. You’ll also have access to civil engineering specialised laboratory facilities, including geotechnical (soil and rock), hydraulics/hydrology (water), structural and durability.

Our academic and technical staff bring a wealth of experience, from industry to world-leading research, in Australia and around the globe.

deakin.edu.au/eng-facilities
Your future in engineering

Real-world connections with industry
Our connection to industry extends beyond curriculum and course design to include student placements, projects and our industry advisory group, which includes members from:

• SEW-EURODRIVE
• AusNet Services
• Iscar
• Thales
• Norman Disney & Young
• Barwon Water
• Ford
• Air Radiators.

#1 university in Victoria for student satisfaction
Year on year, our students are the most satisfied students of all Victorian universities. We’re ranked this highly for the past 10 years, with students being particularly happy with our:

• teaching
• learning resources
• student support
• skills development
• learner engagement.

Travel the world
Deakin Abroad
Explore our various overseas programs, including trimester abroad, short-term partner programs, faculty-led study programs, overseas internships and international volunteering opportunities. Deakin engineering students have studied and completed work experience in a range of countries, including China, India, Taiwan, Malaysia, USA and Sweden. Study abroad programs offer you the opportunity to pursue your degree while learning about techniques and theories that foreign countries employ, enhancing your career opportunities.

deakin.edu.au/overseas-study

Skills to get you a job
Gain a competitive edge in the workplace with real-world expertise and practical skills. Deakin is ranked the #1 university for both generic skills and good teaching in Victoria.

1 Australian Graduate Survey 2010–2015, Graduate Outcomes Survey 2016–2019 (GOS), Quality Indicators for Learning and Teaching (QILT).
2 Graduate Outcomes Survey 2019.

The student experience
Design and innovation are at the heart of engineering at Deakin. Hear what students have to say about studying engineering by visiting deakin.yt/study-eng.

Disciplines
Choose your area of expertise from our disciplines (also known as study areas). Knowing which discipline you’re interested in helps career advisers find the best course for your interests.

Visit deakin.edu.au for detailed discipline and course information, including a description of the units within each degree.

• Civil engineering
• Electrical and electronics engineering
• Environmental engineering
• Mechanical engineering
• Mechatronics engineering
• Software engineering

Courses to careers
Visit explore.deakin.edu.au to kickstart your course and career exploration. With more than 600 paired courses and careers, it’s the perfect destination for you to discover your future career.

Award recipients for the promotion of gender equity in STEMM
Deakin has received the prestigious Athena SWAN Institutional Bronze Award for its programs that encourage more women to study, research and work in Science, Technology, Engineering, Mathematics and Medicine (STEMM).

The Athena SWAN program is run by Science in Australia Gender Equity (SAGE), and the Bronze award recognises Deakin’s extensive work in promoting gender equity, inclusivity and diversity.
Women embarking on the following courses can apply for the scholarship:

- Bachelor of Civil Engineering (Honours)
- Bachelor of Mechatronics Engineering (Honours)
- Bachelor of Mechanical Engineering (Honours)
- Bachelor of Cyber Security
- Bachelor of Information Technology
- Bachelor of Software Engineering (Honours)
- Bachelor of Mechanical Engineering (Honours)
- Bachelor of Mechatronics Engineering (Honours)

Not only that, employers seek out Deakin graduates in demand both in Australia and further abroad.

\[\text{deakin.edu.au/ignited-scholarship}\]

IGNITED Scholarship for women in engineering

If you’re female and about to start an undergraduate degree in engineering, information technology or construction management, you could be eligible for an IIGNITED Scholarship, designed to ignite women’s interest in industry areas traditionally dominated by men.

Each scholarship is valued at $5000 per year over the normal duration of the course and recipients are also assigned an academic mentor.

Women embarking on the following courses can apply for the scholarship:

- Bachelor of Computer Science
- Bachelor of Construction Management (Honours)
- Bachelor of Cyber Security
- Bachelor of Information Technology
- Bachelor of Software Engineering (Honours)
- Bachelor of Civil Engineering (Honours)
- Bachelor of Electrical and Electronics Engineering (Honours)
- Bachelor of Environmental Engineering (Honours)
- Bachelor of Mechanical Engineering (Honours)
- Bachelor of Mechatronics Engineering (Honours)

\[\text{deakin.edu.au/ignited-scholarship}\]

Professional recognition

This course is accredited by Engineers Australia, which gives graduates international recognition and the ability to practise as professional engineers in many countries around the world.

Professional Engineering Practice is a compulsory unit in all Deakin engineering degrees. This means you’ll have a minimum of 60 days’ work experience in one or more organisations, giving you insight into your future career options. You’ll also study a range of project-oriented design-based learning and project-based learning units, bringing together theory, site studies and laboratory investigations.

CAREERS

With an international skills shortage in the engineering industry, and roles expected to rise significantly in the next five years, Deakin graduates are in demand both in Australia and further abroad.

Not only that, employers seek out Deakin graduates for their forward-thinking, innovative and entrepreneurial qualities.

Graduates can work in a wide range of areas and industries, including:

- construction companies
- councils
- engineering consultancy firms
- road and transport authorities
- water authorities
- mining industry
- government bodies
- public works departments
- also take a wide range of roles, including:
  - geotechnical engineers
  - research engineers
  - road engineers
  - transportation engineers
  - railway engineers
  - infrastructure engineers
  - structural engineers

\[\text{deakin.edu.au/course/bachelor-civil-engineering-honours}\]

\[\text{I always wanted to become a civil engineer. Looking at Deakin’s course content, I realised that it’s more industry-oriented and I thought that would provide a great entry into my dream job as a civil engineer.}\]

Raveena Ranepura Dewage  
Bachelor of Civil Engineering (Honours) student

Courses

Bachelor of Civil Engineering (Honours)

Graduate as an industry-ready civil engineer by studying Deakin’s Bachelor of Civil Engineering (Honours). You’ll combine contemporary theory with hands-on projects to develop the skills needed to confidently design, construct and maintain the built infrastructure systems that are vital in our day-to-day lives. Our Bachelor of Civil Engineering (Honours) covers all the four main areas in civil engineering, namely, structural, water, geotechnical, and road and transport engineering.

Professional recognition

This course is accredited by Engineers Australia, which gives graduates international recognition and the ability to practise as professional engineers in many countries around the world.

Professional Engineering Practice is a compulsory unit in all Deakin engineering degrees. This means you’ll have a minimum of 60 days’ work experience in one or more organisations, giving you insight into your future career options. You’ll also study a range of project-oriented design-based learning and project-based learning units, bringing together theory, site studies and laboratory investigations.

\[\text{deakin.edu.au/ignited-scholarship}\]
Gain market-ready skills when you study electrical engineering, including skills in renewables and alternative energy generation, and understand the role of renewables and alternative energy in electrical engineering, including skills in electrical systems, design, and project management.

**Work experience**
Professional Engineering Practice is a compulsory unit in all Deakin engineering degrees. This means you'll have a minimum of 60 days' work experience in one or more organisations, giving you insight into your future career options. You'll also study a range of project-oriented design-based learning and project-based learning units, bringing together theory, site studies and laboratory investigations, including Electrical Systems Engineering Project, Power System Protection Design and Safety.

**Careers**
Deakin's Bachelor of Electrical and Electronics Engineering (Honours) graduates may find employment across a range of roles, including:
- automotive electrician
- clear air engineer
- design engineer
- electrical design engineer
- electronic test engineer
- industrial engineer
- multimedia systems specialist
- PLC programmer
- power engineer
- research engineer
- robotics engineer and technician
- solar cell technician
- special effects technician
- telecommunications engineer.

**Bachelor of Environmental Engineering (Honours)**
Graduate industry-ready to tackle global environmental issues such as climate change, sustainability, and pollution, when you study environmental engineering at Deakin. Gain a broad knowledge across the industry, with solutions-led technical skills to put you in high demand in this ever-changing field.

**Work experience**
You'll gain industry experience by completing at least 60 days of practical work experience in an engineering workplace, developing and enhancing your understanding of the environmental engineering profession, career outcomes and the opportunity to establish valuable professional networks.

**CAREERS**
Graduates will be in high demand in this rapidly evolving field, addressing global issues like climate change impacts and improving sustainability across a range of industries. Graduates may find employment in:
- air pollution and emissions control
- catchment and natural resource management
- environmental protection
- environmental consultancy
- government departments – local, state or federal
- resources – mining, oil and gas
- waste management and recycling
- water and wastewater treatment.

**Course structure**
This 32-credit-point course consists of 31 credit points of core units and one elective unit.

**The teaching and support staff at Deakin are brilliant. They each have remarkable workplace expertise that they bring to life in academic material, and course work is built around real-world application.**

Vaughn Mitchell
Bachelor of Environmental Engineering (Honours) student
Skills in challenges such as the Shell Eco-Marathon test your mechanical design and engineering skills, as well as your project management, communication, and control, while developing professional skills and thermo-fluids design and industrial applications. During the course, you'll cover core mechanical engineering disciplines including machine, structural and fluid-thermal design and industrial control, while developing professional skills in project management, communication, and teamwork. You'll also have opportunities to test your mechanical design and engineering skills in challenges such as the Shell Eco-Marathon and Warman international and national competitions.

CAREERS

With an international skills shortage in the engineering industry, and roles expected to rise significantly in the next five years, Deakin graduates are in demand both in Australia and further abroad. Not only that, employers seek out Deakin graduates for their forward-thinking, innovative and entrepreneurial qualities. As a mechatronics engineering graduate, you could be employed in the following roles:

- electronics test engineer
- biomedical service engineer
- robotics engineer

Professional recognition

This course is accredited by Engineers Australia, which gives you graduates international recognition and the ability to practise as professional engineers in many countries around the world.

The student experience

Mechatronics is more than just robotics; it’s the future of the industry. Two of our students discuss the benefits of the multidisciplinary course and the hands-on learning approach at Deakin.

Course structure

This 32-credit-point course consists of 33 credit points of core units and one elective unit.

Graduate ready to transition into a number of areas and roles including:

- advanced manufacturing
- aerospace
- automotive
- biomedical
- consultant
- control and systems design
- defence
- field and test engineering
- mining
- product development
- railroad
- research and development
- textiles.

Today, mechanical engineers lend their skills to the development of almost every design imaginable – especially complex products like cars, aeroplanes, biomedical devices and renewable energy systems.

Professional recognition

This course is accredited by Engineers Australia, which gives you graduates international recognition and the ability to practise as professional engineers in many countries around the world.

The learning environment at Deakin is very collaborative. Academic staff are always available for assistance and students work alongside one another.

Jordan Ritchie

Bachelor of Mechanical Engineering (Honours) student
Courses

Bachelor of Software Engineering (Honours)

Create the smart software and systems of the future and safeguard your career by driving digital transformation as an innovative software engineer. As a software engineering student at Deakin, you’ll gain specialised skills in robotics, cyber-physical systems and the internet-of-things. Upon graduation you’ll be well-equipped to find work developing and implementing state-of-the-art smart systems or frameworks into various existing industries such as health, fitness and travel.

Work experience
You will undertake a core professional industry experience unit as part of your course, which involves an industry-based placement for a minimum of 60 days with an approved organisation. This will provide you with the opportunity to apply what you are learning in your course, explore career options, experience workplace culture and practices, and develop a professional network before you graduate.

Please visit deakin.edu.au/psn for more information.

Professional recognition
This course has been designed in accordance with Engineers Australia’s and the Australian Computer Society’s professional accreditation requirements. Deakin has been awarded accreditation for the Bachelor of Software Engineering (Honours) with the Australian Computer Society (ACS). Deakin has been awarded provisional accreditation for the Bachelor of Software Engineering (Honours) with Engineers Australia.

Careers
Graduates will be equipped to find employment in diverse areas of software engineering. You’ll be able to develop and implement state-of-the-art smart devices, systems and application frameworks for industries including health, agriculture, manufacturing and transport. This can lead to employment in roles such as:

- business analyst
- data engineer
- DevOps engineer
- embedded systems developer
- IoT system engineer
- machine learning engineer
- mobile applications developer
- project manager
- software engineer
- software developer
- systems architect
- web applications developer.

Course structure
32 credit points – 23 core units (totalling 28 credit points), which include a compulsory internship unit, four elective units and four 0-credit-point units relating to safety and project orientated learning, safety induction, work placements and academic integrity.

For more information about this course, please refer to Deakin’s 2021 Undergraduate Information Technology booklet or visit deakin.edu.au/course/bachelor-software-engineering-honours.

Related course
Bachelor of Construction Management (Honours)

Develop a strong understanding of the business of construction, from law to technology. The Bachelor of Construction Management (Honours) will equip you with market-ready skills for construction management, estimating, surveying or property development – working across projects large and small.

For more information about this course, please refer to Deakin’s 2021 Undergraduate Architecture and construction management booklet or visit deakin.edu.au/course/bachelor-construction-management-honours.

### Notes

1. The 2020 indicative Commonwealth Supported Place ( CSP) fee is based on a typical enrollment for an Australian domestic student enrolled in two trimesters of full-time study, or 8 credit points, unless otherwise indicated. This fee should be used as a guide only and is subject to change.
2. Recent secondary education applicants include current Year 12 students in 2020, and head to the course of interest to find out further details on admission requirements.
3. NP means not published – less than five offers made to recent secondary education applicants.

---

### Engineering

There are four categories under which non-Year 12 applicants may apply to Deakin:

- International student entry requirements can be found at: [deakin.edu.au/course/S461]
- Recent secondary education applicants include current Year 12 students in 2020.
- The 2020 indicative Commonwealth Supported Place (CSP) fee is based on a typical enrolment for an Australian domestic student enrolled in two trimesters of full-time study, or 8 credit points, unless otherwise indicated. This fee should be used as a guide only and is subject to change.

If you need further assistance, please reach out to our helpful team. We are more than happy to answer your general queries. For prospective student inquiries, you can contact us at 1800 693 888 or myfuture@deakin.edu.au.
