Preserve our planet

Conserve wildlife and plants, study marine ecosystems or help with environmental education – and get hands-on experience from day one. You’ll gain the skills to impact key environmental developments and decisions, as well as invaluable real-world experience through professional placement units, helping you on the path to a rewarding career you’re passionate about.

Get your hands dirty

All of Deakin’s environment courses have a focus on practical experience and offer hands-on learning experiences from year one, ensuring you graduate skilled and work-ready. Depending on your course, you may learn skills like:

• measuring the health of freshwater environments
• coastal planning
• surveying wildlife populations
• conducting sustainability assessments
• studying seals and penguins.

You can also undertake work experience in a range of settings, including community environment parks and sustainability centres, urban parks – or in businesses, where students analyse waste management programs and develop waste management strategies and environmental improvement programs.

Find out more and see students’ experiences on the ‘Get into the Wild@Deakin’ blog: deakin-environment.tumblr.com.

Explore our connections with industry

Our staff have close links with industry and relationships with organisations such as the Department of Environment, Land, Water and Planning (DELWP), Parks Victoria and the Department of Primary Industries, ensuring our courses are up-to-date with industry trends. Environment courses at Deakin have a core professional placement unit, which means you’ll complete your placement in the likes of these high-profile organisations:

• Biosis – Environmental Consulting
• Department of Environment, Land, Water and Planning
• Parks Victoria
• Zoos Victoria
• local, state and federal government.

Award recipients for the promotion of gender equity in STEMM

Deakin has received the prestigious Athena SWAN Institutional Bronze Award for its programs that encourage more women to study, research and work in Science, Technology, Engineering, Mathematics and Medicine (STEMM).

The Athena SWAN program is run by Science in Australia Gender Equity (SAGE), and the Bronze award recognises Deakin’s extensive work in promoting gender equity, inclusivity and diversity.
Enjoy state-of-the-art facilities and equipment

Your learning is enhanced by a range of cutting-edge facilities and equipment, like our:

- Geographic Information Systems (GIS) lab
- wildlife tracking technology
- aquaculture facilities
- infrared motion sensing wildlife cameras
- high-tech research labs
- research vessels
- remotely operated underwater vehicles.

We’re also a significant partner at the Queenscliff Marine Science Centre, offering students access to an extensive flow-through system and labs, as well as a variety of nearby marine and coastal ecosystems.

deakin.edu.au/les-facilities

Skills to get you a job

Gain a competitive edge in the workplace with real-world expertise and practical skills. Deakin is ranked the #1 university for both generic skills and good teaching in Victoria.¹

¹ Graduate Outcomes Survey 2019.

Join our Peer Support Network (PSN)

Sign up to the Faculty of Science, Engineering and Built Environment’s PSN in your first year at Deakin to get support and guidance from more senior students in your course. You’ll learn about the support services and facilities available, while gaining useful tips about studying at Deakin.

deakin.edu.au/sebe/peer-support

Experience marine life first-hand

Marine researchers have developed Deakin’s purpose-built research vessel, Yolla, which houses one of the most advanced sonar systems in the world – and have created a detailed continuous map of Victoria’s sea floor habitats. This data is playing a key role in supporting fishery and conservation management of the state’s marine environments. Deakin environment students get to participate in a range of practical activities, such as identifying marine plants and animals using the images generated by remotely controlled vehicles on the sea floor.

Travel the world

Deakin Abroad

Explore our various overseas programs, including trimester abroad, short-term partner programs, faculty-led study programs, overseas internships and international volunteering opportunities. Deakin environment students have studied in nearly every continent in the world. Each year, students have the opportunity to enrol in the Global Environmental Placement, which offers amazing options to work with turtles in Costa Rica, lions or sharks in South Africa, dolphins in Tanzania, elephants in Sri Lanka, Ion fish in Thailand, as well as many other options.

deakin.edu.au/sebe/international-wil

The student experience

Deakin’s courses in environmental science have a strong focus on fieldwork and practical experiences.

deaakin.yt/study-enviro

#1 careers service in Australia¹

Prepare yourself for the jobs and careers of the future. Access our career centre, DeakinTALENT, and use its programs and services to research different career options, hone your interview skills, look for casual work while you study or find a graduate job.

dea-kitalent.deakin.edu.au

**Disciplines**

Choose your area of expertise from our disciplines (also known as study areas). Knowing which discipline you’re interested in helps career advisers find the best course for your interests. Visit [deakin.edu.au](http://deakin.edu.au) for detailed discipline and course information, including a description of the units within each degree.

- Environmental engineering
- Environmental science
- Marine
- Sustainability and environmental management
- Wildlife and conservation biology

---

**The student experience**

Hear from our students about how to get out into the field to develop solutions to environmental issues. [deakin.edu.au/ems](http://deakin.edu.au/ems)

‘The most rewarding aspect of my course would be having the opportunity to take my learning from the classroom out into the field. These experiences provided me valuable skills and knowledge which I will use throughout my professional life.’

*Kimberley Allan*

Bachelor of Environmental Science (Environmental Management and Sustainability)

---

**Courses**

**Bachelor of Environmental Science (Environmental Management and Sustainability)**

Combining the latest research with extensive fieldwork, the Bachelor of Environmental Science (Environmental Management and Sustainability) prepares you to adapt to global change and implement sustainability strategies both locally and globally.

**Careers**

Your deep understanding of sustainability and extensive fieldwork experience will set you up for career success in a variety of areas:

- catchment management
- climate change adaptation and mitigation
- coastal and park management
- conservation
- environmental education
- environmental planning and policy
- environmental protection
- environmental science
- industry-based environmental management
- land rehabilitation
- pollution control
- sustainability
- waste management
- water resource management.

**Work experience**

Professional Practice is a core unit that lets you complete a placement for a minimum of two weeks (80–160 hours) within a relevant, course-related organisation. A number of elective units also help you gain extensive practical experience, including undertaking a Global Environment Placement, Global Science Placement, Industry Based Learning, Career Placement or a STEM Placement.

**Professional recognition**

Once you've gained five years' experience working in the environmental industry, you may be eligible to become a Certified Environmental Practitioner through the Environment Institute of Australia and New Zealand (EIANZ). For full membership details, visit [eianz.org](http://eianz.org) for full membership categories.

**Course structure**

This 24-credit-point course consists of 15 core units and nine elective units.

**Year 1**

- Year 1 Trimester 1: Ecology and the Environment, Techniques in Environmental Science
- Year 1 Trimester 2: Environmental Sustainability

**Year 2**

- Year 2 Trimester 1: Physical Geography, Environmental Planning and Impact Assessment
- Year 2 Trimester 2: Environmental Team Based Research, Introduction to Geographic Information Systems

**Year 3**

- Year 3 Trimester 1: Policy Instruments for Sustainability, One unit from: Risks to Healthy Environments OR Resource Efficiency and Waste Management
- Year 3 Trimester 2: Professional Practice, Managing Environmental Projects, Integrating Marine, Coastal and Catchment Management

---

**Passionate about environmental change?**

**You’ll flourish in this career!**

We live in a world where human impact is a constant threat to our environment and biodiversity. Everywhere we look, we’re confronted with its increasing loss, and this is creating unforeseen impacts on entire ecosystems. But, there are people who are fighting against the neglect – fighting for the environment. With a career in environmental management and sustainability, you could become part of this group of people who are driven by a passion for ensuring our planet is able to remain home for us and our abundance of wildlife. Find out what Associate Professor Kelly Miller has to say on careers in environmental management and sustainability.

Hands-on learning in the wild

First-year wildlife and conservation biology students have the opportunity to visit Cape Conran. Working with Deakin staff and our industry partners in the DELWP Southern Ark team, students catch small mammals and learn the skills involved in correct handling, identifying, sexing and in many cases, micro-chipping of these animals. Other activities undertaken include GPS and ID exercises, radio-tracking, camera trapping and bird surveys.

Professional recognition

Once you’ve gained five years’ experience working in the environmental industry, you may be eligible to become a Certified Environmental Practitioner through the Environment Institute of Australia and New Zealand (EIANZ). For full membership details, visit eianz.org/membership-information/membership-categories.

The student experience

Hear from two of our students about the unique hands-on and global experience Deakin offers in Wildlife and Conservation Biology. deakin.yt/web

‘The most rewarding experiences of studying with Deakin are the hands-on opportunities that are made available to you. In my first trimester I was able to handle native animals and even microchip a Brush-tailed Possum, which are real-world skills that I hope to utilise in my future career.’

Chloe Daws
Bachelor of Environmental Science (Wildlife and Conservation Biology) student
Bachelor of Environmental Science (Marine Biology)

Gain extensive hands-on experience exploring coastal ecosystems and marine environments in an area that has some of the highest biodiversity in Australia. Learn how to sustainably manage precious marine environments with Deakin’s Bachelor of Environmental Science (Marine Biology).

Careers
As a graduate with far-reaching knowledge of marine biology and extensive fieldwork experience you’ll be sought-after in a wide range of roles including:
- aquaculture technician or manager
- employee of local water authorities and GIS analysts
- fisheries officer
- laboratory technician
- local government environmental officer
- marine biology consultant
- marine educator (e.g. marine aquaria or ecotourism)
- park ranger
- sustainability project officer.

The development of transferable soft skills, research skills and critical thinking also makes graduates more broadly employable across the environmental science and management sectors.

Professional recognition
Once you’ve gained five years’ experience working in the environmental industry, you may be eligible to become a Certified Environmental Practitioner through the Environment Institute of Australia and New Zealand (EIANZ). For full membership details, visit eianz.org/membership-information/

Course structure
This 24-credit-point course consists of 19 core units and five elective units.

Trimester 1

Year 1
- Ecology and the Environment
  - Cells and Genes
  - Chemistry in Our World
  - The Blue Planet: Water and Life
- Marine Invertebrates
- Marine Botany
- Society and Environment

Year 2
- Research Methods and Data Analysis
- Environmental Sustainability
- Marine and Coastal Ecosystems

Year 3
- Professional Practice
- Marine Vertebrates
- Marine Ecology
- Aquaculture and the Environment

Elective: Marine Ecosystems and Risk Assessment

Related course
Bachelor of Marine Science
Study marine science at Deakin’s Geelong Waurn Ponds Campus and you will gain essential knowledge and skills in ocean systems and resources through a multidisciplinary approach in the areas of marine microbiology and genomics, oceanography, coastal processes, marine modelling, marine biology, marine ecology, fisheries and aquaculture. This course will provide you with the skills required to join the greater marine science community using new marine technologies and innovative approaches to help protect and drive the sustainable future of the world’s oceans.

For more information about this course, please refer to Deakin’s Undergraduate Science booklet or visit deakin.edu.au/course/bachelor-marine-science.

From Warrnambool to the world
Second-year marine biology student, Ally Clark, studies in Warrnambool but that hasn’t stopped her from having an international experience as part of her course.

She’s already been to Costa Rica for a month to work on a turtle project, where students monitored a hatchery. Releasing baby turtles and doing night patrols on the beach to collect eggs and protect them from predators, the project contributed to international experience as part of her course.

Her next stop is Hawaii, where she’s embarking on an exchange for a semester at Hawaii Pacific University. Originally from Melbourne’s eastern suburbs, Deakin University’s Warrnambool Campus was always Ally’s number one priority.

“My family used to holiday every year at Port Fairy. It’s like my second home down here so it was always the plan to come to Warrnambool, but when I was in high school planning university, I looked at all options across Australia and the world.”

One of the tempting choices was Hawaii Pacific but Ally eventually went with her first pick of Deakin Warrnambool. ‘It’s living up to expectations – I love it here,’ she says.
Courses

‘Our marine biology program provides a unique opportunity to study temperate marine biology in a marine environment that has some of the highest biodiversity in Australia.’

Associate Professor Julie Mondon
Associate Head of School (Warrnambool)
Course Director, Environmental Science (Marine Biology)

Gain a scholarship to help you fund your degree

Barwon Water Scholarship
If you’re a Geelong campus-based commencing student studying an undergraduate degree in one of the following disciplines: engineering, commerce, finance, information technology, public relations, journalism or human resource management, we encourage you to apply for this scholarship. This scholarship is valued at $2000 per year, with a total scholarship value of $6000.
deakin.edu.au/barwon-water-scholarship

Barwon Water Scholarship for Women in STEM
Female students commencing their first year of study in a course offered by the Faculty of Science, Engineering and Built Environment at the Geelong Waurn Ponds Campus or Geelong Waterfront Campus, are encouraged to apply for a Barwon Water Scholarship for Women in STEM. This scholarship is valued at $2000 per year, with a total scholarship value of $6000.
deakin.edu.au/barwon-water-women-scholarship

Courses to careers
Visit explore.deakin.edu.au to kickstart your course and career exploration. With more than 600 paired courses and careers, it’s the perfect destination for you to discover your future career.

Our environment graduates have pursued exciting and diverse roles in the public, private and not-for-profit sectors including in:
• agriculture
• air and water pollution
• climate change
• environmental management and sustainability
• fisheries and aquaculture
• marine biology
• natural resources management
• public health
• recycling
• wildlife conservation and management.

Aquatic science at your fingertips

The Warrnambool Campus, Geelong Waurn Ponds Campus and the Queenscliff Marine Science Centre are near a number of aquatic environments along the spectacular Great Ocean Road, offering you a unique experience. You’ll access marine animals, plants and habitats, ranging from rivers, lakes and estuaries to intertidal rocky shores, mangroves, seagrass beds, open ocean and high energy sandy beaches. These all form essential components of specialist studies in marine biology, freshwater biology and fisheries and aquaculture.

Understanding and managing the threats facing Australia’s marine and freshwater ecosystems requires a multidisciplinary approach to research and teaching. At Deakin you’ll gain an understanding of:
• aquatic animal health
• cutting-edge technologies for mapping marine habitats
• the ecology and management of coastal marine, estuarine and freshwater ecosystems
• the ecology and management of marine wildlife and fisheries
• the effects of a drying climate on ecological function and biodiversity in rivers and streams
• impacts and risk assessment of aquatic pollution
• river restoration
• sustainable aquaculture.
Bachelor of Environmental Engineering (Honours)

Focus on practical skills and outcomes across sustainability, climate change and infrastructure when you study environmental engineering at Deakin. Gain a broad knowledge across the industry, with solutions-led technical skills to put you in high demand in this ever-changing field.

Work experience
You’ll gain industry experience by completing at least 60 days of practical work experience in an engineering workplace, developing and expanding your understanding of the environmental engineering profession, career outcomes and the opportunity to establish valuable professional networks.

Professional recognition
This course has been designed in accordance to Engineers Australia’s professional accreditation requirements. Deakin is currently seeking provisional accreditation for the Bachelor of Environmental Engineering (Honours) with Engineers Australia.

Careers
Graduates will be in high demand in this rapidly evolving industry, addressing global issues like climate change and sustainability in roles such as:

- design engineer
- engineering technologist
- environmental health officer
- green design professional
- hazardous waste manager
- natural resource manager
- noise control monitor
- stormwater engineer
- sustainability analyst
- sustainability consultant
- waste management coordinator
- water quality tester
- waterways manager.

Course structure
This 32-credit-point course consists of 31 credit points of core units and one elective unit.

Trimester 1
Year 1
- Environmental Design
- Ecology and the Environment
- Applied Algebra and Statistics
- Engineering Physics

Year 2
- Environmental Analysis (2 credit points)
- Engineering Modelling
- Fluid Mechanics

Year 3
- Water Engineering Design (2 credit points)
- Air and Noise Pollution and Control
- Hydrology and Hydraulics

Year 4
- Engineering Project A (2 credit points)

Elective

Trimester 2
Year 1
- Chemistry for the Professional Sciences
- Global Environmental Systems
- Introduction to Mathematical Modelling
- Programming for Engineers

Year 2
- Environmental Health Engineering (2 credit points)
- Introduction to Geographic Information Systems
- Analysing Marine Dynamics

Year 3
- Waste Management Systems (2 credit points)
- Environmental Protection and Planning
- Risks to Healthy Environment

Year 4
- Engineering Project B (2 credit points)

Elective

Professional Engineering Practice

Receive recognition of previous qualifications or experience
With Recognition of Prior Learning (RPL), your previous study or work experience may mean you’re eligible for credit towards your Deakin degree. It can reduce the number of units you need to study, so you can finish your course earlier and often more affordably.

‘The teaching and support staff at Deakin are brilliant. They each have remarkable workplace expertise that they bring to life in academic material, and course work is built around real-world application.’

Vaughn Mitchell
Bachelor of Environmental Engineering (Honours) student
Courses

Bachelor of Science

Deakin’s Bachelor of Science prepares you for the exciting world of scientific discovery. Forge your own unique path by choosing a major sequence to solve tomorrow’s global issues through science and discovery.

If you’re interested in the environment, consider undertaking the environmental science major in the Bachelor of Science.

Honours in science

The Bachelor of Environmental Science (Honours) offers you a deep understanding of your chosen discipline through research exploration. Choose further studies in biology, chemistry or mathematics.

deaakin.edu.au/course/bachelor-science-honours

The student experience

Fieldwork is integral to our environment courses. Hear what our students have to say about studying environmental management, sustainability, wildlife and conservation biology: deakin.yt/study-enviro.

Honours in environment

The Bachelor of Environmental Science (Honours) leads to a range of career paths and a deep understanding of your chosen discipline through research exploration in areas like:

• behaviour, ecology, evolution and ecophysiology
• ecological risk assessment
• environmental management and sustainability
• fisheries and aquaculture
• marine and freshwater biology
• wildlife and conservation biology

The coursework component of the honours program offers you essential theoretical knowledge underpinning robust research, while the research project develops the practical skills necessary to investigate an area of interest through research exploration.

You’ll have the support and supervision of our experienced staff throughout your honours program, and will graduate with skills that give you a competitive edge in the job market and an ideal pathway to further study and research.

deaakin.edu.au/courses/bachelor-environmental-science-honours

In my honours year I contributed to the Grampians Long Term Small Mammal Project. My research involved working directly with Parks Victoria and contributing to fire management and biodiversity goals for the region. It’s been fantastic to contribute to the overall knowledge and practical management of the environment.

Cara Penton
Bachelor of Environmental Science (Wildlife and Conservation Biology) graduate

Australian marine science research has received a boost under a new agreement for Deakin to establish a formal presence at the Victorian Government’s Queenscliff Marine Science Centre.

The new agreement strengthens capacity for research in this region, with Deakin’s commitment to expanding our research in marine science across southern Australia and Victoria in particular, reflecting the importance of our world’s marine resources now and for future generations.

Marine science research boost
