- Assessment task 2: Personality profile report (1000–1500 words) 20%
- Assessment task 3: Examination (2 hours) 40%

## Prescribed texts

Personality Psychology (custom text) the custom text is published both as hardcopy and an e-text.

## HPS308 – Psychopathology

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), CBD\*, Warrnambool, Waurn Ponds (Geelong), Cloud (online)*  
*Trimester 3: CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Richard Moulding*

*Trimester 3 Unit Chair: Rebecca Diehm*

*Prerequisite: HPS111 and HPS121 and at least one of: HPS201, HPS202, HPS203, HPS204, HPS205, HPS310*

*Corequisite: Nil*

*Incompatible with: HPS788*

*Scheduled learning activities – campus:*

*Trimester 2 Burwood (Melbourne) and Waurn Ponds (Geelong): Weekly 1 x 2 hour class; 1 x 2 hour seminar per fortnight; weekly online independent learning activities*  
*Trimester 2 Warrnambool: Online independent and collaborative learning activities including weekly 1 x 2 hour recorded class; 1 x 2 hour seminar per fortnight (face-to-face or via videolink); weekly consultation via the Psychology Hub at Warrnambool*

*Scheduled learning activities – cloud (online):*

*Trimester 2 and Trimester 3: Online independent and collaborative learning activities including weekly 1 x 2 hour recorded class; 1 x 2 hour cloud (online) seminar per fortnight; weekly online components.*

## Content

The unit has the dual aims of allowing you to learn and explore concepts of mental disorders, and also of understanding your appreciation of the stigma and impact of such disorders on the lives of those affected. In so doing, this unit focuses on providing an introduction to abnormal and clinical psychology from a descriptive, theoretical and experimental perspective. In particular, we will focus on theories of psychology that integrate multiple perspectives – a so-called multidimensional integrative perspective.

Topics covered will include models and theories of abnormal psychology with emphasis on an integrative approach to understanding psychopathology; diagnosis and classification; as well as an examination of the major classes of disorders such as the anxiety, mood, and schizophrenia-related disorders. Where appropriate, there will be a discussion and evaluation of therapeutic interventions and ethical issues pertaining to intervention.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Written assignment (1500 words) 35%
- Assessment task 2: Written assignment (1000 words) 25%
- Assessment task 3: Examination (1.5 hours) 40%

## Prescribed texts

Barlow, D. H., Durand, V. M., & Hofmann (2018). *Abnormal psychology: An integrative approach* (8th ed.). Stamford, CT. Cengage Learning

## HPS310 – Brain, Biology and Behaviour

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*  
*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: HPS205*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mark Rogers*

*Trimester 3 Unit Chair: Mark Rogers*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS205, HPS675, HPS775, HSE207, HSO207*

*Scheduled learning activities – campus: Trimester 1: 1 x 2 hour class per week and 1 x 2 hour seminar per fortnight*

*Scheduled learning activities – cloud (online): Trimester 1 and Trimester 3: 1 x 2 hour seminar per fortnight*

## Content

This unit explores contemporary neurobiological explanations of human behaviour. Individual, social, ethical and practical implications are examined in the context of topics including: neural structure and function, psychopharmacology, biological methods, sensory systems, emotions, motor activity, sleep, mental disorders, language, memory and learning.

## Assessment

- Assessment task 1: Seminar manual 40%
- Assessment task 2: Anatomy online test 10%
- Assessment task 3: Examination (2 hours) 50%

In fortnightly seminars students will work on simulations and exercises designed to consolidate and expand upon material covered in the classes (in class for campus students or online (via Collaborate) for cloud (online) students). Cloud (online) students will require access to a computer-compatible microphone.

## Prescribed texts

Kalat, JW 2019, *Biological Psychology*, 13th edn, Cengage, Boston, MA.

## HPS325 – Addiction

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Petra Staiger*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 x 2 hour masterclasses, weeks 1, 5, 8, and 11. Weekly 1 x 2 hour seminar. Presentation of debate assessment outside seminar time.*

*Scheduled learning activities – cloud (online): 4 x 2 hour live streamed masterclasses, weeks 1, 5, 8, and 11. 1 x 2 hour cloud (online) seminar per week. Presentation of debate assessment outside seminar time.*

## Content

This unit will provide students with an in-depth knowledge of the major issues associated with addiction and substance use (ASU) more broadly. Specifically, the focus will be on alcohol and tobacco use, gambling, major illicit drugs (e.g. cannabis, heroin, amphetamine type substances, ecstasy, cocaine and other less common drugs). It will include an examination of the causes and risk factors for addiction and other harms associated with ASU, the levels of problems nationally and internationally, theories of addiction, the mechanisms of ASU in the body and brain, specific and general individual focussed treatments for ASU, and effective community and policy strategies for preventing and reducing harm.

A major focus of the course will be the comorbid presentation of mental health disorders and substance use and effective screening and treatment of these disorders. The unit has a strong international and multi-disciplinary focus.

*Note that assessments will be completed in seminars, therefore students will be expected to attend their assigned seminar regularly.*

## Assessment

- Assessment task 1: 2 case studies (approximately 700 words each, 10% for the first, 25% for the second) total 35%
- Assessment task 2: Debate (15 minutes) (10% for group presentation, 10% individual mark, 5% team feedback) total 25%
- Assessment task 3: Examination (1.5 hours) 40%

## HPS327 – Research Methods Capstone

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrnambool (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Matthew Fuller-Tyszkiewicz*

*Prerequisite: HPS201 or HPS301*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week and 1 x 2 hour laboratory session per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour cloud (online) seminar per week*

## Content

The purpose of this capstone unit is to consolidate students' research methods skills developed in Years 1 to 3 of their course. This unit will use key learnings in the areas of understanding the science-practitioner model, literature searching and critical review, study design, measurement, sampling, and data analysis to devise, execute, and write up a research project. Students will choose to investigate one research problem, which they will choose from a series of trimester-long projects. They will be supervised by teaching staff in the conduct of these minor projects. The projects are designed to comply with low risk projects, and will have pre-approval from ethics.

Despite being low risk, the projects will still enable students to collect some data through distribution of surveys and/or observational design. Because of the time constraints of a trimester-long unit, data collection will be undertaken in a two week period during the trimester to allow time for data analysis and write up. As a consequence, the project in this unit is considerably smaller, and has more constraints, than the fourth year project students in Honours undertake.

Upon completion of this unit, students will have gained insights into how the theoretical content covered in their undergraduate studies translates into practical research problems, through the design and implementation of a real research project. This, in turn, will make students ready for fourth year study in psychology, in which students are required to conceptualize, design, and carry out their own study independently. And, for those students, who exit at the end of undergraduate studies, they will have developed skills necessary to effectively run a project from conception to write-up.

## Assessment

- Assessment task 1: Research report (3000 words) 60%
- Assessment task 2: Group oral presentation (20 minutes) 40%

## HPS328 – Psychology At Work (Internship)

*Enrolment modes: This unit is offered as a Start Anytime unit and is available from Study Period (SP) 1 in January 2019.*

*Burwood (Melbourne), Warrnambool (Geelong), Warrnambool, Cloud (online)*

*Students will not be able to self-enrol. Register for enrolment on Deakin's website.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sandra Hooper*

*Trimester 3 Unit Chair: Sandra Hooper*

*Cohort rule: Must be enrolled in course A301, H300, H344, H345*

*Prerequisite: HPS207 and must have completed 16 credit points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 140 hours of placement with an authorised host organisation and completion of self-paced pre-placement online modules.*

*Placement must be arranged at the very latest by the day before the Census Date for your Study Period. It must be completed at the very latest 10 months after the start date of your SP. To confirm these dates please check the “Timelines for all Study Periods” document on CloudDeakin.*

## Content

This unit aims to build on the second year unit, HPS207 and provide students with a more detailed understanding of how psychology is applied in a work setting. The skills developed will enable students to develop further strategies to assist them in gaining meaningful employment at the completion of their studies in psychology and to make a successful transition to work.

The development of generic, employment-related, professional skills in psychology related fields will be achieved through a combination of self-paced modules and a minimum of 140 hours placement with a relevant, course-related organisation. During the placement, students will be encouraged to consolidate or enhance existing professional skills.

Each student is responsible for selecting and negotiating their own appropriate work placement, for authorisation by the Unit Chair. Work placements are intended to provide students with opportunities to develop skills and knowledge in psychology related areas which will enhance their professional development and employment potential as well as provide insight into career options.

Students will have up to approximately 10 weeks to source a placement and up to a maximum of 8 months to complete it. Further details about how this Start Anytime unit will run are available on the School of Psychology Start Anytime page.

*Note: Students do not need to undertake any pre-preparation for this unit. Especially, you should not be seeking any sort of placement until you have access to the CloudDeakin site where all information is provided about how to source placement, what should be considered when choosing a placement, and all other materials required to complete the unit. Access to the CloudDeakin site is given two weeks prior to the commencement date of the Study Period and there is ample time to find, and complete, the placement, within the unit timelines.*

## Assessment

Ungraded pass, consisting of:

- Assessment task 1: Participation in mock interview (10 minutes)
- Assessment task 2: Student evaluation of performance and learnings from work placement (1200 words)
- Assessment task 3: Placement log book (including Host Supervisor’s Placement Feedback Report)

*Note: To achieve an ungraded pass in this unit all assessment tasks must reach Ungraded Pass.*

## HPS395 – Cognitive Neuroscience

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Eric Koukounas*

*Prerequisite: One of HPS205 or HPS310*

*Corequisite: Nil*

*Incompatible with: HPS795*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per fortnight*

*Scheduled learning activities – cloud (online): 1 x 1 hour cloud (online) seminar per fortnight*

## Content

This unit is designed to provide an advanced examination of current issues, theories, methods, and applications relevant to the area of cognitive neuroscience. The unit represents an extension of the principles introduced in HPS310 Brain, Biology and Behaviour, with a focus on both healthy brain function and clinical disorders. Topics covered include: neuroscience techniques (e.g., neuroimaging), attention, perception, executive function, movement, language, social cognition, and clinical translation.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Lab manual 10%
- Assessment task 2: Written assignment (1500 words) 40%
- Assessment task 3: Examination (2 hours) 50%

## Prescribed texts

Ward, J. (2015). The Student’s Guide to Cognitive Neuroscience (3rd Ed.). Devon: Psychology Press.

## HPS431 – Psychological Assessment

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nicholas Ryan*

*Cohort rule: This unit is only available to students enrolled in courses H345, H451 and H452*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS425 and HPS715*

*Scheduled learning activities – campus: 1 x 2 hour cloud (online) class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour cloud (online) class and 1 x 1 hour cloud (online) seminar per week*

### Content

This unit introduces the theoretical and psychometric basis of psychological tests. It will then provide an overview of the psychological assessment of an individual for various purposes and in a range of contexts. Major psychological tests will be studied with respect to their theoretical basis, construction, reliability, validity and applicability, including tests of ability, personality, and mood. Both child/adolescent and adult populations will be considered. The process of formulating psychological opinion in casework will be introduced. Report writing skills will be developed and ethical issues discussed.

### Assessment

- Assessment task 1: Test evaluation (1000–1500 words) 15%
- Assessment task 2: Case report (1500–2000 words) 35%
- Assessment task 3: MCQ Examination (2 hours) 50%

### Prescribed texts

Cohen, R.J., & Swerdlik, M.E. (2017). *Psychological Testing and Assessment: An introduction to tests and measurement* (9th Edition). McGraw Hill: New York.

## HPS432 – Research Methods in Psychology C

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jarrad Lum*

*Cohort rule: This unit is only available to students enrolled in courses H345, H451 and H452*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS425 and HPS742*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 2 hour seminar per week*

### Content

This element of coursework is designed to provide you with the skills necessary to undertake a research project. The coursework covers issues relating to research design, research ethics, undertaking a systematic review. Laboratory classes will undertake weekly practical exercises that examine in more detail the topic addressed in the weekly class.

### Assessment

- Assessment task 1: Systematic review assignment (2000 words) 50%
- Assessment task 2: Examination (2 hours) 50%

## HPS433 – Client-Centred Skills in Practice

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Elizabeth Westrupp*

*Cohort rule: This unit is only available to students enrolled in courses H345, H451 and H452*

*Prerequisite: HPS431 or HPS715*

*Corequisite: Nil*

*Incompatible with: HPS426 and HPY710*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 3 hour seminar each week.*

*Scheduled learning activities – cloud (online): Online seminars via Collaborate.*

## Content

This unit will provide an introduction to working with clients in psychology and mental health settings. Students will be introduced to skills in counselling and case management, and will learn knowledge, skills and ethical issues related to working with a variety of clients of different ages, cultural backgrounds and presenting concerns.

## Assessment

- Assessment task 1: Case Management Plan part A (1000 words) 30%
- Assessment task 2: Video Presentation (10 minutes) 10%
- Assessment task 3: Case Management Plan (1500 words) 30%
- Assessment task 4: Critical Reflection Assignment (1500 words) 30%

## Hurdle requirement

Satisfactory completion of micro and case management skills development in at least 8 of the 10 seminars to obtain a pass or above in the unit.

## HPS434 – Research Methods in Psychology D

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Nicolas Kambouropoulos*

*Cohort rule: This unit is only available to students enrolled in courses H345, H451 and H452*

*Prerequisite: HPS432 or HPS742*

*Corequisite: Nil*

*Incompatible with: HPS426 and HPY712*

*Scheduled learning activities – campus: A minimum of 22 hours of intensive classroom activity (face-to-face or via Collaborate/Echo360)*

*Scheduled learning activities – cloud (online): A minimum of 22 hours of intensive classroom activity (face-to-face or via Collaborate/Echo360)*

## Content

This unit provides advanced coverage of multivariate data analysis. It is designed to provide students with a conceptual understanding of multivariate statistics as well as the practical knowledge of how to implement these analyses using common tools such as SPSS and AMOS. Specific topics include data hygiene, multivariate regression, exploratory and confirmatory factor analysis and structural equation modelling.

## Assessment

- Assessment task 1: SPSS analytic task 40%
- Assessment task 2: AMOS analytic task 20%
- Assessment task 3: MCQ examination (2 hours) 40%

## HPS435 – Research Project A

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250 – 2 enrolled credit points, 0 achievable credit points. (4 credit points achievable on successful completion of HPS435 and HPS436.)*

*Trimester 1 Unit Chair: Christian Hyde*

*Cohort rule: This unit is only available to students enrolled in courses H345, H451 and H452*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS427 and HPY720*

*Scheduled learning activities – campus: 1 x 1 hours of contact with a research supervisor and 19 hours of private study per week*

*Scheduled learning activities – cloud (online): 1 x 1 hours of contact with a research supervisor and 19 hours of private study per week*

## Content

Students will undertake a research project in small groups, choosing a research project from the range offered by available supervisors. Students will be required to familiarize themselves with the theory and past research in the area under investigation, and participate in all the steps involved in research, including the ethics application, formulation of hypotheses, design and methodological decisions, collection and analysis of data, and evaluation of the research questions under consideration. Although activities such as data collection may be conducted as a group, students will prepare an individually written report that will be based on the findings of their study.

The project is to be regarded as a learning exercise for the student, with guidance and direction provided by the group supervisor. Data collected for these projects may be used in the ongoing research activities of the School.

*Note: Together, HPS435 and HPS436 constitute the research thesis components of the Honours degree*

## Assessment

- Assessment task 1: Thesis proposal assignment
  - 1500 word thesis proposal
  - 10-minute oral presentation
- Assessment task 2: Written empirical research report (5000 words).

The thesis proposal and the written empirical report constitute the full assessment in the paired units HPS435 and HPS436. The thesis proposal and empirical report contribute 30% and 70% respectively to the final mark for the thesis component.

## HPS436 – Research Project B

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250 – 2 enrolled credit points, 4 achievable credit points. (4 credit points achievable on successful completion of HPS435 and HPS436.*

*Trimester 2 Unit Chair: Christian Hyde*

*Cohort rule: This unit is only available to students enrolled in courses H345, H451 and H452*

*Prerequisite: HPS435 or HPY720*

*Corequisite: Nil*

*Incompatible with: HPS428 and HPY721*

*Scheduled learning activities – campus: 1 x 2 hours of contact with a research supervisor and 8 hours of private study per week*

*Scheduled learning activities – cloud (online): 1 x 2 hours of contact with a research supervisor and 8 hours of private study per week*

## Content

Students will undertake a research project in small groups, choosing a research project from the range offered by available supervisors. Students will be required to familiarize themselves with the theory and past research in the area under investigation, and participate in all the steps involved in research, including the ethics application, formulation of hypotheses, design and methodological decisions, collection and analysis of data, and evaluation of the research questions under consideration. Although activities such as data collection may be conducted as a group, students will prepare an individually written report that will be based on the findings of their study. ## Assessment

- Assessment task 1: Thesis proposal assignment
  - 1500 word thesis proposal
  - 10-minute oral presentation
- Assessment task 2: Written empirical research report (5000 words)

The thesis proposal and the written empirical report constitute the full assessment in the paired units HPS435 and HPS436. The thesis proposal and empirical report contribute 30% and 70% respectively to the final mark for the thesis component.

## HPS705 – Advanced Clinical Assessment

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nicki Dowling*

*Cohort rule: Students must be enrolled H750 Master of Psychology (Clinical) to enrol in this unit*

*Prerequisite: HPS779*

*Corequisite: Nil*

*Incompatible with: HPS905*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This unit deals with assessment for clinical syndromes with a view to planning treatment and evaluating progress. It also provides students with the skills to develop clinical profiles of clients in their placements. Topics include: the use and interpretation of specialised and in-depth tests, including projective techniques and multi-dimensional personality inventories, emphasising the development of a conceptual framework for conducting clinical assessments. Psychological testing is used to complement and enhance the clinical assessment. This unit aims to expand the students' expertise in following through specific hypotheses and utilising appropriate tests, and their skills in assessment, diagnosis and report writing. Each student will complete three comprehensive clinical reports of increasing complexity on hypothetical cases.

## Assessment

- Assessment task 1: Child psychological report (2000 words)
- Assessment task 2: Adult case report 2 (2000 words)
- Assessment task 3: Test selection report (2000 words)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

# HPS706 – Clinical Placement and Case Analysis 1

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Amanda Dudley and Kate Hall*

*Prerequisite: Registration as a provisional psychologist and all of HPS714, HPS776, HPS777 and HPS779*

*Corequisite: Nil*

*Incompatible with: HPS906*

*Scheduled learning activities – campus: 50 full time days of placement plus pre-clinical workshops and case analysis intensive seminars (2 x 1 day workshops)*

## Content

The first clinical placement is designed to equip students with a range of clinical psychology skills and an awareness of professional issues. Students will fast-track the translation and integration of academic coursework learning into real life application.

This unit consists of three key activities:

1. pre-clinical workshops;
2. placement experience;
3. case analysis intensive seminars.

## Pre-clinical workshops

To prepare for placement attendance, students will participate in a number of practitioner led workshops covering topics such as professional identity, tertiary public mental health settings and procedures, applied suicide intervention skills training and RISK AWARE online module aimed at increasing students' knowledge and ability to assess potential risks within clinical placement environments.

## Placement experience

Through the Deakin University Psychology Clinics and Placement Partnerships at Eastern Health (Box Hill) and Barwon Health (Geelong), students will gain experience working with adults or children/adolescents experiencing mental health disorders. Students will be able to establish and demonstrate their clinical skills in clinical assessment, case formulation and intervention with individuals and groups.

As part of placement, students will engage in regular individual and group supervision. Supervisors are able to support students to realise individual professional development plans that can be carried across their course. The opportunity to experience a range of supervision models will advance students capacity to utilise supervision as a learning tool through their placement program and their career.

A Supervision contract will be developed at the start of placement which will require the development of specific learning objectives as well as outlining roles, responsibilities and requirements. Student's performance will be evaluated on using the mid and End of Placement Supervisor Report. Students will be evaluated on core competencies and are to demonstrate ethical and professional practice.

Students case conceptualisation skills will be evaluated through supervision and formal presentation of a case on placement.

## Case analysis

The placement will be supplemented by case analysis intensive seminars in which students learn the theory and practice of case analysis/case conceptualisation as a foundation for subsequent placement and coursework requirements as well as supervision and case report writing. Students will participate in case discussions and will be required to present case material.

As part of this unit, students are also required to submit a case report on a case within their placement agency.

Upon completion of this unit, students will have received sound knowledge and training in professional practice which will support development in subsequent placements.

## Assessment

- Assessment task 1: Attendance for 50 days at placement (as well as pre-clinical workshops)
- Assessment task 2: Presentation of logbook from placement (including pre-clinical workshops) to the Unit Chair within 21 days of placement
- Assessment task 3: Satisfactory END of Placement Supervisor Report outlining professional and ethical competence of the student from the Placement Supervisor (completion of the placement) including presentation of a case within placement
- Assessment task 4: Satisfactory case report (approximately 4000 words) written by the student and submitted to their Agency Supervisor before finishing the placement
- Assessment task 5: Attendance at and active participation in Case Analysis Intensive Seminars.

These assessment and procedural components constitute 100% of the assessment for this unit and failure to satisfactorily complete the requirements of any one component will result in the student failing the unit, preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

# HPS707 – Advanced and Applied Research Methods

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Emily Kothe*

*Trimester 2 Unit Chair: Mark Stokes*

*Cohort rule: Students must be enrolled in H750 Master of Psychology (Clinical) to enrol in this unit*

*Prerequisite: HPS779*

*Corequisite: Nil*

*Incompatible with: HPS907 and HPS911*

*Scheduled learning activities – campus: 3 hours per week*

## Content

This unit will focus on a variety of methodological approaches to research based upon the scientist-practitioner model of evidence-based practice. The unit will provide an overview of data management, basic Structural Equation Modeling, and basic qualitative analysis. Students are expected to be familiar with univariate statistical techniques prior to commencing the course, and have some familiarity with multivariate techniques. Students will be required to screen, clean, and prepare data for analysis and to undertake preliminary univariate and multivariate screening assessment.

## Assessment

- Assessment task 1: Statistical analysis and written assignment (2000 words)
- Assessment task 2: Examination

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS708 – Psychological Intervention 2

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jade Sheen*

*Cohort rule: Must be enrolled in H750 Master of Psychology (Clinical) to enrol in this unit*

*Prerequisite: HPS777*

*Corequisite: Nil*

*Incompatible with: HPS908*

*Scheduled learning activities – campus: 1 x 3 hour class and 1 x 1 hour seminar per week*

### Content

Building on HPS777, Psychological Intervention 1, this is both a theoretical and practical unit that provides the opportunity for students to evaluate the evidence base for, and to develop skills in the delivery of a range of therapies for children and adolescents. At the commencement of the unit, students will learn how to modify evidence based interventions such as CBT, for use within younger populations. The unit will then focus on interventions for issues common to this population including behavioural disorders, eating disorders and developmental disorders. A major focus will be on the development of therapy skills through the use of virtual simulation, case based analysis and role play.

### Assessment

- Assessment task 1: Assignment (3000 words)
- Assessment task 2: Role-play presentation
- Assessment task 3: OSCE

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS709 – Clinical Placement and Case Analysis 2

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Amanda Dudley and Melissa O'Shea*

*Prerequisite: HPS706 and HPS777*

*Corequisite: Nil*

*Incompatible with: HPS909*

*Scheduled learning activities – campus: 50 days of supervised clinical placement (approximately three days per week) and case analysis presentations as part of placement.*

### Content

The aim of this unit is to provide students with the opportunity to establish their clinical psychology skills. Students are expected to demonstrate key competencies in ethical and professional frameworks as well as psychological assessment and intervention skills.

Placements provide students with opportunities to develop clinical psychology skills in a range of settings such as adult, adolescent, acute, chronic, inpatient, community, forensic and/or rehabilitation services. It is expected that students will undertake either an adult OR a child/adolescent placements that will complement their other placement units.

The placement program will be established jointly by the student, the placement coordinator, and the practitioner(s) supervising the placement. This will include the minimum amount of face-to-face contact time with clients and the minimum supervision requirements. Placement Learning Contracts will specify learning objectives and key competencies as well as the responsibilities of the student, the Agency Supervisor and the Placement coordinator. Students will be required to have client contact and carry their own caseload, under supervision. The student's performance will be reviewed at a mid and end of placement meeting. All meetings and paperwork are to be completed and are considered part of the unit requirements.

As part of placement, students will engage in case presentations and be required to present a case from their placement. These case presentation seminars provide students with the opportunity to give and receive feedback from peers as well as supervisors and discuss clinical issues.

## Assessment

- Assessment task 1: Attendance at placement for a minimum of 50 days
- Assessment task 2: Presentation of logbook to the University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 3: Satisfactory report on professional and ethical competence of the student from the Placement Supervisor and University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 4: Satisfactory case report of approximately 4000 words written by the student and submitted to the Agency Supervisor within 21 days of completion of placement
- Assessment task 5: Attendance at, and active participation in, the Case Analysis seminar and satisfactory presentation of a case

These assessment and procedural components constitute 100% of the assessment for this unit and failure to satisfactorily complete the requirements of any one component will result in the student failing the unit, preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

## HPS711 – Psychological Intervention 3

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*Trimester 2 Unit Chair: Glenn Melvin*

*Prerequisite: HPS708*

*Corequisite: Nil*

*Incompatible with: HPS915*

*Scheduled learning activities – campus: 1 x 4 hour seminar per week*

### Content

This unit is designed to provide students with both the theoretical and practical framework for advanced clinical practice relevant to the treatment of complex conditions and clients. It focuses on skill acquisition in schema therapy relevant to this broad area, building upon and extending the knowledge and skills developed in Psychological Interventions 1 and 2. The course will focus on understanding and responding to issues with engagement and resistance in therapy as well as understanding how therapy finishes from a client and clinician perspectives.

As well as providing new therapeutic techniques the course will also consider the media through which psychological interventions may be delivered, specifically teleweb services. Opportunities to develop clinical competency in these areas will occur through case analysis, simulation, practical rehearsal (role-play) and individualised feedback.

## Assessment

- Assessment task 1: Therapy repair task – 20 minute video therapy simulation and 1000 word report
- Assessment task 2: Objective Simulated Clinical Exam (OSCE) demonstrating simulated advanced Schema Therapy session (40 minutes)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS712 – Clinical Placement and Case Analysis 3

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Amanda Dudley and Melissa O'Shea*

*Prerequisite: HPS709 and HPS777*

*Corequisite: Nil*

*Incompatible with: HPS912*

*Scheduled learning activities – campus: 1 x 1.5 hour seminar per week and 50 days supervised placement*

### Content

This unit builds upon previous placement competencies and is aimed at providing students with the opportunity to further enhance their clinical psychology skills. Students will be expected to demonstrate key competencies in ethical and professional frameworks as well as advanced psychological assessment and intervention skills. Supervision on this placement will be aimed at increasing autonomy and responsibility as well as higher level integration of theory and practice.

Placements aim to provide students with opportunities to develop clinical psychology skills in a range of settings such as adult, adolescent, acute, chronic, inpatient, community, forensic and/or rehabilitation services. It is expected that students will undertake either an adult OR a child/adolescent placements that will complement their previous placements.

The placement program will be established jointly by the student, the placement coordinator, and the practitioners supervising the placement. This will include the minimum amount of face-to-face contact time with clients and the minimum supervision requirements. Placement Learning Contracts will specify learning objectives and key competencies as well as the responsibilities of the student, the Agency Supervisor and the Placement coordinator. Students will be required to increase their client contact and carry their own caseload, under supervision. Student's performance will be reviewed at a mid and end of placement meeting. All meetings and paperwork are to be completed and are considered part of the unit requirements.

The unit also includes Case Analysis seminars, which are attended by all second year clinical Masters Students, and facilitated by staff. Students will be required to present a case from their placement experience. Third year clinical Doctor of Psychology student(s) will also be invited to attend and present a case weekly. The seminars will provide the opportunity for students to obtain feedback from staff and other students.

A final day entitled "Transition to Professional Practice" will be scheduled and is aimed at preparing students for finishing their course and looking ahead to professional life as a registered psychologist and as a graduate of Deakin. This will include information and knowledge about the registrar program and becoming a supervisor down the track. This day will bring students together and provides an opportunity to reflect on learnings and achievements.

## Assessment

- Assessment task 1: Attendance for a minimum of 50 days
- Assessment task 2: Presentation of logbook to the University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 3: Satisfactory report on professional and ethical competence of the student from the Placement Supervisor and University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 4: Satisfactory case report of approximately 4000 words written by the student and submitted to the University Supervisor within 21 days of completion of placement
- Assessment task 5: Attendance at and active participation in Case Analysis seminars as well as "Transition to Professional Practice" and satisfactory presentation of a case

These assessment and procedural components constitute 100% of the assessment for this unit and failure to satisfactorily complete the requirements of any one component will result in the student failing the unit, preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

## HPS714 – Studies in Psychopathology

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ross King*

*Prerequisite: Nil*

*Corequisite: HPS779*

*Incompatible with: HPS914*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

## Content

This unit will encourage the integration of relevant physiological, psychological, family, social, and cultural factors so as to form a broad biopsychosocial perspective to understanding psychopathology. Within this multidimensional integrative perspective, there will be an initial examination of the history of psychopathology, and issues related to classification and diagnosis, with a particular emphasis on a critical evaluation of DSM-5 and ICD-10 as diagnostic tools. A range of specific disorders will be considered, using a lifespan approach to psychopathology. Current etiological theories and conceptual models for each disorder will be considered through a critical examination of relevant research, along with overlap among the symptoms for the different disorders, and the use of differential diagnosis.

## Assessment

- Assessment task 1: Mental State Examination report (1000 words)
- Assessment task 2: Essay (3000 words)
- Assessment task 3: Objectively Structured Clinical Examination (OSCE)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## Prescribed texts

American Psychiatric Association. (2013). Diagnostic and statistical manual of mental disorders (5th ed.). Arlington, VA: American Psychiatric Publishing.

## HPS715 – Psychological Assessment

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nicholas Ryan*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour cloud (online) class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour cloud (online) class and 1 x 1 hour cloud (online) seminar per week*

### Content

This unit introduces the theoretical and psychometric basis of psychological tests. It will then provide an overview of the psychological assessment of an individual for various purposes and in a range of contexts. Major psychological tests will be studied with respect to their theoretical basis, construction, reliability, validity and applicability, including tests of ability, personality, and mood. Both child/adolescent and adult populations will be considered. The process of formulating psychological opinion in casework will be introduced. Report writing skills will be developed and ethical issues discussed.

### Assessment

- Assessment task 1: Test evaluation (1000–1500 words) 15%
- Assessment task 2: Case report (1500–2000 words) 35%
- Assessment task 3: MCQ Examination (2 hours) 50%

### Prescribed texts

Cohen, R.J., & Swerdlik, M.E. (2017). *Psychological Testing and Assessment: An introduction to tests and measurement* (9th Edition). McGraw Hill: New York.

## HPS721 – Organisational Development and Change Management

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simon Albrecht*

*Cohort rule: Only available to students enrolled in H752 Master of Psychology (Organisational)*

*Prerequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 3 hour seminars per fortnight*

### Content

This unit will provide students with a theoretical and practical understanding of organisational development and change. Skills to critically assess, design, implement and evaluate organisational development and change initiatives will be the focus of this unit. Students will apply their evidence-based knowledge, skills and abilities to real-world cases.

### Assessment

- Assessment task 1: Individual written report (2500 words) 40%
- Assessment task 2: Oral presentation – group assignment 30%
- Assessment task 3: Organisational Change Case-Study report – group assignment (total 2000 words) 30%

## HPS722 – Facilitation, Training and Evaluation in Organisations

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Arlene Walker*

*Cohort rule: Only available to students enrolled in H752 Master of Psychology (Organisational)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5 hour class and 1 x 1.5 hour seminar per week*

## Content

This unit will provide students with a theoretical and practical understanding of training and development in organisations. Students will learn program evaluation skills and be given an opportunity to enhance their training and facilitation skills. The unit will also provide students with an opportunity to design, implement and evaluate an organisational training program.

## Assessment

- Assessment task 1: Class participation 10%
- Assessment task 2: Written assignment (2500 words) 60%
- Assessment task 3: Class presentation 30%

# HPS723 – Organisational Placement 1

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Vanessa Sturre and Cathy Caballero*

*Trimester 2 Unit Chair: Vanessa Sturre*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: HPS759*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Placement hours negotiated between student, university supervisor and placement site.*

## Content

This unit fosters professional skills and awareness of professional issues in applied settings. Prior to their first placement, students are required to participate in placement preparation activities designed to enhance placement planning and student development. Following this, each student will be assigned a placement in an organisation, which will expose students to the workings of an organisation and the types of issues that arise in an organisational psychological context.

The placement will be based on short and well-defined activities that students can complete for the organisation within a specified time period. The broad features of the activities will be negotiated with the organisation prior or upon commencing the placement, with final details being agreed to by the student, placement coordinator and the organisation within the first two weeks of the placement. The project/activity will be directly relevant to organisational psychology and will relate to a concern that the organisation wishes to address.

## Assessment

In line with professional standards for the training of provisional psychologists, students must demonstrate a satisfactory level of competence in both pre-placement preparation and placement completion. An ungraded pass will be awarded to the student for successful completion of the two assessment tasks.

Assessment task 1: Pre Placement Preparation:

- Participation in the Post-Graduate Assessment and Development Centre (PG-DAC) or alternative task and working collaboratively with Placement Coordinator/s to develop an individual Placement Development Plan (PDP).
- Completion of online placement module and attendance of a group placement induction seminar

Assessment task 2: Placement Completion:

- Successful completion of placement and required placement documentation.
- Participation in formal peer learning experiences.

Students must satisfactorily complete all components of both assessment tasks in order to obtain a pass for the unit. If there is uncertainty regarding the satisfactory completion of any of the components or if the student's competence is questioned, the Unit Chair(s) will review and determine the outcome. Failure to complete the requirements of any one component satisfactorily will result in the student failing the unit assessment. Failure of a placement unit may lead to enrolment in the course being revoked.

## HPS724 – Applied Methodology for Organisational Analysis

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jeromy Anglim*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5 hour class and 1 x 1.5 hour seminar per week*

### Content

This unit will provide students with an understanding of both quantitative and qualitative research methodology, and the skills to conduct research relating to organisations. The unit advances specialist knowledge of industrial and organisational psychology in the areas of research design, research methods, and statistical analysis. In particular the unit will focus on: techniques for the analysis of the type of data typically collected within organisations; methods for the effective presentation of results in organisational contexts; and critical evaluation of research design in organisational studies.

### Assessment

- Assessment task 1: Written assignment (3000 words) 60%
- Assessment task 2: Essay (2000 words) 40%

## HPS725 – Organisational Placement 2

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Vanessa Sturre and Cathy Caballero*

*Trimester 2 Unit Chair: Vanessa Sturre*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: HPS723*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Placement hours negotiated between student, university supervisor and placement site.*

### Content

Organisational Placement 2 involves students spending an agreed number of days in an assigned organisational setting. The placement units are designed to equip students with professional skills and develop their awareness of professional issues. Students will experience a wide range of organisational experiences and will become more familiar with various organisational psychology issues and potential interventions during placement. Students are expected to apply learnings from course subjects, build on their learning from previous placements and continue to enhance their professional and technical competence. Students will complete a well-defined project/activity for the organisation during the specified length of attendance. The broad features of the activities will be negotiated with the organisation prior to or upon commencing the placement, with final details being agreed to by the student, placement coordinator and the organisation within the first two weeks of the placement. The project/activity will be directly relevant to organisational psychology and will relate to a concern that the organisation wishes to address.

### Assessment

In line with professional standards for the training of provisional psychologists, students must demonstrate a satisfactory level of competence regarding placement completion. An ungraded pass will be awarded to the student for successful completion of the following assessment task.

Assessment task 1: Placement Completion

- Successful completion of placement and required placement documentation.
- Participation in formal peer learning experiences.

Students must satisfactorily complete all components of the assessment task in order to obtain a pass for the unit. If there is uncertainty regarding the satisfactory completion of any of the components or if the student's competence is questioned, the Unit Chair(s) will review and determine the outcome. Failure to complete the requirements of any one component satisfactorily will result in the student failing the unit assessment. Failure of a placement unit may lead to enrolment in the course being revoked.

## HPS726 – An Introduction to Organisational Psychology

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Vicki Kavadas*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5 hour class and 1 x 1.5 hour seminar per week*

### Content

This unit is designed to introduce students to the psychology of organisations, with particular emphasis on its implications for practice. Current advances in organisational psychology will be explored in the context of the varied roles and responsibilities an organisational psychologist can undertake. Additionally, students will further develop skills in writing for organisations and in making presentations, skills that are essential in the organisational workplace.

### Assessment

- Assessment task 1: Group oral presentation (10 minutes per person) 20%
- Assessment task 2: Individual report (2000 words) 30%
- Assessment task 3: Examination (2 hours) 50%

## HPS727 – Organisational Intervention Strategies and Skills

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Arlene Walker*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5 hour class and 1 x 1.5 hour seminar per week*

### Content

This unit is concerned with the development of practical skills required to deliver individual and group-based interventions within the workplace. These skills include collecting and integrating information, then selecting and implementing appropriate intervention strategies. Interviewing and counselling skills will also be developed. Intervention strategies and skills to be learnt relate to topics such as team building, health promotion and bullying and harassment.

### Assessment

- Assessment task 1: Written assignment (1500–2000 words) 30%
- Assessment task 2: In class activity/presentation 30%
- Assessment task 3: Group case study 40%

## HPS728 – Organisational Placement 3

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Vanessa Sturre and Cathy Caballero*

*Trimester 2 Unit Chair: Vanessa Sturre*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: HPS725*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Placement hours negotiated between student, university supervisor and placement site.*

### Content

Organisational Placement 3 involves students spending an agreed number of days in an assigned organisational setting. The placement units are designed to equip students with professional skills and develop their awareness of professional issues. Students will experience a wide range of organisational experiences and will become more familiar with various organisational psychology issues and potential interventions during placement. Students are expected to apply learnings from course subjects, build on their learning from previous placements and continue to enhance their professional and technical competence. Students will complete a well-defined project/activity for the organisation during the specified length of attendance.

The broad features of the activities will be negotiated with the organisation prior or upon commencing the placement, with final details being agreed to by the student, placement coordinator and the organisation within the first two weeks of the placement. The project/activity will be directly relevant to organisational psychology and will relate to a concern that the organisation wishes to address.

## Assessment

In line with professional standards for the training of provisional psychologists, students must demonstrate a satisfactory level of competence regarding placement completion. An ungraded pass will be awarded to the student for successful completion of the following assessment task.

Assessment task 1: Placement Completion:

- Successful completion of placement and required placement documentation.
- Participation in formal peer learning experiences.

Students must satisfactorily complete all components of the assessment task in order to obtain a pass for the unit. If there is uncertainty regarding the satisfactory completion of any of the components or if the student's competence is questioned, the Unit Chair(s) will review and determine the outcome. Failure to complete the requirements of any one component satisfactorily will result in the student failing the unit assessment. Failure of a placement unit may lead to enrolment in the course being revoked.

## HPS730 – Occupational Health and Wellbeing

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Michael Leiter*

*Cohort rule: Only available to students enrolled in H752 Master of Psychology (Organisational)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class and 1 x 3 hour seminar per fortnight*

## Content

This unit will examine work-related variables including: (a) stress and burnout, (b) stress management, and (c) occupational health and safety. Topics include: an introduction to a determinants model of health, models of stress and coping; the effects of job demands, job control, and other organisational stressors on workers' health and quality of life; individual and organisational strategies for coping with stress; occupational health and safety; approaches to health promotion programs in the workplace.

## Assessment

- Assessment task 1: Group oral presentation (50 minutes per group) 30%
- Assessment task 2: Individual written report (2500 words) 40%
- Assessment task 3: Group case study report (2000 words, approximately 500 words per student) 30%

## HPS742 – Research Methods in Psychology C

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jarrad Lum*

*Cohort rule: This unit is only available to students enrolled in H650 Graduate Diploma of Psychology and H664 Graduate Diploma of Psychology (Pre-Practice)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 2 hour seminar per week*

## Content

This element of coursework is designed to provide you with the skills necessary to undertake a research project. The coursework covers issues relating to research design, research ethics, undertaking a systematic review. Laboratory classes will undertake weekly practical exercises that examine in more detail the topic addressed in the weekly class.

## Assessment

- Assessment task 1: Systematic review assignment (2000 words) 50%
- Assessment task 2: Examination (2 hours) 50%

## HPS758 – Psychological Assessment in Organisations

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jeromy Anglim*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5 hour class and 1 x 1.5 hour seminar per week*

### Content

This unit explores the historical development, principles, purposes, and procedures of psychological assessment. Topics include: the psychometric, behavioural, and cognitive assessment of significant industrial and organisational characteristics; the role of assessment in evaluating the individual, job, and organisation for purposes of decision-making and intervention; the administration of psychological tests and other major methods of assessment; ethical and legal considerations; the conduct of testing; and the recording and communication of results. Students will be taught the assessment methods and instruments commonly employed in industrial, organisational, and health settings.

### Assessment

- Assessment task 1: Interpretation of psychological assessments as an integrated work-related psychological report (1000 words) 30%
- Assessment task 2: Organisational assessment tool (oral presentation) 30%
- Assessment task 3: Examination (2 hours) 40%

## HPS759 – Issues in Professional Organisational Psychology

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Vicki Kavadas and Cathy Caballero*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 3 hour classes (online delivery). 7 x 1.5 hour class and 7 x 1.5 hour seminar over 11 weeks*

### Content

This unit is designed to prepare students for professional practice by providing learning experiences and knowledge on the regulatory, ethical, legal and professional practice responsibilities of organisational psychologists. The unit covers important aspects of the profession and professionalism including the application of the APS Code of Ethics and ethical decision making in professional contexts. The unit also examines important aspects of the practice context for organisational psychology and aims to facilitate the development of critical competencies for professional practice. As a pre-requisite for placement, students will also cover all requirements and responsibilities relevant to organisational placements

### Assessment

- Assessment task 1: Class presentation (2500 words) 35%
- Assessment task 2: Response to scenario (1000 words) 25%
- Assessment task 3: Critical Reflection (1500 words) 40%

## HPS766 – Research Thesis A

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Nicki Dowling*

*Cohort rule: Students must be enrolled in H750 Master of Psychology (Clinical) to enrol in this unit*

*Prerequisite: HPS779*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students are expected to attend regular meetings with their academic supervisor, either in person or via the cloud.*

### Content

Each student will select a research topic which will be supervised by staff (and possibly co-supervised by a practitioner). To assist topic selection, students will be provided with a list of staff research areas. Each student will complete and submit a 3000 word research proposal relevant to the topic. Students will present this proposal to a meeting of students and staff to obtain feedback about the proposal. Students should then complete an application form for ethics approval.

### Assessment

- Assessment task 1: Written research proposal (3000 words)
- Assessment task 2: Oral presentation

All summative assessments in this unit are awarded at an ungraded pass/fail level. All assessment must be passed in order to pass the unit.

## HPS767 – Research Thesis B

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nicki Dowling*

*Prerequisite: HPS766*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students are expected to attend regular meetings with their academic supervisor, either in person or via the cloud.*

## Content

During this unit data collection and data analysis will be carried out.

### Assessment

Assessment task 1: Progress report (2000 words)

The summative assessment in this unit is awarded at an ungraded pass/fail level. This assessment must be passed in order to pass the unit.

## HPS771 – Research Methods in Psychology A

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Warrnambool, Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Christian Hyde*

*Trimester 2 Unit Chair: Ian Fuelscher*

*Trimester 3 Unit Chair: Michael Do*

*Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HP671, HPS201*

*Scheduled learning activities – campus: Trimester 2: 1 x 1 hour class and 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Trimester 1, 2 and 3: 1 x 2 hour cloud (online) seminar per week*

### Content

This unit will introduce students to a variety of parametric univariate statistics commonly used in psychology. The focus is on both a conceptual and analytical understanding, rather than strict computational problem solving. The unit progresses from a discussion of descriptive statistics and the foundation of hypothesis testing to the introduction of specific statistical procedures such as the t-test, chi-square, Analysis of Variance, Correlation and Regression. An important focus of the unit is on understanding the logic underlying the various statistical analyses covered. The unit also emphasises links between specific statistical analyses and common study designs used in psychology. Students will be taught to analyse data primarily through definitional formulae, as well as a computer-based statistical package.

## Assessment

- Assessment task 1: Short answer assignment (2000 words) 40%
- Assessment task 2: Closed book examination (2 hours) 50%
- Assessment task 3: Research Design Challenge (1000 words) 10%

## HPS772 – Child and Adolescent Development

### Enrolment modes:

Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Warrnambool, Cloud (online)

Trimester 3: Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 2 Unit Chair: Subhadra Evans

Trimester 3 Unit Chair: Subhadra Evans

Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706

Prerequisite: Nil

Corequisite: Nil

Incompatible with: HPS202

### Scheduled learning activities – campus:

Trimester 2 Burwood (Melbourne) and Waurin Ponds (Geelong): 1 x 1 hour seminar per week; 4 x 1.5 hour masterclasses per trimester; 1 x 1 hour recorded class per week

Trimester 2 Warrnambool: 1 x 1 hour seminar per week; 4 x 1.5 hour recorded masterclasses per trimester; 1 x 1 hour recorded class per week

### Scheduled learning activities – cloud (online):

Trimester 2: 1 x 1 hour cloud (online) seminar per week; 4 x 1.5 hour masterclasses per trimester (live streaming or recording); 1 x 1 hour recorded class per week

Trimester 3: 1 x 1 hour cloud (online) seminar per week; 4 x 1.5 hour recorded masterclasses per trimester; 1 x 1 hour recorded class per week

## Content

The unit addresses the study of several aspects of child development (cognitive, linguistic, social, emotional, biological, motor, moral, developmental disorders) from infancy to adolescence using a variety of theoretical orientations, and involves applying the processes of development to understand real-life problems.

## Assessment

- Assessment task 1: Annotated bibliography (1200 words) 20%
- Assessment task 2: Policy brief (1750 words) 40%
- Assessment task 3: Examination (2 hours) 40%

## Prescribed texts

There is no prescribed text for this unit. All readings will be provided via CloudDeakin.

## HPS773 – The Human Mind

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)

Trimester 3: Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Stefanie Sharman

Trimester 3 Unit Chair: Stefanie Sharman

Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706

Prerequisite: Nil

Corequisite: Nil

Incompatible with: HPS203

### Scheduled learning activities – campus:

Trimester 1: 3 x 1 hour class per trimester, 1 x 2 hour seminar per fortnight, 1 x 1 hour online activities per week

### Scheduled learning activities – cloud (online):

Trimester 1: 3 x 1 hour class per trimester, 1 x 2 hour seminar per fortnight, 1 x 1 hour online activities per week  
Trimester 3: 3 x 1 hour recorded class per trimester, 1 x 2 hour (online) seminar per fortnight, 1 x 1 hour online activities per week

## Content

This unit presents a broad coverage of theories proposed by psychologists to explain the processes by which humans acquire, store, communicate, and use knowledge or information; the various research methods used by psychologists to study these processes; and some classic experimental findings in cognitive psychology which are the cornerstones of the theories referred to above. Topics covered include object recognition, attention, memory, reasoning, decision-making and problem-solving. These topics are treated within an information-processing approach to human cognition.

## Assessment

- Assessment task 1: Laboratory Report Part 1 (900 words) 15%
- Assessment task 2: Laboratory Report Part 2 (1800 words) 25%
- Assessment task 3: Critical Evaluation (900 words) 20%
- Assessment task 4: Examination (2 hours) 40%

## Prescribed texts

Reisberg, D. (2019). *Cognition: Exploring the Science of the Mind* (7th ed.). New York: Norton.

# HPS774 – Human Social Behaviour

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Warrnambool, Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Anna Klas*

*Trimester 3 Unit Chair: Michelle Benstead*

*Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS204*

*Scheduled learning activities – campus:*

*Trimester 1 Campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online):*

*Trimester 1: 1 x 2 hour Cloud (online) seminar per week*

*Trimester 3: 1 x 1 hour recorded class per week.*

*1 x 2-hour online seminar per fortnight*

## Content

This Unit covers the main theories and research methods of social psychology. Topics include: an introduction to social psychology, research in social psychology, social cognition, social perception, self and identity, attitudes and persuasion, stereotypes and prejudice, social influence, group processes, aggression and prosocial behaviour, and finally, liking, love, and close relationships. As we move through the topics, the unit will explore the relevant theory and research and students will advance their knowledge of social psychology through application to real world-contexts (e.g., solving and understanding real-world problems).

## Assessment

### Trimester 1

- Assessment task 1: APA-style lab report assignment (2500 words) 45%
- Assessment task 2: Team-based learning activity (500 words) 10%
- Assessment task 3: Examination (2 hours) 45%

### Trimester 3

- Assessment task 1 (Individual): Research Proposal (1800 words) 40%
- Assessment task 2 (Individual): Group Processes in Action: Reflection (700 words) 15%
- Assessment task 3 (Individual): 5 x online quizzes, one per fortnight (10 multiple choice questions per quiz) 15%
- Assessment task 4 (Individual): Multiple Choice Examination (90 multiple choice questions, 2 hours) 30%

## Prescribed texts

Human Social Behaviour HPS204/774 Custom Publication, Vaughan & Hogg, Pearson Education

The prescribed textbook is a customised text specially put together for Deakin.

# HPS775 – Brain, Biology and Behaviour

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online), Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mark Rogers*

*Trimester 3 Unit Chair: Mark Rogers*

*Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSE207, HPS205, HPS310, HSO207*

*Scheduled learning activities – campus: Trimester 1: 1 x 2 hour class per week and 1 x 2 hour seminar per fortnight*

*Scheduled learning activities – cloud (online): Trimester 1 and Trimester 3: Online independent and collaborative learning activities including 1 x 2 hour online seminar per fortnight*

## Content

This unit explores contemporary neurobiological explanations of human behaviour. Individual, social, ethical and practical implications are examined in the context of topics including: neural structure and function, psychopharmacology, biological methods, sensory systems, emotions, motor activity, sleep, mental disorders, language, memory and learning.

## Assessment

### Trimester 1

- Assessment task 1: Seminar manual 25%
- Assessment task 2: Anatomy online test 10%
- Assessment task 3: Group Presentations 15%
- Assessment task 4: Examination (2 hours) 50%

### Trimester 3

- Assessment task 1: Seminar manual 30%
- Assessment task 2: Anatomy online test 10%
- Assessment task 3: Group Presentations 10%
- Assessment task 4: Examination (2 hours) 50%

### Trimester 1 and Trimester 3

In fortnightly seminars students will work on simulations and exercises designed to consolidate and expand upon material covered in the classes (in class for campus students or online (via Collaborate) for cloud (online) students). Cloud (online) students will require access to a computer-compatible microphone.

## Prescribed texts

Kalat, JW 2019, Biological Psychology, 13th edn, Cengage, Boston, MA.

# HPS776 – Issues in Professional Psychology

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Melissa O'Shea*

*Cohort rule: Students must be enrolled in H750 Master of Psychology (Clinical) to enrol in this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS976*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

The Unit Learning Outcomes (ULOs) for Issues in Professional Psychology represents important preparation for professional practice, which begins in Trimester 2 with the Clinical Placement Program and then continues throughout the course of the professional lives of graduates of this program. It is designed to provide knowledge, reflection and practice in professional issues and professional ethics as well as the governance framework that exists to support Clinical Psychology as a health discipline. Students will become familiar with the various professional standards and codes relevant to the provision of psychological services. These will include: The Australian Psychological Society Code of Ethics (as adopted by the Psychology Board of Australia), APS Ethical Guidelines, and the Australian National Practice Standards for the Mental Health Workforce.

The Unit begins by considering the governance environment in which Professional Psychology sits with a focus on the Public Mental Health System and applying effective ethical and reasoning frameworks to decision making to common dilemmas when working with clients in professional practice. Contemporary issues such as Leadership in Psychology and Health as well as the contemporary practice paradigms of Client-Centred care and Recovery orientation are also jointly considered and wherever possible utilise active learning activities.

Consistent with the wider intended learning outcomes of the program, a key focus of the Unit is the application of ethical, legal and professional Psychology practice principles within the inter-professional Health environment, with the teaching and learning and assessment activities supporting the achievement of these competencies for students. Students will directly apply new knowledge in relation to working effectively and collaboratively in health care through participation in inter-disciplinary student teams (including Psychology, Nursing, Occupational Therapy, Social Work, Medical Imaging, Optometry and Medicine) working towards the development of shared care plans for complex simulated clients using computer assisted learning technology. Students will also participate in 8 days of Work-Integrated learning within the Barwon Health Mental Health Service where they will be observe and reflect on Psychology and Health practice in action in readiness to commence Clinical Placements.

A highlight of the Unit is the 2-day Aboriginal Cultural Immersion module where students will spend time at the Institute of Koori Education and the Wathaurong Health Co-operative in order to facilitate understanding of culturally sensitive approaches to applying psychology knowledge and practice in working with Aboriginal people. Students will be assessed on their capacity to communicate how this learning will change their practice using a video-blog.

## Assessment

- Assessment task 1: Work Integrated Learning Portfolio (2000 words equivalent)
- Assessment task 2: Video-blog examining Cultural Sensitivity in Psychology Practice (5 minutes)
- Assessment task 3: Inter-Professional Team Care Plan Development (2 in total)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS777 – Psychological Intervention 1

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Melissa O'Shea*

*Cohort rule: Students must be enrolled in H750 Master of Psychology (Clinical) to enrol in this unit*

*Prerequisite: Nil*

*Corequisite: HPS779*

*Incompatible with: HPS977*

*Scheduled learning activities – campus: 1 x 3 hour class and 1 x 1 hour seminar per week*

## Content

This unit begins by examining the important principles of Cognitive Behavioural Therapy (CBT), which represents one of the most widely used evidence-based treatment modalities in Clinical Psychology. These principles, sometimes known as threshold concepts, include the role of thought in behaviour and mood, the development of practice in the observation of thought, collaboration, behavioural experimentation and empiricism. These are considered within the framework of the therapeutic relationship and supported by asking students to engage directly with this knowledge via simulated practice including such activities as role plays.

Specific attention is given to the application of CBT to the treatment of anxiety and mood disorders which represent the most common mental disorders. Students will be directly preparing to apply this knowledge in practice during the first Clinical Placement Unit in Trimester 2. Teaching and learning, as well as assessment activities will support the student's ability to apply CBT to these conditions as well as the ability to synthesise information such that relevant treatment decisions can be made, with individualised feedback throughout the Unit.

Consistent with the wider intended learning outcomes of the program, focus is also placed on developing reflective practice capacity in relation to the student's own development in preparation for engagement with clinical supervision. Students will critique their own progress and also provide peer feedback to other students in the unit. A highlight of the Unit is the opportunity to further develop CBT practice through participation in a Mindfulness-based CBT group with other students focussed on cognitive behavioural based self-care strategies with the aim that these strategies support the student throughout the program as well as providing an experiential teaching and learning activity.

## Assessment

- Assessment task 1: Development of a learning Development Plan based on feedback from staff and peers as well as self-assessment in simulated CBT activities (equivalent to 1000 words)
- Assessment task 2: Evidence of participation in therapy learning activities generated in CBT group through active participation in group CBT sessions
- Assessment task 3: Individual CBT Treatment Plan design (equivalent to 1500 words)
- Assessment task 4: Objective Simulated Clinical Exam (OSCE) demonstrating a brief simulated CBT session

This Unit is graded as Ungraded Pass/Fail only. All Assessment Tasks must be achieved to a competent level to pass the Unit.

## Prescribed texts

Kennerley, H., Kirk, J. & Westbrook, D. (2017). An introduction to cognitive behaviour therapy: Skills and applications. (3rd ed.). Los Angeles: Sage Publications.

## HPS778 – Biological and Neuropsychological Perspectives on Disorder

*Enrolment modes: Not offered 2019*

*Trimester 1 2020: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*Cohort rule: Students must be enrolled in H750 Master of Psychology (Clinical) to enrol in this unit*

*Prerequisite: Nil*

*Corequisite: HPS779, HPS714*

*Incompatible with: HPS978*

*Scheduled learning activities – campus: 2 x full day workshops, 7 x 2 hour seminars*

## Content

This unit is focused on applying a biopsychosocial model of health into the practice of clinical psychology. This aligns with contemporary perspectives on health and mental health that take into account a range of determinants across the biological, psychological and social domains. It begins by examining psychopharmacology as it relates to a comprehensive treatment plan for many psychological disorders and in doing so introduces the integrated nature of biology and psychology in the treatment of mental disorders. Students will be extended to consider how biological and psychological treatments can be effectively integrated, including through the review of key principals of inter-professional practice. They will also specifically focus on the treatment of Pain as a clinical psychology application of these principals.

The Unit is also designed to review and extend students overall understanding of behavioural neuroscience and neuroanatomy. This is achieved by examining these concepts through the lenses of Psychological Medicine and the Neuroscience of Interpersonal Development and how these specialty areas of clinical psychology support the assessment, prevention and treatment of mental disorders commonly seen by Clinical Psychologists. A highlight of the Unit is the examination of how contemporary perspectives on the neurobiology of mental disorders has supported the development of third wave evidence based psychological therapies including somatic therapies. Consistent with the wider intended learning outcomes of the Clinical post-graduate program, emphasis is placed on developing students capacity to formulate and communicate treatment planning for clients within the inter-professional context and taking into account a biopsychosocial view of complex psychological disorders.

## Assessment

- Assessment 1: Assessment and Treatment Recommendation Report to Primary Care (1500 words)
- Assessment 2: Simulated psychoeducation session (30–40 minute video plus self-reflection, 500 words)
- Assessment 3: Understanding Mental Disorder through the Biopsychosocial model of Health – Video Blog (5–7 minutes)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS779 – Psychological Assessment

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: George Youssef*

*Cohort rule: Students must be enrolled in H750 Master of Psychology (Clinical) to enrol in this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS979*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This is a practical unit aiming to familiarise students with a range of psychological assessment methods commonly administered in a clinical setting. While the main focus will be on testing, other major methods of clinical assessment will be covered, namely behavioural observation, interviewing and case studies. Various categories of tests will be discussed, evaluated and administered, including cognitive and intelligence tests, ability tests, personality tests, and tests of mood states. The role of such tests in diagnostic work will be emphasised as well as their research value and prognostic and therapeutic use. Particular skills required will be practised through 'hands-on' experience.

## Assessment

- Assessment task 1: WAIS IV scoring exercise
- Assessment task 2: WAIS IV administration and interpretive report (2000 words)
- Assessment task 3: WAIS-IV/PAI integrative report (2000 words)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS781 – Research Methods in Psychology B

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shannon Hyder*

*Trimester 2 Unit Chair: Shannon Hyder*

*Trimester 3 Unit Chair: David Skvarc*

*Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706*

*Prerequisite: HPS771*

*Corequisite: Nil*

*Incompatible with: HPS301*

*Scheduled learning activities – campus:*

*Trimester 1: 1 x 1 hour seminar per week, 1 x 2 hour lab class per week*

*Scheduled learning activities – cloud (online):*

*Trimester 1, Trimester 2, Trimester 3: Online independent and collaborative learning activities including 1 x 2 hour cloud (online) seminar per week*

### Content

This unit provides an advanced treatment of several important techniques required for the conduct of independent research. Topics include: experimental design and the analysis of variance (ANOVA) statistical procedure including planned contrasts, simple effects, interpretation of higher order factorial designs; repeated measures and mixed-mode ANOVA; non-experimental designs, scale construction and surveys; sampling; data screening; and multiple regression. Students will be given experience in the design and conduct of psychological research, analysis of data using a computer-based statistical package, and writing research reports using APA format.

### Assessment

- Assessment task 1: Assignment (2000 words) + critical reflection (500 words) 40%
- Assessment task 2: Weekly quizzes (5 multi-choice questions per week) 10%
- Assessment task 3: Examination (2 hours) 50%

### Prescribed texts

Field, A. (2018). *Discovering Statistics Using SPSS* (5th edition). Sage Publications.

## HPS785 – Research Thesis A

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simon Albrecht*

*Trimester 2 Unit Chair: Simon Albrecht*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: No formal contact hours*

### Content

During this unit, each student will select a research topic in consultation with a member of staff who will act as their primary supervisor. The project may be co-supervised by a practitioner. Each student will complete and submit a 7000 word review of the literature relevant to the topic. To assist topic selection, students will be provided with a list of staff research areas.

### Assessment

Assessment task 1: Literature review (7000 words)

Literature review contributes 25% to overall mark for thesis units, calculated after all four thesis components are assessed.

## HPS787 – Research Thesis C

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Nicki Dowling*

*Prerequisite: HPS767*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students are expected to attend regular meetings with their academic supervisor, either in person or via the cloud.*

## Content

This is the last of the three research thesis units (HPS766, HPS767 and HPS787). During this unit students are expected to submit a written empirical report (maximum 6000 words).

## Assessment

Assessment task 1: Research thesis (6000 words)

## HPS788 – Psychopathology

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Richard Moulding*

*Trimester 3 Unit Chair: Rebecca Diehm*

*Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS308*

*Scheduled learning activities – campus:*

*Trimester 2 Burwood (Melbourne) and Waurn Ponds (Geelong): Weekly 1 x 2 hour class; 1 x 2 hour seminar per fortnight; weekly online independent learning activities*

*Trimester 2 Warrnambool: Online independent and collaborative learning activities including weekly 1 x 2 hour recorded class; 1 x 2 hour seminar per fortnight (face-to-face or via videolink); weekly consultation via the Psychology Hub at Warrnambool*

*Scheduled learning activities – cloud (online):*

*Trimester 2 and Trimester 3: Online independent and collaborative learning activities including weekly 1 x 2 hour recorded class; 1 x 2 hour cloud (online) seminar per fortnight; weekly online components.*

## Content

The unit has the dual aims of allowing you to learn and explore concepts of mental disorders, and also of understanding your appreciation of the stigma and impact of such disorders on the lives of those affected. In so doing, this unit focuses on providing an introduction to abnormal and clinical psychology from a descriptive, theoretical and experimental perspective. In particular, we will focus on theories of psychology that integrate multiple perspectives – a so-called multidimensional integrative perspective.

Topics covered will include models and theories of abnormal psychology with emphasis on an integrative approach to understanding psychopathology; diagnosis and classification; as well as an examination of the major classes of disorders such as the anxiety, mood, and schizophrenia-related disorders. Where appropriate, there will be a discussion and evaluation of therapeutic interventions and ethical issues pertaining to intervention.

## Assessment

- Assessment task 1: Written assignment (1500 words) 30%
- Assessment task 2: Written assignment (1500 words) 30%
- Assessment task 3: Examination (1.5 hours) 40%

## Prescribed texts

Barlow, D. H., Durand, V. M., & Hofmann (2018).

Abnormal psychology: An integrative approach (8th ed.). Stamford, CT. Cengage Learning

## HPS791 – Personality

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sharon Horwood*

*Trimester 3 Unit Chair: Sharon Horwood*

*Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS307*

*Scheduled learning activities – campus: Trimester 2: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online):*

*Trimester 2 and Trimester 3: 1 x 2 hour cloud (online) seminar per week*

## Content

This unit provides students with an opportunity to explore a range of theoretical frameworks used in the study of personality. It will provide students with a sound knowledge of the nature of personality theories, and the major themes, assumptions and issues involved in this area.

Students will analyse the psychoanalytic, learning, phenomenological, dispositional and cognitive approaches, in order to assess their practical usefulness and scientific status. Activities will tend to focus on application of the theories.

## Assessment

- Assessment task 1: Lab report (2000 words) 40%
- Assessment task 2: Personality profile report (1000–1500 words) 20%
- Assessment task 3: Examination (2 hours) 40%

## Prescribed texts

Personality Psychology (custom text) the custom text is published both as hardcopy and an e-text.

# HPS792 – Research Thesis B

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simon Albrecht*

*Trimester 2 Unit Chair: Simon Albrecht*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: HPS785*

*Corequisite: Nil*

*Scheduled learning activities – campus: No formal contact hours*

## Content

Each student will continue development of his/her research project so that a research proposal results (2000 word PowerPoint presentation). The topic must be in the area of industrial/organisational psychology, be deemed to be of appropriate complexity for a Masters thesis, and to be viable given the resources available in the School. Students must present the proposal to a meeting of staff and students to obtain feedback about the proposal before progressing to the next step, preparing an application for ethics approval.

## Assessment

Assessment task 1: Written research proposal (2000 words) and oral presentation.

Research proposal and presentation contributes 10% to overall mark for thesis units, calculated after all four thesis components are assessed.

# HPS793 – Research Thesis C

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simon Albrecht*

*Trimester 2 Unit Chair: Simon Albrecht*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: HPS792*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: No formal contact hours*

## Content

During this unit data collection and data analysis will be carried out. Data collection must not commence before the project has received ethics approval.

## Assessment

Assessment task 1: Progress report (2000 words)

Progress report contributes 5% to overall mark for thesis units, calculated after all four thesis components are assessed.

# HPS794 – Research Thesis D

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simon Albrecht*

*Trimester 2 Unit Chair: Simon Albrecht*

*Cohort rule: Only available to students enrolled in H752*

*Master of Psychology (Organisational)*

*Prerequisite: HPS793*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: No formal contact hours*

*Scheduled learning activities – cloud (online): No formal contact hours*

## Content

This is the last of the four research thesis units (HPS785, HPS792, HPS793 and HPS794). During this unit, students are expected to submit a written research report on the empirical work, in the form of a journal article.

## Assessment

Assessment task 1: Research report (6000 words)

Research report contributes 60% to overall mark for thesis units, calculated after all four thesis components are assessed.

## HPS905 – Advanced Clinical Assessment

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Nicki Dowling*

*Prerequisite: HPS979*

*Corequisite: Nil*

*Incompatible with: HPS705*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

## Content

This unit deals with assessment for clinical syndromes with a view to planning treatment and evaluating progress. It also provides students with the skills to develop clinical profiles of clients in their placements. Topics include: the use and interpretation of specialised and in-depth tests, including projective techniques and multi-dimensional personality inventories, emphasising the development of a conceptual framework for conducting clinical assessments. Psychological testing is used to complement and enhance the clinical assessment. This unit aims to expand the students' expertise in following through specific hypotheses and utilising appropriate tests, and their skills in assessment, diagnosis and report writing. Each student will complete three comprehensive clinical reports of increasing complexity on hypothetical cases.

## Assessment

- Assessment task 1: Case profile (2000 words)
- Assessment task 2: Case profile (2000 words)
- Assessment task 3: Case profile (2000 words)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS907 – Advanced and Applied Research Methods

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Emily Kothe*

*Trimester 2 Unit Chair: Mark Stokes*

*Cohort rule: Students must be enrolled in H951 Doctor of Psychology (Clinical) to enrol in this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS707 and HPS911*

*Scheduled learning activities – campus: 1 x 3 hour computer practical per week*

*Scheduled learning activities – cloud (online):*

## Content

This unit will focus on a variety of methodological approaches to research based upon the scientist-practitioner model of evidence-based practice. The course will provide an overview of data management, basic Structural Equation Modeling, and basic qualitative analysis. Students are expected to be familiar with univariate statistical techniques prior to commencing the course, and have some familiarity with multivariate techniques. Students will be required to screen, clean, and prepare data for analysis and to undertake preliminary univariate and multivariate screening assessment.

## Assessment

- Assessment task 1: Statistical analysis and written assignment (2000 words)
- Assessment task 2: Examination

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS908 – Psychological Intervention 2

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Trimester 2 Unit Chair: Jade Sheen*

*Cohort rule: Must be enrolled in H951 Doctor of Psychology (Clinical) to enrol in this unit*

*Prerequisite: HPS977*

*Corequisite: Nil*

*Incompatible with: HPS708*

*Scheduled learning activities – campus: 1 x 3 hour class and 1 x 1 hour seminar per week*

### Content

Building on HPS977, Psychological Intervention 1, this is both a theoretical and practical unit that provides the opportunity for students to evaluate the evidence base for, and to develop skills in the delivery of a range of therapies for children and adolescents. At the commencement of the unit, students will learn how to modify evidence based interventions such as CBT, for use within younger populations. The unit will then focus on interventions for issues common to this population including behavioural disorders, eating disorders and developmental disorders. A major focus will be on the development of therapy skills through the use of virtual simulation, case based analysis and role play.

### Assessment

- Assessment task 1: Assignment (3000 words)
- Assessment task 2: Role-play presentation
- Assessment task 3: OSCE

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

### Prescribed texts

Barlow, D.H. (ed) (2014). Clinical handbook of psychological disorders: A step-by-step treatment manual (5th ed.). New York: The Guilford Press

## HPS910 – Clinical Placement and Case Analysis 1

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Amanda Dudley and Kate Hall*

*Prerequisite: Registration as a provisional psychologist and all of HPS914, HPS976, HPS977 and HPS979*

*Corequisite: Nil*

*Incompatible with: HPS706*

*Scheduled learning activities – campus: 50 full time days of placement plus pre-clinical workshops and case analysis intensive seminars, 2 x 1 day workshops*

### Content

The first clinical placement is designed to equip students with a range of clinical psychology skills and an awareness of professional issues. Students will fast-track the translation and integration of academic coursework learning into real life application.

This unit consists of three key activities:

1. pre-clinical workshops;
2. placement experience;
3. case analysis intensive seminars.

### Pre-clinical workshops

To prepare for placement attendance, students will participate in a number of practitioner led workshops covering topics such as professional identity, tertiary public mental health settings and procedures, applied suicide intervention skills training and RISK AWARE online module aimed at increasing students' knowledge and ability to assess potential risks within clinical placement environments.

### Placement experience

Through the Deakin University Psychology Clinics and Placement Partnerships at Eastern Health (Box Hill) and Barwon Health (Geelong), students will gain experience working with adults or children/adolescents experiencing mental health disorders. Students will be able to establish and demonstrate their clinical skills in clinical assessment, case formulation and intervention with individuals and groups.

As part of placement, students will engage in regular individual and group supervision. Supervisors are able to support students to realise individual professional development plans that can be carried across their course. The opportunity to experience a range of supervision models will advance students capacity to utilise supervision as a learning tool through their placement program and their career.

A Supervision contract will be developed at the start of placement which will require the development of specific learning objectives as well as outlining roles, responsibilities and requirements. Student's performance will be evaluated on using the Mid and End of Placement Supervisor Report. Students will be evaluated on core competencies and are to demonstrate ethical and professional practice. Students case conceptualisation skills will be evaluated through supervision and formal presentation of a case on placement.

### Case analysis

The placement will be supplemented by case analysis intensive seminars in which students learn the theory and practice of case analysis/case conceptualisation as a foundation for subsequent placement and coursework requirements as well as supervision and case report writing. Students will participate in case discussions and will be required to present case material.

As part of this unit, students are also required to submit a case report on a case within their placement agency.

Upon completion of this unit, students will have received sound knowledge and training in professional practice which will support development in subsequent placements.

### Assessment

- Assessment task 1: Attendance for 50 days at placement (as well as pre-clinical workshops)
- Assessment task 2: Presentation of logbook from placement to the Unit Chair within 21 days of placement
- Assessment task 3: Satisfactory END of Placement Supervisor Report outlining professional and ethical competence of the student from the Placement Supervisor (completion of the placement) including presentation of a case within placement
- Assessment task 4: Satisfactory case report (approximately 4000 words) written by the student and submitted to their Agency Supervisor before finishing the placement
- Assessment task 5: Attendance at and active participation in the Case Analysis Intensive Seminars.

These assessment and procedural components constitute 100% of the assessment for this unit and failure to satisfactorily complete the requirements of any one component will result in the student failing the unit, preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

## HPS911 – Advanced Research Methods

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Emily Kothe*

*Trimester 2 Unit Chair: Emily Kothe*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS907 and HPS707*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin 1 x 1 hour weekly class delivered cloud (online) plus 1 x 2 hour weekly blackboard collaborate seminar or equivalent each*

### Content

This unit will focus on a variety of methodological approaches to research based upon the scientist-practitioner model of evidence-based practice. The course will provide an overview of data management, basic Structural Equation Modeling, and basic qualitative analysis. Students are expected to be familiar with univariate statistical techniques prior to commencing the course, and have some familiarity with multivariate techniques. Students will be required to screen, clean, and prepare data for analysis and to undertake preliminary univariate and multivariate screening assessment.

*Note: Students should consult with their PhD supervisors with regard to selection of elective topics*

### Assessment

- Assessment task 1: Statistical analysis and written assignment (2000 words) 40%
- Assessment task 2: Examination (2 hours) 60%

## HPS912 – Clinical Placement and Case Analysis 3

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Amanda Dudley and Melissa O'Shea*

*Prerequisite: HPS910*

*Corequisite: Nil*

*Incompatible with: HPS712*

*Scheduled learning activities – campus: 50 days supervised placement*

### Content

This unit builds upon previous placement competencies and is aimed at providing students with the opportunity to further develop their clinical psychology skills. Students will be expected to demonstrate key competencies in ethical and professional frameworks as well as psychological assessment and intervention skills. Supervision on this placement will be aimed at increasing autonomy and responsibility as well as higher level integration of theory and practice. Placements aim to provide students with opportunities to develop clinical psychology skills in a range of settings such as adult, child, adolescent, acute, chronic, inpatient, community, forensic, and/or rehabilitation services. It is expected that for this unit students will undertake either an adult OR a child/adolescent placement that will complement their previous placement.

The placement program will be established jointly by the student, the placement coordinator, and the practitioners supervising the placement. This will include the minimum amount of face-to-face contact time with clients and the minimum supervision requirements. Placement Learning Contracts will specify learning objectives and key competencies as well as the responsibilities of the student, the Agency Supervisor and the Placement coordinator. Students will be required to increase their client contact and carry a caseload, under supervision. Student's performance will be reviewed at a mid and end of placement meeting. All meetings and paperwork are to be completed and are considered part of the unit requirements.

### Assessment

- Assessment task 1: Attendance for a minimum of 50 days
- Assessment task 2: Presentation of logbook to the University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 3: Satisfactory report on professional and ethical competence of the student from the Placement Supervisor and University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 4: Satisfactory case report of approximately 4000 words written by the student and submitted to the University Supervisor within 21 days of completion of placement.

These assessment and procedural components constitute 100% of the assessment for this unit and failure to satisfactorily complete the requirements of any one component will result in the student failing the unit, preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

## HPS914 – Studies in Psychopathology

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Ross King*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS714*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

### Content

This unit will encourage the integration of relevant physiological, psychological, family, social and cultural factors so as to form a broad biopsychosocial perspective to understanding psychopathology. Within this multidimensional integrative perspective, there will be an initial examination of the history of psychopathology, and issues related to classification and diagnosis, with a particular emphasis on a critical evaluation of DSM-5 and ICD-10 as diagnostic tools. A range of specific disorders will be considered, using a lifespan approach to psychopathology.

Current etiological theories and conceptual models for each disorder will be considered through a critical examination of relevant research, along with overlap among the symptoms for the different disorders, and the use of differential diagnosis.

## Assessment

- Assessment task 1: Mental State Examination report (1000 words)
- Assessment task 2: Essay (3000 words)
- Assessment task 3: Objectively Structured Clinical Examination (OSCE)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## Prescribed texts

American Psychiatric Association. (2013). Diagnostic and statistical manual of mental disorders (5th ed.). Arlington, VA: American Psychiatric Publishing.

## HPS915 – Psychological Intervention 3

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Trimester 2 Unit Chair: Glenn Melvin*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS711*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This unit is designed to provide students with both the theoretical and practical framework for advanced clinical practice relevant to the treatment of complex conditions and clients. It focuses on skill acquisition in schema therapy relevant to this broad area, building upon and extending the knowledge and skills developed in Psychological Interventions 1 and 2. The course will focus on understanding and responding to issues with engagement and resistance in therapy as well as understanding how therapy finishes from a client and clinician perspectives As well as providing new therapeutic techniques the course will also consider the media through which psychological interventions may be delivered, specifically teleweb services. Opportunities to develop clinical competency in these areas will occur through case analysis, simulation, practical rehearsal (role-play) and individualised feedback.

## Assessment

- Assessment task 1: Therapy repair task – 20 minute video therapy simulation and 1000 word report
- Assessment task 2: Objective Simulated Clinical Exam (OSCE) demonstrating simulated advanced Schema Therapy session (40 minutes)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS916 – Psychological Intervention 4

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Jade Sheen*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5 hour class and 1 x 1.5 hour seminar per week*

## Content

This unit will develop student's systemic formulation and therapy skills. Case presentations and simulation will be used to assist students to think and work in a systemic fashion, employing key therapeutic techniques recommended within the structural, strategic, systemic and solution-focussed schools of family therapy. At the conclusion of the unit, students should be able to write a systemic formulation, conduct a family assessment, write a family focussed treatment plan and engage a family in therapy. Challenges associated with systemic therapy such as conflict, trauma and termination of treatment will also be addressed.

## Assessment

- Assessment task 1: Case report part A – formulation (2500 words)
- Assessment task 2: Case report part B – treatment planning (2500 words)
- Assessment task 3: OSCE

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS917 – Clinical Placement and Case Analysis 4

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Amanda Dudley and Melissa O'Shea*

*Prerequisite: HPS912*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 50 days of supervised clinical placement (approximately two days per week) and case analysis/case conference seminars (2 hours fortnightly).*

### Content

This unit builds upon previous placement competencies and is aimed at providing students with the opportunity to further enhance their clinical psychology skills. Students will be expected to demonstrate key competencies in ethical and professional frameworks as well as advanced psychological assessment and intervention skills. Supervision on this placement will be aimed at increasing autonomy and responsibility as well as higher level integration of theory and practice. Placements aim to provide students with opportunities to develop clinical psychology skills in a range of settings such as adult, child, adolescent, acute, chronic, inpatient, community, forensic, and/or rehabilitation services. It is expected that for this unit students will undertake either an adult OR a child/adolescent placement that will complement their previous placements. The placement program will be established jointly by the student, the placement coordinator, and the practitioners supervising the placement. This will include the minimum amount of face-to-face contact time with clients and the minimum supervision requirements. Placement Learning Contracts will specify learning objectives and key competencies as well as the responsibilities of the student, the Agency Supervisor and the Placement coordinator. Students will be required to increase their client contact and carry their own caseload, under supervision.

Student's performance will be reviewed at a mid and end of placement meeting. All meetings and paperwork are to be completed and are considered part of the unit requirements.

This unit also involves regular attendance at case analysis seminars. Students will be required to present a case or ethical/professional issue from their placement. These seminars will provide the opportunity for students to obtain feedback from staff and other students.

### Assessment

- Assessment task 1: Attendance for a minimum of 50 days
- Assessment task 2: Presentation of logbook to the University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 3: Satisfactory report on professional and ethical competence of the student from the Placement Supervisor and University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 4: Satisfactory case report of approximately 4000 words written by the student and submitted to the University Supervisor within 21 days of completion of placement.
- Assessment task 5: Attendance at and active participation in Case Analysis Seminars and satisfactory presentation of a case.

These assessment and procedural components constitute 100% of the assessment for this unit and failure to satisfactorily complete the requirements of any one component will result in the student failing the unit, preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

## HPS918 – Clinical Placement and Case Analysis 5

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Amanda Dudley and Melissa O'Shea*

*Prerequisite: HPS917*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 50 days supervised placement plus attendance at case analysis seminar (1 x 1.5 hours) and one final seminar (full day)*

### Content

This unit builds upon previous placement competencies and is aimed at providing students with the opportunity to further enhance their clinical psychology skills. Students will be expected to demonstrate key competencies in ethical and professional frameworks as well as advanced psychological assessment and intervention skills. Supervision on this placement will be aimed at increasing autonomy and responsibility as well as higher level integration of theory and practice.

Placements aim to provide students with opportunities to develop clinical psychology skills in a range of settings such as adult, child, adolescent, acute, chronic, inpatient, community, forensic, and/or rehabilitation services. It is expected that for this unit students will undertake either an adult OR a child/adolescent placement that will complement their previous placements.

The placement program will be established jointly by the student, the placement coordinator, and the practitioners supervising the placement. This will include the minimum amount of face-to-face contact time with clients and the minimum supervision requirements. Placement Learning Contracts will specify learning objectives and key competencies as well as the responsibilities of the student, the Agency Supervisor and the Placement coordinator. Students will be required to have substantial client contact and carry their own caseload, under supervision.

Student's performance will be reviewed at a mid and end of placement meeting. All meetings and paperwork are to be completed and are considered part of the unit requirements.

This unit will also include a case analysis seminar where the student will present a case as well provide feedback to other students on their case.

A final day entitled 'Transition to Professional Practice' will be scheduled and is aimed at preparing students for finishing their course and looking ahead to professional life as a registered psychologist and as a graduate of Deakin. This will include information and knowledge about the registrar program and becoming a supervisor down the track. This day will bring students together and provides an opportunity to reflect on learnings and achievements.

## Assessment

- Assessment task 1: Attendance for a minimum of 50 days
- Assessment task 2: Presentation of logbook to the University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 3: Satisfactory report on professional and ethical competence of the student from the Placement Supervisor and University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 4: Attendance at and active participation in the Case Analysis seminar as well as 'Transition to Professional Practice' and satisfactory presentation of a case.

## Hurdle requirement

These assessment tasks and procedural components constitute 100% of the assessment for this unit. Failure to satisfactorily complete the requirements of any of the assessment tasks and their associated procedural components will result in the student failing the unit, preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

## HPS924 – Research Thesis A

*Enrolment modes: Trimester 2 Year 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Nicki Dowling*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: No formal contact hours*

## Content

Each student will select a research topic which will be supervised by staff (and possibly co-supervised by a practitioner). Initially each student will complete a 9000 word introduction to the proposal and hypotheses. Students must also present the proposal to a meeting of students and staff to obtain feedback before commencing data collection. Whilst primary responsibility for generating a topic lies with the student, the project may arise out of discussions with staff members or others. The topic must be within the area of clinical, health or forensic psychology and be deemed appropriate and viable. All projects must receive ethics approval before data collection commences and must include an empirical component. Ethics applications must be submitted by the end of November in the first year of enrolment.

*Note: The units replacing HPS921 have been split into three parts: Part A HPS924, Part B HPS925 and Part C HPS926.*

## Assessment

All assessment tasks are Hurdle requirements – see details of tasks under Hurdle requirements

## Hurdle requirement

- Assessment task 1: Introduction (9000 words)
- Assessment task 2: Presentation of colloquium
- Assessment task 3: Submission of ethics application

## HPS925 – Research Thesis B

*Enrolment modes: Trimester 1 Year 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nicki Dowling*

*Prerequisite: HPS924*

*Corequisite: Nil*

*Scheduled learning activities – campus: No formal contact hours*

### Assessment

Assessment task 1: Satisfactory progress as determined by supervisor's report. Refer to HPS928.

## HPS927 – Research Thesis D

*Enrolment modes: Trimester 1 Year 3: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.313*

*Trimester 1 Unit Chair: Nicki Dowling*

*Trimester 3 Unit Chair: Nicki Dowling*

*Prerequisite: HPS924, HPS925, HPS926*

*Corequisite: Nil*

*Scheduled learning activities – campus: No formal contact hours*

### Content

Each student will complete a major investigative project and a Professional Portfolio. The Major Investigative Project will be an empirical study that has relevance to the clinical, forensic or health settings and would be expected to be about 50,000 words in length. The Professional Portfolio will identify a theme that is relevant to clinical, forensic or health psychology and will use four case studies to discuss this theme. It would be expected to be approximately 25,000 words.

*Note: The units replacing HPS931 have been split into two parts: Part D HPS927 and Part E HPS928.*

### Assessment

Assessment task 1: Satisfactory progress as determined by supervisor's report. Refer to HPS928.

## HPS928 – Research Thesis E

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 3*

*EFTSL value: 0.313*

*Trimester 2 Unit Chair: Nicki Dowling*

*Prerequisite: HPS924, HPS925, HPS926*

It would be expected to be approximately 25,000 words.

*Note: The units replacing HPS931 have been split into two parts: Part D HPS927 and Part E HPS928.*

### Assessment

- Assessment task 1: Thesis including a Major Investigative Project (50,000 words) and
- Assessment task 2: Professional Portfolio (25,000 words)

This assessment will count as 100%

## HPS942 – Health Placement 5

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Amanda Dudley*

*Prerequisite: HPS946*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 50 days supervised placement*

### Content

This unit builds upon previous placement competencies and is aimed at providing students with the opportunity to further develop their health psychology skills.

Students will be expected to demonstrate key competencies in ethical and professional frameworks as well as advanced psychological assessment and intervention skills. Supervision on this placement will be aimed at increasing autonomy and responsibility as well as higher level integration of theory and practice. Placements aim to provide students with opportunities to develop health psychology skills in a range of settings such as specialist agencies whose major focus is in the area of health promotion of preventative health care as well as clinical intervention and rehabilitation.

The placement program will be established jointly by the student, the placement coordinator, and the practitioners supervising the placement. Placement Learning Contracts will specify learning objectives and key competencies as well as the responsibilities of the student, the Agency Supervisor and the Placement Coordinator. Students will be required to increase their client contact and carry their own caseload, under supervision. Student's performance will be reviewed at a mid and end of placement meetings. All meetings and paperwork are to be completed and are considered part of the unit requirements. This unit will also include a seminar to develop knowledge and skills in supervision.

### Assessment

- Assessment task 1: Attendance for a minimum of 50 days
- Assessment task 2: Presentation of logbook to the University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 3: Satisfactory report on professional and ethical competence of the student from the Placement Supervisor and University Supervisor at the final placement review meeting (completion of the placement)
- Assessment task 4: Attendance and active participation in the supervision seminar.

### Hurdle requirement

These four assessment tasks and associated procedural components constitute 100% of the assessment for this unit. Failure to satisfactorily complete the requirements of any of the assessment tasks and their associated procedural components will result in the student failing the unit, will preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

## HPS945 – Child and Family Forensic Placement 2 and Case Conference Seminar B

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Amanda Dudley*

*Prerequisite: HPS943*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 50 days supervised placement*

### Content

The aim of the placement is to provide specialist skills in the assessment and treatment of problems associated with offenders and victims. Students should have substantial client contact and will carry their own caseload, under supervision. Students will be required to provide at least one case report from their placement, covering the presenting symptoms, assessment techniques, diagnosis of disorders using DSM-V, and appropriate treatment strategies.

### Assessment

- Assessment task 1: Attendance for 50 days
- Assessment task 2: Presentation of log book to the University Supervisor within 21 days of completing the placement
- Assessment task 3: Satisfactory report on the professional ethical competence of student from the Placement Supervisor and the University Supervisor.

The above assessment constitutes 100% of the assessment for this unit, failure to satisfactorily complete the requirements of any one component will result in the student failing the unit and may result in the student's exclusion from the course.

## HPS976 – Issues in Professional Psychology

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Melissa O'Shea*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS776*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

The Unit Learning Outcomes (ULOs) for Issues in Professional Psychology represents important preparation for professional practice, which begins in Trimester 2 with the Clinical Placement Program and then continues throughout the course of the professional lives of graduates of this program. It is designed to provide knowledge, reflection and practice in professional issues and professional ethics as well as the governance framework that exists to support Clinical Psychology as a health discipline. Students will become familiar with the various professional standards and codes relevant to the provision of psychological services. These will include: The Australian Psychological Society Code of Ethics (as adopted by the Psychology Board of Australia), APS Ethical Guidelines, and the Australian National Practice Standards for the Mental Health Workforce.

The Unit begins by considering the governance environment in which Professional Psychology sits with a focus on the Public Mental Health System and applying effective ethical and reasoning frameworks to decision making to common dilemmas when working with clients in professional practice. Contemporary issues such as Leadership in Psychology and Health as well as the contemporary practice paradigms of Client-Centred care and Recovery orientation are also jointly considered and wherever possible utilise active learning activities.

Consistent with the wider intended learning outcomes of the program, a key focus of the Unit is the application of ethical, legal and professional Psychology practice principles within the inter-professional Health environment, with the teaching and learning and assessment activities supporting the achievement of these competencies for students.

Students will directly apply new knowledge in relation to working effectively and collaboratively in health care through participation in inter-disciplinary student teams (including Psychology, Nursing, Occupational Therapy, Social Work, Medical Imaging, Optometry and Medicine) working towards the development of shared care plans for complex simulated clients using computer assisted learning technology. Students will also participate in 8 days of Work-Integrated learning within the Barwon Health Mental Health Service where they will be observe and reflect on Psychology and Health practice in action in readiness to commence Clinical Placements.

A highlight of the Unit is the 2-day Aboriginal Cultural Immersion module where students will spend time at the Institute of Koori Education and the Wathaurong Health Co-operative in order to facilitate understanding of culturally sensitive approaches to applying psychology knowledge and practice in working with Aboriginal people. Students will be assessed on their capacity to communicate how this learning will change their practice using a video-blog.

## Assessment

- Assessment task 1: Work Integrated Learning Portfolio (2000 words equivalent)
- Assessment task 2: Video-blog examining Cultural Sensitivity in Psychology Practice (5 minutes)
- Assessment task 3: Inter-Professional Team Care Plan Development (2 in total)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

# HPS977 – Psychological Intervention 1

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Melissa O'Shea*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS777*

*Scheduled learning activities – campus: 1 x 3 hour class and 1 x 1 hour seminar per week*

## Content

This unit begins by examining the important principles of Cognitive Behavioural Therapy (CBT), which represents one of the most widely used evidence-based treatment modalities in Clinical Psychology. These principles, sometimes known as threshold concepts,

include the role of thought in behaviour and mood, the development of practice in the observation of thought, collaboration, behavioural experimentation and empiricism. These are considered within the framework of the therapeutic relationship and supported by asking students to engage directly with this knowledge via simulated practice including such activities as role plays.

Specific attention is given to the application of CBT to the treatment of anxiety and mood disorders which represent the most common mental disorders. Students will be directly preparing to apply this knowledge in practice during the first Clinical Placement Unit in Trimester 2. Teaching and learning, as well as assessment activities will support the student's ability to apply CBT to these conditions as well as the ability to synthesise information such that relevant treatment decisions can be made, with individualised feedback throughout the Unit.

Consistent with the wider intended learning outcomes of the program, focus is also placed on developing reflective practice capacity in relation to the student's own development in preparation for engagement with clinical supervision. Students will critique their own progress and also provide peer feedback to other students in the unit. A highlight of the Unit is the opportunity to further develop CBT practice through participation in a Mindfulness-based CBT group with other students focussed on cognitive behavioural based self-care strategies with the aim that these strategies support the student throughout the program as well as providing an experiential teaching and learning activity.

## Assessment

- Assessment task 1: Development of a learning Development Plan based on feedback from staff and peers as well as self-assessment in simulated CBT activities, (equivalent to 1000 words)
- Assessment task 2: Evidence of participation in therapy learning activities generated in CBT group through active participation in group CBT sessions
- Assessment task 3: Individual CBT Treatment Plan design (equivalent to 1500 words)
- Assessment task 4: Objective Simulated Clinical Exam (OSCE) demonstrating a brief simulated CBT session

This Unit is graded as Ungraded Pass/Fail only. All Assessment Tasks must be achieved to a competent level to pass the Unit.

## Prescribed texts

## HPS978 – Biological and Neuropsychological Perspectives on Disorder

*Enrolment modes: Not offered 2019*

*Trimester 1 2020: Burwood (Melbourne)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Melissa O'Shea*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS778*

*Scheduled learning activities – campus: 2 x full day workshops, 7 x 2 hour seminars*

### Content

This unit is focused on applying a biopsychosocial model of health into the practice of clinical psychology. This aligns with contemporary perspectives on health and mental health that take into account a range of determinants across the biological, psychological and social domains. It begins by examining psychopharmacology as it relates to a comprehensive treatment plan for many psychological disorders and in doing so introduces the integrated nature of biology and psychology in the treatment of mental disorders. Students will be extended to consider how biological and psychological treatments can be effectively integrated, including through the review of key principals of inter-professional practice. They will also specifically focus on the treatment of Pain as a clinical psychology application of these principals.

The Unit is also designed to review and extend students overall understanding of behavioural neuroscience and neuroanatomy. This is achieved by examining these concepts through the lenses of Psychological Medicine and the Neuroscience of Interpersonal Development and how these specialty areas of clinical psychology support the assessment, prevention and treatment of mental disorders commonly seen by Clinical Psychologists. A highlight of the Unit is the examination of how contemporary perspectives on the neurobiology of mental disorders has supported the development of third wave evidence based psychological therapies including somatic therapies. Consistent with the wider intended learning outcomes of the Clinical post-graduate program, emphasis is placed on developing students capacity to formulate and communicate treatment planning for clients within the inter-professional context and taking into account a biopsychosocial view of complex psychological disorders.

### Assessment

- Assessment 1: Assessment and Treatment Recommendation Report to Primary Care (1500 words)
- Assessment 2: Simulated psychoeducation session (30–40 minute video plus self-reflection, 500 words)
- Assessment 3: Understanding Mental Disorder through the Biopsychosocial model of Health – Video Blog (5–7 minutes)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPS979 – Psychological Assessment

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: George Youssef*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS779*

*Scheduled learning activities – campus: 1 x 1.5 hour class and 1 x 1.5 hour seminar per week*

### Content

This is a practical unit aiming to familiarise students with a range of psychological assessment methods commonly administered in a clinical setting. While the main focus will be on testing, other major methods of clinical assessment will be covered, namely behavioural observation, interviewing and case studies. Various categories of tests will be discussed, evaluated and administered, including cognitive and intelligence tests, ability tests, personality tests, and tests of mood states, as well as issues surrounding cross-cultural assessment. The role of such tests in diagnostic work will be emphasised as well as their research value and prognostic and therapeutic use. Particular skills required will be practised through 'hands-on' experience.

### Assessment

- Assessment task 1: WAIS IV scoring exercise
- Assessment task 2: WAIS IV administration and interpretive report (2000 words)
- Assessment task 3: WAIS-IV/PAI integrative report (2000 words)

This unit is Pass Grade only. All assessments must be passed in order for the unit to be passed.

## HPY210 – Coaching and Counselling for Behaviour Change

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dave Demmer*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPY310*

*Scheduled learning activities – campus: 1 x 2 hour on-campus seminar per week and 1 x 1 hour of online learning content per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour online seminar per week and 1 x 1 hour of online learning content per week*

### Content

This unit aims to enable students to develop understanding of, and practice in, current approaches in coaching, counselling, and group facilitation for behaviour change. This unit is applicable to a range of disciplines and is highly relevant for students wishing to develop skills as a coach, trainer/facilitator, supervisor, manager, tutor, presenter, and/or students aiming to progress into a career in psychology, counselling, and other people-focused healthcare professions. In this unit students will be exposed to a range of coaching and counselling theories and frameworks, and develop an understanding of human behaviour change. Students will learn and apply a range of skills and techniques involved in individual and group-based coaching and counselling.

### Assessment

- Assessment task 1: Essay (2500 words) 30%
- Assessment task 2: 30-minute video of mock coaching session and written reflection (1000 words) 40%
- Assessment task 3: Final examination (2 hours) 30%

### Hurdle requirement

Seminar attendance at least 9 of the 11 seminars to obtain a pass or above in the unit.

## HPY310 – Coaching and Counselling Groups for Behaviour Change

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Dave Demmer*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

The unit aims to enable students to develop an understanding of, and practice in, current approaches in evidence and non-evidence-based coaching, facilitating and counselling for behaviour change practices from a group-work perspective.

The unit will include:

- Developing awareness of group-work principles and group dynamics;
- Practical, generic coaching, facilitating and counselling skills applicable to a range of group environments;
- Awareness of cross-disciplinary applications of the coaching/counselling process in group settings and an ethical framework for group-work practices.

The unit is applicable to a range of disciplines and highly relevant for students wishing to develop skills as a coach, trainer/facilitator, supervisor, manager, tutor, presenter or group counsellor.

*Note: students will be provided with practical techniques and support to help overcome fear of public speaking and presenting.*

### Assessment

- Assessment task 1: Design and write a group training program 30%
- Assessment task 2: Essay (1800 words) 30%
- Assessment task 3: In pairs, facilitate a group training session (30 minutes) 40%

### Hurdle requirement

Seminar attendance – Students must attend and complete exercises in least 9 of the 11 seminars to obtain a pass or above in the unit.

## HPY701 – Leadership Assessment, Development and Coaching

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Vicki Kavadas*

*Cohort rule: Unit only available to students enrolled in H752 Master of Psychology (Organisational).*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 3 hour seminars per fortnight*

### Content

In this unit students will gain skills in assessment of leadership, and identification of leadership development needs with particular focus on leadership coaching. They will also acquire skills in the use of tools to assess leadership behaviours and develop leadership competencies in individuals, teams and organisations.

*Note: Students are expected to have access to a computer with an internet connection to complete this unit.*

### Assessment

- Assessment task 1: Class presentation and annotated power point 25%
- Assessment task 2: Written assignment (2000 words) 35%
- Assessment task 3: Simulated coaching and critical analysis of coaching engagement (2500 words) 40%

## HPY710 – Client-Centred Skills in Practice

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Elizabeth Westrupp*

*Cohort rule: This unit is only available to students enrolled in H650 Graduate Diploma of Psychology and H664 Graduate Diploma of Psychology (Pre-Practice)*

*Prerequisite: HPS715 or HPS431*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 3 hour seminar each week.*

*Scheduled learning activities – cloud (online): Online seminars via Collaborate.*

### Content

This unit will provide an introduction to working with clients in psychology and mental health settings. Students will be introduced to skills in counselling and case management, and will learn knowledge, skills and ethical issues related to working with a variety of clients of different ages, cultural backgrounds and presenting concerns.

### Assessment

- Assessment task 1: Case Management Plan part A (1000 words) 30%
- Assessment task 2: Video Presentation (10 minutes) 10%
- Assessment task 3: Case Management Plan (1500 words) 30%
- Assessment task 4: Critical Reflection Assignment (1500 words) 30%

### Hurdle requirement

Satisfactory completion of micro and case management skills development in at least 8 of the 10 seminars to obtain a pass or above in the unit.

## HPY711 – Psychology A: Fundamentals of Human Behaviour

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Warrnambool, Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mathew Ling*

*Trimester 2 Unit Chair: Alexa Hayley*

*Trimester 3 Unit Chair: Mathew Ling*

*Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS111*

*Scheduled learning activities – campus: Students will have a series of recorded videos and 1 x 2 hour seminars each week (online via the Blackboard Collaborate Ultra system). Online seminars will be recorded for students to catch up on at any time. Assignment work and reading, on average, should account for approximately 6 hours of work per week. In total, students are expected to dedicate 13 hours a week for this unit.*

*Scheduled learning activities – cloud (online): Students will have a series of recorded videos and 1 x 2 hour seminars each week (online via the Blackboard Collaborate Ultra system). Online seminars will be recorded for students to catch up on at any time. Assignment work and reading, on average, should account for approximately 6 hours of work per week. In total, students are expected to dedicate 13 hours a week for this unit.*

### Content

This unit will provide foundational knowledge required for subsequent studies in psychology, while also providing training in essential skills for psychology, research, and scientific writing. In particular, this unit will cover the definition and scope of the discipline of psychology; the primitive roots of our behaviour; the neurological structures and processes that are responsible for our mental life; and the important elements in our adapting to the world as individuals such as learning and intelligence. Students of HPY711 will also learn to source, consume, and synthesise academic writing both for the academic and public audiences.

*Note: New unit 2019*

### Assessment

- Assessment task 1: Critical response essay and response Letter (1300 words) 20%
- Assessment task 2: Systematic literature review (1800 words) 30%
- Assessment task 3: 3 x Online quizzes 20%
- Assessment task 4: Multiple choice examination (90 minutes) 30%

## HPY712 – Research Methods in Psychology D

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Nicolas Kambouropoulos*

*Cohort rule: This unit is only available to students enrolled in H650 Graduate Diploma of Psychology and H664 Graduate Diploma of Psychology (Pre-Practice)*

*Prerequisite: HPS742 or HPS432*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: A minimum of 22 hours of intensive classroom activity (face-to-face or via Collaborate/Echo360)*

*Scheduled learning activities – cloud (online):*

### Content

This unit provides advanced coverage of multivariate data analysis. It is designed to provide students with a conceptual understanding of multivariate statistics as well as the practical knowledge of how to implement these analyses using common tools such as SPSS and AMOS. Specific topics include data hygiene, multivariate regression, exploratory and confirmatory factor analysis and structural equation modelling.

### Assessment

- Assessment task 1: SPSS analytic task 40%
- Assessment task 2: AMOS analytic task 20%
- Assessment task 3: MCQ examination (2 hours) 40%

# HPY713 – Psychology B: Individual and Social Development

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong), Warrnambool, Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Hannah Bereznicki*

*Trimester 2 Unit Chair: Anna Klas*

*Trimester 3 Unit Chair: Hannah Bereznicki*

*Cohort rule: This unit is only available to students enrolled in courses H603, H605, H664, H705 and H706*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS121*

## Content

Following on from the biological underpinning of psychology in HPY711, HPY713 focuses on the science of the human individual in context. Different theoretical perspectives of psychological concepts relating to how we function as individuals in a social world are contrasted and evaluated throughout the unit.

We begin by looking at how we – as both biological and social beings – develop throughout the lifespan as we explore the complex interaction between biological and environmental influences. Various theoretical perspectives are applied to explore what makes up our individual personalities, and how personality is assessed. The impact of psychological disorders on individual and societal wellbeing is considered, and the different therapeutic approaches used to treat these disorders are analysed. We then examine the power of situational, societal, and cultural influences on behaviour.

*Note: New unit 2019*

## Assessment

### Trimester 1 and Trimester 2

- Assessment task 1: APA-Style Laboratory Report 30%
- Assessment task 2: Media Release 20%
- Assessment task 3: Multiple choice question examination (2 hours) 50%

### Trimester 3

- Assessment task 1 (Individual): APA-style lab report assignment (2000 words) 30%
- Assessment task 2 (Individual): 5 x Online Quizzes, one per fortnight (10 multiple choice questions per quiz) 15%
- Assessment task 3 (Individual): Multiple Choice Exam (90 multiple choice questions, 2 hours) 40%
- Assessment task 4 (Individual): Media Release Assessment 15%

HPS121 Psychology B: Individual and Social Development 2e (Customised)

Burton, An Interactive Approach to Writing Essays and Research Reports in Psychology, (John Wiley, 4th edn, 2017)

These texts are the same as required for HPS121. If purchasing from DUSA, search for HPS121 to find the required texts in their system.

# HPY720 – Research Project A

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250 – 2 enrolled credit points, 0 achievable credit points. (4 credit points achievable on successful completion of HPY720 and HPY721)*

*Trimester 1 Unit Chair: Christian Hyde*

*Cohort rule: This unit is only available to students enrolled in H650 Graduate Diploma of Psychology and H664 Graduate Diploma of Psychology (Pre-Practice)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS718*

*Scheduled learning activities – campus: 1 x 1 hours of contact with a research supervisor and 19 hours of private study per week*

*Scheduled learning activities – cloud (online): 1 x 1 hours of contact with a research supervisor and 19 hours of private study per week*

## Content

Students will undertake a research project in small groups, choosing a research project from the range offered by available supervisors. Students will be required to familiarize themselves with the theory and past research in the area under investigation, and participate in all the steps involved in research, including the ethics application, formulation of hypotheses, design and methodological decisions, collection and analysis of data, and evaluation of the research questions under consideration. Although activities such as data collection may be conducted as a group, students will prepare an individually written report that will be based on the findings of their study. The project is to be regarded as a learning exercise for the student, with guidance and direction provided by the group supervisor. Data collected for these projects may be used in the ongoing research activities of the School.

*Note: Together, HPY720 and HPY721 constitute the research thesis component of the Graduate Diploma of Psychology.*

## Assessment

- Assessment task 1: Thesis proposal assignment
  - 1500 word thesis proposal
  - 10-minute oral presentation
- Assessment task 2: Written empirical research report (5000 words)

The thesis proposal and the written empirical report constitute the full assessment in the paired units HPY720 and HPY721. The thesis proposal and empirical report contribute 30% and 70% respectively to the final mark for the thesis component.

## HPY721 – Research Project B

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250 – 2 enrolled credit points, 4 achievable credit points. (4 credit points achievable on successful completion of HPY720 and HPY721)*

*Trimester 2 Unit Chair: Christian Hyde*

*Cohort rule: This unit is only available to students enrolled in H650 Graduate Diploma of Psychology and H664 Graduate Diploma of Psychology (Pre-Practice)*

*Prerequisite: HPY720*

*Corequisite: HPY720 or HPS435*

*Incompatible with: HPS790*

*Scheduled learning activities – campus: 1 x 2 hours of contact with a research supervisor and 8 hours of private study per week*

*Scheduled learning activities – cloud (online): 1 x 2 hours of contact with a research supervisor and 8 hours of private study per week*

## Content

  - 10-minute oral presentation
- Assessment task 2: Written empirical research report (5000 words)

The thesis proposal and the written empirical report constitute the full assessment in the paired units HPY720 and HPY721. The thesis proposal and empirical report contribute 30% and 70% respectively to the final mark for the thesis component.

## HPY722 – Practice and Ethics in Professional Psychology

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Clint Gurtman*

*Cohort rule: Students must be enrolled in H744 to undertake this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS776, HPS976*

*Scheduled learning activities – campus: Students will be expected to spend an average of 150 hours over the trimester in teaching and learning and assessment activities. This will include a 1 x 2 hour online class and 1 x 1 hour collaborate session with problem based exercises. This will also include 12 hours of intensive in-class activities.*

### Content

This unit will prepare students to understand the ethical, legal, governance and personal frameworks that relate to professional practice as a Psychologist and Health Professional. It will ensure that students are familiar with the ethical, legal and professional practice requirements and responsibilities of working as a Psychology Professional.

The unit examines: the Psychology Board of Australia requirements for registration as a psychologist; the APS Code of Ethical and Professional Standards; the role of Psychology in the broader Health system along with high level issues of governance; the nature of supervision and the responsibilities of the supervisor and the psychologist in-training; contemporary paradigms of practice including client-centred care and recovery orientation; the law as it applies to professional practice; and common ethical and practical problems in working with clients.

Adopting a mix of seminar and online learning modalities, the unit has a focus on collaborative practice in Healthcare. Students will participate in an inter-professional education experience involving students from Nursing, Psychology, Occupational Therapy, Social Work, Optometry and Medicine. This will provide students with the opportunity to learn about, from and with each other, the knowledge and skills inherent in effective healthcare collaboration, which itself leads to significant improvements in the quality of care provided.

The Collaborative Practice in Healthcare component is a Cloud (online; Blackboard Collaborate) based experience in which students will work in inter-professional student teams from across the Faculty of Health to develop care plans for complex patient presentations.

### Assessment

- Assessment task 1: Presentation (30 minutes) 40%
- Assessment task 2: Critical Reflection through weekly journaling (2500 words) 30%
- Assessment task 3: Interprofessional Team Care Plan Development (2 x 15%) – total 30%

### Hurdle requirement

- Completion of Multiple Choice Questions relating to online modules – 1 hour in total
- Attendance and satisfactory participation in weekend intensive – 2 days over one weekend

## HPY723 – Psychological Assessment in Practice

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Elizabeth Westrupp*

*Cohort rule: Students must be enrolled in H744 to undertake this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS779, HPS979*

*Scheduled learning activities – campus: Students will be expected to spend an average of 150 hours over the trimester in teaching and learning and assessment activities. This will include a 1 x 2 hour online class and 1 x 1 hour collaborate session with problem based exercises. This will also include 12 hours of intensive in-class activities.*

### Content

This is a practical unit aiming to familiarise students with a range of psychological assessment methods commonly administered in psychological practice. While the main focus will be on testing, other major methods of psychological assessment will be covered, including behavioural observation and interviewing. Various categories of tests will be discussed, evaluated and administered, including cognitive and intelligence tests, ability tests, personality tests, and tests of mood states.

The role of such tests in diagnostic work will be emphasised as well as their prognostic and therapeutic use. Particular skills required will be practised through 'hands-on' experience.

## Assessment

- Assessment task 1: WAIS-IV Scoring Exercise and Administration 10%
- Assessment task 2: WAIS-V Report (1000 words) 40%
- Assessment task 3: WAIS administration, interpretation and WAIS-IV/PAI report (3000 words) 50%

The WAIS administration component of the assessment in this unit is a competence based assessment and will be marked as pass or fail based on specific criteria.

Opportunities to develop skills will occur through demonstration, observation, practical rehearsal (role play) and individualised feedback during online collaborate sessions and in the intensive class activities.

## Assessment

- Assessment task 1: Role Play skill demonstration 30%
- Assessment task 2: Written assignment (2000 words) 30%
- Assessment task 3: Oral examination (1 hour) 40%

## Prescribed texts

Kennerley, H., Kirk, J. & Westbrook, D. (2016). An introduction to cognitive behaviour therapy: Skills and applications. (3rd ed.). Los Angeles: Sage Publications.

## HPY724 – Psychological Interview and Intervention Strategies

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Diehm*

*Cohort rule: Students must be enrolled in H744 to undertake this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS777, HPS977*

*Scheduled learning activities – campus: Students will be expected to spend an average of 150 hours over the trimester in teaching and learning and assessment activities. This will include a 1 x 2 hour online class and 1 x 2 hour collaborate sessions. This will also include 12 hours of intensive in-class activities.*

## Content

This unit is designed to provide the theoretical and practical framework for the major evidence-based psychotherapeutic approach broadly defined as cognitive behaviour therapy (CBT) and related therapies. The unit is focused on skill acquisition in intervention practice and management of therapeutic process. The emphasis is on facilitation of practical skill development in terms of content and process. Additionally, the unit will enable students to develop an appreciation of the "common factors" fundamental to outcome in all psychotherapeutic approaches.

## HPY725 – Professional Practicum A

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Linda Byrne*

*Cohort rule: Students must be enrolled in H744 to undertake this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 10 full time days of placement. This will include a combination of pre-practice workshops and practicum days within a relevant agency. As a general rule, practicum days will be within one agency, with arrangements regarding number of days per week to be negotiated between the placement agency, Unit Chair and student.*

## Content

The first practicum consists of three key activities:

- pre-practice workshops;
- placement experience;
- supervision.

This unit is designed to equip students with a range of generalist psychology skills and an awareness of professional issues. Students will fast-track the translation and integration of academic coursework learning into real life application. Students will also develop professional identity and practice through early adoption of supervision and professional learning plans as well as case formulation.

## Pre-clinical workshops

To prepare for placement attendance, students will participate in a number of practitioner led workshops covering topics such as professional identity, case management procedures, and applied suicide intervention skills training.

## Assessment

- Assessment task 1: Attendance for approximately 10 days – or 75 hours (including placement and pre-practice workshops)
- Assessment task 2: Presentation of logbook of all days of placement (including pre-practice workshops) to the Unit Chair within 21 days of completion of the practicum days
- Assessment task 3: Satisfactory report outlining professional and ethical competence of the student from the Agency/Placement Supervisor (at completion of the placement)
- Assessment task 4: Satisfactory case report (approximately 3000 words) written by the student and submitted to the Unit Chair within 21 days of completion of placement

These assessment and procedural components constitute 100% of the assessment for this unit and failure to satisfactorily complete the requirements of any one component will result in the student failing the unit, preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

## Hurdle requirement

- Must pass Assessment tasks 1, 2, 3 and 4
- Attendance and successful completion of the minimum number of placement days is a hurdle requirement for this unit.

The four assessment tasks outlined above in this unit are hurdle requirements. Students must complete all four hurdle requirements in order to pass this unit. Failure to complete any one of these tasks will result in the student failing the unit, preclude the admission of the student to the next practicum unit and may result in the student's exclusion from the course. If students fall ill during their practicum, make-up days will need to be arranged so that the minimum requirement of placement days is met. Requirements as to practicum for Masters level qualifications in psychology are set by the Australian Psychology Accreditation Council (APAC) as part of the accreditation requirements of the professional body.

# HPY726 – Psychological Practice Across the Lifespan

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rebecca Diehm*

*Cohort rule: Students must be enrolled in H744 to undertake this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS714 and HPS914*

*Scheduled learning activities – campus: Students will be expected to spend an average of 150 hours over the trimester in teaching and learning and assessment activities. This will include a 1 x 2 hour online class and every second week there will be a 1 x 2 hour online seminar. This will also include 12 hours of intensive in class activities.*

## Content

This unit is designed for the practice of psychology across the lifespan from a biopsychosocial perspective with an emphasis on identification of psychopathology. An introduction to the challenges present at each phase of development from infancy through to old age will be given. Psychologists require detailed knowledge of both the physical and emotional development associated with each phase of development. An understanding of psychological and social pressures encountered by people in different stages of their life is also needed in order to provide support for clients who present with problems and disorders at different stages of their lifespan. DSM-5 classification of disorders will be introduced. There will be a focus on the distinct types of issues confronted by psychologists in working with clients of differing ages, gender, and cultural background that examines the differing influences of physical and emotional development, psychological disorders, social roles, cultural influences, and life crises.

## Assessment

- Assessment task 1: Written mental state examination (500-700 words) 30%
- Assessment task 2: Case Analysis (2500 words) 40%
- Assessment task 3: Objective Simulated Clinical Exam (OSCE) demonstrating application of knowledge and skill with regards to identification of psychopathology and contribution of psychological/social factors to client presentation (40 minutes) 30%.

## HPY727 – Working with Diverse Populations

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kate Hall*

*Cohort rule: Students must be enrolled in H744 to undertake this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students will be expected to spend an average of 150 hours over the trimester in teaching and learning and assessment activities. This will include a 1 x 2 hour online class and 1 x 1 hour collaborate session with problem based exercises (1 hour sessions in weeks 3, 6 and 9 will be assessed). This will also include 12 hours of intensive in-class activities.*

### Content

This unit will focus on working with individuals that may present unique perspectives and challenges. It will cover working with people in forensic settings, from culturally and linguistically diverse (CALD) backgrounds, and working with people with an intellectual disability (ID). Experts from the field will introduce guidelines on how to undertake forensic assessment and interventions, address issues in intellectual disability, conduct accurate and relevant cross-cultural psychological assessments and provide practical training in cross-cultural counselling. In addition, information on how to identify and access support available for forensic, CALD, and ID clients will be provided.

### Assessment

- Assessment task 1: Seminar Problem-based learning activities (3 x 10% each) 30%
- Assessment task 2: Case Conceptualisation Report (2500 words) 45%
- Assessment task 3: In-class presentation during face-to-face intensive 25%

## HPY728 – Applied Methods for Professional Practice

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Bosco Rowland*

*Cohort rule: Students must be enrolled in H744 to undertake this unit*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HPS707, HPS907*

*Scheduled learning activities – campus: Students will be expected to spend an average of 150 hours over the trimester in teaching and learning and assessment activities. This will include a 1 x 2 hour online class and 1 x 1 hour collaborate session.*

### Content

This unit will focus on enabling students to develop an appreciation for why clinicians require a strong understanding of statistics and research methodology. Knowledge pertaining to the identification, treatment and general understanding of disorders and syndromes is constantly evolving. In response, new or revised tests and treatment programs are constantly appearing. A critically important task for the psychologist is to be able to evaluate this information and integrate new information into their work. In some instances this is necessary so the most appropriate methods for identification and treatment are provided to individual clients. The decisions clinicians make with respect to such issues should be based on best available evidence. This unit will provide students with the tools and knowledge to assist them in evaluating the evidence. It will equip students with the knowledge needed to evaluate types of evidence relating to diagnostic tools and treatment options for clients. In addition, the unit will cover types of analyses used in psychological research so that students will be better able to understand and interpret studies.

### Assessment

- Assessment task 1: Written evaluation of scientific literature (10 papers, approximately 2000 words) 50%
- Assessment task 2: Multiple choice examination 50%

# HPY729 – Professional Practicum B

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Linda Byrne*

*Cohort rule: Students must be enrolled in H744 to undertake this unit*

*Prerequisite: HPY725*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 30 full time days of placement. This will include a combination of pre-practice workshops and practicum days within a relevant agency. As a general rule, practicum days will be within one agency, with arrangements regarding number of days per week to be negotiated between the placement agency, Unit Chair and student.*

## Content

The second practicum consists of three key activities;

- (i) pre-practice workshops;
- (ii) placement experience;
- (iii) supervision.

This unit is designed to equip students with a range of generalist psychology skills and an awareness of professional issues. Students will fast-track the translation and integration of academic course work learning into real life application. Students will also develop professional identity and practice through early adoption of supervision and professional learning plans as well as case formulation.

## Pre-clinical workshops

To prepare for placement attendance, students will participate in a number of practitioner led workshops and/or simulations covering areas relevance to psychological practice with diverse client groups.

## Assessment

- Assessment task 1: Attendance for a minimum of 20 days (including placement and pre-practice workshops)
- Assessment task 2: Presentation of logbook of all days of placement (including pre-practice workshops) to the Unit Chair within 21 days of completion of the practicum days
- Assessment task 3: Satisfactory report outlining professional and ethical competence of the student from the Agency/Placement Supervisor (at completion of the placement)
- Assessment task 4: Satisfactory case report (approximately 3000 words) written by the student and submitted to the Unit Chair within 21 days of completion of placement

These assessment and procedural components constitute 100% of the assessment for this unit and failure to satisfactorily complete the requirements of any one component will result in the student failing the unit, preclude the admission of the student to the next placement and may result in the student's exclusion from the course.

## Hurdle requirement

- Must pass Assessment tasks 1, 2, 3 and 4
- Attendance and successful completion of the minimum number of placement days

The four assessment tasks outlined above in this unit are hurdle requirements. Students must complete all four hurdle requirements in order to pass this unit. Failure to complete any one of these tasks will result in the student failing the unit, preclude the admission of the student to the next practicum unit and may result in the student's exclusion from the course. If students fall ill during their practicum, make-up days will need to be arranged so that the minimum requirement of placement days is met. Requirements as to practicum for Masters level qualifications in psychology are set by the Australian Psychology Accreditation Council (APAC) as part of the accreditation requirements of the professional body.

## HSE010 – Exercise and Sport Laboratory Safety

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Marije Liem-Weits*

*Trimester 2 Unit Chair: Marije Liem-Weits*

*Trimester 3 Unit Chair: Marije Liem-Weits*

*Prerequisite: Nil*

*Corequisite: Must be enrolled concurrently in any one of units: HSE101, HSE102, HSE103, HSE105, HSE106, HSE110, HSE201, HSE202, HSE204, HSE208, HSE301, HSE302, HSE303, HSE304, HSE311, HSE314, HSE320, HSE323, HSE330*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): One compulsory one hour safety training session undertaken online. This unit will run in the one week prior to the commencement of Week one of each trimester.*

### Content

This unit will give you a basic safety briefing to prepare you for your laboratory classes and fieldwork within the exercise and sports science field. Safety induction training is a legal requirement for workplaces in Australia. In addition, an awareness and understanding of safety issues and safe work practices will help you in your future employment.

### Assessment

Assessment task 1: Online safety training module 100%.

### Hurdle requirement

Successful completion of quiz questions.

## HSE070 – Exercise and Sport Laboratory Safety

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Marije Liem-Weits*

*Trimester 3 Unit Chair: Marije Liem-Weits*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in one of HSE702, HSE703, HSE705, HSE707, HSE711, HSE724 or HSE725*

*Incompatible with: Nil*

*Scheduled learning activities – campus: One compulsory one hour safety training session undertaken online.*

*This unit will run in the two weeks prior to the commencement of Week one of each trimester.*

*Scheduled learning activities – cloud (online): One compulsory one hour safety training session undertaken online. This unit will run in the one week prior to the commencement of Week one of each trimester.*

### Content

This unit will give you a basic safety briefing to prepare you for your laboratory classes and fieldwork within the exercise and sports science field. Safety induction training is a legal requirement for workplaces in Australia. In addition, an awareness and understanding of safety issues and safe work practices will help you in your future employment.

### Assessment

Assessment task 1: Online safety training module 100%

### Hurdle requirement

Successful completion of quiz questions

## HSE102 – Functional Human Anatomy

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Waurm Ponds (Geelong), Cloud (online) with significant campus requirements*

*Trimester 3: Cloud (online) with significant campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Simon Feros*

*Trimester 3 Unit Chair: Simon Feros*

*Cohort rule: This unit is only available to students enrolled in H343, H355, D333, D394, E377, M320, S302, S323, H300, H315, D368, D391 students completing the Exercise Science major sequence (MJ-H000016) or minor sequence (MN-H000016). Other students who would like to enrol in this unit must submit their request to [health-enquire@deakin.edu.au](mailto:health-enquire@deakin.edu.au). Enrolment quotas apply. Campus contact: Trimester 2: Burwood (Melbourne) Clint Miller*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Trimester 2 Campus: 2 x 1 hour classes per week. 5 x 2 hour seminars and 4 x 2 hour practicals across the trimester. A practical examination in week 11.*

*Scheduled learning activities – cloud (online):*

*Trimester 2 and Trimester 3: 22 x 1 hour classes (recordings provided) and 2 days of practical work scheduled on one weekend during trimester that includes a practical examination.*

*In-person attendance requirements: In Trimester 2 this practical intensive is usually conducted in September on the Burwood (Melbourne) campus.*

*In Trimester 3 this practical intensive is usually conducted in February on the Burwood and Geelong (Waurm Ponds) campuses.*

### Content

This unit is designed to provide students with a comprehensive overview of the structure and function of the musculoskeletal system and how it relates to normal and abnormal human movement. A detailed analysis of the functional anatomy of the skeletal, articular, neural and muscular systems is explored. Additional areas explored will be the role that the musculoskeletal system plays in static and dynamic posture and movement control.

### Assessment

- Assessment task 1: Practical class worksheets (4 x 5%) 20%
- Assessment task 2: Online seminar pop quizzes (4 x 5%) 20%
- Assessment task 3: Practical examination (30 minutes) 30%
- Assessment task 4: Final examination (1.5 hours) 30%

### Hurdle requirement

Achieving a pass in the Practical examination – see Assessment task 3.

### Prescribed texts

Floyd, RT. 2018, Manual of Structural Kinesiology, 20th Ed, McGraw Hill, New York, USA

## HSE103 – Essentials of Exercise Delivery

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurm Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Troy Castricum*

*Cohort rule: This unit is only available to students enrolled in H343 Bachelor of Exercise and Sport Science and D394 Bachelor of Exercise and Sport Science/ Bachelor of Business (Sport Management) and D333 Bachelor of Exercise and Sport Science/Bachelor of Nutrition Science.*

*Campus contact: Waurm Ponds (Geelong): Chris Young*

*Prerequisite: Nil*

*Corequisite: HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class, 1 x 1 hour seminar and 1 x 2 hour practical laboratory per week.*

### Content

This unit examines the theory and practice of exercise instruction, coaching and professional practice across a range of exercise-based settings. Students will learn the fundamentals of exercise instruction for the general population and be introduced to specific needs of special populations (e.g.: children and adolescents). They will have the opportunity to design and deliver basic exercise sessions to develop musculoskeletal strength and cardiovascular endurance for apparently healthy individuals and groups.

## Assessment

- Assessment task 1: Mid-trimester online MCQ test 15%
- Assessment task 2a: Written health assessment 5%
- Assessment task 2b: Written health assessment and program start (800 words) 20%
- Assessment task 3: Practical assessment of exercise instruction and delivery skills (30 minutes) 20%
- Assessment task 4: Examination (2 hours) 40%

## Hurdle requirement

Achieving a pass in the practical assessment of exercise instruction and delivery of skills – see Assessment task 3.

## Prescribed texts

Ratamess N. ACSM's Foundations of Strength Training and Conditioning. Philadelphia (PA): Lippincott Williams & Wilkins, 2012

# HSE104 – Research Methods and Statistics in Exercise and Sport

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 1  
EFTSL value: 0.125*

*Trimester 2 Unit Chair: Peter Kremer*

*Cohort rule: This unit is only available to students enrolled in H343 Bachelor of Exercise and Sport Science and D394 Bachelor of Exercise and Sport Science/ Bachelor of Business (Sport Management) and D333 Bachelor of Exercise and Sport Science/Bachelor Nutrition Science.*

*Campus contact: Burwood (Melbourne): Anne Turner*

*Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil*

*Scheduled learning activities – campus: Online learning modules, equivalent to 2–3 hours per week, 1 x 2 hour seminar per week*

## Content

This unit aims to develop students' knowledge and understanding of research design and methodology in the context of exercise and sport science (ESS). This will range from examining some different quality indicators such as validity and reliability to more applied work examining how to organise, analyse, interpret and present ESS research data. The unit will explore different ways that ESS research data are collected and analysed using both qualitative and quantitative statistical methods.

## Assessment

- Assessment task 1: Assignment 1 (1000 words maximum) 30%
- Assessment task 2: Assignment 2 (1000 words maximum) 30%
- Assessment task 3: Examination (2 hours) 40%

## Prescribed texts

Thomas, J.R., Nelson, J.K. & Silverman, S.J. (2015). Research methods in physical activity (7th ed.). Champaign, IL: Human Kinetics

# HSE105 – Principles of Sport Coaching

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 1  
EFTSL value: 0.125  
Trimester 1 Unit Chair: Fraser Carson*

*Prerequisite: Nil  
Corequisite: Must be enrolled in or have previously successfully completed HSE010  
Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour practical class per week*

## Content

The main aims of this unit are to enable students to develop a coaching philosophy, examine the theoretical aspects of the science of coaching, develop coaching models as a basis for the planning and execution of coaching sessions, develop communication skills with individuals and groups, and develop a repertoire of the necessary coaching behaviours required for effective coaching.

## Assessment

- Assessment task 1: Online journal 20%
- Assessment task 2: Written assignment (1500 words) 20%
- Assessment task 3: Practical assessment (in class) 20%
- Assessment task 4: Examination (1.5 hours) 40%

## HSE110 – Muscle Biology for Exercise Science

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Lee Hamilton*

*Campus contact: Trimester 2*

*Burwood (Melbourne): Severine Lamon*

*Prerequisite: Nil*

*Corequisite: HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: This unit is comprised of 3 learning topics. Each learning topic consists of online learning experiences provided via CloudDeakin, accompanied by weekly 2-hour practical activities delivered via a combination of workshop-style seminars, laboratory experiment practicals and computer practicals.*

### Content

Skeletal muscle contraction generates the force necessary for movement and is fundamental to normal physical function and athletic performance.

A thorough understanding of skeletal muscle structure, function, and how muscle responds and adapts to exercise is vitally important for exercise physiologists, as well as for informing exercise prescription strategies in other disciplines of exercise and sports science.

In this unit, students will learn about the fundamental biology of skeletal muscle in the context of exercise, with respect to:

1. the delivery and utilisation of metabolic fuels to support muscle contraction
2. the longer-term adaptations to exercise training in skeletal muscle, and
3. the cellular responses in muscle that underpin these longer term adaptations.

In addition to examining responses and adaptations in muscle to exercise stimuli, this unit will also examine the maladaptation's associated with inactivity and muscle disuse, which are hallmarks of many chronic diseases.

As well as theoretical knowledge, students undertaking this unit will also develop practical skills relevant to the assessment of responses and adaptations to exercise in skeletal muscle. This is a foundation unit for the Major in Exercise Physiology.

### Assessment

- Assessment task 1: 3 x Laboratory reports (approximately 1800 words total) 45%
- Assessment task 2: 3 x Online MCQ tests 20%
- Assessment task 3: End of year examination (90 minutes) 35%

## HSE111 – Physical Activity and Exercise for Health

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jill Hnatiuk*

*Campus contact: Warrn Ponds (Geelong): Sarah Costigan*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSE203*

*Scheduled learning activities – campus: 1 x 1 hour learning module each week (conducted online); 1 x 2 hour seminar each week (conducted on-campus)*

*Scheduled learning activities – cloud (online): 1 x 1 hour learning module each week (conducted online); 2 x 1 hour online seminars each week (conducted online via Blackboard Collaborate)*

### Content

This unit introduces students to the field of physical activity and exercise for health. Students will explore the benefits of physical activity and risks of sedentary behaviour and will gain an understanding of why people participate in physical activity and exercise. Common theories of behaviour change and key correlates of physical activity participation are explored and an introduction to physical activity interventions is provided. Throughout the unit, students are required to source and reflect on high quality evidence in particular to advise a client on their current physical activity patterns and offer evidence-based suggestions for increasing their physical activity.

## Assessment

- Assessment task 1: Part A – PLAN: Developing an evidence-based physical activity report (500 words) 10%
- Assignment task 2: Part B – FINAL REPORT: Developing an evidence-based physical activity report (2000 words) 40%
- Assessment task 3: 4 online quizzes (20 minutes each) Total 20%
- Assessment task 4: Written examination (1000 words; 1.5 hours) 30%

## HSE112 – Pathways in the Physical Activity, Exercise and Health Industry

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Megan Teychenne*

*Prerequisite: HSE111*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online, independent learning activities that require student time commitment of approximately 2 hours per week. In addition, students have the opportunity to attend 2 x 2 hour online seminars*

## Content

This unit provides an opportunity for students to investigate the physical activity, exercise and health industry and explore key organisations involved in the field. Students will learn about physical activity participation amongst a number of sub-groups within the population, and, from an employment perspective, locate, investigate and critically analyse key roles in the industry that aim to promote physical activity and exercise in those sub-groups. Students will use their investigation of the physical activity and exercise industry to explore potential career pathways and areas of future employment interest. Students will identify individual skills and strengths they bring to the field, as well as areas for self- and career development.

## Assessment

- Assessment task 1: Six (6) fortnightly self-analyses (300 words each) 30%
- Assessment task 2a: Written report (1500 words) 40%
- Assessment task 2b: Video presentation (5 minutes) and written reflection (500 words) 30%

## HSE113 – Human Growth, Development and Ageing for Exercise Scientists

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rachel Duckham*

*Cohort rule: This unit is only available to students enrolled in H343 Bachelor of Exercise and Sport Science and D394 Bachelor of Exercise and Sport Science/ Bachelor of Business (Sport Management) and D333 Bachelor of Exercise and Sport Science/Bachelor Nutrition Science.*

*Campus contact: Burwood (Melbourne): Rachel Duckham  
Waurin Ponds (Geelong): Lee Hamilton*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online learning activities that require student time commitment of up to two hours per week, plus independent study. Weekly 2 hour seminars.*

*Scheduled learning activities – cloud (online): Online learning activities that require student time commitment of up to two hours per week, plus independent study. Weekly 2 hour seminars (conducted online through blackboard collaborate).*

## Content

This unit aims to develop students' knowledge of the structural, physiological, social and cognitive changes in human growth, development and ageing across the lifespan (conception through to older adulthood). The unit will provide students with an understanding of the various stages of growth, development and ageing and identify common injuries or conditions that present during these stages. A key focus of the unit will be on how physical activity and exercise influences, and is influenced by, lifespan human growth, development and ageing.

*Note: New unit 2018*

## Assessment

- Assessment task 1: 2 x Case study reports (1000 words each) (2 x 20%) Total 40%
- Assessment task 2: Video critique (1500 words) 40%
- Assessment task 3: Reflection (1000 words) 20%

## HSE201 – Exercise Physiology

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurm Ponds (Geelong)*

*Trimester 3: Cloud (online) with significant campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Stuart Warmington*

*Trimester 3 Unit Chair: Jackson Fyfe*

*Cohort rule: This unit is only available to students enrolled in H315, H343, D333 D324, D394, M320, E377, S302, S307, H300 or H300CR, H300DA, H300WE, D368, D391, S323 students completing the Exercise Science major sequence (MJ-H000016) or minor sequence (MN-H000016) or the Nutrition and Exercise Science major (MJ-H000026). Other students who would like to enrol in this unit must submit their request to [health-enquire@deakin.edu.au](mailto:health-enquire@deakin.edu.au). Enrolment quotas apply. Campus contact: Trimester 1: Waurm Ponds (Geelong): Chris Shaw*

*Prerequisite: E377 students: EEH103*

*All other students: HBS109*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Trimester 1: 4 x online modules per trimester (3–5 hours per week, which include 20 x 1 hour class recordings), 1 x 1 hour seminar workshop per week, and 11 x 2 hour practicals per trimester.*

*Scheduled learning activities – cloud (online):*

*Trimester 3: 4 x online modules per trimester (3–5 hours per week), 1 x 1 hour workshop per week (conducted asynchronously online), and 1 x 4 day laboratory intensive scheduled during trimester to be undertaken at either Burwood (Melbourne) for students enrolled at Burwood (Melbourne) based courses or Waurm Ponds (Geelong) for all other students*

*In-person attendance requirements:*

*Trimester 1: 4 x online modules per trimester (3–5 hours per week, which include 20 x 1 hour class recordings), 1 x 90 minute seminar/workshop per week, and 11 x 2 hour practicals per trimester.*

### Content

This unit examines the integrated physiological responses to acute and chronic exercise, with emphasis on the muscular, metabolic and oxygen transport systems. Students will learn about scenarios where these physiological systems limit exercise performance including examples such as, exercise in extreme

environments (e.g. heat, altitude), dehydration, carbohydrate depletion and neuromuscular fatigue. In addition, students will explore the physiological reasoning behind improvements to exercise performance through the use of 'ergogenic' aids and technologies.

Laboratory classes introduce students to the skills and techniques used to assess performance and the physiological responses to exercise, including skills to analyse, interpret and present experimental data.

### Assessment

#### Trimester 1

- Assessment task 1: 5 x group practical reports (400 words each) 20%
- Assessment task 2: 4 x end-module topic quizzes (conducted online) 20%
- Assessment task 3: Data Skills examination (30 minutes) 15%
- Assessment task 4: End-trimester examination (1.5 hours) 45%

#### Trimester 3

- Assessment task 1: 5 x group practical reports (400 words each) 30%
- Assessment task 2: 4 x end-module topic quizzes (conducted online – 20 MCQs per quiz completed in 30 minutes) 20%
- Assessment task 3: Data Skills examination (30 minutes) 15%
- Assessment task 4: End-trimester examination (1.5 hours) 35%

### Hurdle requirement

Practical examination.

## HSE202 – Biomechanics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurm Ponds (Geelong), Cloud (online) with significant campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Liz Bradshaw*

*Cohort rule: This unit is only available to students enrolled in H343, D324, D333, D394, E377, M320, S302, S307, H315, H300, D368 or D391 students completing the Exercise Science major sequence (MJ-H000016) or minor sequence (MN-H000016). Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply. Campus contact: Burwood (Melbourne): Liz Bradshaw*

*Prerequisite:* Nil

*Corequisite:* Must be enrolled in or have previously successfully completed HSE010

*Incompatible with:* Nil

*Scheduled learning activities – campus:* 2 x 1 hour classes per week, 9 x 2 hour laboratory sessions during trimester

*Scheduled learning activities – cloud (online):* 22 x 1 hour classes (recordings provided) and 2 days of practical work at Burwood (Melbourne), scheduled on weekends during trimester.

*In-person attendance requirements:* Cloud (online) students only: 2 days of practical work at Burwood (Melbourne), scheduled on weekends during trimester.

## Content

This unit introduces students to the major biomechanical factors involved in movement, with a special focus on locomotion, sports technique and analysis. The material is presented with an emphasis on the qualitative analysis of motion and forces. The unit includes the examination of external forces, such as gravity, air resistance, and friction, and their role in human movement. Internal forces created by skeletal and muscular systems and their effect on the body and its movement will be discussed. Finally, the unit will address some practical applications in biomechanics through a qualitative analysis of skill project.

## Assessment

- Assessment task 1: Mid trimester test (45 minutes) 20%
- Assessment task 2: Laboratory project part A (10 minute group presentation) 10%
- Assessment task 3: Laboratory project part B (1300 word group report) 30%
- Assessment task 4: Examination (1.5 hours) 40%

# HSE203 – Exercise Behaviour

*Enrolment modes:* Trimester 1: Burwood (Melbourne), Warrnambool, Waurin Ponds (Geelong), Cloud (online)

*Credit point(s):* 1

*EFTSL value:* 0.125

*Trimester 1 Unit Chair:* Sarah Costigan

*Cohort rule:* This unit is only offered to students who are enrolled in: E377 in or before 2017; OR students who commenced their H343/D394 course in or before 2016 who need to complete this core unit; OR H300/D391 students who commenced the Physical Activity and Health major in or before 2017.

*H300/D391/H343/D394 students who need to enrol into this unit, please email:* [health-enquire@deakin.edu.au](mailto:health-enquire@deakin.edu.au).

*Campus contact:* Burwood (Melbourne): Megan Teychenne

*Waurin Ponds (Geelong):* Sarah Costigan

*Warrnambool:* Megan Teychenne

*Prerequisite:* One of HBS110 or ESH404 OR both of EEH101 and EEH102

*Corequisite:* Nil

*Incompatible with:* HSE111

*Scheduled learning activities – campus:* 1 x 1 hour learning module presentations each week (conducted online); 1 x 2 hour face-to-face seminar each week

*Scheduled learning activities – cloud (online):* 1 x 1 hour learning module presentations each week (conducted online); 1 x 2 hour online seminars each week (conducted online via Blackboard Collaborate); Online self-directed learning activities

## Content

This unit introduces students to the field of physical activity and health. The unit begins by exploring the benefits of physical activity and risks of sedentary behaviour and then moves on to understand physical activity participation. In this regard, common theories of behaviour change are explored as are key correlates of physical activity participation. An introduction to physical activity interventions is provided as is an introduction to the importance of physical activity in the lives of specific population sub-groups including older adults and underserved populations. Throughout the unit, students are required to source and reflect on high quality evidence in particular to design an appropriate and safe physical activity program that addresses known barriers to participation and fosters adoption and maintenance.

*Note:* From 2019 onwards, this unit will be only be offered to E377 students

## Assessment

- Assessment task 1: Assignment – conducted in two parts: part 1 – assignment plan/draft (20% of available marks for assignment); part 2 – complete assignment (80% of available marks for assignment) (2000 words) 50%
- Assessment task 2: CloudDeakin discussion boards posts 10%
- Assessment task 3: Examination (1.5 hours) 40%

## HSE204 – Motor Learning and Development

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online) with significant campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Lyndell Bruce*

*Cohort rule: This unit is only available to students enrolled in H343, D324, D333, D394, M320 and E377.*

*Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply.*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 x topic modules (delivered online) plus 5 x 1-hour seminars plus 7 x 2-hour practicals*

*Scheduled learning activities – cloud (online): 4 x topic modules (delivered online) plus 5 x 1-hr seminars (delivered online) plus 2 x 1-day practical intensives scheduled on 2 weekends in trimester.*

### Content

This unit provides an introduction to concepts in human motor learning, motor control, motor development and physical growth. It is designed to provide students with an understanding of the neurobiological mechanisms and fundamental processes underlying the learning of motor skills and to show how motor development is influenced by physical growth. Application of motor learning, motor development and physical growth concepts, to selected aspects of skill acquisition and remediation of skill in work, sport and everyday living are considered.

### Assessment

- Assessment task 1: Practical reports (4 x 500 words each) 40%
- Assessment task 2: Online MCQ's (4 x 5% each) 20%
- Assessment task 3: Examination (2 hours) 40%

### Prescribed texts

Spittle, M. (2013). Motor learning and skill acquisition: Applications in physical education and sport. Melbourne: Palgrave-MacMillan

## HSE205 – Advanced Sport Coaching Theory and Practice

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Julia Walsh*

*Campus contact: Waurin Ponds (Geelong): Fraser Carson*

*Prerequisite: HSE105*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 9 x 1 hour seminars and 9 x 2 hour practicals across the trimester*

### Content

The aim of this unit is to extend students' theoretical knowledge and application of pedagogical models in coaching. Students learn how to plan, deliver and evaluate youth coaching sessions and develop season plans.

The coaching focus is youth development and inclusive practice. Students are expected to observe, teach, reflect, and evaluate coaching sessions. The knowledge, skills, and practical experiences position students to coach and instruct youth in a variety of sport participation pathways. Students are required to find, organise and engage in a 30-hour coaching placement to create an authentic context to demonstrate their learning.

*Note: Students are required to find a coaching placement position for themselves.*

The student is required to research the type of coaching placement opportunities they are interested in and contact the organisation/s themselves to seek the availability of a placement position with them.

### Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Assessment

- Assessment task 1: Master coaching plan for a youth squad in a foundation or talent pathway (2000 words) 50%
- Assessment task 2: Assignment – Evaluation of case studies on leadership and youth sport (750 words) 20%
- Assessment task 3 Reflective journal, coaching logbook and supervisor report (1250 words) 30%

### Hurdle requirement

Coaching Practicum: 30 hours

## HSE208 – Integrated Human Physiology

### Enrolment modes:

*Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong)*

*Trimester 3: Cloud (online) with significant campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Anne Turner*

*Trimester 3 Unit Chair: Anne Turner*

*Cohort rule: This unit is only available to students enrolled in H315, H343, D333, D394, H355 OR S323 students completing the Nutrition and Exercise Science major (MJ-H000026) OR H300 and D391 students completing the Nutrition major (MJ-H000007). Other students who would like to enrol in this unit must submit their request to [health-enquire@deakin.edu.au](mailto:health-enquire@deakin.edu.au).*

*Enrolment quotas apply.*

*Campus contact: Waurn Ponds (Geelong): Lee Hamilton*

*Prerequisite: HBS109*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

### Scheduled learning activities – campus:

*Trimester 2: 7 x online modules per trimester (3–5 hours per week), 5 x 1 hour seminars per trimester and 5 x 2 hour practicals per trimester.*

### Scheduled learning activities – cloud (online):

*Trimester 3: 7 x online modules per trimester (3–5 hours per week), 5 x 1 hour online seminars per trimester and 2 x non-consecutive days of practicals, scheduled during trimester. Practical to be undertaken at either Burwood (Melbourne) for students enrolled at Burwood (Melbourne) based courses or Waurn Ponds (Geelong) for all other students.*

*In-person attendance requirements: Trimester 3 students enrol as Cloud (online); however there are significant campus requirements*

### Content

In this unit, students will examine the function of human physiological systems and how these systems respond to and work together (integrate) in their responses to challenges that arise from a variety of conditions such as exercise, pathology and the environment. Students will learn to explain human physiology using physiological data and published scientific evidence.

### Assessment

- Assessment task 1: Written reports (2000 words) 50%
- Assessment task 2: Seminar questions 10%
- Assessment task 3: Examination (2 hours) 40%

### Prescribed texts

Widmaier EP, Raff H and Strang KT (2019) Vander's human physiology: The mechanisms of body function, 15th edition, McGraw Hill, New York, USA.

## HSE212 – Physical Activity Promotion and Evaluation

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Megan Teychenne*

*Campus contact: Burwood and Cloud campus:*

*Megan Teychenne*

*Waurn Ponds (Geelong): Sarah Costigan*

*Prerequisite: HSE111 or HSE203*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour learning module presentations each week (conducted online); 1 x 2 hour seminar each week (conducted on-campus)*

*Scheduled learning activities – cloud (online): 1 x 1 hour learning module presentations each week (conducted online); 1 x 2 hour online seminars each week (conducted online via Blackboard Collaborate); Online self-directed learning activities*

## Content

This unit provides students with an understanding of the processes involved in planning, implementing and evaluating physical activity promotion programs. A range of settings, including workplaces, schools, and general practice, and a range of approaches including mass-media, sponsorship, policy and environment change are considered. Students will gain skills in developing an evidence-based program and in using a variety of methods to evaluate its effectiveness. Students will also develop a plan for a career in physical activity and health.

## Assessment

- Assessment task 1: Written career action plan (1000 words) 20%
- Assessment task 2: Group written assignment (1000 words per group member) 30%
- Assessment task 3: Examination (2 hours) 50%

## HSE213 – Children's Physical Activity and Sport

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jill Hnatiuk*

*Trimester 2 Unit Chair: Jill Hnatiuk*

*Campus contact: Waurin Ponds (Geelong): Sarah Costigan*

*Prerequisite: HSE111 or HSE203*

*Corequisite: Nil*

*Incompatible with: HSE313*

*Scheduled learning activities – campus: 2 hour face-to-face seminar each week and weekly self-directed online learning. Students must attend a one day intensive practical session at the Burwood campus on a weekend (date TBC).*

*Scheduled learning activities – cloud (online): Weekly self-directed learning experiences online via CloudDeakin. Students must attend a one day intensive practical session at the Burwood campus on a weekend (date TBC).*

## Content

The aim of this unit is to enable students to develop an understanding of the nature of children's physical activity and sport participation and the influences on these behaviours in a variety of contexts. Topics covered include: an introduction to children's physical activity and sport in relation to health, physiology and behaviour; determinants and correlates of children's physical activity and sport; and the promotion of physical activity and sport in several settings. Seminar/practical sessions address the application of the class material in a practical context for promoting physical activity and sport to a group of children.

*Note: HSE213 will be offered for the last time in Trimester 1, in 2019. From 2020, HSE213 will be offered in Trimester 2 only.*

## Assessment

- Assessment task 1: Design of a children's physical activity promotion program – PART A (Outline) 10%
- Assessment task 2: Design of a children's physical activity promotion program – PART B (Full report) 40%
- Assessment task 3: Seminar review tasks 20%
- Assessment task 4: Practical delivery of a physical activity session 30%

## HSE301 – Exercise Prescription for Fitness and Health

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)^ with significant campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Samantha Hoffmann*

*Cohort rule: Only available to students enrolled in H315, H343, D324, D394, E377, M320, H300, H300CR, H300DA, H300WE, D368, D391 or S323 students completing the Exercise Science major sequence (MJ-H000016) or minor sequence (MN-H000016) or Nutrition and Exercise Science major sequence (MJ-H000026). Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply.*

*Campus contact: Burwood (Melbourne): Matt Clarkson*

*Prerequisite: One of HSE103 or HSE201 or HSN211*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour seminar each week; 1 x 2 hour practical laboratory each week.*

*Scheduled learning activities – cloud (online): ^1 x 1 hour online learning activities each week; 2 days of practical work at Burwood (Melbourne), scheduled on weekends during trimester.*

*In-person attendance requirements: ^There are significant campus requirements for Cloud (online) students.*

## Content

This unit is designed to enable students to understand and apply the basic requirements of health and fitness testing, exercise prescription, instruction, supervision and communication for the general population. This unit will be taught via a modified team-based learning model, and students will be responsible for delivering health and fitness tests and training programs of their own design to their peers.

## Assessment

- Assessment task 1: Online quizzes 20%
- Assessment task 2: Individual and Team Based Learning (TBL) tasks 30%
- Assessment task 3: Minor practical assessment (video submission) 20%
- Assessment task 4: Major practical examination (30 minutes) 30%

## Hurdle requirement

Passing the major practical Assessment

# HSE302 – Exercise Programming

## Enrolment modes:

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online) – with significant campus requirements*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online) – with significant campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Samantha Hoffmann*

*Trimester 2 Unit Chair: Samantha Hoffmann*

*Cohort rule: Trimester 1: Only available to students enrolled in D333, and the new course versions of H343 and D394 (H343.4 and D394.2).*

*Trimester 2: Only available to students enrolled in D368 and M320, H300 and D391 students who are undertaking the Exercise Science major, and students enrolled in previous course versions of H343 and D394 (H343.3 or prior and D394.1).*

*Note: H343 and D394 students enrolled in previous course versions (H343.3 or prior and D394.1), and students enrolled in H300, D391, M320 and D368 are not required to undertake the 80 hours exercise prescription placement, as this requirement is not part of these course's rules.*

*Campus contact: Burwood (Melbourne): Matt Clarkson*

*Prerequisite: HSE103 or HSE301*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Only D333, and H343 and D394 students enrolled in the new course versions (H343.4 and D394.2) will need to complete an 80-hour placement in exercise assessment, prescription, and delivery at a host organisation approved by the unit team.*

*T1 offering: 7 x online modules across the trimester (2–3 hours each), 7 x 2 hour seminars across the trimester, and 8 x 2 hour practicals across the trimester.*

*T2 offering: 8 x online modules across the trimester (2–3 hours each), 11 x 2 hour seminars across the trimester, 11 x 2 hour practicals across the trimester.*

*Scheduled learning activities – cloud (online):*

*T1 offering: 7 x online modules across the trimester (2–3 hours each), 7 x online collaborative tasks across the trimester, and 1 x 2-day compulsory practical workshop at the Melbourne (Burwood) campus.*

*T2 offering: 8 x online modules across the trimester (2–3 hours each), 11 x online collaborative tasks across the trimester, 3 x full-day compulsory practical workshops across the trimester*

## Content

This unit is designed to advance students' knowledge and application of the principles of exercise prescription, exercise instruction and communication, with an emphasis on individualised, client-specific considerations, such as common musculoskeletal injuries, pregnancy and post-partum, children and older adults. Students enrolled in D333, and the new course versions of H343 and D394 (H343.4 and D394.2) will also complete an 80 hour placement at a pre-approved host organisation, facilitated by the unit team.

*Note: If you are unsure which trimester you should be enrolling into this unit, please seek advice from Student Adviser by emailing [health-enquire@deakin.edu.au](mailto:health-enquire@deakin.edu.au) or call 9251 7777 if you have any questions.*

*Note for all D333, H343.4 and D394.2 students enrolling into this unit: You must complete your placement hours by 30 September of the year enrolled in the unit unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by this date, please email the School of Exercise and Nutrition Sciences Professional Placement Office at [ens-placements@deakin.edu.au](mailto:ens-placements@deakin.edu.au) as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

### Trimester 1

- Assessment task 1a: 1 x online Multiple Choice Question (MCQ) test 15%
- Assessment task 1b: 1 x short answer test 25%
- Assessment task 2: Group training session (15 minutes) 20%
- Assessment task 3: Peer assessment of training session (500 words) 10%
- Assessment task 4: Practical examination (20 minutes) 30%

### Trimester 2

- Assessment task 1a: 3 x online Multiple Choice Question (MCQ) test 15%
- Assessment task 1b: 3 x short answer test 30%
- Assessment task 2: Group training session (15 minutes) 20%
- Assessment task 3: Peer assessment of training session (500 words) 10%
- Assessment task 4: Practical examination (20 minutes) 25%

## Hurdle requirement

### Trimester 1

- Assessment task 4: Practical examination
- Placement Host Supervisor Report and Approved Logbook: Ungraded Pass/Fail

### Trimester 2

- Assessment task 4: Practical examination

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## HSE303 – Exercise Metabolism

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrnambool (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kirsten Howlett*

*Cohort rule: Only available to students enrolled in H343, D324, D394 or S323 students completing the Nutrition and Exercise Science major (MJ-H000026) or H315 students completing the Exercise Physiology major sequence (MJ-H000029). Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply. Campus contact: Burwood (Melbourne): Glenn Wadley*

*Prerequisite: HSE201*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour laboratory class per week, 1 x 2 hour seminar every two weeks which includes IN-CLASS assessment of Individual and Team Based Learning (TBL) tasks (see below)*

## Content

This unit will provide students with an overview of the metabolic responses to exercise and their regulation. Specific topics to be covered include: an overview of skeletal muscle energy metabolism, hormonal regulation of metabolism, metabolism during high-intensity exercise, carbohydrate and lipid metabolism during exercise and their regulation, environmental temperature and metabolism, metabolic bases of fatigue, metabolic adaptations to training and exercise and muscle gene expression.

## Assessment

- Assessment task 1: Individual and Team Based Learning (TBL) tasks 35%
- Assessment task 2: Laboratory Research Project 1 – Individual (400 words) 10%
- Assessment task 3: Laboratory Research Project 2 – Team (2000 words) 25%
- Assessment task 4: Examination (1.5 hours) 30%

## HSE304 – Physiology of Sport Performance

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rachel Duckham*

*Cohort rule: Only available to students enrolled in H343, D324, D394, S302 OR S323 students completing the Nutrition and Exercise Science major (MJ-H000026) or H315 students completing the Exercise Physiology major sequence (MJ-H000029). Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply. Campus contact: Waurn Ponds (Geelong): Chris Young*

*Prerequisite: HSE201*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class recordings (delivered online) and 1 x 2 hour practical per week*

## Content

This unit provides an overview of the physiological and metabolic limits to sports performance and the potential strategies to enhance sports performance. Specific topics to be covered include: limits to exercise performance, nutritional strategies and ergogenic aids, principles of training for endurance, speed and strength, and environmental effects of exercise performance.

## Assessment

- Assessment task 1: Two laboratory reports (three pages per report) 15%
- Assessment task 2: Group assignment – research project (3000 words in total from the group) 30%
- Assessment task 3: Fact sheet (2 pages) 15%
- Assessment task 4: Examination (2 hours) 40%

## HSE305 – Issues in Sport Coaching

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Julia Walsh*

*Campus contact: Waurn Ponds (Geelong): Fraser Carson*

*Prerequisite: HSE204 or HSE205*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week, 1 x 1 hour online seminar per week*

## Content

This unit explores contemporary issues relevant to coaching and sport science from a personal and professional development perspective. Topics include: career transition and development of athletes and coaches, issues management such as drugs and doping in sport, leading and managing teams, ethics and professional practice in coaching, strategic planning, management and development of coaches and coaching.

## Assessment

- Assessment task 1: A literature review that addresses a current issue in sports coaching or in sports science (2000 words) 50%
- Assessment task 2: Group (3 students) assignment to design, develop, and present an educational resource(s) to address one major sport issue for athletes, coaches or sport scientists (6000 words per group) 50%

## HSE309 – Behavioural Aspects of Sport and Exercise

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Luana Main*

*Trimester 2 Unit Chair: Luana Main*

*Campus contact:*

*Trimester 1: Waurn Ponds (Geelong): Fraser Carson*

*Trimester 2: Burwood (Melbourne): Luana Main*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 11 x 1 hour classes, 11 x 1 hour modularised classes delivered online, 11 x 1 hour seminars*

*Scheduled learning activities – cloud (online): 11 x 1 hour classes (recordings provided), 11 x 1 hour modularised classes delivered online, and 5 x 1 hour seminars conducted online. Off campus students also receive access to 11 pre-planned learning activities/tasks related to the on campus seminars.*

## Content

This unit introduces students to a range of topics related to the different ways in which psychological, behavioural and cognitive factors may affect individual and team performance in sport, and to the ways that sport and exercise may impact on psychological and behavioural factors. The unit also provides students with practical experience in mental strategies to enhance athletic performance. Although directly related to sport performance, the unit would be useful to students interested in other performance domains.

*Note: This unit will be offered for the last time in Trimester 1 in 2019. From 2020, the unit will be offered in Trimester 2 only.*

## Assessment

### Trimester 1

- Assessment task 1: 4 x Study-area online-quizzes (5% each) 20%
- Assessment task 2: Practical report (2000 words) 40%
- Assessment task 3: Examination (2 hours) 40%

### Trimester 2

- Assessment task 1: Written Psychological skills training program (1400 words) 30%
- Assessment task 2: Simulated client case study (1400 words) 40%
- Assessment task 3: Examination (90 minutes) 30%

# HSE311 – Applied Sports Science 1

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dan Dwyer*

*Cohort rule: Only available to students enrolled in H343, D324, D394, E377, S302 and S307. Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply.*

*Campus contact: Waurin Ponds (Geelong): Aaron Fox*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010 and one of HSE201, HSE202, HSE203, HSE204*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week, 1 x 1 hour seminar on alternate weeks*

## Content

This unit is designed to provide students with an understanding of how sub-discipline studies in exercise and sports science can be used to improve human performance in sport and physical activity. The approach taken in the unit is to translate theory (presented through classes and readings) into practice (achieved in practical laboratories, seminars and assessments). As such, students will utilise and develop a range of applied skills and strategies that are relevant to becoming practitioners in exercise and sports science, teaching and coaching. The content will focus primarily on the application of sport science within individual sports, with a particular emphasis given to athletics and exercise rehabilitation as examples of how this can be successfully achieved. The use of software to prescribe exercise, assess performance and present information will also be utilised. Following successful completion of all assessment items, students will be eligible for their Level 1 Athletics Coaching Accreditation with Athletics Australia.

## Assessment

- Assessment task 1: Coaching skills assessment 20%
- Assessment task 2: Performance analysis assignment (~750 words and video) 20%
- Assessment task 3: Applied Sport Science assignment (~750 words and oral presentation) 20%
- Assessment task 4: Final examination (2 hours) 40%

## Prescribed texts

Athletics Australia Level 1 Course resource pack.

## HSE312 – Exercise and Sports Science Practicum

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Cara Walker*

*Cohort rule: This unit is only available to students enrolled in H343 Bachelor of Exercise and Sport Science and D394 Bachelor of Exercise and Sport Science/ Bachelor of Business (Sport Management) and D333 Bachelor of Exercise and Sport Science/Bachelor Nutrition Science.*

*Campus contact: Burwood (Melbourne): Cara Walker  
Waurin Ponds (Geelong): Kris Hinck*

*Prerequisite: For students who commenced their course before 2018 OR enrolled in the previous version of course structure H343 (Version 1, 2 or 3) or D394 (Version 1):*

*Must have passed all of HBS109, HBS110, HSE101, HSE102, HSE103, HSE104, HSE201, HSE202, HSE203, HSE204; OR must have passed all of HBS109, HSE101, HSE102, HSE103, HSE104, HSE111, HSE201, HSE202, HSE204.*

*For students who commenced their course in or after 2018 or enrolled in the new course structure H343 (Version 4) or D394 (Version 2):*

*Must have passed all of HBS109, HSE102, HSE103, HSE104, HSE111, HSE113, HSE201, HSE202, HSE204, HSE208.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week (first six weeks of trimester only), 1 x 1 hour seminar per week (weeks 8 to 11 only).*

### Content

This unit will provide students with an opportunity to undertake a formalised fieldwork experience of a minimum of 140 hours in an exercise and sport organisational setting. Each student is responsible for selecting and negotiating an appropriate work experience. Field experiences are intended to provide students with opportunities to develop skills and knowledge in areas of exercise and sport science which will enhance their professional development and vocation potential.

*Note: If you are undertaking more than one unit which has a placement component, please note that the placement organisations have to be different for different placement units. For eg. if you are undertaking HSE312 and HSE321 Sport Coaching and Development Practicum, you will need to find two different organisations to undertake the two placements.*

*Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office at [ens-placements@deakin.edu.au](mailto:ens-placements@deakin.edu.au) as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

### Assessment

- Assessment task 1: Project proposal (400 words) 10%
- Assessment task 2: Job application (600 words plus appendix) 25%
- Assessment task 3: Interview (7.5 minutes) 15%
- Assessment task 4: Student evaluation of their practicum experience (1800 words) 30%
- Assessment task 5: Host supervisor's report 20%

### Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## HSE313 – Children’s Physical Activity and Sport

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrnambool (Geelong), Cloud (online) with considerable campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jill Hnatiuk*

*Campus contact: Warrnambool (Geelong): Sarah Costigan  
Burwood (Melbourne): Megan Teychenne  
Warrnambool: TBA*

*Prerequisite: HSE203*

*Corequisite: Nil*

*Incompatible with: HSE213*

*Scheduled learning activities – campus: 2 hour face-to-face seminar each week and weekly self-directed online learning. Students must attend a one day intensive practical session at the Burwood campus on a weekend (date TBC)*

*Scheduled learning activities – cloud (online):  
Weekly self-directed learning experiences online via CloudDeakin. Students must attend a one day intensive practical session at the Burwood campus on a weekend (date TBC)*

### Content

The aim of this unit is to enable students to develop an understanding of the nature of children’s physical activity and sport participation and the influences on these behaviours in a variety of contexts. Topics covered include: an introduction to children’s physical activity and sport in relation to health, physiology and behaviour; determinants and correlates of children’s physical activity and sport; and the promotion of physical activity and sport in several settings. Seminar/practical sessions address the application of the class material in a practical context for promoting physical activity and sport to a group of children.

*Note: This unit will be offered for the last time in Trimester 1 2019.*

### Assessment

- Assessment task 1: Design of a children’s physical activity promotion program – PART A (Outline) 10%
- Assessment task 2: Design of a children’s physical activity promotion program – PART B (Full report) 40%
- Assessment task 3: Seminar review tasks 20%
- Assessment task 4: Practical delivery of a physical activity session 30%

## HSE314 – Applied Sports Science 2

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrnambool (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Amelia Carr*

*Cohort rule: Only available to students enrolled in H343, D394, E377, S302 and S307. Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply.  
Campus contact: Burwood (Melbourne): Amelia Carr  
Warrnambool (Geelong): Chris Young*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010 and any one of HSE201, HSE202, HSE203 or HSE204  
Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class, 1 x 2 hour practical, plus cloud (online) seminar tasks equivalent to 1 hour per week*

### Content

This unit is designed to provide students with an understanding of how sub-discipline studies in exercise science can be used to study human performance in sport and physical activity. The approach taken in the unit is to translate theory (presented through classes and readings) into practice (achieved in practical laboratories and assessments). As such students will utilize and develop practical skills and strategies that are relevant to becoming practitioners in exercise and sports science and teaching and coaching. The content will focus primarily on the application of sport science within team sports, with various examples given as to how this can be successfully achieved. The use of technologies to plan, assess and monitor in-field performance will also be utilised (e.g. hardware such as GPS and heart rate monitors and software applications designed to code video, periodise the annual plan and monitor athlete wellness).

### Assessment

- Assessment task 1: Practical report (Fitness testing) 20%
- Assessment task 2: Group presentation and lesson plan 20%
- Assessment task 3: Practical report (Performance analysis) 20%
- Assessment task 4: Practical examination. Students are required to demonstrate competence in the conduct of fitness testing
- Assessment task 5: Final examination (2 hours) 40%

### Hurdle requirement

Must pass Assessment task 4

## HSE316 – Physical Activity and Population Health

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong)*

*Trimester 2: Burwood (Melbourne), Warrnambool, Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shannon Sahlqvist*

*Trimester 2 Unit Chair: Jill Hnatiuk*

*Campus contact: Burwood (Melbourne): Jill Hnatiuk*

*Warrnambool: Shannon Sahlqvist*

*Prerequisite: HSE111 or HSE203*

*Corequisite: Nil*

*Incompatible with: Nil*

*Recommended: HSE212*

*Scheduled learning activities – campus: 12 x 2 hour seminars over the course of the trimester*

### Content

HSE316 explores the benefits of physical activity from an epidemiological perspective. Students apply critical thinking skills to understand the roles physical activity and sedentary behaviour (e.g., sitting) play in preventing chronic disease. Contemporary issues are explored, in particular in relation to promoting physical activity. This unit is taught over a series of interactive seminars.

*Note: This unit will be offered for the last time in Trimester 2 in 2019 and will be offered only in Trimester 1 from 2020 onwards.*

### Assessment

- Assessment task 1: Individual assignment (1500 words) 40%
- Assessment task 2: Individual oral presentation (6 minutes) and written reflection (600 words) 35%
- Assessment task 3: Seminar learning activities 25%

## HSE320 – Exercise in Health and Disease

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Robin Daly*

*Cohort rule: Only available to students enrolled in H343, D394 OR S323 students completing the Nutrition and Exercise Science major (MJ-H000026) or H315 students completing the Exercise Physiology major sequence (MJ-H000029). Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply. Campus contact: Waurn Ponds (Geelong): Kirsten Howlett*

*Prerequisite: HSE301 or HSE302*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week via CloudDeakin, 1 x 2 hour seminar in alternate weeks, 1 x 2 hour practical in alternate weeks*

### Content

This unit provides an overview of the health benefits of physical activity and the health consequences of physical inactivity. From a biological perspective, this unit will examine the impact of exercise or physical activity on various physiological systems including the endocrine, musculoskeletal, cardiovascular and respiratory systems. This unit will examine disorders and diseases associated with these physiological systems including cardiovascular disease, metabolic syndrome including obesity, diabetes, musculoskeletal disorders including sarcopenia and osteoporosis, respiratory disease and neurological disorders. The pathogenesis of these diseases will be addressed, and how exercise or physical activity can be prescribed in order to prevent and/or treat these disorders and diseases. Practical classes will provide students with a 'hands on' opportunity to reinforce the theory delivered in classes and seminars.

### Assessment

- Assessment task 1: Multiple choice (2 x 15-minute online exams) 10%
- Assessment task 2: Oral presentation (15 minutes) 20%
- Assessment task 3: Written report (2000 words) 20%
- Assessment task 4: Practical exam 10%
- Assessment task 5: Examination (90 minutes) 40%

### Recommended texts

ACSM's Guidelines for Exercise Testing and Prescription (2013) Ninth Edition. Lippincott Williams & Wilkins, USA, Philadelphia

# HSE321 – Sport Coaching and Development Practicum

Enrolment modes: Trimester 2: Burwood (Melbourne), Warrnambool (Geelong)

Credit point(s): 1

EFTSL value: 0.125

Trimester 2 Unit Chair: Fraser Carson

Campus contact: Burwood (Melbourne): Cara Walker

Prerequisite: HSE205

Corequisite: Nil

Incompatible with: HSE306

Scheduled learning activities – campus: 1 x 1 hour seminar per week

## Content

In weekly seminars (small groups) topics relevant to the practicum placements will be discussed to ensure constant monitoring and support for students throughout their practicum experience. Students also participate in personal career planning seminars that includes resume development, developing a job application, and an online profile.

Note:

- If you are undertaking more than one unit which has a placement component, please note that the placement organisations have to be different for different placement units. For eg. if you are undertaking HSE321 and HSE312 Exercise and Sports Science Practicum, you will need to find two different organisations to undertake the two placements.
- Students are required to find a coaching/sport administration placement position for themselves.

The student is required to research the type of coaching/sport administration placement opportunities they are interested in and contact the organisation/s themselves to seek the availability of a placement position with them.

*Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office at [ens-placements@deakin.edu.au](mailto:ens-placements@deakin.edu.au) as soon as possible.*

*Note for International Students Only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Project proposal (400 words) 10%
- Assessment task 2: Job application, (1000 words plus appendix) 25%
- Assessment task 3: Interview (7.5 minutes) 15%
- Assessment task 4: Student submission of work journal and evaluation of their practicum experience (2000 words) 40%
- Assessment task 5: Host supervisor's report 10%

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## HSE323 – Clinical and Sport Biomechanics

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jason Bonacci*

*Cohort rule: Only available to students enrolled in H343, D324, D394, D333, S302 and S307. Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply. Campus contact: Burwood (Melbourne): Liz Bradshaw*

*Prerequisite: HSE202*

*Corequisite: Must be enrolled in or have previously successfully completed HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 11 x 2 hour laboratories per trimester*

### Content

This unit is designed to explore the applications and implications of the physical principles underlying efficient human movement. The unit examines aspects of muscle mechanics relevant to sports performance and injury prevention, and investigates methods of quantifying human motion. Data from kinematic, electromyographic and kinetic sources will be analysed and interpreted. Exemplary material is drawn from studies of human locomotion and of the activity of isolated single-joint movements to determine the effects of injury and the progress of rehabilitation.

### Assessment

- Assessment task 1: Mid trimester test (50 minutes) 25%
- Assessment task 2: Laboratory project part A (2000 words) 35%
- Assessment task 3: Laboratory project part B (15 minute group presentation) 10%
- Assessment task 4: Examination (1.5 hours) 30%

### Prescribed texts

Hall, S.J. (2006). Basic biomechanics. (5th ed.). Boston: McGraw-Hill. (612.76 HAL)

## HSE329 – Advanced Anatomy for Exercise Scientists

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jason Bonacci*

*Cohort rule: This unit is only available to students enrolled in H343 Bachelor of Exercise and Sport Science*

*Prerequisite: HBS109, HSE102, HSE103*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour workshop/practical each week, 2 x 1 hour online learning modules/activities each week.*

### Content

This unit provides students with an advanced understanding of musculoskeletal anatomy in relation to exercise. A key focus of the unit will be on the application of musculoskeletal and neurological anatomy to exercise prescription. A detailed analysis of the anatomical, biomechanical and neuromuscular basis of strength based exercise will be explored. The application of anatomical knowledge will be analysed in the context of sport, pathology and injury.

*Note: New unit 2019*

### Assessment

- Assessment task 1: Theoretical examination – Individual (60 minutes) 30%
- Assessment task 2: 3 x Case study analyses – Group presentation (3 x 10 minutes) 30%
- Assessment task 3: Practical examination – Individual (15 minutes) 40%

## HSE330 – Nutrition for Exercise Scientists

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Dominique Condo*

*Prerequisite: HSE201*

*Corequisite: HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: This unit is comprised of 4 modules. Each module consists of online learning experiences and assessment through CloudDeakin with a commitment of approximately 6 to 8 hours per week. Online content is accompanied by 2 hour on campus workshops each week.*

*Scheduled learning activities – cloud (online): 1 x 2 hour seminar per week (online via Blackboard Collaborate)*

### Content

In this unit students will gain the knowledge and skills to provide nutritional advice to healthy clients. It will cover nutritional recommendations and methods for dietary assessment and analysis. The scope of practice for an exercise scientist around the nutritional advice provided and identifying inappropriate dietary behaviours will be considered, including appropriate referral pathways. Students will gain knowledge in the food and fluid requirements and application of nutritional supplements for exercise preparation, exercise performance and exercise recovery within various sporting activities.

### Assessment

- Assessment task 1: 4 x Online tests (15 minutes each, 4 x 5%) Total 20%
- Assessment task 2: 3 x Dietary assessment and feedback reports (1600 words, 40%) with two presented via a mini-oral (5% each) Total 50%
- Assessment task 3: Examination (90 minutes, 1500 words) 30%

## HSE331 – Advanced Strength and Conditioning

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Matt Clarkson*

*Cohort rule: This unit is only available to students enrolled in H343 – Bachelor of Exercise and Sport Science*

*Campus contact: Kris Hinck*

*Prerequisite: HSE103, HSE302*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour practical class each week, 1 x 2 hour seminar each fortnight, alternating with 1 x 2 hour TBL/Class each fortnight.*

### Content

This unit is designed to equip graduates to work as exercise professionals particularly in strength and conditioning at sub-elite to high level sport. With a significant emphasis on practical aspects of Strength and Conditioning, students will apply their knowledge and skill sets to the athletic context for improving sport and human performance. As an advanced unit in the Strength and Conditioning students will be challenged to make connections with previously learned materials from other units and contribute to team-based learning experiences and coaching sessions. Students will be assessed in a practical setting requiring them to demonstrate an ability to assess, interpret, prescribe and coach through assessment tasks.

### Assessment

- Assessment task 1: Individual – 5 x MCQ Online tests (5 x 4%) Total 20%
- Assessment task 2: Group – 5 x TBL Case studies (5 x 3%) Total 15%
- Assessment task 3: Group – Written assignment (2000 words) 50%
- Assessment task 4: Individual – Practical examination (30 minutes) 15%

## HSE332 – Global Perspectives in Physical Activity and Exercise for Health

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shannon Sahlqvist*

*Campus contact: Burwood (Melbourne): Jill Hnatiuk*

*Prerequisite: HSE111 and HSE212*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 modules delivered online, plus 4 x 3 hour seminar over the trimester.*

*Scheduled learning activities – cloud (online): 5 modules delivered online, 2 x 90 minute Blackboard collaborate sessions, 1 day seminar scheduled in Geelong on a weekend during trimester.*

### Content

This unit provides students with the opportunity to learn about the context of physical activity and exercise for health from an international perspective and is designed to enhance their understanding of cross-cultural aspects of physical activity and exercise for health. The unit will begin by exploring physical activity participation and promotion within the Australian context including in underserved, minority groups. The unit will then explore physical activity participation and promotion in other high, as well as low and middle, income countries. Using specific examples, students will learn about the challenges and opportunities different countries face in promoting physical activity and compare and contrast individual, social, environmental and policy influences of physical activity across these countries. Students will be required to reflect on their, and others, viewpoints and foster capacity building to solve global problems relevant to physical activity and health.

### Assessment

- Assessment task 1: Written stakeholder report (2000 words) 50%
- Assessment task 2: Seminar learning activities conducted online (4 x 20 minutes) 30%
- Assessment task 3: Written reflection on knowledge and skills gained in undertaking units in the major (500 words) 20%

## HSE360 – International Perspectives On Exercise and Sports Science

*Offering information: Only available in Trimester 3 2019 for students enrolled in H343, D394, or D333. Students enrolled in D394 and D333 must complete this unit as an extra in their current workload. Will be available for all other students in 2020.*

*Enrolment modes: Trimester 3: Study tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Will Vickery*

*Cohort rule: For Trimester 3 2019 only available to students enrolled in H343, D394, or D333. At other times, this unit is available to students enrolled in:*

- H343 Bachelor of Exercise and Sport Science
- D394 Bachelor of Exercise and Sport Science/ Bachelor of Business (Sport Management)
- H300 Bachelor of Health Sciences (Exercise Science Major sequence)
- M320 Bachelor of Sport Development
- D391 Bachelor of Arts/Bachelor of Health Sciences (Exercise Science Minor sequence)

*Prerequisite: This unit is completed as an elective in Trimester 3 2019. For T3 2019, students will have completed 16 credit points prior to enrolling. H343 students must include this as one of their electives in T3. D394 and D333 students must complete this as an extra unit on top of their current workload. Completion of a minimum of 6 credit points (Level 1–3) will be required for selection and enrolment in the study tour. Students (approximately 20) will be selected by the unit team based on a formal application and interview process.*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: Study tour – 3 x 1 full day seminars, study tour of approximately two weeks.*

### Content

This unit provides students with the opportunity to learn about exercise and sport science from an international perspective and will be conducted in the form of a study tour of a pre-determined international destination(s). The study tour will be comprised of a range of activities, site visits and experiences designed to link students with experts from academic and industry sectors relating to the different disciplines of exercise and sport science in an international environment.

Students will have the opportunity to deepen their understanding of current practice in the major disciplines of sport and exercise science including Applied Sports Science, Strength and Conditioning, Coaching, Physical Activity and Exercise, Exercise Physiology and Sports Development from an international perspective. Students will gain an appreciation of the similarities and differences between Australia and the host destination(s). Students will also reflect on their own values, approaches and career ambitions in relation to the disciplines of exercise and sport science and have the opportunity to network and grow international industrial and academic contacts.

*Note: Students should be aware that study tour costs (travel, accommodation etc) must be covered by the student, in addition to normal unit fees.*

Limited places are available. The selection process includes a written application and personal interview. More information about the study tour program will be available to students closer to unit enrolment. Students are strongly advised to consult with their student advisers first before applying, to ensure they have elective space in their course to undertake this unit.

This unit is being offered in alternate even years, e.g. T3 2020, T3 2022 etc.

### Assessment

- Assessment task 1: (a) Pre-tour oral presentation 15%, (b) Pre-tour report (500 words) 10% – Total 25%
- Assessment task 2: (a) Portfolio Diary 15% (b) Reflective Blog 10% – Total 25%
- Assessment task 3: Briefing and executive summary 50%

## HSE401 – Developing Research Skills

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Lukar Thornton*

*Cohort rule: Only available to students enrolled in Faculty of Health Honours courses*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSH401*

*Scheduled learning activities – campus: 3 x 2 hour classes. As each project will vary, contact hours for the literature review and research proposal are negotiable between the supervisor and the student.*

## Content

This honours unit will complement the work of research supervisors by teaching and developing selected skills which are important in research and advantageous in careers other than research. Topics to be addressed include effective written and verbal communication skills, the presentation and defence of a research proposal, the preparation of a written research proposal, and the writing of a literature review.

### Assessment

- Assessment task 1: Oral presentation (15 minutes) 20%
- Assessment task 2: Literature review (6000 words) 60%
- Assessment task 3: Research proposal (1000 words) 20%

### Hurdle requirement

Submission of a research plan (1000 words) is hurdle requirement for the unit

## HSE402 – Honours Research Project

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 2 Unit Chair: Lukar Thornton*

*Cohort rule: Only available to students enrolled in Faculty of Health Honours courses*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSH402*

*Scheduled learning activities – campus: Negotiable between supervisor and student*

## Content

The range of topics is diverse. Students will be required to select a topic in which they have undertaken prior (third-year) study, and to undertake original research on the topic with the guidance of a supervisor.

### Assessment

- Assessment task 1: Thesis (12,000 words) 100%
- Assessment task 2: Final oral presentation is a Hurdle requirement

### Hurdle requirement

Final oral presentation is a hurdle requirement.

## HSE702 – Exercise Physiology for Neurological and Neuromuscular Disease

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Niamh Mundell*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: Nil*

*Corequisite: HSE070*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 2 hour seminar for 2 weeks and 1 x 2 hour clinical practicum for 9 weeks per trimester*

### Content

This unit provides an examination of neurological and neuromuscular conditions and their relation to exercise prescription and exercise rehabilitation. The functional anatomy of the neuromuscular system and the roles of neuromotor and sensorimotor elements in motor control are discussed. Pathophysiology in relation to neurological and neuromuscular conditions is addressed and the signs, symptoms, co-morbidities and treatments for a range of neurological and neuromuscular conditions are identified. Considerations for prescription of exercise to clients with neurological and neuromuscular conditions are also outlined.

### Assessment

- Assessment task 1: Mid-trimester test (40 minutes) 20%
- Assessment task 2: Group tasks for client management 20%
- Assessment task 3: Literature review (1500 words) 30%
- Assessment task 4: End of trimester test (60 minutes) 30%

## HSE703 – Mental Health and Exercise Behaviour

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Niamh Mundell*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in or have previously successfully completed HSE070*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week – total 11 weeks*

### Content

This unit examines the theory and practice of exercise behaviour change, the pathophysiology of common mental illnesses, and the practical aspects of working with people with mental illness. Students in this unit will develop a basic understanding of the theory and practice of counselling and coaching clients with pain, mental illness, chronic disease and injury through the behaviour change process. Students will be practicing as part of a rehabilitation team and need to know how to encourage clients to take positive steps towards their own self-management. Topics in this unit include counselling and life-skills coaching, coping with chronic disease and injury, anxiety and depression, self-confidence, goal setting and transitions.

### Assessment

- Assessment task 1: Quiz x 3 (20 minutes each) 15%
- Assessment task 2: Mid-trimester test (1 hour) 30%
- Assessment task 3: Video client interview 20%
- Assessment task 4: Literature review (2000 words) 35%

## HSE704 – Exercise Physiology for Metabolic Disease

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Steve Fraser*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week – total 11 weeks, 11 x 2 hour clinical practicals, 11 x 1 hour Seminar B per trimester*

### Content

This unit provides students with the knowledge and skills to work effectively with patients with metabolic conditions and cancer in order to provide clinical services such as assessment of exercise capacity and prescription of exercise. Students will explore the pathophysiology underlying metabolic disease and cancer, determine objective assessments, interpret clinical data and referrals and prescribe safe and appropriate exercise for patients with various aspects of metabolic disease or cancer.

### Assessment

- Assessment task 1: Weekly quizzes (15 minutes each week for 10 weeks) 40%
- Assessment task 2: Clinical Examination (1 hour) 20% (Hurdle requirement)
- Assessment task 3: Program overview, client report, and individual reflective piece (2500 words) 40%

## HSE705 – Exercise Physiology for Cardiopulmonary Disease

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Louise Conway*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week – total 11 weeks, 9 x 2 hour laboratories, 2 x 2 hour seminars per trimester*

### Content

This unit provides a thorough examination of the pathophysiological aspects, diagnosis and medical regimens and lifestyle management for a range of cardiopulmonary diseases. Through both theoretical and practical experiences, students develop their knowledge and skills to work effectively with patients with cardiopulmonary pathologies. This will enable students to provide clinical exercise services such as assessment of exercise capacity and individualised exercise prescription for clientele with cardiopulmonary pathologies.

### Assessment

- Assessment task 1: Quizzes x 10 (15 minutes each week) 50%
- Assessment task 2: Case study written report (1000 words) plus brief literature review (2000 words) 25%
- Assessment task 3: Clinical Examination (45 minutes) 25% (hurdle requirement)

## HSE706 – Research in Clinical Exercise Physiology

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Natalie Saunders*

*Cohort rule: This unit is only available to students enrolled in H743 – Master of Clinical Exercise Physiology*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week – total 11 weeks, 11 x 2 hour seminars per trimester*

### Content

This unit develops students' professional practice relating to the use of research skills to better inform clinical reasoning. Students will plan and execute a research-based project that will integrate and apply knowledge from a range of contexts developed during the course. Upon completion of this unit, students will be well placed to critically analyse, reflect on and synthesise scientific research to better inform clinical reasoning within the research and clinical environments.

### Assessment

- Assessment task 1: Team based research project (2000 words) 40%
- Assessment task 2: Individual Clinical program proposal OR Research proposal (2500 words) 50%
- Assessment task 3: MCEP Conference presentation 10%

## HSE707 – Exercise Physiology for Musculoskeletal Injury and Disease

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Clint Miller*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in or have previously successfully completed HSE070*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1x 2 hour class, 1 x 2 hour laboratory per week – total 11 weeks per trimester*

### Content

This unit provides students with knowledge and practical skills in the clinical exercise management of musculoskeletal injuries/disease conditions, including for each condition: details of the underlying pathology and development, the pathomechanics, assessment of function and acute exercise capacity, and chronic exercise prescription and long-term management. Students will gain practical experience and skills required to implement this knowledge in a clinical setting for the holistic exercise management of the musculoskeletal compromised client.

### Assessment

- Assessment task 1: Quizzes x 10 (15 minutes each week) 50%
- Assessment task 2: Written case study assignment on musculoskeletal pathology (2000 words) 20%
- Assessment task 3: Clinical Examination (40 minutes) 30% (Hurdle requirement)

## HSE709 – Exercise Physiology Across the Lifespan

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Clint Miller*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: HSE711 and HSE712*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week – total 11 weeks, 11 x 2 hour laboratories per trimester*

### Content

This unit will apply and further develop foundation knowledge of clinical exercise testing and prescription for unique and emerging population groups in AEP practice. The aim of this unit is to develop the skills and knowledge required to adapt clinical practice approaches in the occupational environment, and additionally, the use of clinical exercise in a range of conditions experienced throughout remaining key life stages which include paediatrics, pregnancy, menopause, arthritis, osteoporosis, sarcopenia, and geriatrics. This unit aims to provide students with a theoretical knowledge of these key areas, and an opportunity to apply this knowledge and competently in AEP practice.

### Assessment

- Assessment task 1: Weekly in class quizzes (15–20 minutes each) 40%
- Assessment task 2: Group assignment: Solving clinical challenges using innovative approaches (3000–3500 words) 30%
- Assessment task 3: Develop a comprehensive program manual on targeted pathology (2500 words) 30%

## HSE711 – Pre Clinical Practice 1

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Natalie Saunders*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: Nil*

*Corequisite: HSE070, HSE705 and HSE707*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 2 hour laboratory per week – total 11 weeks*

### Content

This unit provides students with an introduction to the roles and responsibilities of the practising clinical exercise physiologist in the Australian healthcare system. Students will enhance and build upon the skills base of the exercise scientist through a focus on practical skill development. Through development of appropriate clinical decision making with respect to exercise testing and prescription, students will learn to work effectively with patients from typical chronic pathology groups to provide clinical exercise services.

### Assessment

- Assessment task 1: Written report (800 words) 10%
- Assessment task 2: Written assignment (1200 words) 30%
- Assessment task 3: Practical examination (20 minutes) 30%
- Assessment task 4: Examination (1.5 hours) 30%

### Hurdle requirement

Must pass Assessment task 3

## HSE712 – Pre Clinical Practice 2

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Louise Conway*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: HSE711*

*Corequisite: HSE702 and HSE704*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class, 1 x 1 hour seminar, 1 x 2 hour laboratory per week – total 11 weeks*

### Content

This unit provides students with knowledge of the national compensation schemes within the Australian healthcare system in the context of the practising clinical exercise physiologist. Students will develop their understanding of appropriate ethical and professional behaviour for exercise physiologists. The unit also provides students with the opportunity to learn to work with a patient base within a controlled environment from all the stages of an exercise intervention (the initial referral, assessment, design, monitoring, modification and progression). Upon completion of this unit, students will be well placed to work effectively in a clinical exercise environment.

### Assessment

- Assessment task 1: Written assignment (2000 words) 40%
- Assessment task 2: Examination (1.5 hours) 30%
- Assessment task 3: Presentation (45 minutes) 30%

### Hurdle requirement

Must pass Assessment task 3

## HSE714 – Clinical Practicum 1

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rebecca Turnbull*

*Trimester 3 Unit Chair: Rebecca Turnbull*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: All of HSE703, HSE705, HSE707 and HSE711*

*Corequisite: All of HSE702, HSE704 HSE712*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar for 6 weeks per trimester. External practicum hours allocated via student practicum agreement – minimum 80 hours*

### Content

This unit will provide students with an opportunity to undertake a minimum of 80 hours of clinical exercise physiology practicum experience. Each student's practicum experience will be supervised by an Exercise and Sport Science Australia (ESSA) accredited Exercise Physiologist, or other qualified professional. These practicum experiences are intended to provide students with opportunities to develop skills and knowledge in clinical exercise physiology to enhance their professional development and vocation potential.

*Note: Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

### Assessment

- Assessment task 1: Critical Analysis (1500 words) 40%
- Assessment task 2: Team Based Learning, Individual Readiness Assurance Test (iRAT) and Team Readiness Assurance Tests (tRAT) x 3 30%
- Assessment task 3: Job readiness (1200 words) 30%

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Travel commitment

Because of the need for professional practice at external sites, all students undertaking the course should be aware of the required need for travel to placement sites. The requirement to travel is very real and travel time up to 2 hours each way is considered normal. It is also likely that you will have to attend at least one rural placement during the course.

## HSE715 – Clinical Practicum 2

*Enrolment modes: Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Rebecca Turnbull*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: All of HSE702, HSE703, HSE704, HSE705, HSE707, HSE711, HSE712*

*Corequisite: HSE714*

*Incompatible with: Nil*

*Scheduled learning activities – campus: No face to face campus contact hours. Deakin and External practicum hours allocated via student practicum agreement – minimum 140 hours.*

## Content

This unit will provide students with an opportunity to undertake a minimum of 140 hours of fieldwork experience within clinical exercise physiology scope of practice. Each student's fieldwork experience will be supervised by Exercise and Sport Science Australia (ESSA) accredited exercise physiologist, a university-trained allied health professional (e.g. registered physiotherapist) or an exercise scientist with appropriate experience working with clients with chronic disease. Field experiences are intended to provide students with opportunities to develop skills and knowledge in clinical exercise physiology to enhance their professional development and vocation potential.

*Note: Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Client Handover Plan (includes case conference video and peer review x 2) (1500 words) 40%
- Assessment task 2: Reflective piece on critical learning moment (1000 words) 30%
- Assessment task 3: Review of sample Cover Letter and Curriculum Vitae (1000 words) 30%

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## Travel commitment

Because of the need for professional practice at external sites, all students undertaking the course should be aware of the required need for travel to placement sites. The requirement to travel is very real and travel time up to 2 hours each way is considered normal. It is also likely that you will have to attend at least one rural placement during the course.

## HSE717 – Clinical Practicum 3

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Turnbull*

*Trimester 3 Unit Chair: Rebecca Turnbull*

*Cohort rule: This unit is only available to students enrolled in H743 Master of Clinical Exercise Physiology*

*Prerequisite: HSE714 and HSE715*

*Corequisite: One of HSE706, HSE709, HSE715*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Contact hours: 6 x 2 hour seminars plus practicum experience*

## Content

This unit will provide students with an opportunity to undertake a fieldwork experience within clinical exercise physiology scope of practice. Each student's fieldwork experience will be supervised by Exercise and Sport Science Australia (ESSA) accredited exercise physiologist, a university-trained allied health professional (e.g. registered physiotherapist) or an Exercise Scientist with appropriate experience working with clients with chronic disease. Field experiences are intended to provide students with opportunities to develop skills and knowledge in clinical exercise physiology to enhance their professional development and vocation potential.

*Note: Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please*

*email the School of Exercise and Nutrition Sciences Professional Placement Office as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: LinkedIn Profile (500 words) 10%
- Assessment task 2: Mock Job Interview (20 minutes) 30%
- Assessment task 3: Objective Structured Clinical Examination (OSCE) (90 minutes) 60%

## Hurdle requirement

- Objective Structured Clinical Examination (OSCE) – as above
- Portfolio – collation of all relevant documentation required for ESSA EP accreditation

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## Travel commitment

Because of the need for professional practice at external sites, all students undertaking the course should be aware of the required need for travel to placement sites. The requirement to travel is very real and travel time up to 2 hours each way is considered normal. It is also likely that you will have to attend at least one rural placement during the course.

## HSE720 – Athlete and Program Development in High Performance Sport

*Enrolment modes: Trimester 1: Cloud (online) with significant on campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kris Hinck*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit introduces students to principles of athlete development and performance management, including concepts related to athlete profiling and benchmarking, performance pathways, individualised support, coaching and training prescription, and athlete support services. The role of sport science and its respective disciplines will be evaluated in the context of what is required in a broad, holistic and integrated high performance program. Students will be challenged to develop their own sport science strategies and to identify the necessary components and processes required to implement a high performance program.

### Assessment

- Assessment task 1: Written assignment (approximately 1500 words) 30%
- Assessment task 2: Portfolio of unit tasks 30%
- Assessment task 3: Written assignment (approximately 1500 words) and oral presentation 40%

## HSE721 – High Performance Management in Sport

*Enrolment modes: Trimester 3: Cloud (online) significant on campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Kris Hinck*

*Cohort rule: This unit is only available to students enrolled in H707 Master of Applied Sport Science*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities plus a 5 day scheduled on-campus intensive in Geelong.*

### Content

This unit provides students with an understanding of what is required to work in a high performance environment and the necessary skills essential for individual, program and team success. Foundation content will focus on ways of learning, thinking, behaving and influencing. Principles of high performance sport will be considered along with concepts related to working within multi- and inter-disciplinary teams, role clarity, culture development, evidence based decision-making, evaluation, continuous improvement, leadership and management. Case studies and problem based learning approaches will be used to allow students to understand and apply when, how and why sport science and their own personal contribution can have a performance impact. The knowledge and competencies of the sport scientist and high performance manager in sport, and how to become professionally accredited with Exercise and Sport Science Australia will also be addressed.

### Assessment

- Assessment task 1: Portfolio of unit tasks, 20%
- Assessment task 2: Written assignment (group project; ~2000 words each), 40%
- Assessment task 3: Written assignment (~2000 words), 40%

## HSE722 – The Scientific Process for Sports Scientists

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Peter Kremer*

*Trimester 2 Unit Chair: Peter Kremer*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

The scientific process is fundamental to sports scientists' everyday work practice. To investigate questions that are of interest to coaches, athletes; and managers; sport scientists continually conduct research by reviewing the scientific literature or designing tests and evaluations. In this unit, students will undertake learning activities that focus on each stage of this scientific process, using contexts and examples specific to sports science. Modules will be delivered in a flipped (online) classroom mode with both formative and summative assessment tasks. Students will be provided with learning materials (e.g., selected readings, narrated lectures, videos) prior to online activities where their knowledge can be formatively assessed and feedback (by the unit team and other students) can be provided. Summative assessments will challenge students' ability to apply their knowledge and communicate their understanding in an authentic manner for selected audiences, such as athletes, coaches, fellow sports scientists, or managers. The unit will also develop students' ability to use a variety of communication media common for sports scientists, such as brief written reports and oral presentations.

### Assessment

- Assessment task 1: Research paper critique and reflection (1500 words) 25%
- Assessment task 2: Literature review infographic 25%
- Assessment task 3: Written methodology, incorporating peer feedback (1800 words) 25%
- Assessment task 4: Narrated presentation, written reference section, and reflection (15 minute recorded presentation, plus 300 word written component) 25%

## Prescribed texts

Jones, I. (2015). Research methods for sport studies (3rd ed.). New York, NY: Routledge.

This book will be available via the Deakin library catalogue in time for the start of trimester.

## HSE723 – Data Analysis and Program Evaluation for Sports Scientists

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Peter Kremer*

*Prerequisite: HSE722*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

Accurate analysis of data is fundamental to sports scientists' everyday work practice. High performance managers and senior sports scientists are involved in evaluating existing sports science programs. In this unit, students will undertake learning activities that will develop and assess their ability to manage data; conduct analyses appropriate for data type and collection method; interpret their analyses and communicate the results to fellow sports scientists. Students will also learn how to evaluate an existing sports science program and communicate their results to a high-performance manager. Students will be provided with learning materials (e.g., selected readings, videos, existing sports science data sets) prior to online activities where their knowledge can be formatively assessed and feedback can be provided.

Summative assessments will challenge students' ability to apply their knowledge and communicate their understanding in authentic contexts to fellow sports scientists, coaches or high performance managers.

### Assessment

- Assessment task 1: Program evaluation (Qualitative) (1500 words) 35%
- Assessment task 2: Statistical package comparison (750 words) 10%
- Assessment task 3: Quantitative case study (1000 words) 20%
- Assessment task 4: Program evaluation (Quantitative) (1500 words) 35%

## HSE724 – Strength and Conditioning Methods for Athletes

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Liv Knowles*

*Prerequisite: Nil*

*Corequisite: HSE070*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit will provide students with the theoretical principles and practical skills required to physically prepare athletes for competition. This unit will include implementing methods for developing anatomical (neural) adaptation, muscular hypertrophy, strength and power in addition to aerobic and anaerobic power. Specific methods will include speed and agility, plyometrics, weightlifting and power lifting movement variations, methods specific for optimising strength and power, and interval training. Additionally, this unit will examine methods of periodising and tapering training as part of a long-term training development program. On completion of this unit, students will be able to make evidence-based decisions regarding an array of factors involved in delivering a highly effective conditioning program in their professional practice. Performing weightlifting and power lifting movements will be part of this unit. Components of this unit are included to address some of the requirements for accreditation with the Australian Strength and Conditioning Association (ASCA).

*Note: ^Students enrol in Cloud (online) however there are significant on campus requirements.*

*Students enrolled in this unit will also be required to attend on campus activities delivered as a one-week intensive workshop on the Waurin Ponds Campus, running 28 May 28 to 1 June inclusive.*

### Assessment

- Assessment task 1: Periodised Annual Plan, Part 1: team introduction and overview (800 words) 10%
- Assessment task 2: Periodised Annual Plan, Part 2: program body + justification (~20 tables and figures + 1500 words) 30%
- Assessment task 3: Practical skills performance (intensive) 20%
- Assessment task 4: Learning module portfolio (2500 words) 40%

### Hurdle requirement

Attendance at a 1 week on campus intensive at Waurin Ponds (Geelong) scheduled towards end of trimester.

## HSE725 – Factors Influencing Training Design for Sport

*Enrolment modes: Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Eric Drinkwater*

*Prerequisite: Nil*

*Corequisite: HSE070*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

There are many factors that influence the design of an athlete's training plan. This unit will address the wide range of factors that a coach needs to consider. Topics will include nutrition and recovery strategies, understanding the rehabilitation process of an injured athlete, fitness testing, legal and ethical issues including supplement strategies that work within the Australian Sports Anti-Doping Authority (ASADA), and facility design. On completion of this unit, students will be able to use the evidence around an array of factors that must be considered in a conditioning program in their professional practice. Components of this unit are included to address some of the requirements for accreditation with the Australian Strength and Conditioning Association (ASCA).

*Note: ^Students enrol in Cloud (online) however there are significant on campus requirements.*

## Assessment

- Assessment task 1: Written assignment (1600 words) 15%
- Assessment task 2: Coaching session (20 minutes) and coaching notes 15%
- Assessment task 3: Oral coaching presentation (20 minutes) and presentation outlines 30%
- Assessment task 4: Learning module portfolio 40%

## Hurdle requirement

Attendance at a 1 week on campus intensive at Waurn Ponds (Geelong) scheduled towards end of trimester.

## Prescribed texts

Haff, G. G. and Triplett, N. T., Essentials of Strength Training and Conditioning, (Human Kinetics, 2016)

On completion of this unit, students will be able to complete an accurate notational analysis of a sport performance, interpret the results and create feedback that would be considered to be useful to a coach.

## Assessment

- Assessment task 1: Written assignment (1000 words) 15%
- Assessment task 2: Video recordings (2 x 5 minutes each) 10%
- Assessment task 3: Written assignment (1500 words) 25%
- Assessment task 4: Written assignment (2500 words) 50%

## Prescribed texts

Hughes and Franks, Essentials of Performance Analysis in Sport, (Routledge, 2nd edn. 2015)

This book is available electronically via the Deakin library catalogue.

# HSE726 – Sport Performance Analysis

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dan Dwyer*

*Trimester 3 Unit Chair: Dan Dwyer*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars.*

*Students are encouraged to attend and participate in practical classes at the Waurn Ponds campus on the scheduled day/s during the trimester intensive week.*

## Content

This unit introduces students to the fundamental knowledge and skills of a performance analyst. Students will learn about different types of performance analysis, the role of the performance analyst and the most important aspects of the performance analysis process. Students will be supported to acquire the essential practical skills related to the use of video technology and performance analysis software. Students will also learn how to identify indicators of performance and how to effectively provide feedback to athletes and coaches.

# HSE727 – Advanced Sport Performance Analysis

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Lyndell Bruce*

*Prerequisite: HSE726*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This unit builds on the knowledge and skills taught in the introductory unit, HSE726 Sport Performance Analysis, by developing a deeper understanding of the Performance Analysis process. Students will learn how to interrogate databases of performance data, using data visualisation and statistical analysis methods. This unit also explores the technology and methods used for time-motion analysis and explores advances in Performance Analysis technology. Finally, students are provided with the opportunity to integrate all of their Performance Analysis knowledge in a capstone assessment, by designing a comprehensive plan for the implementation of a Performance Analysis service.

## Assessment

- Assessment task 1: Written assignment (1500 words) 30%
- Assessment task 2: Written assignment (1500 words) 30%
- Assessment task 3: Written assignment (2000 words) 40%

## Prescribed texts

Essentials of Performance Analysis in Sport, Hughes & Franks, 2nd Ed. 2015. Routledge.

Research Methods in Sport Performance Analysis, Peter O'Donoghue, 1st Ed. 2010, Routledge.

These books are available electronically via the Deakin library catalogue

Please note:

- 1) *HSE728 Applied Sport Science Project – Part 1 can be selected as a stand-alone unit; it is not essential to complete HSE729 Applied Sport Science Project – Part 2.*
- 2) *Whilst every effort will be made to align the project areas completed in HSE728 and HSE729, on occasion this may not be possible.*

## Assessment

- Assessment task 1: Literature Search Plan (approximately 5 pages) 20%
- Assessment task 2: Detailed literature review suitable for publication as a journal article (5000 words) 50%
- Assessment task 3: EITHER a brief research proposal OR brief 'recommendations for practitioners' (1500 words) 15%
- Assessment task 4: Ethics case study (1500 words) 15%

## HSE728 – Applied Sport Science Project – Part 1

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Brad Aisbett*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students will be invited to attend three, 1 hour online collaborative sessions across the trimester*

## Content

In Applied Sport Science Project – Part 1, students will develop and apply their research skills to a specific research area within applied sport science. Students will learn specific skills essential for conducting systematic review and meta-analyses. They will work with a supervisory team to produce a critical review of the literature that can be published in a journal relevant to their career path. Students will then complete EITHER a brief research proposal (for students interested in completing HSE729) OR brief recommendations for practitioners' (for students interested in completing HSE730). All students will be introduced to the ethical conduct of sport science research and practice.

## HSE729 – Applied Sport Science Project – Part 2

*Enrolment modes: Trimester 3: Cloud (online).*

*Students enrol in Cloud (online) however there are significant on campus requirements.*

*EFTSL value: 0.250*

*Trimester 3 Unit Chair: Dan Dwyer*

*Cohort rule: This unit is only available to students enrolled in H707 Master of Applied Sport Science*

*Prerequisite: HSE728*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This unit provides students with an opportunity to complete a research project that was designed in HSE728 Applied Sport Science Project – Part 1. Students will learn about the research process by; implementing good project management practices, presenting their proposal and implementing feedback, obtaining ethical approval (where required), collecting data (where required) and communicating their results, analysis and conclusions in a standard scientific form of communication. Students will work closely with their supervisors throughout the trimester.

## Assessment

- Assessment task 1: Research ethics approval or exemption
- Assessment task 2: Research proposal presentation
- Assessment task 3: Research dissertation (10,000 words) 100%

## Hurdle requirement

Must pass Assessment tasks 1 and 2

## Prescribed texts

Thomas J, Nelson J, Silverman S, Research Methods in Physical Activity, (Human Kinetics, 7th edn, 2015)

# HSE730 – Professional Practice

*Enrolment modes: Trimester 3: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 3 Unit Chair: Kris Hinck*

*Cohort rule: This unit is only available to students enrolled in H707 Master of Applied Sport Science*

*Prerequisite: All of HSE720, HSE724, HSE726, HSE727 and HSE728*

*Corequisite: HSE721*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

Students will undertake a placement experience within a sport setting. Students existing knowledge from the course will be extended within context of their chosen profession; such as performance analysis, strength and conditioning and high performance management or any combination. This unit will encourage students to consider their career planning through a series of industry, self and professional learning exercises that endeavour to guide a career road map and their professional direction. Students will be encouraged and directed to career platforms to connect with industry, commence their own professional profiling and research career paths. Through exploring job description specifics, students will consider generic/transferable-skills, professional development, contributions to teams and achieving high performance in the workplace. Throughout the 220 hours of placement the student's learning will be immediately applicable to their chosen setting within the context of sport and performance.

*Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Self-analysis written report (1500 words) 30%
- Assessment task 2: Workplace learning written plan, video submission (3–5 minutes) and logbook (1500 words) 45%
- Assessment task 3: Career planning report (1500 words), interview and online presentation (12 minutes) 25%

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## HSH105 – Understanding Families and Health

*Enrolment modes: Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shane McIver*

*Prerequisite: Nil*

*Corequisite: Desirable to be taking or have completed HBS107*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

### Content

This unit is designed to introduce students to the study of families, society and health by using an ecological perspective to consider a number of elements of family life. Concepts of 'family' are examined and trends, changes and patterns in family composition and behaviour are reviewed. Examples of elements of family life to be considered include: family diversity, families and work; divorce and repartnering; disability. The role of the family as a setting for public health will be explored within each of the elements of study.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

This is the first unit in the Family, Society and Health major sequence in H300 Bachelor of Health Sciences (unit set code MJ-H000002).

### Assessment

- Assessment task 1: Essay (2000 words) 50%
- Assessment task 2: Small group presentation (equivalent to 1000 words) 30%
- Assessment task 3: Cloud (online) test (20 questions) 20%

## HSH111 – Introduction to Public Health and Health Promotion

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrnambool, Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Natalie Hakman*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week in addition to weekly cloud content*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

### Content

This unit is core to the Bachelor of Public Health and Health Promotion, the combined courses with Commerce and Nursing, and for the Health Promotion major pathway in the Bachelor of Health Sciences. The unit is also offered as an elective to students across the University. Through this unit, students will be introduced to the theories, models and frameworks used in both public health and health promotion; explore the evolution of public health and health promotion; examine case studies highlighting responses to public health and health promotion issues; and explore the relationship between health, policy development, and the health care system.

### Assessment

- Assessment Task 1: Reflective Journal (1000 words) 20%
- Assessment Task 2: Written Report (1500 words) 30%
- Assessment Task 3: Examination (2 hours) 50%

## HSH112 – Local and Global Environments for Health

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Justin Lawson*

*Prerequisite: Desirable to have completed HBS107*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

### Content

This unit will introduce key concepts around environmental health and will explore the relationship between the natural, built, social, economic and political environments and human health. This unit will also introduce the concepts of sustainable development, ecosystem health and environmental justice. The content of the unit will be framed within a public health and health promotion context.

This unit comprises the study of: knowledge of past, present and emergent environmental health concerns, including infectious disease, population growth, urbanisation, global warming and drought; environments for health: the positive influences of the natural/physical, built, social, economic and political environments on human health; the role of the natural/physical, built, social, economic and political environments in human health threats; an appreciation of the different space components of environmental health: individual, neighbourhood, institutional, national, regional, global and intergenerational; human impacts on the environment, including Indigenous cultures, industrialised countries, developing countries; sustainable development and environmental justice; critical reflection on the changing context of environments and health over time.

### Assessment

- Assessment task 1: Reflective learning journals (2000 words total) 40%
- Assessment task 2: Major group presentation (10 minutes) and written report (1500 words per group) 40%
- Assessment task 3: Online test (30 minutes) 20%

## HSH113 – Social Perspectives on Population Health

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Hayley McKenzie*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week and learning experiences via CloudDeakin*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 1 x weekly scheduled online seminars (recordings provided). Students must give oral presentation during live blackboard collaborate session at a scheduled time during weeks 7–9.*

### Content

This unit takes a sociological perspective to the examination of health issues and their determinants. It focuses on the development of knowledge regarding social theory and its applicability to health and wellbeing at an individual, community and population level.

### Assessment

- Assessment task 1: 3 short answer questions (1200 words in total) 30%
- Assessment task 2: Presentation 20%
- Assessment task 3: Written assessment (2000 words) 50%

## HSH201 – Planning and Evaluation 1

*Enrolment modes: Trimester 1: Burwood (Melbourne), CBD\*, Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Greer Lamaro-Haintz*

*Cohort rule: Unit only available to students enrolled in courses H313, D381 and D388*

*Prerequisite: HBS107 or HSH111*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week only*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 1 hour class per week (recording provided) and 1 x 2 hour online seminar per week*

### Content

This unit will help students to understand the context of community health issues and needs, and apply the range of principles, processes and strategies to develop health promotion programs to address those issues and needs.

The unit is comprised of three modules. Module 1 explores the discipline of health promotion, the context of health promotion practice, and the need for effective planning in health promotion. It introduces the key frameworks and tools that will be applied for developing a health promotion program. Module 2 develops applied understanding of how to identify and understand community health needs as the first step in planning an effective, relevant and targeted health promotion program. Module 3 builds on modules 1 and 2 to design a realistic health promotion program to address the needs identified in Module 2, using the planning principles and frameworks introduced in Module 1.

The unit provides the basis for HSH218 Planning and Evaluation 2, which examines and practices how community based health promotion are evaluated.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Community health needs assessment (1500 words) – visual mind map 10% and written plan 40% – total 50%
- Assessment task 2: Community health program plan – group presentation equivalent to 700 words 15%, group written report 1800 words 35% – total 50%

## HSH205 – Epidemiology and Biostatistics 1

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shane Kavanagh*

*Prerequisite: One unit from HBS108, HNN108, SLE101, SLE115*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Mixed cloud (online) and face to face, equivalent to 3 hours per week*

### Content

This unit aims to provide students with an understanding of the main concepts and methods of epidemiology and biostatistics within the context of public health and health promotion. It will assist students to understand, apply and interpret these methods and to critically appraise the health research literature.

### Assessment

- Assessment task 1: Short answer written assignment (equivalent to 1000 words) 30%
- Assessment task 2: Cloud (online) multiple choice test (equivalent to 1000 words) 20%
- Assessment task 3: Examination (2 hours) 50%

### Prescribed texts

Carneiro, I. et al (2011). Introduction to Epidemiology, 2nd edition. McGraw Hill, Open University Press.

## HSH206 – Human Development and Healthy Families

*Enrolment modes: Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shane McIver*

*Prerequisite: Nil*

*Corequisite: Desirable to be taking or have completed HSH105*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

## Content

This unit introduces students to human growth and development in the context of family, household and community environments. It explores factors affecting growth and development and provides an overview of biosocial, physical, cognitive and psychosocial development across the lifespan. The unit is underpinned by an ecological perspective and explores the interactions and interdependencies between individuals, families and households, the community, and society as they impact on development. Additionally, this unit considers the many issues which have the potential to enhance or inhibit human development across the lifespan.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

This unit is part of the Family, Society and Health major sequence in H300 Bachelor of Health Sciences (unit set code MJ-H000002).

## Assessment

- Assessment task 1: Reflective Practice Journal (2000 words) 40%
- Assessment task 2: Group assignment (equivalent to 1500 words) 40%
- Assessment task 3: Cloud (online) test (20 questions) 20%

## Prescribed texts

A digital and interactive resource will serve as the prescribed text for this unit and details will be discussed with students at the beginning of the trimester.

# HSH207 – Socio-Economic Status and Health

*Enrolment modes: Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*Previously coded as: HSH106*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Elyse Warner*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar and learning experiences via CloudDeakin*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

## Content

One of the critical determinants of health in society is socioeconomic status (SES). This unit will explore the link between SES and health from individual and population perspectives. It will explore the way social processes interact with health and consider the latest research on the social gradient. Issues such as gender, poverty and affluence, social exclusion, inequalities in health, and inequity will be considered against issues across the life course (access and expectation) as well as the role of education and information. The role of political and social institutions (including the household) in creating supportive environments will be considered.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

This unit is part of the Family, Society and Health major sequence in H300 Bachelor of Health Sciences (unit set code MJ-H000002).

## Assessment

- Assessment task 1: Case study questions (1600 words in total) 40%
- Assessment task 2: Report (1600 words) 40%
- Assessment task 3: Group presentation (15 minutes) 20%

## HSH208 – Health Communication

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Natalie Hakman*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour weekly class delivered online, 1 x 2 hour weekly campus seminar*

*Scheduled learning activities – cloud (online): 1 x 1 hour weekly class delivered online, 1 x 2 hour weekly online seminar*

### Content

This unit examines theoretical and practical aspects of health communication and marketing such as audience segmentation, message development and delivery, approaches to mass media, development of visual and written materials, use of shock tactics. Students will critically examine controversial and sensitive campaigns, as well as 'health promotion disasters'. Students will explore social media as a vehicle for designing and implementing campaigns, presentations and messages. Topics include: functional and strategic communication skills and strategies; communication and behaviour change theories; understanding and working with the media; developing media releases; social media and health; social marketing; conducting controversial or sensitive campaigns; conducting low budget campaigns in the community; cultural appropriateness and sensitivity; working with CALD groups; global contexts; engaging the community; the role of communication strategies (e.g. advocacy, networking, building partnerships and building capacity) in promoting health.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Media package (1000 words) 25%
- Assessment task 2: Oral presentation 25%
- Assessment Task 3: Communications strategy (2000 words) 50%

## HSH211 – Australian Health Care System

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Elyse Warner*

*Trimester 3 Unit Chair: Sonia Nuttman*

*Prerequisite: HBS107*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including fortnightly 2 hour scheduled online seminars*

### Content

This unit will explore the Australian health care delivery and funding systems and policies, and its core aims of equity, quality, efficiency and acceptability. Students learn about the health status of the Australian population, the health workforce, levels of health care from primary and community care to secondary and tertiary care and the systems and sectors that manage them. The roles of the States and Commonwealth in the funding and provision of those services is covered, as well as the roles of the public and private sectors, challenges in the provision of health and social care workforce, and current health policy debates.

### Assessment

- Assessment task 1: Critical analysis exercise – Case Study Part 1 (1500 words) 40%
- Assessment task 2: Case Study – Part 2 (1500 words) 40%
- Assessment task 3: Online test (20%)

### Prescribed texts

Willis, E, Reynolds, L and Keleher, H, Understanding the Australian Health Care System, (Elsevier, 3rd edn, 2016)

*NOTE: This text is available as an e-book through Deakin Library. There are also limited copies available for loan. You do not need to purchase this textbook through the DUSA bookshop.*

## HSH212 – Professional Practice

*Enrolment modes: Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rebecca Stockdale*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

### Content

This unit assists students to develop a range of health promotion professional practice skills necessary for effective health promotion action on the range of determinants of health.

The unit consists of two modules.

- Module 1 covers community and stakeholder engagement and partnerships. It also explores career planning in relation to health promotion and public health.
- Module 2 covers project management and grant writing. Students will focus their attention on the participation and inclusion of vulnerable population groups within Australia, in a community health setting.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Field visit, audio visual reflection and report 50%
- Assessment task 2: Grant application (2000 words) 50%

## HSH216 – Epidemiology and Biostatistics 2

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shane Kavanagh*

*Prerequisite: HSH205*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Mixed cloud (online) and face to face, equivalent to 3 hours per week*

### Content

The purpose of this unit is to introduce students to the basic principles of biostatistics used in public health and health promotion practice. It builds on HSH205 Epidemiology and Biostatistics 1. The main topics covered include understanding, application and interpretation of fundamental biostatistical concepts. Students will also participate in computer practicals to develop their skills and knowledge as well as learn to use statistical software programs to conduct biostatistical analysis of data.

### Assessment

- Assessment task 1: Assignment (1500 words) 40%
- Assessment task 2: Online MCQ test 20%
- Assessment task 3: Assignment (1500 words) 40%

### Recommended texts

Argyrous, G (2011) Statistics for research: With a guide to SPSS, 3rd edition. Sage Publications.

Cronk, BC (2018) How to Use SPSS®, A Step-By-Step Guide to Analysis and Interpretation, 10th Edition. Routledge.

## HSH218 – Planning and Evaluation 2

*Enrolment modes: Trimester 2: Burwood (Melbourne), CBD\*, Warrnambool, Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Natalie Hakman*

*Cohort rule: Unit only available to students enrolled in courses H313, D381 and D388*

*Prerequisite: HSH201*

*Corequisite: Nil*

*Incompatible with: HSH307*

*Scheduled learning activities – campus: Mixed cloud (online) and face to face, equivalent to 3 hours per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

### Content

This unit builds on the knowledge and skills developed through the prerequisite unit Planning and Evaluation 1 (HSH201) and introduces students to the history and evolution of program evaluation in Australia; develops skills in planning for effective evaluation in a variety of settings; contextualises research and evaluation in health promotion; up-skills students in the critical appraisal of evaluation evidence; addresses the often-ignored importance of formative and process evaluation in the field; demonstrates how to plan and conduct complex program evaluation; explores evaluation methods for program replication, dissemination and institutionalisation; and explains how evaluation evidence informs policy and practice.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Annotated bibliography (1000 words) 25%
- Assessment task 2: Critical appraisal (1000 words) 25%
- Assessment task 3: Evaluation proposal (2000 words) 50%

## HSH219 – Population Health: A Research Perspective

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Elyse Warner*

*Prerequisite: HBS108 or HSH205*

*Corequisite: Nil*

*Incompatible with: HSH319*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour online seminar per week*

*All students: Learning resources are available online via the DeakinSync unit site*

### Content

This unit focuses on the common research methods used in population health reinforcing and building upon what students have gained from previous units such as HBS108 Health Information and Data and HSH205 Epidemiology and Biostatistics 1. The aim of this unit is to introduce students to the principles and practices of research in public health and health promotion with a focus on current population health issues using qualitative, quantitative and mixed methods approaches. The unit is designed to equip students with the basic knowledge and skills required to conduct research which addresses population health questions including the development and expression of research aims, questions and hypotheses; the application of appropriate research methods specific to research questions; and the different ways of collecting data in various research settings. Students will learn and apply practical skills in the conduct of population health research in areas such as sampling; the design and conduct of quantitative studies including questionnaire design and piloting; and conducting qualitative studies including interview and focus group discussions, transcription and analysis of qualitative data.

### Assessment

- Assessment task 1: Written assignment (800 word equivalent) 20%
- Assessment task 2: Qualitative research assignment (1800 word equivalent) 45%
- Assessment task 3: Quantitative research assignment (1400 word equivalent) 35%

## HSH302 – Politics, Policy and Health

*Enrolment modes: Trimester 1: Burwood (Melbourne), CBD\*, Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Stockdale*

*Prerequisite: HBS107 or HSH111 and one level 2*

*HSH coded unit*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online independent and collaborative learning activities including 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

### Content

This unit assists students to analyse and appraise all aspects of Australian health policies and processes, and the policy context for health promotion and human services in Australia. The unit investigates different forms of health policy and the political process as it relates to policy making. It explores the impact of ideologies, politics and other major forces on policy making and the skills necessary for the community and groups to develop policy and advocate change. It identifies the major mechanisms for implementing and evaluating health policy. Students will develop skills in describing, investigating, analysing and assessing health policy debate relating to a range of health issues and population groups.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Policy essay (2000 words) 50%
- Assessment task 2: Presentation and report (equivalent to 2000 words) 50%

## HSH303 – Public Health and Health Promotion Practicum

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), CBD, Waurin Ponds (Geelong)*

*Trimester 2: Burwood (Melbourne), CBD, Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Hayley McKenzie*

*Trimester 2 Unit Chair: Greer Lamaro Haintz*

*Cohort rule: Students must be enrolled in H313, D381, or D388*

*Prerequisite: HSH201*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 3 hour seminar (week 1 and week 11); fieldwork x 120 hours (across weeks 1–11 of trimester)*

### Content

This is a core public health-health promotion unit that aims to provide students with an in-depth, working understanding of public health-health promotion principles and approaches in the field. Students are required to undertake a minimum of 120 hours of work experience in a health-related agency. In addition to developing a practical understanding of public health-health promotion, this experience will help students further develop the professional and personal skills required to work in a public health-health promotion role. The practicum component follows one seminar session covering: the expectations of the unit, and overview of project management; and an introduction to workplace organisation and context.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record

Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## Assessment

- Assessment task 1: Practicum plan (1500 words) 30%
- Assessment task 2: Reflective journal (1500 words) 40%
- Assessment task 3: Resume (1000 words) 30%

## Hurdle requirement

Supervisor's report – Pass/Fail

## HSH306 – People, Health and Place

*Enrolment modes: Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Justin Lawson*

*Prerequisite: HBS107 and completion of four level 2 units.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

## Content

This unit will explore the way in which a range of aspects of our physical and social environment affect our health. These will include biophysical environment (access to nature, the effects of pollution), housing (the factors which influence individuals' access to and choice of housing), work and workplaces (strategies aimed at identifying, assessing, and controlling workplace hazards, in particular psychosocial and organisation stressors). This unit will also explore how the physical and social environment affects the health and wellbeing of specific groups in society including migrants, Indigenous Australians, those living with a disability and older people.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

This unit is part of the Family, Society and Health major sequence in H300 Bachelor of Health Sciences (unit set code MJ-H000002).

## Assessment

- Assessment task 1: Essay (1500 words) 30%
- Assessment task 2: Group presentation and summary handout (500 words) 30%
- Assessment task 3: Examination (2 hours) 40%

## HSH313 – Contemporary Health Issues

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrnambool, Wairn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: HSH203*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shane McIver*

*Prerequisite: HBS107 OR HSH111 and four level 2 units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including a scheduled online seminar per week of up to 2 hours' duration*

## Content

This unit explores contemporary health and social issues using a media case study approach. This will include gaining a comprehensive understanding of the role of the media, popular culture and interest groups in addressing a range of health issues. Case studies will be chosen from areas such as mental health, sexuality, gender, drug use, homelessness, disability, youth suicide, family violence, genetic engineering, indigenous health, refugee health, war and terrorism, and environmentalism.

## Assessment

- Assessment task 1: Essay: Critical discussion of a contemporary issue (2000 words) 45%
- Assessment task 2: Essay: Reflective Practice (1500 words) 35%
- Assessment task 3: Online test 20%

## HSH319 – Population Health: A Research Perspective

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Elyse Warner*

*Prerequisite: HBS108 or HSH205*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour online seminar per week*

*All students: Learning resources are available online via CloudDeakin*

### Content

This unit focuses on the common research methods used in population health reinforcing and building upon what students have gained from previous units such as HBS108 Health Information and Data and HSH205 Epidemiology and Biostatistics 1. The aim of this unit is to introduce students to the principles and practices of research in public health and health promotion with a focus on current population health issues using qualitative, quantitative and mixed methods approaches. The unit is designed to equip students with the basic knowledge and skills required to conduct research which addresses population health questions including the development and expression of research aims, questions and hypotheses; the application of appropriate research methods specific to research questions; and the different ways of collecting data in various research settings. Students will learn and apply practical skills in the conduct of population health research in areas such as sampling; the design and conduct of quantitative studies including questionnaire design and piloting; and conducting qualitative studies including interview and focus group discussions, transcription and analysis of qualitative data.

### Assessment

- Assessment task 1: Written assignment (800 word equivalent) 20%
- Assessment task 2: Qualitative research assignment (1800 word equivalent) 45%
- Assessment task 3: Quantitative research assignment (1400 word equivalent) 35%

## HSH322 – Health Sciences Practicum

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Waurn Ponds (Geelong), Warrnambool, Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Waurn Ponds (Geelong), Warrnambool*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Hayley McKenzie*

*Trimester 2 Unit Chair: Greer Lamaro Haintz*

*Cohort rule: Must be enrolled in H300 Bachelor of Health Sciences/Bachelor of Arts and must be enrolled in one of unit sets MJ-H000004 Health Promotion, MJ-H000002 Family, Society and Health, MJ-H000025 Disability and Inclusion, MJ-S000059 Environmental Health, MJ-H000013 Health and Sustainability to enrol in this unit. Students that meet the pre-requisites may self-enrol in this unit.*

*Prerequisite: Must have passed 8 credit points at level 1 and must have passed 8 credit points at level 2 or 3 and must have completed 4 of the units within the eligible majors*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar (Week 1 – Attendance essential to ensure placement allocation), 1 x 3 hour seminar (Week 11); fieldwork x 120 hours (across weeks 1–11 of trimester)*

*Please note there is compulsory on-campus attendance at the 2 x 3 hour seminars (week 1 and week 11) for all students undertaking HSH303/322.*

*Details of the seminar dates are provided in the timetable, on the unit site and emailed to all students.*

### Content

This is an elective unit that aims to provide Bachelor of Health Sciences students enrolled in Health Promotion; Family, Society and Health; Disability and Inclusion; Health and Sustainability; or Environmental Health majors with an in-depth, working understanding of the principles and approaches relevant to their field. Students are required to undertake a minimum of 120 hours of work experience in a relevant agency.

In addition to developing a practical understanding of their major field of study, this experience will help students further develop the professional and personal skills required to work in their sector. The practicum component follows one seminar session covering the expectations of the unit; an overview of project management; and an introduction to workplace organisation and context.

### Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Assessment

- Assessment task 1: Practicum plan (1500 words) 30%
- Assessment task 2: Reflective journal (1500 words) 40%
- Assessment task 3: Resume (equivalent to 1000 words) 30%

### Hurdle requirement

Supervisor's report (summative assessment task 4) – Pass/Fail.

## HSH323 – Program Planning, Management and Evaluation

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrnambool (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Stockdale*

*Prerequisite: HSH211 and HSH219*

*Corequisite: Nil*

*Incompatible with: HSH201 and HSH218*

*Scheduled learning activities – campus: 1 online recorded class and 1 x 2 hour face-to-face seminar per week. Online problem-based exercises via the unit site in DeakinSync.*

*Scheduled learning activities – cloud (online): 1 online recorded class and 1 x 2 hour online seminar per week. Online problem-based exercises via the unit site in DeakinSync.*

### Content

This unit is designed to assist students gain the core skills and knowledge for health sciences program planning, management and evaluation. The core elements of program management will be covered, including how to develop a program rationale (needs assessment) for program development and management, and an evaluation design to measure change and outcomes, as well as the fundamental elements of applying for funding to support the proposed implementation of the program. Students will learn about the conceptual bases of program logic, and the techniques that guide planning and evaluation. Case studies, group work, planning tools and evaluations of different types of health sector programs will be used to develop practical problem-solving skills.

### Assessment

- Assessment task 1: Needs assessment plan (1200 words) 35%
- Assessment task 2: Funding pitch (oral presentation) 15%
- Assessment task 3: Program and evaluation plan (funding submission) (1800 words) 50%

## HSH324 – Integrated Learning for Practice

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Claire Henderson-Wilson*

*Cohort rule: Students must be enrolled in D391, H300*

*Prerequisite: HSH219 and HSH323*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 2 hour fortnightly seminars*

### Content

Students in the Bachelor of Health Science complete this 'capstone' unit, which is designed to assess course outcomes and graduate attributes, at the end of their course. In a small multidisciplinary team, students undertake an applied problem-based project for a client who may be real or imagined. The unit requires students to integrate and synthesise prior knowledge and learning between the Bachelor of Health Science core sequence and their majors, to connect and integrate their learning for use in the real world. They are supported in this by learning about project management, team work and professional communication, including report writing. Projects require self-management, teamwork and independence as learners. The capstone is designed to enhance graduates' university-to-work transition needs (or undergraduate-to-higher-degree needs). The final assessment requires students to produce explicit evidence of their graduate capabilities.

### Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking

their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Assessment

- Assessment task 1: Individual task: Project Proposal/Brief (1000 words) 25%
- Assessment task 2: Individual task: tailoring a health job application – Cover Letter (500 words) and Short video interview: (6 minutes, equivalent to 500 words) 25%
- Assessment task 3: Group task: report on 'product' completed by the team (2000 words) 50%

### Hurdle requirement

Submission of group 'product' and group statement of contribution – ungraded

## HSH340 – Health in Action: Planning for Sustainable Change

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Claire Henderson-Wilson*

*Prerequisite: Desirable to have completed one Level 2 HSH unit*

*Corequisite: Nil*

*Incompatible with: HSH740*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

### Content

This unit is the final in the 'Health and Sustainability' major of the Bachelor of Health Sciences and focuses on the actions that can be taken to create sustainable and healthy change. Students will explore topics such as: systems thinking and social practices theory; interrelationships between the biophysical environment, environmental and urban planning legislation; policy and planning systems; inter-sectoral collaboration and their links to health and wellbeing.

### Assessment

- Assessment task 1: Group assignment (1750 words) 40%
- Assessment task 2: Written individual assignment (1500 words) 40%
- Assessment task 3: Career-related assignment (750 words) 20%

## HSH360 – International Perspectives in Health and Social Development

*Enrolment modes: Trimester 3: Study tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Shane Kavanagh*

*Cohort rule: Must be enrolled in one of courses A300, A301, A326, D388, D391, H300, H313, H326, H330, H355, S398*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSH760*

*Scheduled learning activities – campus: 2 x 2 hour*

*Blackboard Collaborate, 1 x 1 full day seminar, study tour of approximately two weeks*

### Content

This unit provides second and third year students with the opportunity to learn about the context of promoting and supporting health from an international perspective. The unit will be conducted in the form of a study tour of another country and is designed to provide students with the opportunity to enhance their understanding of cross-cultural health and society. The study tour will consist of a range of activities designed to link students with policy makers, health care workers, educators, and health agencies in the host country, and to reflect on their own values and approaches in relation to health and social development.

*Note: Self-enrolment is not possible. Students will be selected by the unit team based on a formal application and interview process.*

### Assessment

- Assessment task 1a: Pre-departure oral presentation (10 minutes) 30%
- Assessment task 1b: Report – written summary of oral presentation (1000 words) 20%
- Assessment task 2: Participation and engagement in tour activities and regular group debriefing 10% pass/fail
- Assessment task 3: Policy Brief on health issue (2500 words) 40%

## HSH401 – Developing Research Skills

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Lisa Barnett*

*Cohort rule: Only available to students enrolled in Faculty of Health Honours courses*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSE401*

*Scheduled learning activities – campus: A number of workshops will be held throughout the trimester*

### Content

This Honours unit will complement the work of research supervisors by teaching and developing selected skills which are important in research and advantageous in careers other than research. Topics to be addressed include effective written and verbal communication skills, the presentation and defence of a research proposal, the preparation of a written research proposal, and the writing of a literature review and the writing of a draft publication.

### Assessment

- Assessment task 1: Literature review (3500 words) 50%
- Assessment task 2: Research proposal (2000 words) 30%
- Assessment task 3: Draft publication (1500 words) 20%

## HSH402 – Honours Research Project

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 2 Unit Chair: Lisa Barnett*

*Cohort rule: Only available to students enrolled in Faculty of Health Honours courses*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSE402*

## Content

The range of topics is diverse. Students will be required to select a topic and undertake original research on this topic with the guidance of a supervisor.

## Assessment

- Assessment task 1: Final oral presentation 10%
- Assessment task 2: Thesis (12,000 words) 70%
- Assessment task 3: Draft publication 20%

# HSH701 – Principles and Practice of Public Health

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Berni Murphy*

*Campus contact: CBD: Wendy Anders*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 hours per week comprising 1 hour weekly class (recorded and accessible online) and 2 hour weekly seminar.*

*Scheduled learning activities – cloud (online): 3 hours per week comprising 1 hour weekly class (recorded and accessible online) and 2 hour weekly online seminar*

## Content

Through this unit, students are provided with an integrated overview of the ways in which different theories and disciplinary perspectives have informed public health principles and practices both in the past and present. The unit provides the foundations for a contextual understanding of the specific methods of public health research, policy development and program planning and implementation. Principles and Practice of Public Health is a 'glue' unit for the study of public health, drawing linkages between areas that may at first sight appear quite disparate. This unit aims to provide students with an overview of public health as an organised global and local effort to promote and protect the health of the public. Links are drawn between the past and present to provide the foundations for a contextual understanding of the specific methods of public health practice and policy development. Students are encouraged to position themselves within public health debates.

This unit will cover: historical foundations of public health; determinants of the health and illness of populations; health data and health surveillance; health protection: communicable disease control and environmental health; health promotion; evidence based practice in public health; ethics, human rights and public health; health of Indigenous Australians; global issues in public health; and international health.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Group presentation 30%
- Assessment task 2: Major paper (2500 words) 50%
- Assessment task 3: MCQs online quiz 20%

## Prescribed texts

Liamputtong, P. (Ed.). (2019). Public Health: Local and Global Perspectives. Cambridge: Cambridge University Press

# HSH702 – Contemporary Health Issues and Policies

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Matthew Dunn*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week (11 seminars)*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour online seminar per week*

## Content

This unit is a core unit for the Master of Public Health, Master of Health Promotion, and Master of Health and Human Services Management, and is also an elective unit for a range of courses offered at the University. This unit exposes students to the policy process in relation to health, and the impact of social determinants of health on health policy. Through this unit, students will be introduced to theories and models of the policy process; explore how the political process impacts upon policy development and vice versa; develop tools to analyse policy; and identify and apply the skills necessary for policy advocacy.

Contemporary health issues, both locally and globally, are drawn upon to assist students in developing skills to describe, investigate, analyse, and assess health policy.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

H756, H757 and H759 students are advised to have successfully completed at least 4 postgraduate units before enrolling in this unit.

## Assessment

- Assessment task 1: Essay (2500 words) 50%
- Assessment task 2: Essay (2500 words) 50%

## HSH703 – Health Promotion

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: CBD\* only*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Teresa Capetola*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: All students: Weekly learning resources are available online via the Unit site in DeakinSync. In addition students are expected to attend 11 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 11 x 2 hour online seminars per trimester*

## Content

This unit aims to provide an understanding of health promotion concepts and approaches as they relate to contemporary health issues in Australia and internationally. The unit is designed to assist students to: appreciate the key developments in Australia and internationally that have contributed to current understandings of health, its determinants and health promotion practice; examine the range of theoretical and practical health promotion intervention frameworks; become familiar with the information and skills required for the development of evidence-based health promotion programs; and describe and form opinions on dilemmas and difficulties in health promotion practice.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Assignment 1 (2000 words) 40%
- Assessment task 2: Assignment 2 (3000 words) 60%

## HSH704 – Health Communication

*Enrolment modes: Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Berni Murphy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 8 x 2 hour seminars on campus, plus online independent and collaborative learning activities*

*Scheduled learning activities – cloud (online): 8 x 2 hour online seminars, plus online independent and collaborative learning activities*

## Content

Topics include:

- Communication and behaviour change concepts, models and theories
- Functional and strategic communication
- Working with the media
- Social media and health
- Social marketing campaigns
- Health education and empowerment
- Communication in a global context
- Engaging communities
- Health advocacy
- The role of communication in partnerships for health
- The role of communication in capacity building and change management

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Assignment 1 (2500 words equivalent per student) 50%
- Assessment task 2: Assignment 2 (2500 words equivalent per student) 50%

## HSH705 – Needs Assessment and Health Program Planning

*Enrolment modes: Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Teresa Capetola*

*Prerequisite: HSH703*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 6 weekly cloud (online) classes through Blackboard Collaborate plus 3 day seminar (Friday-Sunday)*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including a 1.5 hour scheduled online class per week*

### Content

Topics include: overview of program planning and development (including approaches, models and frameworks), needs assessment, vision and goal setting, developing objectives, program design principles, determining content and strategies for programs, best practices, an introduction to evaluation design (including process, impact and outcome) and its link to planning, budgeting, sustainability, approaches to the management of programs, and an overview of some current debates regarding program planning and government policy and resource issues.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Assignment 1 (2000 words) 40%
- Assessment task 2: Assignment 2 (3000 words) 60%

## HSH709 – Health and Social Impact Assessment

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Berni Murphy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Taught in intensive mode over 5 days (9 am to 5 pm daily) during the Trimester 2 mid-trimester break.*

### Content

This unit allows students to gain an understanding of the history, contexts, processes and outcomes of health and social impact assessment. It will develop skills which will enable students to understand the application of either SIA or HIA. Links between health/ environmental/ social impact assessment and policy assessment will be explored with particular reference to their relevance for individual and community wellbeing. Case studies undertaken in Australia and overseas will be used to illustrate the theories and students will have the opportunity to review and evaluate impact assessment projects relating to health and social impacts of developments within policy frameworks or within a community setting.

### Assessment

- Assessment task 1: Individual assignment (1500 words) 30%
- Assessment task 2: Group presentation 20%
- Assessment task 3: Essay (2500 words) 50%

## HSH712 – Alcohol, Tobacco, and other Drugs

*Enrolment modes: Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Matthew Dunn*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including a minimum of two online seminars during the trimester*

### Content

This unit introduces students to research and policy relating to alcohol, tobacco, and other drugs, and assumes no prior knowledge. It is offered as an elective to primarily complement the postgraduate public health and health promotion courses, though will be of benefit to anyone interested in this topic. Students will consider different drugs, their pharmacological effects, and the potential benefits and harms from use; investigate patterns of drug use in Australia and internationally; and investigate and critique responses to use and harm both in Australia and internationally.

### Assessment

- Assessment task 1: Essay (1500 words) 30%
- Assessment task 2: Essay (2000 words) 50%
- Assessment task 3: Cloud participation and discussion 20%

## HSH715 – Qualitative Health Research

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Patrick*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including 1 x 2 hour online seminar per week*

*In-person attendance requirements: CBD only: Seminar in block mode*

### Content

This unit aims to introduce students to the qualitative health research. Students will explore the types of research questions that can be answered using qualitative methods. Students will develop skills in identifying researchable questions from theories, their practices and observations; designing, planning and conducting qualitative health research; and qualitative data analysis techniques. This unit is recommended for students considering conducting, evaluating or designing health research in a higher degree or workplace setting.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Collecting and analysing a qualitative data set (2000 words equivalent) 40%
- Assessment task 2: Journal article (3000 words) 60%

## HSH717 – Health Economics 1

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jenny Watts*

*Trimester 3 Unit Chair: Lisa Gold*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 hours per week*

*Scheduled learning activities – cloud (online): 1 hour weekly class (recordings provided) and 1 hour weekly seminar exercise posted to a moderated online discussion group*

### Content

The unit introduces students to the discipline of health economics and assumes no prior knowledge. The unit will cover the following topics, with a particular focus on current policy developments.

1. Dimensions of Health Economics: The scope of health economics; why is health economics relevant; objectives in health care – choice between different values; basic concepts and definitions.
2. Microeconomic Tools for Health Economics: Concepts behind the demand curve; concepts behind the supply curve; markets and economic rationalism, market failure, the role of government and preventing government failure.
3. The Australian Health Care System from an Economic Perspective: Structure and funding; role of providers, consumers and funders; viewpoints on the Australian health care system; international comparisons.
4. Health Economics and Public Policy: Health expenditure control; health insurance; reforming Medicare – from tinkering to managed competition; efficiency in health provider payment mechanisms; efficiency in sub-sectors of the health care system (such as primary care and hospitals).

### Assessment

- Assessment task 1: In-trimester exercises (including seminar participation) 20%
- Assessment task 2: Essay (2000 words) 40%
- Assessment task 3: Examination (2 hours) 40%

### Prescribed texts

Rice, T, and Unruh, L, Economics of health reconsidered, (US Health Administration Press, 4th edn, 2016)  
ISBN-10: 1567937233

## HSH719 – Economic Evaluation 1

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Cathy Mihalopoulos*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 hours per week*

*Scheduled learning activities – cloud (online): 1 hour weekly class (recordings provided) and 1 hour weekly seminar exercise posted to a moderated online discussion group.*

### Content

The unit introduces the basic concepts, methods and applications of economic evaluation in the healthcare sector. Topics include an introduction to the different methods of economic evaluation (e.g. cost-minimisation analysis, cost-effectiveness analysis, cost-utility analysis, cost-benefit analysis); the strengths and limitations of studies and study design; analysing the quality of evidence; how economic evaluation differs from other forms of evaluation; and how information from an economic evaluation can aid decision making. Practical application will include when to undertake an economic evaluation, designing an economic evaluation, the steps in conducting an economic evaluation; and the tools and methods for measuring costs and outcomes.

### Assessment

- Assessment task 1: In-trimester exercises (including seminar participation) 20%
- Assessment task 2: Essay (2000 words) 40%
- Assessment task 3: Examination (2 hours) 40%

## HSH724 – Healthy Cities and Urban Communities

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Fiona Andrews*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 x 2 hour campus seminars. Class material posted on CloudDeakin*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit will investigate cities and urban developments as settings for health. It will provide students with an understanding of the key health issues for urban dwellers at the global and local levels, existing approaches to addressing these, along with new and emerging approaches. Topics to be addressed include: the history of urban public health, ecological public health perspectives, urban health inequities, the WHO Healthy Cities program, UN Principles for Healthy and Sustainable Places, new approaches and challenges for developing health urban environments. The unit will take an interdisciplinary learning approach embracing the contributions that both public health and urban planning make to improve the lives of urban dwellers.

*Note: This unit will be offered in T1 from 2020 onwards.*

### Assessment

- Assessment task 1: Individual assignment (Poster – 1500 words equivalent, plus 500 word abstract) 40%
- Assessment task 2: Individual assignment (Report – 3000 words) 60%

## HSH725 – Research Literacy for Health Practice

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Amie O'Shea*

*Trimester 3 Unit Chair: Amie O'Shea*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HBS400/401, HBS701*

*Scheduled learning activities – campus: Class material posted on CloudDeakin, 5 x 2 hour on campus seminars per trimester*

*Scheduled learning activities – cloud (online): Class material posted on CloudDeakin, 5 x 2 hour cloud (online) seminars per trimester*

### Content

This unit has been designed specifically for students enrolled in H615 Graduate Diploma of Health Promotion, H703 Master of Social Work, H759 Master of Health Promotion, H756 Master of Health and Human Services Management and H757 Master of Public Health. The focus is on the development of skills in critical thinking and research methods in public health practice.

The unit consists of 5 sections, as follows:

1. Introduction to research for health practice
2. Evidence based practice and critical appraisal
3. Quantitative research: principles, techniques and critique
4. Qualitative research: principles, techniques and critique
5. Ethical principles

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Literature review (1500 words) 30%
- Assessment task 2: Critical Appraisal (2500 words) 50%
- Assessment task 3: Online (Cloud) test (20 questions): 20%

## HSH728 – Health Equity and Human Rights

*Enrolment modes: Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Fiona McKay*

*Prerequisite: Nil*

*Corequisite: HSH701 or HSH703 or HSW701. Corequisite units can also be studied prior to taking this unit.*

*Incompatible with: HDS310*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including one scheduled online workshop per week of up to 2 hours' duration*

### Content

This unit aims to develop understandings about health equity and human rights as a coherent frame of action to tackle inequities and to improve health and wellbeing, and to develop a working knowledge of practical approaches for public health and health system actions to address health inequities and rights violations, and to promote social justice. Topics to be addressed in this unit include: health equity debates; conventions and legal frameworks for human rights; strategies of public health, primary health care and health promotion to promote equity and rights, and specific issues such as diversity and difference, mental health and human rights, children's rights and health equity, asylum and refugee health, and HIV/AIDS.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Short answer questions (1000 words total) 20%
- Assessment task 2: Group presentation 30%
- Assessment task 3: Report (2500 words) 50%

## HSH731 – Minor Project A

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 3: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Patrick*

*Trimester 2 Unit Chair: Fiona Andrews*

*Trimester 3 Unit Chair: Rebecca Patrick*

*Prerequisite: One of HSH725 or HSH744 or HSH746*

*Trimester 2: One of HSH725 or HSH744 or HSH746; for H708 students only, HSH715 AND HDS736*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online independent and collaborative learning, including 4 x 2 hour online seminars (on campus and/or Cloud) and regular online contact with project supervisor throughout trimester*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning, including 4 x 2 hour online seminars (on campus and/or Cloud) and regular online contact with project supervisor throughout trimester*

### Content

This unit must be studied in conjunction with HSH732 Minor Project B. This unit enables students to improve their knowledge and skills in research planning, conduct, and presentation of findings relative to public health. Students conduct research-based tasks and make a significant contribution to a research-based project in their relevant field of study.

Students can choose from among six different project types:

1. Literature review
2. Development of a research protocol
3. Data analysis of an existing data set
4. Policy-related research
5. Other research-based project
6. Applied research assistance

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

The minor project is worth two credit points comprised HSH731 and HSH732. These may be undertaken:

- a) concurrently by students wishing to complete the minor project in one trimester (students enrol in both HSH731 and HSH732 in the same trimester); or
- b) sequentially enrol in HSH731 in one trimester followed by HSH732 in the next trimester.

## Assessment

- Assessment task 1: Project proposal (~500 words)  
Ungraded Pass
- Assessment task 2: Interim report (~500 words)  
Ungraded Pass
- Assessment task 3: Oral presentation (10 minutes) and presentation abstract 20%
- Assessment task 4: Written report (8000–10,000 words equivalent) 80%

## HSH732 – Minor Project B

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 3: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Patrick*

*Trimester 2 Unit Chair: Fiona Andrews*

*Trimester 3 Unit Chair: Rebecca Patrick*

*Prerequisite: HSH725 or HSH744 or HSH746*

*Trimester 2: One of HSH725 or HSH744 or HSH746; for H708 students only, HSH715 AND HDS736*

*Corequisite: HSH731*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online independent and collaborative learning, including 4 x 2 hour online seminars (on campus and/or Cloud) and regular online contact with project supervisor throughout trimester*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning, including 4 x 2 hour online seminars (on campus and/or Cloud) and regular online contact with project supervisor throughout trimester*

## Content

This unit must be studied in conjunction with HSH732 Minor Project B. This unit enables students to improve their knowledge and skills in research planning, conduct, and presentation of findings relative to public health. Students conduct research-based tasks and make a significant contribution to a research-based project in their relevant field of study.

Students can choose from among six different project types:

1. Literature review

3. Data analysis of an existing data set
4. Policy-related research
5. Other research-based project
6. Applied research assistance

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

The minor project is worth two credit points comprised HSH731 and HSH732.

If you wish to enrol HSH731 and HSH732 concurrently, then HSH731 is a corequisite to HSH732.

If you wish to enrol in HSH731 and HSH732 over 2 trimesters, then HSH731 will be a pre-requisite for HSH732 as you need to complete HSH731 first before enrolling into HSH732

## Assessment

- Assessment task 1: Project proposal (~500 words)  
Ungraded Pass
- Assessment task 2: Interim report (~500 words)  
Ungraded Pass
- Assessment task 3: Oral presentation (10 minutes) and presentation abstract 20%
- Assessment task 4: Written report (8000–10,000 words equivalent) 80%

## HSH733 – Major Project A

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 3: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 2*

*Previously coded as: HSH723*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Rebecca Patrick*

*Trimester 2 Unit Chair: Fiona Andrews*

*Trimester 3 Unit Chair: Rebecca Patrick*

*Prerequisite: Either HSH725 or both of HSH744 and HSH746. H709 students: HDS736. Except for H709, students must have a WAM of 70 or over to be eligible to undertake HSH733/734.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online independent and collaborative learning, including 4 x 2 hour online seminars (on campus and/or Cloud) and regular online contact with project supervisor throughout trimester*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning, including 4 x 2 hour online seminars (on campus and/or Cloud) and regular online contact with project supervisor throughout trimester*

### Content

The aim of this unit is to enable students to develop research skills and knowledge in developing, designing and conducting a small research study relative to health promotion or public health. Specific objectives are to: learn how to identify a research topic; develop skills in information retrieval and the critical analysis of published material; develop a research protocol that involves the collection, analysis and interpretation of data; produce a written report that demonstrates evidence of research ability and written communication skills; present the findings to faculty and fellow students (using PowerPoint).

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

The major project is worth four credit points comprising HSH733 and HSH734. These are undertaken sequentially by undertaking the major project over two trimesters (students enrol in HSH733 in one trimester followed by HSH734 in the next trimester).

### Assessment

- Assessment task 1: Project proposal (~500 words) Ungraded Pass
- Assessment task 2: Interim report (~500 words) Ungraded Pass
- Assessment task 3: Oral presentation (15 minutes) and presentation abstract 20%
- Assessment task 4: Written report (12,000–14,000 words) 80%

## HSH734 – Major Project B

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 3: Burwood (Melbourne), CBD\*, Cloud (online)*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Rebecca Patrick*

*Trimester 2 Unit Chair: Fiona Andrews*

*Trimester 3 Unit Chair: Rebecca Patrick*

*Prerequisite: Either HSH725 or both of HSH744 and HSH746. H709 students: HDS736 and HSH733. Except for H709, students must have a WAM of 70 or over to be eligible to undertake HSH733/734.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online independent and collaborative learning, including 4 x 2 hour online seminars (on campus and/or Cloud) and regular online contact with project supervisor throughout trimester*

### Content

Refer to HSH733 for details.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Project proposal (~500 words) Ungraded Pass
- Assessment task 2: Interim report (~500 words) Ungraded Pass
- Assessment task 3: Oral presentation (15 minutes) and presentation abstract 20%
- Assessment task 4: Written report (12,000–14,000 words) 80%

## HSH736 – Community Consultation and Participation

*Enrolment modes: Not offered 2019, next offering 2020  
Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Teresa Capetola*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 2 day seminars*

### Content

This unit allows students to gain an understanding of the theory, history, contexts, process and outcomes of community consultation and participation. Community consultation and participation will be explored in relation to the health, environment, and planning sectors. The unit will focus on developing skills in designing and implementing community consultation programs, and facilitating community participation in policy- and decision-making. On completion of the unit students should be able to: analyse contexts for consultation with and participation by individuals, households, organisations and communities; identify needs and plan opportunities for individuals, households, organisations and communities to influence policies and decisions affecting their lives; review and evaluate examples of community consultation and participation; create strategies to maximise participation in policy- and decision-making; and apply consultation skills and techniques.

### Assessment

- Assessment task 1: Group presentation (1000 words) 20%
- Assessment task 2: Consultation plan (2000 words) 40%
- Assessment task 3: Individual written paper (2000 words) 40%

## HSH739 – Global Health Policy and Planning

*Enrolment modes: Trimester 3 2019: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Offering information: This unit is offered in alternate, odd years 2017 then 2019*

*Trimester 3 Unit Chair: Elizabeth Hoban*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 day intensive (9 am to 5 pm) = 35 hours; 3 hour interactive lecture every morning (3 x 4) = 12 hours; 4 hour seminar every afternoon (4 x 4) = 16 hours.*

*Cloud BB Collaborate Seminars: 1 x 1 hour Seminar 2 weeks before the Intensive begins; 1 x 1 hour Seminar mid-way into the Intensive; and 1x 1 hour Seminar post-Intensive.*

*Intensive dates are 8, 9, 10, 11 November 2019.*

### Content

This unit focuses on differences between cultures, nation states, government environments, regions and sectors in the considerations of planning and policy development and implementation for health. We will take a broad, ecological and global perspective. We will explore the context for global health and apply this to local circumstances. Health perspectives and developments in different countries will be presented. Students will actively engage and provide insights about international health systems and their implication on the health of populations. This will include a critical perspective on the political economies and social determinants of health. We will establish a common theoretical and conceptual foundation which will evolve into a project driven environment where students will actively contribute to furthering global public health. The unit aims to familiarise students with the applicability of political theory to international, transnational and global health issues.

### Assessment

- Assessment Task 1: Annotated Bibliography 20%
- Assessment Task 2. Group Assessment Task – Policy Issue Paper delivered as a Powerpoint presentation 30%
- Assessment Task 3: Policy brief (3000 words) 50%

## HSH744 – Epidemiology 1

*Enrolment modes: Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tony LaMontagne*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Equivalent 2 hours per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning experiences, including a 1 hour online seminar per week*

### Content

This unit aims to enable public health practitioners to use quantitative research as a fundamental input to their practice. It focuses on building students' abilities to interpret and critically evaluate relevant epidemiological research literature including reports, research articles and systematic reviews. The unit aims to enable students to understand the main uses of epidemiology in public health explore basic epidemiological study designs, tools and methods, interpret basic study findings in the epidemiological literature; and apply key issues in critically appraising health research literature.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Assignment 1 (equivalent 1000 words) 20%
- Assessment task 2: Assignment 2 (equivalent 1500 words) 30%
- Assessment task 3: Final examination (2 hours) 50%

### Prescribed texts

Webb, P & Bain, C. 2017, Essential epidemiology: an introduction for students and health professionals (Third edition), Cambridge University Press.

## HSH745 – Health Program Evaluation

*Enrolment modes: Trimester 2: Burwood (Melbourne), CBD\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Fiona McKay*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including a scheduled online workshop per week of up to 2 hours' duration*

### Content

This unit focuses on evaluation theory, frameworks, designs, approaches, and practical data collection and analysis methods applicable to the evaluation of health programs. The unit also incorporates the communication skills required to successfully engage, negotiate, inform and report to various stakeholders as required through the lifecycle of an evaluation study. Students will be guided to make appropriate evaluation choices suited to a range of scenarios. Students will have the opportunity to apply their new evaluation knowledge and skills in a series of hands-on exercises based on real world case studies from local and global contexts.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Individual report (1500 words) 30%
- Assessment task 2: Cloud participation and discussion 20%
- Assessment task 3: Individual written assignment (2000 words) 50%

# HSH746 – Biostatistics 1

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), CBD\*, Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Julie Abimanyi-Ochom*

*Trimester 3 Unit Chair: Julie Abimanyi-Ochom*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: equivalent 2 hours per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 1 x 2 hour online seminar per week*

## Content

In this introductory unit on biostatistics, students will explore the philosophical basis of statistical thought, examine fundamental statistical concepts and methods and explore their application in a variety of health settings. The delivery of the Unit is designed to facilitate the syntheses of the basic components of learning through practical exercises, statistical computing labs and the application of bio statistical techniques to realistic health-related data. The main topic areas covered will include: descriptive statistics, hypothesis testing, confidence intervals, comparison of means, inference on proportions, contingency tables, correlation and basic regression concepts.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Data manipulation and analysis (equivalent 1000 words) 20%
- Assessment task 2: Data manipulation, analysis and interpretation (equivalent to 1500 words) 30%
- Assessment task 3: Examination (2 hours) 50%

# HSH747 – Biostatistics 2

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Chris Stevenson*

*Prerequisite: HSH746*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 hour computer lab-based workshop each week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning and 1 x 2 hour online seminar per week*

## Content

This unit will cover topics in regression analysis with a focus on practical application to data and problems in public health, health economics and variety of health settings. Topics include: linear regression, including model fitting, measures of goodness of fit and using regression to explore confounding and effect modification; logistic regression, extending regression to modelling proportions, rates and odds ratios and the analysis of case-control studies; and Poisson and other generalised linear models. Unit delivery is designed to facilitate the syntheses of the components of learning through practical exercises, statistical computing labs and the application of regression techniques to realistic health-related data.

All content will be delivered via CloudDeakin, with short narrated powerpoints/videos providing the main content delivery supported by links to online resources and appropriate journal articles. Face-to-face sessions for on-campus students will focus on applying the week's content to real/realistic data. Detailed notes on these practical sessions will be posted on the unit's CloudDeakin site so that off-campus students can work through the practical sessions at home. Weekly online sessions for off-campus students facilitated by the unit chair will allow them to workshop the online content and practical sessions. Practical work will use the Stata statistical analysis software.

## Assessment

- Assessment task 1: Theoretical questions and applied analyses (equivalent to 1000 words) 20%
- Assessment task 2: Theoretical questions and applied analyses (equivalent to 1500 words) 30%
- Assessment task 3: Data analysis, reporting and interpretation (equivalent to 2500 words) 50%

## HSH754 – Epidemiology 2

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jo Williams*

*Prerequisite: HSH744 Epidemiology 1*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour weekly class delivered via cloud (online) plus 1 x 2 hour weekly seminar*

*Scheduled learning activities – cloud (online): 1 x 1 hour weekly class delivered via cloud (online) plus a 1 x 2 hour weekly online Blackboard Collaborate session.*

### Content

The unit builds on the knowledge gained in Epidemiology 1 to develop practical epidemiological skills to allow public health practitioners to interpret and critically evaluate relevant epidemiological research literature, design and conduct data collection, analyse epidemiological data from existing data sources and write research reports.

The topics covered will be the application of epidemiological concepts and analytical approaches in the evaluation of health services, surveillance systems and screening programs and in conducting research using administrative data sets

### Assessment

- Assessment task 1: Survey instrument development (equivalent 1500 words) 30%
- Assessment task 2: Data collection and interpretation (equivalent 1500 words) 30%
- Assessment task 3 : Data analysis task (equivalent of 2000 words) 40%

## HSH760 – International Perspectives in Health and Social Development

*Enrolment modes: Trimester 3 2019: Study tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Patsie Frawley*

*Cohort rule: Must be enrolled in courses offered by the School of Health and Social Development – H615, H703, H746, H747, H749, H756, H757, H759*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSH360*

*Scheduled learning activities – cloud (online): 2 x 2 hour Blackboard Collaborate*

*In-person attendance requirements: 1 x 1 full day seminar, study tour of approximately two weeks*

### Content

This unit provides students with the opportunity to learn about the context of promoting and supporting health from an international perspective. The unit will be conducted in the form of a study tour of another country and is designed to provide students with the opportunity to enhance their understanding of cross-cultural health and society. The study tour will consist of a range of activities designed to link students with policy makers, health care workers, educators, and health agencies in the host country, and to reflect on their own values and approaches in relation to health and social development.

*Note: Self-enrolment is not possible. Students will be selected by the unit team based on a formal application and interview process.*

### Assessment

- Assessment task 1: Pre-departure group presentation (15 minutes) 30%
- Assessment task 2: Critical reflection paper (1000 words) 20%
- Assessment task 3: Final report (2000 words) 40%
- Assessment task 4: Observations, participation and engagement 10%

## HSH761 – Health Technology Assessment 1

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Marcus Tan*

*Prerequisite: HSH746*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Seminars will be fortnightly in 2 x 2 hour blocks commencing week 1 of the trimester*

*Scheduled learning activities – cloud (online): 1 hour weekly class (recording provided) and 1 hour weekly seminar exercise posted to a moderated online discussion group*

### Content

Health technologies such as medicines, diagnostic tools and surgical procedures provide the opportunity for government and providers to improve health care services and patient outcomes. Given the rapid development of these technologies and expanding evidence for pre-existing interventions, decision-makers face unprecedented challenges in ensuring that high quality and innovative care is managed in an environment of scarce resources. Health Technology Assessment (HTA) provides a means by which health technologies can be assessed and prioritised against existing health care interventions to inform the benefits and comparative value of interventions. This unit will focus on HTA and the clinical evaluation process, including the role of evidence-based medicine in the decision-making process. Appraisal of clinical evidence will include 'risk of bias' assessment, heterogeneity across clinical trials, and the use of surrogate outcome measures, and how clinical evidence can be incorporated into economic evaluations.

### Assessment

- Assessment task 1: Contribution to online discussion topics 20%
- Assessment task 2: Group Activity – literature search report (individual contribution 1000 words) 20%
- Assessment task 3: Clinical Evaluation Report Part 1 (1750 words) 35%
- Assessment task 4: Clinical Evaluation Report Part 2 (1250 words) 25%

## HSH762 – Resource Allocation and Priority Setting

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Anita Lal*

*Prerequisite: HSH719*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar each week*

*Scheduled learning activities – cloud (online): 1 hour weekly class (recording provided) and 1 hour weekly seminar exercise posted to a moderated online discussion group*

### Content

This unit introduces students to the challenges of priority setting in health care. Students will gain an understanding of the different approaches used for priority setting and the relevance of context and setting, the role of economic evaluation and issues around involving the public in difficult choices. Alternative methods for priority setting will be explored, including economic (for example league tables, Program Budgeting and Marginal Analysis and Assessment of Cost Effectiveness) and non-economic approaches, including the contribution from ethics and theories of social justice.

### Assessment

- Assessment task 1: In-trimester exercises (including seminar participation) 20%
- Assessment task 2: Essay (2000 words) 40%
- Assessment task 3: Examination (2 hours) 40%

## HSH763 – Financing Health Care

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jenny Watts*

*Prerequisite: HSH717 or MPE781*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar each week*

*Scheduled learning activities – cloud (online): 9 x 2 hours weekly class (recording provided). All students will participate in group activities facilitated through the online discussion board (1 hour per week over 11 weeks).*

### Content

How societies pay for health care and how many resources are devoted to health and health care can affect individual access to health care; and impact on both health inequalities and population health. As a policy instrument, health financing is about raising sufficient funds in a fair and equitable way; pooling financial resources across population groups to minimise the impact of illness; and creating a legislative framework to support an equitable and efficient use of public funds. This subject will explore alternative mechanisms for financing health care, including collecting revenue, pooling funds, purchasing services from providers and the role of the prevailing policy framework.

Broadly there are two approaches to health care financing: (i) government financed systems and (ii) market-based systems. However in contemporary health systems this distinction is blurred with market-based incentives influencing predominantly government financed healthcare; output-based funding for hospitals and pay-for-performance (P4P) models are examples of this. Insurance, whether universal or private, provides a further layer of complexity.

Any payment system is affected by how the incentives underlying payment, including the existence of insurance, influence individual behaviour; and in health care funding incentives influence the behaviour of both consumers and providers. We will analyse the strengths and weaknesses of different financing and policy options from an economic perspective. The subject will draw on both Australian and international examples of healthcare financing policy.

### Assessment

- Assessment task 1: 5 written exercises (each exercise approximately 500 words) posted to all students enrolled in the Unit via the CloudDeakin discussion board – Total marks 50%
- Assessment task 2: Essay (2500 words) 50%

## HSH764 – Economic Evaluation – Theory and Practice

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mary Lou Chatterton*

*Prerequisite: HSH719*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 hour class and 1 hour Blackboard collaborate session each week*

*Scheduled learning activities – cloud (online): 1 hour weekly class (recording provided) and 1 hour Blackboard collaborate session each week*

### Content

This unit expands the concepts, methods and applications introduced to students in Economic Evaluation 1 (HSH719). Topics covered include: the theoretical underpinnings of economic evaluation); costing health care services (including joint costs, annuatisation, non-market based costing and costing methods); the theory and pragmatics of generic outcome measures (QALYs, monetary benefits, capabilities and others); statistical issues in the analysis of trial-based economic data; calculating ICERs (including the cost-effectiveness plane, net benefit, and acceptability curves); and, clinical trials versus modelled economic evaluations (rigour versus pragmatism)

### Assessment

- Assessment task 1: In-trimester exercises (including seminar participation) 20%
- Assessment task 2: Essay (2000 words) 40%
- Assessment task 3: Examination (2 hours) 40%

## HSH765 – Health Technology Assessment 2

*Offering information: NOT OFFERED 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: HSH761*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar each week*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin*

### Content

Having focused on the evaluation of clinical evidence in HSH761 Health Technology Assessment 1, this unit focuses on the next steps in the health technology assessment process. There are two key aspects, (1) determination of how to apply the clinical evidence and (2) a broader policy perspective that considers concepts such as transparency, stakeholder involvement, and integration with the larger health system. General issues that will be explored include:

1. implementation and reimbursement of technologies
2. consideration of both clinical and cost effectiveness evidence
3. the influence of setting on coverage decisions
4. HTA decision rules such as 'rule of rescue', 'orphan' drugs, end of life treatment, special patient populations and public health benefit; and
5. the influence of HTA on pricing decisions

### Assessment

- Assessment task 1: Essay (3000 words) 45%
- Assessment task 2: In-trimester exercises (including tutorial participation) 15%
- Assessment task 3: Examination (2 hours) 40%

## HSH766 – Economics and Health Policy Analysis

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Victoria Brown*

*Prerequisite: HSH717 or MPE781*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar each week*

*Scheduled learning activities – cloud (online): 9 x 2 hour weekly class (recording available) and 1 hour weekly seminar exercise posted to a moderated online discussion group*

### Content

This unit will enable the student to undertake an analysis of contemporary issues in health policy from an economic perspective. It will build on the fundamental economic concepts of markets, competition and efficiency learned in HSH717 Health Economics 1. Understanding the role of government and the concept of equity as it relates to health and health care will provide a framework for analysis of health policy issues. Factors impacting on the supply and demand for health and health care professionals will be explored, in the context of contemporary issues such as ageing, rising prevalence of chronic disease, technology-driven care, health care inflation, and disability care. Health service performance will also be analysed against performance measures such as efficiency, equity, access and health outcomes.

### Assessment

- Assessment task 1: Written exercises (each exercise approximately 300 words) posted to the CloudDeakin discussion board over the trimester – Total marks 50%
- Assessment task 2: Essay (2500 words) 50%

## HSH767 – Economic Modelling

*Enrolment modes: Trimester 3: Cloud (online) in Intensive mode over 4 days in February at Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Lan Gao*

*Prerequisite: HSH719*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: Taught in intensive mode over 4 days in February at Burwood (Melbourne)*

- Friday 31 January 2020
- Monday 3 February 2020
- Wednesday 5 February 2020
- Friday 7 February 2020

### Content

This unit introduces students to the application of decision analysis and modelling techniques for the purposes of conducting an economic evaluation of a health care intervention. Students are progressed through a series of practical exercises in modelling to enable them to gain some practical experience in performing cost-effectiveness analysis that assesses the value of a health care intervention. The following topics will be covered:

1. Fundamentals of decision analysis
2. Conceptual frameworks to determine an appropriate structure for a model
3. Fundamentals of decision trees
4. Fundamentals of Markov models
5. Analysis of models using microsimulation
6. Evaluation of companion diagnostics
7. Sensitivity analysis
8. Assessment of the value of additional information
9. Reporting an economic evaluation

Throughout this course, TreeAge Pro software is used to create and analyse decision models. Students can expect to develop a basic proficiency in the use of this software during the course.

### Assessment

- Assessment task 1: In trimester exercises 40%
- Assessment task 2: Report of an economic analysis (3000 words) 60%

## HSH768 – Health Economics in a Global Context

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Julie Abimanyi-Ochom*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar each week*

*Scheduled learning activities – cloud (online): 1 hour weekly class (recording provided) and 1 hour weekly seminar exercise posted to a moderated online discussion group*

### Content

This unit introduces health economics in an international context. The unit provides an overview of the overarching health challenges internationally from an economic perspective using case studies for illustration. Policies and strategies that have been developed to improve human health will be highlighted as well as the challenges in undertaking research in a resource poor setting.

The unit will explore:

1. socioeconomic determinants of health including linkages between health and development; health and education; health and the environment; and the impact of cultural and traditional beliefs on health
2. the global burden of disease including contemporary issues in developing countries (for example patterns of disease, the interaction between the environment and health, and major health problems)
3. the nature of health systems including alternative models for health financing and service delivery; and
4. the WHO's commitment to achieve global health.

### Assessment

- Assessment task 1: In-trimester exercises (6 x 300 words) and tutorial participation 40%
- Assessment task 2: Individual assignment (report plus presentation) (2500 words) 60%

### Prescribed texts

Witter, S, Ensor, T, Jowett, M and Thompson, S (2013). Health Economics for Developing Countries: A Practical Guide. Royal Tropical Institute Press (KIT (Koninklijk Instituut voor de Tropen)).

## HSH769 – Comparative Health Systems

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online), \*CBD*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Lisa Gold*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: A minimum of 22 hours of intensive classroom activity over the trimester*

*Scheduled learning activities – cloud (online): 2 hours weekly class (recording provided) and 1 hour per week group assessment activities (all students)*

### Content

This unit provides students with a framework for undertaking critical and comparative analysis of the performance of both state-based and market-based health systems. Students will gain an in-depth understanding of the various domains that impact on equitable and efficient health care delivery including: (i) the organisation, operation, funding and policy environment and (ii) the role that political, cultural, legal and economic factors play in the development of health systems. Further issues that are explored are the fragmentation of health systems, health workforce supply in a global context, health inequities particularly indigenous and isolated populations and the neglect of health promotion and primary prevention at the expense of curative care. These topics are explored in the context of a series of case studies including the National Healthcare Service (NHS) in the UK, the Affordable Care Act in the US, Australia's Medicare, and various other examples from India, Africa, South America, the Netherlands, China, Singapore and Thailand.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Oral presentation (10 minutes) 10%
- Assessment task 2: Group project – literature review 40%
- Assessment task 3: Written report (2500 words) 50%

## HSH915 – Qualitative Health Research

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Rebecca Patrick*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSH715*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including 1 x 2 hour online seminar per week*

### Content

This unit aims to introduce students to the qualitative health research. Students will explore the types of research questions that can be answered using qualitative methods. Students will develop skills in identifying researchable questions from theories, their practices and observations; designing, planning and conducting qualitative health research; and qualitative data analysis techniques. This unit is recommended for students considering conducting, evaluating or designing health research in a higher degree or workplace setting.

### Assessment

- Assessment task 1: Collecting and analysing a qualitative data set (2000 words equivalent) 40%
- Assessment task 2: Journal article (3000 words) 60%

## HSH944 – Epidemiology 1

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Tony LaMontagne*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSH744*

*Scheduled learning activities – campus: Equivalent 2 hours per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning experiences including a 1 hour online seminar per week*

## Content

This unit aims to enable public health practitioners to use quantitative research as a fundamental input to their practice. It focuses on building students' abilities to interpret and critically evaluate relevant epidemiological research literature including reports, research articles and systematic reviews. The unit aims to enable students to understand the main uses of epidemiology in public health explore basic epidemiological study designs, tools and methods, interpret basic study findings in the epidemiological literature; and apply key issues in critically appraising health research literature.

## Assessment

- Assessment task 1: Assignment 1 (equivalent 1000 words) 20%
- Assessment task 2: Assignment 2 (equivalent 1500 words) 30%
- Assessment task 3: Final examination (2 hours) 50%

# HSH946 – Biostatistics 1

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*  
*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Julie Abimanyi-Ochom*

*Trimester 3 Unit Chair: Julie Abimanyi-Ochom*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSH746*

*Scheduled learning activities – campus: 1 x 2 hour computer practical per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning experiences and 1 x 2 hour online seminar per week*

## Content

In this introductory unit on biostatistics, students will explore the philosophical basis of statistical thought, examine fundamental statistical concepts and methods and explore their application in a variety of health settings. The delivery of the Unit is designed to facilitate the syntheses of the basic components

of learning through practical exercises, statistical computing labs and the application of bio statistical techniques to realistic health-related data. The main topic areas covered will include: descriptive statistics, hypothesis testing, confidence intervals, comparison of means, inference on proportions, contingency tables, correlation and basic regression concepts.

## Assessment

- Assessment task 1: Data manipulation and analysis (equivalent 1000 words) 20%
- Assessment task 2: Data manipulation, analysis and interpretation (equivalent to 1500 words) 30%
- Assessment task 3: Examination (2 hours) 50%

# HSH947 – Biostatistics 2

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 2 Unit Chair: Chris Stevenson*

*Prerequisite: HSH946*

*Corequisite: Nil*

*Incompatible with: HSH747*

*Scheduled learning activities – campus: 1 x 2 hour computer workshop per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning experiences and 1 x 2 hour online seminar per week*

## Content

This unit will cover topics in regression analysis with a focus on practical application to data and problems in public health, health economics and variety of health settings. Topics include: linear regression, including model fitting, measures of goodness of fit and using regression to explore confounding and effect modification; logistic regression, extending regression to modelling proportions, rates and odds ratios and the analysis of case-control studies; and Poisson and other generalised linear models. Unit delivery is designed to facilitate the syntheses of the components of learning through practical exercises, statistical computing labs and the application of regression techniques to realistic health-related data. All content will be delivered via CloudDeakin – with short narrated powerpoints/videos providing the main content delivery supported by links to online resources and appropriate journal articles. Face-to-face sessions for on-campus students will focus on applying the week's content to real/realistic data. Detailed notes on these practical sessions will be

posted on the unit's CloudDeakin site so that off-campus students can work through the practical sessions at home. Weekly online sessions for off-campus students facilitated by the unit chair will allow them to workshop the online content and practical sessions. Practical work will use the Stata statistical analysis software.

## Assessment

- Assessment task 1: Theoretical questions and applied analyses (equivalent to 1000 words) 20%
- Assessment task 2: Theoretical questions and applied analyses (equivalent to 1500 words) 30%
- Assessment task 3: Data analysis, reporting and interpretation (equivalent to 2500 words) 50%

## HSN010 – Food and Nutrition Laboratory Safety

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Marije Liem-Weits*

*Trimester 2 Unit Chair: Marije Liem-Weits*

*Prerequisite: Nil*

*Corequisite: Must be enrolled concurrently in any of units: HSN104, HSN106, HSN204, HSN206, HSN212, HSN313, HSN315, HSN320*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): One compulsory one hour safety training session undertaken online. This unit will run in the one week prior to the commencement of Week one of each trimester.*

## Content

This unit will give you a basic understanding on principles of safety within the food and nutrition science environment, which will prepare you for your laboratory classes and fieldwork.

Safety induction training is a legal requirement for workplaces in Australia. In addition, an awareness and understanding of safety issues and safe work practices will help you in your future employment.

## Assessment

Assessment task 1: Online safety training module 100%

## Hurdle requirement

Successful completion of quiz questions

## HSN070 – Food and Nutrition Laboratory Safety

*Enrolment modes: Medicine Semester 1: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Semester 1 Unit Chair: Marije Liem-Weits*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in HSN754*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): One compulsory one hour safety training session undertaken online. This unit will run in the one week prior to the commencement of Week one of each trimester.*

## Content

This unit will give you a basic understanding on principles of safety within the food and nutrition science environment, which will prepare you for your laboratory classes and fieldwork.

Safety induction training is a legal requirement for workplaces in Australia. In addition, an awareness and understanding of safety issues and safe work practices will help you in your future employment.

## Assessment

Assessment task 1: Online safety training module 100%

## HSN101 – Foundations of Food, Nutrition and Health

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Warrnambool (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jennifer Mccann*

*Trimester 3 Unit Chair: Brenton Baguley*

*Campus contact: Burwood (Melbourne): Andrew Costanzo  
Warrnambool (Geelong) and Warrnambool: Penny Love*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*  
*Burwood (Melbourne) and Warrnambool (Geelong)*  
*students: 1 x 2 hour class per week and 3 x 1 hour*  
*seminars per trimester*  
*Warrnambool students: 1 x 2 hour online recorded class*  
*per week and 3 x 1 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 1 x 2 hour*  
*online recorded class per week and 3 x 1 hour cloud*  
*(online) seminars per trimester*

## Content

This unit provides students with foundation knowledge in food, nutrition and health, including food sources of nutrients, food and nutrient recommendations for health and methods for measuring food intake and behaviour, historical perspective of why we consume the foods we do today and how our scientific knowledge may influence foods we eat in the future. Students also gain an understanding of interactions between the environment, technologies developed to produce and harvest foods and scientific advances in food and nutrition. The topics include: food history, Australian food culture, food production, food sources of nutrients, food and nutrient recommendations and their relationship with health and methods used to measure food intakes and behaviours. Students also have an opportunity to align their interests and values to future career options.

## Assessment

- Assessment task 1: Three multiple-choice cloud (online) tests (5% each) 15%
- Assessment task 2: Career activity and reflection (500 words, plus infographic, 500 words equivalent) 20%
- Assessment task 3: Written assignment (1400 words) 30%
- Assessment task 4: Examination (1.5 hours) 35%

## HSN103 – Food: the Environment and Consumers

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gie Liem*

*Cohort rule: This unit is only available to students who commenced D301 or H315 in or prior to 2017.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN208, HSN713*

*Scheduled learning activities – cloud (online): 1 x 1 hour*  
*Collaborate session every two weeks and 1 x 2 hour*  
*recorded class per week*

## Content

This unit introduces students to food consumers and the influences on their food purchasing and consumption behaviours. There are two main themes: 1) Situational and psychological influences consumers' food behaviours. Specific topics covered will include: the roles of beliefs and attitudes, needs, wants and personal values, personality and individual differences, role of emotions; the senses, perceptions, habituation, taste preferences, satiety processes, social group and cultural influences. It will also cover nutrition communication and the role of the mass media and advertising; food labels and health claims, consumer confusion. Students will also assess interests and values and the implication of these for career choices and goal setting. 2) Global influences on behaviour. Specific topics covered will include marketing strategies; nature of global food market on behaviour; the supremacy of the supermarkets; responses of markets to consumer and health issues; promotion of functional, convenience and organic foods and the role of governing bodies in the food industry.

*Note: This unit will be offered for the last time in 2019.*

## Assessment

- Assessment task 1: Essay (2000 words) 50%
- Assessment task 2: Examination (2 hours) 50%

## HSN104 – The Science of Food

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sara Sayanjali*

*Trimester 2 Unit Chair: Robert Shellie*

*Cohort rule: Only available to students enrolled in D301, D333, H315, H343 OR H300, D391 students completing the Food Studies major sequence (MJ-H000003) or minor sequence (MN-H000003). Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply.*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in or have previously successfully completed HSN010*

*Incompatible with: HSN203*

*Scheduled learning activities – campus: 1 x 2 hour class*  
*per week and 4 x 3 hour laboratory classes for the*  
*trimester*

## Content

This unit describes food constituent's context of whole foods and diets in terms of their chemical, physical and biological properties, occurrence, nutritional significance and reactivity during processing, risk from food pathogens and spoilage agents, food preservation methods and product development.

## Assessment

- Assessment task 1: Practical report 1 (1000 words) 25%
- Assessment task 2: Practical report 2 (1000 words) 25%
- Assessment task 3: Examination (2 hours) 50%

## HSN105 – Healthy and Sustainable Food Systems

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Lindberg and Georgie Russell*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Equivalent of 1 x 1 hour cloud (online) class, related to specific topics, plus 1 x 2 hour seminar or equivalent per week*

## Content

Dietary patterns and the way food is produced can have a major impact on the environment and the environment has a major impact on the food system. This raises concerns about the food system's future ability to produce sufficient food for food and nutrition security. Governments, non-government organisations, academia, the private sector and citizens are urgently seeking solutions to these public health nutrition problems.

This unit will explore the bidirectional relationship between our food system and environmental sustainability. It will examine how Australia's food system may be contributing to environmental degradation through greenhouse gas emissions, water use and ecosystem changes, such as the loss of biodiversity and how this impacts on health. In addition, it will examine the effects of global warming on the food system and the threats to food security. Following on from this, the unit will ascertain what changes are needed to ensure a prosperous and ecologically sustainable food system.

*Note: New unit 2018*

## Assessment

- Assessment task 1: MCQ 5%
- Assessment task 2: Literature review (1000 words) and blog post (500 words) 40%
- Assessment task 3: Field trip worksheet (200 words) 5%
- Assessment task 4: Healthy and Sustainable Food Challenge (2300 words) 50%

## HSN106 – Food Fundamentals

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Georgie Russell*

*Cohort rule: Only available to students enrolled in D301, D333, E377 and H315. Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply.*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in or have previously successfully completed HSN010*

*Incompatible with: HSN205*

*Scheduled learning activities – campus: 11 x 1 hour classes and 4 x 2.5 hour laboratories for the trimester*

## Content

This unit provides students with a sound background to enable them to identify and undertake careers in food-related industries. Students will gain an understanding of food preparation and manufacturing processes applied to basic food commodities such as cereals, vegetables, fruit, pulses, milk, meat, fish, poultry, eggs, fats and oils, starch, sugars and beverages. Products arising from these processes have characteristic properties and quality attributes that will be examined in some detail. Introduction to fermentation and biotechnology, food packaging and labelling will also be discussed.

## Assessment

- Assessment task 1: laboratory report (1200 words) 35%
- Assessment task 2: laboratory report (1200 words) 35%
- Assessment task 3: Individual assignment (1000 words) 30%

## HSN107 – Physiology of Human Growth and Development

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Gunveen Kaur*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week delivered on campus and 5 x 1 hour seminars per trimester delivered electronically via cloud.*

### Content

This unit aims to develop students' knowledge of the biological and physiological basis of human growth and development across the lifespan. Fundamentals of cell biology and metabolism will be applied to physiological changes occurring during foetal life, followed by the postnatal, infancy, childhood, adolescence and ageing life stages. The fundamentals of genetics and inheritance of human traits will be developed with an emphasis on inborn errors of metabolism and polymorphisms affecting nutrient needs.

### Assessment

- Assessment task 1: Four online multiple choice question tests (5% each) for a total of 20%
- Assessment task 2: One written assignment (1500 words) 30%
- Assessment task 3: Final examination (2 hours) 50%

### Recommended texts

Martini, Nath and Bartholomew. Fundamentals of Anatomy and Physiology Tenth Edition (Global Edition). Pearson ISBN 13: 9781292074870

## HSN202 – Lifespan Nutrition

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrnambool, Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Katherine Livingstone*

*Prerequisite: HSN101 and HSN211*

*Corequisite: Nil*

*Incompatible with: HSN702*

*Scheduled learning activities – campus:*

*Burwood (Melbourne) students: 1 x 2 hour class per week and 6 x 1 hour seminars per trimester.*

*Warrnambool and Waurin Ponds (Geelong) students: 1 x 2 hour class per week delivered electronically and 6 x 1 hour face-to-face seminars per trimester.*

*Scheduled learning activities – cloud (online): 1 x 2 hour online recorded classes per week and 6 x 1 hour cloud (online) seminars per trimester*

### Content

This unit will provide students with an understanding of recommended dietary intakes, with reference to different population groups. Through the class program and problem-based seminar exercises, students will gain an understanding of the nutritional issues relevant to stages across the life span: pregnancy, lactation, foetal development, infancy, childhood and ageing. At the completion of the unit, students will be equipped with the skills and knowledge to devise practical and relevant solutions to nutrition problems and link this knowledge to workplace requirements.

### Assessment

- Assessment task 1: Individual assignment (1400 words, 1 minute oral presentation) 30%
- Assessment task 2: Four cloud (online) multiple-choice quizzes 20%
- Assessment task 3: Examination (2 hours) 50%

## HSN204 – Food Safety

Enrolment modes: Trimester 2: Burwood (Melbourne)

Credit point(s): 1

EFTSL value: 0.125

Trimester 2 Unit Chair: Snehal Jadhav

Cohort rule: Only available to students enrolled in D301, H315 or H300, D391 students completing the Food Studies major sequence (MJ-H000003) or minor sequence (MN-H000003). Other students who would like to enrol in this unit must submit their request to [ens-enquire@deakin.edu.au](mailto:ens-enquire@deakin.edu.au). Enrolment quotas apply.

Prerequisite: One of: SBB111, SLE111, SBC152, SLE152, SLE155, HSN104, HSN203

Corequisite: Must be enrolled in or have previously successfully completed HSN010

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 2 hour class per week, 7 x 2 hour practicals spread across the trimester, 7 x 1 hour practicals spread across the trimester

### Content

This unit will provide students with an understanding of the global issues around safe and sustainable food production. A major focus of the unit will be on understanding the microbial safety of food which would involve studying about different foodborne pathogens and spoilage agents and developing the skills for microbiological analysis of foods. Topics covered include: global food security and safety, microbial growth, foodborne pathogens, standard and advanced methods of pathogen detection, food spoilage and preservation, control of microbial growth, allergens and chemical contaminants in food and microbiological Hazard Analysis Critical Control Points (HACCP) analysis.

### Assessment

- Assessment task 1: Lab Report 1 and 2 (maximum of 500 words), worth 5% each, of final grade
- Assessment task 2: Lab Report 3 and 4 (maximum of 1000 words), worth 20% each of final grade
- Assessment Task 3: Poster assignment with Peer review feedback (maximum of 1500 words), worth 50% of final grade

### Hurdle requirement

Students are required to attend 80% of classes/laboratories

### Prescribed texts

Adams, M.R., Moss, M.O. and McClure, P. Food Microbiology 4th edition, The Royal Society of Chemistry Publishers UK. ISBN 978-1-84973-960-3

## HSN206 – Food Analysis and Quality Assurance

Enrolment modes: Trimester 1: Burwood (Melbourne)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Robert Shellie

Cohort rule: Only available to students enrolled in D301 or H315. Other students who would like to enrol in this unit must submit their request to [ens-enquire@deakin.edu.au](mailto:ens-enquire@deakin.edu.au). Enrolment quotas apply.

Prerequisite: SBC131 or SLE131 or SLE133 and one of HSN104, SLE152, SBC152, SLE155, HSN203

Corequisite: Must be enrolled in or have previously successfully completed HSN010

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 2 hour class per week and 6 x 3 hour laboratory classes for the trimester

### Content

This unit provides students with an understanding of analytical methods used for measuring the chemical composition of food. Methods for the measurement of the physical properties of food are investigated as well as the management systems used by the food industry to ensure consistently high-quality products. Specific topics covered include: representative sampling; data analysis and presentation; chemical and instrumental analysis of macro- and micro-nutrients; enzymatic and immunoassay of food components; measurement of additives and contaminants in foods; instrumental measurement of colour and texture; quality assurance systems including standard operating procedures and total quality management.

### Assessment

- Assessment task 1: Written laboratory report 1 (1000 words) 25%
- Assessment task 2: Written laboratory report 2 (1000 words) 25%
- Assessment task 3: Examination (2 hours) 50%

### Prescribed texts

Nielsen, S. S. (Ed.) (2010). Food analysis (4th ed.). London & New York: Kluwer Academic/Plenum Publishers.

## HSN209 – Food Security and Safety

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Snehal Jadhav*

*Cohort rule: This unit is only offered to H315 and D301 students and H300 or D391 students who are completing MJ-H000003 Food Studies major or minor.*

*Prerequisite: One of: HSN104, SBC152, SLE152, SLE155*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week and 1 x 1 hour seminar fortnightly for the trimester*

### Content

This unit will provide students with an understanding of the global issues of safe food production and the risks and hazards associated with food manufacture. Topics covered include: food regulation; foodborne pathogens and food spoilage microorganisms; food allergies; bioterrorism and food insecurity; food additives, contaminants and packaging, hazards in food production, food waste and risks associated with genetically engineered food.

*Note: This unit will be offered for the last time in 2019.*

### Assessment

- Assessment task 1: Four multiple choice tests (4 x 5%) 20%
- Assessment task 2: Group-based assignment (1500 words) 30%
- Assessment task 3: Examination (2 hours) 50%

## HSN210 – Nutrition and Food Promotion

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Alison Booth*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN708*

*Scheduled learning activities – campus: 1 x 2 hour class per week and 5 x 1.5 hour seminars per trimester*

### Content

Nutrition and food promotion is an important aspect of public health nutrition. Promotion of nutrition and food knowledge amongst food consumers, as well as the modification of the food supply, is essential for the optimisation of health. Topics covered in this unit: design, planning and evaluation of nutrition promotion programs, nutrition promotion in a variety of settings e.g.: children and families, workplaces and health services, food industry, food labelling; theories and methods to help understand what drives consumers to eat certain foods.

### Assessment

- Assessment task 1: Group assignment (500 words) 15%
- Assessment task 2: Individual assignment with group component (2000 words) 50%
- Assessment task 3: Resource and career activity (1500 words) 35%

## HSN211 – Nutritional Physiology

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Warrnambool (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Adam Walsh*

*Trimester 3 Unit Chair: Shaun Mason*

*Prerequisite: HBS109*

*Corequisite: Nil*

*Incompatible with: HSN201 and HSN701*

*Scheduled learning activities – campus:*

*Burwood (Melbourne) and Warrnambool (Geelong) students: 1 x 2 hour class per week.*

*Warrnambool students: 1 x 2 hour online recorded classes*

*Scheduled learning activities – cloud (online): 1 x 2 hour online recorded classes per week*

### Content

This unit expands on the knowledge acquired in HBS109 Human Structure and Function and examines the physiology pertinent to the study of human nutrition. Specifically, this unit will provide students with an understanding of: gastrointestinal system anatomy and physiology including mechanical & chemical digestion; nutrient absorption and pancreatic, liver and biliary system function; physiological mechanisms that control the gastrointestinal system; human nutrient requirements; renal physiology including body fluid homeostasis and water and electrolyte balance and excretion; energy use and control of energy balance; micronutrient use in normal cell functioning and physiological mutations that impact nutrient digestion and absorption.

### Assessment

- Assessment task 1: One individual assignment (1200 words, 1 minute oral presentation) 30%
- Assessment task 2: Fortnightly cloud (online) multiple-choice questions 20%
- Assessment task 3: Examination (2 hours) 50%

### Prescribed texts

## HSN212 – Functional Foods and Biotechnology

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Andrew Costanzo*

*Cohort rule: This unit is only offered to H315 students who are completing MJ-H000022 Food Science major.*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in or have previously successfully completed HSN010*

*Incompatible with: HSN303 and HSN304*

*Scheduled learning activities – campus: 1 x 2 hour class each week, 2 x 3 hour laboratory sessions*

### Content

This unit begins with an investigation of the current scientific literature that examines the proposed mechanisms by which functional foods are able to influence the major metabolic systems of the body with a positive result on overall health. This section will encompass the emerging field of epigenetics which describes the ability of the environment to affect the transcription of our DNA into proteins. Students will then explore the commercial side of producing functional foods beginning with the small-scale in-house development all the way to the large scale bio-processing of functional foods. This will include a discussion of the regulatory issues attached to food production.

*Note: This unit will be offered for the last time in 2019.*

### Assessment

- Assessment task 1: Assignment (1500 words) 40%
- Assessment task 2: Assignment (500 words) 10%
- Assessment task 3: Examination (2 hours) 50%

## HSN223 – Sensory Evaluation of Food

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Russell Keast*

*Cohort rule: This unit is only offered to H315 and D301 students and H300 or D391 students who are completing Food Studies major or minor. Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply.*

*Prerequisite: HSN104*

*Corequisite: Must be enrolled in or have previously successfully completed HSN010*

*Incompatible with: HSN313*

*Scheduled learning activities – campus: 1 x 2 hour class per week – 1 hour class, 1 hour via cloud (online), 2 x 2 hour seminar, 3 x 3 hour laboratory classes during trimester*

### Content

Sensory evaluation is a tool used to measure human response to a variety of stimuli. Students gain knowledge on the types of sensory evaluation methods that are common used and application of the methods in both product development and human nutrition. Students develop skills in implementing and analysing basic sensory tests. Topics include: discrimination testing, descriptive analysis, hedonic testing, individual differences in perception, food quality perception, and product development. Knowledge and skills obtained through this unit are important for students who seek employment in the food industry (e.g. product developers, brand builders, consumer marketing insight manager, and sensory panel leader), nutrition and health related organisations (e.g. Nutrition Australia) and research (e.g. market research agency, sensory and consumer scientist, food scientist and market analyst).

### Assessment

- Assessment task 1: Sensory laboratory and laboratory write-up (2000 words) 50%
- Assessment task 2: Practical test (15 minutes) 20%
- Assessment task 3: Examination (1.5 hours) 30%

## HSN227 – Volunteering in Exercise and Nutrition Sciences

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jennifer McCann*

*Prerequisite: Completion of 8 credit points, at least 4 should be HSN-coded units if volunteering in a food or nutrition organisation, or HSE-coded units if volunteering in a sport or exercise organisation. Enrolment into this unit is restricted; you are strongly advised to consult with your Student advisor or call 9251 7777 before applying, to ensure you have elective space in your course to undertake this unit.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): There are no scheduled learning activities for this unit as it is a placement unit.*

### Content

The unit aims to provide students with an opportunity, as part of their course, to prepare for, undertake and reflect on a volunteering experience in the area of exercise or nutrition. Students will make a contribution to an organisation and develop their skills and experience in a professional context. Students will undertake a total of 100 hours of volunteering during the trimester in one or more organisations, and are responsible for selecting and negotiating an appropriate volunteer experience subject to approval from the unit chair. Students will initially complete cloud (online) learning modules that will assist them in preparing for the volunteering experience. The volunteering experience will enable students to develop graduate learning outcomes such as communication, digital literacy and critical thinking and provide students with opportunities to develop skills and knowledge in areas of exercise or nutrition which will enhance their professional development and vocation potential

*Note: If you are interested in applying for this unit, please email [health-wil@deakin.edu.au](mailto:health-wil@deakin.edu.au).*

You are required to find a volunteer placement position for yourself. You should research the type of volunteering opportunities that interest you and contact the organisation/s to seek the availability of a placement position with that organisation.

If you are undertaking more than one unit which has a placement component, the placement organisations must be different for each unit. For example, if you

are undertaking HSN227 Volunteering in Exercise and Nutrition Sciences and HSN311 Food and Nutrition Practicum, you will need to find two separate organisations for each placement.

*Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office at [hsn227@deakin.edu.au](mailto:hsn227@deakin.edu.au) as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Volunteering preparation including report on host organisation, project proposal or description of the tasks the student will complete and goal setting (1200 words) 30%
- Assessment task 2: Reflective journals (four 400 word reflections) 30%
- Assessment task 3: Mock interview (5 minute video responding to interview questions) 15%
- Assessment task 4: Development of a professional online profile (700 words) and a reflective piece on how peer feedback was used to improve the student's online profile (300 words) 25%

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## HSN301 – Diet and Disease

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrnambool, Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shaun Mason*

*Prerequisite: HSN211*

*Corequisite: Nil*

*Incompatible with: HSN703*

*Scheduled learning activities – campus:*

*Burwood (Melbourne) students: 2 x 1 hour classes per week and 6 x 2 hour face-to-face or cloud (online) seminars per trimester.*

*Waurin Ponds (Geelong) students: 2 x 1 hour stream or online recorded class per week and 6 x 2 hour face-to-face or online seminars per trimester.*

*Warrnambool students: 2 x 1 hour stream or online recorded class per week and 6 x 2 hour face-to-face or online seminars per trimester.*

*Seminar attendance is not a hurdle requirement but attendance is strongly recommended.*

*Scheduled learning activities – cloud (online): Cloud (online) students: 2 x 1 hour stream or online recorded class per week and 6 x 2 hour cloud (online) seminars per trimester.*

*Recorded Burwood (Melbourne) classes will be available to all students via CloudDeakin.*

## Content

This unit concentrates on major nutrition-related components of the major non-communicable diseases that affect the health of developed nations. Topics include: the metabolic syndrome, obesity (regulation of energy balance, health consequences, best practice dietary interventions); cardiovascular disease (atheroma pathophysiology, lipoprotein metabolism, dietary management); type 2 diabetes (T2D) (the role of diet and physiological mechanisms in the pathogenesis and treatment of T2D); nutrient-gene interactions (epigenetic methylation, histone modifications and single nucleotide polymorphisms); mental health (role of nutrients in the brain and effect on several significant mental health pathologies) and cancer (dietary components as indicators, promoters or protective agents).

## Assessment

- Assessment task 1: Assignment 1 (1000 words) 20%
- Assessment task 2: Assignment 2 (2000 words) 40%
- Assessment task 3: Examination (1.5 hours) 40%

## HSN302 – Population Nutrition

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rebecca Lindberg*

*Prerequisite: HSN202 or HSN211*

*Corequisite: Nil*

*Incompatible with: HSN705*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 x 1 hour cloud (online) seminars per trimester*

### Content

This unit deals with the application of nutrition and behavioural approaches to the prevention and amelioration of population health problems. Topics include: key concepts, goals and initiatives in public health nutrition, nutritional deficiencies and over consumption; food insecurity and disadvantaged populations; and food sustainability.

### Assessment

- Assessment task 1: Individual assignment (2000 words) 50%
- Assessment task 2: Five cloud (online) multiple choice/short answer tests (3% each) 15%
- Assessment task 3: Examination (1.5 hours) 35%

## HSN305 – Assessing Food Intake and Activity

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Carley Grimes*

*Prerequisite: HSN211*

*Corequisite: Must be enrolled in or have previously successfully completed HSN010 or HSE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Burwood (Melbourne) students: 1 x 2 hour class per week, 6 x 1 hour campus seminars per trimester and 1 x 2 hour campus practical per trimester.*

*Waurin Ponds (Geelong) students: 1 x 2 hour online recorded classes per week, 6 x 1 hour campus seminars per trimester and 1 x 2 hour campus practical per trimester*

### Content

This unit provides students with an understanding of both theoretical and practical aspects of food, nutrition and physical activity assessment methods, and the ability to apply this knowledge to future workplace requirements. The unit focuses on methods of measuring food and nutrient intake, physical activity, energy expenditure, and body size and composition; reliability, validity, and measurement of errors; nutrition, physical activity, and anthropometric reference standards and recommendations; population norms for dietary intakes, physical activity, and body size and composition; and evaluation and interpretation of dietary intake, physical activity and anthropometric survey data.

### Assessment

- Assessment task 1: Four sets of cloud (online) multiple-choice questions 20%
- Assessment task 2: Assignment (1500 words) 30%
- Assessment task 3: Examination (2 hours) 50%

### Prescribed texts

Gibson, R.S. 2005, Principles of Nutritional Assessment, 2nd ed. Oxford University Press, Oxford, UK.

## HSN307 – Sports Nutrition: Theory and Practice

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dominique Condo*

*Prerequisite: HSN201 or HSN211*

*Corequisite: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar in weeks 2, 4, 6, 8, 10 of trimester to be completed in cloud (online)*

*Scheduled learning activities – cloud (online): 1 x 2 hour online recorded classes per week and 5 x 1 hour cloud (online) seminars per trimester*

## Content

This unit will provide an introduction to the major areas of sport and exercise nutrition for elite athletes and recreational exercisers. It will cover sport and exercise nutrition for pre-, during and post activity considering various sporting activities and body composition considerations. Food and fluid choices for maximising sport and exercise performance will be considered with protein and carbohydrate requirements. A range of supplements will be analysed regarding claims made for performance enhancement and the relationship between exercise and the immune system.

## Assessment

- Assessment task 1: 5 x cloud (online) multiple choice quizzes (5 x 3%) 15%
- Assessment task 2: Written assignment (2000 words), 40% and online oral presentation 10% Total: 50%
- Assessment task 3: Examination (2 hours) 35%

## HSN308 – Food, Nutrition and Society

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rebecca Lindberg*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN704*

*Scheduled learning activities – cloud (online): 5 x 0.5 hour online recorded classes per trimester and 5 x 1 hour cloud (online) seminars per trimester*

## Content

This unit aims to provide an understanding of the social context of food behaviour and its relevance to nutrition education. Topics covered in the unit are: introduction to the history of food, consideration of the variety of social influences on food behaviours (including beliefs, religion, culture, gender, age, body image, media and marketing, and the food environment); and practical applications for understanding and changing eating behaviours.

## Assessment

- Assessment task 1: Assignment (1000 words) plus infographic 40%
- Assessment task 2: Assignment (2000 words) 50%
- Assessment task 3: Two cloud (online) multiple choice tests (5% each) 10%

## HSN309 – Food Policy and Regulation

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Julie Woods*

*Prerequisite: HSN101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 8 x 1 hour seminars per trimester*

## Content

This unit is designed to provide students with an understanding of how food policy and regulation affects the different components of the food system, including food production, processing, marketing, consumption and nutritional health. Food policy is critically important for public health due to its role in food security and sustainability, healthy eating and obesity prevention. The unit also examines food regulation. Food regulation is used by governments to protect the public against potential risks associated with developments in the food system and is also a particularly powerful policy tool for promoting public health benefits by determining the composition and labelling of food products. Case studies including food fortification and food labelling, food security and sustainability and obesity prevention will be reviewed.

## Assessment

- Assessment task 1: Four cloud (online) quizzes and reflection 20%
- Assessment task 2: Written assignment (2000 words) 50%
- Assessment task 3: Written assignment (1500 words) 30%

# HSN311 – Food and Nutrition Practicum

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jennifer McCann*

*Cohort rule: This unit is only available to students enrolled in H315 and D333 OR H300 students completing the Nutrition major sequence (MJ-H000007) or Food Studies major sequence (MJ-H000003).*

*Students can only enrol in this unit after they have received approval from the unit chair.*

*Enrolment into this unit is restricted; you are strongly advised to consult with your Student advisor before applying, to ensure you have elective space in your course to undertake this unit.*

*Prerequisite: After Trimester 2 results are released, students must have completed a minimum of 4 HSNxxx units in their course of which at least two must be at level 2. For food industry practicum students, it is recommended that students complete HSN204 and HSN206 from the Food Science or Food Innovation major sequence.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Minimum of 100 hours on-site training*

## Content

This is a minimum 100 hours on-site training program involving skills development in the broad areas of food and nutrition with topical areas addressed in this unit involving one or more of the following: project analysis in an area of food production, marketing, innovative product formulation, quality assurance, food regulation and analysis, nutritional panel analysis, database development, food service, nutrition policy, nutrition education, community nutrition, surveys and research.

Students must have their placement site secured and pre-placement documentation submitted by the end of April (the actual timing of placements may vary). The Cloud Deakin site will be open with relevant information from the start of the year. Please ensure you check your Deakin email account regularly for updates and placement information.

**Note:**

- Application process: Eligible H300 and H315 students will receive an email approximately mid-September to submit their expression of interest to apply into this unit and application instructions will be included in the email. Please note that the closing date to submit your application will be 9 November 2018.

- If you are undertaking more than one unit which has a placement component, the placement organisations must be different for each unit. For example, if you are undertaking HSN227 Volunteering in Exercise and Nutrition Sciences and HSN311 Food and Nutrition Practicum, you will need to find two separate organisations for each placement.

*Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office at [ens-placements@deakin.edu.au](mailto:ens-placements@deakin.edu.au) as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Pre-placement preparation (CV, cover letter, pre-placement self-assessment, me in a minute video (1 minute))
- Assessment task 2: Career plan (max 1200 words)
- Assessment task 3: Project media report (5 minutes)
- Assessment task 4: Supervisor report, hours log, post-placement self-assessment

To achieve an ungraded pass in this unit all assessment tasks must reach Ungraded Pass.

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## HSN313 – Sensory Evaluation of Foods

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Russell Keast*

*Cohort rule: Only available to students enrolled in D301 and H315. Other students who would like to enrol in this unit must submit their request to [health-enquire@deakin.edu.au](mailto:health-enquire@deakin.edu.au). Enrolment quotas apply.*

*Prerequisite: HSN101 or HSN201 or HSN211*

*Corequisite: Must be enrolled in or have previously successfully completed HSN010*

*Incompatible with: HSN223*

*Scheduled learning activities – campus: 1 x 2 hour class per week – 1 hour class, 1 hour via cloud (online), 2 x 2 hour seminar, 3 x 3 hour laboratory classes during trimester*

### Content

Sensory evaluation is a tool used to measure human response to a variety of stimuli. Students gain knowledge on the types of sensory evaluation methods that are common used and application of the methods in both product development and human nutrition. Students develop skills in implementing and analysing basic sensory tests. Topics include: discrimination testing, descriptive analysis, hedonic testing, individual differences in perception, food quality perception, and product development. As part of this unit, students will participate in mock job interviewing to help the transition from student to the workplace.

### Assessment

- Assessment task 1: Sensory laboratory and laboratory write-up (2000 words) 50%
- Assessment task 2: Two cloud (online) multiple-choice tests (2 x 5%) 10%
- Assessment task 3: Practical test (10 minutes) 10%
- Assessment task 4: Examination (1.5 hours) 30%

### Prescribed texts

Meilgaard, Civille and Carr (2015). Sensory Evaluation Techniques, CRC Press 5th Edition

## HSN315 – Food Manufacturing and Process Innovation

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shirani Gamlath*

*Cohort rule: Only available to students enrolled in H315 and H300, D391 students completing the Food Studies major sequence (MJ-H000003). Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply.*

*Prerequisite: HSN204*

*Corequisite: Must be enrolled in or have previously successfully completed HSN010*

*Incompatible with: HSN306*

*Scheduled learning activities – campus: 1 x 2 hour class (11 weeks) and 1 x 3 hour practical (6 weeks). Students are required to attend 80% of practicals (hurdle requirement).*

### Content

This unit covers basic principles of food processing (e.g. mass balance, fluid flow and heat transfer) and commercial scale processing techniques such as low temperature and thermal processing, drying and concentration, extrusion technology and irradiation. The unit also addresses the principles behind the latest food processing technologies such as minimal processing, high pressure, ultrasonic, pulsed electric field processing and their applications in nutritional retention and functional product development. Throughout the unit, the importance of food safety, quality control and environmental impact will be stressed.

### Assessment

- Assessment task 1: 2 cloud (online) MCQ tests 20%
- Assessment task 2: Individual practical reports (1500 words/3 practical reports per student) 30%
- Assessment task 3: Examination (2 hours) 50%

## HSN319 – Consumer and Sensory Innovation of Food

*Enrolment modes: First offered 2020*

*Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gie Liem*

*Prerequisite: HSN223 or HSN313*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 hour class each week, 1.5 hour seminar in weeks 2, 4, 6, 8, 10*

### Content

Today's food environment is complex with a large variety of foods for consumers to choose from. Our sense of taste, smell, sound, vision and touch play a key role in consumer choice. These senses are triggered by the product as well as marketing messages. This unit will discuss the interplay between sensory science and marketing, also known as "sensory marketing". Sensory marketing includes research investigating how sensory perception influences marketing messages and how marketing messages influences sensory perception with the aim to shape consumers' product quality perception and buying behaviour. Topics include: the influence of scent on consumer behaviour, role of sound on perception of product quality, how taste is manipulated by marketing messages and multi-sensory approached in food design.

Knowledge and skills obtained through this unit are important for students who seek employment in the food industry (e.g. product developers, brand builders, consumer marketing insight manager, and sensory panel leader), nutrition and health related organisations (e.g. Nutrition Australia) and research (e.g. market research agency, sensory and consumer scientist, food scientist and market analyst).

*Note: New unit 2020*

### Assessment

- Assessment task 1: Create and critically analyse an innovative food product by making use of sensory marketing principles (1500 words) 45%
- Assessment task 2: Reflection on the comments provided to Assessment task 1 (500 words) 10%
- Assessment task 3: Case study report (2000 words) 45%

## HSN320 – Trends in Product Development

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shirani Gamlath*

*Cohort rule: Only available to students enrolled in H315 and students enrolled in D391, H300 Food Studies major sequence (MJ-H000003). Other students who would like to enrol in this unit must submit their request to [Health-enquire@deakin.edu.au](mailto:Health-enquire@deakin.edu.au). Enrolment quotas apply.*

*Prerequisite: HSN315*

*Corequisite: Must be enrolled in or have previously successfully completed HSN010*

*Incompatible with: HSN306*

*Scheduled learning activities – campus: 1 x 2 hour class (7 weeks) and 1 x 3 hour practical (10 weeks). Students are required to attend 80% of practicals (hurdle requirement)*

### Content

This unit focuses on the trends in product development and stages involved in developing novel food products using functional food ingredients through knowledge of product formulation, processing, packaging and labelling, safety and marketing. Students will gain practical experience in all stages of product development by designing a novel product and packaging to meet current food trends. Throughout the unit, the importance of food safety, quality control and environmental impact will be stressed. This unit provides knowledge and skills to undertake product development roles in the food industry.

### Assessment

- Assessment task 1: 2 cloud (online) MCQ tests 10%
- Assessment task 2: Individual contribution to team project report (1500 words per student) and oral presentation 50%
- Assessment task 3: Examination (1.5 hours) 40%

## HSN360 – International Perspectives in Food and Nutrition

*Enrolment modes: Trimester 3: Study tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Gie Liem*

*Cohort rule: Must be enrolled in H315 Bachelor of Food and Nutrition Sciences; or H343 Bachelor of Exercise and Sport Science; or any Faculty of Health course and completed at least 2 x HSN-coded units at any level.*

*Prerequisite: Must have completed 2 x level 1 or level 2 HSN-coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 1 full day seminar*

*In-person attendance requirements: Study tour of approximately two weeks*

### Content

This unit provides students with the opportunity to learn about the context of food, nutrition and health from an international perspective. The unit will be conducted in the form of a study tour of a pre-determined country and is designed to provide students with the opportunity to enhance their understanding of cross-cultural aspects of food, nutrition and health. The study tour will consist of a range of activities designed to link students with policy makers, consumers, nutrition departments, educators and food production companies in the host country, and to reflect on their own values and approaches in relation to food, nutrition and health.

More information about the study tour program will be available to students by the end of March 2019.

*Note: Limited places are available. The selection process includes a written application and personal interview. Students are strongly advised to consult with their student advisers first before applying, to ensure they have elective space in their course to undertake this unit.*

This unit is being offered in alternate odd years, next offered Trimester 3 2019.

### Assessment

- Assessment task 1: Group pre-departure presentation (30 minutes per group) and written summary 20%
- Assessment task 2: Reflective practice paper (1000 words) 30%
- Assessment task 3: Written briefing paper (2000 words) 50%

### Hurdle requirement

Must pass Assessment task 1.

## HSN414 – Honours Research Project

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 2 Unit Chair: Lukar Thornton*

*Cohort rule: This unit is only available to students enrolled in level 4 Honours*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Negotiable between supervisor and student*

### Content

The range of topics is diverse. Students will be required to select a topic in which they have undertaken prior (third-year) study, and to undertake original research on the topic with the guidance of a supervisor.

### Assessment

- Assessment task 1: Thesis (12,000 words) 100%
- Assessment task 2: Final oral presentation

### Hurdle requirement

Assessment task 2: Final oral presentation.

## HSN701 – Principles of Nutrition

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gunveen Kaur*

*Trimester 3 Unit Chair: Carley Grimes*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol into T1:*

*If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser.*

*If you are enrolled in a Cloud course, you will need to enrol into the Cloud unit offering. T3 Cloud enrolment is open to H511, H517, H616 and H714 students and other postgraduate students enrolled in Cloud course or on campus course.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN201 and HSN211*

*Scheduled learning activities – campus: 5 x 2 hour on campus seminars per trimester in addition to online learning activities*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 x 2 hour cloud (online) seminars per trimester*

### Content

This unit will provide students with an understanding of human nutrient requirements and how these are met through the digestion, absorption and metabolism of food. Content covers the major macronutrients of carbohydrates, lipids and proteins; nutrient transport and storage; energy use by the human body, and control of energy balance. The importance of micronutrients in normal cell functioning; building bones; allowing enzymes, muscles and nerves to function and water balance and electrolyte regulation will be covered with attention paid to the health consequences of micronutrient deficiencies.

### Assessment

- Assessment task 1: 5 x online MCQs throughout the trimester (4% each) 20%
- Assessment task 2: Assignment (2000 words) 45%
- Assessment task 3: Assignment (1500 words) 35%

## Prescribed texts

Whitney E, Rolfes SR, Crowe T, Cameron-Smith D, Walsh A. Understanding Nutrition: Australian and New Zealand edition, 4th edn, Cengage Learning, Australia. 2019.

## HSN702 – Lifespan Nutrition

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sze Yen Tan*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit:*

*If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN202*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 5 x 2 hour cloud (online) seminars per trimester*

### Content

This unit provides students with an overview of nutrition needs across the lifespan and the physiological basis for these needs. Nutritional issues relevant to the stages of pregnancy, lactation, foetal development, infancy, childhood and ageing will be covered and potential intervention strategies identified.

*Note: HSN701 is recommended as a pre-requisite*

### Assessment

- Assessment task 1: Individual assignment (1800 words, 1 minute oral presentation) and learning plan reflection (500 words) 45%
- Assessment task 2: Three cloud (online) multiple-choice tests (5% each) 15%
- Assessment task 3: Case studies 40%

## HSN703 – Diet and Disease

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gunveen Kaur*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit:*

*If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser.*

*If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: HSN701*

*Incompatible with: HSN301*

*Scheduled learning activities – campus: 5 x 2 hour on campus seminars per trimester in addition to online learning activities*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 x 2 hour cloud (online) seminars per trimester*

### Content

This unit concentrates on major nutrition-related components of the major non-communicable diseases that affect the health of developed nations. Topics include: the metabolic syndrome, obesity (regulation of energy balance, health consequences, best practice dietary interventions); cardiovascular disease (atheroma pathophysiology, lipoprotein metabolism, dietary management); type 2 diabetes (T2D) (the role of diet and physiological mechanisms in the pathogenesis and treatment of T2D); nutrient-gene interactions (epigenetic methylation, histone modifications and single nucleotide polymorphisms); mental health (role of nutrients in the brain and effect on several significant mental health pathologies) and cancer (dietary components as indicators, promoters or protective agents).

### Assessment

- Assessment task 1: Four online MCQ Tests 20%
- Assessment task 2: Factsheet (1500 words) 30%
- Assessment task 3: Critical review of the literature (2500 words) 50%

## HSN705 – Public Health Nutrition

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rachel Laws*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit:*

*If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser.*

*If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN302*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 x 2 hour cloud (online) seminars per trimester*

### Content

This unit is the foundation unit in public health nutrition. It deals with the application of nutrition, behavioural and social science approaches to the prevention and amelioration of population health problems. Topics include: key concepts, goals and initiatives in public health nutrition, the social context of food; nutrition related disease-deficiencies and over consumption; the nutrition transition; food security and disadvantaged populations; food sustainability. The unit complements HSN706: Food Policy and Public Health.

### Assessment

- Assessment task 1: Learning reflection on completion of module activities and participation in online discussion (6% per module) 30%
- Assessment task 2: Assignment (1000 words) 25%
- Assessment task 3: Assignment (2000 words) 45%

## HSN706 – Food Policy and Public Health

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mark Lawrence*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: All students:*

*Online and collaborative learning activities, 5 x 2 hour seminars*

*Scheduled learning activities – cloud (online): 5 x 2 hour cloud (online) seminars*

### Content

Food policy affects the structure and operation of food systems and is essential to help protect and promote public health. This unit focuses on the core food policy reference standards (Dietary Guidelines, food selection guides, Nutrient Reference Values) and how food policy and its interventions can be developed, implemented and evaluated to achieve these reference standards. Food has health, economic, social and cultural meanings and consequently food policy often is contested and political – the unit explores the role of evidence and politics in food policy-making. Topical food policy case studies are used to illustrate these concepts, for example policy activities to: protect food security and promote healthy and sustainable diets; prevent obesity and other chronic diseases; and protect public health in food regulation related to food fortification and food labelling.

### Assessment

- Assessment task 1: Assignment (3000 words) 60%
- Assessment task 2: Assignment (2000 words) 40%

## HSN708 – Nutrition Promotion

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tony Worsley*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN210*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 x 2 hour cloud (online) seminars per trimester*

### Content

Nutrition promotion is an important aspect of public health nutrition, essential for the improvement and optimisation of population health. This unit focuses on current examples on nutrition promotion in action, and on the development of practical skills relevant to working in this field. Topics include: the foundations, scope and role of nutrition promotion; nutrition promotion at the levels of individual/group, settings, and community; theories relevant to nutrition promotion; and skills in communication, advocacy, facilitating behaviour change, and program and evaluation planning.

### Assessment

- Assessment task 1: Assignment (2200 words) 45%
- Assessment task 2: Assignment (2200 words) 45%
- Assessment task 3: Four cloud (online) multiple-choice tests (2.5% each) 10%

## HSN709 – Sports Nutrition

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rhiannon Snipe*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN307*

*Scheduled learning activities – cloud (online): 1 x 1 hour online recorded class per week and online independent and collaborative learning activities including 5 x 1 hour cloud (online) seminars per trimester*

### Content

This unit examines the nutritional needs of athletes and people undertaking substantial exercise programs. Topic areas covered include the roles of nutrition in optimising training and sports performance; body composition in relation to sport; provision of fluid, carbohydrate and fat for training, competition and post-exercise recovery; protein requirements for athletes in different sports; role of vitamins and minerals in exercise performance; and supplements and sport.

### Assessment

- Assessment task 1: Four cloud (online) multiple choice quizzes (4 x 5% each) 20%
- Assessment task 2: Assignment (2000 words) 40%
- Assessment task 3: Assignment (1500 words, 30%) and mini oral presentation (3 minutes, 10%) total 40%

## HSN713 – Food, Nutrition and Behaviour

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gie Liem*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN103 and HSN208*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 x 2 hour cloud (online) seminars per trimester*

### Content

This unit overviews the relationships between food consumption and human behaviours. It examines the main social, psychological and biological determinants of human food choice and consumption. It also discusses how human food choice can be changed from a public health as well as an industry point of view.

### Assessment

- Assessment task 1: Essay (3000 words) 50%
- Assessment task 2: Practical assignments (2000 words) 50%

## HSN714 – Systems Thinking in Public Health Nutrition

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Penny Love*

*Previously: Previously coded HSN727 (2 credit points)*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: HSN705 and HSN708*

*Corequisite: Nil*

*Incompatible with: HSN727*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 5 x 2 hour cloud (online) seminars per trimester*

## Content

In this unit students will build on skills and competencies gained via the two prerequisite units. This unit introduces students to the concept of systems thinking in order to understand and intervene around major nutrition related problems. The unit is designed for those students seeking a career in public health nutrition or current public health nutritionists seeking to extend their knowledge and skills in public health nutrition.

This unit focuses on application of systems thinking in public health nutrition and covers the fundamentals of systems thinking theory. It offers an opportunity to apply key methods and approaches in systems thinking to public health nutrition policy and programs. It prepares students to use a systems thinking lens to describe, understand, and anticipate complex behaviour and environments relevant to public health nutrition problems as well as design interventions in keeping with systems thinking.

## Assessment

- Assessment task 1: Group assignment (visual representation of food system issue) 10%
- Assessment task 2: Food system mapping project (2200 words) 50%
- Assessment task 3: Nutrition intervention plan (2000 words) 40%

## HSN715 – Understanding Human Nutrition Research Studies

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ewa Szymlek-Gay*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 5 x 2 hour cloud (online) seminars per trimester*

## Content

Nutrition knowledge is continually changing and this provides challenges to those working in the field of nutrition with providing accurate information to individuals or groups. This unit will provide you with the skills to design and evaluate nutrition research studies. Topics to be covered in this unit include: research planning and dissemination; understanding research methodologies; designing, interpreting and critically analysing research studies including qualitative, quantitative and observational research designs, and; human research ethics principles.

## Assessment

- Assessment task 1: Assignment (2000 words) 40%
- Assessment task 2: Assignment (2000 words) 40%
- Assessment task 3: Four Cloud (online) multiple choice tests: Total 20%

## HSN719 – Assessment Methods for Nutrition and Physical Activity Research

*Enrolment modes: Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Amelia Lee*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN305*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 5 x 2 hour cloud (online) seminars per trimester*

## Content

This unit provides an overview of methods of measuring food intake, physical activity, energy expenditure and body composition at the individual and population level. Practical activities are undertaken to gain a strong understanding of issues in analysing and interpreting data relating to nutritional and physical activity status and body composition. The uses and limitations of each of the assessment methodologies are critically evaluated. Reference standards and Australian norms for nutrition, physical activity and anthropometry are examined. The interpretation of dietary, physical activity and body composition survey data is addressed along with an examination of the theory and practice of validation and measurement error.

## Assessment

- Assessment task 1: Three cloud (online) multiple choice quizzes (15 questions each) 20%
- Assessment task 2: Written report (1500 words) 30%
- Assessment task 3: Major assignment (3000 words) 50%

## Prescribed texts

Gibson, R.S. 2005, Principles of Nutritional Assessment, Oxford University Press, Oxford, UK.

# HSN734 – Obesity Prevention

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Andrew Costanzo*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 5 x 2 hour cloud (online) seminars per trimester*

## Content

The unit provides students with a fundamental understanding of the obesity epidemic and its economic, social-cultural, policy and physical determinants and outcomes. Students will be provided with the best available evidence on what the key components of an obesity prevention program should be. Students obtain the skills required to guide the implementation and evaluation of obesity prevention programs in a range of community settings.

## Assessment

- Assessment task 1: Learning reflections (3% per module) 30%
- Assessment task 2: Assignment (1500 words) 30%
- Assessment task 3: Assignment (1500 words) 40%

# HSN735 – Essentials of Food Science

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shirani Gamlath*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 6 x 1.5 hour online recorded classes per trimester and 6 x 1 hour cloud (online) seminars per trimester*

## Content

This unit provides students with theoretical knowledge and skills in food science to advance in nutrition and health related careers. Specific topics to be covered include: characteristics and properties of food commodities, food safety, food preservation, food regulation, functional foods and health claims, food processing and product innovations for improving nutrition and health.

## Assessment

- Assessment task 1: Two Cloud (online) MCQ tests 20%
- Assessment task 2: Assignment 1 (1500 words written and digital component) 40%
- Assessment task 3: Assignment 2 (2000 words) 40%

## HSN738 – International Nutrition

*Enrolment modes: Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Paige van der Pligt*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 scheduled online seminars (recordings provided)*

*Online independent and collaborative learning including 5 scheduled online recorded classes (recordings provided)*

## Content

This unit provides an overview of the epidemiology of the major nutrition-related diseases in developed and developing countries. Topics covered include: the double-burden of nutrition-related disease, the international agreements affecting food production, distribution and trade and domestic food supplies, food security with an emphasis on causal factors, national policy and program interventions addressing famine and under-nutrition and the nutrition transition resulting from changing food consumption and physical activity patterns. Inadequate nutrition is examined from cultural, biological, economic, social and political perspectives. Practical skills in the design, implementation and evaluation of nutrition policies and program interventions addressing both under- and over-nutrition in developing countries are provided.

## Assessment

- Assessment task 1: Assignment (2000 words) 40%
- Assessment task 2: Assignment (2000 words) 40%
- Assessment task 3: 5 cloud (online) forum tasks (5 x 4%) 20%

## HSN740 – Dietetic Research Skills

*Enrolment modes: Medicine Semester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Semester 1 Unit Chair: Nicole Kiss*

*Cohort rule: This unit is only available to students enrolled in H718 Master of Dietetics*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Teaching intensive in the first week of the unit comprising 3 hour classes over a 4 day period. 1 x 2 hour seminar/ tutorial per week for the remainder of the unit.*

## Content

This unit will equip students to understand research in nutrition and dietetics and to critically appraise scientific literature in order to make informed decisions about evidence-based practice. Topic covered in this unit include literature review, critical appraisal, research study designs, interpreting statistics and presentation skills.

## Assessment

- Assessment task 1: Critical appraisal of scientific articles (3000 words) 40%
- Assessment task 2: Group systematic review manuscript (1200 words per student) 40%
- Oral presentation 10% – total 50%
- Assessment task 3: Individual reflection (750 words) 10%

## Prescribed texts

Hodson L, Sharma S, Lovegrove J.A. Nutrition Research Methodologies. John Wiley & Sons

# HSN741 – Postgraduate Nutrition Practicum

*Enrolment modes: Trimester 2: Cloud (online)^*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jennifer Mccann*

*Cohort rule: Unit only available to students enrolled in H616 Graduate Diploma of Human Nutrition or H714 Master of Human Nutrition*

*Prerequisite: Minimum of 6 credit points including HSN701 and HSN702*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 100 hours work-based practicum. In addition, 8 x 1-hour online modules will need to be completed by the end of week 1 of trimester.*

## Content

The unit aims to give students who are well into their studies the opportunity to develop professional skills, applied in a work setting, which are relevant to an area of the human nutrition workforce. Students will undertake a 100-hour work-based practicum which may be undertaken in a full-time block of 2–3 weeks or on a more staggered basis such as 1 day per week for 12–15 weeks. Students will initially complete 8 x 1-hour cloud (online) learning modules that will assist them in preparing for the work-based project as well as providing the practical skills and knowledge required for the placement. Topics covered in this unit include professional growth and self-reflection; professional self-management; developing, planning and managing a project; working effectively as part of a professional team; and communicating effectively and appropriately in a range of contexts, including in a 1-minute video presentation aimed at prospective employers.

Students must complete the pre-placement modules and have all necessary placement documentation submitted by the end of June of the year of the placement.

*Note: Students wishing to enrol in this unit need to contact the unit chair on email [hsn741@deakin.edu.au](mailto:hsn741@deakin.edu.au) for approval of their proposed practicum, ideally by the end of the teaching period in Trimester 1 or earlier.*

*^ Students enrol as Cloud (online) students; however, students are required to attend practicum placement locations.*

*Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office at [ens-placements@deakin.edu.au](mailto:ens-placements@deakin.edu.au) as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Project proposal/plan (1200 words) ungraded pass/fail
- Assessment task 2: Career task (1500 words) ungraded pass/fail
- Assessment task 3: Project report media task, ungraded pass/fail

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

# HSN742 – Food Service Management

*Enrolment modes: Medicine Semester 2: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Semester 2 Unit Chair: Judith Appleton*

*Cohort rule: This unit is only available to students enrolled in H718 Master of Dietetics*

*Prerequisite: All of HSN740, HSN744 and HSN754*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Week 1: Full-time at Burwood (Melbourne); weeks 2 to 5: full time on placement; week 6: 4 hours at Burwood (Melbourne).*

*Narrated power points delivered electronically (3 hours) and eSimulation (1 hour). Seminars, placements and assessment tasks may take place outside of Deakin University teaching periods.*

## Content

The unit provides students with an overview of the dietetics practitioner in food service management, preparing students for their food service placement. Skill development includes principles of food service management, covering menu planning and production, recipe standardisation, evaluation of new menu items for client(s) in health care facilities, management of information systems, quality management in food service, food service systems, food safety, human resource and financial management, Australian health care system, contracting of food services, the development of food and nutrition policies and guidelines and their application to food service.

*Note: Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Team based learning 10%
- Assessment task 2: Menu assessment (2500 words) 25%
- Assessment task 3: Group food service project report (individual contribution 1650 words per student) 25%; Poster presentation 5%; Oral presentation 5% – total 35%
- Assessment task 4: Test (1.5 hours) 30%

## Hurdle requirement

- Professional placement and competency based assessment (ungraded pass/fail)
- Failure of the practicum component will lead to a fail in this unit and may lead to exclusion.

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## Travel commitment

Because of the need for professional practice at external sites, all students undertaking the course should be aware of the required need for travel to placement sites. The requirement to travel is very real and travel time up to 2 hours each way is considered normal. It is also likely that you will have to attend at least one rural placement during the course.

## HSN743 – Nutrition for Healthy Ageing

*Enrolment modes: Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Catherine Milte*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: HSN701*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 5 x 2 hour cloud (online) seminars per trimester*

### Content

This unit will provide students with an overview of issues associated with ageing and the critical role of appropriate nutrition in facilitating good health, preventing illness and enhancing quality of life in older Australians. It will explore the concepts underlying the physiological and psychosocial aspects that impact on nutritional requirements and the nutritional status of older people. Students will develop an understanding of barriers and facilitators of achieving optimal nutritional status in older people and the potential of nutritional strategies to improve quality of life and reduce the impact of chronic disease.

### Assessment

- Assessment task 1: Multiple choice questions via CloudDeakin 10%
- Assessment task 2: Written assignment (2000 words) 45%
- Assessment task 3: Written assignment (2000 words) 45%

### Prescribed texts

Stanner S, Thompson R, Buttriss J, eds. 2009, Healthy Ageing: The Role of Nutrition and Lifestyle, British Nutrition Foundation, Wiley-Blackwell, Oxford UK.

## HSN744 – Principles of Dietetics

*Enrolment modes: Medicine Semester 1: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Semester 1 Unit Chair: Adam Walsh*

*Cohort rule: Only available to students enrolled in H718 Master of Dietetics*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 hours per day in week 1 at Burwood (Melbourne), 1 x 2 hour and 1 x 2.5 hour seminars per week, hospital based classes for 10 full days.*

### Content

This unit introduces students to the dietetic process and specifically the development of dietetic management plans for individual clients. Students will develop skills in the assessment and interpretation of individual anthropometric, biochemical, clinical and nutritional data and counselling skills relevant to professional practice. The unit covers the interactions between nutrition and clinical conditions (weight management, cardiovascular disease, aged care, diabetes, nutrition support, oncology, gastrointestinal diseases, liver disease and renal disease).

### Assessment

- Assessment task 1: Nutrition care plan (3500 words) 35%
- Assessment task 2: Test (2.5 hours) 50%
- Assessment task 3: Reflective practice entries (ungraded pass/fail)
- Assessment task 4: Objective Structured Clinical Examination (OSCE) 15%

### Hurdle requirement

Must pass Assessment tasks 1, 2 and 4

# HSN745 – Community Nutrition

*Enrolment modes:*

*Semester 1: Burwood (Melbourne)*

*Semester 2: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Semester 1 Unit Chair: Alison Spence*

*Semester 2 Unit Chair: Alison Spence*

*Cohort rule: This unit is only available to students enrolled in H718 Master of Dietetics*

*Prerequisite: HSN740 and HSN744*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 weeks part-time at Burwood (Melbourne) pre-placement, 7 weeks full-time community placement.*

*Seminars, placements and assessment tasks may take place outside of Deakin University teaching periods.*

## Content

This unit prepares students for community nutrition placements by developing skills in practical public health nutrition, including preparation of project proposals, budget submissions, project management and evaluation, report writing and addressing the needs of specific groups. Students then apply these skills to complete a community fieldwork project as a group project.

*Note: There is an enrolment quota for this unit. Students wishing to enrol in this unit need to contact the unit chair and/or placement coordinator.*

*Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Individual and Team Based Learning (TBL) tasks 10%
- Assessment task 2: Cultural competency assessment (1000 words) 10%
- Assessment task 3: Placement project report (3000 words per student) 35% and presentation (10%) – total 45%
- Assessment task 4: Community grant application (2000 words) 20% and reflection (500 words) 5% – total 25%
- Assessment task 5: Evaluation of a group education session (1000 words) 10%

## Hurdle requirement

- Professional placement and competency based assessment (ungraded pass/fail)
- Failure of the practicum component will lead to a fail in this unit and may lead to exclusion.

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## Travel commitment

Because of the need for professional practice at external sites, all students undertaking the course should be aware of the required need for travel to placement sites. The requirement to travel is very real and travel time up to 2 hours each way is considered normal. It is also likely that you will have to attend at least one rural placement during the course.

## HSN746 – Nutritional Issues from Early Childhood to Adolescence

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Susan Torres*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: HSN702*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 5 x 2 hour cloud (online) seminars per trimester*

### Content

This unit will provide students with an understanding of specific nutrition issues facing children and adolescents within Australia. The content will include social, environmental and medical factors associated with assessing adequate growth, management of failure to thrive and allergies in infants and children as well as overweight, obesity, and eating disorders in adolescents. Students will develop an understanding of the prevalence of these nutritional issues within Australia and effective management strategies.

### Assessment

- Assessment task 1: Assignment (2000 words) 45%
- Assessment task 2: Assignment (2000 words) 45%
- Assessment task 3: Multiple choice questions (MCQ) via CloudDeakin 10%

## HSN747 – Clinical Dietetic Practice

*Enrolment modes:*

*Medicine Semester 1: Burwood (Melbourne)*

*Medicine Semester 2: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Semester 1 Unit Chair: Claire Margerison*

*Semester 2 Unit Chair: Claire Margerison*

*Cohort rule: This unit is only available to students enrolled in H718 Master of Dietetics*

*Prerequisite: HSN744 and HSN754*

*Corequisite: HSN742 – must be passed prior to completing this unit OR undertaken in the same semester*  
*Incompatible with: Nil*

*Scheduled learning activities – campus: 6 days full time at Burwood (Melbourne) and 1 day full time off campus pre-placement, 10 weeks full time clinical placement, 2 days at Burwood (Melbourne) post-placement.*

*Teaching, placements and assessment tasks may take place outside of Deakin University teaching periods.*

### Content

This unit provides professional placement experience in the clinical setting. Students will be given the opportunity to demonstrate skills in independent dietetic case management of individuals during their placement. Students will be required to develop and present client case management plans in both oral and written formats.

*Note: Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Collaborative practice reflection (1000 words) 15%
- Assessment task 2: Nutritional care plans (4000 words) 40%
- Assessment task 3: Major case study assignment (3000 words) 35%; Major case study oral presentation 10%

## Hurdle requirement

- Professional placement and competency based assessment (ungraded pass/fail)
- Failure of the practicum component will lead to a fail in this unit and may lead to exclusion.

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## Travel commitment

Because of the need for professional practice at external sites, all students undertaking the course should be aware of the required need for travel to placement sites. The requirement to travel is very real and travel time up to 2 hours each way is considered normal. It is also likely that you will have to attend at least one rural placement during the course.

# HSN749 – Biochemistry and Physiology for Human Nutrition

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Severine Lamon*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 x 2 hour cloud (online) seminars per trimester*

## Content

This unit will provide students with foundation knowledge of chemistry, biochemistry and physiology and will start integrating this knowledge to the context of nutrition. At the end of this unit, the students will be able to actively engage in the chemistry and biochemistry of higher tertiary nutrition subjects.

## Assessment

- Assessment task 1: Multiple choice quizzes (4 quizzes) 20%
- Assessment task 2: Introduction to literature search (750 words) 30%
- Assessment task 3: Mini literature review (1500 words) 50%

## HSN750 – Nutrition Research Project Part A

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Ewa Szymlek-Gay*

*Prerequisite: HSN715 and completion of at least three other HSN level 7 credit points*

*Corequisite: Nil*

*Incompatible with: HSN712, HSR701*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 x 1 hour cloud (online) seminars per trimester. Students have weekly one on one contact (either on campus or online/phone) with a supervisor throughout the trimester*

### Content

This unit is the first part of a two part activity involving a literature review and development of a research proposal (HSN750 Nutrition Research Project Part A) and then the conduct of the research and writing of a thesis as part of HSN751 Nutrition Research Project Part B. HSN750 can be selected as a stand-alone unit where you do not have to complete HSN751. HSN750 focuses on literature searching, reading and evaluating published work, writing a literature review, defining a research aim and developing a testable hypothesis. Students will critically evaluate an ethics application. The research proposal and project is subject to approval by the unit chair.

*Note: Students who completed HSN711 must select an alternative topic for this unit.*

### Assessment

- Assessment task 1: Evaluation of ethics application (1500 words) 12.5%
- Assessment task 2: Literature review (5000 words) 75%
- Assessment task 3: Research plan (1500 words) 12.5%

## HSN751 – Nutrition Research Project Part B

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Susan Torres*

*Prerequisite: HSN750*

*Corequisite: Nil*

*Incompatible with: HSN712, HSR702*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 2 x 1 hour cloud (online) seminars per trimester.*

*Students have weekly one on one contact (either on campus or online/phone) with a supervisor throughout the trimester.*

### Content

This unit follows on from HSN750 Nutrition Research Project Part A and provides the opportunity to conduct research and write a thesis in a specified area of human nutrition. It will focus on the practical skills of data collection (where appropriate), analysis, presentation and interpretation and preparation of a thesis.

### Assessment

Assessment task 1: Research thesis (10,000 words) 100%

### Hurdle requirement

- Evidence of approval from an appropriate Ethics Committee (if applicable)
- Submission of a final research plan developed as a component of HSN750 including an oral presentation of the research proposal.

## HSN753 – Research Practice in Human Nutrition

*Enrolment modes: Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Katherine Livingstone*

*Cohort rule: H511, H517, H616 and H714 students: enrol via Cloud (online) mode only. H748 students: enrol via Campus mode at Burwood (Melbourne) only.*

*Other Postgraduate students who wish to enrol in this unit: If you are enrolled in an on-campus course, you can enrol in the on-campus unit offering and you will need to request a manual enrolment from your Student Adviser. If you are enrolled in a Cloud course, you need to enrol into the Cloud unit offering.*

*Prerequisite: HSN715*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 x 2 hour seminars per trimester*

*Scheduled learning activities – cloud (online): 5 x 2 hour cloud (online) seminars per trimester*

### Content

This unit will provide students with an overview and understanding of the research process. Students will gain experience in either quantitative or qualitative research methods through the completion of an independent research project. Through completion of this unit, students will develop skills in critiquing literature within the area of nutrition sciences, defining a research question, writing aims and hypotheses, developing research methodologies, conducting data analysis and preparing and disseminating research findings.

### Assessment

- Assessment task 1: Literature review and research proposal (2000 words) 40%
- Assessment task 2: Research manuscript (3000 words) 60%

## HSN754 – Dietary Modification to Improve Health

*Enrolment modes: Medicine Semester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Semester 1 Unit Chair: Elena George*

*Cohort rule: This unit is only available to students enrolled in H718 – Master of Dietetics*

*Prerequisite: Nil*

*Corequisite: HSN070 and HSN744*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 3-hour practical per week*

### Content

This unit introduces students to the key concepts in dietary prescription within the context of medical, dietary and social issues affecting a broad range of clinical conditions, including but not limited to obesity, diabetes, oncology, gastrointestinal disease, liver disease and renal disease. Cultural, social and psychological factors that influence the dietary prescription in these populations will be considered.

### Assessment

- Assessment task 1: Group practical reports (individual contribution 800 words per student) 50%
- Assessment task 2: Reflection (500 words) 10%
- Assessment task 3: Media piece and annotated bibliography (1500 words) 25%
- Assessment task 4: Ready reckoner (700 words) 15%

### Prescribed texts

Food literacy – Helen Vidgen, eBook London; New York: Routledge, 2016

Food cultures of the world encyclopedia [electronic resource] / Ken Albala, editor, E-book | Greenwood | 2011

# HSN758 – Professional Practice for Dietetics

*Enrolment modes: Medicine Semester 1: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Semester 1 Unit Chair: Paige Van der Pligt*

*Cohort rule: Only available to students enrolled in H718 Master of Dietetics*

*Prerequisite: HSN744, HSN740 and one of HSN745 or HSN747*

*Corequisite: HSN745 or HSN747*

*Incompatible with: HSN752*

*Scheduled learning activities – campus: 6 weeks of teaching consisting of seminars, presentations, placement and time for assessment task completion. Seminars, and assessment tasks may take place outside of Deakin University teaching periods.*

## Content

This unit will explore a range of issues including ethical considerations in professional practice; business skills, entrepreneurship and innovation in dietetics; the importance and value of successful interprofessional collaboration; leadership and professionalism; and career development activities as students prepare to enter the dietetic workforce. A one week (Monday to Friday) elective placement will be run as part of this unit and students are encouraged to organise their own placement in an area of Dietetics in which they are particularly interested and which may form part of their career focus.

*Note: Note for all students enrolling into this unit: You must complete your placement hours within your trimester of enrolment of the placement unit, unless otherwise stated directly by the Unit Chair. If you are not able to complete the placement by the end your trimester of enrolment in the placement unit, please email the School of Exercise and Nutrition Sciences Professional Placement Office at [ens-placements@deakin.edu.au](mailto:ens-placements@deakin.edu.au) as soon as possible.*

*Note for International students only: If you are not able to complete your placement by your visa expiry date, please note that you will be liable for any costs involved with extending your stay in Australia, for example: visa extension application cost and extra living expenses.*

## Assessment

- Assessment task 1: Reflection on results of unconscious bias test (1000 words) 10%
- Assessment task 2: Group ethical debate – 10 minutes each group 15%
- Assessment task 3: Individual Professional Development Assignment (3000 words) 30% and mock job interviews (15 minutes) 20% – Total 50%
- Assessment task 4: Elective placement log book 15% and oral presentation (5 minutes) 10% – Total 25%

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of placement will not be able to undertake placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## Travel commitment

Because of the need for professional practice at external sites, all students undertaking the course should be aware of the required need for travel to placement sites. The requirement to travel is very real and travel time up to 2 hours each way is considered normal. It is also likely that you will have to attend at least one rural placement during the course.

## HSN760 – International Perspectives in Food and Nutrition

*Enrolment modes: Trimester 3: Study tour*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Gie Liem*

*Cohort rule: Must be enrolled in: H511 Graduate Certificate of Human Nutrition; or H616 Graduate Diploma of Human Nutrition; or H714 Master of Human Nutrition; or H718 Master of Dietetics; or any Faculty of Health postgraduate course and completed at least 2 x Nutrition coded units (eg. HSN7XX).*

*Prerequisite: Must have completed 2 x level 7*

*HSN-coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 1 full day seminar (Blackboard Collaborate)*

*In-person attendance requirements: Study tour of approximately two weeks*

### Content

This unit provides students with the opportunity to learn about the context of food, nutrition and health from an international perspective. The unit will be conducted in the form of a study tour of a pre-determined country and is designed to provide students with the opportunity to enhance their understanding of cross-cultural aspects of food, nutrition and health. The study tour will consist of a range of activities designed to link students with policy makers, consumers, nutrition departments, educators and food production companies in the host country, and to reflect on their own values and approaches in relation to food, nutrition and health.

More information about the study tour program will be available to students by the end of March 2019.

*Note: Limited places are available. The selection process includes a written application and personal interview. Students are strongly advised to consult with their student advisers first before applying, to ensure they have elective space in their course to undertake this unit.*

This unit is being offered in alternate odd years, next offered Trimester 3 2019.

### Assessment

- Assessment task 1: Group pre-departure presentation via Blackboard Collaborate (30 minutes per group) and written summary 20%
- Assessment task 2: Reflective practice paper (1500 words) 30%
- Assessment task 3: Written briefing paper (2500 words) 50%

### Hurdle requirement

Must pass Assessment task 1

## HSO102 – Foundations of Occupational Science and Therapy A

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*Previously coded as: HSO101*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Emma Clark*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Stream 1 (Academic): 1 x 1 hour class plus 1 x 1 hour seminar per week; Stream 2 (Practice education): Practice education comprising 1 day per week or equivalent*

### Content

This level 1 unit, which comprises both academic and fieldwork streams, introduces students to occupational science and therapy. It examines the current and potential roles occupational science and therapy play in individual and population health settings. Students are encouraged to draw on personal and fieldwork experiences as a first step to understanding themselves as occupational beings and to developing appropriate learning objectives. Topics include conducting initial interviews, introduction to group work and the fundamentals of occupational performance assessments. The historical and modern perspectives of the profession will be examined in relation to psychological, sociological, anthropological and biomedical concepts.

A range of practice contexts will be explored through both curriculum and fieldwork. Students will solve occupation-based case scenarios through seminars, experiential learning, practice education preparation and experience in the field. Through practice education students will participate in site visits and observation of occupational therapy programs.

### Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Assessment

- Assessment task 1: Written paper (1400 words) 35%
- Assessment task 2: Professional development portfolio 40%
- Assessment task 3: Practical examination (consisting of three tasks) 25%

### Hurdle requirement

Practical examination. Failure of the practical examination will lead to failure of the unit.

### Prescribed texts

Brown, T., et al., Eds. (2017). Occupational Therapy in Australia: Professional and practice issues. NSW, Allen & Unwin

## HSO104 – Foundations of Occupational Science and Therapy B

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*Previously coded as: HSO101*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Emma Clark*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: HSO102*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Stream 1 (Academic): 1 x 1 hour class plus 1 x 1 hour seminar per week; Stream 2 (Practice education): practice education comprising 1 day per week or equivalent*

### Content

This level 1 unit comprises both academic and practice education streams. As such it aims to continue the development of students' knowledge in occupational science and therapy. In this unit students will work individually and in small groups to explore population and ecological health issues using occupational perspectives.

Students will employ an active research approach to better understand issues affecting the health of community groups and to consider ways in which occupational therapy seeks to promote health for all. Topics include philosophical, theoretical, and scientific concepts of occupation, health promotion, social and ecological concepts of health; action research methodology; community education; group work; occupational science concepts, needs, deprivation, alienation, adaptation, balance, environments, justice, burnout and boredom; the relationship between occupation and health; and practice contexts involving organisations and communities. Classes, seminars, issue-based learning, presentations and assignments guide project development and learning which concludes in class presentations.

Students will also participate in and observe practice in health and community organisations, developing occupational science and therapy skills and competencies. Students will be encouraged to draw on personal and fieldwork experiences to understand themselves as occupational beings and to begin the development of reflective professional practice.

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Assessment

- Assessment task 1: Written paper (1200 words) 30%
- Assessment task 2: Group e-portfolio 15%
- Assessment task 3: Professional development portfolio 35%
- Assessment task 4: Practice education (previously named Fieldwork) assessment 20%; SPEF-R and timesheet – Pass/Fail

Failure of a practice education component in the Bachelor of Occupational Therapy will normally lead to failure of the unit and may lead to exclusion.

*Note: students must achieve a pass in both Part A HSO102 and Part B HSO104 in order to meet the prerequisite requirements of HSO202 and HSO205.*

### Prescribed texts

Stagnitti, K., Schoo, A., & Welch, D. (Eds.). (2010). Clinical and fieldwork placement. Oxford, Sydney.

## HSO202 – Impact of Health Conditions On Occupational Performance

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Pearse Fay*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: All of HSO102, HSO104 (or HSO101), HSE102 and HSE208*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Stream 1 (Academic) 1 x 2 hour online class, 1 x 2 hour seminar per week*

*Stream 2 (Practice education) 1 week full time simulated practice education (2 blocks)*

### Content

This level 2 unit builds on the bioscience units and links them with occupational therapy theoretical and practice elements. A range of health conditions commonly encountered in occupational therapy practice is presented and explored in relation to their impact on occupational performance. An occupational therapy model will be used to provide a framework to analyse conditions considering musculoskeletal, neurological, psychological, cognitive, affective, and social factors. Case scenarios drawn from health and human service practice will be used to provide an introduction to clinical reasoning, theoretical concepts and models of occupational therapy, client centred processes and potential areas of occupational therapy intervention.

The students will participate in problem based learning seminars and resource sessions with consumers and/or expert practitioners.

Students will consolidate their learning through a week of simulated practice education (full time) in which they will have the opportunity to implement their newfound knowledge in a simulated practice education setting, run by the unit chair and supported by experienced clinicians.

## Assessment

- Assessment task 1: Case study (1000 words) 35%
- Assessment task 2: Multiple choice and short answer exam (35%)
- Assessment task 3: Written case report (test) at the completion of Simulation week 30%
- Assessment task 4: SPEF-R

## Hurdle requirement

- Must complete all placement requirements
- Must pass Assessment Task 4

## Prescribed texts

Atchison, B. & Dorette, D (2016). Conditions in Occupational Therapy 5th Ed. Lippincott Williams & Wilkins, Philadelphia

# HSO205 – Occupations in Childhood Development

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*Previously coded as: HSO201*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tara Roberts*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: HSO102, HSO104 (or HSO101)*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour 45 minute Class/Lecture and 1 x hour 15 minute Seminar/Tutorial per week. Total contact hours: 3 hours per week*

## Content

This level 2 unit, addresses concepts related to the occupational development of children from birth to adolescence. There is a focus on identifying the developmental progression of occupations over time. Students will develop their ability to evaluate children's occupational performance via clinical observation supported by occupation-based assessment tools. Students will describe and apply how meaningful occupations such as play and self-care, can be impacted upon by person and environmental factors by the application of occupational therapy theoretical models. Students will analyse and articulate how specific health conditions can impact upon both children, and their families', participation in meaningful and health promoting occupations.

Students will learn how to interpret this information to formulate occupation and family centred goals. Sourcing, selecting, justifying and articulating evidence based Occupational Therapy intervention strategies and plans to achieve these goals will be investigated.

Students will address these topics via attendance at weekly classes, 'hands-on' problem based learning seminars each week and interactive on-line activities and engaging assessment tasks

## Assessment

- Assessment task 1: Weekly online quiz 10%
- Assessment task 2: Childhood Occupation-Task Analysis (1500 words) 30%
- Assessment Task 3: Audio-visual presentation (maximum 6 slides/8minutes). The impact of a health condition on a child's occupational performance. 20%
- Assessment task 4: Case Study Report (1500 words) 40%

*Note: students must achieve a pass in both HSO205 and HSO206 in order to meet the prerequisite requirements of HSO303 and HSO305.*

## Prescribed texts

Case-Smith, J., & O'Brien, J. C. (2015). Occupational Therapy for Children and Adolescents (7th ed). St Louis, Missouri: Elsevier Health Sciences.

# HSO206 – Occupation Across the Lifespan

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*Previously coded as: HSO201*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Valerie Watchorn*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: All of HSO102, HSO104, HSO205 OR All of HSO102, HSO101, HSO205*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Trimester 1: 1 x 2 hour class per week and 1 x 1 hour seminar per week*

*Trimester 2: 1 x 1 hour class per week and 1 x 1.5 hour seminar per week*

## Content

This level 2 unit, which comprises both academic and practicum streams, addresses concepts related to occupational performance across the lifespan, specifically focusing on adolescence to the final stages of life. Its focus incorporates all of the features listed in HSO205, but with a focus on different age groups.

## Assessment

- Assessment task 1: Written report (1200 words) 30%
- Assessment task 2: Interview and individual written report (1600 words) 40%
- Assessment task 3: Small group presentations 20%
- Assessment task 4: Online quizzes 10%

*Note: Students must achieve a pass in both HSO205 and HSO206 in order to meet the prerequisite requirements of HSO303 and HSO305.*

## Prescribed texts

Cronin, A. & Mandich, M. (2016). Human Development and Performance throughout the Lifespan. Boston, MA: Cengage Learning.

## HSO207 – Neurological Structure, Function and Plasticity

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*Previously coded as: HSE207*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Johanne Walker*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: HBS109, HSE102, HSE208*

*Corequisite: Nil*

*Incompatible with: HPS205, HPS675, HPS775, HSE207*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 2 hour laboratory per week*

## Content

This level 2 unit builds on the bioscience units in first year: Human Structure and Function, Functional Human Anatomy, and Integrated Human Physiology. The unit focuses on neurological processes linked to sensory, motor and autonomic systems. The content includes: central nervous system organisation and function; cortical functions such as cognition, memory, perception and language; behaviour; and developmental issues in relation to the brain and central nervous system.

Case studies are used to demonstrate: the implications of conditions or lesions to various parts of the nervous system; the resulting occupational performance and behavioural implications; commonly used clinical assessment tools and potential for occupational therapy.

## Assessment

- Assessment task 1: Group assignment 20%
- Assessment task 2: Written assignment (1500 words) 30%
- Assessment task 3: Examination 50% (comprising – end of trimester examination (2 hours) 40%, 10 x assessment tasks throughout the trimester 10%)

## Prescribed texts

Kalat, J. W. (2019). Biological psychology (13th Ed.). Boston, MA: Cengage Learning

## HSO208 – Analysis of Occupational Performance

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Pearse Fay*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: All of HSE102, HSO202, HSO207*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Stream 1 (Academic) 1 x 1 hour class, 1 x 2 hour seminar per week*

*Stream 2 (Practice education) 1 week full time simulated practice education (2 blocks)*

## Content

The unit aims to provide students with an understanding of the range of factors that can both enhance and be a barrier to the occupational performance of individuals. Students will be introduced to the skills and method of task analysis to identify the physical, cognitive, behavioural, psychosocial and contextual factors that can influence a person's ability to perform everyday activities. From the framework of task analysis, students will apply this approach to a range of occupations and workplace scenarios.

The unit also includes core occupational therapy assessments of upper limb function including goniometry, manual muscle testing and sensory assessment. Teaching methods include classes, seminars, group-based learning and work-site visits. Through this unit, students will begin to gain an understanding of how everyday activities can be assessed and structured to facilitate the participation of individuals in their chosen and required occupational performance activities.

## Assessment

- Assessment task 1: Written case report (1200 words) 30%
- Assessment task 2: Practical examination (20 minutes) 30%
- Assessment task 3: Practice education simulation workplace test 40%
- Assessment task 4: SPEF-R (Pass/fail)

## Hurdle requirement

- Must complete all placement requirements
- Must pass Assessment task 2
- Must pass Assessment task 4

## Prescribed texts

Radomski, M.V., & Trombly Latham, C. A. (2014). Occupational therapy for physical dysfunction (7th ed.). Philadelphia: Lippincott, Williams and Wilkins.

Stagnitti, K., Schoo, A., & Welch, D. (2010). Clinical and fieldwork placement in the health professions. Melbourne: Oxford University Press.

## Content

In this unit students will be introduced to the fundamentals of evidence based practice, research design, methods and approaches. It builds on previous learning in HBS108 to enable the research of occupational performance issues. It covers qualitative, quantitative and critical methods; developing research proposals; understanding environmental contexts in which research occurs and occupational performance issues in a research framework. Topics to be addressed include: formulating research questions, understanding research methods and design, collecting and generating data, analysis of statistics, outcomes, evidence and reporting; collaborative and participatory approaches to research. Teaching methods will include online modules and four 2 hour seminars spread across the trimester.

*Note: ^Students enrol as Cloud (online) students; however there are significant campus requirements*

## Assessment

- Assessment task 1: SWOT Analysis of Evidence Based Practice (1500 words) 35%
- Assessment task 2: Seminar quizzes 15%
- Assessment task 3: Case study (2500 words) 50%

## Prescribed texts

# HSO302 – Evidence-Based Occupational Therapy Practice 1

*Enrolment modes: Trimester 1: Cloud (online)^*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kelli Nicola-Richmond*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: HBS108 and HSO208*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per week. Other synchronous online learning activities include library seminar and Q & A sessions*

# HSO303 – Evidence-Based Occupational Therapy Practice 2

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kelli Nicola-Richmond*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: HBS108, HSO302*

*Corequisite: HSO306*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour Seminar A and 1 x 2.5 hour Seminar B per week*

## Content

This unit links occupational therapy research and practice. It emphasises accountability in practice and the application of research findings to intervention. Topics addressed in the unit include different ways of knowing; understanding and applying research approaches; personal and professional accountability; documenting and evaluating professional evidence; critical analysis of research findings; reporting and presenting; considering clinical effectiveness versus cost effectiveness; knowledge generation, quality assurance and use of clinical pathways. Students will learn how to articulate evidence-based questions, search for evidence using library databases and critically appraise research data from the perspective of clinical effectiveness and rigor of research approach. Students will also research and present current best practice information relating to occupational therapy in various practice settings and will report their findings about approaches used in specific case scenarios. Teaching methods will include evidence-based practice resource seminars, computer-based seminars and will also draw on experiential learning in fieldwork.

*Note: This unit is taught intensively for 5 weeks.*

## Assessment

- Assessment task 1: Oral presentation 15%
- Assessment task 2: EBP case report (1000 words) 35%
- Assessment task 3: Literature review (2000 words) 50%

## Prescribed texts

# HSO304 – Work Integrated Learning A

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Tara Roberts and Chloe O'Connor*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: HSO302, HSO305*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 8 weeks of fieldwork totalling approximately 320 hours.*

## Content

This practicum unit is aimed at students developing competence as beginning practitioners in occupational therapy. It builds on and extends competency development from fieldwork, enabling students to: apply occupational therapy reasoning processes to a range of practice situations; attain particular skills according to OT Australia professional competency requirements; discuss management issues related to practice, and demonstrate effective communication skills. It will take place in a variety of agencies/ organisations within the health and related areas. As appropriate, fieldwork will be supported by additional learning experiences to assist students develop competencies, management skills and an appreciation of the need for practice to be based on evidence that can be cited and analysed.

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## Assessment

- Assessment task 1: School report (2000 words) 50%
- Assessment task 2: 20 minute Video Presentation 50%

Failure of a fieldwork component in the Bachelor of Occupational Therapy will normally lead to failure of the unit and may lead to exclusion from the course.

## HSO305 – Occupational Performance: Evaluation and Intervention 1

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sally Logan*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: All of HSO202, HSO205, HSO206, HSO207*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Stream 1 (Academic): 1 x 1 hour class plus 1 x 2 hour seminar per week; Stream 2 (Fieldwork): fieldwork comprising 1 day per week or equivalent*

### Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. ## HSO306 – Occupational Performance: Evaluation and Intervention 2

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sally Logan*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: HSO305*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 4 hour seminars per week*

### Content

The second of the skill development units is aimed at learning about the design and implementation of intervention. It links theoretical models to selection, review and modification of occupational therapy programs. Topics to be addressed in this unit include: client-centred interaction and participation; reviewing evidence to identify best practice and standards; goal identification and development; innovation and problem-solving; evaluation strategies, reviewing progress, and documenting outcomes. Teaching methods will include classes, PBL learning seminars, and small group activities.

*Note: This unit is taught intensively for 5 weeks.*

### Assessment

- Assessment task 1: Case report 1 (1000 words) 30%
- Assessment task 2: Case report 2 (1000 words) 30%
- Assessment task 3: Case report 3 (1200 words) 40%

### Hurdle requirement

Practical examination – graded as Pass or Fail

## Prescribed texts

## HSO307 – Psychosocial Influences on Occupational Performance

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Genevieve Pepin*

*Cohort rule: Must be enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: Must have passed all of HSO102, HSO104, HSO206, HSO207*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online):*

### Content

In this unit students will develop their understanding of occupational performance in a psychosocial context throughout the lifespan. It links scientific understanding and knowledge of diverse psychosocial conditions with occupational performance. It covers approaches to, and methods of, identifying people's needs, choices, capacities and preferences within a person-centred approach fostering recovery and leading to the collaborative identification of specific intervention and practice goals. Topics to be addressed include: describing and understanding common psychosocial and mental health conditions, selecting measurement tools and methods, administering occupational therapy assessments and evaluations, developing observation skills, developing intervention plans, report writing and case presentation. Teaching methods will include classes, seminars, scenario-based learning and small group discussions.

### Assessment

- Assessment task 1: Reflective essay (1200 words) 30%
- Assessment task 2: Case report (1200 words) 30%
- Assessment task 3: Practical examination (30 minutes) 40%

### Hurdle requirement

Practical examination. Failure of the practical examination will lead to failure of the unit

### Prescribed texts

Stoffel, V.C. & Brown, C. (2011). Occupational Therapy in Mental Health a Vision for Participation. Philadelphia, PA: F.A. Davis.

## HSO401 – OT Practice Applying Knowledge and Reasoning

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rachel Knight*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: All of HSO303, HSO304, HSO305 and HSO306*

*Corequisite: HSO403*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 20 face to face contact hours in a five week block*

### Content

This unit focuses on management and leadership in healthcare practice, through planning an innovative project for occupational therapy practice. Learning draws on experiences previously gained through prior academic learning and practice education and links to transition to practice content in Trimester 2.

Topics include management principles, styles of leadership, relevance of OT theoretical models, use of occupation-based processes to problem solve, reflection on personal approaches to management in practice and clinical reasoning. Students will develop leadership skills and design an innovative intervention program for a practice setting. Teaching will be face to face and highly interactive with sessions arranged as a series of seminars that will involve classes, discussions, presentations and learning tasks in small groups.

*Note: This unit is taught intensively for 5 weeks.*

### Assessment

- Assessment task 1: Reflective essay (1000 words) 30%
- Assessment task 2: OT practice innovation plan (equivalent 2000 words, comprising oral presentation/s, 5%, report 35%) Total 40%
- Assessment task 3: Review and critique of management skills and development plan (1000 words) 30%

### Prescribed texts

Braveman, B. (2016). Leading & managing occupational therapy services: An evidence-based approach, 2nd Ed. F.A. Davis Company

## HSO403 – Promoting Occupational Engagement Through Assistive Technology

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Valerie Watchorn*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy or H455 Bachelor of Occupational Therapy (Honours)*

*Prerequisite: HSO305, HSO306*

*Corequisite: HSO401 or HSO411*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar plus 1 x 4 hour practical session/site visit per week*

### Content

This unit focuses on the application of assistive technology as a performance facilitator to enhance people's occupational and social lives. This unit builds on knowledge gained from previous units and practice education in relation to human performance, occupational analysis, and environmental contexts. The unit introduces theoretical frameworks that apply person-centred principles specifically to the assistive technology selection process. The Matching Person to Technology (MPT) framework and the Human Activity Assistive Technology (HAAT) model will be applied to a range of scenarios in order to understand factors that may contribute to assistive technology engagement or abandonment.

This unit examines the occupational therapy role of assessment, prescription, technology selection and advocacy in relation to assistive technology. The importance of matching consumer needs with their environmental demands across all life domains and stages is emphasised. This unit emphasises a multidisciplinary approach to assistive technology selection that is informed and driven by consumer engagement. Teaching methods include case scenarios, seminars, web-based simulation resources, site visits and practical assistive technology demonstrations.

*Note: This unit is taught intensively for 5 weeks.*

### Assessment

- Assessment task 1: Resource evaluation (1200 words) 30%
- Assessment task 2: Individual presentation 30%
- Assessment task 3: Case study (1800 words) 40%

## HSO405 – Work Integrated Learning B

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Kelli Nicola-Richmond*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy or H455 Bachelor of Occupational Therapy (Honours)*

*Prerequisite: HSO306, HSO304*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 8 weeks of fieldwork totalling approximately 320 hours*

### Content

The second of two practicum units aimed at students developing competence as beginning practitioners in occupational therapy. It builds on and extends competency development from earlier fieldwork enabling students to apply occupational therapy reasoning processes to a range of practice situations; complete the attainment of particular skills according to OT Australia professional competency requirements; develop management skills related to practice; demonstrate effective professional communication skills; reflect on learning outcomes for their studies. Students will learn to self-evaluate; and discuss their individual professional capabilities according to OT Australia accreditation, be professionally accountable, and articulate professional and personal frames of reference related to occupational therapy practice. It will take place in a variety of agencies/organisations within the health and related areas. Seminars will be integral to assist students with the development of appropriate competencies, management skills, and an appreciation of the need for practice to be based on evidence that can be cited and analysed.

### Assessment

- Assessment task 1: Case Study or Practice Report (2000 words) 50%
- Assessment task 2: Evidence Based Clinical Reasoning Report (2000 words) 50%

Failure of a fieldwork component in the Bachelor of Occupational Therapy will normally lead to failure of the unit and may lead to exclusion from the course.

## HSO408 – Transition to Practice

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Rachel Knight*

*Cohort rule: This unit is only available to students enrolled in H355 Bachelor of Occupational Therapy*

*Prerequisite: HSO401 and HSO403*

*Corequisite: Nil*

*Incompatible with: HSO414*

*Scheduled learning activities – campus: 1 x 3 hour class and 1 x 2 hour seminar per week*

### Content

In this unit research and analytical skills are applied to the current contexts of occupation and occupational therapy practice. Occupational therapy models will be used to provide a framework for analysis of topics being addressed, they include: identifying trends in occupational therapy practice, reviewing and critiquing professional directions, strategies for critical reflection and analysis, identifying current issues related to occupation and health. Following analysis there will be a focus on using the trends to relate to the individual students transition from student to professional, with practical sessions to assist with transition. Students will also be directed to reflect on their current level of competency, using the content of the unit to identify their level and compile evidence to support this statement of competency. Teaching methods will include class presentation from both lecturers and external guest presenters, in class group discussion, practical learning opportunities including CV writing, interviewing and job seeking.

### Assessment

- Assessment task 1: Critical analysis of competencies (800 words) 10%
- Assessment task 2: Critical analysis of field practice (2000 words) 25%
- Assessment task 3: Transition to practice report (2000 words) 25%
- Assessment task 4: Competency oral presentation (equivalent to 3200 words) 40%

### Prescribed texts

The resources for this unit will capitalise on the prescribed texts and the resources previously used throughout the Bachelor of Occupational Therapy. Students will be expected to extend and advance their repertoire of resources from other journals, reference books, printed materials, electronic resources and professional networks

## HSO411 – OT Honours Proposal Ethics and Literature

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Genevieve Pepin*

*Cohort rule: This unit is only available to students enrolled in H455 Bachelor of Occupational Therapy (Honours)*

*Prerequisite: HSO302, HSO303, HSO305, HSO306*

*Corequisite: HSO403*

*Incompatible with: HSO401*

### Content

This unit provides a broad understanding of occupational therapy in research situations. Students study research methods to a level of critical analysis and begin to build in their own personal frames of reference to the Occupational Therapy research process. It covers the selection and application of OT theoretical models, the use of occupation-based processes to problem solve, articulation of occupational goals related to occupational therapy research, reflect on personal approaches to research directions using clinical reasoning, time management, needs analysis, and costing of projects.

Topics addressed in this unit include selecting and applying theoretical frameworks, critiquing literature, writing a literature review, search literature for research, developing research questions, planning and documentation, the research process, occupation-based reflective processes, reasoning and practice, personal frames of reference, professional communication and teamwork, management skills and knowledge, ethical and legal contexts of research and management. Teaching methods will include PBL case learning seminars, and profession specific skill and competency development.

### Assessment

- Assessment task 1: Ethics submission to Deakin Ethics Committee 25%. This assignment to reflect the University ethics form.
- Assessment task 2: Written assignment (3000 words) 50%
- Assessment task 3: Oral presentation (15 minutes and 5 minutes questions) 25%

## HSO414 – OT Honours Analysis and Critique

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Genevieve Pepin*

*Cohort rule: This unit is only available to students enrolled in H455 Bachelor of Occupational Therapy (Honours)*

*Prerequisite: HSO411, HSO403*

*Corequisite: HSO416*

*Incompatible with: HSO404*

*Scheduled learning activities – campus:*

### Content

In this unit research and analytical skills are applied to the broader contexts of occupation and occupational therapy practice. Content includes socio-political perspectives, community development and empowerment, contemporary occupational issues in society, trends in terms of contemporary social and occupational issues, and strategies to address contemporary occupational issues to promote occupational health. Topics addressed in this unit include identifying trends in occupational therapy practice, reviewing and critiquing professional directions, strategies for critical reflection and analysis, identifying current issues related to occupation and health, developing individual and group responses to occupational issues, and promoting occupational health: design and management of change. Teaching methods will include group forums and classes.

### Assessment

- Assessment task 1: Critical analysis in the form of a journal manuscript with background literature and method 20%
- Assessment task 2: Critical analysis in the form of a journal manuscript with background literature, method, results. Discussion and conclusion 60%
- Assessment task 3: Oral presentations 20%

## HSO416 – Honours Research Project

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 3*

*EFTSL value: 0.375*

*Trimester 2 Unit Chair: Genevieve Pepin*

*Cohort rule: This unit is only available to students enrolled in H455 Bachelor of Occupational Therapy (Honours)*

*Prerequisite: All of HSO403 and HSO411*

*Corequisite: HSO414*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 to 5 x 2 hour seminars throughout trimester paced 3 to 4 weeks apart. Students are expected to have contact with their research project supervisor on a weekly basis throughout trimester.*

### Content

The Research Project aims to provide students with the opportunity to pursue, under supervision, an independent investigation and to complete a minor thesis. This unit enables the students to collect and analyse data, to complete a research project, and to present findings in oral and written forms. Students will make appropriate preparation for data collection including contact with participants as appropriate; engage in data collection, data management and analysis; reflect on their role as researchers; update the review of pertinent literature; complete their data collection and analysis, draft and finalise their thesis document.

### Assessment

Assessment task 1: Thesis (12,000 words) 100%.

### Prescribed texts

American Psychological Association (2009).  
Publication manual of the American psychological Association. (6th Edition) American Psychological Association: Washington

## HSO417 – Occupational Therapy Professional Development

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kieva Richards*

*Cohort rule: This unit is only available to students enrolled in H355 – Bachelor of Occupational Therapy*

*Prerequisite: HSO401*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 4 hour seminar per week*

### Content

This unit is one of three 4th year units that support transition into occupational therapy practice. Through study in this unit, you will prepare for taking on a practitioner role, regardless of what field of practice you choose. You will be encouraged to share your previous learning experiences and look to future professional development as part of your commitment to being a registered occupational therapist. You will be challenged and encouraged to consolidate the learning you have undertaken across the four years of the course and to be a partner in development of the learning for this unit.

The unit is an opportunity to integrate prior knowledge, skills and experiences and tie all 'loose ends' that you identify in your learning. Clinical reasoning and reflective practice will be an integral part of the unit and through learning activities, you will be able to explain your reasoning applied to a range of practice situations. By completing the unit, you will be prepared for job seeking and to begin practice with a well-developed professional development plan.

### Assessment

- Assessment task 1: Reflection and critique of learning and gap in Learning Plan (1000 words) 30%
- Assessment task 2: Interim reflection and report on Learning Plan (1000 words) 25%
- Assessment task 3: Critique and analysis of the implementation of Learning and CPD Plans (2000 words) 45%

## HSO418 – Innovation and Evaluation in OT Practice

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kelli Nicola-Richmond*

*Prerequisite: HSO401*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*1 x 2 hour seminar (Week 1–10)*

*1 x 8 hour conference (Week 11)*

### Content

This unit is designed to extend your occupational therapy practice knowledge and skills by contributing to innovation in real practice settings. You will work with occupational therapists to address current issues and challenges in OT services. Through reading, discussion and CloudDeakin resources you will learn about innovation and knowledge translation. Class time will be used to provide orientation and initial guidance in design of your project. You will then participate in up to 80 hours, at times negotiated between students and practice educators, to implement and evaluate your project. The final component of the unit will be a student-led knowledge translation conference.

This unit is one of three 4th year units that support transition into occupational therapy practice. Building on work undertaken in HSO401, you will work individually or as part of a small group to plan and/or design a new and innovative assessment, intervention or program for an occupational therapy service. You will then implement this innovation on a pilot basis, and evaluate the success of the pilot implementation, providing the service with a full report of your project design and outcomes.

You will participate in seminars to plan the projects. At the conclusion of the project, you will present your findings to a class conference and to the host organisation for your project.

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Assessment

- Assessment task 1: Innovation and Evaluation Project Interim Report (1500 words) 30%
- Assessment task 2: Innovation and Evaluation oral presentation and power point (10 minute oral presentation) 25%
- Assessment task 3: Innovation and Evaluation Project Report (2000 words) 45%
- Assessment task 4: SPEF-R/Supervisor's Report

### Hurdle requirement

- Must complete all placement requirements
- Must pass Assessment task 4

## HSO709 – Therapeutic Use of Self

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Natalie Hadiprodjo*

*Cohort rule: This unit is only available to students enrolled in H605 – Graduate Diploma of Therapeutic Child Play, H605 – Graduate Diploma of Play and Childhood, H706 – Master of Child Play Therapy*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This is a core unit for the Master of Child Play Therapy that aims to extend students' understanding, ability and skills in developing and maintaining a therapeutic relationship through appropriate therapeutic use-of-self in complex interpersonal relationships processes. Students will develop, critique, and implement therapeutic relationships and use of self in a range of advanced scenarios involving individuals, families, and groups living in varied communities and of various cultures.

### Assessment

- Assessment task 1: Written and critical reflection on positioning self in context (2500 words) 50% – Ungraded Pass/Fail
- Assessment task 2: Audio-visual simulation (video recording) demonstrating therapeutic skills (15 minutes and 500 word critical reflection) 50% – Ungraded Pass/Fail

## HSO710 – Foundations of Play Therapy

*Enrolment modes: Start Anytime – 6 months – Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: Only available to students enrolled in H505*

*Graduate Certificate of Therapeutic Child Play, H605*

*Graduate Diploma of Therapeutic Child Play and H706*

*Master of Child Play Therapy*

*Unit chair: Bridget Dooley*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars.*

### Content

This is a core unit for the Graduate Certificate of Therapeutic Child Play, Graduate Diploma of Therapeutic Child Play and Master of Child Play Therapy that is designed to provide foundational knowledge of Child Play Therapy, including the therapeutic powers of play, various theoretical models and children's behaviour and interactions which inform Child Play Therapy interventions. Case scenarios, such as analysing children's play behaviour, will support learning about discipline-specific knowledge and translating this scientific knowledge into plain language. Students will integrate knowledge from an ethico-legal standpoint and apply it to working with children.

### Police Check and Working with Children Check

Prior to commencing a placement, students are required to obtain a police check. The Faculty of Health Work Integrated Learning Team utilised an online service called 'Fit2Work', and students will receive an email with instructions on how to apply. Students should not apply for a police check until they have received this email from Fit2Work.

Some organisations may also require students to obtain a Working with Children check if they will be working directly with children or families whilst on placement.

### Assessment

- Assessment task 1: Critical observations of a child at play (3000 words) Graded 60%
- Assessment task 2: Models of Play Therapy (2000 words summary table) Graded 40%

## HSO711 – Child Attachment Environment and Trauma

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kate Renshaw*

*Cohort rule: This unit is only available to students*

*enrolled in H505 – Graduate Certificate of Therapeutic*

*Child Play, H505 – Graduate Certificate of Play and*

*Childhood, H605 – Graduate Diploma of Therapeutic*

*Child Play, H605 – Graduate Diploma of Play and*

*Childhood, H706 – Master of Child Play Therapy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This is a core unit for the Master of Child Play Therapy that will provide students with an overview of the fundamentals of attachment theory and the impact of attachment through the human lifespan. The development of attachment theory through the 20th century will be presented. Students will consider attachment theory, research and practice in relation to the effects of trauma on the developing child.

### Police Check and Working with Children Check

Prior to commencing a placement, students are required to obtain a police check. The Faculty of Health Work Integrated Learning Team utilised an online service called 'Fit2Work', and students will receive an email with instructions on how to apply. Students should not apply for a police check until they have received this email from Fit2Work.

Some organisations may also require students to obtain a Working with Children check if they will be working directly with children or families whilst on placement.

### Assessment

- Assessment task 1: Child attachment observation and written reflection. (2500 words) 50%
- Assessment task 2: Audio or Audio-visual presentation (2500 words [20minutes]) 50%

### Hurdle requirement

6 child attachment observation hours and participate in 3 x 1 hour supervision tutorial groups.

## HSO712 – Engaging Children in Play Using Directive Approaches

*Enrolment modes: Trimester 2: Cloud (online) with significant campus and placement requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Bridget Dooley*

*Cohort rule: This unit is only available to students enrolled in H605 – Graduate Diploma of Therapeutic Child Play, H605 – Graduate Diploma of Play and Childhood, H706 – Master of Child Play Therapy*

*Prerequisite: All of HSO710, HSO711, HSO713, HSO715*

*Corequisite: HSO709*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 60 hours of clinical placement, 4 day intensive campus program. Note: Students must attend and participate in face-to-face experiential-based activities at the Geelong Waterfront campus on the scheduled days during the trimester intensive period. Students must also meet with a clinical supervisor for 17 hours of supervision.*

### Content

This is a core unit for the Graduate Diploma of Therapeutic Child Play and Master of Child Play Therapy.

In this unit students will gain the underpinning theoretical knowledge and clinical skills to engage children in play using directive approaches.

The campus intensive includes specialised training to practice the therapeutic child play skills. Following the intensive, students will undertake their clinical placement with suitable child referrals and will monitor change through the therapeutic process.

### Intensive days

This on campus intensive is held during Orientation week of Trimester 2.

Intensive days will be held on Monday 1 July to Thursday 4 July 2019 between 9am and 5pm each day for H705 Master of Child Play Therapy and Graduate Diploma of Therapeutic Child Play students only. Dates may be subject to change due to timetabling constraints.

## Police Check and Working with Children Check

Prior to commencing a placement, students are required to obtain a police check. The Faculty of Health Work Integrated Learning Team utilised an online service called 'Fit2Work', and students will receive an email with instructions on how to apply. Students should not apply for a police check until they have received this email from Fit2Work.

Some organisations may also require students to obtain a Working with Children check if they will be working directly with children or families whilst on placement.

### Assessment

- Assessment task 1: Presentation (1500 words) ungraded Pass/Fail
- Assessment task 2: Written case report (2000 words) ungraded Pass/Fail

### Hurdle requirement

Demonstrates competence in engaging children in play, using directive approaches, by undertaking 60 hours clinical placement and 17 hours clinical supervision and in conjunction with the Placement Assessment and Review procedure (1500 words).

## HSO713 – Assessment and Measurement in Play Abilities

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bridget Dooley*

*Cohort rule: This unit is only available to students enrolled in H505 – Graduate Certificate of Therapeutic Child Play, H505 – Graduate Certificate of Play and Childhood, H605 – Graduate Diploma of Therapeutic Child Play, H605 – Graduate Diploma of Play and Childhood, H706 – Master of Child Play Therapy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars.*

## Content

The unit will provide students with an overview of the concepts in measurement in relation to measuring play behaviour and therapeutic change. This knowledge will then be applied to the types of therapeutic assessment that are currently in use such as: criterion, standardised, norm-referenced, and non-standardised. Children's behaviour through play will be analysed with emphasis on behavioural characteristics when children have a play deficit. How play assessment informs decisions within Child Play Therapy will be viewed from the quality of a child's play behaviour as well as the themes in a child's behaviour with reference to a child's culture.

## Police Check and Working with Children Check

Prior to commencing a placement, students are required to obtain a police check. The Faculty of Health Work Integrated Learning Team utilised an online service called 'Fit2Work', and students will receive an email with instructions on how to apply. Students should not apply for a police check until they have received this email from Fit2Work.

Some organisations may also require students to obtain a Working with Children check if they will be working directly with children or families whilst on placement.

## Assessment

- Assessment task 1: Written assignment of table outlining 5 play assessments (1500 words) 20%
- Assessment task 2: Online quiz answering questions on a play assessment video 20%
- Assessment task 3: Oral examination via DVD or Mp4 recording (20–40 minutes) 30%
- Assessment task 4: Written assignment (1500 words) 30%

# HSO715 – Childhood Developmental Neuroscience and Psychopathology

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Natalie Hadiprodjo*

*Cohort rule: This unit is only available to students enrolled in H505 – Graduate Certificate of Therapeutic Child Play, H505 – Graduate Certificate of Play and Childhood, H605 – Graduate Diploma of Therapeutic Child Play, H605 – Graduate Diploma of Play and Childhood, H706 – Master of Child Play Therapy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This is a core unit for the Graduate Certificate of Therapeutic Child Play, Graduate Diploma of Therapeutic Child Play and Master of Child Play Therapy which aims to integrate knowledge of play and childhood with the following:

- developmental theories in childhood;
- neuroscience, neuroplasticity and neurosequential development
- psychopathology, associated symptoms and behaviours and medication use.

This unit has been designed to cover a range of mental health issues such as Post Traumatic Stress Disorder, Autism Spectrum Disorders, child abuse and bereavement.

## Assessment

- Assessment task 1: Written assignment – booklet (1000 words) 30%
- Assessment task 2: Written assignment (3000 words) 50%
- Assessment task 3: Oral presentation – digital audio or audio-visual recording (10 minutes) 20%

## HSO717 – Professional Practice and Behaviour

*Enrolment modes: Trimester 2: Cloud (online)*

*Students wishing to enrol in this unit should contact [hsd-postgrad@deakin.edu.au](mailto:hsd-postgrad@deakin.edu.au) for more information*  
*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Natalie Hadiprodjo*

*Cohort rule: This unit is only available to students enrolled in H706 – Master of Child Play Therapy*

*Prerequisite: HSO720*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars.*

### Content

This capstone unit is designed to integrate theoretical and professional practice knowledge of Child Play Therapy. Case scenarios will support learning about discipline-specific knowledge. Students will consolidate knowledge from the ethico-legal framework which guides professional practice and behaviour.

### Assessment

- Assessment task 1: Clinical competency portfolio: Reflection on professional development, 2500 words, 50%
- Assessment task 2: Create a range of media to showcase a professional play therapy service, 2500 words 50%

## HSO720 – Humanistic Play Therapy

*Enrolment modes: Trimester 1: Cloud (online) with significant campus and placement requirements.*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Kate Renshaw and Natalie Hadiprodjo*

*Prerequisite: HSO712 and HSO709*

*Corequisite: Must be enrolled in H705 Master of Child Play Therapy*

*Incompatible with: HSO719 and HSO721*

*Scheduled learning activities – cloud (online): 140 hours of clinical placement, 40 hours in face to face supervision (online where necessary) and 30 hours of face-to-face contact in a 5 day intensive program. Three Blackboard Collaborate sessions will be offered by the unit chair.*

### Content

This is a core study unit for the Master of Child Play Therapy. In this unit the students will gain the underpinning theoretical knowledge and clinical skills to implement humanistic play therapy. The on campus intensive includes specialised training to practice the core therapeutic skills. Following the intensive, students will undertake their clinical placement with suitable child referrals and will monitor therapeutic change through the play therapy process. 140 hours clinical placement and 40 hours clinical supervision, in conjunction with the student Placement Assessment and Review (PAR) process are required to successfully complete the unit.

### Intensive days

This on campus intensive is prior to Trimester 1 commencing but is for the Trimester 1 offering.

Intensive days will be held on Monday 11 February to Friday 15 February 2019 between 9am and 5pm each day for H705 Master of Child Play Therapy students only. Dates may be subject to change due to timetabling constraints.

### Police Check and Working with Children Check

Prior to commencing a placement, students are required to obtain a police check. The Faculty of Health Work Integrated Learning Team utilised an online service called 'Fit2Work', and students will receive an email with instructions on how to apply. Students should not apply for a police check until they have received this email from Fit2Work.

Some organisations may also require students to obtain a Working with Children check if they will be working directly with children or families whilst on placement.

### Assessment

- Assessment task 1: Presentation (25 minutes = 3000 words) ungraded pass/fail
- Assessment task 2: Written case report (4000 words) ungraded pass/fail

### Hurdle requirement

- 140 hours clinical placement (Pass grade from clinical supervisor)
- 40 hours clinical supervision (Pass grade from clinical supervisor)
- Placement Review Form (Par) 3000 words (Pass grade from clinical supervisor)

## HSO723 – Systemic Play Therapy

*Enrolment modes: Trimester 2: Cloud (online) with significant placement and campus requirements*

*Students wishing to enrol in this unit should contact [hsd-postgrad@deakin.edu.au](mailto:hsd-postgrad@deakin.edu.au) for more information*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kate Renshaw*

*Cohort rule: This unit is only available to students enrolled in H706 – Master of Child Play Therapy*

*Prerequisite: HSO720*

*Scheduled learning activities – cloud (online): 70 hours of clinical placement, 3 day intensive campus program.*

*Note: Students must attend and participate in face-to-face experiential-based activities at the Geelong Waterfront campus on the scheduled days during the trimester intensive week. Students must also meet with a clinical supervisor for 20 hours of supervision.*

### Content

This is a core study unit for the Master of Child Play Therapy. In this unit the students will gain the underpinning theoretical knowledge and clinical skills to implement systemic play therapy. The campus intensive includes specialised training to practice the core therapeutic skills. Following the intensive, students will undertake their clinical placement with suitable child/family referrals and will monitor therapeutic change through the play therapy process. 70 hours clinical placement and 20 hours clinical supervision, in conjunction with the student Placement Assessment and Review (PAR) process are required to successfully complete the unit.

### Intensive days

This on campus intensive is held during Orientation week of Trimester 2.

Intensive days will be held on Wednesday 3 July to Friday 5 July 2019 between 9am and 5pm each day for H705 Master of Child Play Therapy students only. Dates may be subject to change due to timetabling constraints.

### Police Check and Working with Children Check

Prior to commencing a placement, students are required to obtain a police check. The Faculty of Health Work Integrated Learning Team utilised an online service called 'Fit2Work', and students will receive an email with instructions on how to apply. Students should not apply for a police check until they have received this email from Fit2Work.

Some organisations may also require students to obtain a Working with Children check if they will be working directly with children or families whilst on placement.

### Assessment

- Assessment task 1: Presentation (1500 words) ungraded Pass/Fail
- Assessment task 2: Written case report (2000 words) ungraded Pass/Fail

### Hurdle requirement

Demonstrates competence in systemic play therapy by undertaking 70 hours clinical placement and 20 hours clinical supervision and in conjunction with the Placement Assessment and Review procedure (1500 words).

## HSO724 – Play Therapy Research Thesis

*Enrolment modes: Start Anytime – 12 months – Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Judi Parson*

*Trimester 3 Unit Chair: Judi Parson*

*Prerequisite: HSO710, HSO711, HSO713, HSO715*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including scheduled online topic supervision meetings.*

*Specific readings and assessments will be available through CloudDeakin. Online virtual classrooms may be used on occasion.*

*Furthermore, students will be asked to integrate and draw on their learning within their current employment (if possible/applicable) relevant to the discipline of Play Therapy and other units within this course.*

*Students will on average spend 280 hours over the 12 month Study Period undertaking the teaching, learning and assessment activities for the unit. This will include a minimum of 22 hours of online discussion, individual meetings and ethic integrity training and quiz.*

## Content

This is an elective 2 credit point unit for students enrolled in the Master of Child Play Therapy and who wish to have the option to apply for a Higher Research Degree (HDR). Students may craft their research inquiry based on specific play therapy topics such as, but not limited to: child attachment, child development and play behaviour, child and family trauma and/or psychopathology.

Students are required to formulate a research question, prepare a research proposal and undertake a systematic review of the literature, (for example for example PRISMA, ITEA, meta-analysis or meta-synthesis) and write a coherent thesis under the supervision of experienced researchers from within the CPT course team. The student is required to undertake the research integrity training for the responsible conduct of research.

## Assessment

- Assessment task 1: Research question and literature search proposal (1000 words or 5 pages 15%)
- Assessment task 2: Literature review (2000 words 25%)
- Assessment task 3: Research Thesis (journal article) (7000 words 60%)

## HSR701 – Research Project Part A

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Ewa Szymlek-Gay*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSN750*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 x 1 hour cloud (online) seminars per trimester. Students have weekly one on one contact (either on campus or online/phone) with a supervisor throughout the trimester.*

## Content

This unit is the first part of a two part activity involving a literature review and development of a research proposal (HSR701 Research Project Part A) and then the conduct of the research and writing of a thesis as part of HSR702 Research Project Part B.

HSR701 focuses on literature searching, reading and evaluating published work, writing a literature review, defining a research aim and developing a testable hypothesis. Students will critically evaluate an ethics application. The research proposal and project is subject to approval by the unit chair.

## Assessment

- Assessment task 1: Evaluation of an ethics application (1500 words) 12.5%
- Assessment task 2: Literature review (5000 words) 75%
- Assessment task 3: Research plan (1500 words) 12.5%

## HSR702 – Research Project Part B

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Susan Torres*

*Prerequisite: HSR701*

*Corequisite: Nil*

*Incompatible with: HSN751*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 2 x 1 hour cloud (online) seminars per trimester. Students have weekly one on one contact (either on campus or online/phone) with a supervisor throughout the trimester*

## Content

This unit follows on from HSR701 Research Project Part A and provides the opportunity to conduct research and write a thesis in a specified area of human nutrition, exercise or health. It will focus on the practical skills of data collection (where appropriate), analysis, presentation and interpretation and preparation of a thesis.

## Assessment

Assessment task 1: Research thesis (10,000 words) 100%

## Hurdle requirement

- Ethical approval and completion of research integrity training
- Research plan (2000 words) and presentation (5 minutes)

## HSW101 – Introduction to Social Work: Social Work Theory and Practice A

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jodie Satour*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSH114*

*Scheduled learning activities – campus: 1 x 2 hour class per week supported by weekly online independent and collaborative learning activities (Campus students are expected to attend 9 out of the 11 Seminars).*

*Scheduled learning activities – cloud (online): All online students must attend a compulsory 5 day campus-based intensive at the commencement of this unit, at which core practical learning requirements will be taught.*

*Please click [here](#) to view intensive dates and locations. Online independent and collaborative learning activities will support learning across the rest of the Semester.*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

### Content

This unit aims to introduce students to aspects of the history and current context of social work practice, and to begin to develop an appreciation of the role of social work and the human services generally. The unit is descriptive and informative in helping to unfold for students the diversity of the social work field and its history. It is also critical and interpretive. The unit also provides an introduction to the different disciplinary aspects of the social work program and how they fit together in the study of social work.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: 5 x 100 word Short Reflections (500 words) and Essay (1000 words) = 1500 words 40%
- Assessment task 2: Essay (2000 words) and Reflection (500 words) = 2500 words 60%

### Hurdle requirement

Cloud (online) students only: Attendance at a 5 day seminar held during trimester at Waterfront (Geelong) campus.

## HSW111 – Theories for Social Work Practice: Social Work Theory and Practice B

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rojan Afrouz*

*Prerequisite: HSW101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including 1 x 1 hour weekly class (recording provided) and 1 x 1 hour online seminar per week.*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

### Content

This unit aims to provide students with an introduction to a broad range of theories which inform social work practice. The unit goes beyond developing an understanding of social work theory to develop skills in applying theory to understand and intervene with individuals, communities and society.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Written assignment (1200 words) 40%
- Assessment task 2: Written assignment (2000 words) 50%
- Assessment task 3: Participation online and reflections (800 words) 10%

## Prescribed texts

Morley, C., Ablett, P. and Macfarlane, S., (2019) Engaging with Social Work. A critical introduction. Second Edition. Cambridge University Press. Port Melbourne: Australia

## HSW118 – Social Work Methods in Context: Social Work Theory and Practice C

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Selma Macfarlane*

*Prerequisite: HSW101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour vlsdd per week. Campus students are expected to attend 9 out of the 11 classes*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including 1 x 1 weekly class (recording provided) and 1 x 1 hour online seminar per week.*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

## Content

This unit examines the role of social work across a number of contexts or fields of practice in which mental health issues are encountered. It explores the construction of complex personal and social problems; the lived experience of people experiencing mental health issues and that of their carers; social work values and attitudes; methods of social work engagement and the contexts of service delivery. The unit builds on and extends students' understanding of critical social work theory and practice.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Assignment 1 (2000 words) 50%
- Assessment task 2: Assignment 2 (2000 words) 50%

## Prescribed texts

Bland, R, Renouf, N & Tullgren, A 2015, 2nd Ed, Social work practice in mental health: an introduction, Allen & Unwin, Crows Nest, NSW.

## HSW201 – Human Rights and Social Justice: Values, Ethics and the Legal Context of Social Work

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)^ with significant campus requirements, CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sarah Epstein*

*Cohort rule: Must be enrolled in H330 Bachelor of Social Work to enrol in this unit*

*Prerequisite: One of HSW101 or ASK101*

*Corequisite: Nil*

*Incompatible with: MLS231*

*Scheduled learning activities – campus: 1 x 2 hour class per week. Campus students are expected to engage in online cloud discussion*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities. Students must attend and participate in a 1 day workshop at Waterfront (Geelong)*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

## Content

This unit is underpinned by a commitment to 'reclaiming the ethical' – a progressive approach to ethics in social work. This approach recognises the neoliberal context of practice, reasserts progressive social work values and engages in critical analysis of how social work ethics is framed. In particular, this unit will provide an opportunity for students to critically analyse the values and ethics of the social work profession, including the ethical and legal responsibilities that emanate from these values. Students will examine key approaches to ethics in social work, in particular human rights and social justice; codes of ethics, and ethical responsibilities that are derived from these as well as the legal context of practice.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Report based on a visit to a legal agency (1500 words) 40%
- Assessment task 2: Case study (2000 words) 55%
- Assessment task 3:
  - Cloud (online) students: minimum of five weekly discussion posts throughout the 11 weeks of trimester 5%
  - Campus students: Five reflections (100 words each) to be presented in class throughout the trimester 5%

## Hurdle requirement

Cloud (online) students only: Attendance at a 1 day seminar held during trimester at Waterfront (Geelong) campus.

# HSW202 – Placement Readiness: Preparing for Supervised Social Work Practice

*Offering information: First offered 2020*

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sevi Vassos*

*Cohort rule: This unit is only available to students enrolled in H330 Bachelor of Social Work.*

*Prerequisite: HSW111, HSW118, HSW235*

*Corequisite: N/A*

*Incompatible with: N/A*

*Scheduled learning activities – campus: 1 x 2 hour weekly seminar supported by learning experiences via CloudDeakin.*

*CBD Students: This unit is taught intensively across 3 consecutive days. 28 hours – 9am to 4pm x 4 days face to face at IKE, dates to be advised.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. Weekly Blackboard Collaborate sessions will be conducted during the trimester. Cloud students will also be required to attend a 3 day intensive workshop.*

## Content

Unit HSW202 is designed to prepare Bachelor of Social Work students for their first social work field placement experience as part of units HSW314 and HSW415. The emphasis is on supporting students to begin connecting the theoretical knowledge and practice skills acquired through classroom learning in the other second year units with the complexities of social work practice in contemporary work environments. Additionally, this unit is designed to support students to develop the judgment and self-management skills that will enable them to optimise their professional learning within the contemporary practice context. The unit structure and content aligns coherently with the common learning and assessment areas for placement, as these reflect the Australian Association of Social Work (AASW) practice standards and ethical code for all social work practitioners.

There will be three practice-based assessments for the unit, each designed for students to demonstrate their judgement, emotional and behavioural regulation, and knowledge and skills within simulated workplace scenarios. A pass grade in the unit will be a pre-requisite for entry into the first placement unit for all Bachelor of Social Work students. For most students HSW202 will be a pre-requisite for HSW314. For the small group of students who obtain Recognition of Prior Learning for HSW314, HSW202 will be a pre-requisite for HSW415/HSW404.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

Cloud and CBD students are required to attend the intensive face-to-face workshops as part of this unit, as well as participate in a minimum of 8 weekly online sessions throughout the trimester. On-campus students are required to attend a minimum of 8 weekly face-to-face seminars. All students must achieve a pass grade in this unit as a prerequisite requirement for first placement as part of unit HSW314 or HSW415.

## Assessment

- Assessment task 1 (Individual): Critical Reflection report on Placement Learning Areas (2000 words) 50%
- Assessment task 2 (Individual): On-line audiovisual case assessment/intervention (equivalent to 1000 words) 25%
- Assessment task 3 (Individual): On-line audiovisual workplace simulation (equivalent to 1000 words) 25%

## Prescribed texts

There will be weekly readings on CloudDeakin as well as weekly course notes. Students will also have access to Virtual Clinic 1 & 2 to support their learning and assessment.

There is no prescribed text for this unit.

# HSW212 – Social Work Processes and Interventions: Social Work Theory and Practice E

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)^ with significant campus requirements, CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sophie Goldingay*

*Cohort rule: This unit is only available to students enrolled in the Bachelor of Social Work (H330)*

*Prerequisite: Must have completed two HSW coded units.*

*Corequisite: HSW111 and HSW118*

*Incompatible with: Nil*

*Recommended: It is desirable to have completed HSW221 and HSW235.*

*Scheduled learning activities – campus: 1 x 2 hour class per week. Campus students are expected to attend 9 out of the 11 classes.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including 11 x 30 minute content video (available on newsfeed on unit site in Deakin Sync) and 3 x 1 hour online seminars.*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

*^ Students must attend and participate in a 3 day workshop at Waterfront (Geelong).*

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Peer and self- assessment and feedback 10% (50 words x 6 items= 300 words total)
- Assessment task 2: Case scenario video (10 minutes = 1000 words), with reflection on microskills and theories used (1100 words) 55%
- Assessment task 3: Cultural plan (800 words) and reflection (800 words) 35%

## Hurdle requirement

Cloud (online) students only: Attendance at a 3 day seminar held during trimester at Waterfront (Geelong) campus.

## Prescribed texts

Maidment, J & Egan, R 2016, Practice skills in social work and welfare, more than just common sense. 3rd Edition. Crows Nest, Allen & Unwin

# HSW216 – Public Policy and Politics for Critical Social Workers

*Offering information: First offered 2020*

*Enrolment modes: Trimester 1: Waterfront (Geelong) campus, Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: John Fox*

*Cohort rule: Unit only available to students enrolled in H330 Bachelor of Social Work.*

*Prerequisite: HSW101, ASC101 and ASC102*

*Corequisite: NIL*

*Incompatible with: NIL*

*Scheduled learning activities – campus: 1 x 2 hour seminar each week supported by weekly online independent and collaborative learning activities (campus students are expected to attend 9 out of 11 seminars)*

*Scheduled learning activities – cloud (online): Equivalent and targeted learning experiences and activities will be provided via CloudDeakin, including through fortnightly Blackboard Collaborate sessions, discussion boards and interactive online resources and activities.*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments.*

*Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus across the degree*

## Content

Public policy, in the form of legislation, formal policy documents and principles that guide action, covers all of social work's fields of practice, including working with Aboriginal and Torres Strait Islander peoples and communities, community development, refugees and asylum seekers, family violence, sexual assault, research, aged care, income support, medical and health care, addictions, mental-health care, disability, child protection, youth and trauma. It can facilitate, or, if poorly informed or implemented, hinder, the promotion of social justice, social inclusion and wellbeing.

A good working knowledge of public policy, and the political forces, values and ideas that shape it, is therefore of vital importance to effective social work practice. Knowledge of these forces, values and ideas is also relevant to other aspects of social work practice, as they intimately affect those other forms of practice. This unit emphasises these connections between politics and public policy and personal and professional choices and actions. It recognises that everyone studying this unit will have thought through, argued for, and put into practice, their values and beliefs, and seeks to value and build on that experience and ability.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Critical reflection (500 words) 10%
- Assessment task 2: Political analysis of a contemporary debate (1500 words) 40%
- Assessment task 3: Critical analysis of contemporary debate (2000) 50%

## HSW219 – Self and Society

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Fox*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HSW112*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities.*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

### Content

This unit provides an overview of theories about the social construction of the self from a critical social work perspective. It will ground these theories in an analysis of human development across the life course in the context of the major social divisions in society. More specifically, the unit explores: agency-structure debates and the role of subjectivity in shaping the self; theories of human and family development across the lifespan, including the social construction of childhood; the self as both a relational and autonomous being; contributions from humanism, feminism, psychoanalysis and postmodern thinking to developing an understanding of the self; and the role of privilege and oppression in shaping the individual.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

*^ Cloud (online) students are expected to attend a one day seminar at Waterfront (Geelong)*

### Assessment

- Assessment task 1: Three reflective journals (1500 words) 40%
- Assessment task 2: Written assignment (2000 words) 50%
- Assessment task 3: Participation 10%

## HSW221 – Social Work Research in Ethical and Political Contexts

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Russell Shuttleworth*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week. Campus students are expected to attend 9 out of the 11 classes.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including 1 x 2 hour weekly class (recording provided) and 5 x 1 hour online seminars*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

## Content

This unit aims to demystify social research by showing how it is a formal process of social inquiry which builds on the ways in which we daily inquire into social events and construct everyday knowledge about what we need to know. The approach taken is that there are different ways of knowing, which influence how we understand social problems and formulate research questions. Students will be introduced to the basics of research design for social work practice. This includes an overview of a range of research methods and approaches. The unit also shows how 'research' is an important part of the relationship between 'theory' and 'practice', in all its forms: as direct service, policy and program development and evaluation. The unit provides a basis for HSW322.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Discussion of key issues in social research methodology and design (2000 words) 45%
- Assessment task 2: A review of the research literature on a social work topic, discussion of its ethical and political contexts (2000 words) and compilation of an index of the literature review process 45%
- Assessment task 3: Class participation 10%

# HSW235 – Community Development: Social Work Theory and Practice D

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jodie Satour*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: HDS303*

*Scheduled learning activities – campus: Weekly 2 hour classes x 11 weeks*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including 1 x 1 hour online seminar per week*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

## Content

Community development is an important field and method of social work practice. This unit aims to equip students with the theoretical knowledge and practical skills to integrate community development into their social work roles. This practice field plays a significant role in government, non-government, volunteer and in for-profit social service organisations. Community development is used within all levels of government (local, state and commonwealth) and across many departments (youth, health, communities, ageing, housing, disabilities, multicultural, indigenous). Community development is a form of practice, a broad philosophical and political approach which focuses on collective efforts to improve community wellbeing, and is based on a critical understanding of inequality in our socio-political structures.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

A part of the pedagogy in this unit requires students to participate with CloudDeakin entries (at least one a week).

## Assessment

- Assessment task 1: Essay (2000 words) 50%
- Assessment task 2: Action paper – essay (2000 words) 50%

## HSW313 – Doing Critical Social Work: Social Work Theory and Practice F

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)^ with significant campus requirements, CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Norah Hosken*

*Cohort rule: This unit is available only to students enrolled in the Bachelor of Social Work (H330)*

*Prerequisite: HSW314 (or equivalent practice experience approved by the unit chair, provided students have completed all level 1 and level 2 HSW coded core units)*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week. Campus students are expected to attend 9 out of 11 classes*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities.*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

*^ Students must attend and participate in a 3 day workshop at Waterfront (Geelong)*

### Content

This unit links anti-oppressive theories to social work practice. It develops assessment, counselling and intervention skills and focuses on particular social work settings and specific client groups. The unit utilises critical reflection, mutual inquiry, small group discussion, exercises and role play practice across situations from key fields of social work practice with different populations and issues. Social work theory, values and ethics will be integral to this practice unit.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Essay (1500 words) 50%
- Assessment task 2: Video role play (12–15 minutes) and written critical analysis of role play (1000 words) 50%

### Hurdle requirement

Cloud (online) students only: Attendance at a 3 day seminar held during trimester at Waterfront (Geelong) campus.

### Prescribed texts

Pease, B., Goldingay, S., Hosken, N., & Nipperess, S. (Eds.). (2016). *Doing critical social work*. East Melbourne, Vic: Allen & Unwin.

## HSW314 – Social Work Field Education A

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)^ with significant campus requirements, CBD\**

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 1 Unit Chair: Sevi Vassos*

*Cohort rule: This unit is available only to students enrolled in the Bachelor of Social Work (H330)*

*Prerequisite: Completion of all level 1 and level 2 HSW coded core units and MLS231 or HSW201*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 70 days (500 hours) of practicum (field placement). Campus students are expected to attend Waterfront Campus (Geelong) for:*

- *a one day pre-placement seminar (1) in Trimester 2 of the year before placement;*
- *a one day pre-placement seminar (2) in late February of the year of placement;*
- *and three integration seminars during placement. Dates to be advised.*

*Scheduled learning activities – cloud (online): 70 days (500 hours) of practicum (field placement) in a social or community service agency or program.*

*^ Students are required to undertake a one day pre-placement preparation seminar at Waterfront (Geelong) in Trimester 2 of the year prior to when placement is to be undertaken. Please click [here](#) to view intensive dates and locations. Students are also required to participate in three integration seminars and online activities.*

## Content

This unit requires students to develop an individualised educational learning plan for their structured and supervised practicum in an approved human service organisation. As per the regulatory requirements of the Australian Association of Social Workers (AASW) students are provided with 1.5 hours per week of supervision from a field educator who is a qualified social worker with a minimum of two years post qualifying experience, who has undertaken appropriate supervision training. The student and the placement field educator are supported by the university liaison person (ULP) who is a qualified social worker with a minimum of five years post qualifying experience who provides a minimum of two substantial contacts. Opportunities are provided for students to integrate theory with practice and develop the required skills and knowledge base to meet the AASW Practice Standards. Students are placed in a range of setting where learning experiences are with individuals, families, groups and communities.

RPL is possible for HSW314 – Social Work Field Education A for students who are able to demonstrate that their prior experience has provided them with the knowledge and experience that would normally be provided in the first placement.

There is a separate process in applying for this type of RPL and more information is available in RPL Guidelines.

Applications for RPL are due 30 November of the year prior to students undertaking their first placement. Late applications cannot be accepted and students are encouraged to apply earlier than this if possible.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

## Assessment

- Assessment task 1: Placement portfolio comprising field placement agreement, log of hours, safety audit, cloud (online) activities, field education learning plan.
- Assessment task 2: Mid-placement review report. Students and field educators complete and submit a report using a University-provided template to provide a rating and comment on each of the learning goals that incorporate the eight AASW practice standards identified in their agreed learning plan. This is presented to the University liaison person prior to submission.
- Assessment task 3: Critical reflection assignment (1500 words)
- Assessment task 4: Final placement review report. Building on the mid-placement report students and field educators complete a final placement review report of the student's learning against the learning goals identified and agreed upon in the learning plan.

A student's performance in field education units is graded as an Ungraded Pass (UP) or Fail. All assessment items must be completed to a satisfactory standard to attain a UP grade.

## Requirements

Students need to demonstrate ethical and professional conduct in accordance with:

- AASW Code of Ethics
- Deakin University Student Charter
- Deakin University Regulation 04.1(1) – General Misconduct

## Hurdle requirement

Cloud (online) students only: Attendance at a 1 day seminar held during trimester prior to enrolment at Waterfront (Geelong) campus.

## Prescribed texts

## HSW316 – Critical Social Policy

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)^ with significant campus requirements, CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Fox*

*Campus contact: Waterfront (Geelong): Jodie Satour*

*Prerequisite: HSW314 (or substantial relevant human service workplace experience as negotiated with the unit chair)*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities.*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

*^ Students must attend and participate in a 1 day workshop at Waterfront (Geelong).*

### Content

In the present climate of the redistribution of resources, many individuals, groups and communities experience powerlessness and inequality. Underlying this is a dominant discourse that has marginalised social policy in favour of economic rationalism. The aim of this unit is to present an approach to social policy in Australia which critically addresses the dominance of the economic over the social and highlights ways in which social policy responds, or fails to respond, to diversity. The unit also aims to demonstrate the links between social policy and social work practice, so that graduates may be better informed about the policy contexts that influence their practice.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

*^ Students enrol as Cloud (online) however there is a one day campus workshop*

### Assessment

- Assessment task 1: Two online quizzes (500 words) 20%
- Assessment task 2: Narrated Powerpoint presentation (10 minutes) 30%
- Assessment task 3: Written assignment (2000 words) 50%

### Hurdle requirement

Cloud (online) students only: Attendance at a 1 day seminar held during trimester at Waterfront (Geelong) campus.

## HSW322 – Applied Social Research in Ethical and Political Context

*Enrolment modes: Trimester 2: Cloud (online)^ with significant campus requirements*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Angela Daddow*

*Cohort rule: This unit is available only to students enrolled in the Bachelor of Social Work (H330)*

*Prerequisite: HSW221 and HSW314 (or appropriate experience in human services organisations as approved by the unit chair)*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

*^ Students must attend and participate in a 1 day workshop at Waterfront (Geelong).*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning experiences, including 6 online workshops scheduled during the trimester.*

## Content

The unit aims to develop students' research skills as another social work method or approach, through an understanding of research as applied in evaluation and needs assessment. The unit shows how applied research through evaluation and needs assessment is linked to policies, programs and modes of practice (case work, group work and community work), and can facilitate change through identifying gaps in services and evaluating the appropriateness, effectiveness and efficiency of existing policies, programs and practices. The unit will introduce students to approaches, designs and methods that can be applied through appropriate research to enhance social work practice and to achieve social change.

## Assessment

- Assessment task 1: Outline of research proposal and literature review (evaluation or needs assessment – 1500 words) 35%
- Assessment task 2: Proposal (2500 words – and appended literature review) 55%
- Assessment task 3: CloudDeakin participation 10%

## Hurdle requirement

Attendance at a 1 day seminar held during trimester at Waterfront (Geelong) campus.

## Prescribed texts

Royse, D, Thyer, BA & Padgett, DK (2016), Program Evaluation: An Introduction to an Evidenced-Based Approach, 6th edn, Cengage Learning, Boston MA, USA.

# HSW331 – Practicum in Health and Social Development

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Offering information: Unit is only offered to international exchange students*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 1 Unit Chair: TBA*

*Prerequisite: Students must be enrolled in a course in their home institution which qualifies them to work as a social worker. They will have completed at least two years of social work studies at their home institution including preparation for placement. It is expected that students will have undertaken studies in social work theory and practice, communication skills, psychology, sociology and social policy.*

*It is preferable that students have undertaken at least one social work placement in their own country.*

*Corequisite: Nil*

*Incompatible with: HSW314, HSW415*

*Scheduled learning activities – campus: 70 days (490 hours) of practicum (field placement) and some campus attendance*

## Content

In consultation with their academic and field educators, students are expected to develop an individualised educational plan for the practicum. This plan should be designed so that they will be able to give evidence that they have begun to master the Australian Association of Social Workers practice standards of competency for social workers by working with selected clientele and sharing in selected aspects of the associated work of the agencies in which they are placed. Students will be expected to reflect critically on day-to-day experiences in the practicum, explore issues and make verbal and written presentations to peers, colleagues and field educators. Students are required to attend three integration seminars at Waterfront (Geelong) or respond on a weekly basis to discussion questions on CloudDeakin.

## Assessment

- Assessment task 1: 70 days (490 hours) of practicum (field placement) in a social or community service agency or program. The hourly requirement includes campus attendance at 3 integration seminars and a series of seminars examining Australian and International contexts for social work learning and practice.
- Assessment task 2: Critical incident report (1500 words)
- Assessment task 3: Students and field educators need to complete and submit mid-placement and final placement assessment documents using the Deakin BSW field placement assessment formats.

The student is not awarded a specific grade for this assignment, as the placement is graded as a whole, on a Pass/fail basis.

## HSW401 – Social Work Research Methods

*Enrolment modes: Trimester 1: Cloud (online) with significant campus requirements, CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Russell Shuttleworth*

*Cohort rule: This unit is only available to students enrolled in H430 Bachelor of Social Work (Honours)*

*Prerequisite: Nil*

*Corequisite: HSW416*

*Incompatible with: HSW415, HSW434, HSW452, HSW456, HSW457*

*Scheduled learning activities – cloud (online): Learning experiences are primarily via a 3 day intensive campus workshop at Waterfront (Geelong). Students also participate in online discussions with the instructor and other students when needed.*

### Content

This unit provides training in social work research methods and in the conduct of ethical research. Topics include the definition of research, types of methodological approaches and strategies, defining the research problem, forming researchable aims, research design, time management, data collection and analysis, critiquing and referencing existing research and presenting research findings.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Written assessment (2500 words) 50%
- Assessment task 2: Oral presentation, supported by a PowerPoint presentation (25 minutes) 50%

## HSW402 – Critical Approaches to Social Work: Social Work Theory and Practice G

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: James Lucas*

*Cohort rule: This unit is available only to students enrolled in the Bachelor of Social Work or Bachelor of Social Work (Honours)*

*Prerequisite: HSW313 and HSW314*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week. Campus students are expected to attend 9 out of the 11 scheduled classes.*

*IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments. Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

*Scheduled learning activities – cloud (online): 11 x 30 minute content videos (available on newsfeed on unit site in Deakin Sync) and 3 x 1 hour online seminars. Attendance at a 2 day seminar held during trimester at Waterfront Campus*

### Content

This unit aims to develop students' generic skills and practice theories for ongoing professional development in the workplace. It takes a critical reflective approach and explores what some of the newer developments in social theory (feminism, critical postmodernism) offer in drawing up frameworks and strategies for critical practice. The unit also aims to assist students to develop ways of dealing with complex settings and issues, and to develop a process and framework for continuing learning from their own practice. Students will be asked to discuss critical incidents from their own practice experience to explore their own processes of theory/practice development.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Guided written reflection (1000 words) 30%
- Assessment task 2: Essay (2500 words) 60%
- Assessment task 3: Participation in class activities and written reflection on group process (maximum 500 words) 10%

### Hurdle requirement

Cloud (online) students only: Attendance at a 2 day seminar held during trimester at Waterfront (Geelong) campus.

### Prescribed texts

Fook, J 2016, Social Work: A critical approach to practice. 3rd Edition. London: SAGE

## HSW404 – Social Work Field Education B Research Focused

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)^ with significant campus requirements, CBD\**

*Credit point(s): 3*

*EFTSL value: 0.375*

*Trimester 2 Unit Chair: Sevi Vassos*

*Cohort rule: This unit is only available to students enrolled in H430 Bachelor of Social Work (Honours)*

*Prerequisite: All of HSW401, HSW402, HSW416*

*Corequisite: Nil*

*Incompatible with: HSW415, HSW434, HSW452, HSW456, HSW457*

*Scheduled learning activities – campus: 70 days (500 hours) of practicum (field placement) in a social or community service agency or program.*

*^ Students must attend and participate in one pre-placement seminar at the Waterfront campus in Trimester 1 of the year placement is to be undertaken. Students must also attend and participate in three integration seminars during the 70 day practicum.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities throughout the 70 day practicum.*

### Content

This unit requires students to develop an individualised educational learning plan for their structured and supervised practicum in an approved human service organisation. As per the regulatory requirements of the Australian Association of Social Workers (AASW) students are provided with 1.5 hours per week of supervision from a field educator who is a qualified social worker with a minimum of two years post qualifying experience, who has undertaken appropriate supervision training. The student and the placement field educator are supported by the university liaison person (ULP) who is a qualified social worker with a minimum of five years post qualifying experience who provides a minimum of two substantial contacts.

Opportunities are provided for students to integrate theory with practice and develop the required skills and knowledge base to meet the AASW Practice Standards. Students are placed in a range of setting where learning experiences are with individuals, families, groups and communities.

As a unit in the Bachelor of Social Work (Honours) students will be required to undertake a research focused placement exploring research in the context of social work practice. Students will be expected to reflect critically on day-to-day experiences in the practicum, explore issues and make verbal and written presentations to peers, colleagues and mentors

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Assessment

- Assessment task 1: Placement portfolio
- Assessment task 2: Mid-placement review report
- Assessment task 3: Critical reflection report-research focused (2500 words)
- Assessment task 4: Final placement review report

Field education units are graded as an Ungraded Pass (UP). All assessment items must be completed to a satisfactory standard to attain a UP grade.

### Prescribed texts

Cleak, H. & Wilson, J. (2013). Making the Most of Field Placement (3rd ed.) South Melbourne, Vic, Cengage Learning.

## HSW415 – Social Work Field Education B

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)^ with significant campus requirements, CBD\**

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 2 Unit Chair: Sevi Vassos*

*Cohort rule: This unit is available only to students enrolled in the Bachelor of Social Work (H330)*

*Prerequisite: Completion of all Social Work core units from levels 1 to 4*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 70 days (500 hours) of practicum (field placement) in a social or community service agency or program.*

*^Students must attend and participate in one pre-placement seminar at the Waterfront campus in Trimester 1 of the year placement is to be undertaken. Students must also attend and participate in three integration seminars during the 70 day practicum.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities throughout the 70 day practicum.*

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Assessment

- Assessment task 1: Placement portfolio comprising field placement agreement, log of hours, safety audit, cloud (online) activities, field education learning plan.
- Assessment task 2: Mid placement review report. Students and field educators complete and submit a report using a University-provided template to provide a rating and comment on each of the learning goals that incorporate the eight AASW practice standards identified in their agreed learning plan. This is presented to the University liaison person prior to submission.
- Assessment task 3: Critical reflection and theoretical integration assignment (2000 words)
- Assessment task 4: Final placement review report. Building on the midplacement report students and field educators complete a final placement review report of the student's learning against the learning goals identified and agreed upon in the learning plan.

A student's performance in field education units is graded as an Ungraded Pass (UP) or Fail. All assessment items must be completed to a satisfactory standard to attain a UP grade.

### Hurdle requirement

Cloud (online) students only: Attendance at a 1 day seminar held during trimester prior to enrolment at Waterfront (Geelong) campus.

## Requirements

Students need to demonstrate ethical and professional conduct in accordance with:

- AASW Code of Ethics
- Deakin University Student Charter
- Deakin University Regulation 04.1(1) – General Misconduct

## HSW416 – Social Work Honours Research Project A

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)^ with significant campus requirements, CBD\**

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Russell Shuttleworth*

*Cohort rule: This unit is only available to students enrolled in H430 Bachelor of Social Work (Honours)*

*Prerequisite: Nil*

*Corequisite: HSW401*

*Incompatible with: HSW415, HSW434, HSW452, HSW456, HSW457*

*Scheduled learning activities – campus: Participation in 9 research seminars throughout the year (in HSW416 and HSW417) either at Waterfront (Geelong) or online.*

*^ Students are expected to attend the first and last seminars at Waterfront (Geelong) and maintain regular contact with their supervisor.*

*Scheduled learning activities – cloud (online): Participation in 9 research seminars throughout the year (in HSW416 and HSW417) either at Waterfront (Geelong) or online.*

*^ Students are expected to attend the first and last seminars at Waterfront (Geelong) and maintain regular contact with their supervisor.*

## Content

The unit in conjunction with HSW417 requires students, independently under the guidance of a research supervisor, to design and conduct an independent piece of research. This requires students to identify and refine a research topic and research aims/questions, design a research project, apply for ethics approval, select and apply an appropriate methodology, collect and analyse data and disseminate research findings. Students will be required to present their findings in oral and written form and to produce a thesis document for examination.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Written assessment 1 – Pass/fail
- Assessment task 2: Written assessment 2 – Pass/fail
- Assessment task 3: Oral presentation (15 minutes and 5 minutes questions) 15%
- Assessment task 4: Written report (12,000 words) 85%

## HSW417 – Social Work Honours Research Project B

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)^ with significant campus requirements, CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Russell Shuttleworth and Beth Crisp*

*Cohort rule: This unit is only available to students enrolled in H430 Bachelor of Social Work (Honours)*

*Prerequisite: All of HSW401, HSW402 and HSW416*

*Corequisite: HSW401*

*Incompatible with: HSW415, HSW434, HSW452, HSW456, HSW457*

*Scheduled learning activities – campus: Participation in 9 research seminars throughout the year (in HSW416 and HSW417) either at Waterfront (Geelong) or online.*

*^ Students are expected to attend the first and last seminars at Waterfront (Geelong) and maintain regular contact with their supervisor.*

*Scheduled learning activities – cloud (online): Participation in 9 research seminars throughout the year (in HSW416 and HSW417) either at Waterfront (Geelong) or online.*

*^ Students are expected to attend the first and last seminars at Waterfront (Geelong) and maintain regular contact with their supervisor.*

## Content

HSW417 is a continuation of HSW416 – please refer to HSW416 for content details.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

HSW417 is a continuation of HSW416 – please refer to HSW416 for assessment details.

## HSW434 – Administration and Policy Development: The Organisational Context

*Enrolment modes: Trimester 1: Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Norah Hosken*

*Cohort rule: This unit is only available to students enrolled in the Bachelor of Social Work (H330)*

*Prerequisite: HSW314 (or appropriate experience in a human services organisation as approved by the unit chair)*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: IKE (CBD): Students must also attend and participate in 2 x 5 day (10 days) intensives at the Institute of Koorie Education, Waurin Ponds (Geelong) Campus.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including a 1 day seminar at Waterfront (Geelong) IKE (CBD): Online independent and collaborative learning activities including fortnightly online workshops, as per Cloud (online) students' scheduled learning commitments.*

### Content

The unit relates professional social work practice to organisational theory, models of administration and management, and the domain of industrial relations, paying particular attention to the public sector and to human services delivery systems. Organisational forms in which social workers operate will be discussed, including the different levels of government and the non-government sector. The work context for social work practice will be analysed and a number of critiques of the established order presented, including radical change models and feminist analysis of bureaucracies. Social control functions of public welfare will be highlighted as well as issues relating to social justice and public welfare.

*Note: ^Students enrol as Cloud (online); however there are significant campus requirements*

*\*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Theoretical paper (1200 words) 30%
- Assessment task 2: Organisational analysis (2500 words) 60%
- Assessment task 3: Online group discussion (300 words) 10%

### Hurdle requirement

Attendance at a 1 day seminar held during trimester at Waterfront (Geelong) campus.

## HSW452 – Working in Uncertainty: Social Work Theory and Practice H

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kim Robinson*

*Trimester 2 Unit Chair: Kim Robinson*

*Cohort rule: This unit is only available to students enrolled in the Bachelor of Social Work (H330)*

*Prerequisite: Completion of all Social Work core units from levels 1–3. (HSW314 as a prerequisite may be waived due to substantial relevant human service workplace experience as negotiated with the unit chair.)*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities, including BBC 5 seminars. Cloud Students must attend and participate in a 1 day workshop at Waterfront (Geelong).*

### Content

This unit aims to help graduating students develop a vision of the professional social work role and identity within contexts of change (at local, national and international levels) and uncertainty. What challenges currently face social work, and how can we work proactively within changing contexts of practice?

Topics include: globalisation; the professions in context (professional identity, managerialism, case management, industrial issues); technological developments and their effects on practice; post-colonialism and social movements (human rights, identity politics, work with migrants/refugees); social development and international social work; diversity and inclusivity; citizenship and the nature of community; ethics; lifelong learning and the contemporary professional; envisioning contemporary social work in uncertainty.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Short written assignment (1200 words) 40%
- Assessment task 2: Written assignment (2000 words) 50%
- Assessment task 3: Participation online and reflections (800 words) 10%

## Hurdle requirement

Cloud (online) students only: Attendance at a 1 day seminar held during trimester at Waterfront (Geelong) campus.

# HSW701 – Australian Social Work in an International Context

*Enrolment modes: Trimester 1: Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: John Fox*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Attendance at a 3 day seminar held during trimester at Waterfront Campus – dates to be advised.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including weekly online discussions and 8 scheduled online workshops.*

## Content

This unit will introduce students to aspects of the history and current context of social work practice, and to begin to develop an appreciation of the role of social work and the diversity of the field in both Australia and overseas. This unit will provide students with an overview of social work processes and encourages students to engage with debates and to identify those factors which have contributed to their beliefs and attitudes towards a range of aspects and stakeholders involved in social welfare provision.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Report (2500 words) 50%
- Assessment task 2: Essay (2500 words) 50%

## Hurdle requirement

Attendance at a 3 day seminar held during trimester at Waterfront Campus.

# HSW702 – Understanding Care and Risk

*Enrolment modes: Trimester 1: Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kim Robinson*

*Trimester 2 Unit Chair: Kim Robinson*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including five scheduled online seminars.*

## Content

Students will develop an awareness of how 'care' and 'risk' are conceptualised within theoretical, legal, social, policy and organisational contexts and their political and ethical consequences for social work practice. Students will appreciate that the idea of 'the risk society' reconceptualises more traditional ideas of 'control' in professional social work practice, and their consequences for 'care', 'protection' and social justice and recognise that 'care' and 'risk' are integrally related, and co-exist in all professional practice contexts.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Essay (1500 words) 35%
- Assessment task 2: Report (2500 words) 55%
- Assessment task 3: Cloud participation (approximately 1000 words) 10%

## Hurdle requirement

Attendance at a 1 day seminar held during trimester at Waterfront Campus.

## Prescribed texts

Morley, C., Ablett, P. and Macfarlane, S., (2019) Engaging with Social Work. A critical introduction. Second Edition. Cambridge University Press. Port Melbourne: Australia

# HSW703 – Becoming a Social Worker

*Enrolment modes: Trimester 1: Cloud (online) with significant campus requirements (see Contact hours)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sophie Goldingay*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students must attend and participate in a 2 day workshop at Waterfront (Geelong) – dates to be advised.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning experiences including weekly video recordings and 5 scheduled online seminars.*

## Content

This unit will provide students with an opportunity to learn about micro-skills and models for practice along with a range of accompanying theoretical perspectives. These perspectives will include crisis theory and anti-oppressive practice, systems theory and strengths-based practice. The unit will include a case study approach throughout the trimester, where students engage with client/family scenarios that involve development of direct practice, group work and family work skills.

## Assessment

- Assessment task 1: Cultural plan (1000 words) and reflection (950 words) 35%
- Assessment task 2: Case scenario video (15 minutes), with reflection on microskills and theories used (1250 words) 55%
- Assessment task 3: Peer and self-assessment and feedback (50 words x 6 items = 300 words total) 10%

## Hurdle requirement

Attendance at a 2 day seminar held during trimester at Waterfront Campus

## Prescribed texts

Healy, K 2014, Social work theories in context: Creating frameworks for practice 2nd Edition. Palgrave Macmillan, NY

Maidment, J & Egan, R 2016, Practice skills in social work and welfare: More than just common sense. Allen & Unwin, Crows Nest

# HSW704 – Reconstructing Professional Practice

*Enrolment modes: Trimester 2: Cloud (online), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Angela Daddow*

*Cohort rule: This unit is only available to students enrolled in H703 Master of Social Work*

*Prerequisite: Completion of a minimum of 7 HSW coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 scheduled online workshops.*

## Content

This unit aims to help graduating students develop a vision of the professional social work role and identity within contexts of change. This will involve students undertaking a project which will integrate their learning throughout the Master of Social Work. This project will be in two parts. One part will require students to identify a personal theory of practice and the second will be to develop a plan for continuing professional education.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Written assignment (3000 words) 60%
- Assessment task 2: Written assignment (2000 words) 40%

## HSW705 – Challenging Poverty and Social Exclusion

*Enrolment modes: Trimester 1: Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 1  
EFTSL value: 0.125  
Trimester 1 Unit Chair: Beth Crisp*

*Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil*

*Scheduled learning activities – campus: Students must attend and participate in a 2 day workshop at Waterfront (Geelong) – dates to be advised.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 x 1 hour scheduled online seminars during the trimester.*

## Content

Given the close correlations between poverty, social exclusion and uptake of social work services, this unit provides underpinning knowledge which will be applicable in all aspects of social work practice including direct practice, community development, policy analysis and research. The focus on poverty and social exclusion also reflects ongoing policy initiatives of governments which find expression in policies for social inclusion and social justice in areas such as health, education, employment, housing and criminal justice as well as social welfare.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Essay (2000 words) 40%
- Assessment task 2: Proposal (3000 words) 60%

## Hurdle requirement

Attendance at a 2 day seminar held during trimester at Waterfront Campus

## HSW707 – Addressing Violence and Abuse

*Enrolment modes: Trimester 1: Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 1  
EFTSL value: 0.125  
Trimester 1 Unit Chair: Sarah Epstein*

*Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil*

*Scheduled learning activities – campus: Attendance at a 2 day seminar held during trimester at Waterfront Campus – dates to be advised.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online blackboard collaborate sessions (live discussion with recordings provided), minimum five discussion posts on the unit discussion boards in relation to content and Unit chair responses.*

## Content

This unit will give students an introduction to different forms of violence and abuse from a critical social work perspective. Students will examine the social and political underpinnings of violence in society, with particular attention to their gendered and intersectional dimensions. It will provide an overview of definitions and causes of violence and abuse and it will explore social work interventions at the individual and social levels. Students will explore ways in which social workers can support survivors, work with perpetrators and develop strategies for preventing violence and abuse.

*Note: ^Students enrol as Cloud (online); however there are significant campus requirements*

*\* CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: Written assignment (2500 words) 50%
- Assessment task 2: Individual assignment and Powerpoint presentation 45%
- Assessment task 3: Minimum 5 online weekly discussion posts throughout the 11 weeks of trimester 5%

## Hurdle requirement

Attendance at a 2 day seminar held during trimester at Waterfront Campus.

## HSW709 – Practicing Social Work with Communities and Groups

*Enrolment modes: Trimester 1: Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Angela Daddow*

*Cohort rule: This unit is only available to students enrolled in H703 – Master of Social Work*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online independent and collaborative learning activities. Students must attend and participate in a 3 day workshop intensive at Waterfront (Geelong) – dates to be advised.*

*Scheduled learning activities – cloud (online):*

### Content

Community work and group work are important methods of social work practice, and the community a key field of practice. This unit aims to equip students with the theoretical knowledge and practical skills to integrate community work, often using group work skills, into their social work roles. Community work plays a significant role in international, government, non-government, volunteer and in for-profit social service organisations. Community work is used within all levels of government (local, state and commonwealth) and across many departments (youth, health, communities, ageing, housing, disabilities, multicultural, indigenous). Community work is based on a critical understanding of inequality in our socio-political structures. In the first section, this unit provides an introduction to community work and related group work theory and skills. This is then expanded to explore how social workers using community work can apply understandings of the intersectionalities of oppressions and privileges, and bi-cultural and multi-cultural analysis into their practice.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

### Assessment

- Assessment task 1: Essay (2500 words) 50%
- Assessment task 2: Community options written report (2500 words) 50%

### Hurdle requirement

Attendance at a 3 day seminar held during trimester at Waterfront Campus

### Prescribed texts

Kenny, S & Connor, P 2017 Developing Communities for the Future, 5th edn. Cengage Learning Australia

## HSW711 – Responding to Trauma, Grief and Loss

*Enrolment modes: Trimester 1: Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Norah Hosken*

*Cohort rule: This unit is only available to students enrolled in H703 – Master of Social Work*

*Prerequisite: HSW703*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online independent and collaborative learning activities. Students must attend a 2 day workshop at Waterfront (Geelong) – dates to be advised.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including three scheduled online seminars. Students must attend and participate in a compulsory two day workshop at Waterfront (Geelong) – dates to be advised.*

### Content

This unit explores a range of critical social work theories and approaches to understanding and responding to trauma, grief and loss, including more traditional individualised approaches, as well as critical and postmodern approaches. The implications of using contrasting theoretical frameworks to inform social work practice are explored in relation to a range of different trauma, grief and loss experiences including mental and other health issues, work with refugees and asylum seekers, bereavement, sexual assault, abuse, and domestic violence. A lifespan perspective is interwoven throughout the unit, to consider trauma, loss and grief experienced by children, young adults and aged persons.

Students are encouraged to draw on the skills and knowledge of social work method and process developed in a previous practice unit (HSW703). The unit also explores trauma, grief and loss experienced by whole communities, through transgenerational trauma, and disasters such as bushfire and flood, as well as terrorism and mass violence. A further area of trauma, grief and loss – disenfranchised grief – is also considered. Throughout the unit, students are encouraged and guided to engage in critical reflection on their own values, ethics and assumptions around trauma, loss and grief.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Assessment

- Assessment task 1: 4 x journal entries (total 2500 words) 50%
- Assessment task 2: Video role play (10-12 minutes) and written critical analysis (1500 words) 50%

## Hurdle requirement

Attendance at a 2 day seminar held during trimester at Waterfront Campus.

# HSW714 – Professional Practice in Social Work A

*Enrolment modes: Trimester 2: Cloud (online) with significant campus requirements (see Contact hours), CBD\**

*Credit point(s): 3*

*EFTSL value: 0.375*

*Trimester 2 Unit Chair: James Lucas*

*Cohort rule: This unit is only available to students enrolled in H703 Master of Social Work*

*Prerequisite: At least four units including HSW701, HSW702 and HSW703*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 70 days (500 hours) of practicum (field placement) in a social or community service agency or program.*

*Students must attend and participate in a 2 day pre-placement preparation seminar at Waterfront (Geelong) in Trimester 1 of the year placement is to be undertaken – dates to be advised. Students are also required to participate online activities.*

*Scheduled learning activities – cloud (online):*

*A minimum of 500 hours (across at least 65 days) of practicum (field placement) in a social or community service agency or program.*

*Students must attend and participate in a 2 day pre-placement preparation seminar at Waterfront (Geelong) in Trimester 1 of the year placement is to be undertaken intensive. Students are also required to participate in online activities.*

## Content

This unit enables students to participate in a structured and supervised field placement in an approved human service organisation. As per the regulatory requirements of the Australian Association of Social Workers (AASW) students are provided with 1.5 hours per week of supervision from a field educator who is a qualified social worker with a minimum of two years post qualifying experience, who has undertaken appropriate supervision training. The student and the placement field educator are supported by the university liaison person who is a qualified social worker with a minimum of five years post qualifying experience who provides a minimum of two substantial contacts.

Opportunities are provided for students to integrate theory with practice and develop the required skills and knowledge base to meet the Australian Association of Social Workers standards. Students are placed in a range of setting where learning experiences are with individuals and families, groups and communities. The placement can include interpersonal work, and may also introduce students to project work, research work and social policy analysis and formulation.

Recognition of Prior Learning (RPL) is possible for HSW714 – Professional Practice in Social Work A for students who are able to demonstrate that their prior work experience has provided them with the knowledge and experience that would normally be provided in the first placement.

There is a separate process in applying for this type of RPL and more information is available in RPL Guidelines.

Applications for RPL are due 30 March of the year students are due to undertake their first placement. Late applications cannot be accepted and students are encouraged to apply earlier than this if possible.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery*

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

In accordance with the Department of Justice 2007, Working with Children Act 2005, amended 2017, all students are required to undertake a Working with Children Check at the commencement of their course. Students who fail to obtain a Police Record Check and a Working with Children Check prior to the commencement of clinical placement will not be able to undertake clinical placement and this will impede progress in the course.

Students may also be required to declare their immunisation status to satisfy the requirements of health organisations where they will be undertaking their clinical learning experience. A health organisation may refuse to accept a student for placement if the student's immunisation status is not satisfactory to the health organisation.

### Assessment

- Assessment task 1: Placement portfolio
- Assessment task 2: Mid-placement review report
- Assessment task 3: Critical incident report (3000 words)
- Assessment task 4: Final placement review report

All assessment items must be completed to a satisfactory standard to attain an UP grade.

### Hurdle requirement

Attendance at a 2 day seminar held during trimester prior to enrolment at Waterfront Campus.

## HSW715 – Professional Practice in Social Work B

*Enrolment modes: Trimester 2: CBD\*, Cloud (online) with significant campus requirements (see Contact hours)*

*Credit point(s): 3*

*EFTSL value: 0.375*

*Trimester 2 Unit Chair: James Lucas*

*Cohort rule: Only available to students enrolled in H703 Master of Social Work*

*Prerequisite: All of HSW701, HSW703, HSW705 HSW702, HSW714, HSW707, HSW709, HSW711, HBS745 and either HSH725 or AIP747*

*Corequisite: HSW704*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 70 days (500 hours) of practicum (field placement) in a social or community service agency or program.*

*Attendance at a 3 day seminar held during trimester prior to enrolment at Waterfront Campus – dates to be advised. Students are also required to participate online activities.*

*Scheduled learning activities – cloud (online): A minimum of 500 hours (across at least 65 days) of practicum (field placement) in a social or community service agency or program.*

*Students must attend and participate in a 3 day pre-placement preparation seminar at Waterfront (Geelong) in Trimester 1 of the year placement is to be undertaken intensive. Students are also required to participate in online activities.*

### Content

This unit requires students to undertake research in a practice setting as a key focus of a structured and supervised field placement in an approved human service organisation. As per the regulatory requirements of the Australian Association of Social Workers (AASW) students are provided with 1.5 hours per week of supervision from a field educator who is a qualified social worker with a minimum of two years post qualifying experience, who has undertaken appropriate supervision training. The student and the placement field educator are supported by the university liaison person who is a qualified social worker with a minimum of five years post qualifying experience who provides a minimum of two substantial contacts.

Opportunities are provided for students to integrate theory with practice and develop the required skills and knowledge base to meet the Association of Social Workers Practice Standards. Students are placed in a range of settings where learning experiences are with individuals, families, groups and communities. The placement can include interpersonal work, and will require students to engage in a substantial piece of practice research of relevance to the agency in the placement setting.

*Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery.*

## Department of Human Services policy – Police Record Check and Working With Children Check

In accordance with Department of Human Services policy, all students are required to undertake a National Police Record Check prior to clinical placements in each calendar year of their course.

- Assessment task 3: Practice research report (3000 words) and verbal presentation
- Assessment task 4: Final placement review report

All assessment items must be completed to a satisfactory standard to attain an UP grade.

### Hurdle requirement

Attendance at a 3 day seminar held during trimester prior to enrolment at Waterfront Campus.

## IND101 – Introduction to Aboriginal Studies

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gabrielle Fletcher*

*Trimester 2 Unit Chair: Karinda Burns*

*Trimester 3 Unit Chair: Jennie Briese*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour weekly class divided into 1 x 1 hour Class and 1 x 2 hour Seminar or equivalent for 11 weeks*

*Intensive/CBD: This unit is taught intensively via CBD for 11 weeks as a combination of face to face and online delivery. 12 hours – face-to-face on campus Intensive mode with a minimum of four Blackboard Collaborate sessions during the trimester with ongoing access to CloudDeakin resources.*

*Dates to be advised.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. A minimum of four Blackboard Collaborate sessions will be conducted during the trimester.*

### Content

This unit introduces students to Australia's First Nation Peoples in a comprehensive and engaging exploration of both traditional and contemporary experience and expression of Australian Aboriginal culture, Knowledges, histories and identities from an Indigenous standpoint, and through a number of interdisciplinary perspectives. The course will cover three clear movements of investigation from traditional modality and Australian Indigenous Knowledges; colonisation and its impact; and reclamation and reconciliation with a focus on Indigenous cultural forms and representation. Students will learn about the complexities of spirituality, lore and traditional philosophy, to then understand the devastating impact of colonisation and its aftermath. The final portion of the unit will then address contemporary Indigenous culture and expression including language, story, art and creative expression allowing students to consider and explore self-representation as a method of expanding understandings of the diversity of Aboriginalities. This unit presents a thought provoking, dynamic and challenging cultural experience of Indigenous Australian history, culture and worldview and provides a foundation for developing socio-cultural literacy.

### Assessment

- Online Yarning Circle (1000 words in total) – 35%
- Research Essay (1500 words) – 35%
- Reflective Narrative Task using Multi-media (1500 words or ten minutes or equivalent combination) – 30%

## IND201 – Aboriginal Knowledges and Experiences: Historical Journeys–Contemporary Perspectives

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)

Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)

Trimester 3: Burwood (Melbourne), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Donna Moodie

Trimester 2 Unit Chair: Donna Moodie

Trimester 3 Unit Chair: Bryan Fricker

Prerequisite: Nil

Corequisite: Nil

Incompatible with: ECP226

Scheduled learning activities – campus: 1 x 2-hour seminar per week

Scheduled learning activities – cloud (online): 1 x 2-hour seminar per week (recordings provided), 1 x 1-hour online seminar per week

### Content

This unit provides in depth knowledge of historical and contemporary Aboriginal cultures in Australia and gives an overview of social, educational, economic, health, policy and political issues. The aim is to empower students to understand current circumstances and develop appropriate skills and strategies that may be applied in a workplace or in liaison with Aboriginal Peoples or organisations.

It examines:

- the complexity and diversity of pre-invasion societies
- relationships between Aboriginal and non-Aboriginal societies
- the impacts of policy since invasion
- community consultation and communication protocols and sensitive issues concerning appropriate terminology
- lateral violence and workplace 'cultures'
- strategies for combatting racism
- employment strategies and entrepreneurship
- current perspectives of the location of Aboriginal Peoples in Australia
- social and political movements/directions/futures
- future directions and the interplay between contemporary debates – for example, Sovereignty, Treaties and Constitutional Recognition

Note: Student enrolment quotas apply to this unit

### Assessment

- Assessment 1 – Essay – 50%
- Assessment 2 – Essay – 50%

## IND705 – Thesis Part A

### Enrolment modes:

Trimester 1: CBD\*

Trimester 2: CBD\*

Credit point(s): 2

EFTSL value: 0.250

Trimester 1 Unit Chair: Tyson Yunkaporta

Trimester 2 Unit Chair: Tyson Yunkaporta

Cohort rule: This unit is only available to students enrolled in A601 – Graduate Diploma of Indigenous Research

Prerequisite: Nil

Corequisite: Nil

Incompatible with: Nil

Scheduled learning activities – campus: Students will attend 2 x 1 week intensive classes over the trimester. Dates to be advised.

All unit content will be available via CloudDeakin.

### Content

Students choose and research an area of interest that they have proposed from the unit IND702 Designing an Indigenous Research Project. The research project will be related to the student's own expertise and discipline area and the research will be conducted under a suitably qualified supervisor in the chosen field.

Thesis Part A and Thesis Part B are ordinarily taken concurrently in the final trimester of study. Part A focuses on defining the research question, reviewing relevant literature, design and methodology development, data analysis and data collection.

Thesis Part B focuses on the write up of the research paper.

There is no prepared content in this unit. It is a research unit in which students, in consultation with an appointed supervisor, carry out research tasks to develop new knowledge (content) themselves.

Note: \*CBD refers to Institute of Koorie Education – Community Based Delivery

## Assessment

There are no formal assessment requirements in this unit. Assessment for the overall research piece, comprising units Thesis A and B, is a research paper of up to 20,000 words (100%) due at completion of Thesis Part B.

## IND706 – Thesis Part B

*Enrolment modes:*

*Trimester 1: CBD\**

*Trimester 2: CBD\**

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Tyson Yunkaporta*

*Trimester 2 Unit Chair: Tyson Yunkaporta*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: AIM723*

*Scheduled learning activities – campus: Community Based Delivery (CBD): Students are required to attend 2 x 1 week intensive classes, seminars and fieldtrips per trimester at Waurin Ponds (Geelong)*

## Content

Expressing connection to place and land is a powerful human experience. The interpretation of meaning and significance from one generation to the next is also a tradition and practice of all peoples. Compelling interpretation can bring to many audiences new ways of understanding spiritual connections between place and culture. It can also reveal untold narratives and histories that can enrich and inform contemporary land management practice. Designing effective interpretive narratives and media can act to re-interpret history, dispel misrepresentations and bring forth undervalued knowledge and perspectives. In recognising the many different ways of seeing and knowing, this unit explores the important role of interpretation as not only a conversation across knowledge systems but as a crucial skill that can inform, educate and ultimately lead to a wiser management of water, sea and Country.

The unit examines the concept of cultural landscape, the articulation of significance and examines the principles of transformative interpretation. It critically analyses contemporary interpretative techniques focussing on oral interpretation, the written word, installations, signage and new interpretive media. Combining what you have learned, you will design and present your own cultural interpretation of a place significant to yourself and your community.

*Note: Enrolment in this unit is handled by the Institute of Koorie Education.*

## Assessment

- Assessment 1 – Reflection – 30%
- Assessment 2 – Written critique – 30%
- Assessment 3 – Creative design – 40%

The adoption of Collaborative Management between nation states and Indigenous Peoples is a focus of this unit and provides clear examples of the power sharing and dialogue between knowledge systems. Collaborative management typically elevates Indigenous Peoples above 'the pack' of resource users and results in a change in the nature of the relationship between Indigenous Peoples and settler societies.

This unit will examine Collaborative Management in controlled burning and fire management, protected area management and water management. Using these themes we will examine some of the scientific, economic, and community development concepts that inform state-based approaches to land management and their dialogue with localised knowledge systems, focusing on Indigenous Knowledge systems.

*Note: Enrolment in this unit is handled by the Institute of Koorie Education.*

## IND711 – Exploring Collaborative Land Management

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong)*

*Trimester 2: Waurin Ponds (Geelong)*

*Trimester 3: Waurin Ponds (Geelong) – Not offered*

*Trimester 3 2019*

*Credit point(s): 1*

*Previously coded as: SQE741*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Donna Moodie*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Community Based Delivery (CBD): Students are required to attend 2 x 1 week intensive classes, seminars and fieldtrips per trimester at Waurin Ponds (Geelong).*

## Content

The inclusion of stakeholders in the implementation of Natural Resource Management (NRM) has been steadily growing in popularity, with power sharing and negotiation processes becoming adopted systematically. Broadly described as Collaborative Management, this power sharing is typically between the State and resource 'users' at either a local or regional scales. The inclusive decision-making processes involved in its implementation inevitably necessitates a broader engagement with knowledge and values other than those provided by western science and neoclassical economics.

## Assessment

- Assessment 1 – Report – 30%
- Assessment 2 – Discussion forum (written contribution) – 40%
- Assessment 3 – Online oral presentation – 30%

## IND712 – Policy and Governance for Environmental Management

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong)*

*Trimester 2: Waurin Ponds (Geelong)*

*Trimester 3: Waurin Ponds (Geelong) [not offered in Trimester 3 2019]*

*Credit point(s): 1*

*Previously coded as: SQE735*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Suzanne Nunn*

*Trimester 2 Unit Chair: Suzanne Nunn*

*Trimester 3 Unit Chair: Suzanne Nunn*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: CBD: Students are also required to attend 2 x 1 week long Intensives at Waurin Ponds campus, Geelong. Intensives include a mixture of classes, seminars and fieldtrips.*

## Content

The management of the environment in Australia is very much bound up in the public policy priorities of the day and can morph and change according to governmental and public concerns. Currently, it is conducted within a complex matrix characterised by partnerships between government agencies, Traditional Owner Groups, Non-Government Organisations (NGOs) as well as philanthropic organisations. This unit will explore contemporary environmental public policy, the laws that underpin and enable such policies and examine the differing governance frameworks that guide environmental management. This will include discussion on various land tenure systems in Australia; state and commonwealth environmental legislation; the management of fresh water; the National Reserve System and in particular Indigenous Protected Areas and Marine Parks. As you study the unit, critical analysis of the various models will equip you for a real-world engagement with policy, environmental law and governance.

*Note: Enrolment in this unit is handled by the Institute of Koorie Education.*

## Assessment

- Assessment 1 – Practical Test – 40%
- Assessment 2 – Group Oral Presentation – 30%
- Assessment 3 – Problem-solving Task – 30%

## Content

Our immersion into a rich and dynamic visual culture is now a reality. How many of you have watched wildlife documentaries and films made about environmental conservation and seen the proliferation of films and short YouTube's that show the management of Country by local custodians? The use of digital film, images, photopoint and visual media has become increasingly important in the way we both communicate and appeal to a global audience. Using new and innovative visual techniques to interpret and communicate the environment, will most certainly become a part of your future workplace toolkit. Questions this unit will ask include: How are conservation and climate change matters represented in contemporary Eco-cinema? What role do Digital Reports, Visual Stories, Infographics, YouTube clips and citizen science have in the future of participatory environmental management? How may your knowledge and understanding of contemporary visual culture become part of your own workplace, research, communication and practice? Studying this unit will give you the opportunity to explore and apply new visual media to the community of practice or field you may work in. By doing so, you will be asked to reflect on what you think about visual representation as well as design visual media to enhance your capabilities in this field.

*Note: Enrolment in this unit is handled by the Institute of Koorie Education.*

## Assessment

*Scheduled learning activities – campus: Community Based Delivery (CBD): Students are required to attend 2 x 1 week intensive classes, seminars and fieldtrips per trimester at Waurin Ponds (Geelong).*

## Content

Individuals taking action towards the achievement of their goals is a valuable undertaking. However, many of the problems that people are seeking to address in their management of Country require more than the commitment of a single passionate individual working alone to address them. The physical scale of the issues, the numbers of people affected, the lack of knowledge available of solutions and the impacts of actions, as well as limited resources available requires people and organisations to use approaches that enable coordinated action towards a shared future outcome.

This unit examines the establishment and implementation of strategic planning and project planning as tools for establishing a vision and undertaking actions that work towards achieving them. By examining whole of Country plans, conservation action plans and Caring for Country project plans we will become familiar with the planning processes being used to deliver outcomes on Country that match Aboriginal and Torres Strait Islander Peoples' aspirations.

*Note: Enrolment in this unit is handled by the Institute of Koorie Education.*

## Content

Following a lead, investigating a story, finding new information and reporting on findings is a vital skill for working in environmental land management. The art of writing and communicating for varied audiences are skills that can accomplish a number of things such as contributing to new information, articulating knowledge and improving communication. The use of oral histories, photographs, newspaper clippings, reports and published materials can all contribute to enriching our understanding of Country and people's connection to it. This unit provides the space for students to focus on advancing their writing and communicating skills in a way that is relevant to their professional needs.

The unit begins by discussing the importance and contribution that research by Aboriginal and Torres Strait Islander custodians can make, to the needs of managing both cultural heritage and Country. It includes a discussion on the protocols required to engage in research, and how different approaches can be used to communicate to a variety of audiences. By the end of the unit you will have acquired advanced research strategies, critical writing techniques and developed a plan for writing a chapter to include Aboriginal and Torres Strait perspectives on caring for Country.

*Note: Enrolment in this unit is handled by the Institute of Koorie Education.*

## Assessment

- Assessment 1 – Review of resources report – 25%
- Assessment 2 – Report – 25%
- Assessment 3 – Abstract summary – 20%
- Assessment 4 – Exploratory research paper – 30%

## IND716 – Professional Practice for Land Management

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong)*

*Trimester 2: Waurin Ponds (Geelong)*

*Trimester 3: Waurin Ponds (Geelong) – Not offered*

*Trimester 3 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Donna Moodie*

*Trimester 2 Unit Chair: Donna Moodie*

*Trimester 3 Unit Chair: Donna Moodie*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: CBD: Students are required to attend 3 x 1 week intensive seminars per trimester via community-based delivery (and/or supported by face-to-face intensive study blocks).*

### Content

The unit focuses on enhancing student's critical reflection, evaluation and communication skills to apply to enhancing their professional practice and thereby enabling them to be more effective in the workplace. These are also important for students in the context of obtaining work, evaluating their workplace performance and sharing their knowledge and achievements effectively and professionally and engage with key stakeholders in order to support informed decision-making.

The development of a professional portfolio of work, a story report and seminar presentation will provide a structure for students to develop the specified skills. The foundation provided by these tasks can be used for further exploring and developing their career aspirations during the remainder of their studies and into the future. Additionally, the narrative format and audio-visual reporting and presentation tasks enable students to develop and demonstrate skills that are versatile, effective and highly valued in the field of land and sea Country management.

*Note: Enrolment in this unit is handled by the Institute of Koorie Education.*

### Assessment

- Assessment 1 – Story Report – 30%
- Assessment 1 – Seminar Presentation – 30%
- Assessment 1 – Professional Practice Portfolio – 40%

## IND717 – Facilitation and Engagement for Natural and Cultural Resources Management

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong) Community Based Delivery – Intensive mode*

*Trimester 2: Waurin Ponds (Geelong) Community Based Delivery – Intensive mode*

*Trimester 3: Waurin Ponds (Geelong) Community Based Delivery – Intensive mode – Not offered Trimester 3 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Donna Moodie*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students are required to attend 2 x 1 week long Intensives at Waurin Ponds campus, Geelong. Intensives include a mixture of classes, seminars and practical activities.*

### Content

When working to achieve positive outcomes in Natural and Cultural Resource Management it is often necessary for groups of people to work together and for there to be constructive input from the community. Examples of the kinds of groups that need to work together effectively to make effective decisions include working groups, boards, committees, stakeholder groups and Community meetings. Facilitation and community engagement skills are effective and sought after skills for practitioners working with and for Aboriginal organisations and Communities in this field.

This unit provides students with an opportunity to develop their understanding of groups and the skills and knowledge involved in promoting community engagement, participation and effective group decision-making. The unit will examine topics such as meeting organisation and facilitation, group dynamics, active listening, sources of tension, managing conflict, prioritising and making decisions, community needs and preferences for participation and types of community engagement.

The unit aims to be relevant and practical for people working with groups of people to create successful natural and cultural resource management outcomes.

This unit requires students to engage in a considerable amount of practical exercises that aim to enable students to observe group dynamics and put into practice the theory about how groups make decisions and gain experience in applying skills and strategies that support participant access to group decision-making.

### Assessment

- Assessment 1 – Reflective Writing (1000 words) – 20%
- Assessment 2 – Demonstration/practical (1200 words) – 50%
- Assessment 3 – Case Study (1500 words) – 30%

## IND721 – Standpoint Theory in Indigenous Research

*Enrolment modes: Trimester 1: Cloud (online) and CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tyson Yunkaporta*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour Class and 1 x 2 hour Seminar or equivalent for 11 weeks*

*Scheduled learning activities – cloud (online): Intensive dates and unit content is available via CloudDeakin*

### Content

This unit introduces you to Indigenous research approaches and prepares you to develop an understanding of Standpoint Theory and your own position on the role of research. The evolution of key Standpoint theorists will be analysed and discussed to provide students with a paradigm to consider Indigenous research methodologies.

Current debates of resistance, compliance and insider/outsider perspectives as experienced by Indigenous researchers who engage with the Academy will be critically reviewed and form important learning in this unit. You will conduct self-reflexive work to map your relationality and begin to formulate a personal standpoint for Indigenous research.

*Note: \*CBD refers to Institute of Koorie Education; Community Based Delivery*

### Assessment

- Assessment 1 – Reflective Journaling (10 journal entries of 200 words each) – 25%
- Assessment 2 – Annotated Bibliography – 25%
- Assessment 3 – Research Essay (2500 words) – 50%

## IND722 – Indigenous Research: Ways of Valuing and Being

*Enrolment modes: Trimester 1: CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tyson Yunkaporta*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour Class and 1 x 2 hour Seminar or equivalent for 11 weeks.*

*Intensive dates and unit content is available via CloudDeakin.*

### Content

This subject will elucidate ways to assert Indigenous ethical protocols and worldviews in encounters with the academy. You will examine Indigenous axiology (ways of valuing) and ontology (ways of being) and the problematic intersections of these with mainstream academic research.

An examination of bias, gender issues, claims to objectivity and silences will challenge mainstream research methods and theory in light of Indigenous perspectives. You will privilege Indigenous Knowledge and voices, advocating processes of cultural safety and integrity aligned with cultural embodiments of your own axiology, ontology and Indigenous Knowledge Systems.

*Note: \*CBD refers to Institute of Koorie Education; Community Based Delivery*

### Assessment

- Assessment 1 – Mapping an Indigenous Knowledge System (2000 words equivalent), 40%
- Assessment 2 – Personal Philosophy (3000 words), 60%

## IND723 – Indigenous Research: Ways of Knowing and Doing

*Enrolment modes:*

*Trimester 1: CBD\**

*Trimester 2: CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tyson Yunkaporta*

*Trimester 2 Unit Chair: Tyson Yunkaporta*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour Class and 1 x 2 hour Seminar or equivalent for 11 weeks.*

*Intensive dates and unit content is available via CloudDeakin.*

### Content

This subject evaluates traditional western academic approaches to research in comparison with Indigenous epistemologies (ways of knowing) and methodologies (ways of doing). Qualitative methods covered include Yarning Circles, participant observation, unstructured interviewing (focus groups, in-depth), digital/online research, and mixed method approaches. Quantitative methods covered include survey design, statistical analysis, sampling techniques and strategies, measuring social variables, administration of questionnaires and response rates.

The benefits and limitations of various methods will be examined from multiple research perspectives or contexts. Students will be trained in devising tools to conduct research and data analysis from an Indigenous epistemological perspective.

*Note: \*CBD refers to Institute of Koorie Education; Community Based Delivery*

### Assessment

- Assessment 1 – Interview and Review (2000 words), 40%
- Assessment 2 – Oral Presentation (1000 words or equivalent), 20%
- Assessment 3 – Literature Review (2000 words), 40%

## IND724 – Indigenous Knowledge Modalities in Research

*Enrolment modes: Trimester 2: CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Tyson Yunkaporta*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour Class and 1 x 2 hour Seminar or equivalent for 11 weeks.*

*Intensive dates and unit content is available via CloudDeakin.*

### Content

This unit will introduce you to customary and innovative processes of Aboriginal Knowledge production and its expression. You will examine and master narrative, visual, place based oral modalities whilst deepening your understanding that Indigenous cultural practices are legitimate and justifiable knowledge repositories (mode of knowledge storage).

Your study will draw from models of different frameworks like Yolngu, Dadiirri, and Dilly bag, to design your own research practice model.

*Note: \*CBD refers to Institute of Koorie Education; Community Based Delivery*

### Assessment

- Assessment 1 – Written Report (2500 words), 50%
- Assessment 2 – Analytic Report (1500 words), 30%
- Assessment 3 – Conceptual Framework, 20%

## IND725 – Theories and Debates in Indigenous Knowledge's: Sites of Struggle

*Enrolment modes:*

*Trimester 1: Cloud (online), CBD\**

*Trimester 2: CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tyson Yunkaporta*

*Trimester 2 Unit Chair: Tyson Yunkaporta*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour Class and 1 x 2 hour Seminar or equivalent for 11 weeks*

*Scheduled learning activities – cloud (online): Intensive dates and unit content is available via CloudDeakin*

### Content

In this unit you will build your resilience as you engage in research which by definition is a struggle. You will deepen your understanding of Indigenous research, through interrogation of the binaries and potentially false dichotomies of opposing ideas and elements of research paradigms in the Indigenous space. You will mediate between and rationalise the tensions created at the cultural interface of different knowledge systems and ideologies nationally and internationally. You will evaluate conflicted spaces and argue a stance on topics such as insider/outsider issues, place vs space, revisionism vs amnesia, and other contested issues. You will examine Indigenous philosophies of conflict and balance such as Ganma and consider ways to apply this to a research career.

*Note: \*CBD refers to Institute of Koorie Education; Community Based Delivery*

### Assessment

- Assessment 1 – Essay (2500 words), 50%
- Assessment 2 – Annotated Bibliography (2500 words), 50%

## IND726 – Designing An Indigenous Research Project

*Enrolment modes: Trimester 2: CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Tyson Yunkaporta*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: IND702*

*Scheduled learning activities – campus: 1 x 1 hour Class and 1 x 2 hour Seminar or equivalent for 11 weeks.*

*Intensive dates and unit content is available via CloudDeakin.*

### Content

This unit offers research training that guides you on how to specify and detail a question or problem that is important and requires research to resolve. Various ways to review other researchers' work and determine if further research is needed. The importance of determining the conceptual framework as well as an appropriate method for gathering relevant data, and then interpreting the data is noted.

You will also follow protocols to ensure your research develops within a culturally appropriate and ethical manner. You will look at the importance of building relationships in Indigenous Communities before research commences. Indigenous relational methodologies and how they impact on the content and design of research will be considered. This unit is a culmination of preceding units in the development of the research proposal that will frame your research project.

*Note: \*CBD refers to Institute of Koorie Education; Community Based Delivery*

### Assessment

- Assessment 1 – Research Proposal (2500 words), 50%
- Assessment 2 – Poster and Oral Presentation (2500 words), 50%

## IND727 – Research Project A

*Enrolment modes: Trimester 3: CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Tyson Yunkaporta*

*Prerequisite: IND721*

*Corequisite: IND726*

*Incompatible with: IND705 and IND706*

*Scheduled learning activities – campus: Interactions with your supervisor may involve meeting in person (face-to-face), telephone meetings, video meetings, the online exchange of documents, or other suitable channels. The mode of contact and frequency of meetings should be negotiated with your supervisor in the first week of Trimester. General unit resources are provided on the CloudDeakin unit site.*

### Content

In this unit you commence the research project for your Research Paper. This is a supervised unit where you work closely with an allocated research supervisor via regular meetings and document exchange.

*Note: \*CBD refers to Institute of Koorie Education; Community Based Delivery*

### Assessment

There are no formal assessment requirements for this unit. Assessment for the overall research piece, comprising units Research Paper A and B, is a research paper of 12,000 words (100%) due at completion of IND728 Research Paper B.

## IND728 – Research Project B

*Enrolment modes: This unit will be offered from 2020.*

*Trimester 2: CBD\**

*Trimester 3: CBD\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Tyson Yunkaporta*

*Trimester 3 Unit Chair: Tyson Yunkaporta*

*Prerequisite: Nil*

*Corequisite: IND727*

*Incompatible with: IND705 and IND706*

*Scheduled learning activities – campus: Interactions with your supervisor may involve meeting in person (face-to-face), telephone meetings, video meetings, the online exchange of documents, or other suitable channels. The mode of contact and frequency of meetings should be negotiated with your supervisor, continuing the work done in IND727. General unit resources are provided on the CloudDeakin unitsite.*

### Content

In this unit you finish the research project that was started in IND727 (Research Project Part A). This is a supervised unit where you work closely with an allocated research supervisor via regular meetings and document exchange.

*Note: \*CBD refers to Institute of Koorie Education; Community Based Delivery*

### Assessment

Research Paper (12,000 words), reporting work done in IND727 and IND728, and due at completion of IND727 – 100%

## IPA701 – Managing Growth of Small Medium Enterprises

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Achinto Roy*

*Trimester 3 Unit Chair: Achinto Roy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 x 1 hour scheduled online seminars*

### Content

The unit aims to develop a strategic and analytical mindset complemented by advisory skills that are relevant to the operations of a small and medium enterprise. The unit draws extensively on theories of entrepreneurship, strategy, marketing, human resource management, business ethics and financial planning with the purpose of applying them to the creation, management and growth of SMEs.

The unit uses project based work to develop and hone business skills relevant to managing and growing SMEs within an Australian and International context.

## Assessment

- Written assignment 1: Case analysis (2000 words) – 20%
- Assessment 2 (Group of 4 students) – Written assignment 2: Project report (4000 words) – 40%
- Examination 2 hours – 40%

## MAA071 – Pre-Term: Getting to Grips with Postgraduate Study

*Enrolment modes:*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Adrian Raftery*

*Trimester 2 Unit Chair: Adrian Raftery*

*Trimester 3 Unit Chair: Adrian Raftery*

*Cohort rule: Nil*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): This short pre-term module will be completely online and will take students up to 10 hours to complete*

## Content

This unit provides orientation and study skill modules concerned with academic writing, finding and referencing appropriate sources, and an introduction to the expectations associated with postgraduate assessments. Additionally, it addresses using Deakin's online learning systems and provides strategies for managing time, planning effective study schedules, and where to seek study and learning assistance.

## Assessment

Assessment 1: Overall mastery quiz of 12 questions.

## MAA103 – Accounting for Decision Making

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Peter Vuong*

*Trimester 2 Unit Chair: Egor Evdokimov*

*Trimester 3 Unit Chair: Lawrence Huang*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAA101, MAA102*

*Scheduled learning activities – campus: 1 x 2 hour class + 1 x 1 hour seminar per week (Burwood (Melbourne), Warrnambool, Waterfront (Geelong) students only)*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 11 scheduled online workshops of 1 hour duration*

## Content

This introductory course teaches students how to use accounting information to make appropriate business decisions. Students will learn to apply the fundamental concepts of double-entry accounting to record transactions, prepare financial reports, and to analyse and interpret their meaning. Students learn to use management accounting budgets and planning techniques, and will consider contemporary issues such as the role of ethics and the use of Integrated Reporting.

## Assessment

- Double-Entry recording assignment, 20%
- Assessment 2 (Individual or group of 2–3) Video presentation (4–5 minutes) 5%
- Assessment 3 (Individual or group of 2–3) Business plan (1000–1500 words) 15%
- Examination (2 hours) 60%

## From Trimester 2 2019

- Double-Entry recording assignment, 15%
- Financial Statements Project, 10%
- Assessment 3 (Individual or group of 2–3) Budgeting Case-Study, 15%
- Examination (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

From Trimester 2 2019: Nil.

## MAA104 – Financial Literacy

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Danny Burton*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAA103, MAF101*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including weekly scheduled online workshops of 2 hours duration*

### Content

The unit provides a foundation in financial literacy that will assist you to (1) reflect on matters of finance that influence your personal investment decisions and risk profile, and (2) evaluate alternatives that impact financial, resourcing and investment decisions in business.

### Assessment

- Assessment 1: Case study (Individual), equivalent to 2000 words 40%
- Assessment 2: Individual reflective journal (Individual), 1000 words 20%
- Examination: (2 hours) 40%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA204 – Accounting Information Systems

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MIS251*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Phillip Wong*

*Prerequisite: Nil*

*Corequisite: MAA103*

*Incompatible with: MIS251*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour lab per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration.*

### Content

This unit provides students with the opportunity to learn about systems and software used by accounting practitioners and organisations. Students learn about the role of the accountant in implementing systems in organisations, transaction processes and develop the ability to critically evaluate accounting information systems and controls. Emerging technologies affecting accounting information systems are discussed and evaluated.

Students also have hands-on experience with relevant software to undertake fundamental business projects such as setting up a database and/or the accounts for a new business.

### Assessment

- Assessment 1: (Individual) Critical evaluation of a case of information systems failure or success or an emerging technology (1500 words) 15%
- Assessment 2: (Individual or Groups of 2 to 4) Design an accounting information system solution which may include written report (500–1000 words) depending on the difficulty of the practical exercise 35%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MAA215 – Client Behaviour and Decision Making

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAF315*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Campbell Heggen*

*Prerequisite: MAA255*

*Corequisite: Nil*

*Incompatible with: MAF315*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration.*

### Content

This unit builds on the technical knowledge acquired in other units, to broaden students understanding of the professional skills and knowledge required to build long-term client relationships, and develop a deep understanding of clients' needs in order to formulate strategies and solutions that are in the client's best interest. Drawing on insights from the behavioural sciences, this unit encourages students to consider how best to build trust, communicate the value of advice, and develop strategies to engage clients at each stage of the financial planning process. Students will be introduced to the field of behavioural finance, to provide insights into client behaviour and factors that influence decision making. The unit also seeks to provide students with a theoretical and practical understanding of the ethical and professional requirements within a financial services context.

### Assessment

- Assessment 1: (Group 2–3 students) Video presentation (12 minutes) 25%
- Assessment 2: (Individual) Written reflection (1000 words) 10%
- Assessment 3: (Individual) Video presentation (8-minutes) 25%
- Examination: (2 hours) 40%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA250 – Ethics for Financial Professionals

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAA350*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sharon Pittaway*

*Trimester 3 Unit Chair: Luckmika Perera*

*Prerequisite: MAA103, MAF101*

*Corequisite: Nil*

*Incompatible with: MAA350*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 11 scheduled online workshops of 1 hour duration.*

### Content

As a requirement of International Education Standard 4 released by the International Federation of Accountants, the unit develops students' appreciation of ethics and their ability to evaluate and apply ethical principles in the decision-making process in accounting and finance. Topics covered include: the nature of ethics; ethical factors influencing the performance of financial services; ethical theories and principles applicable to finance professionals; ethical decision-making models; ethical issues and conflicts of interest in the financial services industry; professional codes and workplace ethics; corporate social responsibility; principles of corporate governance; applying ethical decisions in case scenarios; and international business practices.

*Note: From Trimester 2 2019: students who complete this unit will meet the new accreditation requirements of the Financial Standards and Ethics Authority (FASEA).*

### Assessment

- Professional Reflection (Individual) Video interview (8–10 minutes) 20%
- Written Report (Individual) Case Analysis (2000 words) 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA255 – Financial Planning

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)

Trimester 2: Burwood (Melbourne), Cloud (online)

Trimester 3: Cloud (online)

Credit point(s): 1

Previously coded as: MAF255, MAF309

EFTSL value: 0.125

Trimester 1 Unit Chair: Mike Kerry

Trimester 2 Unit Chair: Marc Olynyk

Trimester 3 Unit Chair: Mike Kerry

Prerequisite: MAF101 or MAA104

Corequisite: Nil

Incompatible with: MAF255

Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week\*

\* For Warrnambool on campus offering only, there will be a converged mode of delivery using CloudDeakin and face-to-face workshops. More details will be available on the unit site

Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration

### Content

This unit introduces students to financial and estate planning. It covers the financial planning process and its implementation, including familiarising students with the basics of estate planning and provides students with an understanding of its necessity in the financial planning process. The unit also develops an understanding of the economic, political, social and legal environment for financial planning.

### Assessment

- Assessment 1: Written Assignment (Group 2–3 students), quantitative 2000 words 15%
- Assessment 2: Written Assignment (Group 2–3 students), 2000 words 25%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve a result of at least 50% on the examination plus achieve an overall result of 50 marks out of 100 marks available.

## MAA261 – Financial Accounting

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)

Trimester 2: Burwood (Melbourne), Cloud (online)

Trimester 3: Burwood (Melbourne), Cloud (online)

Credit point(s): 1

Previously coded as: MAA203

EFTSL value: 0.125

Trimester 1 Unit Chair: Tracey McDowall

Trimester 2 Unit Chair: Tracey McDowall

Trimester 3 Unit Chair: Wei Shi

Cohort rule: Nil

Prerequisite: MAA103

Corequisite: Nil

Incompatible with: MAA102, MAA203

Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week

Scheduled learning activities – cloud (online): Online independent and collaborative learning including weekly online seminars of 1 hour duration

### Content

This unit examines the financial accounting 'cycle', from the recording of relevant transactions through to the preparation of financial statements.

### Assessment

- Assessment 1: (Individual) A Case study (equivalent to 2000 words) 20%
- Assessment 2: (Group of 4) Written evaluation and interpretation of an accounting cycle in a business situation (2000 words) 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination and submit all assessments.

## MAA262 – Management Accounting

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAA202*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Vincent Bicudo de Castro*

*Trimester 2 Unit Chair: Vincent Bicudo De Castro*

*Prerequisite: MAA103*

*Corequisite: Nil*

*Incompatible with: MAA202*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative workshops of nine hours duration over the trimester*

*Waterfront campus: 1 x 3 hour class and seminar in one block mode*

### Content

This unit provides solid foundations in core management accounting topics in the areas of costing, budgeting and performance management. Topics include introduction to management accounting in the contemporary business environment; key cost terms and concepts; traditional and modern costing methods; budgeting; standard costing and variance analysis with flexible budget; performance evaluation in divisional organisations and the balanced scorecard.

### Assessment

- Assessment 1: (Individual) – Online test 10%
- Assessment 2: (Individual) – Written report and cost model development in excel (2000 words) 30%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA267 – Integrated Reporting and Value Creation

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Bray*

*Trimester 2 Unit Chair: Luckmika Perera*

*Prerequisite: Must have passed 8 credit points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

This unit will provide students with a detailed understanding of emerging developments with respect to integrated reporting. The unit will provide a detailed coverage of the Integrated Reporting (<IR>) framework and guidelines developed by the International Integrated Reporting Council (IIRC). Unit coverage will enable students to understand how to orient internal processes to the six key capitals that are material to an organisation's present and future value creation and how the development of an integrated internal and external reporting focus on value creation poses challenges and drives benefits for organisations. Students will examine and critique specific examples of organisations' <IR> reports.

### Assessment

- Assessment Task 1: Individual written assignment (2500 words) 25%
- Assessment Task 2: Group written assignment (3500 words) 25%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA303 – Audit and Assurance

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)

Trimester 3: Burwood (Melbourne), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Nadana Abayadeera

Trimester 3 Unit Chair: Nadana Abayadeera

Prerequisite: MAA103, MAA261

Corequisite: Nil

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 3 hour workshop per week

Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration

\* For Warrnambool on-campus offering only, there will be a converged mode of delivery using CloudDeakin and face-to-face workshops. More details will be available on the unit site.

### Content

This unit aims to provide an introduction to essential concepts, professional standards, law, and fieldwork practices of auditing in Australia. The unit is not intended to provide a full, comprehensive study of auditing, rather, a foundation in the area.

### Assessment

- Assessment 1: (Individual) Three online quizzes 10%
- Assessment 2a: (Individual) Audit case analysis (400 words) 10%
- Assessment 2b: (Individual) Audit case analysis (600 words) 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA310 – Accounting and Society

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Cloud (online)

Trimester 2: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)

Trimester 3: Burwood (Melbourne), Cloud (online)

Credit point(s): 1

Previously coded as: MAA301

EFTSL value: 0.125

Trimester 1 Unit Chair: Christine Contessotto

Trimester 2 Unit Chair: Danny Burton

Trimester 3 Unit Chair: Edwin Lim

### Prerequisite:

- For students who commenced the following courses prior to Trimester 1 2016: D301, D313, D317, D321, D322, D325, D338, D366, D388, M307, M300.1: Pre-requisite: MAA201 or MAA260 or MAA363 plus MAA250 and MAA262
- For students who commenced the following courses from Trimester 1 2016: D301, D313, D317, D321, D322, D325, D338, D366, D388, M307, M300.2: Pre-requisite: Must have passed MAA261, MAA262, MAF203, MAA250, and MAA363
- For students in other courses: Pre-requisite: MAA201 or MAA260 or MAA363 plus MAA250 and MAA262

### Corequisite:

- For students who commenced the following courses prior to Trimester 1 2016: D301, D313, D317, D321, D322, D325, D338, D366, D388, M307, M300.1: Co-requisite: Nil
- For students who commenced the following courses from Trimester 1 2016: D301, D313, D317, D321, D322, D325, D338, D366, D388, M307, M300.2: Co-requisite: MAA303 and MLC301
- For students in other courses: Co-requisite: Nil

Incompatible with: MAA301

Scheduled learning activities – campus: 1 x 3 hour seminar per week

Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration

### Content

This unit examines the role of accountants in society. Students apply selected accounting theories to explain accounting choices and organisational outcomes. Authentic contemporary accounting and societal issues are considered. The unit takes a problem solving approach requiring students to apply critical thinking skills to real life issues, to make and justify their evaluations and decisions.

The aim is to encourage integration and consolidation of key concepts covered in prior units and to focus on current topical issues to assist students in transitioning into the work environment.

## Assessment

- Assessment 1: (Individual) Report – Evaluation of a contemporary issue (2000 words) 20%
- Assessment 2: (Group of 5) Business Project – involvement/discussion/presentation/business analysis report (1000 words) 30%
- Assessment 3: (Individual) Video presentation (max 8-minute duration) 20%
- Assessment 4: (Individual) Case study – timed assessment (2 hours) 30%

## Hurdle requirement

Achieve at least 40% of the marks available on all assessment tasks. Successfully complete the professional literacy module to gain access to the assignment dropbox.

# MAA317 – Superannuation Planning

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)  
Trimester 3: Cloud (online)

### Credit point(s): 1

Previously coded as: MAF311

EFTSL value: 0.125

Trimester 1 Unit Chair: Mike Kerry

Trimester 3 Unit Chair: Mike Kerry

Prerequisite: MAA255 or MAF255

Corequisite: Nil

Incompatible with: MAF311

Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week\*

\* For Warrnambool on campus offering only, there will be a converged mode of delivery using CloudDeakin and face-to-face workshops. More details will be available on the unit site

Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration

## Content

This unit will provide students with a thorough overview of issues around the establishment, management and legal requirements of superannuation funds. Taxation of superannuation funds and superannuation benefits will also be examined, as well retirement income streams and the interaction between superannuation and the social security system.

## Assessment

- Assessment 1: Test – Cloud (online) 10%
- Assessment 2: Written Assignment (Individual or Group/2–3 students) (quantitative/theory) 3,000 words 30%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve a result of at least 50% on the examination plus achieve an overall result of 50 marks out of 100 marks available.

# MAA318 – Advanced Financial Planning

Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)

### Credit point(s): 1

Previously coded as: MAF312

EFTSL value: 0.125

Trimester 2 Unit Chair: Marc Olynky

### Prerequisite:

- For students who commenced the following courses prior to Trimester 1 2016: D301, D313, D317, D321, D322, D325, D338, D366, D388, M307, M300.1:  
Pre-requisite: MAA255, MAA317
- For students who commenced the following courses from Trimester 1 2016: D301, D313, D317, D321, D322, D325, D338, D366, D388, M307, M300.2:  
Pre-requisite: Must have passed four units in MAF202, MAA215, MLC301, MAF307, MAA319 and must have passed MAA255, MAA317
- For students in other courses: Pre-requisite: MAA255, MAA317

Corequisite: Nil

Incompatible with: MAF312

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week\**

*\* For Warrnambool on campus offering there will be a converged mode of delivery using CloudDeakin and face-to-face workshops*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

## Content

This unit is the capstone unit of the financial planning major. It specifically builds on studies in MAA255 Financial Planning and MAA317 Superannuation Planning as well as many other units. The assignment for this unit requires the preparation of a comprehensive, client-focused financial plan. The first topic studied reviews the process of developing a financial plan. Subsequent topics will review the content and techniques of a range of functional areas within financial planning with a view to using these techniques to strategically improve the financial position of our clients.

## Assessment

- Assessment 1: (Group of 2–3) – Critical analysis: Quantitative/Theory report (2000 words) 20%
- Assessment 2: (Individual) 60%
  - Part A: Quantitative/Theory (4000 words) 40%
  - Part B: Presentation/Interview (20 minutes) 20%
- Assessment 3: (Individual) – Professional identity assessment (e-Portfolio) (1500 words) 20%

## Hurdle requirement

Achieve at least 40% of the marks available on all assessment tasks. Successfully complete the professional literacy module to gain access to the assignment dropbox.

# MAA319 – Estate Planning and Insurance

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAF316*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Adam Steen*

*Trimester 2 Unit Chair: Adam Steen*

*Prerequisite: MLC301*

*Corequisite: Nil*

*Incompatible with: MAF316*

*Scheduled learning activities – campus: 1 x 3 hour workshop per week*

*From Trimester 2 2019: 1 x 3 hour workshop per week*

*Warrnambool campus: Over the trimester 4 x 3 hour classes and 11 hours of pre-recorded lectures are available*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

## Content

This unit introduces students to the role of the professional financial adviser in the areas of estate planning and risk management and insurance. The unit covers a number of important topics within estate planning including Wills, powers of attorney, intestacy, estate and non-estate assets, trusts (including testamentary trusts), distribution of estate assets and the tax implications of the deceased estates. Within the area of risk management and insurance, topics include an introduction to risk management and insurance; the role and regulation of the insurance industry in Australia, insurance contracts, types of personal insurance policies and the taxation of these products.

The unit seeks to provide an introduction to the key concepts of estate planning and personal risk insurance and then examines the application of these concepts to the provision of strategic advice and practical strategies to clients.

## Assessment

- Written assignment (3000–4000 words) – 40%
- Assessment 2 (Group of 3 students) – Case study report (3000–4000 words plus appendices) – 30%
- Written assignment (3000 words) – 30%

## MAA363 – Corporate Accounting

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAA260*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Hong Ang*

*Trimester 2 Unit Chair: Hong Ang*

*Trimester 3 Unit Chair: Arifur Khan*

*Prerequisite: MAA103, MAA261*

*Corequisite: Nil*

*Incompatible with: MAA201, MAA260*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit studies Australian financial reporting within the international accounting environment, with the aim to provide a broad context for the understanding of corporate reporting issues. Issues to be examined include recognition and measurement of assets, liabilities, equity income and expenses; the processes for accounting for investments in subsidiaries in Australian financial reporting; and the form and content of published financial reports.

### Assessment

- Assessment 1: (Group of 3–4 students) Presentation (10–15 mins) 10%
- Assessment 2: (Individual) – Written response (2800 words) incorporating: a) accounting for specific accounting transactions; and b) a critical reflective response on professional issues related to a contemporary corporate issue 30%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA427 – Research Methods

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: George Tanewski*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAR906, MAR725*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

The unit aims to introduce Honours students to the nature of research and to a range of research methods used in the disciplines of accounting, economics and finance. The unit also aims to help students develop a proposal that will lead to the successful completion of their thesis in later trimesters. Having this knowledge, students should be able to further develop specialist research as required.

### Assessment

- Written Memorandum of Understanding (MOU) and Proposal Sign-Off by both student and supervisor(s) (900 words) – 10%
- Written Literature Review of Research Proposal (1000 words) – 15%
- Oral presentation – 20 mins (supported with PowerPoint) – 15%
- Written Final Research Proposal (includes Literature Review, Research Design, Proposed Methods) – 3500–4000 words – 35%
- Assessment 5 (Individual) – Written discipline-specific assignment (1500 words) – 25%

## MAA428 – Contemporary Issues in Accounting

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Karen Lai*

*Prerequisite: Nil*

*Corequisite: MAA427*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

The unit aids students to review and critically analyse research in financial accounting. In particular, this subject explores the dominant theory and methodology adopted in contemporary financial accounting by analysing economics-based empirical research. Topics reviewed include the role of earnings in security valuation, earnings quality, earnings management, accounting disclosure and the role of regulation, institutional factors in accounting. In addition, this course also specifically focuses on social and environmental accounting, accounting ethics as well as critical perspective in accounting.

### Assessment

- Presentation (Oral) 20%
- Written Assignment 3000 words 30%
- Written Assignment (Research Proposal) 4000 words 50%

## MAA451 – Advanced Auditing

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simon Fung*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

The purpose of this unit is for students to explore issues of topical interest. This purpose will be achieved by a review of current auditing research papers. Topics include earnings management, independence, the changing role of the audit in society, auditors' legal responsibilities including fraud and the relationship between corporate governance and auditing.

### Assessment

- Critique (Weekly) and Presentation (Weekly Oral) 40%
- Assignment 1 (Research Paper) 1500 words 20%
- Assignment 2 (Research Paper) 3000 words 40%

## MAA456 – Advanced Management Accounting

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simona Scarparo*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

MAA456 introduces selected management accounting and control (MAC) research topics. It begins by reviewing the evolution of management accounting as a discipline and its present status. It then examines key theoretical perspectives employed in MAC research; followed by the strategy and control interface including strategic management accounting and the role of management accounting and control in strategy formulation and implementation; performance measurement including BSC and performance measurement frameworks; and MAC research in the public sector including the review of the New Public Management literature. Budgeting, a major MAC topic, will also be examined followed by cost systems design and management, another huge MAC topic; and the development of the environmental management accounting will also be reviewed. Partial Least Square (PLS), a family of structural equation modelling data analysis method, will also be introduced.

## Assessment

- Critique (Weekly) and Presentation (Weekly Oral) 30%
- Assignment 1 (Research Paper) 2000 words 30%
- Assignment 2 (Research Paper) 3000 words 40%

## MAA700 – Estate Planning and Risk Management Strategies

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Adam Steen*

*Prerequisite: MAA745*

*Corequisite: Nil*

*Incompatible with: MAA729, MAA746, MAF715, MPS701*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 11 x 1 hour online seminar*

*Students must attend and participate in project-based activities at the Burwood or Cloud campus on the scheduled day each week.*

## Content

This unit introduces students to the role of the professional financial adviser in the area of wealth protection and the distribution of wealth upon death. The unit commences by examining the role of estate planning in the advice process and seeks to develop students' ability to articulate clearly and coherently the theoretical and practical strategies in relation to estate planning, formulate and investigate problems, and recommend solutions. The unit then examines the concepts and application of personal insurance and risk management to the provision of advice to clients including the concepts of risk and insurance, the role and operation of the insurance industry and personal insurance products. The unit covers a number of important topics within estate planning including Wills, powers of attorney, trusts (including testamentary trusts), distribution of estate assets and the tax implications of the deceased estate, death aspects of financial products, and business succession planning. Within insurance and risk management, topics include risk concepts and an introduction to risk management; the role and regulation of the insurance industry in Australia, insurance contracts, types of personal insurance policies and the taxation of these products.

## Assessment

- Written assignment (3000 – 4000 words) – 40%
- Assessment 2 (Group of 3 students) – Case study report (3000–4000 words) – 30%
- Written assignment (3000 words) – 30%

## MAA703 – Accounting for Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAA616*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Soheila Mirshekary*

*Trimester 2 Unit Chair: Soheila Mirshekary*

*Prerequisite: MPA701 or MPA751/MPR751/MPT751 or MAA717*

*Corequisite: Nil*

*Incompatible with: MAA202, MAA262, MAA752, MAA760, MAA774*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

## Content

In this unit, students learn about how management accounting satisfies management's need for information for planning and control purposes. It covers cost concepts, cost-volume-profit relationships, product costing systems, activity-based costing, budgeting and standard costs. Topics also include financial performance analysis, decentralised operations, relevant costs for decision making, and contemporary approaches to measuring performance.

## Assessment

- Case study analysis (video presentation, 6 minutes) – 10%
- Assessment 2:
  - (Group of 3 or 4) Case study analysis – Written Report (2500 words) 20%; and
  - (Individual) Learning reflective piece (focusing on team work, 800 words) 10%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA705 – Corporate Auditing

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Christine Contessotto*

*Trimester 2 Unit Chair: Mark Smit*

*Prerequisite: MPA701 or MAA717*

*Corequisite: Nil*

*Incompatible with: MAA762, MAA775, MAA783*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

The unit aims to provide an introduction to essential concepts, professional standards, law, fieldwork and reporting practices of auditing in Australia. The unit provides a foundation for undertaking a financial statement audit.

The unit examines auditing and assurance services with a focus on the financial report audit. The regulatory and legal environment is discussed. Students learn about the planning, execution and reporting phases of the audit.

### Assessment

- Assessment 1: Tests (Individual, online multiple MCQ) 5%
- Assessment 2: Written assignment on contemporary topics in auditing (Individual, 3500 words) 35%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA716 – Financial Accounting

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wen Qu*

*Trimester 2 Unit Chair: Sutha Kanapathippillai*

*Trimester 3 Unit Chair: Byung Hee Lee*

*Prerequisite: MPA701*

*Prerequisite for M502, M507, M600, M607, M701, M731, M751 students: MPA702 or MPA751/MPR751/MPT751*

*Corequisite: Nil*

*Incompatible with: MAA702, MAA718, MAA777*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit builds on introductory accounting that was developed in MPA701 Accounting. The focus of this unit is on gaining an understanding of the regulatory and conceptual frameworks which underpin accounting for corporate entities. Understanding these frameworks and accounting standards ensures that the logic behind existing accounting rules and possible alternative approaches can be understood leading to a deeper understanding of what accounting is trying to achieve.

### Assessment

- Assessment 1: Written assignment (Individual) 2000 words 20%
- Assessment 2: Assignment (Individual) 1000 words 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA717 – Introductory Accounting

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Thusitha Dissanayake*

*Trimester 3 Unit Chair: Thusitha Dissanayake*

*Cohort rule: This unit is only available to students enrolled in M780 – Master of International Accounting, M780 – Master of International Accounting – Acca*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPA701*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

The unit assumes some background accounting knowledge. The unit aims to provide students with an understanding of the basic principles and procedures governing the processing of accounting information. Areas covered include, accounting and the business environment, the recording of business transactions and preparing financial reports, accounting information systems and internal controls. As part of the learning process, students will make use of several software tools to facilitate learning, including a commercial accounting package.

### Assessment

- Assessment 1: (Individual) – Multiple Choice Test – 5%
- Assessment 2: (Individual) – Written report – 1200 words – 15%
- Assessment 3: (Individual) – 20% in total
  - Assignment output from manual accounting system and computerised accounting package (15%)
  - Associated reflective task (Written 400 words or Oral/video 3–4 minutes) (5%)
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA718 – Financial Accounting I

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Samuel Cheung*

*Trimester 2 Unit Chair: Wen Qu*

*Cohort rule: This unit is only available to students enrolled in M780 – Master of International Accounting, M780 – Master of International Accounting – Acca*  
*Previously: Financial Reporting I*

*Prerequisite: MAA717 or MPA701*

*Corequisite: MAA720*

*Incompatible with: MAA702, MAA716, MAA777*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit builds on introductory accounting course knowledge and focuses on financial and corporate reporting. The focus of the unit is gaining an understanding of the regulatory and conceptual frameworks and accounting standards which underpin accounting for corporate (economic, group) entities. Areas studies included, accounting for income tax and consolidation accounting for corporate groups.

*Note: New Title: Financial Accounting 1 from Trimester 2 2019.*

### Assessment

- Assessment 1: (Group of two) – Written assignment (2000 words) 20%
- Assessment 2: (Individual) – Written assignment (2000 words) 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA719 – Superannuation and Retirement Planning

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAF708*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mike Kerry*

*Trimester 3 Unit Chair: Mike Kerry*

*Prerequisite: Nil*

*Corequisite: For students enrolled in M569: Nil*

*For all other students: MAA745*

*Incompatible with: MAF708*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit is an introduction to superannuation and retirement planning with a focus on the major trends and features of the industry and the framework in which the industry operates. The unit considers issues relating to superannuation contributions, different types of superannuation funds, the rules relating to the taxation and accessing of benefits, a consideration of alternative retirement income stream products and strategies designed to enhance superannuation and retirement income benefits.

### Assessment

- Assessment 1: Test – Cloud (Online) 10%
- Assessment 2: Written Assignment (individual or group/2–3 students) (Quantitative/Theory) 3000 words 30%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination, plus achieve an overall result of 50 marks out of 100 marks available.

## MAA720 – Financial Accounting II

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Cohort rule: This unit is only available to students enrolled in M780 – Master of International Accounting, M780 – Master of International Accounting – Acca*

*Previously: Accounting Theory*

*Prerequisite: MAA717*

*Corequisite: MAA718*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

The unit deals with some of the complex areas of financial accounting taking in areas as theories of accounting; segment reporting; related party disclosures; intangible assets; employee benefits; financial instruments; share-based payments; foreign currency transactions; translation of the accounts of a foreign subsidiary; and, accounting for corporate social responsibility.

### Assessment

- Assessment 1: (Individual) – Written assignment (2000 words) 20%
- Assessment 2: (Individual) – Written assignment (2000 words) 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA725 – Advanced Accounting Principles and Practice

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Li Liu*

*Trimester 2 Unit Chair: Li Liu*

*Trimester 3 Unit Chair: Mohammad Muttakin*

*Prerequisite: MAA716*

*Corequisite: Nil*

*Incompatible with: MAA704, MAA778*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit builds on basic bookkeeping and the basic accounting for companies that were developed in MPA701 Accounting and MAA716 Financial Accounting. The unit deals with some of the more complex areas of financial accounting, including accounting for income tax, impairments of assets, various assets and expenses, and foreign currency issues. In addition to the more technical areas of accounting, the fundamentals of accounting theory and of accounting for corporate social responsibility are introduced.

The unit has been designed to the specifications of CPA Australia. It is designed to provide students with basic knowledge of advanced accounting principles, concepts and practice so that they can enter CPA Australia's CPA Program.

### Assessment

- Assessment 1 (Group 2–3) – Written Assessment (3000 words) – 30%
- Written Assessment (2000 words) – 20%
- Examination (2 hours) – 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA726 – Strategic Business Reporting

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Samuel Cheung*

*Trimester 3 Unit Chair: Samuel Cheung*

*Previously: Corporate Reporting*

*Prerequisite: MAA718 and MAA720*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 3 hour seminars per week*

### Content

The unit commences with an examination of the wider professional duties and responsibilities of the accountant to an organisation's stakeholders and the financial reporting framework within which the accountant operates. The unit then covers the detailed financial reporting requirements for group financial reports, the nature of reporting for specialised entities, including not-for-profit and SME organisations, and the implications of changes in accounting regulation. The unit concludes by exploring the appraisal of the financial performance and position of entities, including the accountant's role in assessing and advising on the implications of accounting regulation on financial reporting, and current developments and their implications for financial reporting.

### Assessment

- Assessment 1: (Individual) – Test (case analysis up to 3 hours) 20%
- Assessment 2: (Individual) – Test (case analysis up to 3 hours) 20%
- Examination: (3 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA727 – Financial Planning Development

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAF709*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Adam Steen*

*Trimester 2 Unit Chair: Ash McAuliffe*

*Prerequisite: MAA719 or MAF708 and MAA745 or MAF765*

*For M559, M659 and M759 students – Nil*

*Corequisite: Nil*

*Incompatible with: MAF709*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit introduces students to the financial planning process and the development of a financial plan. The unit considers issues relating to risk management, estate planning, and salary packaging. In addition it revisits investment and retirement planning covered in earlier units and incorporates all of these areas into a comprehensive financial plan.

### Assessment

- Assessment 1: (Group of 2–3) – Critical analysis: quantitative/theory report (2000 words) 20%
- Assessment 2: (Individual):
  - Part A: Quantitative/Theory (4500 words) 45%
  - Part B: Presentation/Interview (20 minutes) 15%
- Assessment 3: (Individual) – Professional identity assessment (e-Portfolio) – 1500 words plus video (5 minutes) 20%

### Hurdle requirement

Achieve an overall pass mark of 50% for Assessment 2 – the construction and presentation of a comprehensive Statement of Advice.

## MAA728 – Financial Behaviour and Decision Making

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAF714*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Campbell Heggen*

*Prerequisite: For M540, M569, M640, M669, M769 and M770 enrolled students: Nil*

*All other students: MAA745 or MAF765*

*Corequisite: Nil*

*Incompatible with: MAF714*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

The Financial Planning professional must be able to build a deep understanding of their client's needs, and be able to anticipate issues many clients may have not even considered. This unit builds on the technical knowledge acquired in other units, to broaden students understanding of the professional skills and knowledge required to manage long-term client relationships, and develop comprehensive understanding of clients' needs in order to formulate strategies and solutions that are in the client's best interest.

Drawing on insights from the behavioural sciences, this unit requires students to develop strategies to build trust, communicate the value of advice, and engage clients at each stage of the financial planning process. Students will be introduced to the field of behavioural finance, to develop an understanding client behaviour and factors that influence decision making. The unit also seeks to provide students with a theoretical and practical understanding of the ethical and professional requirements within a financial services context.

### Assessment

- Assessment 1: Written Assignment (Individual or Group 2–3), (3000 words) – 30%
- Assessment 2: Written reflection (Individual), (1000 words) – 10%
- Assessment 3: Video Presentation (Individual), (10 mins) – 20%
- Assessment 4: Examination: (2 hours) – 40%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA729 – Estate Planning Strategies

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*Previously coded as: MAF715*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Adrian Raftery*

*Prerequisite: MAA745 or MAF765 and MLC703*

*Corequisite: Nil*

*Incompatible with: MAF715*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit is designed to provide information to enable you to be able to practically help clients as a professional adviser in the area of estate planning. The course seeks to develop students' ability to articulate clearly and coherently the theoretical and practical strategies in relation to estate planning, formulate and investigate problems, and recommend solutions. The unit covers a number of important areas of estate planning including Wills, powers of attorney, trusts (including testamentary trusts), distribution of estate assets and the tax implications of the deceased estate, death aspects of financial products, and business succession planning.

### Assessment

- Online Test – 10%
- Written assignment (4000 words) – 40%
- Examination (2 hours) – Closed book – 50%

## MAA744 – Strategic Management Accounting

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Thusitha Dissanayake*

*Trimester 3 Unit Chair: Thusitha Dissanayake*

*Prerequisite: MAA703*

*Corequisite: Nil*

*Incompatible with: MAA302 and MAA764*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit builds on the types of accounting information for management planning, control and decision-making that were introduced in MAA703 Accounting for Management. The unit moves from an essentially short-term, operational perspective to a long term, strategic perspective by integrating strategic management process to real life business cases. In particular, the unit focuses on the link between strategy and resource management in creating value for customers and shareholders. The unit also examines the roles of management accountants in supporting sustainability strategies and providing alignment mechanisms in environmental management in a rapidly changing and increasingly competitive global market.

### Assessment

- Assessment 1: Written assignment (Group of 2–3 students) 2000 words 25%
- Assessment 2: Oral presentation, including question and answer session (Group of 2–3 students) 15%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA745 – Financial Planning and Economic Fundamentals

*Enrolment modes:*

*Trimester 1: Burwood, Cloud (Online)*

*Trimester 2\*: Burwood, Cloud (Online)*

*Credit point(s): 1*

*Previously coded as: MAF765*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Marc Olynyk*

*Trimester 2 Unit Chair: Marc Olynyk*

*Previously: Financial Planning Fundamentals*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF765*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

## Content

This unit is designed to introduce the student to the study of personal finance and financial planning. It covers the financial planning process and its implementation, and develops an understanding of the economic, political, social and legal environment of the Financial Planning Industry. The unit provides an overview of the broad range of investment products available and their application to general investment strategies. The unit also considers issues relating to superannuation, estate planning as well as risk management and insurance, and provides students with an understanding of their necessity in the financial planning process.

## Assessment

- Assessment 1: (Individual) – Test (online) 10%
- Assessment 2: (Group of 2–3 students) – Quantitative/Theory (2500–3000 words) 30%
- Assessment 3: (Individual) – Written reflection (ePortfolio) – 1000 words – 10%
- Examination: (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination, plus achieve an overall result of 50 marks out of 100 marks available.

# MAA746 – Principles of Risk Management and Insurance

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*Previously coded as: MPS701*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Marc Olynyk*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPS701*

*Scheduled learning activities – campus: Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

## Content

This unit introduces students to insurance, the insurance market and insurance law. The unit examines a range of areas including the concepts of risk and insurance, and the principal legislation governing insurance in Australia. Topics include: insurance in Australia; risk concepts and an introduction to risk management; the insurance mechanism; types of insurance policies; an introduction to underwriting; legal principles of insurance; the Insurance Contracts Act 1984; the Financial Services Reform Act 2001; and the Insurance Act 1973.

## Assessment

- Assessment 1: Written Assignment 3000–4000 words 40%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MAA747 – Administration of Trusts and Estates

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Adam Steen*

*Cohort rule: For students enrolled in M640, M669, M769 and M770*

*Prerequisite: MAA700*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including weekly scheduled online workshops of 3 hours duration.*

## Content

This unit has been designed for finance service professionals to understand and accurately apply accounting and taxation principles when working in the area of deceased estates and trusts. It will also examine the administrative requirements for estates and trusts. In addition, the unit considers the principles of asset and estate valuation for trustees and personal legal representatives and how these valuations are used in the accounts. The various statutory and equitable rules that can affect the allocation of funds between capital and income, where the beneficial interests in capital and income are different are considered.

At the end of the unit students should be able to prepare and analyse estate and trust accounts, date of death and estate tax returns given real life situations. The development of this unit has been informed by the Australian educational requirements of the Society of Trust and Estate Practitioners (STEP).

### Assessment

- Assessment 1 (Individual) – Online test based on a case study – 20%
- Case study report (3000 words excluding calculations and accounts) – 30%
- Examination (2 hours) – 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA753 – Professional Research and Analysis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Anthony Ng*

*Trimester 2 Unit Chair: Anthony Ng*

*Prerequisite: Students must have completed 4 credit points of Business and Law postgraduate units.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit builds on the accounting material presented in MAA716 Financial Accounting and MAA725 Advanced Accounting principles and Practice to introduce students to professional research and analysis principles as they apply to the accounting discipline. The unit will introduce relevant principles to students and require students to critically analyse various relevant, contemporary research reports within the accounting discipline.

### Assessment

- Assessment 1: (Individual) – Research report (2000 words) 20%
- Assessment 2: (Individual) – Research proposal (3000 words) 30%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA754 – Enterprise Risk Management

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAF754*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Karen Lai*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF754*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit offers an integrated and comprehensive analysis of how enterprise risk management is a business process within an organisation. Particular focus is given to the key role of corporate governance and a strategic risk management framework is explored. Topics include the evolution of enterprise risk management, linking business strategies to risk management, risk culture, identifying, measuring and monitoring risks and optimising risk management. Case studies will be used to complement other learning strategies.

### Assessment

- Assessment 1: (Individual) Written Assignment (2000 words and not exceeding 3000 words) 20%
- Assessment 2: (Group of 3–5):
  - Video presentation (15 minutes) 20%, and
  - Written summary (1000 words) 10%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA763 – Governance and Fraud

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Peter Carey*

*Trimester 2 Unit Chair: Anthony Ng*

*Prerequisite: MPA701 or MAA717 or MPA751 or MPR751*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration.*

### Content

This unit will provide a theoretical and practical understanding of corporate governance, fraud and forensic accounting. The first aim is to develop understanding of best practice in corporate governance focussing on the board of directors, board committees, executive compensation, auditing, ethics, corporate social responsibility, systems of risk management and control. The second aim is to develop understanding of the nature of fraud and apply theories and techniques relevant to preventing and detecting fraud. Students will review and analyse the nature of forensic accounting with a focus on forensic fraud investigation. Theoretical explanations will be supported by findings from empirical research.

### Assessment

- Assessment 1: (Individual) – Written research (2000 words) 20%
- Assessment 2: (Group of 2) – Case Study Analysis (3500 words) 30%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA764 – Advanced Performance Management

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Lyu Fan*

*Trimester 2 Unit Chair: BJ Bobe*

*Prerequisite: MAA744*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 3 hour seminar per week*

### Content

Building on contents covered in MAA703 Accounting for Management and MAA744 Strategic Management Accounting, this unit is designed to equip students with relevant knowledge and skills to exercise professional judgement in selecting and applying strategic management accounting techniques in different business contexts; and to contribute to the evaluation of the performance of an organisation and its strategic development. The unit covers five broad advanced performance management topics: Strategic planning and control; External influences and organisational performance; Performance measurement systems and design; Strategic performance measurement; and Performance evaluation and corporate failure. This unit is one of the MIA units that embed ACCA papers. As such, the unit uses ACCA approved learning resources and is taught and assessed in such a way that students will also have greater chance to pass ACCA's P5 examination.

### Assessment

- Assessment 1: (Individual) In class test 1, 20%
- Assessment 2: (Individual) In class test 2, 20%
- Examination: (3 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA765 – Advanced Audit and Assurance

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dessalegn Mihret*

*Trimester 2 Unit Chair: Dessalegn Mihret*

*Prerequisite: MAA705*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 3 hour seminars per week*

### Content

The unit commences with an examination of the legal and regulatory environment concerning the audit function, including professional, ethical and professional liability considerations. This leads into a study of practice management procedures, including quality control and the acceptance and retention of professional engagements. The course content then examines the audit of financial statements, including planning, evidence and review. An examination of other assurance assignments, the auditor's report and current issues completes the unit.

### Assessment

- Assessment 1: (Individual) In class test 1, 20%
- Assessment 2: (Individual) In class test 2, 20%
- Examination: (3 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA766 – Issues in International Accounting

*Enrolment modes: Not offered in 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: MAA716 or MAA718*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit investigates international differences in corporate financial reporting, represented by differences in the accounting systems and rules of individual countries. The unit examines, from historical and cultural perspectives, reasons for these underlying differences. Major international differences in financial reporting and international classification systems are presented in the unit. Underlying themes are current efforts aimed at achieving the international harmonisation of reporting rules and the development of a uniform set of global accounting standards.

### Assessment

- Written assignment (3500 words) 20%
- Written assignment (2000 words) 20%
- Examination (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA767 – Integrated Reporting and Value Creation

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Bray*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 face-to-face contact hours per week (1 x 3 hour seminar)*

### Content

This unit will provide students with a detailed understanding of emerging developments with respect to integrated reporting. The unit will provide a detailed coverage of the Integrated Reporting (IR) framework and guidelines developed by the International Integrated Reporting Council (IIRC). Unit coverage will enable students to understand how to orient internal processes to the six key capitals that are material to an organisation's present and future value creation and how the development of an integrated internal and external reporting focus on value creation poses challenges and drives benefits for organisations. Students will examine and critique specific examples of organisations' reports.

### Assessment

- Assessment 1: (Individual) Written assignment (2500 words) 25%
- Assessment 2: (Group of 2–3) Written assignment (up to 3500 words) 25%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA769 – Ethics for Financial Services

*Enrolment modes: Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Sharon Pittaway*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 11 scheduled online workshops of 1 hour duration*

### Content

As a requirement of education standards provided by the Financial Adviser Standards and Ethics Authority (FASEA), the unit develops students' appreciation of ethics and their ability to evaluate and apply ethical principles in the decision-making process in financial planning. Topics covered include: the nature of ethics; ethical factors influencing the performance of financial services; ethical theories and principles applicable to finance professionals; ethical decision-making models; ethical issues and conflicts of interest in the financial services industry; FASEA and professional codes of ethics; applying ethical decisions in case scenarios; international business practices; and code monitoring bodies.

### Assessment

- Assessment 1 (Individual) – Written assessment (1500 words) – 20%
- Assessment 2 (Group of 3) – Case Study – 40%
- Assessment 3 (Closed Book) – Examination (2 hours) – 40%

### Hurdle requirement

Students are required to achieve at least 50% on the exam and achieve at least 50% of total marks available.

## MAA789 – Accounting Systems and Analytics

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Egor Evdokimov*

*Trimester 2 Unit Chair: Egor Evdokimov*

*Trimester 3 Unit Chair: Egor Evdokimov*

*Prerequisite: Nil*

*Corequisite: MPA701*

*Incompatible with: MPM701*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 11 scheduled online workshops of 1 hour duration*

### Content

This unit focuses on the requirements and evaluation of an accounting and internal control system. It includes the use of a computerised accounting system. Advanced excel tools are introduced to assist managers analyse and interpret data in the decision-making process in conjunction with other stakeholders. The unit also covers contemporary developments in accounting information systems and data analytics.

### Assessment

- Assessment 1: Case study (Individual) equivalent to 1500 words 20%
- Assessment 2: Case study (Individual) equivalent to 2500 words 30%
- Assessment 3: 2 hour Exam 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination; and Submit all assessment tasks.

## MAA795 – Strategic Business Leader

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Sue Davey*

*Trimester 3 Unit Chair: Sue Davey*

*Prerequisite: MAA705*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 12 face-to-face contact hours per week.*

### Content

This is an advanced level strategic business leadership unit. It is designed to equip students with a range of professional skills and knowledge demanded for effective organisational leadership and senior consultancy or advisory capabilities and relevant professional skills. The unit covers nine main sections: Leadership; Governance; Strategy; Risk; Technology and data analytics; Organisational control and audit; Finance in planning and decision making; Innovation; performance excellence and change management; and Professional skills. The unit brings together the main functions of organisations in the context of leadership capability. It builds on technical skills and knowledge acquired from other MIA units such as governance, internal audit, control, risk, finance, ethics and management.

### Assessment

- Assessment 1: (Individual) – Online assessment 10%
- Assessment 2: (Individual) – Timed Case Study Analysis 15%
- Assessment 3: (Individual) – Timed Case Study Analysis 15%
- Assessment 4: (Individual) – Presentation 10%
- Examination: (3 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAA906 – Contemporary Issues in Accounting

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Karen Lai*

*Cohort rule: Must be enrolled in M800 or M900*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

This PhD unit introduces students to a review and critical analysis of research in financial accounting. In particular, this subject explores the dominant theories and methodologies adopted in contemporary financial accounting by analysing economics-based empirical research. Topics reviewed include the role of earnings in security valuation, earnings quality, earnings management, accounting disclosure and the role of regulation, institutional factors in accounting. In addition, this course also specifically focuses on social and environmental accounting, accounting ethics as well as critical perspective in accounting. The unit provides a bridge to advanced research.

### Assessment

- Presentation (Oral) 20%
- Written Assignment 3000 words 30%
- Written Assignment (Research Proposal) 4000 words 50%

## MAA907 – Advanced Auditing

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simon Fung*

*Cohort rule: Must be enrolled in M800 or M900*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAA451*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This unit aims to introduce the major research paradigms in auditing and assurance research while reflecting on the theoretical and professional issues within the audit profession. The unit will provide an overview of the nature and decision-making frameworks in auditing, the economics of assurance services, and the organisational and behavioural aspects of auditing. A critical evaluation of issues related to audit quality, auditor independence, audit pricing, internal control, and corporate governance and the present and future role of auditing will be undertaken based on a range of seminal and recent empirical studies. The unit also aims to develop students' problem solving and presentation skills in relation to contemporary auditing and assurance issues.

## Assessment

- Written Assignment 1 3500 words 40%
- Presentation (Oral) 20%
- Written Assignment 2 3500 words 40%

## MAA908 – Advanced Management Accounting

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simona Scarparo*

*Cohort rule: Must be enrolled in M800 or M900*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This PhD unit introduces students to the philosophy and development of research in management accounting and control systems. In particular, the unit explores the dominant theoretical frameworks adopted in contemporary management accounting and control research including agency, transaction cost economics, contingency, organisational behaviour, cultural and psychology theories. A critical analysis of the extant empirical studies in management accounting and control systems is also undertaken.

Topics reviewed include budgeting, costing, performance measurement, risk management, motivation and incentive systems in both international and national settings. In addition, the course also specifically focuses on the internal audit function and risk management as key components of an organisation's internal control system and their implications for organisational governance design and performance. In addition, the course also specifically focuses on the internal audit function and risk management as key components of an organisation's internal control system and their implications for organisational governance design and performance. The unit provides a bridge to advanced research.

## Assessment

- Critique (Weekly) and Presentation (Weekly Oral) 20%
- Written Assignment 1 (Research) 3000 words 40%
- Written Assignment 2 (Research) 3000 words 40%

## MAB242 – Agribusiness Governance

*Enrolment modes: Trimester 2: Warrnambool, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Helen Scarborough*

*Prerequisite: MAB251*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour weekly class and 1 x 2 hour seminar every second week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 scheduled online seminars*

## Content

This unit introduces students to analytical foundations to study various issues related to the governance of food and agribusiness industries. Issues such as the function of coordination and contracting from the value chain perspective will be covered. Students will also be provided with a solid understanding of the rationale for public policies and necessary analytical skills to evaluate their socio-economic and environmental impacts, as well as understanding of the dynamics in agricultural and food international trade. Discussions in this Unit will also cover current topics such as global food security, food safety and traceability with a focus on how improved governance in the industry can help tackle those issues.

## Assessment

- Online test – 15%
- Assessment 2 (group 2–3 students) – Written report (maximum 2500 words) – 35%
- Examination (2 hours) – 50%

## Hurdle requirement

Submit all assessments.

# MAB251 – Agribusiness Resource Management

*Enrolment modes: Trimester 1: Warrnambool, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Risti Permani*

*Prerequisite: MAE101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour weekly class and 1 x 2 hour seminar every second week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 scheduled online seminars and access to weekly online consultation hours*

## Content

This Unit provides necessary conceptual frameworks and analytical tools for students to assess the structure of the food and agricultural markets, identify market opportunities as well as challenges and risks; and, therefore, make an informed business management decision. An overview of relevant and basic management, financial, and marketing concepts as well as the economic principles underlying behind the functioning of the food and agricultural systems and market structure will be covered. Students will also be provided with a solid understanding of the interlinkages between food and agricultural market structure, international and domestic policies and sustainability issues. Central to the unit is developing students' ability to identify and present potential improvements in food and agribusinesses to enhance profitability taking into consideration global and local market dynamics as well as the aspects of sustainability and resource availability.

## Assessment

- Online Test – 10%
- Individual Written Report (max of 2000 words) – 30%
- Oral presentation (5 minutes) – 10%
- Examination (2 hours) – 50%

## Hurdle requirement

Submit all assessments, and must have submitted Assessment 2 to be able to do Assessment 3.

# MAB341 – Global Challenges: Food, Water and Climate

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Risti Permani*

*Prerequisite: MAB242 and MAB251*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week and 1 x 4 hour seminar every second week*

*scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 scheduled online seminars*

## Content

This Unit will revisit the 21st century key issues facing the food and agricultural sector, namely food and water security and climate change, as well as other issues such as the food-energy nexus, food loss and waste management, among others. It will frame the discussions through the use of relevant conceptual frameworks and analytical tools related to sustainable development and natural resource management, and making reference to case studies from Australia as well as other parts of the world. Students will also be provided opportunity to critically evaluate the ongoing global and Australian efforts to address these challenges covering topics such as the pursuit of Sustainable Development Goals, foreign aid, and free trade agreements.

## Assessment

- Oral presentation and a handout (5 minutes presentation; and a two-page handout) – 20%
- Individual Written Report (max of 2000 words) – 30%
- Final Examination (2 hours) – 50%

## Hurdle requirement

Submit all assessments.

## MAB352 – Agribusiness Technology

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Risti Permani*

*Prerequisite: MAB251 and MAB242*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week and 1 x 4 hour seminar every second week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 scheduled online seminars*

### Content

This Unit is designed to introduce students to some of the most influential and latest agribusiness technologies and innovations available in the region. Students will be provided with a solid understanding on how the innovation system works, and ability to identify opportunities and evaluate the potential impacts of technological and innovation adoption at an entity (e.g. farm or Agribusiness Company) or by the industry. To achieve this, the Unit focuses on providing a series of practical experience as well as opportunity to interact with leading experts in this field.

### Assessment

- Individual written report (max of 2000 words); 25%
- Assessment 2 (group) – Group Presentation and business report (15 minute presentation) (5%) and 1500 word report (20%) – Total 25%
- Final Examination (2 hours) – 50%

### Hurdle requirement

Submit all assessments.

## MAB353 – Applied Agribusiness Project

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Risti Permani*

*Prerequisite: MAB242, MAB251 and MAB352*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 x 3-hour class in Weeks 1, 3, 7 and 10 and consultation hours in other weeks*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 5 scheduled online seminars*

### Content

This unit provides opportunities for students to apply key conceptual frameworks, analytical tools and knowledge of food and agribusiness into a realistic project. Unique to this Unit is the flexibility for students to either undertake an internship, with an approved organisation such as an agribusiness company, farm, and government agency (subject to place availability) to work on a specific and defined task or project; or conduct an independent study to investigate a current issue or explore business opportunities in a select industry. Topics such as effective literature review, proposal writing, analytical methods, presenting professionally, and networks in agribusiness will be covered. At the end of this Unit, students will present results from their individual project in various flexible formats, including a business analysis, research report, and a policy review. This flexibility will enable students to gain experience that is aligned with their individual professional goals.

### Assessment

- Project proposal (max of 1500 words; template to be provided); 25%
- Assessment 2 Final Report (individual) – Individual written report (max of 4500 words); 60%
- Assessment 3 Final presentation (individual) – Oral presentation (10 minutes presentation); 15%

### Hurdle requirement

Submit all summative assessment tasks.

## MAE101 – Economic Principles

*Enrolment modes:*

*Trimester 1: Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Elizabeth Manning*

*Trimester 2 Unit Chair: Chris Doucouliagos*

*Trimester 3 Unit Chair: Andrew Torre*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit is about the behaviour of consumers and producers and their interaction in the marketplace. The study of how markets operate is essential to understanding any form of economic behaviour in the global arena. The tools of market analysis developed in the unit provide the foundation for an understanding of issues such as coordinating people's needs with the world's limited resources, corporate pricing strategies, monopoly power, government regulation, the environment, income inequality, the economic relationships between countries and foreign trade.

### Assessment

- Assessment 1: (Individual) – Written assignment – includes graphs and/or calculations using digital technologies, finding and presenting information and/or data, explanations, analysis and critique (2000 words) 25%
- Assessment 2: (Individual) – Aplia: online quizzes and experiments 15%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## Assessment from Trimester 2 2019

- Assessment 1: (Individual) – Written assignment – includes graphs and/or calculations using digital technologies, finding and presenting information and/or data, explanations, analysis and critique (2000 words) 30%
- Assessment 2: (Individual) – Aplia: online quizzes and experiments 20%
- Examination: (2 hours) 50%

### Hurdle requirement

From Trimester 2 2019: Nil

## MAE201 – Competition and Industry

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Hao Jia*

*Trimester 2 Unit Chair: Samarth Vaidya*

*Prerequisite: MAE101*

*Corequisite: Nil*

*Incompatible with: MAE206*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit aims to extend the theory of microeconomics topics developed in MAE101 to explain the behaviour of consumers and firms in the market system. The following topics are studied at an intermediate level: consumers make decisions; the firm and models of production; and the influence of markets structures on price and output levels. The unit goes beyond basic microeconomics to look at many issues in contemporary fields of economics.

### Assessment

- Assessment 1: Test(s) Cloud (Online) 20%
- Assessment 2: Written Assignment 1500 words 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE203 – The Global Economy

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAE102*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Prasad Bhattacharya*

*Trimester 2 Unit Chair: Omar Bashar*

*Trimester 3 Unit Chair: Helen Scarborough*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAE102*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit provides students with an understanding of the Australian economic system within the world economy, and an ability to identify and assess current macroeconomic problems and policies. The unit is concerned with the way in which the whole economy, or large sectors of the economy work. The major sectors analysed are the household sector, the business sector, the government sector and the international sector. The unit provides insights for evaluating the working and the impacts of monetary and fiscal policy, and how central banks and treasuries conduct such policies. Issues such as economic growth, unemployment, inflation, balance of payments and, exchange rates are also examined.

### Assessment

- Assessment 1: (Online/in class, individual) – Test(s) 15%
- Assessment 2: (individual) – Essay 2000 words 25%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE213 – International Trade

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAE303*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Cong Pham*

*Prerequisite: MAE101*

*Corequisite: Nil*

*Incompatible with: MAE303, MET303*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit is about the gains from trade and the reasons why nations may be reluctant to pursue free trade. It includes discussion about trade policies, including free trade agreements. The theoretical content of the unit assumes knowledge of the tools of intermediate microeconomics as developed in MAE201 Competition and Industry. A few new analytical techniques will be learned. However, the unit is primarily of value in providing further practice in applied economic analysis, in the sense of using conceptual tools to analyse issues of trade, protectionism and globalisation being debated in the world economy.

### Assessment

- Assessment 1 (Individual) – Multiple choice quiz, 1 hour – 7%
- Assessment 2 – Multiple choice quiz, 1 hour – 7%
- Assessment 3 (Individual) – Multiple choice quiz, 1 hour – 6%
- Assessment 4 (Individual) – Problem-based written assignment, 1500 words – 20%
- Assessment 5 – Examination (Closed book), 2 hours 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE214 – Economic Strategy for Business

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAE314*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ching-Jen Sun*

*Prerequisite: MAE101*

*Corequisite: Nil*

*Incompatible with: MAE314*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit focuses on economic strategy, with a particular emphasis on business. We begin by analysing the art and science of strategy. Simple game theory will be introduced, clearly distinguishing between conflict and co-operation. The unit will then examine the following key questions: How can an agent negotiate successfully? What is the role of information and how can it be exploited in order to gain bargaining power? How can a contract be written in order to create appropriate incentives? How can a manager be strategic?

### Assessment

- Assessment 1: Written Assignment (Group of 3) 3000 words, 30%
- Assessment 2: Written Assignment (Individual) 1500 words, 20%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE256 – Analytical Methods in Economics and Finance

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAE356, MAF356*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mokhtarul Wadud*

*Trimester 2 Unit Chair: Cahit Guven*

*Prerequisite: MAE101, MIS171, MAF101*

*Corequisite: Nil*

*Incompatible with: MAE356, MAF256, MAF356, MSQ271*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar each week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit introduces students to advanced statistical techniques in finance, economics and business. At the completion of the unit, students will have an appreciation of the role of these advanced quantitative techniques in finance and economics, in business decision making, as well as in research.

### Assessment

- Assessment 1: (Individual) – Test (online) 20%
- Assessment 2: (Individual) – Written Assignment (1500 words) 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE301 – Choice, Strategies and Dilemmas

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Luca Colombo*

*Prerequisite: MAE101, MAE201*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit begins by exploring individual rationality and decision making; it then builds upon this by considering behaviour in strategic interactions with others; it concludes by considering how individuals make decisions within groups. Throughout, the unit explores a variety of topics and applications including risk and uncertainty, paradoxes of choice, other-regarding preferences, the role of information in economic and social situations, the tragedy of the commons, and voting systems. The unit emphasises an understanding of analytical concepts in an intuitive and relevant manner, and includes behavioural extensions to neoclassical concepts in economics.

### Assessment

- Assessment 1: (Individual) – Written assignment (2000 words) 25%
- Assessment 2: (Individual) – Written assignment (2000 words) 25%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE302 – Macroeconomics of Open Economies

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Xueli Tang*

*Prerequisite: MAE203*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit will provide an understanding of the macroeconomic theories in the context of open economies. The unit moves forward from the policy focus of MAE202 National Economic Policy and scrutinises the theoretical underpinnings of economic policy in open economies, such as monetary and fiscal policy and exchange rate determination. It addresses key issues involved in macroeconomic analysis as it informs policy treatment of fluctuations and growth in open economies and integration into the global economy.

### Assessment

- Assessment 1: (Individual) – Quantitative Assignment 20%
- Assessment 2: (Group of 3 students) – Written assignment (2500 words) 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE304 – Labour and Health Economics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Aydogan Ulker*

*Prerequisite: MAE101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Recommended: MAE201 or MAE202*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit concentrates on the economic resource of the population by considering the human and health capital of the labour force. Topics include: labour supply and demand, determination of equilibrium wages, human capital, determinants of health, the production of healthcare, demand for health capital, health care systems. The unit examines empirical and policy issues.

### Assessment

- Assessment 1: Test – Cloud (Online) 20%
- Assessment 2: (Individual) – Written Assignment (2000 words) 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE305 – Energy and Environment

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shuddha Rafiq*

*Prerequisite: MAE101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour lab per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit begins by addressing the issues associated with future energy demand, supply, and prices. For example, can we forecast future energy prices? The unit then progresses to look more generally at the use of resources as economies develop, by addressing questions such as: Is our resource use sustainable? What impact does resource use have on future generations? And what economic tools can be used to address these questions?

Cloud (online) students need to ensure they have EvIEWS access either by going to Burwood (Melbourne) or Waterfront (Geelong) campuses, or by buying their own private copies.

### Assessment

- Assessment 1: (Individual) – Written assignment (1500 words) 30%
- Assessment 2: (Groups of 3) – Oral presentation 20%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE306 – Applied Econometrics for Economics and Finance

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wang Sheng Lee*

*Prerequisite: MAE256*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

Econometrics represents the application of statistical methods to economic models. The same methods are also widely employed in accounting, finance, marketing and management, as well as in other social sciences including political science, history, psychology and sociology. The first part of the unit will build on the classical regression model and explore consequences of relaxing model assumptions. The second part of the unit will cover contemporary advanced econometric methods, including instrumental variables and panel data models. Econometric software will be employed to enhance the learning process.

## Assessment

- Assessment 1: Eight online graded homework assignments, 20%
- Assessment 2: Written Report (Individual) 2000 words, 20%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MAE307 – Techniques for Business and Economic Analysis

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Aaron Nicholas*

*Prerequisite: Successful completion of MAE201, MAE203 and MAE256 plus one unit from either MAE301, MAE304, MAE305, MAE306 or MAE312*

*Corequisite: MAE214*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour workshop per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This unit will provide a capstone experience for students doing an Economics major. It will focus on the integration of knowledge from across the economics major and the consolidation of key skills. It will also provide the opportunity for students to develop their professional identity and enhance the transition of students to the workplace. This will be achieved by dividing the unit into three modules each of which will focus on the employment of economists in different environments; that is working for the government, working for large companies, such as the banking industry, and working for private consulting firms. The emphasis will be on the specific skills economists use in these workplaces such as benefit cost analysis, economic forecasting, industry analysis, firm decision making and policy analysis.

*Note: Online teaching methods require internet access.*

## Assessment

- Assessment 1: Individual professional identity (10%)
- Assessment 2: Individual assignment (40%): Report up to 2000 words
- Assessment 3: Group assignment (two parts, total 50%): Report and Presentation
  - Part A: Report (up to 3000 words) 40%
  - Part B: Presentation (12 minutes) 10%

## From Trimester 2 2019

- Assessment 1: Individual professional identity (10%)
- Assessment 2: Individual assignment (40%): Report up to 2000 words
- Assessment 3: Group assignment (two parts, total 50%): Report and Presentation
  - Part A: Presentation (12 minutes) 10%
  - Part B: Report (up to 3000 words) 40%

## Hurdle requirement

Achieve at least 50% of the marks available on assessment 3A. Successfully complete the professional literacy module to gain access to the assignment dropbox.

From Trimester 2 2019: Achieve at least 50% of the marks available on assessment 3B. Successfully complete the professional literacy module to gain access to the assignment dropbox.

## MAE308 – Contemporary Issues in Trade and Development

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Prasad Bhattacharya*

*Prerequisite: MAE101 and MAE203*

*Corequisite: Nil*

*Incompatible with: MAE207*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

In this unit we examine contemporary geographic topics and perspectives relating to the world economy. We discuss the underlying theory and practice for the understanding of the global economy in an era of restructuring economies, and regional realignments. Aspects of growth, income distribution, and development along with the relevance of free trade agreements will be analysed.

### Assessment

- Assessment 1: (Individual) Test, 30%
- Assessment 2: (Group of 2–3) 30%
  - Written report (3000 words) 20%
  - Oral presentation, 10%
- Examination: (2 hours) 40%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE312 – National Economic Policy

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAE202*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Debdulal Mallick*

*Prerequisite: MAE101, MAE203*

*Corequisite: Nil*

*Incompatible with: MAE202*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Warrnambool students only: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

Topics include: determination of national income, long-run economic growth, business cycles using the framework of IS-LM and aggregate demand and aggregate supply, fiscal and monetary policy, unemployment, conduction of monetary policy by the Reserve Bank and Global Financial Crises.

### Assessment

- Assessment 1: Test (Online/In Class) 20%
- Assessment 2: Written Assignment 1500 words 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE315 – International Banking and Finance

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: x Nguyen*

*Prerequisite: Must have passed five units in MAE201, MAE203, MAE207, MAE213, MAE302, MAE312, MAE314*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour workshop per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit will provide a capstone experience for students doing an International Trade major. It will focus on the integration of knowledge from across the international trade major and the consolidation of key skills. It will also provide the opportunity for students to develop their professional identity and enhance the transition of students to the workplace by providing them with the ability to identify the major issues associated with the globalisation of financial markets and to understand the functions of the international financial and banking systems. The unit will include seminars on contemporary and historic issues pertinent to international trade, banking and finance. Students will be prepared for working in the field of international finance through the application of decision making frameworks through the use of realistic simulations.

*Note: Online teaching methods require internet access*

### Assessment

- Assignment 1 – Individual 2000 words contemporary reflection – 20%
- Assignment 2 – Individual professional identity task – 20%
- Assignment 3 – Group report 4000 words – 60%

## MAE403 – Advanced Issues in Economics

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Nejat Anbarci*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week*

### Content

This unit covers advanced quantitative techniques in cutting-edge theoretical fields such as Game Theory which could be used by applied economists.

### Assessment

- Written Assignment 1 (3000 words) – 40%
- Written Assignment 2 (2000 words) – 30%
- Written Assignment 3 (2000 words) – 30%

## MAE406 – Business and Financial Econometrics

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Pasquale Sgro*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour lab per week*

## Content

The unit starts with reviewing univariate regression analysis and then extends towards multivariate regression analysis. In the first part of the unit, after analysing simple regression model, inference in multiple regression models and problems of relaxing classical assumptions, i.e., heteroskedasticity and autocorrelation, will be studied. The second part of the unit will analyse nonlinear time series models to track volatility (ARCH, GARCH, ARCH-M, GARCH-M, EGARCH, TARCH, APARCH AND IGARCH models) and panel data analysis including extensions to panel unit root testing and panel cointegration testing.

## Assessment

- Written Assignment 3000 words 30%
- Test 20%
- Examination 2 hours 50%

## MAE411 – Advanced Economic Theory

*Enrolment modes: Not offered in 2019*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nejat Anbarci*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class*

## Content

The unit is concerned with theoretical and empirical issues in microeconomics. Topics include: decision-making under uncertainty; insurance and gambling; brief introduction to game theory; models in industrial organisation; introduction to mechanism design; adverse selection, signalling and screening; the principal-agent model and auctions.

## Assessment

- Assignment 1: (Quantitative) 20%
- Assignment 2: (Quantitative) 20%
- Assignment 3: (Quantitative) 20%
- Examination: (2 hours) 40%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE413 – Macroeconomic Theory and Policy

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Debdulal Mallick*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar each week*

## Content

The unit is concerned with further understanding of macroeconomic theory and policy. Topics include: long-run economic growth; business cycle fluctuations; unemployment; incomplete price adjustment; monetary policy; international business cycle and macroeconomic policy.

## Assessment

- Written Assignment 2000–2500 words 20%
- Written Assignment (research paper) 4000 words 40%
- Examination 2 hours 40%

## MAE782 – Macroeconomics

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: To be advised*

*Trimester 2 Unit Chair: To be advised*

*Cohort rule: Must be a employee of the Australian Bureau of Statistics (ABS) and sponsored by ABS*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students will on average spend 150 hours over the trimester undertaking the teaching, learning and assessment activities for the unit. This will include 3 online hours per week (2 x 1 hour classes and 1 x 1 hour online seminar). Two face to face classes will be conducted by onsite visits each trimester.*

## Content

This unit is designed for postgraduate level students who have not previously studied macroeconomics. Students will develop an understanding of the Australian economic system within the world economy, and an ability to identify and assess current macroeconomic problems and policies. Issues such as economic growth, unemployment, inflation, the balance of payments and exchange rates are examined. Insights for evaluating the working and impacts of monetary and fiscal policy add a policy emphasis to the unit.

## Assessment

- Progressive Online Assessment – 20%
- Research essay (3000 words) – 30%
- Examination (2 hours) – 50%

## MAE901 – Advanced Econometrics

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wenying Yao*

*Cohort rule: Must be enrolled in M800 or M900.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAE723, MAF723*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

## Content

This course uses a wide variety of econometric tools based on statistics and mathematics to analyse economic and financial concepts. This course provides the techniques required to quantify the strength and form of relationships among variables of interest, and the strategies needed in order to use these techniques effectively. More specifically this course covers the theory of classical linear regression model, and other estimation methods including IV, GMM and maximum likelihood. The second half of this course will focus on special topic in micro-econometric modelling and time series analysis.

## Assessment

- Assessment 1: (Individual) – problem sets (approx. 1000 words) 15%
- Assessment 2: (Individual) – problem sets (approx. 2000 words) 25%
- Examination: (3 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE903 – Advanced Economic Theory

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Acelya Altuntas*

*Cohort rule: Must be enrolled in M800 or M900*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

## Content

This unit is concerned with microeconomic theory. The unit analyses the behaviour of economic agents such as consumers and producers, and their strategic interaction in the market economy. The unit deals with topics such as game theory, information economics, and agency theory. The unit provides a bridge to advanced research.

## Assessment

- Assessment 1: (Individual) – solving math equations – 20%
- Assessment 2: (Individual) – solving math equations – 20%
- Assessment 3: (Individual) – solving math equations – 20%
- Examination: (3 hours) 40%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE905 – Macroeconomic Theory and Policy

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Francesco Carli*

*Cohort rule: Must be enrolled in M800 or M900.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

## Content

This unit equips students with recent development and analytical rigour of macroeconomics. It studies the long-run economic growth and fluctuations; the role and impacts of macroeconomic policies on output, unemployment, and general price levels; and alternative schools of macroeconomics. The unit provides a bridge to advanced research.

## Assessment

- Assessment 1: (Individual) – Problem Set – 25%
- Assessment 2: (Individual) – Problem Set – 25%
- Examination: (3 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE906 – Econometrics II

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Wang Sheng Lee*

*Cohort rule: This unit is only available to students enrolled in M900 – Doctor of Philosophy*

*Prerequisite: MAE901*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This unit covers a variety of topics in econometrics that include Panel Data, Discrete Choice Models, Causation with Experimental and Observational Data, State-Space Analysis, and Monte Carlo Simulations. For each topic explored in the course, empirical analysis using real data will be an integral part. In addition, the students will learn programming in statistical software using simulated data.

## Assessment

- Problem set – 40%
- Oral presentation – 20%
- Paper replication exercise (4000 words) – 40%

## MAE907 – Macroeconomic Theory II

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Pedro Gomis Porqueras*

*Cohort rule: This unit is only available to students enrolled in M900 – Doctor of Philosophy*

*Prerequisite: MAE905*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This unit covers a variety of topics in macroeconomics such as monetary economics, liquidity and aggregate activity, business cycles and volatility, economic growth, income inequality, public pensions, optimal taxation and unemployment. The topics studied all share two hallmarks of modern macroeconomic theory: (i) choice over time and (ii) uncertainty. The unit relies heavily on the recursive approach and the basic methods of stochastic processes.

## Assessment

- Assessment 1: (Individual) Problem Set, 25%
- Assessment 2: (Individual) Problem Set, 25%
- Examination: (3 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAE908 – Microeconomic Theory II

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ching-Jen Sun*

*Cohort rule: This unit is only available to students enrolled in M900 – Doctor of Philosophy*

*Prerequisite: MAE903*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

This unit covers strategic behaviour of rational agents. Topics include strategic-form games with complete information and strategic-form games with incomplete information, dynamic games, equilibrium concepts for analysing these games. This unit will study Economics of Information and some introductory social choice theory, bargaining and cooperative game theory.

### Assessment

- Assessment 1: (Individual) Problem Set, 25%
- Assessment 2: (Individual) Problem Set, 25%
- Examination: (3 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF202 (2001 version only)*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

Topics to be addressed in this introductory finance unit include: what finance is and why it is important to individuals and businesses; basic mathematical concepts involving the time value of money determining present values and future values; the basics of Australian monetary system and the determination of interest rate; the nature of return and risk; risk/return measurement and application; the basics of Australian financial system; foreign exchange market and transactions; the basics of global financial markets.

### Assessment

- Assessment 1: (Individual) – Online test (4 x 1-hour) 10%
- Assessment 2: (Group of 3–4 students) – Written assignment (4000 words) 30%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

From T2 2019: Nil

## MAF101 – Fundamentals of Finance

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Annette Nguyen*

*Trimester 2 Unit Chair: Amirul Ahsan*

*Trimester 3 Unit Chair: John Guo*

## MAF202 – Money and Capital Markets

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ameeta Jain*

*Trimester 2 Unit Chair: Susan Sharma*

*Prerequisite: MAA104 or MAF101*

*Corequisite: Nil*

*Incompatible with: MAF101 (2001 version only), MAF702*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week\**

*\* For Warrnambool on campus offering only: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

Topics addressed in this unit include: the operation and structure of a modern financial system; direct and intermediated finance; interest rate determination and yield curve analysis; financial institutions; prudential supervision; equity markets; sources and types of short-term, medium-term and longer-term debt finance; financial instrument pricing; the foreign exchange market; off shore-funding in the international markets; and an introduction to the derivatives markets.

## Assessment

- Assessment 1: (Group of 2–3 students) – Written assignment 2000–2500 words 20%
- Assessment 2: (Online x 2, 10% each) – Tests 20%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MAF203 – Business Finance

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sagarika Mishra*

*Trimester 2 Unit Chair: Daisy Doan*

*Prerequisite: MAF101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

The focus of this unit is the financial function of a typical firm. The finance manager's role in financial decisions is emphasised. Topics include: investments and firm valuation concepts; risk and rates of return; capital budgeting and project evaluation; capital structure; cost of capital; and dividend policy.

## Assessment

- Assessment 1: (Individual) – Online Test 5%
- Assessment 2: (Individual) – Online Test 5%
- Assessment 3: (Group of 3 or 4) – Assignment (3000 words) 30%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MAF302 – Corporate Finance

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Hoa Nguyen*

*Trimester 2 Unit Chair: Tze Ang*

*Prerequisite:*

- *For students who commenced the following courses prior to Trimester 1 2016: D301, D313, D317, D321, D322, D325, D338, D366, D388, M307, M300.1: Pre-requisite: MAF203*
- *For students who commenced the following courses from Trimester 1 2016: D301, D313, D317, D321, D322, D325, D338, D366, D388, M307, M300.2: Pre-requisite: Must have passed five units in MAF202, MAF203, MAA250, MAE256, MAF307, MAF306, MAF308*
- *For students in other courses: Pre-requisite: MAF203*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*\* For Warrnambool on campus offering there will be a converged mode of delivery using CloudDeakin and face-to-face workshops.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This unit introduces students to issues in corporate governance; advanced capital budgeting; real options; valuations; equity and debt financing; capital structure; mergers and acquisitions; corporate restructuring and corporate risk management.

## Assessment

- Assessment 1: (Individual) Critical Analysis/contemporary reflection (2000 words) 20%
- Assessment 2: (Group up to 3 students) Applied project or report up to 4000 words, 60%
- Assessment 3: (Individual) Professional identity task (portfolio) 20%

## Hurdle requirement

Achieve at least 40% of the marks available on all assessment tasks. Successfully complete the professional literacy module to gain access to the assignment dropbox.

# MAF306 – International Finance and Investment

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dianne Thomson*

*Trimester 2 Unit Chair: Sohel Azad*

*Prerequisite: MAF202 or MAF203*

*Corequisite: Nil*

*Incompatible with: MFT306*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This unit aims to develop an understanding of the international monetary systems and international financial markets, institutions and instruments. The unit introduces students to the complexities involved in cross-border transactions and undertakes an analysis of international parity conditions, foreign exchange markets, instruments and exchange rate systems. The breakdown in global financial markets and the resultant credit crisis has had significant and lasting impacts on the international money markets and Euro markets. The failure of financial institutions and the emerging debt crisis countries – the PIIGS (Portugal, Italy, Ireland, Greece and Spain) – threaten the very viability of the European union in the wake of the global financial crisis. The causes and consequences of this breakdown in global financial markets is examined along with the issues of country risk, corporate governance issues, and foreign direct investment.

## Assessment

- Assessment 1: Written Assignment (Group of 3) 3000 words, 30%
- Assessment 2: Test(s) (multiple choice tests x 2) 10%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MAF307 – Equities and Investment Analysis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bob Li*

*Trimester 2 Unit Chair: Saikat Sovan Deb*

*Prerequisite: MAF101 or MAA104 and one unit in (MAF202, MAA255, MAF255)*

*Corequisite: Nil*

*Incompatible with: MAF207*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This unit is about understanding risk, return and capital allocation in financial markets. In particular, the emphasis is on equity investments, other asset classes, such as fixed income and derivatives are not discussed in this unit. A great deal of emphasis is laid on modern portfolio theories, asset pricing models, valuation of securities and portfolio performance evaluation.

## Assessment

- Assessment 1: (Individual) – Cloud (online) test – 10%
- Assessment 2: (Individual) – Simulated Investment and Portfolio Management – 15%:
  - Part A: Weekly Simulated Investment Activities (automated quizzes and activities)
  - Part B: Journal Entries (reflection on investment strategies based on Part A) – 300–500 words each (in Week 4 and Week 8)
- Assessment 3: (Group of 3–4 students) 25%
  - Part A: Written Group Assessment (3500 words) – 15%
  - Part B: Group video presentation – 10%
- Examination: (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF308 – Derivative and Fixed Income Securities

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mong Shan Ee*

*Trimester 2 Unit Chair: Peipei Wang*

*Prerequisite: MAF101 and MAF203*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This unit focuses on the conceptual aspects concerning the mechanics and pricing of the three main categories

of derivative securities options, forwards/futures and swaps. Specific topics that will be covered include basic pricing concepts, arbitrage and trading strategies, Black-Scholes analysis, the Binomial model and hedging principles.

## Assessment

- Assessment 1: Cloud (Online) – Individual test 10%
- Assessment 2: (Group of 3 students) – Problem solving and report – 3000 words 30%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination and 50% of total assessment.

## MAF367 – Treasury Operations

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Victor Fang*

*Trimester 2 Unit Chair: Sohel Azad*

*Prerequisite: MAF202 or MAF203*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 hours per week of classes and trading room*

## Content

This unit combines the classroom teaching and hands-on experience of Treasury Operations covering trading strategies and trading operations. It provides students with the opportunity to trade foreign exchange (FX) in an inter-bank market in the quest for profit. This inter-bank trading is conducted in a simulated trading room with state-of-the-art facility.

## Assessment

- Assessment 1 (Group of 3) Trading reports (4000 words) 40%
- Oral assessment of performance during trading sessions – 10%
- Examination (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF421 – Advanced Investments

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Harminder Singh*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: MAF302 or MAF307*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

This is an Honours level unit that explores the theory, models and practice of investments. The main objective of this unit is to familiarise students with seminal and contemporary literature on selected topics in both theoretical and empirical finance. It enables students to explain option pricing models and apply them to practical problems, understand the significance of the theory of finance, market microstructure, evaluate financial models, understand the contribution behavioural finance is making to finance research, apply analytical skills obtained from an in-depth study of topics and analyse the factors that are important in conducting an event study.

### Assessment

- Written Assignment 3000 words 30%
- Presentation (individual or group/2 students) 10%
- Examination 2 hours 60%

## MAF430 – Advanced Derivative Securities

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Peipei Wang*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

The aim of the unit is to introduce students to the theory and practice of pricing and buying derivative securities for hedging purposes across different markets. The unit will focus on the theoretical frameworks associated with the different pricing models for options, futures, interest rate derivatives, foreign exchange, swaps and exotics. This unit will provide an understanding of the framework of derivative instruments available in Australia and internationally. It also covers a number of research issues directly related to derivative assets and markets.

### Assessment

- Written Assignment 3000 words 30%
- Presentation (individual or group/2 students) 10%
- Examination 2 hours 60%

## MAF453 – Advanced Corporate Finance

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: John Zhang*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: MAF302*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

This unit is intended to ensure that Honours students are familiar with the current state of corporate finance theory, and of changes which may have occurred since completing previous studies. This unit thoroughly examines corporate governance, capital structure, payout policy, real options, initial public offerings, mergers and acquisitions, and investment valuation. The unit will give students a thorough grounding in the academic and professional literature relevant to these topics.

### Assessment

- Written Assignment 1 (group/2 students) 1000 words 20%
- Written Assignment 2 (critical essay, individual) 2000–3000 words 30%
- Examination 2 hours 50%

## MAF702 – Financial Markets

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Amirul Ahsan*

*Trimester 2 Unit Chair: Michael D’Rosario*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

Topics addressed in this unit include: the operation and structure of a modern financial system (institutions, instruments and markets); direct and intermediated finance; interest rate determination and yield curve analysis; mathematical concepts; financial institutions; prudential supervision; equity markets and instruments; sources and types of short-term, medium-term and longer-term debt finance; financial instrument pricing; the foreign exchange markets; offshore funding in the international markets; and introduction to derivative instruments.

### Assessment

- Assessment 1: (Individual) Financial Markets Simulations, 10%
- Assessment 2: (Individual) Case Study Report (4000 words) 40%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF703 – Applied Corporate Finance

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Annette Nguyen*

*Trimester 2 Unit Chair: Wei Opie*

*Prerequisite: MBA702/MBR702 or MBA722 or MPF753*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit focuses on business investment decision making evaluation methods; economic rationale for positive net present value projects; business valuation; corporate debt financing options; corporate growth and development; dividend policies of firms; financial distress and business failure; lease financing; mergers and acquisitions; and international finance.

### Assessment

- Assessment 1: (Group of 3 to 4) – Case study report – 4000 words, 30%
- Assessment 2: (Individual) – Video presentation related to case study, 10%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF704 – Treasury and Risk Management

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bob Li*

*Prerequisite: MAA786 or MAF702 or MPF753 or MPT753*

*Prerequisite for M778 students: Nil*

*Corequisite: For M778 students: MPF753*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

In this unit, students are provided with an overview of the treasury management function and the organisational structure of the treasury management function. Students also learn about risk, risk management models and foreign exchange-spot and forward markets-exchange rate determination; measuring foreign exchange risk; foreign exchange risk management – vanilla options, exotic options, futures; weather risk management; operational risk; review of interest rates and pricing of securities; measuring interest rate risk, duration and convexity models; interest rate risk management. The unit will also examine options, futures, swaps, forward rate agreements; credit derivatives and treasury performance.

### Assessment

- Assessment 1: Test – Cloud (Online) x 2, (each 10%) 20%
- Assessment 2: Written Assignment (Group/2–4 students) 2000 words, 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF707 – Investments and Portfolio Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Xinwei Zheng*

*Trimester 2 Unit Chair: Kannan Thiraisamy*

*Prerequisite: MAA745 or MAF702 or MAF765*

*Corequisite: Nil*

*Incompatible with: MAF705*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit aims to develop an overall understanding of investment management in relation to different asset classes and equip students with skills to construct, manage and evaluate portfolio outcome through a framework that optimises the outcome using the key principles of modern portfolio theory. In the process students will develop the ability to apply, analyse and relate the key principles of modern portfolio theory and asset pricing models using different portfolios of financial assets.

### Assessment

- Assessment 1: (Individual) StockTrak Trading and Reflection Report (1000 words) 10%
- Assessment 2: (Individual) Written Stock Analysis Report (3000 words) 30%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF711 – Modelling Techniques for Finance

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Hong Zhang*

*Prerequisite: MAF759*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit will explore the techniques used by analysts in the business environment to facilitate the decision-making processes within a state of uncertainty, especially in the area of returns, investment construction and derivatives.

### Assessment

- Assessment 1: Assignment 40%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF713 – Futures, Options and other Derivatives

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Wei Opie*

*Prerequisite: MAF759*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

The unit introduces students to the mechanics of the main categories of derivative securities including options, futures, forwards and swaps on instruments such as stocks, stock indices, currencies and interest rates. The unit focuses on the theoretical framework of the different pricing models for derivatives and the use of derivatives for hedging, speculating and arbitraging purposes. It also covers some case studies on corporate disasters associated with derivative usage.

### Assessment

- Assessment 1: (Individual) – Online test, 10%
- Assessment 2: (Group 2–3 students) – Written assignment (analytical quantitative) (4000 words) 30%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF723 – Business and Financial Econometrics

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Abdul Hayat Muhammad*

*Prerequisite: MAF759*

*Corequisite: Nil*

*Incompatible with: MAE406, MAE723*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour lab per week*

### Content

The unit starts with reviewing univariate regression analysis and then extends towards multivariate regression analysis. In the first part of the unit, after analysing simple regression model, inference in multiple regression models and problems of relaxing classical assumptions, i.e., heteroskedasticity and autocorrelation, will be studied. The second part of the unit will analyse nonlinear time series models to track volatility (ARCH, GARCH, ARCH-M, GARCH-M, EGARCH, TARCH, APARCH AND IGARCH models) and panel data analysis including extensions to panel unit root testing and panel cointegration testing.

## Assessment

- Written Assignment 3000 words 30%
- Test (in class) 20%
- Examination 2 hours 50%

## MAF755 – Advanced Financial Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jun Yao*

*Trimester 2 Unit Chair: Fengfei Li*

*Prerequisite: MPF753 or MPT753*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 3 hour seminars per week*

## Content

The Advanced Financial Management unit begins by exploring the role and responsibility of a senior executive or advisor in meeting the competing needs of stakeholders within the business environment of multinational entities. It then examines investment and financing decisions, with an emphasis on the strategic consequences of making such decisions in a domestic and international context. The unit then examines the planning of strategic acquisitions and mergers and corporate re-organisations.

## Assessment

- Assessment 1: (Individual) Written assignment (2000 words) 20%
- Assessment 2: (Individual) Written assignment including quantitative analysis (2000 words equivalent) 20%
- Examination: (3 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF759 – Analytical Methods

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ruipeng Liu*

*Trimester 3 Unit Chair: Vincent Xiang*

*Previously: Quantitative Methods for Finance*

*Cohort rule: Must be enrolled in courses M530, M630, M660, M720, M730, M740, M750, M755, M760, M770, M794, D707, D709 or D712*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF904*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This unit will enable students to understand the basic and more advanced mathematics and statistics involved in the finance world. It introduces financial mathematical concepts which underpin the financial decision making process. In addition the unit covers financial markets, portfolio management and econometric methods.

## Assessment

- Assessment 1: (Individual) Online Test, 10%
- Assessment 2: (Individual) Assignment (quantitative) 30%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF760 – International Finance

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Abdul Hayat Muhammad*

*Trimester 2 Unit Chair: Michael D’Rosario*

*Prerequisite: MAF702, MAF707, MAF759 and MPF753*

*Corequisite: Nil*

*Incompatible with: MFT760*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

The unit will enable students to understand the modern financial techniques underpinning investment, financing and risk management decisions of multinational corporations. In addition the unit covers international financial markets, international corporate governance, alternative investments, derivative securities and international portfolio management.

### Assessment

- Assessment 1: (Individual) – Written Report (2000 words) 20%
- Assessment 2: (Group of 4) Written Report (4000 words) 20%, (Group of 4) Video presentation (5 minutes) 10%, (Individual) Written reflection (500 words) 10%
- Examination: (2 hours) 40%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF761 – Advanced Investments

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Harminder Singh*

*Prerequisite: MAF707 and MAF759. Minimum standard expected in the prerequisites is a Distinction.*

*Corequisite: Nil*

*Incompatible with: MAF901*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

This unit explores the theory, models and practice of investments. The main objective of this unit is to familiarise students with seminal and contemporary literature on selected topics in both theoretical and empirical finance. It enables students to explain option pricing models and apply them to practical problems, understand the significance of the theory of finance, market microstructure, evaluate financial models, understand the contribution behavioural finance is making to finance research, apply analytical skills obtained from an in-depth study of topics and analyse the factors that are important in conducting an event study.

### Assessment

- Written Assignment 3000 words 30%
- Presentation (individual or group/2 students) 10%
- Examination 2 hours 60%

## MAF762 – Advanced Derivative Securities

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Peipei Wang*

*Prerequisite: MAF759. Minimum standard expected in the prerequisite is a Distinction.*

*Corequisite: Nil*

*Incompatible with: MAF902*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

The aim of the unit is to introduce students to understand the theory and practise of pricing and hedging derivative securities within different markets. The unit will focus on the theoretical frameworks associated with the different pricing models for options, futures, interest rate derivatives, foreign exchange, swaps and exotics. This unit will provide an understanding of the framework of derivative instruments available in Australia and internationally.

## Assessment

- Written Assignment 3000 words 30%
- Presentation (individual or group/2 students) 10%
- Examination 2 hours 60%

## MAF764 – Advanced Corporate Finance

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: John Zhang*

*Prerequisite: MAF703 and MAF759. Minimum standard expected in the prerequisites is a Distinction.*

*Corequisite: Nil*

*Incompatible with: MAF903*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This unit involves a thorough examination of corporate finance theory, including topics such as corporate governance, capital structure, payout policy, real options, initial public offerings, mergers and acquisitions, and investment valuation. The unit will give students a thorough grounding in the academic and professional literature relevant to these topics.

## Assessment

- Written Assignment 1 (group/2 students) 1000 words 20%
- Written Assignment 2 (critical essay, individual), 2000–3000 words 30%
- Examination 2 hours 50%

## MAF767 – Treasury Dealing

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Victor Fang*

*Trimester 2 Unit Chair: Vincent Xiang*

*Prerequisite: MAF702 or MPF753 or MBA712*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 hours per week of classes and trading room*

## Content

This unit combines the classroom teaching and hands-on experience of Treasury Operations covering trading strategies and trading operations. It provides students with the opportunity to trade foreign exchange (FX) in an inter-bank market in the quest for profit. This inter-bank trading is conducted in a simulated trading room with state-of-the-art facility.

## Assessment

- Assessment 1 (Group of 3) Trading reports (5000 words) 30%
- Assessment 2 (Group of 3) Written assignment (3000 words) 20%
- Oral assessment of performance during trading sessions 10%
- Examination (2 hours) 40%

## MAF901 – Advanced Investments

*Enrolment modes: Not offered in 2019*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: To be advised*

*Cohort rule: This unit is only available to students enrolled in M800 – Master of Commerce, M900 – Doctor of Philosophy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF761*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This is a PhD unit that explores the theory, models and practice of investments. The main objective of this unit is to familiarise students with seminal and contemporary literature on selected topics in both theoretical and empirical finance. The unit provides a bridge to advanced research.

## Assessment

- Written assignment 3000 words 30%
- Presentation (individual or group of 2 students) 10%
- Examination 2 hours 60%

## MAF902 – Advanced Derivative Securities

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Peipei Wang*

*Cohort rule: This unit is only available to students enrolled in M800 – Master of Commerce, M900 – Doctor of Philosophy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF762*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

The aim of this unit is to introduce students to and provide an understanding of the theory and practice of pricing derivatives instruments and hedging using these instruments within different markets. The unit will focus on the theoretical frameworks associated with the different pricing models for option and futures and swap contracts on interest rate and foreign exchange rates. It will also introduce students to exotic derivatives where the payoffs are complicated and untraditional. The unit provides a bridge to advanced research.

## Assessment

- Written assignment 3000 words 30%
- Presentation (individual or group of 2 students) 10%
- Examination 2 hours 60%

## MAF903 – Advanced Corporate Finance

*Enrolment modes: Not offered*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: John Zhang*

*Cohort rule: This unit is only available to students enrolled in M800 – Master of Commerce, M900 – Doctor of Philosophy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF764*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

## Content

This unit aims to help students to build a preliminary step towards research in corporate finance with emphasis on recent published literature. The unit will cover some theory and practice of decision-making as well an assortment of other topics including corporate governance, capital structure, dividend policy, initial public offerings, mergers and acquisitions, and corporate risk management. The unit also cover some more practical issues of valuation methodology widely used in the industry. The unit provides a bridge to advanced research.

## Assessment

- Written assignment 1 (group/2 students) 1000 words 20%
- Written assignment 2 (critical essay, individual) 2000–3000 words 30%
- Examination 2 hours 50%

## MAF904 – Quantitative Methods for Finance

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ruipeng Liu*

*Cohort rule: This unit is only available to students enrolled in M800 – Master of Commerce, M900 – Doctor of Philosophy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF759*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This unit will enable students to understand the basic and more advanced mathematics involved in the finance world. It will introduce them to important basic financial mathematical concepts which underpin the financial decision making process. In addition the unit covers financial markets, derivative securities, portfolio management and econometric methods.

## Assessment

- Assignment (quantitative) (group/3–4 students) 40%
- Examination 2 hours 60%

# MAF905 – Foundations of Corporate Finance

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ning Gong*

*Cohort rule: This unit is only available to students enrolled in M900 – Doctor of Philosophy*

*Prerequisite: Nil.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar*

## Content

The unit aims to introduce a selection of advanced corporate finance theories and methodologies, which will provide students with the skills required for empirical research in finance at the Ph.D. level.

## Assessment

- Assessment 1: (Individual) Oral presentation, 15%
- Assessment 2: (Individual) Written report (3000 words) 30%
- Examination: (2 hours) 55%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MAF906 – Empirical Research Methods

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Saikat Sovan Deb*

*Cohort rule: This unit is only available to students enrolled in M900 – Doctor of Philosophy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar*

## Content

This unit is intended to be the introductory empirical research methods unit for the first-year Ph.D. students in Finance. It will provide students with a working knowledge of basic empirical methods used in finance research. This unit aims to provide a common minimum knowledge and skill set of research methodologies which will be used as prerequisites for the other compulsory HDR support units in Finance.

## Assessment

- Assessment 1: (Individual) Oral presentation, 15%
- Assessment 2: (Individual) Written report (3000 words) with data analysis and coding, 35%
- Examination: (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MAF907 – Empirical Methods in Corporate Finance

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Hong Feng Zhang*

*Cohort rule: This unit is only available to students enrolled in M900 – Doctor of Philosophy*

*Prerequisite: MAF905*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

## Content

This is a first level unit of the Ph.D. sequence in finance. The unit aims to introduce a selection of microeconomic methods commonly used in empirical corporate finance research, which will enable students to manipulate and analyse corporate finance data using various econometric techniques. The unit begins with a review of cross-sectional data analysis and then extends towards panel data analysis.

## Assessment

- Assessment 1: (Individual) Written assignment (2000 words) 20%
- Assessment 2: (Individual) Written assignment (2000 words) 20%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAF908 – Empirical Asset Pricing

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mike Mao*

*Cohort rule: For students enrolled in M900 only*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 face-to-face contact hours per week*

## Content

This is a first-year unit of the PhD sequence in finance. The unit aims to introduce a selection of topics in the area of empirical asset pricing. The unit will help students to become familiar with related empirical methods and explore interests in asset pricing.

## Assessment

- Assessment 1: (Individual) Oral presentation (30 minutes) 15%
- Assessment 2: (Individual) Two assignment reports (3000 words) 35%
- Examination: (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MAI010 – Academic Integrity

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*Previously coded as: AAI018, HAI010, STP050*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Leanne Ngo*

*Trimester 2 Unit Chair: Leanne Ngo*

*Trimester 3 Unit Chair: Andrea Howell*

*Prerequisite: Nil*

*Corequisite: Nil*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin (approximately 3 hours). No compulsory campus attendance requirement.*

## Content

The Academic Integrity Unit is a compulsory zero credit point unit in all Faculty of Business and Law courses. The unit learning and assessment activities provide students with guidance on what constitutes academic integrity. It will allow students to develop knowledge, skills and good practice principles to avoid plagiarism and collusion and thereby maintain academic integrity.

## Assessment

Assessment: (Individual) – Online multiple choice questions test – 100%

## Hurdle requirement

Students must achieve 85% in the on-line test. Students are allowed unlimited attempts of the on-line assessment.

## MAI728 – Financial Behaviour and Decision Making (Intensive)

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Campbell Heggen*

*Cohort rule: This unit is only available to students enrolled in N002, M769, M669, M569, M701, M770, M640 and M540*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAA728*

*Scheduled learning activities – cloud (online): Students will be required to access the Unit Site for reading and preparation work which will be available four weeks prior to the commencement of the intensive.*

*Students can expect to spend 130 hours undertaking the learning and assessment activities for this unit. Collaborative learning required both prior to and subsequent to the Intensive.*

*In-person attendance requirements: In addition to the online scheduled learning activities, this intensive unit requires students to attend three consecutive days of face to face intensive study at: to be advised*

*Trimester 3 2019 Dates: to be advised*

## Content

The Financial Planning professional must be able to build a deep understanding of their client's needs, and be able to anticipate issues many clients may not have considered. This unit builds on the technical knowledge acquired in other units, to broaden students' understanding of the professional skills and knowledge required to manage long-term client relationships, and develop comprehensive understanding of clients' needs in order to formulate strategies and solutions that are in the client's best interest. Drawing on insights from the behavioural sciences, this unit requires students to develop strategies to build trust, communicate the value of advice, and engage clients at each stage of the financial planning process. Students will be introduced to the field of behavioural finance, to develop an understanding client behaviour and factors that influence decision-making. The unit also seeks to provide students with a theoretical and practical understanding of the ethical and professional requirements within a financial services context.

*Note: Please enrol by the deadline: [to be determined] as places are limited.*

For further information please email [blres@deakin.edu.au](mailto:blres@deakin.edu.au).

## Assessment

- Assessment 1: Multiple Choice Quiz (online) (Individual), (equivalent 1500 words) – 20%
- Assessment 2: Case study (Group of 4) 50%: Presentation in class (10 minutes) (20%) and Business Report (3000 words) (30%)
- Assessment 3: Report (Business) (Individual) – 30% (2000 words)

## Hurdle requirement

Student must achieve 80% on the MCQ test and 50% of total available.

# MAI769 – Ethics for Financial Services (Intensive)

*Enrolment modes: Trimester 3: Burwood (Melbourne) Intensive\**

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Sharon Pittaway*

*Cohort rule: This unit is only available to students enrolled in M569, M669, M701, M769 and N002*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAA769*

*Scheduled learning activities – cloud (online): Students will be required to access the Unit Site for reading and preparation work which will be available four weeks prior to the commencement of the intensive.*

*Students can expect to spend 130 hours undertaking the learning and assessment activities for this unit. Collaborative learning required both prior to and subsequent to the Intensive.*

*In-person attendance requirements: In addition to the online scheduled learning activities, this intensive unit requires students to attend three consecutive days of face to face intensive study at Saxons Melbourne, 500 Collins Street, Melbourne from 8.00am to 5.00pm.*

*Trimester 3 2019 Dates: Thursday 5 December, Friday 6 December and Saturday 7 December.*

*8.00am–9.00am Meet and Greet*

*Classes commence at 9.00am*

## Content

As a requirement of education standards provided by the Financial Adviser Standards and Ethics Authority (FASEA), the unit develops students' appreciation of ethics and their ability to evaluate and apply ethical principles in the decision-making process in financial planning. Topics covered include: the nature of ethics; ethical factors influencing the performance of financial services; ethical theories and principles applicable to finance professionals; ethical decision-making models; ethical issues and conflicts of interest in the financial services industry; FASEA and professional codes of ethics; applying ethical decisions in case scenarios; international business practices; and code monitoring bodies.

Students are advised that Assessment 1: Test (individual), Online (1 hour) – 20% must be completed prior to attending the intensive days.

## Assessment

- Assessment 1: Test (Individual), Online – 1 hour) 20%
- Assessment 2: Case study (Group of 4), Presentation (10 minutes) and written report, (3000 words) 50%
- Assessment 3: Written Assessment (Individual) (2000 words) 30%

## Hurdle requirement

Student must achieve 80% on the MCQ test and 50% of total available marks.

## MAR411 – Research Report 1

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Samarth Vaidya*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: This research unit requires no formal class attendance however it will involve a minimum of 22 hours supervised contact per trimester.*

## Content

This unit requires students to complete an Honours research report (thesis) which demonstrates a knowledge of the literature relevant to the research topic; the ability to formulate a feasible research problem relevant to Accounting, Economics or Finance; the capacity to design a research project appropriate for the problem; the ability to undertake research appropriate to the project design; and the capacity to communicate clearly the research findings.

## Assessment

Satisfactory progress towards completion of thesis.

## MAR412 – Research Report 2

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Samarth Vaidya*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: This research unit requires no formal class attendance however it will involve a minimum of 22 hours supervised contact per trimester.*

## Content

Continuation of investigations commenced in MAR411.

## Assessment

Satisfactory progress towards completion of thesis.

## MAR413 – Research Report 3

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Samarth Vaidya*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: M4%*

*Incompatible with: Nil*

*Scheduled learning activities – campus: This research unit requires no formal class attendance however it will involve a minimum of 22 hours supervised contact.*

## Content

For Honours students, continuation of investigations commenced in MAR411.

## Assessment

- Written Thesis/Research Report (15,000 words) – 80%
- Oral Presentation – 20%

## MAR414 – Research Report 4

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Samarth Vaidya*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: This research unit requires no formal class attendance however it will involve a minimum of 22 hours supervised contact.*

### Content

For Honours students, continuation of investigations commenced in MAR411, MAR412 and MAR413.

### Assessment

Written Assignment 15,000 words 100%

## Assessment

- Written assignment (memorandum of understanding) (500 words) – 10%
- Written assignment (literature review) (2500 words) – 20%
- Oral presentation – 20%
- Written assignment (research proposal) (5000 words) – 30%
- Assessment 5 (individual) – Written assignment (research methods) (2000 words) – 20%

## MAR905 – Research Report

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 4*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sagarika Mishra*

*Trimester 2 Unit Chair: Sagarika Mishra*

*Cohort rule: This unit is only available to students enrolled in M800 – Master of Commerce, M900 – Doctor of Philosophy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: This research unit requires no formal class attendance however it will involve a minimum of 22 hours supervised contact.*

### Content

In consultation with the student's supervisor and other relevant academic staff to develop work undertaken in the study of MAR905 that is directed to ensuring the students produces a major research proposal that meets academic standards of minimum UPPER H2A. The unit provides a bridge to advanced research.

### Assessment

Satisfactory progress towards the 20,000 word research proposal. Oral presentation of summary of research proposal 100%.

## MAR725 – Research Methods

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Saikat Deb*

*Prerequisite: Completion of any four core finance units*

*Corequisite: MAF759*

*Incompatible with: MAA427, MAR906*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

Students will develop an understanding of the nature and scope of research in the social science field and more specifically in the accounting, economics and finance areas. The unit also aims to prepare students for the research requirements of their thesis.

*Note: Special enrolment procedure applies – please contact a student adviser for further details.*

# MAT348 – Accounting in International Contexts

*Enrolment modes: Trimester 2: Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Simona Scarparo*

*Prerequisite: MAA103 or MAA104*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: This unit requires the students to attend a supervised overseas study tour.*

*This will include a period of study before departing; attending all arranged visits; participating in all study activities and class sessions during the tour; complete all assessments required for the completion of the unit.*

## Content

This unit explores contemporary international accounting and managerial issues in a wide range of business and regulatory contexts. The study tour involves a series of site visits to major corporations and regulatory/professional bodies in either North America (June/July programme). Prior to departure, students will be briefed on the specific accounting research issues to address. In each site, top-level executives, senior managers/regulators will give presentations about current accounting, financial and performance management issues affecting their organisations.

Students will develop the ability to engage in debates about contemporary accounting and reporting issues (for example corporate social; responsibility, corporate governance, transparency and accountability), in the context of global corporations and regulatory bodies.

*Note: Special enrolment procedure applies. Enrolment in this program is by application only.*

## Assessment

- Assessment 1: (Group of 2–4 students) – Written report (700 words) and Presentation (15 minutes) 25%
- Assessment 2: (Individual) – Learning reflective Journal (portfolio of daily journals minimum 1/2 page per day) 30%
- Assessment 3: (Group 2–4 students) – Poster preparation (1 poster) and presentation (10 minutes) 15%
- Assessment 4: (Individual) – Written report (1500 words) – 30%

## Hurdle requirement

Students have to attend ALL activities pre, during and post the overseas study period. If a student misses 30% (or more) of the activities, for foreseeable circumstances, he/she will be not be eligible to submit his/her assessments and will not able to complete the unit.

# MAT748 – Accounting in International Contexts

*Enrolment modes: Trimester 2: Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Simona Scarparo*

*Prerequisite: MAA716 or MAA718 or MPA751 or MPA702*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: This unit requires the students to attend a supervised overseas study tour.*

*This will include a period of study before departing; attending all arranged visits; participating in all study activities and class sessions during the tour; complete all assessments required for the completion of the unit.*

## MBA071 – MBA Pre-Term: Getting to Grips with MBA Study

### Enrolment modes:

Trimester 1: Cloud (online)  
Trimester 2: Cloud (online)  
Trimester 3: Cloud (online)

Credit point(s): 0

EFTSL value: 0.000

Trimester 1 Unit Chair: Colin Higgins

Trimester 2 Unit Chair: Colin Higgins

Trimester 3 Unit Chair: To be advised.

Cohort rule: For students enrolled in M701, M501, M601 and M703

Prerequisite: Nil

Corequisite: Nil

Incompatible with: Nil

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. Students are required to complete a short online pre-term module which will take up to 10 hours to complete*

## Content

This unit provides orientation and study skill modules concerned with academic writing, finding and referencing appropriate sources, and an introduction to the expectations associated with MBA assessments. Additionally, it addresses using Deakin's online learning systems and provides strategies for managing time, planning effective study schedules, and where to seek study and learning assistance.

## Assessment

Assessment 1: Overall mastery quiz of 12 questions.

## MBA072 – MBA Pre-Term: Accounting Fundamentals

### Enrolment modes:

Trimester 1: Cloud (online)

Trimester 2: Cloud (online)

Trimester 3: Cloud (online)

Credit point(s): 0

EFTSL value: 0.000

Trimester 1 Unit Chair: To be advised.

Trimester 2 Unit Chair: To be advised.

Trimester 3 Unit Chair: To be advised.

Cohort rule: For students enrolled in M701, M501, M601 and M703

Prerequisite: Nil

Corequisite: Nil

Incompatible with: Nil

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. Students are required to complete a short online pre-term module which will take up to 10 hours to complete*

*Pre-term online module taking up to 10 hours to complete*

## Content

This unit introduces the basic vocabulary of accounting and outlines the principles that underpin the production of financial accounting information.

## Assessment

Assessment 1: Overall mastery quiz of 12 questions.

## MBA073 – MBA Pre-Term: Basic Business Statistics

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Munirul Nabin*

*Trimester 3 Unit Chair: Munirul Nabin*

*Cohort rule: For students enrolled in M701, M501, M601 and M703*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. Students are required to complete a short online pre-term module which will take up to 10 hours to complete*

### Content

This unit introduces the basic statistical techniques required in business situations.

### Assessment

Assessment 1: Overall mastery quiz of 12 questions.

## MBA700 – The Deakin Advantage: Leadership and Professional Development

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Amanda Allisey*

*Trimester 2 Unit Chair: Colin Higgins*

*Trimester 3 Unit Chair: Colin Higgins*

*Cohort rule: For students enrolled in M701 and M703*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2 hour weekly module*

### Content

This unit brings together career development, personal development and professional development. Students commence with a personalised 360 degree feedback diagnosis which provides the foundation for the selection of personal and professional development opportunities that are completed over the duration of their study program. Students complete an individual e-portfolio to evidence steps taken to address desired management and leadership capabilities and they reflect on the development of their skills in relation to the 360 degree framework.

Students who complete The Deakin Advantage: Leadership and Professional Development will have the opportunity to undertake a major project.

### Assessment

- Assessment 1 (Individual) – Leadership diagnosis, reflection and plan (2500 words) 50%
- ePortfolio (2500 words) 50%

## MBA701 – Strategy and Value Creation

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Steve Jaynes*

*Trimester 2 Unit Chair: Colin Higgins*

*Trimester 3 Unit Chair: Colin Higgins*

*Cohort rule: For students enrolled in D713, M701, M501, M601 and M703*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA731, MBR701, MBR731, MPM703, MPM706, MPR706*

*Scheduled learning activities – campus: Students will complete a weekly 2 hour module either in an on-campus/located environment or in an online setting.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour scheduled online modules per week.*

## Content

This unit introduces the principles of strategic management and the logics of value creation. It provides the opportunity to understand and apply the tools of strategy to identify priorities for management decision-making, and develop coherent and aligned operational and implementation plans that contribute to organisational goals in a dynamic and culturally diverse business environment.

## Assessment

- Assessment 1 (Individual) – Written External Analysis (2000 words) 30%
- Assessment 2 (Group of max 4 students) – Oral Presentation (20 minutes) 30%
- Assessment 3 (Group, max 5) – Total 40%
  - Written Report (3000 words, 20%)
  - Individual written reflection (1000 words, 20%)

## MBA702 – Financial Decision Making

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simona Scarparo*

*Trimester 2 Unit Chair: Robert Xiao*

*Cohort rule: For students enrolled in M701, M501, M507, M601, M703, H702*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF740, MBA711, MBA722, MBR702, MBR711, MPA702, MPA751, MPF753, MPR751, MPT751, MPT753*

*Scheduled learning activities – campus: Students will complete a weekly 2 hour module either in an on-campus/located environment or in an online setting.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour scheduled online modules per week.*

## Content

This unit introduces the principles of financial analysis and decision making, and provides a strategic foundation for approaching the financing decisions required within organisations.

It includes specific tools and approaches for making evidence-based financial decisions and enables managers to prepare budgets, propose financing solutions, and to understand contemporary developments in performance and reporting.

## Assessment

- Assessment 1 (Individual), Short answer test – 30%
- Written case analysis (1200 words) – 15% and presentation (10 minutes) – 15% (total 30%)
- Assessment 3 (Individual) – Written report (3000 words) – 40%

## MBA703 – The Economic Environment

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Munirul Nabin*

*Trimester 2 Unit Chair: Munirul Nabin*

*Cohort rule: For students enrolled in D713, M701, M501, M601, M703, M738*

*Corequisite: Nil*

*Incompatible with: MBA712, MBT712, MPE781, MPT781*

*Scheduled learning activities – campus: Students will complete a weekly 2 hour module either in an on-campus/located environment or in an online setting.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour scheduled online modules per week.*

## Content

This unit introduces the principal concepts and frameworks to understand the operation of economies and markets in order to place firm strategy in to a broader economic context. Tools and concepts to make firm-level decisions regarding pricing, production, and product development will be covered. The way people in economies interact with and influence how the economy works will also be addressed.

## Assessment

- Assessment 1 (Individual), Short-answer and multi-choice test 30%
- Written situation analysis (2000 words) 30%
- Assessment 3 (Individual), Written report (3000 words) 40%

## MBA704 – Marketing, Positioning and Consumers

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Paul Harrison*

*Trimester 2 Unit Chair: Paul Harrison*

*Cohort rule: For students enrolled in D713, H702, M701, M501, M601, M703 or M738*

*Corequisite: Nil*

*Incompatible with: MBA720, MBT720, MPK732, MPR732, MPT732*

*Scheduled learning activities – campus: 8 x 3 hour seminars in a campus/located environment (or an online setting); three podcasts and six online modules.*

*Scheduled learning activities – cloud (online): 8 x 3 hour online seminars; three podcasts, and six online modules.*

### Content

This unit covers the three main domains of marketing activity: marketing activities, positioning strategies and an understanding of the consumer. It blends foundational marketing concepts with emerging phenomena around digital and social media, analytics and big data. Important digital literacy, communication and problem-solving skills are emphasised.

### Assessment

- Assessment 1 (Individual), Weblogs/podcasts 30%
- Assessment 2 (Group of max 4 students), Oral presentation (20 minutes) 30%
- Assessment 3 (Individual), Analytical case study (3000 words) 40%

## MBA705 – Business Processes and Technology

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jeff Chamberlain*

*Cohort rule: For students enrolled in M701, M501, M601 and M703*

*Incompatible with: MBA710, MPM701, MPM701A, MPM708*

*Scheduled learning activities – campus: Students will complete a weekly 2 hour module either in an on-campus/located environment or in an online setting.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour scheduled online modules per week.*

### Content

This unit introduces developments in business process management and focuses specifically on the approaches, tools and methodologies for delivering enhanced organisational improvement. The foundation provides a springboard for considering new and emerging business technologies – including automation, artificial intelligence and machine learning.

### Assessment

- Assessment 1 (Individual), Portfolio of Business Process Improvement Opportunities 30%
- Assessment 2 (Group of max 4 students), Written Case Analysis (2000 words) 30%
- Assessment 3 (Individual), Business Case (3000 words) 40%

## MBA706 – Leading People in Organisations

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Andrea North-Samardzic*

*Cohort rule: For students enrolled in M701, M501, M601 and M703*

*Corequisite: Nil*

*Incompatible with: MBA721, MBA730, MBR706, MBR721, MBR730, MPM721, MPM771, MPR721, MPR771*

*Scheduled learning activities – campus: Students will complete a weekly 2 hour module either in an on-campus/located environment or in an online setting.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour scheduled online modules per week.*

### Content

The purpose of this unit is to provide an understanding of the nature of people's behaviour at work. It does this by examining the nature of the individuals, when they are in teams and groups, and when they are in larger social environments such as organisations. This provides the tools to analyse and critically reflect on an individual's role in their organisations, their relationships with others and how they can more effectively exert their influence and display leadership.

### Assessment

- Assessment 1 (Individual), Portfolio of Practice (3000 words) 30%
- Assessment 2 (Group of max 4 students), Written case analysis (2000 words) 30%
- Assessment 3 (Individual), Written report (2500 words) 30% and supporting 5 minute video 10% (total 40%)

## MBA707 – The Deakin Advantage: Capstone

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Colin Higgins*

*Cohort rule: For students enrolled in M701, M501, M601 and M703*

*Prerequisite: Completion of four core units in M701 and MBA700*

*Corequisite: Nil*

*Incompatible with: MBA731, MBR731, MPM703, MPM706, MPM731, MPR706*

*Scheduled learning activities – campus: Students will complete a weekly 2 hour module either in an on-campus/located environment or in an online setting.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour scheduled online modules per week.*

### Content

This unit provides an integrative MBA experience. Students complete a 'live case study' as a major capstone project in which they are expected to synthesise knowledge, concepts and research gained from their study program and demonstrate analytical, problem solving and business environment awareness skills in identifying a well-reasoned case for change and the value/benefits it will bring to a range of stakeholders. Students are also expected to practise their leadership and management skills to work as a team to present findings and recommendations coherently and in a professional context.

### Assessment

- Assessment 1 (Individual), Project Proposal Plan (2500 words) 25%
- Assessment 2 (Group of 4), Consultant's/ Management Report (3000 words) 50%
- Assessment 3 (Individual), Presentation (30 minutes) 25%

## MBA710 – Business Process Management

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MPM701*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mike Bengough*

*Cohort rule: For students enrolled in D713, H702, M501, M507, M538, M601, M638, M701, M703, M738 only.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPC701, MPM701, MPM701A, MPM708*

*Scheduled learning activities – campus: 1 x 2 hour class per week*

*Scheduled learning activities – cloud (online): Start Anytime and online independent and collaborative learning activities including online content for each topic which is available on demand*

### Content

This unit provides foundation skills and knowledge about the management of business processes and emphasises the importance of their links to organisational strategies. It considers the role of information and communication technologies in supporting business processes and it introduces enterprise systems and the ways in which these can automate processes and report on the goals and objectives of the organisation. The unit highlights that business process management (BPM) is applicable in all industries, for example, manufacturing, wholesale and service sectors, and that it is pertinent to business organisations of all sizes. The unit introduces business processes from architectural, problem scoping, modeling, methodological and measurement perspectives. The unit prepares students to develop and enhance professional careers in industry, government, and the not-for-profit sector.

### Assessment

- Written Report (maximum of 3000 words) plus business diagrams, 40%
- Written Report (maximum of 3000 words) plus business diagrams, 60%

## MBA711 – Accounting and Analysis for Managers

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MPA751*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sue Davey*

*Trimester 2 Unit Chair: Sue Davey*

*Cohort rule: For students enrolled in D713, H702, M501, M538, M601, M638, M701, M703, M738 only*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBR711, MPA702, MPA751, MPR751, MPT751*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including live screening of the on-campus class and 11 scheduled online workshops of 1 hour duration*

### Content

Accounting and Analysis for Managers aims to develop the student's ability to interpret and use corporate financial reports and other relevant information. The unit is concerned primarily with developing a strong understanding of accounting concepts and issues, which can be applied to a range of theoretical and practical problem-solving demands encountered by managers.

*Note: Previously titled: Financial Reporting and Analysis*

### Assessment

- Assessment 1: (Individual) Written assignment, 1500 words, 20%
- Assessment 2: (Group of 3) Case study report, 3000 words 20%
- Examination: (2-hour), Closed Book, 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MBA721 – People Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MPM721*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Melanie Kan*

*Trimester 2 Unit Chair: Melanie Kan*

*Cohort rule: For students enrolled in course version*

*D713, H702, M501, M507, M538, M601, M638, M701, M703, M738 only*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBR721, MPM721, MPR721*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour class (livestreamed with recordings provided) + 3 scheduled 1 hour online seminars*

### Content

The purpose of this unit is to give students a theoretical underpinning that explains the behaviour of people at work. It does this by examining the nature of the individuals, when they are in teams and groups, and when they are in larger social environments such as organisations.

### Assessment

- Assessment 1 (Individual): Written Assignment 2000 words, 25%
- Assessment 2 (Group 3–5): Digital Presentation 10 minutes, 25%
- Assessment 3 (Individual): Written Assignment 3000 words, 50%

## MBA722 – Finance

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MPF753*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ning Gong*

*Trimester 2 Unit Chair: Robert Xiao*

*Trimester 3 Unit Chair: Xiaoyang Li*

*Cohort rule: For students enrolled in D713, M501, M507, M538, M601, M638, M701, M703, M738 only*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF740, MBR753, MPF753, MPT753*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit is designed as an introduction to the theoretical principles of finance and the practical requirements of financial management within for-profit corporate organisations. The aim of this unit is to provide students with an understanding of the types of financial decisions that need to be taken in order to create value within the firm beyond that which shareholders could create on their own; and in doing so ensure the long term sustainability of the firm. Students will develop analytical skills for making key financial management decisions, including time-value-of money and risk-return analytics. It envelopes investment, financing, capital structure and payout decisions within the context of the Australian and international financial institutional frameworks. The unit will help students to develop an ability to apply basic mathematics to solve real-world financial decision problems. The unit will offer useful 'take-home' skills and knowledge relevant both for students who are running (or are planning to run) their own businesses as well as those employed (or seeking employment) in managerial positions within large companies.

### Assessment

- Assessment 1: Assignment 40%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MBA730 – Principles of Leadership

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MPM771*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Cohen*

*Trimester 2 Unit Chair: Michael Cohen*

*Cohort rule: For students enrolled in D713, M501, M507, M538, M601, M638, M701, M703, M738, M765 only*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBR771, MPM771, MPR771*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 11 x 3-hour scheduled livestream classes*

### Content

This unit is designed for students undertaking studies in leadership. The purpose of the unit is to deliver a thorough grounding in the main leadership theories, concepts, and issues. It is intended as an introduction to leadership and will be the theoretical foundation upon which other leadership units are built. As such, it would normally be the first leadership unit that students take. Through readings, interactive classes, examination of online resources, and group and individual activities, students will be encouraged to engage with leadership theories and to apply them to their own circumstances.

### Assessment

- Assessment 1 (Group of 4) Written assignment, 3500 words, 40%
- Written assignment, 2000 words, 20%
- Written assignment, 3000 words, 40%

## MBR701 – Strategy and Value Creation (Residential)

*Enrolment modes: Residential: Waurin Ponds (Geelong)*

*Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: For students enrolled in M701, M501, M601 and M703*

*Unit chair: Steve Jaynes*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA701, MBA731, MBR731, MPM703, MPM706, MPR706*

*In-person attendance requirements: This residential unit requires students to attend six days of intensive study at Waurin Ponds Estate, Geelong.*

### Content

This unit introduces the principles of strategic management and the logics of value creation. It provides the opportunity to understand and apply the tools of strategy to identify priorities for management decision-making, and develop coherent and aligned operational and implementation plans that contribute to organisational goals in a dynamic and culturally diverse business environment.

*Note: Conference fees for residential units are in addition to the tuition fee and vary depending on the type of accommodation chosen.*

### Assessment

- Assessment 1 (Individual), Written reflection (2000 words) 30%
- Assessment 2 (Group of max 4 students), Oral Presentation (20 minutes) 30%
- Assessment 3 (Individual), Written report (3000 words) 40%

## MBR702 – Financial Decision Making (Residential)

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: For students enrolled in M701, M501, M507, M601, M703, H702*

*Prerequisite: MBA071 and MBA072*

*Corequisite: Nil*

*Incompatible with: MAF740, MBA702, MBA711, MBA722, MBR711, MPA702, MPA751, MPF753, MPR751, MPT751, MPT753*

*In-person attendance requirements: This residential unit requires students to attend six days of intensive study at Waurin Ponds Estate, Geelong.*

*Residential Dates: Not offered in 2019.*

### Content

This unit introduces the principles of financial analysis and decision making, and provides a strategic foundation for approaching the financing decisions required within organisations. It includes specific tools and approaches for making evidence-based financial decisions and enables managers to prepare budgets, propose financing solutions, and to understand contemporary developments in performance and reporting.

Note: Conference fees for residential units are in addition to the tuition fee and vary depending on the type of accommodation chosen.

### Assessment

- Assessment 1 (Individual) – Short answer test 30%
- Written case analysis (1200 words) 15% and oral presentation (10 minutes) 15% (total 30%)
- Assessment 3 (Individual) – Written report (3000 words) 40%

## MBR704 – Marketing, Positioning and Consumers (Residential)

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: For students enrolled in M701, M501, M601, M703, M738, D713, H702*

*Prerequisite: MBA071*

*Corequisite: Nil*

*Incompatible with: MBA704, MBA720, MBT720, MPK732, MPR732, MPT732*

*In-person attendance requirements: This residential unit requires students to attend six days of intensive study at Waurin Ponds Estate, Geelong.*

*Residential Dates: To be confirmed.*

### Content

This unit covers the three main domains of marketing activity: marketing activities, positioning strategies and an understanding of the consumer. It blends foundational marketing concepts with emerging phenomena around digital and social media, analytics and big data. Important digital literacy, communication and problem-solving skills are emphasised.

Note: Conference fees for residential units are in addition to the tuition fee and vary depending on the type of accommodation chosen.

### Assessment

- Assessment 1 (Individual) – Weblogs/podcasts 30%
- Assessment 2 (Group of max 4 students) – Oral presentation (20 minutes) 30%
- Assessment 3 (Individual) – Written Report (3000 words) 40%

## MBR706 – Leading People in Organisations (Residential)

*Enrolment modes: Residential: Waurn Ponds (Geelong)*  
*Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: For students enrolled in M501, M507, M538, M601, M701, M703, M738, M765, D713 and H702*

*Unit chair: Andrea North-Samardzic*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA706, MBA721, MBA730, MBR721, MBR730, MPM721, MPM771, MPR721, MPR771*

*In-person attendance requirements: This residential unit requires students to attend six days of intensive study at Waurn Ponds Estate, Geelong.*

### Content

The purpose of this unit is to provide an understanding of the nature of people's behaviour at work. It does this by examining the nature of the individuals, when they are in teams and groups, and when they are in larger social environments such as organisations. This provides the tools to analyse and critically reflect on an individual's role in their organisations, their relationships with others and how they can more effectively exert their influence and display leadership.

*Note: Conference fees for residential units are in addition to the tuition fee and vary depending on the type of accommodation chosen. Please note: The final result for this unit will be released shortly after Trimester 2 result release.*

### Assessment

- Assessment 1 (Individual) – Portfolio of Practice (3000 words) 30%
- Assessment 2 (Group of max 4 students) – Written case analysis (2000 words) 30%
- Assessment 3 (Individual) – Written report (2500 words) 30% and supporting 5-minute video 10% (total 40%)

## MBR721 – People Management (Residential)

*Enrolment modes: Residential: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: MPR721*

*EFTSL value: 0.125*

*Cohort rule: For students enrolled in course version D713, H702, M501, M507, M538, M601, M638, M701, M703, M738 only*

*Unit chair: Andrea North-Samardzic*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA721, MPM721, MPR721*

*Scheduled learning activities – campus: This Residential unit requires students to attend six days of intensive study at Waurn Ponds Estate, Geelong.*

*Residential Dates: Sunday 10 November to Friday 15 November 2019*

### Content

Organisational behaviour focuses on the systematic study of the attitudes and behaviours of individuals and groups in organisational settings. The purpose is to assist managers in predicting, explaining and controlling the behaviour of people in organisations. The unit aims to develop students' conceptual understanding of the dynamics of individual and group behaviour in organisations, to examine the ways in which different forms of organisational structure and leadership influence that behaviour, and to analyse the ability of organisations to respond to external change and to manage their own internal change processes.

*Note: Conference fees for residential units are in addition to the tuition fee and vary depending on the type of accommodation chosen.*

*Please note: The final result for this unit will be released shortly after Trimester 2 result release.*

### Assessment

- Assessment Task 1
  - Part One (Individual) – Individual report (1500 words) – 15%
  - Part Two (Group of 2) – Paired report (1000 words) – 10%
- Assessment Task 2 (Group of 4) – Group report (3000 words) – 25%
- Assessment Task 3 (Group of 4) – Group video presentation – 25%
- Assessment Task 4 (Individual) – Written assignment (1500 words) – 25%

## MBR730 – Principles of Leadership (Residential)

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*Previously coded as: MPR771*

*EFTSL value: 0.125*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA730, MPM771, MPR771*

*Scheduled learning activities – campus: This Residential unit requires students to attend six days of intensive study at the Waurin Ponds Estate, Geelong.*

*Residential Dates: To be advised*

### Content

This unit is designed for students undertaking studies in leadership. The purpose of the unit is to deliver a thorough grounding in the main leadership theories, concepts, and issues. It is intended as an introduction to leadership and will be the theoretical foundation upon which other leadership units are built. As such, it would normally be the first leadership unit that students take. Through readings, interactive classes, examination of online resources, and group and individual activities, students will be encouraged to engage with leadership theories and to apply them to their own circumstances.

*Note: Conference fees for residential units are in addition to the tuition fee and vary depending on the type of accommodation chosen.*

*Please note: The final result for this unit will be released on the same date as Trimester 2 results – dates to be advised.*

### Assessment

- Assessment Task 1 (Individual) Written assignment (1500 words) 15%
- Assessment Task 2 (Individual) Written Report (1000 words) 10%
- Assessment Task 3 (Group of 2) Presentation (maximum 10 minutes) 25%
- Assessment Task 4 (Group of 3–4) Presentation (maximum 10 minutes) 25%
- Assessment Task 5 (Individual) Written report (2500 words) 25%

## MBR731 – Strategy Capstone (Residential)

*Enrolment modes: Residential: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: MPR706*

*EFTSL value: 0.125*

*Cohort rule: Students enrolled in D713, M601,*

*M701, M703 only*

*Unit chair: Steve Jaynes*

*Prerequisite: Must have passed any four core MBA units*

*Corequisite: Nil*

*Incompatible with: MBA731, MPM703, MPM706, MPR706*

*Scheduled learning activities – campus: This residential unit requires students to attend six days of intensive study at Waurin Ponds Estate, Geelong.*

*Residential Dates: Sunday 28 April to Friday 3 May 2019*

### Content

The unit will develop student's capacity to think strategically about an organisation, its industry and competitive position. Linked with core units, this unit provides the opportunity to understand and apply the tools of strategy to identify priorities for management decision-making, and develop coherent and aligned operational and implementation plans that contribute to organisational goals in a dynamic and culturally diverse business environment. Financial, statistical and analytical skills will be used to evaluate alternative courses of action, resourcing issues and implications, and students will be required to explain and justify their decisions.

Individually and as a team students will identify, develop, and reflect on their capability to formulate and implement organisational strategy.

*Note: Conference fees for residential units are in addition to the tuition fee and vary depending on the type of accommodation chosen.*

*Please note: The final result for this unit will be released on the same date as Trimester 1 results – Thursday 4 July 2019 from 6pm.*

### Assessment

- Presentation (Oral) 30%
- Test (90 minutes) 50%
- Written Assignment (Group of 5 students) 2000 words, 20%

## MBT703 – The Economic Environment (Tour)

*Enrolment modes: Trimester 3: Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Munirul Nabin*

*Cohort rule: For students enrolled in D713, M701, M501, M601, M703, M738*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA703, MBA712, MBT712, MPE781, MPT781*

*Scheduled learning activities – campus: There will be 20 hours of classes and 10 hours of seminars. In addition, the experiential learning component will include visits to international businesses, related to themes of the course. These visits will involve approximately 18 hours.*

### Content

This unit introduces the principal concepts and frameworks to understand the operation of economies and markets in order to place firm strategy in to a broader economic context. Tools and concepts to make firm-level decisions regarding pricing, production, and product development will be covered. The way people in economies interact with and influence how the economy works will also be addressed.

### Assessment

- Assessment 1 :Individual online multiple-choice quiz 15%
- Assessment 2: Individual Case study (2000 words) 40%
- Assessment 3: Individual Take-home exam 45%

## MBT704 – Marketing, Positioning and Consumers (Tour)

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Hall*

*Cohort rule: For students enrolled in D713, H702, M701, M501, M601, M703 or M738*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA704, MBA720, MBR704, MBT720, MPK732, MPT732*

*Scheduled learning activities – campus: Students will complete a weekly 2 hour module either in an on-campus/located environment or in an online setting.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour scheduled online modules per week.*

### Content

This unit covers the three main domains of marketing activity: marketing activities, positioning strategies and an understanding of the consumer. It blends foundational marketing concepts with emerging phenomena around digital and social media, analytics and big data. Important digital literacy, communication and problem-solving skills are emphasised.

### Assessment

- Assessment 1 (Group of 4), Report (Business) (2000 words) 20% and In Class Presentation (20 minutes), 10% (total 30%)
- Written Reflection (Self) (2000 words) 20% and Podcast (5 minutes), 10% (total 30%)
- Assessment 3 (Individual), Case study (3000 words) 40%

## MBT712 – Economics for Managers (Study Tour)

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Munirul Nabin*

*Cohort rule: For students enrolled in D713, M501, M538, M601, M638, M701, M703, M738 only*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA712, MPE781, MPT781*

*In-person attendance requirements: There will be 20 hours of classes and 10 hours of seminars. In addition the experiential learning component will include visits to international businesses related to themes of the course. These visits will involve approximately 18 hours.*

### Content

This unit covers the policy and strategic aspects of business management and also provides a practical and pragmatic approach to policy issues. Topics include the dynamics of market behaviour, including a discussion of different market structures and the impact of macroeconomic policies in a changing world economic environment. The unit has a practical focus as evidenced by the application of theory to international business.

Special enrolment procedure applies. Enrolment in this program is by application only.

### Assessment

- Assessment 1: (Individual) – Case study report (less than 3000 words) 40%
- Examination: (2 hours) Take home exam 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MBT720 – Marketing Management (Tour)

*Enrolment modes: Trimester 2: Overseas Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Hall*

*Cohort rule: Students enrolled in D713, H702, M501, M538, M601, M638, M701, M703, M738 only*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA720, MPK732, MPR732, MPT732*

*In-person attendance requirements: This unit requires students to attend a supervised study tour*

### Content

The unit introduces marketing as an integrative management function. It draws together the activities of every area of an organisation concerned with the planning, development, distribution, promotion and pricing of goods and services. The unit will examine the comprehensive perspective essential to marketing decision-making, through relationships with customers, suppliers, competitors, society, and other organisational functions. This unit covers the significant areas within marketing, such as research, buyer behaviour, product planning, marketing planning, pricing, and distribution, focusing on managing these elements within an overall integrated marketing strategy.

Special enrolment procedure applies.

Enrolment in this program is by application only.

### Assessment

- Assessment 1: Written assignment (Group of 2–3 students) – 3000 words – 30%
- Assessment 2: Reflective journal (Individual) – (1600 words) – 20%
- Assessment 3: Time limited assignment (Individual) – Time limited assignment (7 days) – 50%

## MFT307 – Equities and Investments Analysis

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: MAF101 or MAA104 and one unit in (MAF202, MAA255, MAF255)*

*Corequisite: Nil*

*Incompatible with: MAF207, MAF307*

*Scheduled learning activities – campus: This unit is taught in multimode settings covering CloudDeakin and face-to-face teaching both at the Melbourne Burwood Campus as well as at the host institution. In addition, students will receive exposure to trading environments by undertaking visits to major trading platforms in the host country. Following these visits, students will be required to undertake a portfolio optimization task using the financial assets available from the host country's exchange.*

### Content

This unit aims to develop experiential based industry engaged learning exposure in the area of investment management covering financial market trading environment, risk-return dynamics and capital market theory to achieve the desired optimality conditions for a given investment objective subject to a number of constraints that are present in the real-world application. Students also will learn to engage risk management tools to control and/or eliminate risk exposure by becoming familiar with other asset classes and derivative instruments. Understanding of modern portfolio theory, asset pricing and valuation tools are emphasised.

### Assessment

- Assessment 1: (Individual) Written reflection (500 words) 10%
- Assessment 2: (Individual) Online test 10%
- Assessment 3: (Group of 3 students) Case study report (3000 words) 20%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS010 – Academic Induction for the Bachelor of Business Analytics

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Kristijan Mirkovski*

*Trimester 2 Unit Chair: Kristijan Mirkovski*

*Cohort rule: Must be enrolled in courses M340, D366, D367, D368, D369, D370, D371, D328*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students are required to attend one compulsory 3 hour orientation session conducted at the beginning of the trimester. Must be completed by Week 4 in Cloud(online) mode.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. Students are required to complete the orientation session by Week 4 in Cloud (online) mode.*

### Content

This zero credit point unit aims to provide students enrolling in the Bachelor of Business Analytics an academic induction to the course, in particular, to ensure that:

1. students are competent users of the range of communication and collaboration software tools and systems used across the core curriculum and at the course level
2. students have an understanding of the commitment required to complete the significant work integrated learning component in the core curriculum and plan in advance
3. students are given an orientation to the course and its delivery and the study commitment required for successful completion of the course.
4. students are introduced and enrolled into the course level engagement platform used in the Bachelor of Business Analytics.

### Assessment

Assessment (Individual) – participate and demonstrate the use of online tools through an online exercise module (100%).

## MIS070 – Academic Induction for Postgraduate Information Systems

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Lasitha Dharmasena*

*Trimester 2 Unit Chair: Lasitha Dharmasena*

*Trimester 3 Unit Chair: Lasitha Dharmasena*

*Cohort rule: This unit is only available to students enrolled in courses: M522, M622, M722*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students are required to attend one compulsory 3 hour orientation session conducted at the beginning of the trimester. Must be completed by Week 4 in Cloud(online) mode.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. Students are required to complete the orientation session by Week 4 in Cloud(online) mode.*

### Content

This zero credit point unit aims to provide students enrolling in the Master of Information Systems an academic induction to the course, in particular, to ensure that:

1. students are competent users of the range of communication and collaboration software tools and systems used across the core curriculum and at the course level
2. students are given an orientation to the course and its delivery and the study commitment required for successful completion of the course
3. students are aware of the dedicated career development program run for the Master of Information Systems and understand the progressive hurdles they need to meet to qualify for each step
4. students are introduced and enrolled into the course level engagement platform used in the Master of Information Systems.

### Assessment

Assessment (Individual) – participate and demonstrate the use of online tools through an online exercise module (100%).

## MIS171 – Business Analytics

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSQ171*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Reza Kachouie*

*Trimester 2 Unit Chair: Reza Kachouie*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1.5 hour lab per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 11 x 1.5 hour online seminar*

### Content

The digital revolution has changed the practice of business. Data to support business decisions (data collected by business systems as well as through the Internet and Social Media such as Facebook and Twitter) are growing exponentially and becoming increasingly difficult to understand and use. Business Analytics is the broad use of quantitative reasoning skills in business decision making. Business Analytics helps managers to solve complex business problems, improve business performance, anticipate and plan for change while managing and balancing risks. This unit will provide students with the analytical knowledge and skills to explore data to find patterns and relationships in data; assess uncertainty and risk of business decisions; evaluate decisions; and forecast and predict trends.

### Assessment

- Assessment 1: Data Analysis and written response (2 page written response, data analysis output) 20%
- Assessment 2: Online Quiz, data analysis and response to specific question posed about the data 20%
- Examination: (2 hours) 60%

### From Trimester 2 2019

- Assessment 1 (individual): Online test – 10%
- Report (Analytical), 2000 words – 25%
- Assessment 3 (individual): Online test – 15%
- Examination (open book), 2 hours – 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

From Trimester 2 2019: Nil

## MIS201 – Business Requirements Analysis

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSC228*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Van-Hau Trieu*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MIS171*

*Corequisite: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 11 x 1 hour class (recordings provided) and 11 x 1 hour online seminar*

### Content

This unit introduces students to the fundamental concepts and methods of business analysis. Students will gain experience in identifying business opportunities, exploring stakeholder problems and seeking problem solutions to the client satisfaction. Seminars and online exercises will allow students to develop practical skills in using business analysis group techniques, which include brainstorming, mind-mapping, interviewing, conducting seminars and meetings, conflict resolution, viewpoints analysis, creative problem solving, negotiation of system options and validation of proposals with the client.

### Assessment

Continuous assessment (10 x 10% – less than 50% group work) 100%.

## MIS202 – Managing Data and Information

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSC217*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jay Zeal*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MIS171*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour lab per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 3 x 1 hour online seminar*

## Content

The capability to manage data and information is fundamental to any organisation. An information systems graduate should have a good knowledge of the techniques used and be able to identify which of the currently used approaches is appropriate in a given set of circumstances in a particular context. The unit uses familiar applications (eg Facebook, iTunes, Global Positioning Systems (GPS) and Google) to open up an investigation of different approaches to data storage and access using principles of information management. The systems are presented in the wider social context, and security and risk issues that arise from their use will be debated. Students will perform basic Structured Query Language (SQL) queries and develop the ability to critically analyse an organisation's information needs to allow the informed selection of an information management approach.

## Assessment

- Assessment 1: (Individual) A Formal business report (2000 words) 40%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MIS203 – Making Sense of Information

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MIS102*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Emilia Bellucci*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from T1 2016: MIS171*

*For students in any other course: Nil*

*Corequisite: Nil*

*Incompatible with: MIS102*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 3 x 1 hour online seminar*

## Content

Our world is now a world of information. On the one hand this makes many things easier, fun or even possible but on the other it can cause us to be overloaded with information and distracted by our constant connections. In this unit we look at how we might manage better and use information and connections in business, at work and in everyday life. The unit begins by considering the changes that the digital world has made to our lives and how we live in a world immersed in information and social media. We then look at how we can search and analyse information and utilise social media for business, learning and collaboration. We then look at how information can be used to assist people but also to monitor and manage people at work and at home. Finally, we consider how to use ICT in a more secure manner.

## Assessment

- Assessment 1: (Individual) – Case study (2000 words) 40%
- Assessment 2: (Individual) – Reflective exercise (1000 words or equivalent) 20%
- Examination: (2 hours) 40%

## Hurdle requirement

Achieve at least 50% of marks available on the examination.

# MIS211 – Information Security, Governance and the Cloud

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Dilal Saundage*

*Previously: Is Security, Infrastructure and the Cloud*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) plus 3 x 1 hour online seminar*

## Content

Information Systems (IS) governance (which oversees, organises and ensures the security of an IS infrastructure) increasingly adopts a service-oriented approach, with flexible, well-defined, on demand, high quality IS services to an organisation's stakeholders. An IS service is a set of related functions provided by IS to support business areas and business processes, including information security. This unit reviews the role of IS service management and IS services in organisations. It explores key supporting frameworks and models including internal, outsourced and hybrid models for IS service management, and information security methodologies and standards. It also explores important new trends in IS infrastructure and service management including cloud services and mobile services. The unit adopts a strategic outlook and considers which IS service model best supports the strategic context of an organisation. It discusses the security, social, organisational and technological issues which affect IS service management performance. The unit provides students with the opportunity to review IS services in a real life organisation in order to understand the application of IS service management theory to practice.

## Assessment

- Assessment 1: (Group of 2 – 4 students) Case study report (4000 words) 40%
- Examination: (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS231 – Professional Ethics in the Digital Age

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSC348*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Emilia Bellucci*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SIT223*

*Scheduled learning activities – campus: 1 x 3 hour class*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 3 x 1 hour online seminar*

## Content

This unit focuses on the ethical role of information systems (e.g. business analyst, data analyst) professionals and business professionals. The rise of global eBusiness and the rapid development of 'Big Data' (or large quantities of digital data) have changed how people, organisations and societies operate and have introduced new ethical, social and professional issues. The key aim of this unit is to equip the student with the skills to understand, identify and analyse these issues. The unit will consider some of the key ethical and social issues that have arisen as a result of global eBusiness and 'Big Data' and provide practical experience in how to manage these issues.

## Assessment

- Assessment 1: (Individual) Written report – Professional capability gap analysis (1500 words) 20%
- Assessment 2: (Group of 3 students) – Debate presentation and report (equivalent to 2500 words) 30%
- Examination: (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS271 – Business Intelligence and Data Warehousing

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSC273*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jay Zeal*

*Prerequisite: MIS171*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour lab per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 3 x 1 hour online seminar*

## Content

With the ever growing volume of data, as well as the increasing complexity of corporate information, it is now becoming more difficult for organisations to identify and take advantage of valuable business information. Contemporary Business Intelligence addresses this conundrum by delivering the right information to the

right people at the right time and in the right format. This unit aims to provide an introduction to the business uses, value and technologies of business intelligence. It will give students a broad overview of business intelligence and introduce current theories, techniques, frameworks, applications and technologies in business intelligence that satisfy business stakeholder requirements. It will also provide students with an opportunity to gain hands-on experience in using the industry-standard business intelligence system (IBM Cognos).

## Assessment

- Assessment 1: (Group of 4 students) – BI solution development (Deliverables – completed BI dashboards) and report (5000 words) 40%
- Assessment 2: (Individual) -Group assignment reflection report 10%
- Examination: (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MIS272 – Predictive Analytics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MIS372*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Bahadorreza Ofoghi*

*Prerequisite: MIS171*

*Corequisite: Nil*

*Incompatible with: MIS372, MIS772*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 11 x 3 hour class (recordings provided) and 3 x 1 hour online seminar*

## Content

The 'information age' has combined with the widespread adoption of digital technology to turn information into a key business asset. Businesses and governments now have access to massive volumes of data and require skills and expertise in making sense of this information for strategic decision making. This unit will provide students with the knowledge and skills to build predictive models and use data mining tools in real business scenarios. Students will be given the opportunity to gain hands-on experience with most widely used predictive analytics software tools globally.

## Assessment

- Assessment 1: (Individual) – Written report (1500 words) 20%
- Assessment 2: (Group of 2–3 students) Written report (3000 words) 40%
- Examination: (2 hours) – closed book – 40%

## Hurdle requirement

Achieve at least 50% of marks available on the examination.

# MIS275 – Decision Analytics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: David Stewart*

*Prerequisite: MIS171*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class + 1 x 1 hour lab per week.*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 3 x 1 hour online seminar.*

## Content

This unit focuses on quantitative decision models to improve managerial decision making, using the insights gained from business analytics. Students will apply decision models to make decisions in the domains of finance, supply chain, production planning, resource allocation and distribution networks. Students will learn to interpret and conceptualise different real-life business scenarios as mathematical models, allowing the decision maker to experiment with different decision inputs, and investigate the sensitivity of the outcomes.

## Assessment

- Assessment 1: (Individual) Case Study (1000 words + data analysis) 20%
- Assessment 2: (Individual) Case Study (1500 words + data analysis) 30%
- Examination: (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS312 – Social Media and Mobile Strategies

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSC349*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Graeme Pye*

*Prerequisite: MIS201 for students enrolled in M305, M340, D320 and D366*

*For all other students: NIL*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 11 x 3 hour class (recordings provided) + 3 x 1 hour online seminar*

### Content

This unit examines the important themes and contemporary issues in eBusiness strategies. It places special emphasis on helping students develop practical skills in formulating, implementing and analysing eBusiness strategies in a real life business context. In exploring contemporary issues in eBusiness strategies, the unit explores how modern organisations are leveraging social networks, blogs, virtual worlds, mobile computing and various Web 2.0 technologies for next generation eBusiness. In addition, the unit provides deep insight into how organisations generate, capture and share business values from eBusiness.

### Assessment

Campus-enrolled and Cloud (online) enrolled students:

- Assessment 1: Written Assignment (Analytical Essay/Work-based Report) (Group 3–6 Students) 2500–3000 words, 40%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS313 – Strategic Supply Chain Management

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSC388*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Craig Parker*

*Prerequisite: MIS201 for M305, M340, D320 and D366 students ONLY*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 11 x 3 hour class (recordings provided) + 3 x 1 hour online seminar*

### Content

The global economy has redefined the dynamics of competition for modern organisations, with product life-cycles shortening and competition being fierce. The unit examines the supply chain management (SCM) business models, performance with metrics, and eBusiness and business analytics technologies organisations need to meet these challenges. The unit also covers the environmental and social responsibility concerns of customers and governments which are affecting modern supply chains.

### Assessment

- Assessment 1 (Individual):
  - Part A – Case Study Report (2000 words) and complex diagrams, 45%
  - Part B – Feedback Reflection (500 words) 5%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS352 – Business Process Management

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jay Zeal*

*Prerequisite: MIS201 for M305, M340, D320, D366 students ONLY*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2-hour class and 1 x 1.5-hour lab per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour classes (recordings provided) + 3 x 1 hour online seminar*

### Content

Enterprise systems (ES) are organisation-wide information systems that organise support for business processes, facilitate flows of business information and management decisions, and provide business analytics and reporting services. Enterprise systems play a particularly important role in enterprise resource planning (ERP), which allows smooth integration of information between an enterprise, its supply chain partners and customers, and internally across different business functions with a view to automate a wide range of business activities, such as manufacturing, sales and service provision, finance and accounting, marketing, human resource management, etc. This unit will give students a broad overview of Enterprise Systems, explain their role in running an organisation, and in designing effective business structures and processes. It will also provide students with an opportunity to gain hands-on experience in using the industry-standard Enterprise Resource Planning systems SAP.

### Assessment

- Assessment 1: (Individual) Enterprise systems practicals and case study, 40%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS362 – Social Media Analytics and Data Driven Innovation

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kristijan Mirkovski*

*Prerequisite: MIS171*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) and 3 x 1 hour online seminar*

### Content

This unit introduces students to the nature of social media and its cultural politics. It familiarises students with software tools for accessing, analysing, and visualising social media data. It also explores (1) the implications of accessing social media data; (2) the benefits and problems with analysing social media data in real time; (3) the approaches to analysing social media data for trends and patterns; and (4) the approaches for social media data-driven innovation in organisations.

### Assessment

- Assessment 1: (Individual) Case Study Report (1500 words) 20%
- Assessment 2a: (Individual) Social Media Analysis Report (3000 words) 25%
- Assessment 2b: (Individual) Video Presentation (10 minutes) 5%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS373 – Artificial Intelligence for Business

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Bahadorreza Ofoghi*

*Prerequisite: MIS272 and SIT112*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x face-to-face contact hours per week (1 x 2 hour class and 1 x 1 hour lab)*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (live streamed with recordings provided) and 1 x 1 hour online seminar/workshop*

### Content

Businesses and governments have access to massive volumes of data and require advanced understanding and expertise to make sense of this information for strategic decision making and turning the information into key business assets. This unit will provide students with the knowledge and skills to develop advanced predictive models and make use of cutting-edge analytics tools to develop analytic-centric solutions in real business scenarios. Students will be given the opportunity to gain hands-on experience with one of the most widely used artificial intelligence software tools globally, namely Microsoft Azure.

### Assessment

- Assessment 1 (Individual) – Data analysis and a report (1500 words): 30%
- Assessment 2 (Group of 2–3) – Data analysis and a report (3000 words): 40%
- Assessment 3 (Individual) – Written report (2000 words): 30%

## MIS384 – Marketing Analytics

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ali Tamaddoni*

*Prerequisite: MIS171*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1.5 hour practical (lab) per week*

*Scheduled learning activities – cloud (online): 11 x 1.5 hour class (recordings provided) + 11 x 1.5 hour online seminar*

### Content

The Marketing Analytics unit focuses on models and techniques of analysing a firm's performance in a market which then can help decision makers to better allocate their resources. The teaching materials are organized in a way that expose students to both theoretical and practical aspects of models and techniques. Regarding this, a 1.5 hour class, is followed by a 1.5 hour seminar where students have the opportunity to get their hands on data (mostly from real cases) to implement the techniques and models. Students will also be required to conduct data analysis (assessments 1 and 2) and write a business report based on their findings (assessments 1 and 2).

### Assessment

- Assessment 1: (Individual) – Mini case 1: (1500 words) 20%
- Assessment 2: (Group of 3 students) – Mini case 2: (4000 words) 30%
- Examination: 50%

### Hurdle requirement

Must achieve at least 50% of the marks available on the examination.

## MIS398 – Project Management

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bardo Fraunholz*

*Prerequisite: From Trimester 1 2016, for students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 must pass MAA103, MAE101, MAF101, MIS171, MLC101, MMK101, MMM132, MWL101 and must pass 3 credit points at levels 2 and/or 3. For all other students: must have passed 3 credit points at levels 2 and/or 3.*

*Corequisite: Nil*

*Incompatible with: SIT374*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 11 x 3 hour class (recordings provided) + 3 x 1 hour online seminar*

### Content

Project management is rapidly becoming a standard way of doing business, whether it be constructing buildings, providing emergency aid services or launching a new product. Organisations have recognised that the powerful set of tools that this result-oriented management style offers have the ability to improve their ability to plan, implement and manage activities, to successfully compete in the global markets. Conversely, competing in global markets influenced by change, innovations and time to market, require organisations to manage multiple projects. To be able to select and manage projects that contribute positively to the strategic direction, an integrative approach is needed. This unit aims to provide students with an insight into project management in organisations. It provides students with an opportunity to gain knowledge in specific tools and techniques of project management; and analyse the process of integrating projects into organisations so as to contribute positively to strategic directions. It also examines some of the current issues in project management and career paths.

### Assessment

- Assessment 1: (Group of 6) 50%
  - Part A: Group Presentation (30 minutes) 40%
  - Part B: Individual reflection report (2000 words) 10%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the available marks on the examination.

## MIS399 – Applied Business Project

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSC303*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Suprika Shrivastava*

*Trimester 2 Unit Chair: Suprika Shrivastava*

*Prerequisite: For students commencing courses D301, D313, D317, D321, D322, D325, D338, D366, D388, M300, M307 from Trimester 1 2016: Must pass 4 units from MAE256, MIS201, MIS202, MIS203, MIS231, MIS271, MIS352, MIS312, MIS313, MIS372, MIS384, MIS398. For students commencing courses D367, D368, D370, D371, M340 from Trimester 1 2016: Must pass 16 credit points of units. For all other students: Must pass 16 credit points of which 3 credit points must be information systems (MIS coded) units. From Trimester 2 2019: MIS201, MIS398 plus 14 credit points of units.*

*Corequisite: Nil*

*Incompatible with: SIT302*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 11 x 3 hour scheduled online seminars*

### Content

This unit involves students undertaking an industry-based information systems pilot project. Projects will involve project management, business or systems analysis, systems development or business case development. Students will be placed into a project team on the basis of their skills and experience, and each team will be assigned a client. Projects will involve either: the design and/or implementation of an information system; or the preparation of business case recommendations. The unit also covers project management theory and techniques and provides students with the opportunity to apply the theory to their allotted project.

*Note: This unit should be undertaken in the student's final trimester of study.*

## Assessment

- Assessment 1: (Group-6 students)
  - Part A: Three group presentations (15 minutes each) 30%
  - Part B: Project report (5000 words) 30%
- Assessment 2: (Individual)
  - Part A: Diary and final reflection (2000 words) 20%
  - Part B: Professional identity assessment (15 minutes) 20%

## Hurdle requirement

Campus students must attend all in-class stand-up meetings during the trimester. Cloud students must submit a recording of at least three stand-up meetings during the trimester. Successfully complete the professional literacy module to gain access to the assignment Dropbox.

# MIS701 – Business Requirements Analysis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: MSC754*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Lemai Nguyen*

*Trimester 2 Unit Chair: Lemai Nguyen*

*Trimester 3 Unit Chair: Van-Hau Trieu*

*Prerequisite: Nil*

*Corequisite: For students enrolled in M722, M622,*

*M522: MIS070. All other students: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 11 x 1 hour class (recordings provided) + 11 x 1 hour online seminar*

## Content

The unit takes a high-level view of IS development where the focus is on the strategic alignment of IS and business functions in an organisation, which involves planning and discussion of business needs, as well as, negotiation and specification of solutions required by the client organisation, and agreed upon by management. Such solutions often involve development of information systems, and may also include business process improvement, organizational change, and strategy and policy development.

The unit therefore covers the principles and practices of stakeholder analysis, identification of business needs, problems and opportunities, analysis, negotiation and specification of requirements for any solution that may involve technology inspired change. The unit will address critical issues in acquiring, modelling, validating and communicating requirements for large business systems. Seminar and online exercises will allow students to develop practical hands-on skills in effective acquisition of information from client groups by brainstorming, interviewing, conducting seminars and meetings.

## Assessment

- Business Report – Enterprise analysis and business analysis planning (equivalent to 3000 words) – 30%
- Assessment 2 (Group of 3–5) – Business report – Requirements elicitation and analysis (equivalent to 4000 words) – 30%
- Assessment 3 (Group of 3–5) – Business report – Agile approach to business requirements analysis (equivalent to 3000 words) – 20%
- Report and Business Analysis (equivalent to 2500 words) – 20%

# MIS712 – eBusiness Strategies

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSC752*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kristijan Mirkovski*

*Prerequisite: For M722 Students Only: Completion of 6 credit points of Postgraduate level study of which at least four must be MIS-coded units.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 3 x 1 hour online seminar*

## Content

This unit examines the important themes and contemporary issues in eBusiness strategies. It aims to help students develop practical skills in formulating, implementing and evaluating eBusiness strategies, as well as conducting critical analysis of eBusiness models.

The unit places special emphasis on understanding how organisations generate, derive and share business value from eBusiness in a real life business context. In examining contemporary issues in eBusiness, the unit explores how modern organisations are leveraging social networking, blogs, virtual worlds, mobile computing and various Web 2.0 applications for next generation eBusiness.

Assessment

- Assessment 1: (Individual) Case Study (equivalent to 1000 words) 10%
- Assessment 2: (Individual) Case Study (equivalent to 2500 words) 40%
- Examination: (2 hours) 50%

Hurdle requirement

Achieve at least 50% of the marks available on the examination.

MIS713 – Supply Chain Management and Logistics

Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)

Credit point(s): 1  
Previously coded as: MSC753  
EFTSL value: 0.125  
Trimester 2 Unit Chair: Craig Parker

Prerequisite: For M722 Students Only: Completion of 8 credit points of Postgraduate level study of which at least six must be MIS-coded units  
Corequisite: Nil  
Incompatible with: Nil

Scheduled learning activities – campus: 1 x 2 hour class plus 1 x 1 hour seminar per week.

Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) plus 3 x 1 hour online seminar

Content

The modern economy means that competition today is based on short product life-cycles, increased uncertainties and global pressures. This unit examines how organisations can meet these challenges by adopting world class supply chain management (SCM) business models, developing effective supplier and customer relationships, and measuring their performance with metrics, as well as using associated eBusiness and business analytics technologies. The unit also covers the implications of the increasing pressure from customers and governments for supply chains to be more environmentally and socially responsible.

Assessment

- Assessment 1: (Individual) – 2 Parts total 50%
  - Part A: Case Study Report (2500 words) and complex diagrams, 45%
  - Part B: Feedback reflection (500 words), 5%
- Examination: (2 hours) 50%

Hurdle requirement

Achieve at least 50% of the marks available on the examination.

MIS714 – Human Resource Analytics

Enrolment modes: Start Anytime

Credit point(s): 1  
EFTSL value: 0.125  
Unit chair: Dilal Saundage

Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil

Scheduled learning activities – campus: Start Anytime (online): Online independent and collaborative learning activities including 3 x 1 scheduled online seminars

Content

Human Resource Analytics will provide students with data analytics skills, knowledge and capabilities to effectively organise and manage various human resources functions within organisations.

Students will be introduced to the key concepts and theoretical underpinnings for HR Analytics and opportunities to explore complex HR data to develop their decision-making skills. Students will further enhance their understanding of the strategic value of HR Analytics for organisations to meet current workforce demands and to forecast future demands.

Assessment

- Assessment 1: (Individual) – HR analytic case study (1500 words) – 30%
- Assessment 2: (Individual) – HR analytic case study (1500 words) – 30%
- Assessment 3: (Individual) – Applied HR Analytic Report (3000 words) – 40%

## MIS732 – Enterprise Architecture and Governance

*Enrolment modes: Trimester 2: Burwood (Melbourne) Intensive, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Lemai Nguyen*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MIS731*

*Scheduled learning activities – campus:*

*Weeks 1–5: 3 face-to-face contact hours per week*

*(1 x 2-hour class and 1 x 1 seminar)*

*Weeks 6–7: 5 x 3 hour workshops^*

*Weeks 8–9: 2 x 1.5 hour online seminar*

*Week 10: 1 x 3 hour class (Assignment consultations and revision for exam preparation)*

*Scheduled learning activities – cloud (online): 11 x 3 hour class (recordings provided) + 3 x 1 hour online seminar*

### Content

Enterprise architectures and associated governance frameworks have now become key issues for small through to large organisations to manage the growing volume of internal and external information resources. In this unit you will learn about the key enterprise architecture components needed to manage these information resources, and the importance of aligning enterprise architectures with organisational strategy and policies. Enterprise architectures must also support the governance of information resources. Students will learn about governance frameworks (e.g. COBIT, ITIL) which address issues such as complying with consumer data protection principles, managing enterprise information security, and managing external information resource providers.

*Note: ^Students will be assigned to a Group in Weeks 6 and 7 for the purposes of scheduling workshops. Students must attend and participate in project-based activities at the Burwood campus on the scheduled day during the trimester intensive weeks.*

### Assessment

- Assessment 1: (Group of 3 students) Case study report and evidence of research (5000 words), 35%
- Assessment 2: (Individual) Group work self-reflection and evidence report (1500 words), 15%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS741 – Analysing the Impact of Digital Business

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Craig Parker*

*Prerequisite: Nil*

*Corequisite: For students enrolled in M722, M622,*

*M522: MIS070. All other students: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week and online problem-based exercises*

*Scheduled learning activities – cloud (online): 11 x 3 hour class (recordings provided) plus 3 x 1 hour online seminar*

### Content

This unit focuses on the ethical role of digital business and business professionals in organisations. The rapid development of digital technologies and the rise of global eBusiness have made significant changes in the way people, organisations and societies operate, and new ethical, social and professional issues have emerged. The key aim of this unit is to equip students with the skills to understand, identify and analyse these issues. Students will analyse these issues in the context of the core concepts underpinning information systems, as well as explore ethical issues emerging in the contemporary digital business context.

### Assessment

- Assessment 1: (Individual) – Video (1.5 minutes) and professional capability gap analysis (equivalent to 2000 words) 20%
- Assessment 2: (Individual) – Report on ethical dilemmas (equivalent to 2500 words) 30%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS761 – Enterprise Information Management and Security

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jay Zeal*

*Trimester 3 Unit Chair: Quan Vu*

*Previously: Enterprise Information Management*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour computer lab per week*

*Scheduled learning activities – cloud (online): 11 x 1 hour class (recordings provided) + 11 x 1 hour scheduled online seminars*

### Content

Organisations are increasingly relying on business analytics to make strategic decisions using the data they generate during day-to-day operations. Strategic value will only be obtained if the data is reorganised and made widely accessible at the enterprise level. When data is reorganised to meet this need, there is a real risk that the semantics of the data will be compromised, and that data integrity and security can be violated. Hence, students will learn how data can be captured and reorganised effectively to address these issues, and how to secure the data against threats. Specifically, this unit introduces students to a number of topics in data management (e.g. relational database management), big data systems, and information security. At the end of this unit, students will understand broad issues concerning data management at the enterprise level, gain basic skills in information modelling and querying databases, and understand the procedures and controls for achieving information security.

### Assessment

- Assessment 1: (Individual) A formal business report (2000 words) 40%
- Examination: (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS770 – Foundation Skills in Data Analysis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Scott Salzman*

*Trimester 2 Unit Chair: Lasitha Dharmasena*

*Trimester 3 Unit Chair: Lasitha Dharmasena*

*Previously: Analytical Skills Foundations*

*Prerequisite: Nil*

*Corequisite: For students enrolled in M722, M622, M522: MIS070. All other students: Nil*

*Incompatible with: MIS770A*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour lab per week*

*Effective from Trimester 3 2019:*

*1 x 2 hour class and 1 x 1.5 hour lab per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (livestreamed with recordings provided) + 11 x 1 hour online seminar*

*Effective from Trimester 3 2019:*

*11 x 2 hour class (livestreamed with recordings provided) + 11 x 1.5 hour online seminar*

### Content

This unit aims to develop foundation skills and knowledge required for data driven, evidence based approaches to business decision making and business performance analysis. To this end, the unit first introduces the skills necessary to enable an understanding of business metrics. This is followed by descriptive analytical techniques that transform both structured and unstructured data into meaningful information for the purpose of decision making and understanding and reviewing business performance. Techniques and principles of data visualisation are introduced that enable graphical depictions of data that can improve comprehension, communication and decision-making. Then, the unit introduces quantitative reasoning skills so students are able to review business performance to find problems or areas of opportunities, and identify patterns and trends in data using descriptive and inferential statistics.

*Note: This unit is also available in Start Anytime mode*

## Assessment

- Assessment 1: (Individual) Written Assignment – Case study (2000 words) 20%
- Assessment 2: (Individual) Written Assignment – Data Analysis (equivalent to 2000 words) 30%
- Examination: (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MIS770A – Foundation Skills in Data Analysis

*Enrolment modes: Start Anytime*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Previously: Analytical Skills Foundations*

*Unit chair: Dilal Saundage*

*Prerequisite: Nil*

*Corequisite: For students enrolled in M722, M622,*

*M522: MIS070. All other students: Nil*

*Incompatible with: MIS770*

*Scheduled learning activities – campus: Online independent and collaborative learning activities including online content for each topic which is available on demand.*

## Content

This unit aims to develop foundation skills and knowledge required for data driven, evidence based approaches to business decision making and business performance analysis. To this end, the unit first introduces the skills necessary to enable an understanding of business metrics. This is followed by descriptive analytical techniques that transform both structured and unstructured data into meaningful information for the purpose of decision making and understanding and reviewing business performance. Techniques and principles of data visualisation are introduced that enable graphical depictions of data that can improve comprehension, communication and decision-making. Then, the unit introduces quantitative reasoning skills so students are able to review business performance to find problems or areas of opportunities, and identify patterns and trends in data using descriptive and inferential statistics.

## Assessment

- Written Assignment – Case study (2000 words) – 20%
- Written Assignment – Data Analysis (equivalent to 2000 words) – 30%
- Written submission followed by an oral test: Students are required to present their learning from all three modules, including the assignment feedback for the first two assessments – 50%

## Hurdle requirement

Achieve at least 50% of the marks available for Assessment 3.

# MIS771 – Descriptive Analytics and Visualisation

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSQ791*

*EFTSL value: 0.125*

*Assumed Knowledge: The unit assumes students have already completed foundational study in statistics at undergraduate level and have some familiarity with basic statistical concepts and inferential techniques. In particular, understanding of descriptive statistics and structure of probability is necessary.*

*Trimester 1 Unit Chair: Dilal Saundage*

*Trimester 2 Unit Chair: Dilal Saundage*

*Prerequisite: MIS770 or MIS770A\* for M722, M761, M661, M755 and S777 students ONLY. From T2 2019: MIS770 or MIS770A\* for M722, M751, M761, M661, M755 and S777 students ONLY*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour laboratory per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (livestreamed with recordings provided) + 11 x 1 hour online seminar/workshop*

## Content

This unit focuses on the techniques and approaches to analysing business data to support decision making. It covers exploratory data analysis, visualisation of data and evidence based decision making. The unit aims to give students a broad understanding of statistical approaches used to support business decisions, their limitations, typical application areas, managerial reporting of statistical results and incorporating insights into the business decision-making process. Extensive use is made of software to develop data visualisation and analysis skills and to enhance the appreciation of various techniques studied. The unit assumes students have already completed foundational study in statistics at undergraduate level and have some familiarity with basic statistical concepts and inferential techniques. In particular, understanding of descriptive statistics and structure of probability is necessary.

*Note: \*Students who are either enrolled in or have completed MIS770A – please contact a student adviser [buslaw@deakin.edu.au](mailto:buslaw@deakin.edu.au)*

## Assessment

- Data Analysis and associated report (2500 words) – 30%
- Data Analysis and associated report (2500 words) – 35%
- Data Visualization Presentation and Report (2500 words) – 35%

## MIS772 – Predictive Analytics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jacob Cybulski*

*Trimester 2 Unit Chair: Jacob Cybulski*

*Prerequisite: MIS770 or MIS770A\* for M722, M761, M661 and M755 students ONLY. From T2 2019: MIS770 or MIS770A\* for M722, M751, M761, M661, M755 and S777 students ONLY*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour computer lab per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (livestreamed with recordings provided) + 11 x 1 hour online seminar/workshop*

## Content

The ‘information age’ has combined with the widespread adoption of digital technology to turn information into a key business asset. Businesses and governments now have access to massive volumes of data and require skills and expertise in making sense of this information for strategic decision making. This unit will provide students with the knowledge and skills to build predictive models and use data mining tools with ‘Big Data’. Students will be given the opportunity to gain hands-on experience with one of the most widely used predictive analytics software tools globally.

*Note: \*Students who are either enrolled in or have completed MIS770A – please contact a student adviser [buslaw@deakin.edu.au](mailto:buslaw@deakin.edu.au)*

## Assessment

- Develop predictive models for a business (2000 words) 20%
- Develop advanced predictive models for a business (3000 words) 30%
- Examination (2 hours) 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS775 – Decision Modelling for Business Analytics

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dilal Saundage*

*Trimester 3 Unit Chair: David Stewart*

*Cohort rule: Available to students enrolled in Master’s level courses only*

*Prerequisite: MIS770 or MIS770A\* for M722, M761, M661 and M755 students ONLY. From T2 2019: MIS770 or MIS770A\* for M722, M751, M761, M661, M755 students ONLY*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1.5 hour computer lab per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (livestreamed with recordings provided) + 1.5 hour online seminar/workshop*

## Content

This unit aims to provide students with the knowledge and skills to build complex decision models and use advanced quantitative modelling techniques to analyse and develop solutions to business problems.

On completion of the unit students should be able to:

1. Conceptualise, formulate and represent a business problem as a decision model
2. Develop business decision models using software tools
3. Use decision modelling techniques such as optimisation, stochastic modelling and risk analysis
4. Develop and evaluate the utility of alternative solutions
5. Carry out sensitivity analysis
6. Develop an overview of advanced modelling techniques and approaches in Business Analytics.

*Note: \*Students who are either enrolled in or have completed MIS770A – please contact a student adviser [buslaw@deakin.edu.au](mailto:buslaw@deakin.edu.au)*

## Assessment

- Assessment 1 (Group of 2–3) – Case Study (1200 words + data analysis) – 20%
- Assessment 2 (Group of 2–3) – Case Study (1200 words + data analysis) – 30%
- Examination: 2 hours – 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS776 – Design Thinking for Innovation

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Learning resources are via CloudDeakin*

## Content

Design Thinking refers to a style of thinking that brings creativity to the way we define and solve problems. It combines sensitivity for the context of a problem, creativity in the generation of new insights and solutions, and rationality in analysing and fitting

solutions to the context. This unit explores design thinking as a practice for identifying and developing innovation opportunities in a range of business and social contexts. It explores key approaches associated with the practice of design thinking, such as ethnographic techniques for understanding the problem context, creative approaches for idea generation, ill-structured problem solving, collaborative/participatory teamwork and human centred problem solving. The unit will develop the basis for innovative and creative thinking in students and develop confidence for students to think innovatively.

## Assessment

- Individual design thinking ePortfolio, 50%
- Assessment 2 (Group of 6–8 students) Team projects and presentation, 50%

## MIS779 – Decision Analytics in Practice

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne) Cloud (online)*

*Trimester 2: Burwood (Melbourne) Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bahadorreza Ofoghi*

*Trimester 2 Unit Chair: Bahadorreza Ofoghi*

*Cohort rule: This unit is only available to students*

*enrolled in courses: M701, M760, M761*

*Prerequisite: Completion of 6 credit points of study at level 7 plus MIS771 and MIS772*

*Corequisite: MIS775*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 11 x 3 hour classes (livestreamed with recordings provided)*

## Content

This is a capstone project unit that will provide students with the opportunity to develop Business Analytics practice skills. The unit aims to provide students with an opportunity to gain hands-on experience by working on an authentic large scale business problem from concept to solution under the guidance and direction of a specialised team of industry practitioners in Business Analytics.

## Assessment

- Assessment 1 (Group and Individual)
  - Report (Group – 4–6 students) – (2000 words) 20%
  - Presentation (Individual) – (5 min) 10%
- Assessment 2 (Group and Individual)
  - Report (Group – 4–6 students) – (3000 words) 30%
  - Presentation (Individual) – (5 min) 20%
- Reflective Report (2000 words) 20%

On completion of this unit students should be able to: explain the importance of business intelligence for an organisation; describe the tools and techniques which are used in business intelligence; understand the major issues in implementing business intelligence; assess and propose suitable designs for development of business intelligence programs.

*Note: \* Students will be expected to complete some pre-reading in preparation for the unit (made available via CloudDeakin upon commencement of Trimester).*

## MIS781 – Business Intelligence

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: William Yeoh*

*Trimester 3 Unit Chair: William Yeoh*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour computer lab per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (livestreamed with recordings provided) and 1 x 1 hour online seminar/workshop*

## Content

With the ever-growing volume of data, it is now becoming more difficult for organisations to identify and take advantage of valuable business information. Contemporary Business Intelligence addresses this conundrum by delivering the right information to the right people at the right time and in the right form. Business Intelligence is widely used to support business decision-making, and to inform decision at the management, operation and planning levels of an organisation. This unit aims to provide an introduction to the business uses, applications and technologies of business intelligence for decision support. It will give students a broad overview of business intelligence and introduce current theories, techniques, frameworks, applications, architectures and technologies in business intelligence that supports decision-making process. It will also provide students with an opportunity to gain hands-on experience in using the industry-standard business intelligence system.

## Assessment

- Assessment 1 (Group of 3) – Business intelligence dashboards, predictive models and report (4000 words) – 30%
- Research report on the benefits and applications of business intelligence technologies (2500 words) – 20%
- Examination (2 hours) – 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS782 – Value of Information

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Lubna Sultana Alam*

*Trimester 3 Unit Chair: Lubna Sultana Alam*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per fortnight and 1 x 1.5 hour seminar per fortnight*

*Scheduled learning activities – cloud (online): 1 x 3 hour class (livestreamed with recordings provided) per fortnight and 1 x 1.5 hour online seminar per fortnight*

## Content

The unit introduces students to how ICT investments including business analytics generate business value. This requires positioning information as a business asset and understanding ICTs contribution to gaining competitive advantage of the firm.

*Note: Online teaching methods require internet access. This unit uses the FutureLearn online learning platform.*

## Assessment

- Report based on written case study (1500 words) 20%
- Assessment 2 (Group of 3) Business Case Development (3000 words) 30%
- Examination (2-hour) Closed book, 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MIS784 – Marketing Analytics

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ali Tamaddoni Jahromi*

*Trimester 3 Unit Chair: David Stewart*

*Previously: Customer Analytics*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5 hour class per week, 1 x 1.5 hour lab per week*

*Scheduled learning activities – cloud (online): 11 x 1.5 hour class (recordings provided) + 11 x 1.5 hour online seminar*

## Content

Students will learn how to apply models and metrics to gauge the effectiveness of a firm's marketing activities, in terms of the customer management, market share analysis, product management and communication. This unit will cover application of analytics to customer segmentation and profiling; social media analysis; predicting customer behaviour; and optimising profitability. The teaching materials are organized in a way that expose students to both theoretical and practical aspects of models and techniques. Students will also have an opportunity to work with real data (mostly from real cases) to implement the techniques and models.

## Assessment

- Data Analysis Case Study (1500 words) – 20%
- Data Analysis Case Study (3000 words) – 30%
- Examination (2 hours) – 50%

## Hurdle requirement

Students must achieve at least 50% of the marks available on the final exam.

# MIS793 – Business Analytics Project

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Ali Tamaddoni Jahromi*

*Trimester 2 Unit Chair: Ali Tamaddoni Jahromi*

*Trimester 3 Unit Chair: Ali Tamaddoni Jahromi*

*Cohort rule: This unit is only available to students enrolled in courses: M760, M761*

*Prerequisite: MIS772 and completion of 6 credit points of study at level 7 within the Master of Business Analytics with a minimum WAM of 65%*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: The project may be undertaken within an industry or research setting and will involve at least 22 hours of supervised contact, under the supervision of an academic and/or industry practitioners.*

*Scheduled learning activities – cloud (online): Learning resources are via CloudDeakin. The project may be undertaken within an industry or research setting and will involve at least 22 hours of supervised contact, under the supervision of an academic and/or industry practitioners.*

## Content

This unit provides students with an opportunity to apply skills and knowledge gained in Master of Business Analytics program to further enhance skills in Business Analytics. The unit is designed to be an advanced elective within the Masters program and aims to provide students with an opportunity to gain hands-on experience by working on an authentic Analytics project with a research or industry focus. The project may be undertaken within an industry or research setting under the supervision of an academic and, where appropriate, an industry practitioner.

*Note: This unit has a special enrolment process. Please email the unit chair for more information.*

## Assessment

- Assessment Task 1 (Individual) – Project Proposal (1500 words) 30%
- Assessment Task 2 (Individual) – Proof of Concept 30%
- Assessment Task 3 (Individual) – Written Report (2000 words) 40%

## MIS798 – Project Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MSC756*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bardo Fraunholz*

*Trimester 3 Unit Chair: Graeme Pye*

*Prerequisite: For M722 Students Only: Completion of 4 credit points of Postgraduate level study of which at least three must be MIS-coded units.*

*Corequisite: Nil*

*Incompatible with: SIT764*

*Scheduled learning activities – campus: 1 x 3 hour class per week (Please note: there will be some laboratory component, please see DeakinSync for details)*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 11 scheduled online workshops.*

### Content

Project Management is undoubtedly one of the most important skills in management as modern organisations shift from traditional management to project based management. This unit examines project management in the exciting, dynamic, innovative, virtual, information enabled, and knowledge intensive organisational environment. Consequently, this unit emphasises skills as well as techniques that can be derived from traditional and Agile project management and explores innovations relevant for the successful management of projects. It also investigates the task of managing project knowledge which is regarded as a central skill for managing future projects. The project management methodologies taught in this unit are based on Agile Project Management and the Project Management Body of Knowledge (PMBok). Aspects covered in this unit include: overviews of project management; the Agile philosophy; planning processes; project communication; human and social aspects of project management; procurement tools; techniques and enabling technologies. Students are also able to apply the learning and teamwork skills in a simulated project management environment.

### Assessment

- Assessment 1 (Group of up to four students) – Assignment (including individual reflection of 10%) 5,000 words, 50%
- Examination: (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MIS799 – Information Systems in Practice

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bardo Fraunholz*

*Trimester 2 Unit Chair: Bardo Fraunholz*

*Cohort rule: Available to students enrolled in Master's level courses only*

*Prerequisite: Completion of 8 credit points of Postgraduate level study of which at least six must be MIS-coded units and must include MIS798*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 11 x 3 hour class (recordings provided) + 11 x 1 hour online seminar*

### Content

This is a capstone project unit that will provide students with the opportunity to develop Information Systems practice skills. The unit aims to provide students with an opportunity to gain hands-on experience by working on an authentic business problem from concept to solution under the guidance and direction of a team of academic staff and industry advisors.

On completion of the unit students should be able to:

1. Investigate a business problem and identify associated stakeholders and business processes
2. Identify and source information relevant to the business problem
3. Analyse the business processes and information to understand drivers and impacts
4. Explore and evaluate the utility of alternative IS driven solutions
5. Develop strategies for the successful implementation of the optimal solution

### Assessment

Learning portfolio – 100%.

## MIT399 – Applied Business Project (Study Tour)

*Enrolment modes: Trimester 2: Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Bardo Fraunholz*

*Prerequisite: MIS201 and MIS398, plus 14 credit points of units.*

*Corequisite: Nil*

*Incompatible with: MIS399*

*Scheduled learning activities – campus: The Applied Business Project study tour will be conducted in intensive mode over a two-week period. All students are required to attend all sessions during the study tour. The summary and post tour work will be required.*

### Content

This unit involves students undertaking an industry-based information systems pilot project. Projects will involve project management, business or systems analysis, systems development or business case development. Students will be placed into a project team on the basis of their skills and experience, and each team will be assigned a client. Projects will involve either: the design and/or implementation of an information system; or the preparation of business case recommendations. The unit also covers project management theory and techniques and provides students with the opportunity to apply the theory to their allotted project.

### Assessment

Assessment 1 (Individual): Learning Portfolio – 100%.

## MIT799 – Information Systems in Practice (Study Tour)

*Enrolment modes: Trimester 2: Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Bardo Fraunholz*

*Cohort rule: Available to students enrolled in Master's level courses only*

*Prerequisite: Completion of 8 credit points of Postgraduate level study of which at least six must be MIS-coded units and must include MIS798*

*Corequisite: Nil*

*Incompatible with: MIS799*

*Scheduled learning activities – campus: The Information Systems in Practice study tour will be conducted in intensive mode over a two-week period. All students are required to attend all sessions during the study tour. The summary and post tour work will be required.*

### Content

This is a capstone project unit that will provide students with the opportunity to develop Information Systems practice skills. The unit aims to provide students with an opportunity to gain hands-on experience by working on an authentic business problem from concept to solution under the guidance and direction of a team of academic staff and industry advisors.

On completion of the unit students should be able to: 1. Investigate a business problem and identify associated stakeholders and business processes 2. Identify and source information relevant to the business problem 3. Analyse the business processes and information to understand drivers and impacts 4. Explore and evaluate the utility of alternative IS driven solutions 5. Develop strategies for the successful implementation of the optimal solution

### Assessment

Learning portfolio – 100%.

## MLC101 – Law for Commerce

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kim Teh*

*Trimester 2 Unit Chair: Jay Gul*

*Trimester 3 Unit Chair: Athula Pathinyake*

*Previously: Business Law*

*Cohort rule: Not available for Bachelor of Law students*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MLL111*

*Scheduled learning activities – campus: 1 x 2-hour class and 1 x 1-hour seminar per week*

*Scheduled learning activities – cloud (online): 2-hour class (recordings provided) + 1-hour online seminar per week*

## Content

This unit provides the underlying concepts and purpose of commercial law. It covers the Australian legal system, the law relating to contract, business relationships and negligence.

## Assessment

- Case study – 3 mini case studies (250 words for each case) 15%
- Short Questions based on Case Study (1500 words) 25%
- Examination (2 hours) 60%

### Trimester 2 2019

- Case study – 3 mini case studies (250 words for each case) 20%
- Short Questions based on Case Study (1500 words) 30%
- Examination (2 hours) – 50%

## Hurdle requirement

Achieve at least 50% for the marks available on the examination and students must successfully complete the digital literacy module to gain access to the assessment dropdown.

From Trimester 2 2019: Nil

## MLC203 – Corporations Law

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Akshaya Kamalnath*

*Trimester 3 Unit Chair: Lang Thai*

*Cohort rule: Not available for Bachelor of Law students*

*Prerequisite: MLC101*

*Corequisite: Nil*

*Incompatible with: MLL221*

*Scheduled learning activities – campus: 1 x 2-hour class, 1 x 1-hour seminar per week*

*Scheduled learning activities – cloud (online): 2-hour class (recordings provided) + 1-hour online seminar per week*

## Content

Topics covered in this unit include: the origins of our corporate law; corporate personality; other forms of business organisation; incorporation of companies; promoters and corporate fundraising; directors and their duties; membership; meetings; minority rights; share and loan capital and corporate insolvency; and winding up.

## Assessment

- Assignment 40%
- Examination 2 hours 60%

## MLC206 – Marketing Law

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Vicki Huang*

*Cohort rule: Not available for Bachelor of Law students*

*Prerequisite: MLC101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2-hour class, 1 x 1-hour seminar per week*

*Scheduled learning activities – cloud (online): 2-hour class (recordings provided) + 1-hour online seminar per week*

## Content

The unit is designed to introduce students to competition and consumer issues in complex industrial societies and the implications for sales and product promotion. Particular reference is made to the Competition and Consumer Act 2010 (Cth) Parts IV and V and to intellectual property laws. Topics include: the law applying to advertising; product liability; distribution agreements; franchises and solus agreement and related pro-consumer obligations.

## Assessment

- Written Assignment 3500 words 40%
- Examination 2 hours 60%

## MLC301 – Principles of Income Tax Law

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Monica Hope*

*Cohort rule: Not available for Bachelor of Law students*

*Prerequisite: MLC101 or MLC201 or MLL111*

*Corequisite: Nil*

*Incompatible with: MLL406*

*Scheduled learning activities – campus: 1 x 3 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour class (recordings provided) and 1 x 1 hour online seminar per week*

### Content

This unit covers legal principles applicable to income taxation in Australia. Topics include: assessable income and deductions; capital gains; trading stock; taxable entities; taxation administration; Fringe Benefits Tax; and Goods and Services Tax.

### Assessment

- Written Assignment (1500 words) – 20%
- Written Assignment (1500 words) – 20%
- Examination (3 hours) – 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MLC302 – Applied Commercial Law Project

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Must have passed five units in MLC203, MLC206, MLC301, MLC305, MLC309, MAA255, MLL344*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour workshop per week*

*Scheduled learning activities – cloud (online): 3-hour workshop (recordings provided) + 1-hour online seminar per week*

### Content

This unit provides an integrative, experiential-based learning experience for students completing the Commercial Law Major in the Bachelor of Commerce. The aim is to enable students to reflect on, further develop and apply the legal concepts and skill acquired throughout the commercial law major in thinking critically about and solving practical contemporary commercial problems. This will be achieved via a team-based project learning environment. Students will also be required to reflect regularly, both individually and jointly, on their progress and achievements throughout the trimester.

*Note: Online teaching methods require internet access.*

### Assessment

- Assessment 1: 20%
  - Reflective Journal 10% – Students will submit a reflective journal in weeks 3, 5, 7 and 9.
  - Project presentation 10% – (Presentation) oral if possible but may also use online streaming for off-campus.
- Assessment 2: 60%
  - Project report Group submission (4000 words)
- Assessment 3: 20%
  - Professional Identity Task – Assessment of the management and effectiveness of the team.

## MLC305 – Business Tax Law

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mark Bowler Smith*

*Cohort rule: Not available for Bachelor of Law students*

*Prerequisite: (MLC101, MLC301) or (MLL111, MLL406)*

*Corequisite: Nil*

*Incompatible with: MLL305*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

This unit provides a detailed coverage of taxation law in relation to taxation planning, avoidance and evasion; capital gains tax; taxation implications of the use of different business structures and superannuation. The topics undertaken may vary depending on developments in the income tax system.

## Assessment

- Written Assignment (Individual) Case study (2500 words) 40%
- Examination (2 hours) 60%

## MLC309 – Employment Law

*Enrolment modes: Not offered in 2019*

*EFTSL value: 0.125*

*Cohort rule: Not available for Bachelor of Law students*

*Prerequisite: MLC101*

*Corequisite: Nil*

*Incompatible with: MLL342*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

The unit aims to develop in students a critical understanding of the legal principles of Australian employment law. The first part of the unit considers the distinction between employees and contractors, the formation of a contract of employment and the mutual rights and obligations under such a contract and rights on termination. The unit then considers occupational health and safety, workers' compensation and equal opportunity in employment. Finally, the unit examines how rights and obligations at work are determined collectively through awards and enterprise bargaining agreements.

## Assessment

- Multiple Choice Questions Test – 20%
- Examination (2 hours) – 80%

## MLC310 – Sport and the Law

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jay Gul*

*Cohort rule: Not available for Bachelor of Law students*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MLL371*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

This unit is designed to give students an understanding of those principles of law which specifically affect sport and its administration. In particular, the unit will focus on the following areas: the legal structures which may be adopted by sporting clubs, the athlete-player relationship; rights of an athlete to negotiate contractual arrangements; liability of sports personnel in contract and tort; drug abuse by athletes and the protection of an athlete from discrimination in its various forms; the protection of an athlete's reputation, name, image and likeness; and finally the sale of broadcasting rights of sporting events.

## Assessment

- Multiple Choice test and problem-based assignment (750 words) – 20%
- Assessment 2 (Group of 3–5) – Research Assignment: Critical Analysis and Reflection/Evaluation (1200 words) – 30%
- Examination (2 hours) – 50%

## MLC703 – Principles of Income Tax Law

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rami Hanegbi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAA790, MLC731*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

The unit aims to familiarise students with the principles underlying the Income Tax Assessment Act (ITAA 1936 and 1997) so that they have the necessary skills to successfully approach and research complex problems involving income tax issues. Topics include: the position and importance of income tax in the range of Commonwealth and state taxes; concepts of income and capital; deductions and exemptions; tax offsets; taxation of capital gains, fringe benefits and trading stock; taxation of companies; dividend imputation; taxation of individuals, partners, trustees and beneficiaries.

## Assessment

- Written Assignment: (3000 words) 40%
- Examination: (3 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MLC707 – Business Law

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Firew Tiba*

*Trimester 3 Unit Chair: Athula Pathinayake*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MLC711, MLC730, MLM720*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

This unit has been designed to the specifications of CPA Australia. It is designed to provide students with basic knowledge of Commercial and Corporations Law so that they can enter CPA Australia's CPA Program.

## Assessment

- Assessment 1 (Group of 3) Research assignment (4000 words) 40%
- Examination (2 hours) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MLC709 – Business Taxation Law and Policy

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mark Bowler Smith*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

This unit provides critical, conceptually informed and detailed coverage of taxation law and policy relating to taxation planning; tax avoidance and evasion; capital gains tax; taxation implications of the use of different business structures and the taxation of superannuation entities and contributions.

## Assessment

- Policy and law based research essay (2000 words) 20%
- Practical taxation legal problem report (2000 words) 20%
- Examination (2 hours) 60%

## MLC710 – Sport and the Law

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jay Gul*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

### Content

The unit aims to allow students to examine those aspects of the law that specifically affect sport management. This unit will focus on the law of sporting groups, liability for sporting injury and damage, sport and media law and marketing. The Competition and Consumer Law Act 2010 as well as other relevant legislation will be studied especially with regard to their implications for professional sport.

### Assessment

- Multiple Choice Test and Problem-based assignment (1000 words) 20%
- Research Assignment (1500 words) 30%
- Case design research portfolio (3000 words) 50%

## MLC713 – Corporate Insolvency Law and Policy

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: For students enrolled in M729: MLJ715.*

*All other students: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour class (recordings provided) and 1 x 2 hour online seminar per week*

### Content

The significance of corporate insolvency laws was emphasised in the aftermath of the global financial crisis when a number of companies were unable to pay their debts and underwent insolvency proceedings. The Australian corporate insolvency law is contained in the Corporations Act 2001. This unit will include a study of the goals of insolvency law in a corporate context; the procedural aspects of the law; corporate insolvency cases and outcomes; Australian laws for cross-border insolvency; and international perspectives on corporate insolvency.

### Assessment

- Research essay (4000 words) 40%
- Examination (2 hours) 60%

## MLH401 – Legal Research Training

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: John Morss*

*Cohort rule: Must be enrolled in M412*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): No compulsory weekly contact. Students will, however, be in contact with their supervisors/advisers on a regular basis throughout the trimester, as agreed between the student and supervisor/adviser.*

### Content

This unit is one of two units required for completion of the LLB (Honours) degree. Students are required to demonstrate advanced knowledge and skills in the application of online and print research resources that relate to case law, legislation, and legal literature, and advanced writing skills that integrate critical thinking and synthetic analysis.

This unit will require students to demonstrate advanced abilities to:

1. Identify substantive legal issues that need to be researched, and to understand the social, political and theoretical contexts in which they are relevant. This requires students to acquire knowledge of the conventions of the Australian and (as relevant) the international legal system; knowledge about the reference sources available for that system; and an understanding of the dynamics that may influence the way the legal research question has been asked.
2. Formulate a research strategy and plan that utilises the variety of print based and electronic resources available, including bibliographic tools. This process is variously referred to in the literature as doctrinal research, library-based research, and bibliographic research.
3. Evaluate the currency, jurisdiction, and authority of the sources used and the material located. This involves a process of interpretation and critical analysis.
4. Synthesise the arguments from the material located by analysing how the cases, statutes, and other materials located fit together, and how the principles distilled from that synthesising process apply to the legal problem to be resolved.

### Assessment

Research Plan (7500 words) – 100%.

## MLH402 – Legal Research Project

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: John Morss*

*Cohort rule: Must be enrolled in M412*

*Prerequisite: MLH401*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: No compulsory weekly contact. Students will however be in contact with their supervisors/advisers on a regular basis throughout the trimester, as agreed between the student and supervisor/adviser.*

### Assessment

Research Project (10,000 words) – 100%.

## MLI714 – Financial Advice Regulation (Intensive)

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: To be confirmed*

*Cohort rule: This unit is only available to students enrolled in N002, M769, M669, M569, M770, M640 and M540*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MLC714, MLM717*

*Scheduled learning activities – cloud (online): Students will be required to access the Unit Site for reading and preparation work which will be available four weeks prior to the commencement of the intensive.*

*Students can expect to spend 130 hours undertaking the learning and assessment activities for this unit. Collaborative learning required both prior to and subsequent to the Intensive.*

*In-person attendance requirements: In addition to the online scheduled learning activities, this intensive unit requires students to attend 3 x 8 hour days of face to face intensive study at: location to be advised*

*Trimester 3 2019 Dates: not offered*

## Content

This unit gives students an advanced and integrated understanding of Financial Advice Regulation in Australia including the relevant sections of Chapter 7 of the Corporations Act 2001 (Cth). A wide range of topics will be covered such as financial crises, financial services and markets, financial services reforms in Australia, Australian Securities and Investments Commission (ASIC), Australian Prudential Regulation Authority (APRA), financial service providers, and financial services disclosure.

*Note: Please enrol by the deadline : [not offered in 2019] as places are limited.*

For further information please email [blres@deakin.edu.au](mailto:blres@deakin.edu.au).

## Assessment

- Assessment 1 Multiple choice quiz 20%
- Assessment 2: Case study (Presentation and written report (Group of 4) (3000 words) 50%
- Assessment 3: Written assessment, Business Report (Individual) (2500 words) 30%

## Hurdle requirement

Student must achieve 80% on the MCQ test and 50% of total available marks.

# MLJ701 – Legal Method and Statutory Interpretation

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Patricia Perlen*

*Trimester 3 Unit Chair: Claudio Bozzi*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2.5h class (recordings provided) + 1.5h online seminar per week*

## Content

This unit aims to equip students with the knowledge and ability to critically evaluate and effectively communicate legal research, method and reasoning. Topics include: the law in practice, law and justice, legal history, the Australian legal system, legal research, statutory interpretation and legal reasoning.

## Assessment

- Case Analysis Exercise (2000 words) – 20%
- Legal Research Exercise – 20%
- Statutory Interpretation Exercise [(5000 words) – 50%, plus Bibliography – 10%]

# MLJ702 – Contract Law and Policy

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jane Kotzmann*

*Trimester 3 Unit Chair: Paul McDonough*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: Nil*

*Corequisite: MLJ701*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2 class (recordings provided) + 2h online seminar (live streamed and recordings provided)*

## Content

This unit aims to equip students with the knowledge and ability to apply and critically evaluate contract law and policy. Topics include: the theoretical foundation for contract law, contractual formation, contractual terms, vitiating factors, contractual performance and termination by agreement, breach of contract, frustration of contract and remedies.

## Assessment

- Student consultation regarding the student's preparation of Assessment Task 2 – 10%
- 3500 word problem-based question/essay – 40%
- Examination (2 hours) – 50%

## MLJ703 – Criminal Law and Policy

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Felicity Gerry*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: Nil*

*Corequisite: MLJ701*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2.5h class (recordings provided) + 1.5h online seminar (live streamed and recordings provided)*

## Content

This unit examines criminal law within its social and historical context, exploring how different conceptions of agency and autonomy have influenced constructions of criminal responsibility as well as the elements of various criminal offences. A number of different offences are covered and attention also is directed at alternative conceptions of these offences (what the law might be, particularly as addressed in contemporary law reform initiatives) as well as what the law currently is. Each topic is considered through an exposition of relevant principles or elements, followed by in-depth discussion of particularly significant law reform initiatives, policy debates and/or historical development.

## Assessment

- Multiple Choice Test – 20%
- Case Study (2000 words) – 20%
- Examination (2 hours) – 60%

## MLJ704 – Torts and Policy

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Neera Bhatia*

*Trimester 3 Unit Chair: Jason Taliadoros*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: Nil*

*Corequisite: MLJ701*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2.5h class (recordings provided) + 1.5h online seminar (live streamed and recordings provided)*

## Content

This unit examines the area of Tort Law in Australia and is divided into two main areas: intentional torts and unintentional torts. In this unit you will explore and critically examine the legal principles, theories and policies that regulate tortious liability. You will also gain a detailed understanding of the laws and principles of negligence that are increasingly receiving legal and public attention.

## Assessment

- Written Assignment (4000 words) – 40%
- Examination (2 hours) – 60%

## MLJ705 – Commercial Law and Policy

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Firew Tiba*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: MLJ701 and MLJ702*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2.5h class (recordings provided) + 1.5h online seminar (live streamed and recordings provided)*

## Content

This unit will assist students to develop a defined level of understanding of areas of law that regulate commercial relationships and facilitate the conduct of commercial activity. Topics include: Agency relationships in commercial dealings; Sale of Goods [Goods Act 1958 (Vic)]; unconscionability, consumer guarantees and unfair contract provisions of the Australian Consumer Law [Competition and Consumer Act 2010 (Cth)]; and Insurance fundamentals [Insurance Contracts Act 1984 (Cth)]. Students will acquire in-depth knowledge by considering how the law aims to strike a balance between competing values, such as freedom of contract, security and certainty of transactions, fairness and consumer protection. Students will also examine contemporary developments both in the law and in professional practice.

## Assessment

- Online Test 10%
- Written Assignment (3000 words) 30%
- Examination (2 hours) – 60%

## MLJ706 – Law and Policy of Misleading Conduct and Product Liability

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sharon Erbacher*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: MLJ701 and MLJ702*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 3h class (recordings provided) + 1.5h online seminar (live streamed and recordings provided)*

## Content

This unit has two major themes: examination of statutory and common law liability for false and misleading statements, and examination of statutory and common law liability for defective products. The unit will examine the principles, theories and policies underlying the laws that regulate liability for false and misleading statements, including the laws of defamation, deceit, injurious falsehood, negligent misstatement and the provisions in the Australian Consumer Law prohibiting false representations and misleading conduct. The principles, theories and policies underlying liability for defective products will also be examined.

## Assessment

- Written Assignment – Case Note (4000 words) – 40%
- Examination (2 hours) – 60%

## MLJ707 – Criminal Procedure and Policy

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Athula Pathinayake*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: MLJ701 and MLJ703*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2h class (recordings provided) + 2h online seminar (live streamed and recordings provided)*

## Content

In modern bureaucratic societies procedural rules and law have great significance. This unit examines criminal procedure law and policy within its social and historical context, exploring how the goals of efficiency and concern for victims have shaped the contemporary law of criminal procedure. The enduring tension in criminal procedure between effective crime investigation and the protection of civil rights is investigated in a number of selected topics, including police powers (arrest, search and seizure, fingerprinting, forensic procedures, questioning) and the supervisory role of courts in protecting the right of an accused to a 'fair trial.' Each topic is considered through an exposition of relevant law, followed by in-depth discussion of particularly significant law reform initiatives, policy debates and/or historical development.

## Assessment

- Oral Presentation – Bail Application (2000 words) – 20%
- Multiple Choice Test – 20%
- Examination (2 hours) – 60%

## MLJ708 – Civil Procedure, Alternative Dispute Resolution and Policy

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Claudio Bozzi*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: Must have successfully completed 5 Law units plus MLJ701, MLJ702 and MLJ704*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2h class (recordings provided) + 2h online seminar (live streamed and recordings provided)*

### Content

This unit aims to equip students with the knowledge and ability to apply, critically evaluate and effectively communicate civil procedure and alternative dispute resolution, and develop a deep appreciation of major policy issues and developments in the law. Topics include: the system of legal justice, commencement of proceedings, service of process, appearance, joinder of claims and parties, pleadings, amendment, discovery, costs, the trial, enforcement and alternative dispute resolution.

### Assessment

- Implementation of procedural rules (4000 words) – 40%
- Examination (2 hours) – 60%

## MLJ709 – Constitutional Law and Policy

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Oscar Roos*

*Cohort rule: For M729 (Juris Doctor) and M737 (Master of Legal Studies) students only*

*Prerequisite: Must have successfully completed 4 Law units plus MLJ701 – for students enrolled in M729 (Juris Doctor). For students enrolled in M737: Nil.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2h class (recordings provided) + 2h online seminar (live streamed and recordings provided)*

### Content

This unit, in the first place, is concerned with providing you with a sound understanding of the fundamental principles of Australian constitutional law, including the rule of law, representative democracy, responsible system of government, the separation of powers and federalism. Subsequently, these principles are relied on for a detailed examination, among other things, of the three branches of Australian government – the court, legislature and the executive. The objective of this evaluation is to provide you with a general conceptual framework for solving issues concerning federal and state constitutional law.

### Assessment

- Assignment/Test (4000 words) – 40%
- Examination (2 hours) – 60%

## MLJ710 – Administrative Law and Policy

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: David Tan*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: MLJ701, MLJ709*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2h class (recordings provided) + 2h online seminar (live streamed and recordings provided)*

### Content

- Assignment (4000 words) – 40%
- Examination (2 hours) – 60%

## MLJ714 – Workplace Law and Policy

*Enrolment modes: Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Matthew Lister*

*Cohort rule: For M729 (Juris Doctor) and M737 (Master of Legal Studies) students only*

*Prerequisite: MLJ701 and MLJ702 – for students enrolled in M729 (Juris Doctor). For students enrolled in M737 (Master of Legal Studies): Nil.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2h class (recordings provided) + 1h online seminar (live streamed and recordings provided) per week*

### Content

This unit aims to equip students with the knowledge and ability to apply, critically evaluate and effectively communicate workplace law, and develop a deep appreciation of major policy issues and developments in the law.

Topics include: defining the employment relationship, rights and responsibilities under an employment contract, employment regulation under the Fair Work Act 2009 (Cth) – An Overview, statutory employment standards, freedom of association, industrial victimisation and industrial action, discrimination and sexual harassment, workplace health and safety, and termination and enforcing workplace rights.

### Assessment

- Research Assignment (6000 words) 60%
- Examination (2 hours) 40%

## MLJ715 – Corporate Law and Policy

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Firew Tiba*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: MLJ701, MLJ702, MLJ703, MLJ704, MLJ711*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2h class (recordings provided) + 2h online seminar (live streamed and recordings provided) per week*

### Content

This unit is designed to provide students with an advanced understanding of the fundamental principles and underlying company law, from the incorporation of companies, issues related to shares and shareholder rights, the internal corporate governance of companies, external administration of companies and the significant role of the Australian Securities and Investments Commission (ASIC) and the fundamental policies related to the disqualification of directors, continuous disclosure and its policy to whistle blowing. Particular emphasis is placed on the role and impact of companies in the modern society and the contemporary expectation that companies should be responsible citizens. Broader and fundamental theories of company law will be explored and compared, including the shareholder primacy theory, the enlighten shareholder value theory, the stakeholder theory and the director primary theory – all fundamental and complex corporate law debates that have not yet been resolved satisfactorily, but which are currently underpinned by a significant body of scholarly work and government reports in Australia and internationally.

### Assessment

- Essay and/or problem-based Research Assignment (3000 words) – 40 %
- Examination (2 hours) – 60%

## MLJ716 – Land Law and Policy

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Pieter Badenhorst*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: MLJ701, MLJ711*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2h class (recordings provided) + 2h online seminar (live streamed and recordings provided) per week*

## Content

This unit aims to equip students with the knowledge and ability to apply, critically evaluate and effectively communicate land law, and develop a deep appreciation of major policy issues and developments in the law. Topics include: concurrent interests in land, priorities in general land law, Torrens system of land registration, indefeasibility of title, statutory exceptions to indefeasibility, non-statutory exceptions to indefeasibility, disputes involving unregistered interests, paramount interests, and assurance funds.

- Assessment 3 – 50%
  - 3a: Written Court Submission (1500–2000 words) 35%
  - 3b: Oral Argument (5 minute student recording) 10%
  - 3c: Reflective Written Work (500 words) 5%

## Hurdle requirement

Perform mid-trimester negotiation by assigned date and submit all assessment items.

## MLJ722 – International Commercial Law and Policy

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Claudio Bozzi*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: MLJ701, MLJ702 and MLJ705*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2h class (recordings provided) + 1.5h online seminar (live streamed and recordings provided) per week*

### Content

This unit will provide an advanced perspective on a number of contractual, regulatory and professional issues arising from private transnational commercial transactions involving parties operating in two or more different foreign jurisdictions. It will equip students with expert knowledge of substantive topics covered in this unit and key professional skills enabling them solve complex practical international commercial law problems.

### Assessment

- Problem-based Research Assignment (4000 words) – 40%
- Examination (2 hours) – 60%

## MLJ723 – Taxation Law and Policy

*Enrolment modes: Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Karen Powell*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: Must have successfully completed 4 MLJ coded units, plus MLJ701 and MLJ702*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 2h class (recordings provided) + 1.5h online seminar (live streamed and recordings provided) per week*

### Content

Taxation is a particularly important area of government activity. It impacts upon the directions and efficiency of the economy and ultimately affects the distribution of income in society and provides parameters within which government spending programs can be maintained. Tax planning, tax avoidance and tax fraud activities of taxpayers in today's economic environment have a significant impact on the way in which tax laws are currently shaped and also in their continuing development. This unit aims to develop a high level of understanding of the principles of public finance which inform the selection and framing of taxation laws, including the importance of direct and indirect taxes. Given that income taxation is an area with the greatest amount of legislation and legislative change, the greatest amount of reported decisions and the greatest number of administrative rulings, this unit examines in detail the legislative provisions of the Commonwealth income tax laws.

### Assessment

- Research Assignment (4000 words) – 40%
- Examination (2 hours) – 60%

## MLJ724 – Mergers and Acquisitions

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Corequisite: MLJ714*

*Incompatible with: Nil*

*In-person attendance requirements: Students must attend the clinic on the clinic open days. Attendance is compulsory for students to pass the unit.*

*Week 1–12 hours (2 x 6 hour days – Tuesday and Friday):*

*Day 1 – Induction; Day 2 – Overview of key legal topics under Employment Law.*

*Weeks 2–11 – Clinical work – 14.5 hours per week (2 x 7.25 hour days – Tuesday and Friday):*

*Weekly – attend clinic during the two open days each week, meet with clients, prepare documents and advice, review matters and proposed strategies with supervising lawyer.*

## Content

The Employment Law Clinic focuses on rights in the workplace, with a particular emphasis on the federal laws governing the employer/employee relationship and state and federal laws that prohibit discrimination. The unit will address issues such as the formation of an employment or independent contractor relationship, rights and obligations during the relationship and the termination of a relationship and may also address issues such as employment benefits, wage and hour claims, severance negotiations, union issues, workplace safety, and more.

Students work in an office environment using professional matter management systems, deal with clients, research and provide strategic legal solutions, and engage with various parties including clients, parties on the other side as well as supervisors and colleagues.

The Employment Law Clinic provides legal services over a range of legal issues in the area of Employment Law to give students professional experiences touching the key types of legal problems, parties, decision makers and tribunals that will give students an insight into the diversity and complexity of legal practice in the area of employment law.

The skills learnt in this unit will be useful for students who wish to practice law (particularly employment law), along with students interested in policy, government and social justice career pathways. The Clinic develops employment ready skills and gives students the opportunity to critically look at the legal systems and the opportunities to engage in law reform in the employment law domain.

*Note: Places are limited. For application procedures, please refer to the Work Integrated Learning website for further details. Students will need to attend classes at Deakin Downtown, Collins Square, 727 Collins Street in Melbourne City. Attendance is compulsory for students to pass the unit.*

## Assessment

- Practical assessment – 60%
- Written professional reflection (2000 words) – 20%
- Legal writing assessment (2000 words) – 20%

## Hurdle requirement

Minimum attendance with no more than one day absent on clinic days.

## MLJ726 – Family Law Clinic

*Enrolment modes:*

*Trimester 1: Deakin Downtown*

*Trimester 2: Deakin Downtown*

*Trimester 3: Deakin Downtown*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Syd Balachandran*

*Trimester 2 Unit Chair: Syd Balachandran*

*Trimester 3 Unit Chair: Syd Balachandran*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: Successful completion of 7 core units, plus MLJ702*

*Corequisite: MLJ712*

*Incompatible with: Nil*

*In-person attendance requirements: Students must attend the clinic on the clinic open days. Attendance is compulsory for students to pass the unit.*

*Week 1–12 hours (2 x 6 hour days, Monday and Wednesday): Day 1 – Induction; Day 2 – Overview of key legal topics under Family Law.*

*Weeks 2–11 – Clinical work – 14.5 hours per week (2 x 7.25 hour days – Monday and Wednesday).*

## Content

The Family Law Clinic offers family law assistance to community members, while at the same time providing legal students the opportunity to gain invaluable practical experience. The Family Law Clinic will provide assistance and exposure to matters relating to divorce, parenting orders, property, family violence orders and assistance for orders reached by consent.

Students work in an office environment using professional matter management systems, deal with clients, research and provide strategic legal solutions, and engage with various parties including clients, parties on the other side as well as supervisors and colleagues.

The Family Law Clinic provides legal services over a range of legal issues in the area of Family Law to give students professional experiences touching on the key types of legal problems, parties, decision makers and courts that will give students an insight into the diversity and complexity of legal practice in the area of family law.

The skills learnt in this unit will be useful for students who wish to practice law (particularly family law), along with students interested in policy, government and social justice career pathways. Students will manage their own legal matters under supervision of Clinic supervisors and specialist legal practitioners from initial client intake and interview to final outcome and closing of file (subject to Clinic time limits). Students will develop professional skills through the challenge of applying theoretical legal knowledge to real world clients in order to develop strategic legal solutions that meet client needs.

The Clinic develops employment ready skills and gives students the opportunity to critically look at the legal systems and the opportunities to engage in law reform.

*Note: Places are limited. For application procedures, please refer to the Work Integrated Learning website for further details.*

Students will need to attend classes at Deakin Downtown, Collins Square, 727 Collins Street in Melbourne City. Attendance is compulsory for students to pass the unit.

## Assessment

- Practical assessment – 60%
- Written reflection (2000 words) – 20%
- Assessment of legal writing – 20%

## Content

Students undertake a practical placement in the specialist Deakin Criminal Law Clinic ('the Clinic') based at the Deakin Downtown offices in the Melbourne CBD. The unit takes place in an environment which replicates a small to medium sized criminal defence firm. The Clinic provides services to clients who have been charged with summary or indictable offences. The Clinic also undertakes appeal work in appropriate cases.

Under the supervision of qualified specialist solicitors, students will be engaged in the criminal law process from commencement to conclusion. This includes providing legal advice to clients, undertake ongoing casework, undertaking legal research in relation to appeals, briefing counsel, and in appropriate cases, appearing for clients in court and or instructing counsel who appear for clients in court. Students also attend court, on a designated day to observe practitioners. Observing other members of the profession at work is a critical part of this learning experience.

By undertaking this unit, students acquire a diverse range of practical legal skills including: the capacity to undertake legal research and apply legal research to factual scenarios; the ability to synthesise professional, technical and ethical knowledge acquired in the law degree and apply it in a practical legal context; skills in critical thinking and legal judgment; the capacity to independently devise legal solutions for complex legal problems; and the capacity to identify and respond to ethical, moral and professional dilemmas in legal practice.

Students also develop an appreciation of social justice issues and have a heightened awareness of the operation of the criminal justice system, law reform needs and policy issues which face courts and criminal lawyers. The skills developed in this unit will be useful for students who wish to practice law (especially criminal law), along with students interested in policy, government and social justice career pathways

*Note: Places are limited. For application procedures, please refer to the Work Integrated Learning website for further details.*

Students will need to attend classes at Deakin Downtown, Collins Square, 727 Collins Street in Melbourne City. Attendance is compulsory for students to pass the unit.

*Topic: Indigenous Land Rights: From Terra Nullius to Mabo to Statutory Regimes to Treaty Talk*

## Content

This unit is explicitly intended to extend skills and knowledge developed in core subjects studied in the law curriculum by exploring key contemporary issues in a selected area of law. This is done with a lens provided by an externally recognised expert in the field. The Unit will focus on a specialist area while simultaneously investigating the wider implications for other areas. Students will analyse specific legal issues and controversies within the particular selected area, taking into account social attitudes, institutional practices, relevant laws and legal processes. (The specialist area that forms the subject of this unit will vary annually. Specific details will be identified by DLS and notified to students as these become known and prior to enrolment being made available). The essential focus of the Unit will be to reflect on issues of legal principle relating to specific emerging issues and controversies and to develop forward-thinking strategies and solutions to address emerging law and public policy issues.

- Trimester 2/2019 special topic: Modern Slavery: Corporate Responsibility, Organised Crime and Cyberlinkages
- Trimester 3/2019 special topic: Indigenous Land Rights: From Terra Nullius to Mabo to Statutory Regimes to Treaty Talk

*Note: Trimester 3: If enrolment quota is met, please email [buslaw@deakin.edu.au](mailto:buslaw@deakin.edu.au).*

## Assessment

- Assessment 1 (Individual) – pre-class 3-minute video recording – 15%.
- Proposal for written assignment (500 words) – 25%
- Written assignment (4000 words) – 60%

## Hurdle requirement

Completion and submission of the 3-minute video recording.

## MLJ729 – Contemporary International Legal Challenges (Intensive)

*Enrolment modes: Trimester 3 – Burwood (Melbourne) Intensive*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Felicity Gerry*

*Cohort rule: For students in M729 Juris Doctor and M726 Master of Laws only*

*Prerequisite: M729 students – must have completed 8 law units. M726 students – must have completed 4 law units.*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: 30 contact hours: 6 contact hours per day (2 x 1-hour classes and 2 x 2-hour seminars) for 5 days.*

*Trimester 3 2019 Burwood Intensive dates: 20th–24th January 2020.*

*Topic: International Climate Change Litigation with a focus on Corporate Responsibility and the Environmental and Community Rights impacts of deforestation.*

*Students will have the opportunity to do the following:*

- *Assess the prospects of litigation in a case, to include Constitutional and Corporate challenges.*
- *Consider policy and legislative change in relation to deforestation and climate change more generally.*
- *Ways to use international law to drive protection of forests, species and human rights.*

### Content

This unit as with MLJ728 Contemporary Legal Issues, is explicitly intended to extend skills and knowledge, developed in core subjects studied in the law curriculum, by exploring key contemporary issues in a selected area of law. This is done with a lens provided by an externally recognised expert in the field. The unit will focus on a specialist area while simultaneously investigating the wider implications for other areas. Students will analyse specific legal issues and controversies within the selected area, taking into account social attitudes, institutional practices, relevant laws and legal processes. (The specialist area that forms the subject of this unit will vary annually. Specific details will be identified by DLS and notified to students as these become known and prior to enrolment being made available). The essential focus of the unit will be to reflect on issues of legal principle relating to specific emerging issues and controversies and to develop forward-thinking strategies and solutions to address emerging law and public policy issues.

### Assessment

- Assessment 1 (Individual) – Video recording (3 mins) – 15%
- Essay Proposal (500 words) – 25%
- Assessment 3 (Individual) – Essay (4000 words) – 60%

### Hurdle requirement

Completion and submission of the 3-minute video recording prior to the commencement of the course.

## MLJ730 – Migration and Refugee Law and Policy

*Enrolment modes: Not offered in 2019*

*Trimester 3 Unit Chair: Matthew Lister*

*Cohort rule: For M729 (Juris Doctor) students only*

*Prerequisite: MLJ701 plus 3 credit points of MLJ coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 3 hour online class per week (recordings provided) plus 1 x 1 hour online e-seminar per week (streamed live and recordings provided)*

### Content

The unit aims to provide students with an understanding of migration law. The unit analyses the substantive and procedural rules and principles governing this area of law, and discusses policy considerations behind them, equipping students with the basic background needed to work in the area, as well as providing useful skills in statutory interpretation for students who wish to work in workplace or employment law, family law, and several areas of public policy, as well as providing necessary background awareness as to where immigration issues arise in these areas of law, as they regularly will in a cosmopolitan society such as Australia.

### Assessment

- Assessment Task 1 (Individual): Assignment (3000 words) 50%
- Examination: (2 hours) 50%

## MLL110 – Legal Research and Statutory Interpretation

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Daniel Goldsworthy*

*Trimester 2 Unit Chair: Oscar Roos*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Cloud Provided Learning Material (1.5 hours) plus 2 hour seminar per week plus 1 x 2 hour large group interactive learning experience (Weeks 4 and 5)*

*Scheduled learning activities – cloud (online): Cloud Provided Learning Material (1.5 hours) plus 2 hour Cloud seminar (live streamed and recording provided) per week plus 1 x 2 hour large group interactive learning experience (live streamed and recordings provided) (Weeks 4 and 5)*

### Content

MLL110 aims to equip students with legal knowledge and skills which will form the foundation of their legal education. Topics include: legal research skills, legal reasoning, the common law, legislation, statutory interpretation and the evolution of the Australian legal system.

*Note: It is highly recommended that LLB students study this unit in their first trimester.*

### Assessment

- Case Analysis (1000 words) – 20%
- Assessment 2 30% total:
  - Cloud (online) Legal Research test – 20 %; and
  - citation exercise – 10%
- Assessment 3 (Group of 4–5, 3000 words) – Statutory Interpretation Exercise 50% total:
  - Team exercise (2000 words) – 30%; and
  - Individual preparation of learning contract and student reflection (1000 words) – 20%

## MLL111 – Contract

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Athula Pathinayake*

*Trimester 2 Unit Chair: Gabrielle Wolf*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Nil*

*Corequisite: Students enrolled before 2019: MLL110*

*Students commencing from 2019: MLL110 and MLL113*

*Incompatible with: MLC101*

*Scheduled learning activities – campus:*

*For Trimester 1, 2019: 1 x 3 hour Class and 1 x 1 hour seminar per week*

*From Trimester 2, 2019: Cloud Provided Learning Material (including 2 hour recording) and 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online):*

*For Trimester 1, 2019: 1 x 3 hour class (recordings provided) and 1 x 1 hour online seminar per week*

*From Trimester 2, 2019: Cloud Provided Learning Material (including 2 hour recording) and 1 x 2 hour Cloud seminar (live streamed and recording provided) per week*

### Content

The unit involves a study of the general principles of Contract Law. Students will develop an understanding of the importance of Contract Law in commercial life and private settings, and how contract-related problems may be approached and resolved. Students will be exposed to the policy issues raised by Contract Law. Topics include the nature, development and theory of Contract Law; contract formation; contractual terms and their interpretation; vitiating factors; termination of contracts and remedies.

### Assessment

- Multiple Choice Test – 10%
- Memo of Advice (2000 words) – 30%
- Assessment 3 – Examination (2 hours) – 60%

## MLL113 – Legal Communication and Ethical Decision Making

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kelly Green*

*Trimester 2 Unit Chair: Kelly Green*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Nil*

*Corequisite: MLL110*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Cloud Provided Learning Material (1.5 hours) plus 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Cloud Provided Learning Material (1.5 hours) plus 2 hour Cloud seminar (live streamed and recording provided) per week*

### Content

The unit aims to enable students to develop a number of important skills which are essential to success in both law studies and in legal practice, including: communication skills, legal analysis and problem-solving skills, legal research skills and legal referencing skills. Students will develop oral (including advocacy) skills, listening skills (e.g. the ability to deduce salient factors from provided information), written skills and an understanding of the importance of context in relation to communications.

Students will also develop the vital skill of applying the IRAC method to legal problems, further their research ability (crucial to success at law school and in practice), and practice referencing in accordance with the Australian Guide to Legal Citation (4th ed).

*Note: For Commencing Students from Trimester 1 2019.*

### Assessment

- Assessment 1: (Individual) – Written assignment on ethical decision making (2000 words) – 30%
- Assessment 2: (Individual) – Interview and supervisor brief (2000 words) – 30%
- Assessment 3: (Individual) – Letter of Advice to Client (2500 words) – 40%

## MLL114 – Criminal Law

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL214*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nicole Siller*

*Trimester 2 Unit Chair: Nicole Siller*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Nil*

*Corequisite: Students enrolled before 2019: MLL110*

*Students commencing from 2019: MLL110 and MLL113*

*Incompatible with: MLL214, MLP233*

*Scheduled learning activities – campus: Cloud Provided Learning Material (including 1 hour recording); 1 x 1.5 hour large group interactive learning experience; and 1 x 1.5 hour seminar per week*

*Scheduled learning activities – cloud (online): Cloud Provided Learning Material (including 1h recording) + 1.5h large group interactive learning experience (live streamed and recording provided) + 1.5h seminar (live streamed and recording provided) per week*

### Content

The unit aims to introduce students to the basic principles of criminal law and current theories concerning the nature and purpose of criminal liability and punishment. Students will also be required to examine the principal criminal offences and the defences to those offences. Topics include: definition of crime; nature and purpose of the criminal law; the role and utility of criminal law and punishment; elements of criminal liability; participants in criminal activity; attempt, homicide and other offences against the person; property offences; and defences to liability.

### Assessment

- Assessment 1 Written Assignment Action Plan 10%
- Assessment 2 Written Assignment (Problem Question) 2000–3000 words 35%
- Examination 2 hours 55%

## MLL117 – Misleading Conduct and Economic Torts

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL107, MLL217*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sharon Erbacher*

*Trimester 3 Unit Chair: Monica Hope*

*Cohort rule: For Bachelor of Laws students only*

*Prerequisite: Nil*

*Corequisite: MLL111*

*Incompatible with: MLL217*

*Scheduled learning activities – campus: Cloud Provided Learning Material (including 2 hour recording) and 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Cloud Provided Learning Material (including 2 hour recording) and 1 x 2 hour Cloud seminar (live streamed and recording provided) per week*

### Content

The subject material covered in this unit falls into three main categories: tortious liability for false statements, including the tort of defamation and injurious falsehood; statutory prohibitions on misleading or deceptive conduct and other false representations in the Competition and Consumer Act 2010; and the product liability of manufacturers under the common law and under the Competition and Consumer Act 2010.

### Assessment

- Written Assignment (1500 words) – 25%
- Examination (2 hours) – 75%

#### From Trimester 2 2019

- Problem Based Written Assignment (1500 words) – 25%
- Case analysis (1500 words) – 25%
- Examination (2 hours) – 50%

## MLL210 – Family Law

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL408*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Paul McDonough*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Students enrolled before 2019: MLL110*

*Students commencing from 2019: MLL110 and MLL113*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

### Content

This unit will examine the legal relationships arising out of the family as a legal and social institution. The syllabus includes: a study of society and the family; the Commonwealth constitution, and the impact it has on the Family Law Act 1975 (Cwlth); the jurisdiction of the Family Court; the legal rules which govern marriage; divorce and other forms of principal relief; the responsibility of parents and the Family Court to make decisions 'in the best interests' of a child; the division of property upon marriage breakdown; spousal maintenance; the child support assessment scheme (briefly); financial disputes between domestic partners under Federal law; and from a sociological and legal framework, violence within a family.

### Assessment

- Assignment 1 (Individual) 3000 words 40%
- Assignment 2 (Individual) 5000 words 60%

## MLL213 – Torts

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)

Trimester 3: Burwood (Melbourne), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Neera Bhatia

Trimester 3 Unit Chair: Jason Taliadoros

Cohort rule: (For Bachelor of Laws students only)

Prerequisite: Nil

Corequisite: Students enrolled before 2019: MLL110

Students commencing from 2019: MLL110 and MLL113

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 3 hour class and 1 x 1 hour seminar per week

From Trimester 3 2019: Cloud Provided Learning Material (including 1 x 2 hour recording) and 1 x 2 hour seminar per week

Scheduled learning activities – cloud (online): 3h class (recordings provided) + 1h online seminar per week

From Trimester 3 2019: Cloud Provided Learning Material (including 2h recording) + 2h Cloud seminar (live streamed and recording provided) per week

### Content

The unit introduces students to the major areas of tort law. It is intended to convey an appreciation of the principles and policies involved in tort law and to study those areas of tort law which are most commonly relied upon in practice. The unit covers both common law principles and the statutory tort reforms. The syllabus includes an introduction to the nature and range of tort liability; intentional interference to the person and land (battery, false imprisonment, assault, trespass to land, and the tort of intentional infliction of harm), and defences; negligence; nuisance; breach of statutory duty; vicarious liability; actions arising out of the death of another person; and remedies, in particular damages. The negligence component will cover a wide range of negligence claims, with a focus on claims for personal injury (including psychiatric injury), and deal with the elements of negligence, causation, contribution, proportionate liability, and defences.

### Assessment

- Problem-based Written Assessment (2500 words) – 40%
- Examination (2 hours) – 60%

## MLL215 – Commercial Law

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Cloud (online)

Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Firew Tiba

Trimester 2 Unit Chair: Firew Tiba

Cohort rule: (For Bachelor of Laws students only)

Prerequisite: MLL111

Corequisite: Nil

Incompatible with: MLC102

Scheduled learning activities – campus: 1 x 3 hour class and 1 x 1 hour seminar per week

Scheduled learning activities – cloud (online): 1 x 3 hour class (recordings provided) and 1 x 1 hour online seminar per week

### Content

The unit aims to introduce students to areas of law which, together with contract, regulate commercial relationships and facilitate the conduct of various commercial transactions. Topics include:

- Agency (creation and forms of agency, authority, principal's relationship with third parties, agent's relationship with third party, relationship between principal and agent, termination);
- Supply of goods within Australia (contract for sale of goods versus contract for work and materials supplied, passing of property, implied terms; Good Act 1958 (Vic));
- The unconscionability provisions, unfair contract terms and consumer guarantees regimes in Schedule 2 of the Competition and Consumer Act 2010 (Cth) (the Australian Consumer Law); and
- Insurance (nature and types of insurance, insurable interest, Insurance Contracts Act 1984).

### Assessment

- Assessment 1 (Individual): Written Assignment- 25%
- Examination (2 hours) – 75%

### From Trimester 2 2019

- Assessment 1 (Individual): Online Multiple Choice Quiz – 10%
- Problem-based Research Paper (2000 words) – 30%
- Examination (2 hours) – 60%

## MLL218 – Criminal Procedure

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Brienna Bagaric*

*Trimester 2 Unit Chair: Antje Kreutzmann-Gallasch*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Nil*

*Corequisite: MLL114 (previously coded MLL214)*

*Incompatible with: MLP233*

*Scheduled learning activities – campus: 1 x 3 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour class (recordings provided) and 1 x 1 hour online seminar per week*

### Content

The unit aims to provide students with a practical understanding of the criminal justice system. Students will be expected to become familiar with the statutes and case law shaping the law of criminal procedure. Students will also be encouraged to consider the adequacy of our procedural laws and whether reform is appropriate. The unit examines: courts exercising criminal jurisdiction; the commencement of criminal proceedings; bail; search, seizure and forensic procedures; police questioning; identification evidence; the role of the DPP, Crown Solicitor and Counsel and Police in the prosecution of offences; the accused's pleadings and the jury system.

### Assessment

- 2 Part Bail Application – 40% total
  - Part A: Oral Presentation (4 minutes) – 20%
  - Part B: Written Submission (1000 words) – 20%
- Examination (2 hours) – 60%

## MLL225 – Personal Injuries Compensation Schemes

*Enrolment modes: Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL315*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Jason Taliadoros*

*Prerequisite: MLL213*

*Corequisite: Nil*

*Incompatible with: MLL315*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 2 hour class (recordings provided) and 1 hour online seminar per week*

### Content

This unit aims to introduce students to personal injuries compensation schemes available in Victoria for workplace and transport accidents, namely the Workplace Injury Rehabilitation and Compensation Act 2013 (Vic) (formerly the Accident Compensation Act 1985 (Vic)) and the Transport Accident Act 1986 (Vic). These schemes govern a large and ever-growing area of litigation and alternative dispute resolution practice and, accordingly, a knowledge of the operation of these schemes is necessary for legal practitioners to properly advise clients on their rights and remedies or liabilities. This unit will provide students with a sound understanding of the relevant legislation, particularly regarding entitlements to no-fault compensation benefits and common law relief.

### Assessment

- Written assignment (3000 words) 40%
- Examination 2 hours 60%

## MLL227 – Superannuation Law

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL317*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rami Hanegbi*

*Cohort rule: Must be enrolled in D312, D322, D323, D327, D331, D335, D367, D396, M312, M313.*

*Prerequisite: Students enrolled before 2019: MLL110*

*Students commencing from 2019: MLL110 and MLL113*

*Corequisite: Nil*

*Incompatible with: MLL317*

*Scheduled learning activities – campus: 1 x 2 hour class + 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

### Content

Due to its mandatory nature and the ageing of the population the superannuation sector is an increasingly important part of the economy. This unit aims to give students a broad and practical understanding of the important aspects of superannuation law. This includes giving students an understanding of the different type of superannuation funds, as well as many of the important rules regarding setting up and running complying superannuation funds. Some of the important issues that specifically affect the growing Self Managed Superannuation Fund (SMSF) sector will also be covered.

### Assessment

- Test 20%
- Written assignment 1500 words 20%
- Examination 2 hours 60%

## MLL228 – Alternative Dispute Resolution: Principles and Practice

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL328*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Nuannuan Lin*

*Prerequisite: MLL213*

*Corequisite: Nil*

*Incompatible with: MLL328*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

### Content

There has been an exponential developments of Alternative Dispute Resolution (ADR) programs both inside and outside the courts in Australia over the last three decades. As a growing number of clients choose to settle their disputes outside of the courtroom, it is becoming increasingly critical for contemporary lawyers to understand how ADR works, what areas it covers, and how it can be used more effectively. This unit on Alternative Dispute Resolution is the study of alternatives to court adjudication. This unit provides a broad overview of legal issues relevant to negotiators, mediators, arbitrators, and policy makers. It is designed to provide an in-depth examination of the legal issues surrounding ADR. This unit focuses on the primary processes of ADR, namely: negotiation, mediation, arbitration (including domestic and international commercial arbitration) and hybrid procedures.

The unit covers a wide range of topics, including theories of conflict resolution, multi-door approach to dispute resolution, principles and characteristics of ADR, the negotiation process, neutrality and impartiality of mediator, international commercial arbitration, ADR in family conflicts, restorative justice programs, and confidentiality and admissibility in ADR processes.

### Assessment

- Policy-based Research Paper (3000 words) – 40%
- Examination (open book) – 2 hours – 60%

## MLL235 – Legal Practice and Ethics

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL335*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Tamsin Paige*

*Trimester 3 Unit Chair: Kim Teh*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: MLL111*

*Corequisite: Nil*

*Incompatible with: MLL335*

*Scheduled learning activities – campus: 1 x 3 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 3h class (recordings provided) + 1h online seminar per week*

### Content

The unit introduces students to the practice of law and to the ethical obligations they will assume upon becoming lawyers. Topics include: the history and organisation of the Victorian legal profession; current trends in professional practice; professional responsibility and liability; introduction to ethics and ethical concepts; legal ethics and the duties owed by lawyers to the law, to their clients, to the Court and to each other; statutory regulation of the legal profession; and trust accounting.

### Assessment

- Assessment 1 (Individual), Written assignment, 2500–3000 words, 40%
- Examination, 2 hours, 60%

## MLL244 – Chinese Commercial Law

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*Previously coded as: MLL344*

*EFTSL value: 0.125*

*Prerequisite: Students commencing M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MLC101 or MLL111.*

*Students enrolled in M312, D312, D322, D323, D331, D335, D396 before 2019: MLL110*

*Students commencing M312, D312, D322, D323, D331, D335, D396 from 2019: MLL110 and MLL113*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin*

### Content

The unit aims to enable students to develop an understanding of the Chinese legal system and its relationship to Chinese history and culture as well as to develop an awareness of Chinese commercial law in the context of foreign trade and investment. The unit covers China's legal history and current legal system, law of contract, law of joint ventures and 100% foreign-owned enterprises, foreign trade law, protection of foreign intellectual property, banking and foreign exchange controls related to FIE's, labour and employment issues in foreign investment enterprises and dispute resolution.

### Assessment

- Written Assignment 3000 words 40%
- Examination 2 hours 60%

## MLL277 – International Law

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL377*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Morss*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Students enrolled before 2019: MLL110*

*Students commencing from 2019: MLL110 and MLL113*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

### Content

The nature, principles, structure and institutions of public international law are studied to enable students to develop an understanding of past and current issues concerning international affairs from an international law perspective. Topics include: the history, nature, sources, and subjects of international law; jurisdictions and immunity; creation and recognition of states and governments; the United Nations and International Court of Justice; human rights; refugees and the use of force.

### Assessment

- Research Essay on individual topic to be approved by Unit Chair; completed and graded in stages with feedback – 40%
- Examination (2 hours) – 60%

## MLL282 – Indian Law

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*Previously coded as: MLL382*

*EFTSL value: 0.125*

*Prerequisite: MLC101*

*Prerequisite for M312 students: Nil*

*Corequisite: Nil*

*Incompatible with: MLL382*

*In-person attendance requirements: This unit requires students to attend a supervised study tour*

### Content

This unit has two principal aims. First, to introduce the current Indian legal system and, second, to study in detail some aspects of Indian commercial law, particularly law in relation to commercial transactions in India. The unit introduces Indian legal history and India's law-making mechanisms and then examines in more detail some key topics in Indian commercial law. After having completed the unit, you should have an understanding of both the underlying principles of the legal system, and Indian Commercial Law. Furthermore, you will have some exposure to the particular rules or principles which affect commercial transactions with India. The unit is designed to maximise the benefits to be gained from the study tour in India, drawing on the expertise available at the Indian institutions.

### Assessment

- Written Session reviews (500 words per review), class presentations and participation in cultural and social events, 20%
- Assessment 2 (Individual) – Written Assignment (Reflective Journal) 2500 words, 30%
- Assessment 3 (Group of 3 students) – Written Assignment 5000 words, 50%

## MLL301 – International Litigation and Dispute Settlement – Jessup Moot

*Enrolment modes: To be advised*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: To be advised*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: No set class schedule, team members will be required to meet regularly with each other and with the Coordinator.*

### Content

The aim of the unit is to give students a basic understanding of the way international agreements and disputes are interpreted and resolved. Jessup Moot students will be introduced to the way international disputes between states are litigated. Topics include: choice of law issues and choice of law clauses; choice of forum rules; selecting the forum; service of international process; restraining foreign actions; executing judgments internationally.

The Philip C. Jessup International Law Moot Competition is the most prestigious moot competition in the world. Mooting generally consists of a mock trial between two opposing parties. In a moot students prepare as advocates for a trial. A moot normally consists of written submissions and oral advocacy.

The Jessup Moot consists of writing two 50 page memorials, learning the basic principles of public international law, learning the Jessup Moot and rules, training for the Jessup Moots and competing at Jessup.

*Note: Quota applies; Enrolment by application to the Unit Chair only. Online teaching methods require internet access.*

### Assessment

- Written Assignment (Memoranda 1) (Group) 25%
- Written Assignment (Memoranda 2) (Group) 25%
- Presentation (Oral) 25%
- Assignment (Contribution to Teamwork) 25%

## MLL318 – Corporate Insolvency Law

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Abdullah Alajlan*

*Previously: Insolvency*

*Prerequisite: MLL110, MLL111, MLL213, MLL218, MLL214, MLL215, MLL331*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

### Content

When businesses are unable to pay their debts, there are significant legal consequences for parties connected with the business. This unit examines the meaning and nature of insolvency. It examines the potential consequences of insolvency for the individuals who ran the business and the rights and obligations of employees, creditors (including the Australian Taxation Office) and other parties linked to the business or its officers. The unit also explores the process leading to insolvency; other options that may be available to businesses in financial difficulty and the role of administrators and liquidators.

### Assessment

- Written assignment (group of 2 students, 3000 words) 40%
- Examination 2 hours 60%

## MLL319 – Sentencing Law and Practice

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Theo Alexander*

*Prerequisite: MLL214, MLL218*

*Corequisite: Nil*

*Incompatible with: MLP301*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

### Content

Sentencing outcomes are delivered in approximately 400 000 cases per year throughout Australia. The law in this area is complex and changes rapidly as a result of developments in criminological research and community expectations. This unit will provide students with an understanding of sentencing law principles and practices across Australia.

### Assessment

- Research Assignment 2000 words 40%
- Examination 2 hours 60%

## MLL323 – Constitutional Law

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Oscar Roos*

*Trimester 3 Unit Chair: David Tan*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Students enrolled before 2019: Successful completion of MLL110 plus 5 additional Law (MLL) units. Students commencing from 2019: Successful completion MLL110 and MLL113 plus 5 additional Law (MLL) units.*  
*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

The unit aims to provide students with an introduction to the principles of constitutional law at the state and federal levels, an elaborate study of the Commonwealth Parliament's powers and federalism and the interrelationship between jurisdiction and judicial review and questions of Commonwealth – state relationships.

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 3h class (recordings provided) + 1h online seminar per week*

## Content

The unit aims to provide students with a sound grasp of the concept of property and proprietary interests in relation to both real and personal property. The unit will also act as an introduction to MLL325 Land Law and to aspects of the law relating to personal and intellectual property. The syllabus includes the concepts of property, possession, possession and title; fragmentation of proprietary interests; acquisition and enforcement of interests in property; personal property; transfer; legal and equitable remedies in relation to property; security interests in personal property, introduction to intellectual property.

## Assessment

- Multiple Choice test – 20%
- Assessment 2 (Individual or Group of 2) – Research Paper (1500 words) – 20%
- Examination (2 hours) – 60%

## MLL329 – Financial Services Regulation

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL229*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Zehra Kavame Eroglu*

*Prerequisite: Students enrolled in M312, D312, D322, D323, D331, D335, D396 before 2019: MLL110.*

*Students commencing M312, D312, D322, D323, D331, D335, D396 from 2019: MLL110 and MLL113.*

*All other students: Nil*

*Corequisite: Nil*

*Incompatible with: MLL229*

*Scheduled learning activities – campus: 2 hour class plus 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 2 hour class (recordings provided) plus 1 hour online seminar per week*

### Content

This unit is designed to provide a broad overview of legal and policy issues relevant to lawyers, financial sector players, regulators, and policy makers. Financial services is one of the fastest growing sectors in the Australian and global economy. In the past decade, the global financial crisis has created new challenges for financial market participants and other stakeholders. Australia has accordingly developed a new regime to regulate all financial services. These developments require careful examination of the legal and policy issues associated with financial services regulation. This unit aims to equip students with a thorough understanding of the regulatory theories, regulatory institutions and relevant statutory provisions.

A wide range of topics will be covered, including global financial crisis in the 21st century, financial services and market, theories of financial regulation, financial services reforms in Australia, regulatory bodies and financial service providers, disclosure of financial and non-financial information, and the critical issues of compliance, enforcement, and remedies.

### Assessment

- Policy-based Research Paper (3000 words) – 40%
- Examination (open book) – 2 hours – 60%

## MLL330 – Health Law

*Enrolment modes: Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Neera Bhatia*

*Prerequisite: Law students enrolled before T1 2019: Successful completion of MLL111, MLL213, MLL114 (previously coded MLL214) and MLL323.*

*Law students enrolled from T1 2019 onwards: Successful completion of MLL111, MLL113, MLL213, MLL114 (previously coded MLL214) and MLL323.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 24 hours of intensive face-to-face contact in an extended seminar/workshop at the Burwood Campus. Group A will be required to attend between 10.00am and 4.00pm on Thursdays and Fridays in Week 2 & 4. Group B will be required to attend between 10.00am and 4.00pm on Mondays and Tuesdays in Week 3 & 5. Group C will be required to attend between 10.00am and 4.00pm on Thursdays and Fridays in Week 3 & 5*

*Scheduled learning activities – cloud (online): Students will engage with online lectures, multi-media and other resources presented in ten modules (averaging 2 hours of content per module plus readings) which can be undertaken intensively or spread out. They will also engage with related seminar/workshop activities independently and collaboratively online (to the equivalent of 24 hours of engagement with such activities), including a minimum of 3 hours of scheduled online seminars.*

### Content

This unit focuses on a wide range of contemporary issues in health law. It includes consideration of matters relevant to the provision of health services including the regulation of health professionals, informed consent, medical negligence, health information, and access to health care and medicines. It also examines how the law responds to the ethical, legal, and social issues raised by existing and emerging health technologies, and relevant to pre-conception, pregnancy and birth, throughout the life course, and end-of life decision making.

Students will learn about the theoretical framework surrounding health law, and develop skills that equip them to independently analyse, critique, and apply their legal knowledge within the field.

They will develop skills that will enable them to provide concise legal advice to plaintiffs and defendants involved in medical litigation, and to engage in policy or law reform activities pertinent to health service providers, public and private stakeholders, and society. In doing so, they will be challenged to demonstrate their ability to transmit their knowledge and skills to others and to generate solutions to complex problems.

### Assessment

- Online post – topic tests – 5%
- Assessment 2 (Working in Pairs) – Health Law Advice (2000 words) – 35%
- Research Paper (2500 words) – 60%

### Hurdle requirement

Students must complete all assessments to pass the unit.

## MLL331 – Corporate Law

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL221*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Cloud Provided Learning Material (including 1h recording) + 1.5h large group interactive learning experience per week + 2h seminar in weeks 4–11*

*Scheduled learning activities – cloud (online): Cloud Provided Learning Material (including 1h recording) + 1.5h large group interactive learning experience (live streamed and recording provided) per week + 2h seminar (live streamed and recording provided) in weeks 4–11*

### Content

The unit aims to give students an understanding of the law relating to the collection and use of information pertaining to the subject matter of criminal and civil proceedings. The rationale for the rules comprising the law of evidence and the values they reflect will also be considered. Topics include: the theoretical foundations of the rules of evidence; competence and compellability of witnesses; burden and standard of proof; privilege; examination of witnesses; the accused as a witness; similar fact evidence; documentary evidence; opinion evidence; admissions and confessions; the hearsay rule and its exceptions; illegally obtained evidence and corroboration. The unit covers the Uniform Evidence Act and common law rules.

### Assessment

- Assessment 1 (Individual) – Witness Examination – Oral (15 mins) – 20%
- Problem-based and short answer questions (2000 words) – 30%
- Examination (2 hours) – 50%

### Hurdle requirement

Completion of the witness examination assessment (Assessment 1).

## MLL336 – International Commercial Law

*Enrolment modes: Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Shu Zhang*

*Prerequisite: MLL111 and MLL215*

*Prerequisite for BCom students: MLC101 Business Law*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

### Content

This unit provides an introduction to legal issues associated with international trade, and explores some of the more important areas of law affecting that activity. Topics covered include private international law, the international sale of goods, the international carriage of goods, international financing, the World Trade Organisation, foreign investment law, international dispute resolution and e-commerce law.

### Assessment

- Assignment (Research or Problem Based) 3000 words, 40%
- Examination 2 hours 60%

## MLL337 – Venture Law Clinic

*Enrolment modes:*

*Trimester 1: Deakin Downtown*

*Trimester 2: Deakin Downtown*

*Trimester 3: Deakin Downtown*

*Credit point(s): 1*

*Previously coded as: MLL413*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Syd Balachandran*

*Trimester 2 Unit Chair: Rebecca Tisdale*

*Trimester 3 Unit Chair: Rebecca Tisdale*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: MLL111*

*Corequisite: MLL235*

*Incompatible with: MLL413*

*In-person attendance requirements: Weeks 1 to 11:*

*Tuesday 8.00am to 1.00pm and Thursday 8.00am–6.00pm*

## Content

The Venture Law Clinic is a transactional legal clinic that provides pro-bono legal information, advice and or assistance to seed and early stage entrepreneurial ventures. The Venture Clinic takes students through the life cycle of a real start-up, focusing on the various problems that companies encounter from formation, funding and investment, IPO, and into maturity. By simulating a small, business-focused law firm that provides business planning and legal information, it integrates and reinforces fundamental legal theories, principles and policies at an advanced level and in a practical way.

The Venture Law Clinic allows students to undertake the legal analysis involved in launching a new venture and acquire the legal acumen to deal with real business issues. Students gain first-hand experience in working with real start-up companies under the supervision of the course instructor and supervisor, and experienced legal practitioners, getting the opportunity to deepen and critically reflect upon their substantive legal knowledge in entrepreneurial law and business law while developing critical professional skills through the direct representation of start-up businesses.

*Note: Places are limited. For application procedures, please refer to the Work Integrated Learning website for further details.*

Students will need to attend classes at Deakin Downtown, Collins Square, 727 Collins Street in Melbourne City. Attendance is compulsory for students to pass the unit.

## Assessment

- Assessment 1 (Group of 3 students) – Hypothetical case study (2400 words) – 40%
- Assessment 2 (Group of 3 students) – Case study based on group's Venture Law Clinic client (3600 words) – 60%

## MLL338 – Legal Professional Practice

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (For Bachelor of Laws students only)*

*Unit chair: Cassandra Seery*

*Prerequisite: Students must have approval from the unit chair to enrol in this unit and successful completion of six (6) law units.*

*Corequisite: MLL235*

*Incompatible with: Nil*

*In-person attendance requirements: This unit will include 100–160 hours of legal workplace experience. No formal class attendance is required.*

## Content

This unit provides students with the opportunity to source and complete an approved placement in order to gain experience in a legal environment. Students will develop the ability to apply and deepen their theoretical knowledge of the law, improve vital oral and interpersonal communication skills, and further develop their legal and skills by applying them in a practical legal context.

*Note: Approval to enrol will be subject to the completion of an application and the availability of suitable supervisory arrangements.*

## Assessment

- Assessment 1 (Individual): Pre-placement tasks (1000 words) 20%
- Written Reflection (Self) (2500 words) 40%
- Assessment 3: Host Evaluation OR Report (Research) (2500 words) – Individual 40%

## Hurdle requirement

Complete a minimum of 100 hours of placement with an approved host organisation.

## MLL342 – Workplace Law

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Matthew Lister*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: MLL111*

*Corequisite: Nil*

*Incompatible with: MLC309*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

### Content

The unit aims to equip students to navigate the broad range of laws relating to work relationships in Australian law. The unit considers common law and legislation on both state and federal levels. The syllabus includes reasons for and means of regulating the work relationship; distinguishing the employment relationship at common law; the formation and contents of the contract of employment, including employer and employee duties; occupational health and safety and workers' compensation; rights and obligations on termination of employment; employment discrimination; the constitutional bases for federal employment legislation; the federal industrial relations system; the regulation of unions; and rights and obligations regarding industrial action.

### Assessment

- Written assignment (3000 words) – 40%
- Examination (2 hours) – 60%

## MLL351 – Legal Internship

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Cassandra Seery*

*Trimester 2 Unit Chair: Cassandra Seery*

*Trimester 3 Unit Chair: Karen Powell*

*Prerequisite: Successful completion of 6 Law (MLL) units.*

*Corequisite: MLL235*

*Incompatible with: Nil*

*In-person attendance requirements:*

*Students are required to complete:*

- (a) A supervised work placement (minimum 7.5 hours x 15 days) with a host organisation in a legal environment;
- (b) A mandatory 3-hour university induction prior to the commencement of the trimester; and
- (c) A debrief with the host supervisor at the end of the trimester.

### Content

The unit enables students to gain an appreciation of certain aspects of legal practice and to extend and deepen their theoretical knowledge of the law by working under supervision of a lawyer. During their placement in the law firm or legal service, students will receive instruction in the following areas of legal practice: taking instructions and client interviewing; fact finding; dispute resolution and negotiation; providing advice and counselling of a legal nature; legal research and problem-solving; the litigation process; advocacy.

*Note: Quota and special permission applies.*

Please see Legal Internship for selection criteria, application forms and further information.

### Assessment

- Pre-placement tasks (1000 words) – 20%
- Journal (5000 words) – 30%
- Host Assessment – 40%
- Cloud Deakin Participation: Students must post two substantial comments/reflections in relation to their placement experience – 10%

### Hurdle requirement

Minimum of 100 hours of placement with an approved host organisation.

## MLL355 – International Litigation and Dispute Settlement

*Enrolment modes: Trimester 1: Burwood (Melbourne), Study tour (as part of the Moot competition)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shu Zhang*

*Cohort rule: For Bachelor of Laws students only*

*Prerequisite: Students enrolled before 2019: MLL110*

*Students commencing from 2019: MLL110 and MLL113*

*Corequisite: (For students enrolled in Bachelor of Laws only)*

*Incompatible with: Nil*

*In-person attendance requirements: Study Tour: This unit requires students to attend a supervised study tour to participate in an international moot competition. Team members will be required to meet regularly with each other and with the coordinator.*

### Content

The aim of the unit is to give students a basic understanding of the way international agreements and disputes are interpreted and resolved. Vis Moot students will be introduced to the law of international commercial arbitration and also the law relating to the international sale of goods. Vis Moot students will consider topics relating to alternative dispute resolution; the enforcement of international arbitral awards; the drafting of international arbitration submissions; the sources of international commercial law; principles and case law of private international law, and remedies under international law. Jessup Moot students will consider topics relating to the way international disputes between states are litigated.

*Note: Quota applies; Enrolment by application to the Unit Chair only.*

*Note: Continued enrolment in this unit is subject to attendance/participation, at Unit Chair's discretion.*

### Assessment

- Assessment 1 (group 4–12) – Memoranda 1 (35 pages) – 5%
- Assessment 2 (group 4–12) – Memoranda 2 (2 x 35 pages) – 25%
- Assessment 3 (Individual) – Oral Presentation – 40%
- Assessment 4 – Performance in the teamwork 30%

## MLL388 – International Financial Crime

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements:*

*Waterfront (Geelong) Intensive:*

*The unit is taught face to face intensively before the start of the trimester, i.e. there are no weekly classes during the trimester. Attendance is required at the following times: Room D2.330, Moot Court, Waterfront (Geelong) campus, 9am-4pm on the following days: Dates to be advised.*

*An assignment will be submitted in April and the final exam will be undertaken during the normal Deakin exam period. These classes will also be recorded for Cloud (online) enrolled students and available before the term commences.*

*Note: As this unit is offered in intensive mode, it may impact on some international students' enrolment. It is the student's responsibility to monitor their enrolment.*

### Content

This unit aims to provide students with an understanding of the nature and complexity of international financial crime with a specific emphasis on the legal principles applying to key forms of financial crime. The unit will investigate the response of the international community to these crimes and explore representative examples of regulatory and corporate measures against these offences.

### Assessment

- Written Assignment 2500 words 40%
- Examination 2 hours 60%

## MLL391 – Civil Procedure and Dispute Resolution

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL112*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Claudio Bozzi*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Successful completion of MLL111 and MLL213 plus 5 additional Law (MLL) units.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 3h class (recordings provided) + 1h online seminar per week*

### Content

The unit investigates the legal process of civil dispute resolution in our society. This unit examines procedural law, which is the law of 'how' one enforces substantive legal rights and duties, or the method through which rights (no matter what they are) get realised in our courts. Although the unit focuses on the Supreme Court of Victoria (General Civil Procedure) Rules, supplemented by cases and scholarly analysis, means of resolving disputes other than traditional litigation are considered. The syllabus roughly follows litigation process and includes the role of the court in an adversarial system; court structure and jurisdiction; initiation of proceedings; pleadings; joinder of claims and parties, including group and representative actions; discovery; dispositions without trial, including summary procedures and compromise; judgment; costs; and forms of alternative dispute resolution such as arbitration and mediation.

### Assessment

- Assignment (Group of up to 3) 3000 words, 40%
- Examination (Open Book) 2 hours, 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MLL394 – Migration and Refugee Law and Policy

*Enrolment modes: Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Matthew Lister*

*Cohort rule: Must be enrolled in M312, D312, D322, D323, D331, D335, D396*

*Prerequisite: Students enrolled before 2019: MLL110 and must have successfully completed 3 Law (MLL) units.*

*Students commencing from 2019: MLL110 and MLL113 and must have successfully completed 3 Law (MLL) units.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 9 x 3 hour class (recordings provided) + 4 x 1.5h interactive online seminars (livestreamed with recording provided)*

*Scheduled learning activities – cloud (online): 9 x 3h classes (recordings provided) + 4 x 1.5h interactive online seminar (livestreamed with recording provided)*

### Content

The unit aims to provide students with an understanding of migration law. The unit analyses the substantive and procedural rules and principles governing this area of law, and discusses policy considerations behind them. This unit equips students with the basic background needed to work in the area, as well as proving useful skills in statutory interpretation for students who wish to work in workplace or employment law, family law and several areas of public policy. This unit also provides the necessary background awareness as to where immigration issues arise in these areas of law, as they regularly will in a cosmopolitan society such as Australia.

### Assessment

- Assessment (individual) – Case Analysis (2000 words) – 40%
- Examination (individual) – 2 hours – 60%

## MLL405 – Equity and Trusts

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL321*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Paul McDonough*

*Trimester 3 Unit Chair: Michele Tucker*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: MLL325 and MLL327*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2 x 2h class (recordings provided) + 1h online seminar per week*

### Content

The unit aims to teach students the principles of the equitable jurisdiction. They will examine equitable principles and remedies in transactions and also their relationship with existing common law principles. They will be expected to understand different forms of trusts, the creation requirements for all trusts and the various rights and duties of both trustees and beneficiaries. Topics include: the history of equity; equitable principles in transactions; fiduciary principles; and express, resulting and constructive trust analysis.

### Assessment

- Assessment 1 (Group of 2 or individual) – Research Paper (3000 words) – 40%
- Examination (2 hours) – 60%

## MLL406 – Taxation

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL322*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Monica Hope*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: MLL111, MLL331 and must have successfully completed 8 Law units*

*Corequisite: Nil*

*Incompatible with: MLC301*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

### Content

The unit provides an introduction to the role of taxation as an instrument of government policy. Topics include: an introduction to the concepts of income and capital receipts; income from business, property and personal services; deductions and exemptions; taxation of capital gains; tax accounting, trading stock and fringe benefits tax. It also includes an introduction to the Goods and Services Tax.

### Assessment

- Written Assignment (Letter of advice: Problem Based) 2000 words 40%
- Examination (2 hours) 60%

## MLL409 – Competition Law and Policy

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL350*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jay Gul*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Successful completion of MLL111 plus 8 additional Law (MLL) units.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

## Content

The unit introduces students to the principal areas of law in Australia which aim to preserve competition in the economy. Attention will focus on the competition law provisions in the Competition and Consumer Act 2010 and their theoretical underpinnings. In particular, it will examine the following topics: the common law doctrine of restraint of trade; the scheme of the Competition and Consumer Act 2010; trade practices economics; price fixing; anti-competitive arrangements; primary boycotts; exclusive dealing; misuse of market power; resale price maintenance and mergers.

## Assessment

- Written Assignment 3000 words 40%
- Examination 2 hours 60%

## MLL410 – Intellectual Property

*Enrolment modes:* Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)

*Credit point(s):* 1

*Previously coded as:* MLL374

*EFTSL value:* 0.125

*Trimester 1 Unit Chair:* Vicki Huang

*Cohort rule:* (For Bachelor of Laws students only)

*Prerequisite:* MLL111 and must have successfully completed 9 Law units

*Corequisite:* MLL327

*Incompatible with:* Nil

*Scheduled learning activities – campus:* 2h class + 1h seminar per week

*Scheduled learning activities – cloud (online):* 2h class (recordings provided) + 1h online seminar per week

## Content

This unit aims to give students an understanding of the statutory protection of intellectual property in Australia. The unit seeks to provide a broad introduction to this area of law, dealing with each of its principal components. Students will learn to recognise the kinds of intellectual endeavour that can be protected, the forms protection can take, the prerequisites to gaining protection and the means of enforcing breaches. Topics include: the development of and rationales for intellectual property rights; copyrights and designs; patents; trademarks; and enforcement and remedies.

## Assessment

- Assignment (3000 words) – 40%
- Assessment 2 Examination (2 hours) – 60%

## MLL412 – Civil and Commercial Law Clinic

*Enrolment modes:*

*Trimester 1:* Deakin Downtown

*Trimester 2:* Deakin Downtown

*Trimester 3:* Deakin Downtown

*Credit point(s):* 1

*EFTSL value:* 0.125

*Trimester 1 Unit Chair:* Syd Balachandran

*Trimester 2 Unit Chair:* Syd Balachandran

*Trimester 3 Unit Chair:* Syd Balachandran

*Cohort rule:* (For Bachelor of Laws students only)

*Prerequisite:* MLL111, MLL215

*Corequisite:* MLL235

*Incompatible with:* Nil

*In-person attendance requirements:*

*Weeks 1–11:* Monday 8.00am to 6.00pm and

*Wednesday 1.00pm–6.00pm*

## Content

The Clinic environment will provide students with a 360° experience of professional practice. Students work in an office environment, deal with clients, research and provide strategic legal solutions, and engage with various parties including clients, parties on the other side as well as supervisors and colleagues. The Clinic provides legal services over a range of legal issues chosen to give students professional experiences touching the key types of legal problems, parties, decision makers and tribunals that will give students an insight into the diversity and complexity of legal practice. The areas of legal practice are: contract, and consumer law and victims of crime compensation. Students will manage their own legal matter under supervision of Clinic supervisors and specialist legal practitioners from initial client intake and interview to final outcome and closing of file (subject to Clinic time limits). Students develop professional skills through the challenge of applying theoretical legal knowledge to real world clients in order to develop strategic legal solutions that meet client needs. The Clinic develops employment ready skills and gives students the opportunity to critically look at the legal systems and the opportunities to engage in law reform.

*Note:* Places are limited. For application procedures, please refer to the Work Integrated Learning website for further details.

Students will need to attend classes at Deakin Downtown, Collins Square, 727 Collins Street in Melbourne City. Attendance is compulsory for students to pass the unit.

## Assessment

- File management – 50%
- Legal research and Memorandum of Advice (3000 words) – 30%
- Contribution to team file review meetings – 20%
  - Part A: Oral Presentation (10%)
  - Part B: Reflective Journal (10%)

## Hurdle requirement

Minimum attendance with no more than one day absent on clinic days.

# MLL414 – Employment Law Clinic

*Enrolment modes:*

*Trimester 1: Deakin Downtown*

*Trimester 2: Deakin Downtown*

*Trimester 3: Deakin Downtown*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Tisdale*

*Trimester 2 Unit Chair: Rebecca Tisdale*

*Trimester 3 Unit Chair: Rebecca Tisdale*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: MLL111*

*Corequisite: MLL235, MLL342*

*Incompatible with: Nil*

*In-person attendance requirements: Students will be expected to devote approximately 150 hours of study to the unit. Students must attend the clinic on the clinic open days. Attendance is compulsory for students to pass the unit.*

*Week 1–15 hours over two days (Tuesday and Friday):*

*Day 1 – Induction; Day 2 – Overview of key legal topics under Employment Law.*

*Weeks 2–11 – Clinical work – 15 hours over two days (Tuesday and Friday): Weekly – attend clinic during the two open days each week, meet with clients, prepare documents and advice, review matters and proposed strategies with supervising lawyer.*

## Content

The Employment Law Clinic focuses on rights in the workplace, with a particular emphasis on the federal laws governing the employer/employee relationship and state and federal laws that prohibit discrimination. The unit will address issues such as the formation of an employment or independent contractor relationship, rights and obligations during the relationship and the termination of a relationship and may also address issues such as employment benefits, wage and hour claims, severance negotiations, union issues, workplace safety, and more.

Students work in an office environment using professional matter management systems, deal with clients, research and provide strategic legal solutions, and engage with various parties including clients, parties on the other side as well as supervisors and colleagues.

The Employment Law Clinic provides legal services over a range of legal issues in the area of Employment Law to give students professional experiences touching the key types of legal problems, parties, decision makers and tribunals that will give students an insight into the diversity and complexity of legal practice in the area of employment law.

The skills learnt in this unit will be useful for students who wish to practice law (particularly employment law), along with students interested in policy, government and social justice career pathways. The Clinic develops employment ready skills and gives students the opportunity to critically look at the legal systems and the opportunities to engage in law reform in the employment law domain.

*Note: Places are limited. For application procedures, please refer to the Work Integrated Learning website for further details.*

Students will need to attend classes at Deakin Downtown, Collins Square, 727 Collins Street in Melbourne City. Attendance is compulsory for students to pass the unit.

## Assessment

- Practical assessment – 60%
- Written professional reflection (2000 words) – 20%
- Legal writing assessment (2000 words) – 20%

## Hurdle requirement

Minimum attendance with no more than one day absent on clinic days.

## MLL415 – Family Law Clinic

*Enrolment modes:*

*Trimester 1: Deakin Downtown*

*Trimester 2: Deakin Downtown*

*Trimester 3: Deakin Downtown*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Weeks 2–11 – Clinical work – 15 hours over two days (Tuesday and Friday): Weekly – attend Clinic during the two open days each week, meet with clients, prepare documents and advice, review matters and proposed strategies with supervising lawyer.*

## Content

Students undertake a practical placement in the specialist Deakin Criminal Law Clinic ('the Clinic') based at the Deakin Edge offices in the Melbourne CBD. The unit takes place in an environment which replicates a small to medium sized criminal defence firm. The Clinic provides services to clients who have been charged with summary or indictable offences. The Clinic also undertakes appeal work in appropriate cases.

Under the supervision of qualified specialist solicitors, students will be engaged in the criminal law process from commencement to conclusion. This includes providing legal advice to clients, undertake ongoing casework, undertaking legal research in relation to appeals, briefing counsel, and in appropriate cases, appearing for clients in court and or instructing counsel who appear for clients in court. Students also attend the Duty Barristers' Scheme of the Victorian Bar, at either the Melbourne Magistrates' Court or the Dandenong Magistrates' Court, on a designated day to observe and assist the duty barrister who appears for unrepresented litigants to increase their exposure to the criminal law process. Observing other members of the profession at work is a critical part of this learning experience.

By undertaking this unit, students acquire a diverse range of practical legal skills including: the capacity to undertake legal research and apply legal research to factual scenarios; the ability to synthesise professional, technical and ethical knowledge acquired in the law degree and apply it in a practical legal context; skills in critical thinking and legal judgment; the capacity to independently devise legal solutions for complex legal problems; and the capacity to identify and respond to ethical, moral and professional dilemmas in legal practice.

Students also develop an appreciation of social justice issues and have a heightened awareness of the operation of the criminal justice system, law reform needs and policy issues which face courts and criminal lawyers. The skills developed in this unit will be useful for students who wish to practice law (especially criminal law), along with students interested in policy, government and social justice career pathways.

*Note: Places are limited. For application procedures, please refer to the Work Integrated Learning website for further details.*

Students will need to attend classes at Deakin Downtown, Collins Square, 727 Collins Street in Melbourne City. Attendance is compulsory for students to pass the unit.

## Assessment

- Practical assessment – 60%
- Written professional reflection (2000 words) – 20%
- Assessment 3 (Individual) – Legal writing assessment (2000 words) – 20%

## Hurdle requirement

Minimum attendance with no more than one day absent on Clinic days.

# MLL417 – Human Rights Law

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL302*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jane Kotzmann*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: MLL110, MLL111, MLL213, MLL114, MLL323*

*Corequisite: Nil*

*Incompatible with: MLL302*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

## Content

The unit provides an overview of the development, substance and enforcement of international human rights law. Almost seven decades after the human rights regime emerged out of the disasters of the Second World War, human rights norms and institutions deeply inform the rhetoric, practice and theory of international law and politics, as well as the internal constitutional structures of many states (including Australia). Although the frailties of human rights as an ideal, an ideology or practice are evident, the concept of human rights has become a part of modern consciousness, a lens through which to see the world, a universal discourse, a potent aspiration.

This course uses the term 'human rights regime' to include post-1945 governmental, intergovernmental and nongovernmental institutions and practices in both national and international contexts in the recognition and protection of human rights.

## Assessment

- Written assignment (Individual) Research essay (2500 words) 50%
- Examination (Short-answer and essay questions) 2 hours, 50%

## MLL418 – Contemporary Legal Issues

*Enrolment modes:*

*Residential Period 3: Burwood intensive\**

*Trimester 3: Burwood intensive^*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Felicity Gerry*

*Trimester 3 Unit Chair: Marilyn McMahon*

*Cohort rule: (For Bachelor of Law students only)*

*Prerequisite: Must have completed 8 law units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Recommended: It is recommended that students undertake MLL325 Land Law and MLL327 Property prior to enrolling in this Intensive unit.*

*In-person attendance requirements: 30 contact hours: 6 contact hours per day (2 x 1-hour classes and 2 x 2-hour seminars) for 5 days.*

*\* Residential 3: 9am-4pm Monday 15th July to Friday 19th July 2019 (inclusive). Topic: Modern Slavery: Corporate Responsibility, Organised Crime and Cyberlinkages*

*^ Trimester 3: Monday 3rd February to Friday 7th February 2020 (inclusive). Topic: Indigenous Land Rights: From Terra Nullius to Mabo to Statutory Regimes to Treaty Talk*

## Content

This unit is explicitly intended to extend skills and knowledge, developed in core subjects studied in the law curriculum, by exploring key contemporary issues in a selected area of law. This is done with a lens provided by an externally recognised expert in the field. The unit will focus on a specialist area while simultaneously investigating the wider implications for other areas.

Students will analyse specific legal issues and controversies within the selected area, taking into account social attitudes, institutional practices, relevant laws and legal processes.

*Note: Residential 3 Census Dates*

Trimester 3: If the enrolment quota is met, please email [buslaw@deakin.edu.au](mailto:buslaw@deakin.edu.au)

## Assessment

- Assessment 1 (Individual) – pre-class 3-minute video recording – 15%
- Proposal for written assignment (500 words) – 25%
- Written assignment (4000 words) – 60%

## Hurdle requirement

Completion and submission of the 3-minute video recording.

## MLL419 – Contemporary International Legal Challenges (Intensive)

*Enrolment modes: Trimester 3: Burwood (Melbourne) Intensive*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Felicity Gerry*

*Cohort rule: (For Bachelor of Law students only)*

*Prerequisite: Must have completed 8 law units*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: 30 contact hours: 6 contact hours per day (2 x 1-hour classes and 2 x 2-hour seminars) for 5 days.*

*Trimester 3 2019 Burwood Intensive dates: 20th–24th January 2020. Topic: International Climate Change Litigation with a focus on Corporate Responsibility and the Environmental and Community Rights impacts of deforestation.*

*Students will have the opportunity to do the following:*

- *Assess the prospects of litigation in a case, to include Constitutional and Corporate challenges.*
- *Consider policy and legislative change in relation to deforestation and climate change more generally.*
- *Ways to use international law to drive protection of forests, species and human rights.*

## Content

This unit, as with MLL418 Contemporary Legal Issues, is explicitly intended to extend skills and knowledge, developed in core subjects studied in the law curriculum, by exploring key contemporary issues in a selected area of law. This is done with a lens provided by an externally recognised expert in the field. The unit will focus on a specialist area while simultaneously investigating the wider implications for other areas. Students will analyse specific legal issues and controversies within the selected area, taking into account social attitudes, institutional practices, relevant laws and legal processes. (The specialist area that forms the subject of this unit will vary annually. Specific details will be identified by DLS and notified to students as these become known and prior to enrolment being made available). The essential focus of the unit will be to reflect on issues of legal principle relating to specific emerging issues and controversies and to develop forward-thinking strategies and solutions to address emerging law and public policy issues.

## Assessment

- Assessment 1: Video recording (Individual), 3-minutes, 15%
- Assessment 2: Essay Proposal (Individual) (500 words), 25%
- Assessment 3: Essay (Individual) (4000 words) 60%

## Hurdle requirement

Completion and submission of the 3-minute video recording is a hurdle requirement.

## MLL424 – Administrative Law

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL324*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Oscar Roos*

*Trimester 3 Unit Chair: Jay Gul*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: MLL323*

*Corequisite: Nil*

*Incompatible with: MLL324*

*Scheduled learning activities – campus: 3h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 3h class (recordings provided) + 1h online seminar per week*

## Content

The unit initially considers the nature of public power in the context of Australian constitutionalism, with a particular emphasis on administrative decision-making. It then examines the scope and limits of judicial review of administrative action, including the grounds and remedies available to courts of law. Judicial review is subsequently contrasted with extra judicial modes of review by administrative tribunals and by ombudsmen. Finally the unit considers the importance of information about government decision-making, and how information can be obtained from government agencies under freedom of information and other laws.

## Assessment

- Assignment (Take Home Problem Question) 3000 words 50%
- Examination (Closed Book) 2 hours 50%

## MLL426 – Mining and Energy Law

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MLL316*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Samantha Hepburn*

*Prerequisite: MLL325 and MLL327*

*Corequisite: Nil*

*Incompatible with: MLL316*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

## Content

Australia is a country rich in non-renewable mineral resources as well as renewable energy sources. The extraction of minerals and hydro-carbons, petroleum, natural gas, unconventional gas forms an enormous component of the domestic and international market. In addition, with the progression of a green economy, the emergence of renewable energy forms, such as solar and wind power and the promotion of carbon offset regimes has seen rapid growth. With the onset of global energy shortages, these industries will continue to expand and develop. This unit aims to provide students with a comprehensive understanding of the regulatory frameworks that underpin mining and energy law in Australia. It teaches students about the ownership framework, the licencing and royalty system and the environmental framework as they apply at both state and federal levels. The unit focuses upon the legal issues relevant to the development of energy industries within Australia; this includes an evaluation of the new regulatory frameworks which have evolved in response to the pricing of carbon and the rapid expansion of the unconventional gas industry in the Eastern states.

## Assessment

- Written assignment (group of 2, 3000 words) 40%
- Examination 2 hours 60%

## MLL427 – Advanced Legal Problem Solving and Persuasion

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (for Bachelor of Laws students only)*

*Prerequisite: Must have passed MLL114, MLL213, MLL117, MLL215, MLL218, MLL221, MLL323, MLL327, MLL334, MLL235, MLL391*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online independent and collaborative learning and 3 x 3 hour workshops in the first half of the trimester.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning and 3 x 3 hour scheduled online workshops.*

## Content

This unit is designed to help students draw together substantive law subject learning in previous studies with opportunities for practical professional and legal skill development. It will extend and refine skills introduced in previous units, most notably MLL113 Legal Writing and Ethical Decision-making.

This unit teaches students how to strategically approach issues faced by clients and to develop (written and oral) techniques to effectively influence the reasoning and behaviour of other individuals in the legal process. Students will develop important oral presentation skills of relevance to communicating, negotiating and persuading audiences in both general business and specific legal practice contexts.

Topics include: receiving instructions from clients; establishing client expectations; dealing with changing case dynamics; mediating and negotiating with lawyers; successful persuasion; understanding when to accept an offer; the considerations that influence judges and other decision makers; the importance of written submissions; the importance of case atmospherics; and persuasive advocacy.

The unit will also allow students to develop capabilities of being a reflective legal practitioner who can appreciate current and future trends in professional legal practice and to use such reflective skills to plan for future satisfying careers.

## Assessment

- Assessment 1: (Group 2–6) Practical oral exercise (25%) and written task – (3500 words) (25%) – 50%
- Assessment 2: (Individual) Practical oral exercise (15%) and written task – (2000 words) (15%) – 30%
- Assessment 3: (individual) Reflective professional perspective on valued capabilities – (2000 words) – 20%

# MLL442 – Advanced Legal Practice

*Enrolment modes: Trimester 3: Burwood Intensive*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Nicole Siller*

*Cohort rule: (For Bachelor of Laws students only)*

*Prerequisite: Students must have approval from the unit chair to enrol in this unit, MLL235 plus successful completion of 5 additional law units.*

*Corequisite: Nil.*

*Incompatible with: Nil*

*In-person attendance requirements: 30 classroom contact hours: 6 contact hours per day (2 x 1-hour classes and 2 x 2-hour seminars) for 5 days and 2–6 Courtroom observation hours. Attendance is required.*

## Content

This unit is explicitly intended to extend skills and knowledge, developed in core subjects studied in the law curriculum, by exploring the relationship between theory, practice and the legal profession. This is done with a lens provided by an externally recognised expert in the field. Students will be challenged by emerging legal issues found in legal practice (within the selected area), taking into account institutional practices, relevant laws and legal processes. Students will be required to employ the skills they have developed throughout the course of their legal studies (eg, legal research and writing skills, critical thinking skills, etc) to produce output as required by practice to the legal problem under study (eg, legal pleading, application, letter of advice, etc). The specialist area that forms the subject of this unit may vary annually. Specific details will be identified by DLS and notified to students as these become known and prior to enrolment being made available. The essential focus of the unit will be to expose students to the practice of law and how it intersects with the theory and doctrine learned throughout their studies; to reflect on issues of legal principle relating to specific issues and controversies and to develop responses as governed by legal practice.

This unit provides students with a unique and invaluable opportunity to engage with some of the foremost experts and practitioners during their time at university.

By undertaking this unit, students acquire a diverse range of practical legal skills including: the capacity to undertake legal research and apply legal research to factual scenarios; the ability to synthesise professional, technical and ethical knowledge acquired in the law degree and apply it in a practical legal context; skills in critical thinking and legal judgment; the capacity to independently devise legal solutions for complex legal problems; and the capacity to identify and respond to ethical, moral and professional dilemmas in legal practice.

Students also develop an appreciation of social justice issues and have a heightened awareness of the operation of the criminal justice system, law reform needs and policy issues which face courts and criminal lawyers. The skills developed in this unit will be useful for students who wish to practice law (especially criminal law), along with students interested in policy, government and social justice career pathways.

Note: Trimester 3 2019 Dates:

- Thursday 28 November 2019
- Friday 29 November 2019
- Monday 2 December 2019
- Tuesday 3 December 2019
- Thursday 5 December 2019
- Friday 6 December 2019
- Friday 13 December 2019

The T3 2019 offering of MLL442 will focus on “Perspectives from the Bench”. Dr. Siller will teach this unit which will feature guest lectures from various Victorian judges. Judges will present on topics including: ethical decision-making, civil disobedience, statutory interpretation and the judiciary in comparative perspective.

Places are limited. Most sessions will take place in the CBD. Attendance is mandatory.

Please email the unit chair ([n.siller@deakin.edu.au](mailto:n.siller@deakin.edu.au)) to enrol into the unit. Your email should include an expression of interest and your CV.

*Note: Students may be required to obtain a Police Check before undertaking this unit.*

## Assessment

- Assessment 1 (group of two or individual) In Class Presentation (15–20 minutes): 25%.
- Written Reflection (Self) (1000 words): 15%
- Problem Based Written Assignment (4000 words) 60%

## Hurdle requirement

Mandatory attendance.

## MLL444 – Special Topics in Cyber Law

*Enrolment modes: Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Vicki Huang*

*Prerequisite: Must have completed 8 law units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent learning (pre-recorded material) (totalling 27 hours), 3 x 1 hour e-seminars (live-streamed with recording provided), 1 x 3 hour revision classes (live-streamed with recordings provided).*

### Content

This unit has three modules.

Module 1 – Intellectual property and the internet. The following topics will be examined: What is the internet?; approaches to regulation; copyright law and specific internet issues such as peer-to-peer transactions and user-generated content; intermediary liability; intermediary involvement in remedial action. Domain names and their national and international regulation.

Module 2 – Privacy law and the internet. The following topics will be examined: Common law privacy protection – Australia, UK and US compared; debate over a statutory privacy tort in Australia. Data law and the internet: The current Commonwealth privacy and data protection regimes. Current laws and reform initiatives in relation to data breach. The Victorian privacy and data protection regime (eg health records). The role of the privacy/ data protection commissioner.

Module 3 – Current issues in cyber law. Many data breaches and cyber security “crimes” or harms are unprecedented. That is, the legal issues involved with such harms have not been articulated in the courts or legislature. Identifying potential legal issues in relation to internet dependent products and processes will be discussed in this module through guest lectures and student generated content.

The primary mode of delivery is online. There will be a three hour “launch” class at each campus in week 1. Students will receive an overview of the unit. The launch seminar will also provide instruction on use of Deakin online video services for assessment one and allow students to form or meet their groups.

After completing the online lectures, students will attend two “revision” classes. These will be conducted wholly online. Here, student generated MCQs will provide the content for the revision.

### Assessment

- Student written multiple choice question based on Module 1 or 2 (200–500 words) – 15%
- Assessment 2 (Groups of 2–4) – 2 parts, 25% total:
  - Part A Student generated video presentation based on Module 3 (4–8 minutes) – 20%
  - Part B – The group must draft a single narrated bill detailing the time and dollar value to be charged for each team member’s input (500–1000 words) – 5%
- Final Examination (individual) – 2 hours – 60%

### Hurdle requirement

Students must submit all assessment tasks

## MLM070 – Academic Induction for Professional Accounting and Law

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Zehra G. Kavame Eroglu*

*Trimester 2 Unit Chair: Rami Hanegbi*

*Trimester 3 Unit Chair: Rami Hanegbi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online):*

*Compulsory online orientation in Cloud*

### Content

This induction will run as an online unit. Cloud and Burwood students will be able to complete the induction remotely. Students are required to complete this unit within the first trimester of their enrolment.

### Assessment

Online MCQ, 100%.

### Hurdle requirement

Achieve at least 75% of the marks available on Assessment 1.

## MLM703 – Chinese Commercial Law

*Enrolment modes: Not Offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MLL703*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin*

*In-person attendance requirements: Study tour: Students will be required to attend a supervised study tour*

### Content

This unit aims to enable postgraduate students to develop an understanding of the Chinese legal system and its relationship to Chinese history and culture, as well as to develop an awareness of Chinese commercial law in the context of conducting business with China, in particular, trading with and investing in China. The unit covers China's legal history and current legal system; signing foreign related contracts in China; law of joint ventures and 100% foreign-owned enterprises; foreign trade law; protection of foreign intellectual property; banking and foreign exchange controls related to FIE's; labour and employment issues in foreign investment enterprises and dispute resolution.

*Note: The Deakin Law School reserves the right to not offer a study tour in any given year entirely at its discretion. Indication of interest in a study tour is not an assurance that the study tour will be offered. Students should always identify an alternative unit to a study tour unit when planning their course.*

### Assessment

- Written Assignment 4000 words 50%
- Examination 2 hours 50%

## MLM704 – Foundations of Law

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Patricia Perlen*

*Trimester 2 Unit Chair: Kelly Green*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

### Content

The Foundations of Law unit will allow students to:

- demonstrate a critical understanding of the formation, structure and administration of the legal system in Australia
- apply relevant reasoning and interpretation methodologies to analyse case law and legislation; undertake independent legal research, and apply appropriate research strategies, to locate relevant primary and secondary sources of law
- construct a written solution to a complex legal problem by analysing relevant factual, legal and policy issues.

### Assessment

- Online Legal Research Test – 30%
- Case Analysis Exercise (2000 words) – 20%
- Statutory Interpretation Exercise (5000 words) – 50%

## MLM705 – Research Methodology

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Britt Tevis*

*Trimester 2 Unit Chair: John Morss*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

### Content

This unit will require students to demonstrate advanced abilities to:

- identify substantive legal issues that need to be researched, and to understand the social, political and theoretical contexts in which they are relevant. This requires students to acquire knowledge of the conventions of the Australian and (as relevant) the international legal system; knowledge about the reference sources available for that system; and an understanding of the dynamics that may influence the way the legal research question has been asked.
- formulate a research strategy and plan that utilises the variety of print based and electronic resources available, including bibliographic tools. This process is variously referred to in the literature as doctrinal research, library-based research, and bibliographic research.
- evaluate the currency, jurisdiction, and authority of the sources used and the material located. This involves a process of interpretation and critical analysis.
- synthesise the arguments from the material located by analysing how the cases, statutes, and other materials located fit together, and how the principles distilled from that synthesising process apply to the legal problem to be resolved.

### Assessment

Research Plan (7500 words) – 100%.

## MLM706 – Corporate Governance

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jean Du Plessis*

*Prerequisite: For students enrolled in M729: MLJ715.*

*All other students: Nil*

*Corequisite: Nil*

*Incompatible with: MLL706*

*Scheduled learning activities – cloud (online): 1 x 2h Class (recordings provided) + 1 x 1 hour online seminar per week*

*In-person attendance requirements: 1 x 2h Class (recordings provided) + 1 x 1 hour seminar per week*

### Content

This unit consists of four distinctive parts. In Part One students are introduced to basic concepts, board structures and types of company officers. In Part Two the focus is on corporate governance in Australia. Part Three deals with corporate governance in international and global context with the emphasis on the US, the UK, Canada, Germany, Japan and China as well as the OECD principles of corporate governance. Part Four deals with business ethics and future directions regarding corporate governance.

### Assessment

- Assignment 1 – Written Research Paper (1500 words) – 25%
- Assignment 2 – Written Research Paper (1500 words) – 25%
- Assignment 3 – Written Research Paper (3000 words) – 50%

## MLM707 – Research Thesis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne) Intensive, Cloud (online)*

*Trimester 2 Burwood (Melbourne) Intensive, Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Sandeep Gopalan*

*Trimester 2 Unit Chair: Amir Pichhadze*

*Prerequisite: MLM705*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 online seminar per week*

*In-person attendance requirements: Burwood (Melbourne) Intensive: This unit will be taught in intensive mode on 3 days between 9.00am and 4.30pm.*

### Content

This unit will require students to demonstrate, by completion of a research project, advanced abilities to:

- identify substantive legal issues that need to be researched, and to understand the social, political and theoretical contexts in which they are relevant. This requires students to acquire knowledge of the conventions of the Australian and (as relevant) the international legal system; knowledge about the reference sources available for that system; and an understanding of the dynamics that may influence the way the legal research question has been asked.
- formulate a research strategy and plan that utilises the variety of print based and electronic resources available, including bibliographic tools. This process is variously referred to in the literature as doctrinal research, library-based research, and bibliographic research.
- evaluate the currency, jurisdiction, and authority of the sources used and the material located. This involves a process of interpretation and critical analysis.
- synthesise the arguments from the material located by analysing how the cases, statutes, and other materials located fit together, and how the principles distilled from that synthesising process apply to the legal problem to be resolved.

### Assessment

Research Thesis (10,000–12,000 words) – 100%.

## MLM712 – International Intellectual Property Law

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

### Content

This unit examines intellectual property (with an emphasis on trademarks, copyright and patents) and the international agreements for their protection. It does so from an international perspective by focusing in particular on the World Trade Organization's Agreement on Trade Related Aspects of Intellectual Property Rights. In so doing this unit examines this and other key international intellectual property agreements for their requirements regarding observance, enforcement and dispute settlement. This unit then explores some of the current international intellectual property issues including those relating to public health and the Internet.

### Assessment

- Written Assignment 1 5000 words 50%
- Written Assignment 2 2500 words 25%
- Written Assignment 3 2500 words 25%

## MLM715 – Health Law

*Enrolment modes: Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Jason Taliadoros*

*Prerequisite: For students enrolled in M729: MLJ701, MLJ702, MLJ703, MLJ704 and MLJ709.*

*All other students: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

## Content

This unit aims to give an advanced and integrated understanding of Australian health law. Over the course of a trimester, students will gain a wealth of knowledge and critical perspectives on current and emerging legal issues relating to health care and policy ramifications.

## Assessment

- Policy-based Research Paper (4000 words) – 40%
- Examination (open book) – 2 hours – 60%

# MLM716 – Alternative Dispute Resolution: Principles and Practice

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Athula Pathinayake*

*Prerequisite: For students enrolled in M729 Juris Doctor: MLJ701, MLJ704. All other students: Nil.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

## Content

This unit gives students an advanced and integrated understanding of Alternative Dispute Resolution (ADR) in Australia. Over the course of a trimester, students will gain a wealth of knowledge and critical perspectives on current and emerging legal issues relating to Alternative Dispute Resolution.

## Assessment

- Policy-based Research Paper (4000 words) – 40%
- Examination (open book) – 2 hours – 60%

# MLM717 – Financial Services Regulation

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Zehra Kavame Eroglu*

*Prerequisite: For students enrolled in M729: MLJ701 and MLJ715. All other students: Nil.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

This unit gives students an advanced and integrated understanding of Financial Services Regulation in Australia. Over the course of a trimester, students will gain a wealth of knowledge and critical perspectives on current and emerging legal and policy issues relating to the financial services industry.

## Assessment

- Policy-based Research Paper (4000 words) – 40%
- Examination (open book) – 2 hours – 60%

# MLM718 – Venture Law Clinic

*Enrolment modes:*

*Trimester 1: Deakin Downtown*

*Trimester 2: Deakin Downtown*

*Trimester 3: Deakin Downtown*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rebecca Tisdale*

*Trimester 2 Unit Chair: Rebecca Tisdale*

*Trimester 3 Unit Chair: Rebecca Tisdale*

*Cohort rule: This unit is only available to students enrolled in M726, M729, M749*

*Prerequisite: MLM704 for M726; MLJ702, MLJ715 plus 6 core units for M729; 8 units for M749*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements:*

*Weeks 1 to 11: Tuesday 8.00am to 1.00pm and*

*Thursday 8.00am to 6.00pm*

## Content

The Venture Law Clinic is a transactional legal clinic that provides pro-bono legal information, advice and or assistance to seed and early stage entrepreneurial ventures. The Venture Clinic takes students through the life cycle of a real start-up, focusing on the various problems that companies encounter from formation, funding and investment, IPO, and into maturity. By simulating a small, business-focused law firm that provides business planning and legal information, it integrates and reinforces fundamental legal theories, principles and policies at an advanced level and in a practical way. The Venture Law Clinic allows students to undertake the legal analysis involved in launching a new venture and acquire the legal acumen to deal with real business issues. Students gain first-hand experience in working with real start-up companies under the supervision of the course instructor and supervisor, and experienced legal practitioners, getting the opportunity to deepen and critically reflect upon their substantive legal knowledge in entrepreneurial law and business law while developing critical professional skills through the direct representation of start-up businesses.

*Note: Places are limited. For application procedures, please refer to the Work Integrated Learning website for further details..*

Students will need to attend classes at Deakin Downtown, Collins Square, 727 Collins Street in Melbourne City. Attendance is compulsory for students to pass the unit.

## Assessment

- Assessment 1 (Group of 3) – Hypothetical case study (4000 words) – 40%
- Research essay – (5000 words) – 60%

## MLM719 – Human Rights Law and Policy

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tamsin Paige*

*Prerequisite: Students enrolled in M737 and M726:*

*MLM704. Students enrolled in M729: MLJ701, MLJ702, MLJ703, MLJ704 and MLJ709.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

## Content

This unit provides an introduction to international human rights law. It will consider human rights standards as established in international law, international law mechanisms in place to enforce these standards and situations when limitations on human rights are permitted. The implementation of human rights at the domestic level will also be critically examined. The study will include consideration of specific human rights and specific contemporary issues in human rights law, with a particular focus on the relationship between government policy and human rights practice.

## Assessment

- Policy related research essay, 40%
- Policy related research essay, 60%

## MLM720 – Introduction to Commercial Law

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Rami Hangebi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MLC701 and MLL720*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

## Content

This is a foundation law unit designed for students who are embarking on one of the School's postgraduate programs who do not have a law degree (or equivalent). The unit focuses on various learning, research and communication skills that are needed in order to complete subsequent coursework units and research papers. It also introduces a number of substantive law areas.

## Assessment

- Written assignment 1 2000 words 20%
- Written assignment 2 2000 words 20%
- Examination 2 hours (closed book) 60%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MLM721 – International Competition Law and Policy

*Enrolment modes: To be advised*

*Credit point(s): 1*  
*EFTSL value: 0.125*

*Prerequisite: Nil*  
*Corequisite: Nil*  
*Incompatible with: MLC706, MLL721 and MLM760*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

*Scheduled learning activities – cloud (online): 2h class (recordings provided) + 1h online seminar per week*

## Content

This unit introduces students to the law relating to the preservation of competition in the economies and internationally by examining the restrictive trade practices provisions of the Competition and Consumer Act 2010 (Cth) and comparable legislation in the USA, Europe and certain other jurisdictions. The theoretical underpinnings of those provisions and international developments are also examined. Topics include: evolution and goals of competition law; trade practices economics; restraint of trade; boycotts; anti-competitive agreements; price fixing; misuse of market power; exclusive dealing; resale price maintenance; mergers; authorisation, remedies and procedure; access; extra-territorial application; blocking and clawback legislation; international agreements on application and enforcement.

## Assessment

- Assignment 40%
- Examination 2 hours 60%

## MLM727 – Superannuation Law and Policy

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*  
*EFTSL value: 0.125*  
*Trimester 2 Unit Chair: Rami Hangebi*

*Prerequisite: For students enrolled in M729 Juris Doctor: MLJ701. For all other students: Nil.*

*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

This unit provides a broad overview of conceptual perspectives, critical issues and policy matters relevant to superannuation law. Critical analysis and evaluation of policy issues will include topics such as, the purpose and history of the Australian superannuation regime, main types of superannuation funds, superannuation contributions, qualification as a complying superannuation fund, taxation of superannuation, duties in setting up and running a fund, self-managed superannuation funds, and changes to superannuation law.

## Assessment

- Research essay (2500 words) – 25%
- Law problem solving exercise (1500 words) – 15%
- Examination (2 hours) – 60%

## MLM728 – Civil and Commercial Law Clinic

*Enrolment modes:*  
*Trimester 1: Deakin Downtown*  
*Trimester 2: Deakin Downtown*  
*Trimester 3: Deakin Downtown*

*Credit point(s): 1*  
*EFTSL value: 0.125*  
*Trimester 1 Unit Chair: Syd Balachandran*  
*Trimester 2 Unit Chair: Syd Balachandran*  
*Trimester 3 Unit Chair: Syd Balachandran*  
*Cohort rule: This unit is only available to students enrolled in M726, M729 and M737*

*Prerequisite:* MLM704 for M726: MLM704 plus 7 units for M737; MLJ702, MLJ706 plus 6 core units for M729  
*Corequisite:* Nil  
*Incompatible with:* Nil

*In-person attendance requirements:*  
 Weeks 1–11: Monday 8.00am–6.00pm and Wednesday 1.00pm–6.00pm

## Content

The Clinic environment will provide students with a 360 degree experience of professional practice, and a critical appreciation of its value. Students work in an office environment using professional matter management systems, deal with clients, research and provide strategic legal solutions, and engage with various parties including clients, parties on the other side as well as supervisors and colleagues. The Clinic provides legal services over a range of legal issues chosen to give students professional experiences touching the key types of legal problems, parties, decision makers and tribunals that will give students an insight into the diversity and complexity of legal practice. The areas of legal practice are: contract, migration law, consumer law, victims of crime compensation and special circumstances, and, fair work employment. Students will manage their own legal matter under the supervision of Clinic supervisors and specialist legal practitioners from initial client intake and interview to final outcome and closing of file (subject to Clinic time limits). Students develop high level professional skills through the challenge of applying theoretical legal knowledge to real world clients in order to develop strategic legal solutions that meet client needs. The Clinic develops advanced employment ready skills and gives students the opportunity to critically look at the legal systems and the opportunities to engage in law reform.

*Note: Places are limited. For application procedures, please refer to the Work Integrated Learning website for further details.*

Students will need to attend classes at Deakin Downtown, Collins Square, 727 Collins Street in Melbourne City. Attendance is compulsory for students to pass the unit.

## Assessment

- File management, including critical reflection (2500 words) 40%
- Legal research and Memorandum of Advice (3000 words) 30%
- Contribution to team file review meetings, 30%
- Oral presentation (1000 words) 10%
- Reflective journal (2000 words) 20%

## Hurdle requirement

Minimum attendance with no more than one day absent on clinic days.

# MLM731 – Corporations Law

*Enrolment modes:* Not offered in 2019

*Credit point(s):* 1  
*EFTSL value:* 0.125

*Prerequisite:* Nil  
*Corequisite:* Nil  
*Incompatible with:* MLC702, MLC730 and MLL731

*Scheduled learning activities – campus:* 2h class + 1h seminar per week

## Content

This unit will provide students with a basic knowledge of the regulation of companies by law under the Australian national corporations' legislation and related case law. Topics include: an introduction and historical background; characteristics of a corporation; types of corporation; the corporate constitution; corporate capacity and authority of those acting on a company's behalf; promoters; regulation of fundraising directors; shareholders; minority rights; share and loan capital; receivership; voluntary administration and deeds of company arrangement; liquidation.

## Assessment

- Written Assignment 3000 words 40%
- Examination 2 hours 60%

# MLM732 – Accounting and Legal Research Methods

*Enrolment modes:* Not offered in 2019

*Credit point(s):* 1  
*Previously coded as:* MAA730  
*EFTSL value:* 0.125

*Prerequisite:* MPA701, MLC707  
*Corequisite:* Nil  
*Incompatible with:* MAA730, MAA753

*Scheduled learning activities – campus:* 2h class + 1h seminar per week

*Scheduled learning activities – cloud (online):* 2h class (recordings provided) + 1h online seminar per week

## Content

This unit introduces students to professional research and analysis principles as they apply to the accounting discipline. The unit will introduce relevant principles to students and require students to critically analyse various

relevant, contemporary research reports within the accounting discipline. On the Law side, the unit will draw on major policy issues and legal developments in key areas of commercial law covered in other core units and deepen students' understanding on the ways in which such policy and legal issues are researched and bodies of relevant knowledge are developed to advance practice.

### Assessment

- Written Research report: Accounting Module (3000 words) – 25%
- Written Research report: Legal Module (3000 words) – 25%
- Examination (2 hours) – 50% (Accounting module: 25% and Legal module 25% based on problem solving questions)

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MLM770 – Law and the Internet

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MLL770*

*Scheduled learning activities – campus: 2h class + 1h seminar per week*

### Content

This unit introduces students to the regulatory challenges presented by the internet to more traditional areas of law such as contract, intellectual property and criminal law. In analysing these challenges, it draws on developments in foreign jurisdictions including the United States and Europe, and developments in international law. Topics include; history of the Internet, what it is and its underlying technology; the various services available on the Internet; how the Internet differs from other forms of communication and publication; the competing interests implicated in issues of internet regulation; and how and why the Internet presents challenges to existing legal paradigms.

### Assessment

- Written Assignment 1 2500 words 25%
- Written Assignment 2 5000 words 50%
- Written Assignment 3 2500 words 25%

## MLM782 – Indian Law

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: To be advised*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: Students will be required to attend a supervised study tour*

### Content

This unit has two principal aims. First, to introduce the current Indian legal system and, second, to study in detail some aspects of Indian commercial law, particularly law in relation to commercial transactions in India. The unit introduces Indian legal history and India's law-making mechanisms and then examines in more detail some key topics in Indian commercial law. After having completed the unit, you should have an understanding of both the underlying principles of the legal system, and Indian Commercial Law. Furthermore, you will have some exposure to the particular rules or principles which affect commercial transactions with India. The unit is designed to maximise the benefits to be gained from the study tour in India, drawing on the expertise available at the Indian institutions.

### Assessment

- Written Assignment 1 (Session Review) 500 words 10%
- Written Assignment 2 (Reflective Journal) 2000 words 30%
- Written Assignment 3 (Memorandum of Advice) 3000 words 60%

## MLM785 – Public International Law

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Morss*

*Prerequisite: For students enrolled in M729 Juris Doctor: MLJ701. For all other students: Nil.*

*Corequisite: Nil*

*Incompatible with: MLL785*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) and 1 x 1 hour online seminar per week*

## Content

This unit focuses on public aspects of international law which includes the regulation of peaceful relations between sovereign states, human rights protections and international criminal justice. Topics include the United Nations systems, sources of public international law and regulation of the use of force between sovereign states; and the protection of human rights by international agreements and by means of international criminal justice.

## Assessment

- Research Essay on individual topic – 60%
- Examination (2 hours) (open book) – 40%

## MLM786 – Electronic Crime

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*  
*EFTSL value: 0.125*

*Prerequisite: Nil*  
*Corequisite: Nil*  
*Incompatible with: Nil*

## Content

This unit addresses a range of issues relating to electronic crime, including: evolution of electronic crime; denial of service attacks; spreading of viruses; spamming; other forms of attack on computers; fraud; industrial espionage; money laundering; child exploitation; terrorism; harassment; and the computer as a storage device for a criminal offence.

## Assessment

- Written Assignment 1 4000 words 50%
- Written Assignment 2 4000 words 50%

## MLM788 – International Financial Crime

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*  
*EFTSL value: 0.125*

*Prerequisite: Nil*  
*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning resources are via CloudDeakin*

## Content

This unit aims to provide students with an understanding of the nature and complexity of international financial crime with a specific emphasis on the legal principles applying to key forms of financial crime. The unit will investigate the response of the international community to these crimes and explore representative examples of regulatory and corporate responses against these offences.

## Assessment

- Assessment 1- Research Paper (4500 words) – 50%
- Examination (2 hours) – 50%

## MLM790 – Marketing Law

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*  
*EFTSL value: 0.125*

*Prerequisite: Nil*  
*Corequisite: Nil*  
*Incompatible with: MLM760*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin*

## Content

This unit is designed to provide an introduction to: competition and consumer issues and intellectual property issues in complex industrial societies and the implications for sales and product promotion courses, marketing law; legal responses to the above, with particular reference to the Competition and Consumer Law Act 2011 (Cth) and key Intellectual Property statutes and related common law.

The unit considers marketing law applied to advertising and promotional activities, product liability and product development, distribution agreements and related consumer protection obligations.

### Assessment

- Written Assignment 3000 words 40%
- Examination 2 hours 60%

## MLM792 – Anti-Money Laundering and Counter-Terrorism Financing

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*  
*EFTSL value: 0.125*

*Prerequisite: Nil.*  
*Prerequisite for M584 students: MLM720*  
*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning resources are via CloudDeakin*

### Content

This unit aims to provide students with an understanding of the key principles relating to international anti-money laundering (AML) and counter-terrorism financing (CTF) law. The unit investigates the concepts of money laundering and financing of terrorism with a particular emphasis on the development of the international legal framework to counter these activities. It analyses the international AML/CTF standards and considers aspects of their implementation in a number of developing and developed countries.

### Assessment

- Written Assignment 5000 words 50%
- Examination 2 hours 50%

## MLT244 – Chinese Commercial Law

*Enrolment modes: Trimester 2: Study Tour*

*Credit point(s): 1*  
*Previously coded as: MLT344*  
*EFTSL value: 0.125*  
*Trimester 2 Unit Chair: Nuannuan Lin*

*Prerequisite: Students enrolled in M312, D312, D322, D323, D331, D335, D396 before 2019: MLL110. Students commencing M312, D312, D322, D323, D331, D335, D396 from 2019: MLL110 and MLL113.*  
*All other students: Nil*  
*Corequisite: Nil*  
*Incompatible with: MLL244, MLL344, MLT344*

*In-person attendance requirements: This unit requires students to attend a supervised study tour, including: 2 weeks of intensive teaching and learning in China (3 hour face to face seminars per day for 7 days in China). 7 to 8 professional field visits to court, Chinese/foreign law firms, foreign-Chinese joint ventures, Australian Embassy (Consulate), arbitration commission and the Patent Office.*

### Content

The study tour will cover the main legal topics related to trading and investing in China. The topics will be taught by Chinese/or Deakin experts in English. Most importantly, the students will have the opportunity to visit the Chinese law courts, local and foreign law firms, Chinese-foreign joint ventures, arbitration commissions and intellectual property authorities in China. The students also get a briefing from the Australian Embassy or Consulate on Australia-China bilateral relations. The students will gain important experience in international learning, social skills and teaming building while on the study tour.

*Note: The Deakin Law School reserves the right to not offer a study tour in any given year entirely at its discretion. Indication of interest in a study tour is not an assurance that the study tour will be offered. Students should always identify an alternative unit to a study tour unit when planning their course.*

Special enrolment procedure applies.

### Assessment

- Assessment 1 – Participation in the academic activities during the study tour – 20%
- Assessment 2: (Individual) – Written travel diary (3000 words) – 40%
- Written research assignment on an approved legal topic (3000 words) – 40%

### Hurdle requirement

Achieve at least 50% of each individual assessment.

# MLT266 – International Alternative Dispute Resolution

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*Previously coded as: MLT366*

*EFTSL value: 0.125*

*Prerequisite: Students enrolled in M312, D312, D322, D323, D331, D335, D396 before 2019: MLL110.*

*Students commencing M312, D312, D322, D323, D331, D335, D396 from 2019: MLL110 and MLL113.*

*All other students: Nil*

*Corequisite: Nil*

*Incompatible with: MLT366*

*In-person attendance requirements: This unit requires students to attend a supervised study tour at one of the following locations: Trimester 2: 2 weeks of intensive teaching and learning in New York, United States of America (4 hrs face to face seminar per day for 10 days in New York). Seminars to take place within various institutes including Pace University, the United Nations and a range of Alternate Dispute Organisations. Or Trimester 3: 2 weeks of intensive teaching and learning in Sri Lanka (4 hrs face to face seminar per day for 10 days in Sri Lanka) Seminars to take place within various institutes including University of Colombo, Sri Lankan Courts and the Attorney General's department.*

## Content

The study tour will cover the various alternate dispute resolution instruments used to resolve international commercial law disputes. The topics will be taught by the Director of International Commercial Law, Pace University, Senior Lecturer Pace University, New York based Judges, Mediators and Arbitrators. Most importantly, the students will have the opportunity to visit state and federal courts, alternative dispute resolutions institutions, the United Nations, Wall Street and local law firms. Students will also have an opportunity to network with Alumni located in New York. The students will gain important experience in international learning, social skills and teaming building while on the study tour.

*Note: The Deakin Law School reserves the right to not offer a study tour in any given year entirely at its discretion. Indication of interest in a study tour is not an assurance that the study tour will be offered. Students should always identify an alternative unit to a study tour unit when planning their course.*

## Assessment

- Assessment 1 – Participation in all academic activities of the study tour – 20%
- Assessment 2: (Individual) – Written travel journal (3000 words) – 40%
- Written research assignment on an approved legal topic (3000) – 40%

## Hurdle requirement

Study tour students must obtain 100% for Assessment 1, and 50% for Assessment 2 & 3 in order to pass this unit.

# MLT345 – Criminal Justice Study Tour

*Enrolment modes: Study Tour – Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Marilyn McMahon*

*Prerequisite: MLL218*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: This unit requires students to attend a supervised overseas study tour in North Carolina and Washington, USA.*

*North Carolina (Chapel Hill): 4 hour seminar per day, 4 x 4 hour site visits.*

*Washington: 20 hours of intensive learning activities*

## Content

This study tour will examine selected topics in criminal procedure and criminal justice in the United States. The specialist curriculum content will be taught at the University of North Carolina (Chapel Hill), by leading academics. In addition, local practitioners – including a State District Court Judge – will provide an insight into the practical workings of the criminal justice system. The course will provide an excellent basis on which to develop a comparative perspective on the operation of the criminal justice system in the United States and Australia. While based in Chapel Hill, students will have access to a prestigious American Law School, live in an American University town and be exposed to an American Law School teaching model (which is somewhat different to the approach usually adopted in Australian Law Schools).

The second phase of the program will be located in Washington DC. Further input into the program will come through the contribution of prosecutors working for the Department of Justice (specialising in organised crime and drug prosecutions) and the Federal Bureau of Investigation.

Students will be based on the Georgetown University Campus Conference Centre. While in Washington students will have the opportunity to visit the United States Supreme Court. There will also be opportunities to visit Congress and other iconic legal sites.

*Note: Special enrolment procedure applies. Enrolment in this program is by application only.*

## Assessment

- Class attendance and participation, including cultural events and site visits (20%)
- Multiple-choice assessment (paper-based, closed book and invigilated on location): 20%
- Assessment 3 (Pairs) – Written Assignment 3000 words, 60%.

## MLT703 – Chinese Commercial Law

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1  
EFTSL value: 0.125*

*Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil*

*In-person attendance requirements: This unit requires students to attend a supervised study tour, including: 2 weeks of intensive teaching and learning in China (3 hour face to face seminars per day for 7 days in China); 7 to 8 professional field visits to court, Chinese/foreign law firms, foreign-Chinese joint ventures, Australian Embassy (Consulate), arbitration commission and the Patent Office.*

## Content

The study tour will cover the main legal topics related to trading and investing in China. The topics will be taught by Chinese/or Deakin experts in English. Most importantly, the students will have the opportunity to visit the Chinese law courts, local and foreign law firms, Chinese-foreign joint ventures, arbitration commissions and intellectual property authorities in China. The students also get a briefing from the Australian Embassy or Consulate on Australia-China bilateral relations. The students will gain important experience in international learning, social skills and teaming building while on the study tour.

*Note: The Deakin Law School reserves the right to not offer a study tour in any given year entirely at its discretion. Indication of interest in a study tour is not an assurance that the study tour will be offered. Students should always identify an alternative unit to a study tour unit when planning their course.*

## Assessment

- Assessment 1 – Participation in the academic activities during the study tour – 10%
- Assessment 2: (Individual) – Written travel diary (3000 words) – 40%
- Written research assignment on an approved legal topic (3000–3500 words) – 50%

## Hurdle requirement

Achieve at least 50% of each individual assessment.

## MMC401 – Qualitative Research for Business

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1  
EFTSL value: 0.125  
Cohort rule: (For Bachelor of Commerce (Honours) and Bachelor of Property and Real Estate (Honours) students only)*

*Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

## Content

This unit will focus on skills needed to carry out qualitative research in management and marketing. This includes skills required for focus group research; interviewing; observational techniques; and case study research. In addition, the challenges of analysing and critiquing qualitative research will be considered. Selected topics include: the case study as a research strategy; the interactive nature of qualitative data-content analysis; coding and analysis of qualitative data and evaluating qualitative research.

## Assessment

- Assignment 1 (Research essay) 2500 words 30%
- Assignment 2 (Research essay) 3000 words 35%
- Assignment 3 (Research essay) 3000 words 35%

## MMC402 – Research Design Strategies for Business

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (For Bachelor of Commerce (Honours) and Bachelor of Property and Real Estate (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar*

### Content

This unit will work towards building students' capacity to apply the appropriate judgments in designing a large-scale research project, and a solid grasp of the criteria which distinguish excellent research designs. The unit takes an eclectic approach to developing a solid understanding of the various techniques and methods used by social science researchers and incorporates seminars, practical problem-solving, debate and discussion. Topics include: the research process and project planning; the research approach; research questions, propositions and hypotheses; the role of the literature review; issues of conceptualisation and operationalisation; data collection methods and decision-making; qualitative design considerations; quantitative design considerations; research ethics, building analysis into the design; project management and costing; and research proposals.

### Assessment

- Assignment 1 4000 words 40%
- Assignment 2 10000 words 60%

## MMC403 – Quantitative Research Methods for Business

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (For Bachelor of Commerce (Honours) and Bachelor of Property and Real Estate (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

This unit will provide students with the ability to design surveys, experiments and other methods of quantitative research and to analyse the resulting data. It will introduce students to a wide range of frequentist multivariate analysis tools based on dependence and interdependence techniques. It will also provide students with a solid grounding in computing skills using SPSS, Amos and Excel to enable them to communicate research results effectively, and provide them with a sound knowledge of the key issues and principles of data analysis. Students will also be encouraged to use a wide variety of sources of data including the selection of specific sub-samples from existing datasets, published tables and data available online.

### Assessment

- Written Assignment 1 (Report) 1000 words 20%
- Test 30%
- Written Assignment 2 (Research report) 5000 words 50%

## MMC404 – Research Paradigms for Business

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): This research unit involves a minimum of 33 hours supervised contact per trimester.*

### Content

This unit will provide students with a solid understanding of two major philosophical perspectives used in social theorising and methodological practice, and representative theoretical approaches used to interpret and explain human behaviour, actions, and organisations.

Students will explore how these ideas are used to construct theory and organise methodological practice.

Representative topics include: positivism; phenomenology; functionalism; interactionism; and critical theories. In seminars, students work through problem formulation, theory construction, reviewing and mining a literature, and developing theoretical models.

### Assessment

- Assessment 1: (Individual) Paradigm essay, 2000 words, 40%
- Assessment 2: (Individual) Research assignment, 4000 words, 60%

## MMC410 – Research Project

*Enrolment modes: Not offered in 2019*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Cohort rule: (For Bachelor of Commerce (Honours) and Bachelor of Property and Real Estate (Honours) students only)*

*Prerequisite: MMC401, MMC402 and MMC403*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): To be arranged with supervisor, minimum study commitment 30 hours per week*

### Content

This unit requires that students submit an Honours project report (thesis) which demonstrates a knowledge of the literature relevant to the research topic; the ability to formulate a feasible research problem relevant to management, human resource management, marketing, property and real estate, or sport management; the capacity to design a research project appropriate for the problem; the ability to undertake field research appropriate to the project design; a demonstrated ability to analyse and interpret data; and the capacity to communicate clearly the research findings.

### Assessment

Written Assignment 40,000 words 100%.

## MMH230 – Fundamentals of Human Resource Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kerrie Saville*

*Trimester 3 Unit Chair: Bruce Hearn Mackinnon*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MMM132*

*Corequisite: Nil*

*Incompatible with: MMH330*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1x 2 hour class (recordings provided) + 1 hour online seminar (recordings provided) per week*

### Content

This unit draws from contemporary theories and functions to provide students with a structured understanding of the strategic role of Human Resources in sustaining the performance of organisations. The unit takes a critical focus on the controversies and challenges involved in managing human resources.

### Assessment

- Written Analytical Essay (3000 words) 40%
- Examination (2 hours) – 60%

## MMH231 – Managing and Rewarding Performance

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Justine Ferrer*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MMM132*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class + 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): 1 x 2 hour recorded online class per week + 1 x 1 hour online seminar per week*

## Content

Managing and Reward Performance introduces students to the concepts and theories surrounding performance management and rewarding employees at work. Understand the intricacies associated with workplace and employee performance is critical to the fundamental application of what Human Resource Management practitioners do in the workplace. Knowing how to reward good performance is essential for employee motivation and overall organisational performance. From the unit students will develop an important understanding of performance management and reward systems to take into the workplace.

## Assessment

- Case Study Report 40%
  - Part A: Group assignment – Case Study Report (2500 words) 30%
  - Part B: Individual assignment – Critical reflection (1000 words) 10%
- Examination: 60%

## MMH232 – Human Resource Development

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Andrew Creed*

*Trimester 2 Unit Chair: Wouter Vleugels*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MMM132*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour recorded online class per week, 1 x 1 hour online seminar per week*

## Content

This unit provides students with the theoretical framework and practical skills required of practitioners in the human resource development area of organisations. It identifies the functions of human resource development within the organisation and considers current and future trends, including training and development, employee, and organisational development.

## Assessment

- Assessment 1 (Group of 4) – Training Presentation and group training documentation report (2000 words) – 30%
- Learning Insights (1500 words) – 20%
- Examination (2 hours) – 50%

## MMH250 – Workplace Counselling and Negotiation

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMH350*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bruce Hearn Mackinnon*

*Trimester 2 Unit Chair: Andrew Creed*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MMM132*

*Corequisite: Nil*

*Incompatible with: MMH350*

*Scheduled learning activities – campus: 1 x 1 hour class + 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour recorded online class per week, 1 x 2 hour online seminar per week*

## Content

This unit will focus on the development of skills in counselling, negotiation and advocacy activities. It will bring together a number of 'hands-on' applications used in the workplace. These include activities based around current employee relations issues, performance management and other Human Resource Management (HRM) topics. The unit will be based on Australian and American theory and practice. In addition to the literature base, class activities will include case study exercises, negotiation exercises and role plays.

## Assessment

- Assessment 1 (Group of 3) – Essay (2000 words) – 20%
- Assessment 2 (Group of 2) – Case Study Report (2000 words) – 20%
- Assessment 3 (Individual) – Reflection Paper (350 words) – 10%
- Examination (2 hours) – 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MMH331 – Strategic Human Resource Management

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kerrie Saville*

*Trimester 3 Unit Chair: Bruce Hearn Mackinnon*

*Prerequisite: Must have passed five units in MMH230, MMH231, MMH232, MMH250, MMH349, MMH352, MMH356.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour online class, 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour online class, 1 x 2 hour online seminar per week*

## Content

Strategic Human Resource Management (SHRM) encapsulates human resource management (HRM) knowledge and skills from within the major. SHRM considers the fundamental dimensions of HRM within various strategic HRM frameworks. The unit provides opportunity for the application of the collective HRM skills and knowledge in a real life business case, and as applied to contemporary HRM issues. The decision making of HR practitioners is considered in all aspects of the unit, especially as lens for critical thought and analysis of issues. Students will begin to understand how their accumulative experience in HRM has shaped their professional HRM identity as they move into the job market. SHRM brings together the HRM major in such a way that students will have clearly defined and evidenced job ready skills and knowledge.

## Assessment

- Assessment 1: Individual Professional Identity Assessment (Part A: 5 minute recording Part B: 800 words) – 20%
- Assessment 2: Individual Critical Reflection (2000 words) 20%
- Assessment 3: Workplace Case Study
  - Part A: Group of 3 (4000 words) 20%
  - Part B: Individual (2000 words) 40%

## Hurdle requirement

Successfully complete the professional literacy module to gain access to the assignment dropbox for assessment 1.

# MMH349 – Employment Relations

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Keith Abbott*

*Trimester 2 Unit Chair: Keith Abbott*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MMM132. For all other students: MMH230.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 4 x 1.5 hour workshops*

## Content

This unit provides a general introduction to the study of industrial relations. The multi-disciplinary nature of the unit is stressed within an introductory systems framework. Various sociological, economic, legal and other theories of industrial relations are examined. The system of workplace governance under the Fair Work Act 2009 is considered, as well as the role of trade unions, employer associations, collective bargaining processes, and various laws pertaining to contracts of employment, equal opportunity and occupational health and safety.

## Assessment

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour classes, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 11 x 1 hour online seminars (recorded)*

### Content

This unit provides an advanced understanding of various change management models within a sustainability framework. The unit takes a critical approach to the drivers of organisational change and the process for managing change while ensuring business sustainability.

### Assessment

- Written Progress Report (500 words) – 10%
- Written Final Report (3000) – 40%
- Examination (2 hours) – 50%

## MMH701 – Human Resource Strategy

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shuang Ren*

*Trimester 2 Unit Chair: To be advised.*

*Cohort rule: Nil*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPM722, MPR722, MPT722*

*Scheduled learning activities – cloud (online): 11 online seminars on each of the topics plus one seminar for assignment*

### Content

This unit provides an overview of the key functions associated with human resources management and examines the contribution of human resources to organisational performance and competitive advantage. The unit takes a theoretical approach to the external and internal dimensions of human resource management to develop the skills necessary for an effective human resource practitioner.

### Assessment

- Written Assignment 1 (Analytical Essay) 3000 words 40%
- Written Assignment 2 (Work Based Report) 4000 words 60%

## MMH702 – Strategic Staffing

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Wouter Vleugels*

*Cohort rule: Nil*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including a minimum of three scheduled online seminars*

### Content

This unit aims to develop students' understanding of the three core human resource functions, namely job analysis and design, human resource planning, and recruitment and selection to enable an organisation to meet its short and long-term human resource requirements.

### Assessment

- Assessment 1: Written Assignment (Critical essay) 3000 words, 40%
- Assessment 2: Written Assignment (Case study) 4000 words, 60%

## MMH703 – Developing People and Organisations

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bruce Hearn MacKinnon*

*Cohort rule: Nil*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including three scheduled online workshops*

### Content

The unit provides the framework for developing talent within organisations with a particular focus on talent, knowledge and diversity management. The unit takes a theoretical and practical approach to human resource development in order to improve organisational performance at the organisational level through to the individual level of development.

### Assessment

- Assessment 1: Written Assignment (Critical essay) 3000 words, 40%
- Assessment 2: Written Assignment (Workplace report) 4000 words, 60%

## MMH704 – Performance Management and Reward

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Joe Jiang*

*Cohort rule: Nil*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including four scheduled online seminars*

### Content

This unit provides students with the skills to examine, analyse and critically evaluate the role which human resource management plays in managing the rewards and performance of individuals and groups in organisations. Topics include: performance appraisal; rewarding; managing employee retention; managing exiting strategies; conflict resolution; Australia's industrial relations framework; workplace bargaining; occupational health and safety; equal employment opportunities; and affirmative action.

### Assessment

- Written essay – 3000 words – 40%
- Workplace report – 4000 words – 60%

## MMH707 – Organisational Development and Change

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mike Bengough*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPR707*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including a minimum of 3 scheduled online seminars*

### Content

This unit provides an advanced understanding of various approaches to change management and the strategic role of human resource management in this process. The unit draws from the theoretical literature to analyse different intervention tools in measuring and sustaining change in organisations.

### Assessment

- Essay (Analysis of relevant theory) 2500 words, 40%
- Assessment 2 (Groups of 3) – Two parts – totalling 50%
  - Part 1: Business Report (3500 words) – 40%
  - Part 2: Personal reflection of teamwork dynamics while working on the development of the change management plan (1000 words) – 10%
- Assessment 3 (Individual) – Online learning reflections (x 5) (100 words per reflection) – 10%

## MMH709 – Employment Relations for Organisational Effectiveness

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Keith Abbott*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops*

### Content

This unit presents an overview of employment relations in an Australian and international context. It focuses on the way employment relationships are managed within a framework of change. The unit sets out the unique nature of the employment relationship, adopting historical and theoretical frameworks of analysis and introduces students to different modes of bargaining.

### Assessment

- Written assignment 3000 words 40%
- Written assignment 4000 words 60%

## MMH710 – Rights and Responsibilities in Human Resource Management

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Keith Abbott*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops*

### Content

This unit focusses on the specific requirements of HR managers in ensuring their organisations comply with different regulatory requirements. The unit provides students with a critical knowledge of employer and employee rights and responsibilities, from an HR perspective.

### Assessment

- Written Assignment 1 – Literature Review Essay – 3000 words – 40%
- Written Assignment 2 – Workplace Report – 4000 words – 60%

## MMH733 – Ethics for Managers

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Michael Callaghan*

*Trimester 3 Unit Chair: Michael Callaghan*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): 11 x 3 hour class (recordings provided) + 11 x 1 hour online workshop*

### Content

This unit aims to develop student's abilities to analyse the complex, ethically and politically charged, nature of managerial work; differentiate between the multiple responsibilities managers have towards different local and global stakeholders; and evaluate the ways in which management seeks to discharge these responsibilities.

### Assessment

- Written assignment (1500 words) – 20%
- Written assignment (3000 words) – 40%
- Examination (2 hours) – 40%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MMH753 – Human Resource Management in the Global Context

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Connie Zheng*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online seminars*

### Content

Human Resource Management in the Global Context provides students with an advanced theoretical knowledge required to manage people effectively in a global environment. The unit critically examines changes which are shaping global HR practices and takes a comparative approach in developing students' appreciation of managing people in different cultural and institutional contexts. A major focus is upon the role of the Multinational Corporation and national variations in HRM practices.

### Assessment

- Research Assignment (3000 words) – 40%
- Case study report (5000 words) – 60%

## MMK101 – Marketing Fundamentals

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Micaela Spiers*

*Trimester 2 Unit Chair: Adnan Yusuf*

*Trimester 3 Unit Chair: Thomas Gaarenstroom*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MMK277*

*Scheduled learning activities – campus: 1 x 2 hour class (livestreamed with recordings provided) per week + 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (livestreamed with recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week*

### Content

Marketing is the most dynamic area of business and the glue that holds organisations together – it connects organisations with the world, and opens up new and exciting job opportunities.

Marketing is the only discipline that generates revenue for organisations by creating value for consumers, while capturing value for the organisation through building relationships with customers. MMK101 focusses on the creativity involved in the marketing process, ranging from understanding consumer needs to designing customer-driven integrated marketing strategies using the marketing mix. If you are creative, strategic and a critical thinker, then marketing is for you!

## Assessment

- Digital literacy module online (COMPULSORY) – 0%
- Written report including analysis (750 words) – 20%
- Written report including analysis (1500 words) – 40%
- Examination (2 hours) – 40%

## Hurdle requirement:

Students must successfully complete the Digital Literacy Module in full by the due date and time before they are able to submit Assignment 2.

## MMK226 – Retailing

*Enrolment modes: Not Offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Nil*

*Corequisite: MMK101*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour class (recordings provided) + 2 hour online seminar (livestreamed with recordings provided) per week*

## Content

This unit introduces the students to retailing from a managerial perspective. This includes the historical overview of retailing, the structure of retail organisations, current issues and challenges in the retail industry, developing effective retail pricing, promotion, brand, communication strategies, merchandise management, logistics, customer service, store design, and retail performance monitoring.

## Assessment

- Retail Project Plan report (4000 words) 50%
- Examination (2 hours) 50%

## MMK251 – Services Marketing

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood\* (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMK351*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Lisa McQuilken*

*Trimester 2 Unit Chair: Allison Ringer*

*Prerequisite: MMK101 or MMK277*

*Corequisite: Nil*

*Incompatible with: MMK351*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*\* 1 x 1 hour seminar per week only*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week*

## Content

Services dominate the economies of developed countries, and services are playing an increasingly important role in developing South-East Asian countries. Service industries currently employ over 80% of the Australian workforce, and it is anticipated that 90% of all new jobs created in Australia during this decade will be in the service sector.

The central theme of this unit is that services organisations differ from manufacturing firms in many important ways, and as a result, require a distinctive approach to marketing strategy. In this unit students will explore the conceptual and theoretical foundations of various frameworks and models within the services marketing arena. This is a highly practical unit that allows students the opportunity to apply theory to real-life situations on an on-going basis.

## Assessment

- Assessment 1 – Individual written assignment (1000 words) – 15%
- Assessment 2 – Individual written assignment (2500 words) – 45%
- Examination (2 hours) – 40%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MMK266 – Consumer Behaviour

*Enrolment modes:*  
 Trimester 1: Waterfront (Geelong), Cloud (online)  
 Trimester 2: Burwood (Melbourne), Waterfront (Geelong)\*, Cloud (online)

*Credit point(s): 1*  
*EFTSL value: 0.125*  
 Trimester 1 Unit Chair: Nicholas McClaren  
 Trimester 2 Unit Chair: Alison Ringer

*Prerequisite: MMK277 or MMK101*  
*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour seminar per week*

*\* 1 x 1 hour seminar per week only*

*Scheduled learning activities – cloud (online): 1 x 1 hour class (recordings provided) + 2 hour online seminar (livestreamed with recordings provided) per week*

## Content

Consumers lie at the heart of the marketing exchange, so understanding how they think, feel, and respond to the world around them is essential for developing marketing strategies that work. This unit consequently explores some of the psychological, social, and cultural processes that make consumers ‘tick’ and shows how knowledge of these processes can be used to better market both new and existing products and services.

## Assessment

- Written assignment – Interview analysis (1000 words), 20% (Two parts, total 40%)
  - Part A: Written communication plan (1500 words) – 30%
  - Part B: Video pitch (2 minutes) – 10%
- Examination (2 hours) – 40%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MMK280 – Brand Management

*Enrolment modes:*  
 Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)  
 Trimester 3: Burwood (Melbourne), Cloud (online)

*Credit point(s): 1*  
*Previously coded as: MMK380, MMT280*  
*EFTSL value: 0.125*  
 Trimester 2 Unit Chair: Allison Ringer  
 Trimester 3 Unit Chair: Adnan Yusuf

*Prerequisite: MMK277 or MMK101*  
*Corequisite: Nil*  
*Incompatible with: MMK380, MMT280*

*Scheduled learning activities – campus:*  
 Trimester 2: 1 x 2 hour class, 1 x 1 hour seminar per week  
 Trimester 3: Weeks 1–5: 2 x 2 hour classes + 2 x 1 hour seminar per week (livestreamed with recordings provided) and Week 6: 1 x 2 hour class and 1 x 1 seminar (livestreamed with recordings provided).

*Scheduled learning activities – cloud (online):*  
 Trimester 2: 1 x 2 hour class (recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week  
 Trimester 3: Weeks 1–5: 2 x 2 hour classes + 2 x 1 hour seminar per week (livestreamed with recordings provided) and Week 6: 1 x 2 hour class and 1 x 1 seminar (livestreamed with recordings provided).

## Content

In today’s competitive world, a key to success is building a strong sustainable brand. This involves creating an identity for your brand by developing a captivating, positive and enduring brand image of your company, product or service. This distinguishes your brand from competitors, and creates an emotional connection with your customers and other stakeholders. The brand reflects the entity’s essence, history and values, as well as its future direction. Branding is not isolated to the business world, it is fundamental in your personal development. Personal branding helps create a personality and professional identity that distinguishes you from others. This is an important attribute as you begin and progress along your career and life journey. This unit is designed to allow students to explore and apply fundamental brand management and marketing theories, frameworks and applications to different personal and corporate, product and service contexts.

## Assessment

- Assessment 1 – Individual reflection (Employability – Building your Personal Brand), (1500 words) – 20%
- Assessment 2 – (Group 2–3) Written report (3500 words) – 40%
- Examination (2 hours) – 40%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MMK295 – Integrated Marketing Communications in the Digital Age

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jeffrey Rotman*

*Trimester 3 Unit Chair: Virginia Weber*

*Prerequisite: MMK101 or MMK277*

*Corequisite: Nil*

*Incompatible with: Previously coded MMK393*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week*

### Content

This unit offers an examination of promotion management as a key area of marketing decision-making. It puts particular emphasis on the evolving role of digital technologies and customer use of digital media. The unit looks in detail at the promotion management mix – advertising, public relations, direct marketing, sales promotion and personal selling – and how these five promotional elements are coordinated to formulate an effective promotional strategy. Special emphasis is put on the integration of promotional tools and utilising each according to its respective strengths and weaknesses.

### Assessment

- Assessment 1 – Written Assignment – 50%
  - Part A: Individual, 1000 words (15%)
  - Part B: Group of 3, 3000 words (35%)
- Assessment 2- Written Reflection, 500 words – 10%
- Examination, 2 hours – 40%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MMK317 – Merchandise Management

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: MMK226*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour class (recordings provided) + 2 hour online seminar (livestreamed with recordings provided) per week*

### Content

This unit explores the critical relationships that exist between retailers and suppliers, which increasingly define the effectiveness of merchandise management strategy across key supply chain stages including distribution, data exchange, shopper marketing, category captaincy and range planning.

### Assessment

- Written report (4000 words) – 50%
- Examination (2 hours) – 50%

## MMK325 – Strategic Marketing

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong)\*, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ahmed Ferdous*

*Trimester 2 Unit Chair: Adnan Yusuf*

*Prerequisite: MMK365 or MMK265 plus four units from MMK251, MMK266, MMK280, MMK295, MMK393, MMK368, MMM343.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class, 1 x 2 hour seminars per week*

*\* 1 x 2 hour seminars per week only*

*Scheduled learning activities – cloud (online): 1 x 1 hour class (recordings provided) + 2 hour online seminar (livestreamed with recordings provided) per week*

## Content

This unit considers the nature of marketing strategy and its relationship to corporate strategy formulation. Strategic planning is looked at from a marketing orientation, focusing on how an organisation's resources can be more effectively utilised to achieve objectives. This includes an examination of the relationship between marketing activities and organisational strategic planning, an analysis of strategic marketing concepts and the evaluation and control of the strategic marketing process.

## Assessment

- Assessment 1: (Group of 3) Strategic Marketing Applied Report (3500 words) – 60%
- Assessment 2: (Individual) Professional Identity Task in Marketing – 20%
- Assessment 3: (Individual) Brief Case Study Reports – (2000 words) – 20%

## Hurdle requirement

Achieve at least 50% of Assessment 2 and 3 combined marks (i.e. at least 20 out of 40 marks). Successfully complete the professional literacy module to gain access to the assignment dropbox.

# MMK365 – Marketing Insights

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne)\*, Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMK265*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Marion Steel*

*Trimester 2 Unit Chair: Thomas Gaarenstroom*

*Prerequisite: MIS171 plus one of MMK277 or MMK101 plus one of MMK266, MMK295 or MMK393.*

*Corequisite: Nil*

*Incompatible with: MMK265*

*Scheduled learning activities – campus: 1 x 1 hour class, 1 x 2 hour seminar per week*

*\* 1 x 2 hour seminar per week only*

*Scheduled learning activities – cloud (online): 1 x 1 hour class (recordings provided) + 2 hour online seminar (livestreamed with recordings provided) per week*

## Content

Marketers live in a world full of information. Making sense of that information is a key task of the modern marketer and forms a critical input to the strategic process. This unit examines the uses and interpretation of information in gaining an understanding of the world in which the marketing firm operates. The unit progresses from the macro to the micro. The unit starts with externally available secondary data and introduces the processes of identifying and analysing trends, demographic changes, and economic adjustments to provide inputs to the long term strategic process.

The unit then moves to interpreting commonly available internal data such as sales, returns, and complaints and matches that with data available externally from the business's own web pages and social media to create a picture of the firm's customers and their immediate behaviours. Next, the unit explores the interpretation of bespoke research to address specific strategic problems in the medium term.

This unit emphasises the interpretation of analysis performed by others and sorting the important information from the irrelevant in order to feed into the strategic process of the firm.

## Assessment

- Assessment 1 (Group of 4 students) – Written Report (2000 words) – 20%
- Assessment 2 (Group of 4 students) – Written Report and presentation (2000 words and 10 mins) – 30%
- Examination (2 hours) – 50%

## Hurdle requirement

Students must attempt ALL assessments and must achieve at least 50% of the marks available on the examination.

# MMK368 – Business Marketing

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nicholas McClaren*

*Trimester 2 Unit Chair: Nicholas McClaren*

*Prerequisite: MMK277 or MMK101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week*

## Content

Business Marketing is about the marketing conducted between businesses and other organisations. The unit examines the nature of business markets, managing commercial relationships in business-to-business marketing, professional selling and the management of selling, the management of distribution channels, and business marketing strategy. The content includes aspects such as the concepts and processes involved in business marketing and the management of marketing in business-to-business contexts.

## Assessment

- Assessment 1: (Individual) – Written report 1 report (1000 words) – 15%
- Assessment 2: (Individual) – Written report (3000 words) – 45%
- Examination: (2 hours) – 40%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

Special emphasis is put on the integration of digital marketing tools and media in terms of utilising each according to its respective strengths and weaknesses in achieving attitudinal, behavioural and financial outcomes.

## Assessment

- Assessment 1 – Written Report (Group of 3) – 4000 words – 40%
- Examination (2 hours) – 60%

# MMK738 – Integrated Marketing Communication

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Michael Valos*

*Prerequisite: Nil*

*Corequisite: MBA704/MBR704 or MBA720/MBT720 or MPK732/MPT732*

*Incompatible with: MPK712*

*Scheduled learning activities – campus: 1 x 3 hour seminar (livestreamed with recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (livestreamed with recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week*

## Content

The aim of this unit is to apply the planning, executing and evaluating processes of the Integrated Marketing Communication (IMC) model to industry case studies (in both class and assignment). Students will develop skills in understanding and applying synergies between marketing communication tools such as advertising, sales promotion, public relations, digital and personal selling. This promotional tools need to be applied in an effective and efficient way to impact consumers. In addition, approaches to developing appropriate brand messages and achieving brand consistency through multiple media will be developed.

## Assessment

- Assessment 1 (Group of 3) – Written assignment/report (4000 words) – 40%
- Examination (2 hours) – 60%

# MMK737 – Online Marketing

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Alvin Lee*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar (livestreamed with recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (livestreamed with recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week*

## Content

This unit offers an examination of digital marketing as the major focus of change for the marketing discipline. It puts particular emphasis on the evolving role of digital technologies and customer use of digital media. The unit considers the implications of digital technologies for segmentation, targeting, positioning, price, place, product and promotion.

*MBA720/MBT720*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar (recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (recordings provided) per week + 3 x 1.5 hour online seminar (livestreamed with recordings provided) per trimester*

### Content

Learn new ways to think about, build and grow brands. This practical unit covers contemporary issues and trends that affect brand stewards. Students will master a set of tools to manage brand-related issues. Course material makes extensive use business cases and is organised around three themes. The first builds the theoretical foundations that are needed to understand the science of branding. This explores what a brand is and what strong brands can do to increase a firm's competitive advantage. The second theme investigates key aspects of brand management: students learn ways to develop a brand positioning strategy, to evaluate brand equity, manage a brand portfolio, plan a brand communication strategy, and branding on new media. The last theme focuses on special issues that are particularly important for branding practice.

### Assessment

- Video 1 (1 minute) 10%; Video 2 (1 minute) 15% (total 25%)
- Learning journal (2000 words) 25%
- Written report (2000 words) 25%; Presentation (individual) (20 minutes) 25% (total 50%)

## MMK751 – Services Marketing

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nichola Robertson*

*Prerequisite: Nil*

*Corequisite: MBA704/MBR704 or MBA720 or*

*MPK732/MPT732*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar (recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week*

### Content

Services dominate the economies of developed countries, and services are playing an increasingly important role in developing South-East Asian countries. Service industries currently account for approximately 70-80% of Australia's GDP and employ over 80% of the workforce. It is anticipated that 90% of all new jobs created during this decade will be in the service sector.

Service organisations differ in many important respects from manufacturing organisations, requiring a distinctive approach to planning and implementing marketing strategy. This subject builds on the knowledge gained in Marketing Management by providing a detailed analysis of how to tailor marketing goals and strategies to service organisations. This is a highly practical unit that allows students the opportunity to apply theory to real-life situations on an on-going basis.

### Assessment

- Industry-based written research report (4000 words) 40%
- Examination (2 hours) 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MMK792 – Arts Marketing

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Anne Kershaw*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 11 weekly scheduled online seminars.*

### Content

Arts marketing plays a key role in ensuring the arts engage diverse audiences and stakeholders. Arts marketing offers artists and organisations the opportunity to broaden, deepen and diversify the audiences for their work. This unit develops students' arts marketing skills, addressing both strategic marketing planning and the use of marketing tools and techniques such as audience development, branding, market segmentation, promotions and e-marketing. The role of marketing in the arts sector is examined, in terms of a product-led focus (presenting quality arts and cultural products); and target-led approaches (understanding audiences and the nature of cultural experiences). Case studies are used to present marketing techniques specific to the arts sector, and to examine the use or modification of marketing approaches from other sectors.

### Assessment

- Case study blog (2500 words) – 40%
- Marketing Plan (4000 words) – 40%
- Weekly seminar participation (1500 words) – 20%

## MMM111 – Intrapersonal Skills

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Andrea Howell*

*Trimester 2 Unit Chair: Andrea Howell*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 9 scheduled online seminars*

### Content

This unit provides students with the necessary tools to develop and improve their intrapersonal skills. Students will also undertake a reflective practice of reviewing their own intrapersonal skills with a view to developing a self-diagnosed strategy where improvement is desired. Intrapersonal skills provide the foundation for effective communication and active collaboration as they focus on understanding the capabilities of you as the individual, as well as how and what sort of strategies should be employed for improvement.

*Note: Non-compulsory support seminars are available during the first few weeks of the trimester.*

### Assessment

- Five individual assignments (5 x 18%) – 90% – to be completed out of a selection of a possible eight modules – one assignment per item per module as follows:
  - 3 written assignments (1000 words each)
  - 2 oral assignments (5–10 minutes audio/video recording per assignment)
- A written self-reflective piece on the whole learning journey of MMM111 (1000 words) – 10%

## MMM132 – Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 2: Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wendy Webber*

*Trimester 2 Unit Chair: Wendy Webber*

*Trimester 3 Unit Chair: Wendy Webber*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SEB121, MMM101*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (livestreamed with recordings provided) + 1 x 1 hour online seminar (livestreamed with recordings provided)*

## Content

The aim of this unit is to provide students with a critical understanding of the intellectual foundations of the study of management. The unit will provide the opportunity to analyse how the solutions to management 'problems' have developed under different conditions throughout the nineteenth and twentieth century. The unit also explores how management practice influences, and is influenced by, the external environment. This will involve examining how managerial action impacts on and is shaped by the environment, through a consideration of globalisation, ethics, social responsibility and the social and cultural context of management.

## Assessment

- Written assignment (3000 words) – 40%
- Assessment 2 (Group of 4) – Concept summary and reflection – 10%
- Examination (2 hours) – 50%

## MMM211 – Team Dynamics

*Enrolment modes:*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Wendy Webber*

*Trimester 3 Unit Chair: Paul Turner*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including weekly attendance at team meetings and 9 scheduled online seminars*

## Content

The aim of this unit is to develop your expertise in understanding the importance of leadership and teamwork and how these are applied by individuals and in organisations to establish an effective management environment. This involves cultivating diverse skills such as innovation to foster productivity and being equipped to deal with negotiation, mediation and conflict resolution. As a result you will develop the basic building blocks to form a team, work effectively with teams and have a solid base from which to lead and work in a team environment in your future career.

## Assessment

- Assignment (3000 words) – 35%
- Assessment 2 (Group of 4) – Report (3000 words) – 35%
- Assessment 3 (Individual): Peer review and written reflection (2500 words) – 30%

## Hurdle requirement

Evidence of contribution of at least 25% to the development of the Team Charter in Assessment 2.

## MMM233 – Business and the Environment

*Enrolment modes: Not offered 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) + 1 hour online seminar per week*

## Content

This unit explores how sustainability issues affect businesses, as well as the strategies that organisations can use to integrate environmental considerations into their planning. Students will be provided with an overview of environmental, social and economic issues affecting business decisions and operations. Applied academic research and case studies will be used to inform students of recent responses to sustainability. Students will have the opportunity to examine and critique both sustainable and unsustainable behaviours and practice in our society.

## Assessment

- Written assignment 1 1500 words 20%
- Written assignment 2 3000 words 30%
- Examination 2 hours 50%

## MMM240 – Organisational Behaviour

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Huong Le*

*Trimester 3 Unit Chair: Lee Martin*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MMM132*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 11 x 2 hour class (recordings provided) + 1 hour online seminar (weekly)*

### Content

This unit examines the processes and structures at the individual, group, and system level which influence organisational behaviour. The aim is to develop an ability to analyse and evaluate the behaviour of people in organisations. The unit covers topics such as perception, values and attitudes, motivation, leadership, power and politics, work and organisation design, organisational culture, organisational change and development.

### Assessment

- Assignment 1 (essay) 2500 words 30%
- Assignment 2 (reflective journal) 2000 words 20%
- Examination 2 hours 50%

## MMM241 – Entrepreneurship and Innovation

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Fara Azmat*

*Trimester 2 Unit Chair: Andrew Creed*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MMM132*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) + 1 hour online seminar weekly (recordings provided)*

### Content

This unit provides students with an understanding of the dynamic nature of entrepreneurship including the challenges and opportunities that are experienced by entrepreneurs. An introduction to a range of processes and strategies will help students develop the necessary tools for identifying, creating and evaluating opportunities across the private, public and non-profit sectors. The unit design allows students to enhance and apply their knowledge towards the creation of positive social or environmental change.

### Assessment

- Progress Report (1000 words) – Reflection of the individual progress and contribution towards the group effort – 10%
- Assessment 2 (Group of 3) – Group Report (4500) – 40%
  - Part A: Group report (3900 words) – 30%
  - Part B: Individual Report (600 words) – 10%
- Examination (2 hours) – 50%

## MMM267 – Business Logistics

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMM367*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sukanto Bhattacharya*

*Trimester 2 Unit Chair: Sukanto Bhattacharya*

*Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388 from Trimester 1 2016: MMM132*

*Corequisite: Nil*

*Incompatible with: MMM367*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities (recordings provided) including weekly 1 hour scheduled online seminars.*

## Content

This unit provides students with the skills and knowledge of effective and efficient supply chain management and how it can help manufacturing firms and service providers to improve their performance in a highly competitive global marketplace. Topics include: supplier relationships, demand forecasting, inventory management, ethical sourcing, green and sustainable supply chains; resource planning systems, lean supply chains, and supply chain integration and performance management.

## Assessment

- Written Assessment: Research Report (3000 words) – 40%
- Examination (2 hours) – 60%

## MMM276 – Design Thinking

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MIS276*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Achinto Roy*

*Prerequisite: Completion of 4 credit points*

*Corequisite: Nil*

*Incompatible with: MIS276*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): 11 x 3 hour class (recordings provided) + 11 x 1 hour online seminar*

*In-person attendance requirements: The unit has in class activities that will form part of the assessment. Cloud students will be asked to attend a 3 hour class one evening a week. If you are unable to attend these classes, contact the Bachelor of IS Course Director for an alternative unit.*

## Content

Design thinking refers to a style of thinking that combines sensitivity for the context of a problem, creativity in the generation of new insights and solutions, and rationality in analysing and fitting solutions to the context. This unit introduces students to concepts and methods associated with design thinking in a range of business and social contexts. It explores key approaches associated with the practice of design thinking, such as ethnographic techniques for understanding the problem context, creative approaches for idea generation, ill-structured problem solving, collaborative/participatory teamwork and human-centred problem solving. The unit will develop the basis for innovative and creative thinking in students and develop confidence for students to think innovatively.

## Assessment

- Individual design thinking ePortfolio 50%
- Team project and presentation 50%

## MMM279 – Creating and Managing Social Enterprises

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Achinto Roy*

*Prerequisite: MMM132*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hours seminar in weeks 1, 2, 3, 10 and 11 plus a two day intensive\**

## Content

This unit introduces students to the concept of social entrepreneurship and its role in delivering social good through the creation of business enterprises in multiple environments. The unit uses real world case studies that demonstrate the harnessing of business skills that serve social objectives under financially viable conditions. It will also make use of guest lecturers who are social entrepreneurs.

*Note: \*Thu 8 August 2019 full day and Fri 9 August 2019 full day. Attendance is compulsory for students to pass the unit.*

## Assessment

- Written assignment: Individual Research Project (2500 words) 30%
- Assessment 2 (Group of 3–5 students) Part A Written assignment (500 words) 5%, Part B Written project report (3000 words) 35%
- Written feedback on two other teams' assessment 2 (A) (500 words) 10%
- Assessment 4 (Group of 3–5 students) Presentation based on assessment 2 (10 mins) 10%
- Assessment 5 (Individual) Intensive workshop presentation (5 mins) 10%

## Hurdle requirement

Provide feedback to 2 other teams on assessment 2 (part A) within a week.

# MMM306 – Global Strategy and International Management

## Enrolment modes:

Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)

Trimester 2: Burwood (Melbourne), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Banjo Roxas

Trimester 2 Unit Chair: Stuart Orr

Prerequisite: MMM132

Corequisite: Nil

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week

Scheduled learning activities – cloud (online): Online independent and collaborative learning activities (recordings provided) including weekly 1 hour scheduled online seminars.

## Content

This unit introduces students to the tools for formulating strategy for firms operating in an international environment. The unit starts with an analysis of the external and internal environments of the organisation and proceeds with the formulation of the appropriate strategy taking into consideration the economic, social and environmental objectives of the organisation. The unit exposes students to the theoretical and conceptual literature in global strategy and highlights the rapid emergence of multinationals from emerging economies and the strategic role of the government in these economies.

## Assessment

- Written assignment 1: Case analysis (2000 words) – 20%
- Assessment 2 (Group of 3 students) – Written assignment 2: Group research project (4000 words) – 30%
- Examination 2 hours – 50%

# MMM308 – Applied Management Capabilities

## Enrolment modes:

Trimester 1: Burwood (Melbourne), Cloud (online)

Trimester 2: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Huw Flatau Harrison

Trimester 2 Unit Chair: Melissa Parris

Prerequisite: Must have passed five units in MMH230, MMM240, MMM241, MMH356, MMM267, MMM306, MMM343

Corequisite: Nil

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 1 hour recorded (videos provided) class and 1 x 2 hour seminar

Scheduled learning activities – cloud (online): 1 x 1 hour recorded (videos provided) class and 1 x 2 hour online seminar

## Content

Students undertaking a Management major have studied a diverse range of units from those that are very functional in nature, to those that are people focused and those that are outward looking.

The aim of MMM308 is to consolidate all of these elements into a cohesive whole that blends key concepts and provides students with an holistic overview of responsible and sustainable management in a diverse, global environment.

## Assessment

- Assessment 1 (Group up to 4 (40%) and individual (20%)) – applied project report (up to 5000 words) – 60%
- Critical Reflection and Analysis (up to 2000 words) – 20%
- Assessment of Management Skills (up to 1000 words) – 10% and video pitch – 10%

## Hurdle requirement

Successfully complete the professional literacy module to gain access to the assignment dropbox for assessment 3.

# MMM311 – Global Mindset and Citizenship

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Alfred Presbitero*

*Previously: Global Citizenship*

*Prerequisite: MMM111 or MMM211*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities (recordings provided) including weekly 1 hour scheduled online seminars.*

## Content

This unit develops the capacity of the student to become a responsible global citizen by increasing the student's awareness and knowledge of key drivers of change which are likely to impact business and society significantly. The unit focuses on the critical and objective evaluation of selected global issues facing mankind, their likely impacts and potential threats and opportunities at the local community level. The unit takes on a problem-based approach to learning whereby students are given the opportunity to develop their analytical and ethical skills in examining major global social, political, economic and environmental issues facing the world today and the challenges they represent for business and society.

## Assessment

- Assessment 1: (Individual) – Citizen Advocacy exercise. Each student will prepare an advocacy paper on selected issues covered in the unit (1500 words) – 20%
- Assessment 2: (Group of 3) – Group project. This is a research-based project where students work in teams to identify a particular issue which is likely to be of global citizenship significance, collect and analyse the necessary data and report on the implications of this issue on business and society (5000 words) – 30%
- Examination: (2 hours) – 50%

## From Trimester 2 2019

- Assessment 1: (Individual) – Global Mindset paper (1500 words) – 20%
- Assessment 2: (Group of 3) – Group research project (3000 words) – 30%
- Examination: (2 hours) – 50%

# MMM312 – Event Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Anne Kershaw*

*Trimester 2 Unit Chair: Amanda Coles*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar*

*Students are also required to view the prescribed online video(s) each week coupled with related readings prior to the seminar in order to be able to contribute effectively to the seminar activities*

*Scheduled learning activities – cloud (online): 11 x 2 hour workshop (recordings provided) + 3 x 1 hour online seminars*

## Content

Events and celebrations are a feature of all societies. They define our lives, culture and community while also delivering a range of social, economic and environmental outcomes. Businesses, government and community organisations are increasingly engaged in developing and delivering a diverse range of events such as festivals, sporting events, community celebrations, conferences, team building and product launches.

This unit develops students' knowledge and skills in the design, planning, organisation and operation of events. It examines the use of a range of management processes in the events industry including project management; operations and logistics; risk management; financial management; human resources; and strategic marketing. The unit also examines the factors that enable events to be environmentally sustainable. This unit is practical and emphasises the skills and expertise needed by event managers through a focus on 'hands on' learning.

## Assessment

- Case study Evaluation (1500 words) – 20%
- Assessment 2 (Group of 4–6 students) – Project plan report – with each group to cover a particular area of event management (4000 words) – 40%
- Examination (2 hours) – 40%

## MMM315 – Business Management Capstone

### Enrolment modes:

Trimester 2: Burwood (Melbourne), Waterfront

(Geelong), Cloud (online)

Trimester 3: Burwood (Melbourne), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 2 Unit Chair: Alfred Presbitero

Trimester 3 Unit Chair: Alfred Presbitero

Cohort rule: This unit is only available to students enrolled in M325 Bachelor of Business

Prerequisite: Completion of at least 16 units

Corequisite: Nil

Incompatible with: MMM365

Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar

Scheduled learning activities – cloud (online): Online independent and collaborative learning activities (recordings provided) including weekly 1 hour scheduled online seminars.

## Content

This is a capstone unit that builds on and integrates student's knowledge, skills and abilities gained from units comprising the Bachelor of Business. Students are given the opportunity to demonstrate their ability to plan and manage a business in a simulated global business environment. Students work in teams and draw from their skills toolbox gained in the Bachelor of Business to develop, implement, and evaluate their performance in running a virtual business. In particular, students apply their knowledge of management to set up a virtual international business and take the business through its life cycle.

## Assessment

- Assessment 1 (Group of 4 students) – Business Management Report (4000 words) 40% and Oral/recorded presentation (10-minute) 10% – total 50%
- Business Management Capstone Portfolio (3000 words) – 50%

## MMM343 – Business Ethics

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)

Trimester 3: Burwood (Melbourne), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Matthew Lupoli

Trimester 3 Unit Chair: Ambika Zutshi

Prerequisite: For students commencing courses M300, M307, D301, D313, D317, D321, D322, D325, D338, D366 or D388: MMM132 plus 10 credit points.

For all other students: Must have passed 12 credit points

Corequisite: Nil

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 2 hour classes, 1 x 1 hour seminar per week.

For Trimester 3 2019 only:

Week 1: 1 x 2 hour video recording

Week 2: 2 x 2 hour class + 1 x 3 hour seminar

Week 5: 2 x 2 hour class + 2 x 2 hour video recording + 1 x 3 hour seminar

Week 6: 2 x 2 hour class + 1 x 2 hour video recording + 1 x 3 hour seminar

Week 11: 1 x 2 hour class + 1 x 2 hour seminar

Note: no on-campus contact hours in the following weeks: 3, 4, 7, 8, 9 & 10

Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 10 scheduled online seminars.

For Trimester 3 2019 only:

11 x 2 hour class (recordings provided)

Week 1: 1 x 1 hour online seminar

Week 2: 1 x 1 hour online seminar

Week 3/ 4/ 5/ 6: 2 x 1 hour online seminar

Week 11: 1 x 1 hour online seminar

## Content

This unit aims to develop students' awareness of the role that ethical issues play in business life, in particular, business policy formulation and implementation; management policy formulation and implementation; and employee rights and obligations. It also aims to develop students' ability to critically analyse ethical issues which arise in business life.

## Assessment

- Written Assignment (3000 words) – 50%
- Examination (2 hours) – 50%

## MMM707 – Creative Industries

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Amanda Coles*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 11 scheduled online seminars*

### Content

This unit considers the economic, social and cultural contribution made by creative industries and examines mechanisms for building the business capacity of the sector.

The creative industries are evolving as a major influence in the global economy. Creativity is seen to be at the forefront of global change and development. Creative industries have been the focus of local, state and national programs that address innovation, entrepreneurship and emerging industries. ABS data indicates that 6.2% of the Australian workforce is currently employed in creative industries and that these are growth industries.

The sector is also diverse, including not only small to medium sized organisations but also a large number of independent enterprises. The skills needed to manage creative industries, and initiatives that support the sector, are context specific. However underpinning all this work are foundational skills in the management of collaborative and entrepreneurial activity.

This unit develops students' skills and capacities to manage within creative industries, and develop initiatives that support the sector. It considers issues relating to the sustainability and growth of creative industries; developing local and global markets and audiences; infrastructure requirements; new and emerging skill sets and employment patterns; managing collaborative and entrepreneurial activity; regional and sector development initiatives that support the sector.

### Assessment

- Case study essay blog (2500 words) – 40%
- Creative Industry development plan (3000 words) – 40%
- Weekly online seminar participation (1500 words) – 20%

## MMM750 – Critiquing Entrepreneurship

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: This unit is only available to students enrolled in M555 – Graduate Certificate of Entrepreneurship*

*Unit chair: Joan Lockyer (Coventry)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including online content for each topic which is available on demand.*

### Content

This unit has been designed to challenge the traditional understanding of beliefs on what makes an entrepreneur and what it means to be entrepreneurial. By having a more detailed understanding of these concepts, and what learners can develop a better sense of their own capabilities and aspirations to become more entrepreneurial themselves. We will explore the foundations of entrepreneurial theory and apply it to different types of entrepreneurship, which include social, technological and institutional. We will apply these theories and concepts developed to authentic situations and context.

*Note: This unit uses the FutureLearn online learning platform.*

### Assessment

- Written report (1500 words) 40%
- Written report (3000 words) 60%

## MMM751 – Exploring Socio-Economic Innovation

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Matt Mount (Deakin)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including online content for each topic which is available on demand.*

## Content

This unit has been designed to endow learners with an intimate understanding of what constitutes innovation and the contextual factors that motivate economic and social orientations. Specifically, we take you on a journey that explores the varying types, outcomes, and processes of innovation, the knowledge antecedents that drive them, and the contextual levers that stimulate their emergence. By highlighting these concepts and applying them to complex issues, learners will develop a heightened sensibility of the value of innovation and develop the requisite capabilities that allow them to institute innovation in practice.

*Note: This unit uses the FutureLearn online learning platform.*

## Assessment

- Wicked problem analysis written report (1500 words) 40%
- Case study and reflection:
  - Part A – Written report 2000 words 45%
  - Part B – Video 3 minutes 15%

## MMM752 – Strategic Change and Innovation

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Steve Jaynes (Deakin)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including online content for each topic which is available on demand*

## Content

This unit helps students to consider how to lead and manage strategic change, specifically with respect to the implementation of innovative change programs in a range of organisational contexts.

*Note: This unit uses the FutureLearn online learning platform.*

## Assessment

- Personal experience of change (1500 words) 40%
- Assessment 2 (Group of 1–4) – Development of a strategic and innovative organisational change program (3000 words) 60%

## MMM753 – Creating Entrepreneurial Impact

*Enrolment modes: Not offered in 2019.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Joan Lockyer (Coventry)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including online content for each topic which is available on demand.*

## Content

This unit explores what is meant by impact and how it might be measured. Impact may be personal, social or organisational. The unit draws on the notions of risk, reward and resilience, and ethics and sustainability to asks students to explore the trade-offs that may confront them along their change management journey. The unit also explores what is meant by the entrepreneurial ecosystem, what it means to them personally and how they might create social, economic, personal value through their actions.

*Note: This unit uses the FutureLearn online learning platform.*

## Assessment

- Creating and describing an evaluation framework (1500 words) – 40%
- Describing and reflecting on the implement the framework (3000 words) – 60%

## MMM790 – Arts Management

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Hilary Glow*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 11 scheduled online seminars*

### Content

The role of arts management within the arts and cultural sector is to create opportunities for arts and cultural organisations to be vital, viable and responsive to stakeholders. Using case studies and a discussion of current arts sector practices, students develop an understanding of the functions and principles of management, as it applies to the arts and cultural sector. Topics include: cultural policy and its context; arts management and leadership; arts organisations and governance; strategic planning; and managing volunteers.

### Assessment

- Reflective Essay (2000 words) – 30%
- Case Study Analysis (4500–5000 words) – 50%
- Weekly online seminar participation (1500 words) – 20%

## MMM793 – Managing Cultural Projects and Events

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Amanda Coles*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 11 scheduled online seminars*

### Content

Cultural projects and events are a feature of vibrant and dynamic places. Arts and cultural events contribute to a range of artistic social economic and environmental outcomes. As a result a growing number of arts organisations, government departments, community groups and commercial businesses are engaged in delivering arts and cultural events that respond to diverse communities, local cultural identities and distinctive locations. This unit develops students' skills in designing, planning and delivering cultural festivals and arts events. It examines the use of a range of management processes, including: project management; operations and risk management; financial management; human resources; and strategic marketing.

### Assessment

- Case Study (2500 words) – 40%
- Cultural project or event plan (4500 words) – 40%
- Weekly online seminar participation (1500 words) – 20%

## MMM796 – Managing Arts in Community Settings

*Enrolment modes: Not offered in 2019*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Anne Kershaw*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Online independent and collaborative learning activities including 11 scheduled online seminars*

### Content

Community based arts are a valuable tool for building strong communities and creating art works that are authentic and distinctive. There is also growing interest in the use of participatory art processes to enable new and dynamic relationships between artists and their audiences.

This unit addresses the knowledge and skills needed to engage diverse communities in arts projects, and manage community creative processes. The unit focuses on the design and management of art projects that enable collaborative and participatory processes.

Topics include: the role of artists and facilitators; venues and facilities for community based arts; public art; arts based social enterprises; developing art strategies and policies; and evaluating community based art projects. The unit examines community based arts from the context of arts organisations, government and the community sector.

### Assessment

- Case study blog (2500 words) – 40%
- Community based art project design (4500 words) – 40%
- Weekly online seminar participation (1500 words) – 20%

## MMM799 – Arts Fundraising and Sponsorship

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Trimester 2 Unit Chair: Hilary Glow*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 11 scheduled online seminars*

### Content

Arts sponsorship and philanthropy provide vital benefits to cultural organisations. In an increasingly competitive environment, and with declining government funding, the arts and cultural sector is looking to develop strong and sustainable relationships through a diversity of partnerships. This unit gives students the opportunity to understand and analyse a fundraising or sponsorship case study and the contextual pressures that affect its outcome. The topics addressed in this unit include: the nature and role of fundraising; the principles and practices of government relations and corporate sponsorship; and philanthropy and donors.

### Assessment

- Blog (2000 words) – 30%
- Case Study (4500–5000 words) – 50%
- Weekly online seminar participation (1500 words) – 20%

## MMM905 – Philosophy of Research

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Andrew Noblet*

*Trimester 2 Unit Chair: Andrew Noblet*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): This research unit involves a minimum of 33 hours' supervised contact per trimester.*

### Content

This unit examines fundamental philosophical premises on which postgraduate research is based. Specifically, the material covered in this unit requires students to understand and apply the ontological, epistemological and methodological assumptions that shape the types of research-related issues examined by individuals and groups and impacts on their views of what constitutes 'valid' knowledge and what data collection/analysis methods are most appropriate. Students need to not only be aware of how these assumptions (and the underlying values) can impact on their own methodological preferences, but they also need to recognize how an understanding of the different philosophical approaches can broaden their 'paradigmatic toolkit' and enhance their ability to undertake high quality research that makes a significant contribution to the scholarly literature and the communities they serve. The unit activities and readings as well as the assessment tasks have been designed to help students achieve a number of important learning outcomes including being able to critically analyse the paradigmatic assumptions and values that underpin published research, to consider how this or other research could be strengthened by adopting different ontological/epistemological frameworks and to develop the paradigmatic section of a peer-reviewed research publication (e.g., journal article, PhD thesis).

### Assessment

- Paradigm Essay (2500 words) 40%
- Research Assignment (5000 words) 60%

## MMM906 – Qualitative Research Methods

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Melissa Parris*

*Trimester 2 Unit Chair: Melissa Parris*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): This research unit involves a minimum of 33 hours supervised contact per trimester.*

### Content

This unit provides students with the requisite knowledge and skills in qualitative research methods to enable them to design and execute a qualitative research design as part of the research project. Students also develop skills to critically evaluate qualitative research undertaken by others. The unit includes the following topics: how to develop a research area and design the research project, along with a discussion of different available qualitative research methods.

### Assessment

- Written assignment (2500 words) 25%
- Written reflection (2500 words) 25%
- Written assignment (5000 words) 50%

*Scheduled learning activities – campus: 1 x 3 hours class per week*

*Scheduled learning activities – cloud (online): Learning resources are via Cloud Deakin*

### Content

The unit focuses on advanced quantitative research methods used in studying economics, accounting, finance, business, management and marketing. A range of advanced multivariate techniques are covered including methods suitable for observational and experimental designs. The unit offers concepts and methodological tools that can be used with cross-sectional, panel, and time-series data, drawing particular attention to testing causal claims in the presence of endogeneity.

Topics include various multivariate techniques such as regression procedures, factor analysis, structural equation and multi-level modelling, time-series analysis techniques and instrumental variables estimators. Students work on replications and extensions of previous studies and develop skills on how to write up research results based on findings from statistical analyses. The main key objectives of the subject entail learning how to choose appropriate statistical methods to test hypotheses and how to articulate statistical results into written narratives.

### Assessment

- In-trimester data analysis tasks, 50%
- Research report (5000 words) 50%

### Hurdle requirement

Students must attempt ALL assessments.

## MMM907 – Quantitative Research Methods

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Josh Newton*

*Trimester 2 Unit Chair: Josh Newton*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## MMM908 – Discipline Reading Unit

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

## Content

This unit provides students with the requisite discipline knowledge and skills in research to enable them to analyse critically the research domain that is pertinent to their area of research. Students will also develop skills to evaluate critically research undertaken by others. As part of this unit, the students will further expand on their discipline knowledge related to the topic area of their research.

## Assessment

- Written assignment (4000 words) 40%
- Written assignment (5000 words) 60%

## Hurdle requirement

Attempt and submit all assessment items; achieve at least 70% in the unit to pass the unit.

# MMM909 – Meta-Analysis Research Methods

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Chris Dubelaar*

*Trimester 2 Unit Chair: Chris Doucouliagos*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: Burwood (Melbourne) Intensive (5 days/7 hours a day).*

*Dates to be advised.*

## Content

This hands-on unit will provide students with the technical skills to conduct a meta-analysis in their chosen discipline area. The unit will also situate meta-analytic techniques within the broader research process by demonstrating how meta-analyses can both test and advance theory.

## Assessment

- Written assignment (1000 words) – 20%
- Written assignment (1000 words) – 20%
- Written assignment (4000 words) – 60%

# MMP111 – Introduction to Property

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP111*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tom Keel*

*Trimester 3 Unit Chair: Tom Keel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

## Content

This unit aims to give students a general introduction into the property market and the role property plays in a today's economy. It introduces the concept of real property and improvements to land; highest and best use, property and the economy; a broad overview of property markets and sub-markets; an introduction to investment, yield and the time value of money; stages of property development and the stakeholders; urban economics and geography. On completion of Introduction to Property students should be able to:

- Place property in the context of the built environment, urban planning, the investment environment, design and construction.
- Appreciate the concept of real property and improvements on land.
- Gain a broad understanding of property markets and sub-markets.
- Be aware of the broad legal and economic aspects of property valuation.
- Appreciate the basic concepts of investment, yield and the time value of money including the essentials of basic financial mathematics.
- Recognise the importance of urban economics and geography in the growth of cities and urban areas.

## Assessment

- Assignment 1 2500 words 25%
- Assignment 2 2500 words 25%
- Examination 2 hours 50%

## From Trimester 3 2019

- Written Blog (1500 words) – 25%
- Written Assignment (2500 words) – 25%
- Examination (2 hours) – 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination AND students must successfully complete the professional literacy module to gain access to the assignment dropbox.

## MMP122 – Introduction to Property Development

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP122*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kang Koo*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

Students progressively explore the issues that affect development of land and redevelopment of existing properties through an understanding of local and regional planning controls, procedures and legislative policy and precedent. The unit covers the principles of urban and regional planning with environmental and heritage protection strategies also discussed. Information about land title, registration, zoning and development application processes, including land suitable for subdivision and appeal mechanisms, underpins the unit and assists with the development of effective urban policy and community consultation responses. This unit aims to give students the knowledge and skills to be able to operate as a property professional in the area of development advice and decision-making in property development. It comprises the development process and the major players, concept of highest and best use, time value of money, the decision to build, property market research and analysis, appreciation of investment and market valuation methods, evaluation of land suitable for

subdivision, development appraisal including residual analysis and cash flow modelling, price and worth, as well as risk, return and risk analysis.

### Assessment

- Case Study report (2000 words) – 25%
- Case Study report (2000 words) – 25%
- Examination (2 hours) – 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP211 – Statutory Valuation

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP211*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jerry Liang*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit is broken to two separate components: (a) valuation for statutory purposes and (b) compulsory acquisition and compensation. Valuation for statutory purposes covers unimproved capital value (UCV), capital improved value (CIV), site value (SV), net annual value (NAV), local government rates, mass appraisal techniques and land tax. Compulsory acquisition and compensation covers valuation principles and methodologies, expert witness statements and preparation for court as an expert witness. This unit aims to give students a basic understanding of the role of statutory valuation in the property market, and also what compulsory acquisition entails and how it affects the stakeholders.

### Assessment

- Assignment 1 (Individual) Written Report (2500 words) 25%
- Assignment 2 (Group of 5) Written Compensation Report (2500 words) 25%
- Examination (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP212 – Property Investment

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP212*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jerry Liang*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This is an applied property unit dealing with investment property in the commercial, industrial, retail and multi-unit residential markets. The focus is on the valuation and analysis of real estate development and investment proposals with particular emphasis on the understanding and application of quantitative methods in the analysis of real property. The unit examines the time value of money in detail including the six financial formulas used when undertaking a cash flow analysis. An objective of the units is for students to understand approaches to undertaking property investment and using the two primary valuation approaches, namely the discounted cash flow approach and the capitalisation of income approach.

### Assessment

- Assignment 1 (Individual) Market research 2500 words 25%
- Assignment 2 (Group of 2) Report 2500 words 25%
- Examination 2 hours 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP213 – Property Economics

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP213*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dianne Thomson*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

Property and real estate markets are directly affected by supply and demand factors which form the foundation for this unit. Attention is placed on factors that influence supply and demand of all types of property including demography, property cycles, economic factors and government decisions. This unit is closely linked to current day-to-day events and is very relevant to the 'real world'. It builds upon basic economic theory and focuses specifically on the property fundamentals including housing affordability, the rent vs. buy decision and broader urban geography concepts which affect different sectors in the property industry e.g. retail, office and residential.

### Assessment

- Assessment 1 – (Group of 2–3) video (7 minutes) – 20%
- Assessment 2:
  - Part 1 (Group 2–3) written Report (2000 words) – 20%
  - Part 2 (Individual) Written report- self-reflection (800 words) – 10%
- Assessment 3 – Examination 2 hours -50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP221 – Property Management

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP221*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Dianne Thomson*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

Property Management prepares students with an appreciation and understanding about this important component of the property and real estate market. This unit introduces students to the property management field and its interconnections with the planning, design, construction and maintenance of buildings. This unit includes different land uses such as residential, office and retail with the emphasis placed on buildings in use. Value management is a core objective of this unit which also covers make good clauses, building pathology, asset management, facilities management and planning. Sustainability issues in property management are an increasingly important issue and an integral part of this role.

### Assessment

- Report (2000 words) – 20%
- Assessment 2 Part A: (Group of 3 students) – Report (2500 words) – 25%
- Assessment 2 Part B: (Individual) Reflection (500 words) 5%
- Examination (2 hours) – 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP223 – Property Law and Practice

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMP121, SRP121*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Tom Keel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MMP121, SRP121*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit examines the property and real estate marketplace and operation of the stakeholders within. It discusses the concept of property and ownership in Australia, as well as the general law and Torrens land registration systems in the context of professional property and real estate agency practice. Reference is made to professional institutions, ethics and industry standards. Again with reference to professional practice, the unit further examines the legal nature of land, improvements fixtures and chattels, encumbrances, easements, restrictive covenants, rights, co-ownership, subdivision, joint tenancy, tenancy in common, licences and leases.

### Assessment

- Assignment 1 (Individual) – Written Report (1250 words) – 25%
- Assignment 2 (Individual) – Written Report (1250 words) – 25%
- Examination 2 hours 50%

### Hurdle requirement

Students are to achieve at least 50% of the available marks in the examination.

## MMP311 – Advanced Property Valuation

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP311*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jerry Liang*

*Prerequisite: MMP212*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week and 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit builds upon property valuation approaches developed in MMP212 Property Investment and examines a wide and diverse range of valuation methodologies. Several advanced valuation topics are examined including advanced valuation techniques for investment grade properties, valuation of specialised properties such as hotels, rural properties and retirement villages, and specialised areas in property valuation such as plant and equipment valuations. Advanced research methods are also examined including independently undertaking research on a topic related to specialised property valuation.

### Assessment

- Assignment 1: Research and develop conference paper – 2500 words 25%
- Assignment 2: Present findings of conference paper – 2500 words 25%
- Examination 2 hours 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP321 – Advanced Property Analysis

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP321*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tom Keel*

*Prerequisite: MMP212*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

In this unit students focus on the interesting area of undertaking data analysis in property markets using different statistical analysis such as hedonic modelling and regression analysis. Property market analysis is an increasing important role in society where property indicators are identified and analysed. This process is assisted by the use of GIS to enable spatial mapping of different property markets. The unit examines the process for undertaking research in the property and real estate fields and how to overcome barriers to accessing market information.

### Assessment

- Assignment 1 (Individual) Statistical market analysis research report (2500 words) 25%
- Assignment 2 (Individual) Statistical market analysis research report (2500 words) 25%
- Examination (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the available marks on the examination.

## MMP322 – Advanced Property Development

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Previously coded as: MMP222, SRP222*

*Trimester 2 Unit Chair: Tom Keel*

*Prerequisite: MMP122 and MMP212*

*Corequisite: Nil*

*Incompatible with: MMP222, SRP222*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit aims to give students an advanced knowledge and a high level of skills to be able to operate as a property, design or construction professional in the area of development advice and decision-making in complex property development. It comprises the development process and the major players; time value of money and sensitivity analysis; the decision to build; property market research and analysis; appreciation of investment and market valuation methods; development appraisal including residual analysis and cash flow modelling; price and worth; risk, return and risk analysis.

### Assessment

- Case Study Written Report (2000 words) – 20%
- Assessment 2 (Group of 3) – Case Study Written Report (2500 words) – 30%
- Examination (2 hours) – 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP712 – Rating and Statutory Valuation

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP712*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Christopher Ratcliffe*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online classes*

### Content

This unit is broken into two separate components:

- valuation for statutory purposes and
- compulsory acquisition and compensation.

Valuation for statutory purposes covers the role of statutory valuation in society with reference to, local government rates, mass appraisal techniques and land tax. Compulsory acquisition and compensation covers valuation principles and methodologies, expert witness statements and preparation for court as an expert witness.

On completion of the unit students should be able to:

- describe the purpose of, and methods used in, statutory valuations and property taxation
- explain the history of property taxation
- prepare a valuation report for a compulsory acquisition

### Assessment

- Assignment 1 2500 words 25%
- Assignment 2 2500 words 25%
- Examination 2 hours 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP713 – Property and Real Estate Context

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP711*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bill Dimovski*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit aims to give students a basic understanding of the property market including land economics, urban economic geography and the role valuation plays in the broader property market.

On completion of the unit students should be able to:

- become familiar with the basic concepts, valuation methods and nuanced language of property
- critically analyse markets, growth in the markets and factors affecting the property prices
- estimate a property price using a comparison of sales approach.

### Assessment

- Written report (2500 words) – 25%
- Written report (2500 words) – 25%
- Examination (2 hours) – 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP721 – Property and Real Estate Law and Practice

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP721*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Tom Keel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online classes*

### Content

This unit aims to give students an understanding about the concepts of property and ownership, as well as the general law and land registration systems in the context of professional property and real estate agency practice. There is reference to professional institutions, ethics and industry standards.

On completion of the unit students should be able to:

- discuss in detail the legislation relating specifically to property
- discuss in detail property law principles as they relate to real property
- explain the importance of ethical behaviour by property professionals
- explain of the role of industry bodies in the property market
- discuss different situations that may arise in the buying and selling of property
- explain the operation of the transfer of land process.

### Assessment

- Assessment 1: Assignment 1 (1500 words) – 25%
- Assessment 2: Assignment 2 (1500 words) – 25%
- Examination (2 hours) – 50%

## MMP731 – Management of Real Estate

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP731*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Christopher Ratcliffe*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

The aim of this unit is to give an understanding about the management of property in the context of the international real estate market. The unit discusses related aspects of property management including asset management and corporate real estate (CRE) with reference to life-cycle costs, value to the business plans of an organisation, and functionality/fitness for purpose.

On completion of the unit students should be able to:

- Explain the framework relating specifically to property management
- Explain and outline property management principles
- Evaluate the importance of ethical behaviour by property professionals
- Undertake an appreciation of the role of industry bodies in the property management
- Evaluate different situations that may arise in the letting of property
- Explain the operation of the leasing process.

### Assessment

- Assessment 1: Critical review (Individual)  
2500 words – 25%  
– Part A: Interview – (10 Marks)  
– Part B: Reflective summary essay – (15 Marks)
- Assessment 2: Report (Individual) – 2500 words 25%
- Examination 2 hours 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP732 – Property Development

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP732*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kang Koo*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

The aim of this unit is to discuss the concepts of property development based on the highest and best use framework. The reference is made to both residential and commercial property developments and includes reference to financial analysis and risk-return evaluations.

On completion of the unit students should be able to:

- Describe the process of property development for commercial and non- residential buildings
- Describe the procurement options which are available to property developers
- Explain market research strategies
- Explain the characteristics and qualities of a range of building materials and features within the context of sustainable property development
- Describe the concepts of promotion and selling of commercial property developments
- Explain the drivers behind sustainability in property development
- Describe a number of key significant international property development projects.

### Assessment

- Written Assignment (individual) 2500 words 25%
- Written Assignment (individual) 2500 words 25%
- Examination 2 hours 50%

## MMP741 – Property and Real Estate Valuation

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP741*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Christopher Ratcliffe*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online classes*

### Content

This unit builds upon established property valuation approaches and examines international practices with relation to property valuation and appraisal methodologies and terminologies. Other advanced valuation topics are analysed including company and going concern valuations, specialised properties, caravan parks, hotels, retirement villages, rural properties, plant and machinery valuations, overnight residential property valuations.

### Assessment

- Assignment 1 2500 words 25%
- Assignment 2 2500 words 25%
- Examination 2 hours 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMP742 – Investment Valuation

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP742*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Christopher Ratcliffe*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit aims to give students knowledge about established property investment analysis approaches as well as the skills to undertake independent property valuation.

On completion of the unit students should be able to:

- collect, evaluate and interpret property market data relevant to property asset valuation
- apply financial formulae appropriately to undertake a discounted cashflow analysis
- produce an investment property report
- analyse and synthesise investment data to form, justify and explain property valuation decisions and assumptions.

### Assessment

- Assignment 1 2500 words 25%
- Assignment 2 2500 words 25%
- Examination 2 hours 50%

### Hurdle requirement

Achieve at least 50% of the available marks in the examination.

## MMS100 – Sport Organisation

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Hunter Fajak*

*Cohort rule: (Normally available to students enrolled in the Bachelor of Business (Sport Management), BCom majoring in Sport Management (continuing students only), the Dean's Scholars Program and the Bachelor of Sport Development only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5 hour class, 1 x 1.5 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 1.5 hour class (recordings provided) + 1 x 1.5 hour online seminar*

### Content

This is an introductory unit that aims to allow students to examine the structure of the Australian sports system. Students will be encouraged to review past trends that have shaped the sports system, gain an understanding of the current status of agencies and organisations nationally and internationally, and to draw

upon this information to explore future directions in the organisation and governance of sport. Emphasis is also placed on conducting internal analyses of a variety of agencies and organisations, with a specific reference to employment in the sport industry plus, an analysis of the skills utilised by the sport manager.

### Assessment

- Written Assignment 1 3000 words 30%
- Written Assignment 2 (group/max 3 students) 2000 words 20%
- Examination 2 hours 50%

## MMS201 – Sport in Society

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMS101*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Pamm Phillips*

*Cohort rule: Normally available to students enrolled in the Bachelor of Business (Sport Management), the Bachelor of Arts, the Dean's Scholars Program and the Bachelor of Sport Development only.*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MMS101*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week.*

*From Trimester 2 2019: 1 x 1.5 hour class, 1 x 1.5 hour seminar per week.*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) per week plus 1 x 1 hour online workshop per week.*

*From Trimester 2 2019: 1 x 1.5 hour class (recordings provided) per week plus 1 x 1.5 hour online workshop per week.*

### Content

The unit explores social sciences and their application to sport studies. Methodologies of history and sociology will be considered and applied to prominent issues in Australian and international sport. The social significance of sport in Australian culture and the need for sport managers to be sensitive to that significance are examined.

### Assessment

- Assignment 40%
- Examination 2 hours 60%

## MMS202 – Managing High Performance Sport

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Katie Rowe*

*Previously: Management of Sport Performance*

*Cohort rule: (Normally available to students enrolled in the Bachelor of Business (Sport Management), BCom majoring in Sport Management (continuing students only), the Dean's Scholars Program.)*

*Prerequisite: MMS100*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recordings provided) + 1 hour online seminar*

### Content

The unit examines the sport sciences and their application, in particular their application to sport performance and athlete welfare and wellbeing. Implications for sport management will be a focus of this unit.

### Assessment

- Assessment 1 (Individual) – Written Report (3500–4000 words) – 40%
- Examination 2 hours 60%

## MMS306 – Sport Management Practicum

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jonathan Robertson*

*Trimester 2 Unit Chair: Damien Whitburn*

*Cohort rule: (Normally available to students enrolled in the Bachelor of Business (Sport Management), BCom majoring in Sport Management (continuing students only), the Dean's Scholars Program).*

*Work experience in industry: This is a Work Experience in Industry (WEI) unit.*

*Prerequisite: MMS100 and MMS201\**

*\* previously coded MMS101*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements:*

*Placement: 100 hours with a host sporting organisation, association or facility*

## Content

Students will seek a placement with a host sporting organisation, association or facility for a period of 100 hours and will assist management with various duties as negotiated.

## Assessment

Ungraded pass, consisting of:

- Written Assignment 1 (Individual): Project Outline and Contract (1000 words)
- Assignment 2 (Individual): E-portfolio: reflective journal, contacts and activities log, learning artefacts (4000 words)
- Written Assignment 3 (Individual): Project Report (4000 words)

## MMS307 – Sport Facility and Event Management

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Naraine*

*Cohort rule: (Normally available to students enrolled in the Bachelor of Business (Sport Management), BCom majoring in Sport Management (continuing students only), the Dean's Scholars Program and the Bachelor of Sport Development only)*

*Prerequisite: MMS100*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour recorded class + 1 x 2 hour seminar per week.*

*Students will be required to view the prescribed online recorded classes/video(s) each week, coupled with related readings, prior to the seminar, in order to be able to contribute effectively to the seminar activities.*

*Scheduled learning activities – cloud (online): 1 x 1 hour recorded class + 1 x 2 hour online scheduled seminar per week*

## Content

This unit focuses on operational issues involved in the management of sporting and recreational facilities and major events. Issues include planning and design; staffing; organisational structures; and programming and fiscal control as it applies to local, state and national standard sporting facilities and events.

## Assessment

- Written assignment 1 – 4000 words 50%
- Written Assignment 2 (group/3–5 students) equivalent to 3000–4000 words per student 50%

## MMS308 – Sport Marketing

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Hunter Fujak*

*Prerequisite: MMK277 or MMK101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5 hour class, 1 x 1.5 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 1.5 hour class (recordings provided) + 1 x 1.5 hour online seminar*

## Content

The unit examines techniques and strategies applicable to the marketing of sport as well as marketing through sport. The unit will focus on sport as a service and the unique characteristics of the sport product, the sport consumer, and hence the sport marketing mix. A special emphasis is placed on customer service and retention. A key learning outcome for students will be the development of a strategic sport marketing plan.

## Assessment

- Assignment 4000 words 50%
- Examination 2 hours 50%

## MMS313 – Sport Leadership and Governance

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Pamm Phillips*

*Cohort rule: (Normally available to students enrolled in the BCom majoring in Sport Management or the Dean's Scholars Program only.)*

*Prerequisite: MMS100 and MMS101/MMS201*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour class (recordings provided) + 1 x 2 hour online seminar*

### Content

This unit aims to develop leaders in sport through introducing students to major issues and practices in the governance of sport organisations. Students will be given the opportunity to implement and explore governance issues through innovative experiential learning techniques.

### Assessment

- Assignment 1: (Group of 5–6), oral debate (10 minutes) 10%
- Assignment 2: (Group of 4–6) report (4000 words) 40%
- Assignment 3: (Individual) Report (3000 words) 50%

## MMS314 – Planning for Sport Policy and Development

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kim Encel*

*Cohort rule: (Normally available to students enrolled in the Bachelor of Business (Sport Management), BCom majoring in Sport Management (continuing students only), the Dean's Scholars Program and the Bachelor of Sport Development only.)*

*Prerequisite: MMS100*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

### Content

This unit aims to enable students develop effective sport development programs and practices, and assists them with the planning, designing and managing of sport systems and pathways for sporting organisations and communities. This is achieved through introducing students to major issues in policy development and development practices in sport organisations. A critical review of development practices of and through sport driven by excellence in sports performance and improved participation respectively will be presented. Students will be given the opportunity to explore policy and sport development issues through innovative experiential learning techniques and case studies.

### Assessment

- Written assignment (4000 words) -40%
- Assessment 2 (Group/max 4 students) – Oral presentation (10 minutes) – 20%
- Assessment 3 (Individual) – Article Analysis (4 x 1000 words) – 40%

## MMS701 – Athlete Management

*Enrolment modes: Trimester 1: Burwood (Melbourne) Intensive, Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Damien Whitburn*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 3 x 8 hour classes (recordings provided)*

*In-person attendance requirements: Burwood (Melbourne) Intensive: Unit is taught face to face intensively in blocks during Trimester 1. Classes are not held every week*

*Please note the Burwood (Melbourne) offering of the unit is delivered intensively, in blocks. Recordings of the intensive classes will be provided.*

## Content

This unit addresses: the history of athlete management; management services; the roles of the player, the manager and the club; athlete career development; overall development of the athletes; athlete retirement; commercial property; conflict, sponsorship; celebrity marketing; and finance and scheduling.

## Assessment

- Written assignment (3500 words) – 50%
- Assessment 2 (group of 4) – Written assignment (3000 words) – 25% and Presentation (15 minutes) – 25% – Total – 50%

## MMS711 – Introduction to the Sport Industry

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Pamm Phillips*

*Trimester 2 Unit Chair: Damien Whitburn*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5-hour class, 1 x 1.5-hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 1 x 1.5-hour class, 1 x 1.5-hour seminar per week (recordings provided)*

## Content

The unit provides an overview of the Australian sports system. Its key objectives are to analyse the structure, function and inter-relationships of various agencies responsible for the delivery of sport in Australia, and to allow students to critically analyse a variety of contemporary issues confronting sport and sport managers. Such issues may include funding for sport, the use of drugs and the control of violence in sport.

## Assessment

- Assessment 1 (Group 3–4 students) – Video Presentation (15mins) and Written Report (2 x 500 words) – 40%
- Written assignment (6000 words) – 60%

## MMS712 – Sport Marketing

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Damien Whitburn*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5-hour class, 1 x 1.5-hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 1 x 1.5-hour class, 1 x 1.5-hour seminar per week (recordings provided)*

## Content

The unit will introduce students to the marketing management process. The use of the marketing mix, product, price, promotion and distribution will be developed and related to sport. Traditional use of marketing theory in sport will be examined and an analysis of sport marketing functions will be conducted. This will include positioning the sport product, market segmentation, sport marketing and technology, and the development of marketing plans.

## Assessment

- Case study (4000 words) – 60%
- Assessment 2 (Group – 4 students) – Marketing analysis (4000 words) – 40%

## MMS713 – Sport Policy and Development

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kim Encel*

*Prerequisite: MMS711*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5-hour class, 1 x 1.5-hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 1 x 1.5-hour class, 1 x 1.5-hour seminar per week (recordings provided)*

## Content

This unit aims to enable students develop effective sport development programs and practices, and assists them with the planning, designing and managing of sport systems and pathways for sporting organisations and communities. This is achieved through introducing students to major issues in policy development and development practices in sport organisations. A critical review of development practices of and through sport driven by excellence in sports performance and improved participation respectively will be presented. Students will be given the opportunity to explore policy and sport development issues through innovative experiential learning techniques and case studies.

## Assessment

- Written Assignment (3500 words) – 50%
- Written Assignment (3500 words) – 50%

## MMS714 – Sport Organisation Behaviour

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Naraine*

*Trimester 2 Unit Chair: Michael Naraine*

*Previously: Management (Sport)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5-hour class, 1 x 1.5-hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 1 x 1.5-hour class, 1 x 1.5-hour seminar per week (recordings provided)*

## Content

The unit provides a conceptual framework for students to examine and understand the functions, roles and skills of managers in organisations. The roles and skills of managers will be developed through analysis of the planning, organising, leading and controlling functions of management. This unit will also examine the development of human resource management functions and highlight the variety of techniques employed in managing people in organisations.

## Assessment

- Written assignment (3000 words) – 40%
- Written assignment (5000 words) – 60%

## MMS715 – Sport Promotions and Public Relations

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Henry Wear*

*Prerequisite: MMS712*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5-hour class, 1 x 1.5-hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 1 x 1.5-hour class, 1 x 1.5-hour seminar per week (recordings provided)*

## Content

The unit examines promotional management strategies as they apply to sporting organisations. Students will examine the promotion mix including advertising, sales promotions, personal selling and public relations. Special emphasis will be placed on the study of public relations and its role in managing the media within the sport management industry.

## Assessment

- Assessment 1 (Group maximum of 4 students) – Written assignment 4000 words plus recorded video presentation (6–8 minutes) 40%
- Written assignment 4000 words 40%
- Written reflections 2000 words 20%

## MMS716 – Sport Organisation Theory

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jonathan Robertson*

*Prerequisite: MMS714*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5-hour class, 1 x 1.5-hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent collaborative learning including 1 x 1.5-hour class, 1 x 1.5-hour seminar per week (recordings provided)*

### Content

Today's sport industry is experiencing rapid growth and transformation, and future sport managers need to be prepared to implement change. This unit enables students to develop and apply an understanding of the concepts and principles used in explaining organisational phenomena in sport organisations. The unit introduces students to governance, management, leadership and organisational theory as it applies to the sport setting to assist the future sport manager to implement change strategies specifically within sport organisations.

### Assessment

- Assessment 1 (Individual) – Case study (4000 words) – 40%
- Case study (3000 words) – 30%
- Assessment 3 (Individual) – Digital Oral Presentation (15 minutes) – 30%

## MMS736 – Strategic Management

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: David Shilbury*

*Prerequisite: MMS714*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5-hour class, 1 x 1.5-hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 1 x 1.5-hour class, 1 x 1.5-hour seminar per week (recordings provided)*

### Content

This unit provides students with the skills and knowledge applicable to the process of planning for an organisation's future. Key elements of strategic management will be considered including planning, environmental analysis, strategy formulation, strategy implementation and control. The unit will assess the strategic management cycle and decision-making processes utilised in considering alternatives, choice and the evaluation of strategy as it applies to sporting organisations. It will also include case study analysis of national and international sport and non-sport organisations. Links between decision-making, leadership, culture and ethical behaviour in relation to strategy formulation will also be examined.

### Assessment

- Assessment 1 (Group of 5) – Simulation (equivalent to 3000 words) – 40%
- Written Assignment (5000 words) – 60%

### From Trimester 2 2019

- Assessment 1 (Group of 5) – Online Strategy Simulation (equivalent to 3000 words) – 40%
- Written Assignment (5000 words) – 60%

## MMS773 – Sport Broadcasting

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Hunter Fajak*

*Prerequisite: MMS712*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including four (4) scheduled online workshops*

## Content

This unit focuses on the increasing influence of traditional and new media forms of content delivery on sport. Issues to be examined include the economics of broadcasting through rights revenue, contracts and inter-organisational partnerships, government policy influences on sport and broadcasting, scheduling and promotional benefits and the production process of live sporting events and programming. Measurement terms such as ratings and share will be introduced focusing on their translation into revenue and commercial opportunity. The unit also covers future trends in sport broadcasting within Australia and abroad.

## Assessment

- Written Assignment (3000 words) – 40%
- Written Assignment (5000 words) – 60%

## MMS774 – Facility and Event Management

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Michael Naraine*

*Prerequisite: MMS714*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1.5-hour class, 1 x 1.5-hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 1 x 1.5-hour class, 1 x 1.5-hour seminar per week (recordings provided)*

## Content

This unit examines the operational management techniques applicable to the management of major sport facilities and events. The unit enables students to apply fundamental knowledge drawn from marketing, human resource management, financial management and general management as it applies to facility and event management. The unit places equal emphasis on the management of events and facilities.

## Assessment

- Written assignment 1 4000 words 50%
- Written assignment 2 (Group/3–5 students) equivalent to 3000–4000 words per student 50%

## MMT280 – Brand Management (Tour)

*Enrolment modes: Trimester 2: Overseas Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Alison Ringer*

*Prerequisite: MMK277 or MMK101*

*Corequisite: Nil*

*Incompatible with: MMK280, MMK380*

*In-person attendance requirements: This unit requires students to participate in a supervised study program in Chengdu, China delivered by academics from Deakin's Business School together with South-western University of Finance & Economics (SWUFE)*

*Tour Dates: To be advised*

## Content

In today's competitive world, a key to success is building a strong sustainable brand. This involves creating an identity for your brand by developing a captivating, positive and enduring brand image of your company, product or service. This distinguishes your brand from competitors, and creates an emotional connection with your customers and other stakeholders. The brand reflects the entity's essence, history and values, as well as its future direction. Branding is not isolated to the business world, it is fundamental in your personal development. Personal branding helps create a personality and professional identity that distinguishes you from others. This is an important attribute as you begin and progress along your career and life journey. This unit is designed to allow students to explore and apply fundamental brand management and marketing theories, frameworks and applications to different personal and corporate, product and service contexts. Moreover, this tour version of the unit enables students to experience and understand branding in an international context.

## Assessment

- Assessment 1 – (Group 2–3) Written assignment (3500 words) – 40%
- Assessment 2 – (Group 2–3 from Assessment 1) Oral Presentation (20 minutes) – 20%
- Assessment 3 – (Individual) Written assignment (3500 words) – 40%

## MPA701 – Accounting

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAA701*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Egor Evdokimov*

*Trimester 2 Unit Chair: Ali Yaftian*

*Trimester 3 Unit Chair: Wei Shi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAA717, MAA761, MAA776, MAA777, MAA778*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops of 3 hours duration*

### Content

This unit assumes no previous specific accounting knowledge and concentrates on financial accounting with the objective of students understanding the basic principles and procedures governing what and how information is processed. This includes an analysis of financial reporting outcomes to interpret what the outcomes reveal, together with any shortcomings of processes that may impact upon the quality of information presented. Students will make use of several software tools to facilitate learning, including a commercial accounting package, as part of the learning process.

### Assessment

- Multiple choice test – 5%
- Written task – (1200 words) – 15%
- Assignment output from manual accounting system and computerised accounting package (15%) and associated reflective task (300 words) (5%) – 20%
- Examination (2 hours) – 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MPA702 – Financial Interpretation

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Rhonda Ryan*

*Trimester 2 Unit Chair: Rhonda Ryan*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPA751, MPA951, MPR751, MPR951, MPT751, MPT951*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning workshops of 9 hours duration over the trimester.*

### Content

This unit aims to develop an understanding of how financial reports and other relevant information is used to support decision-making in and about organisations. It is designed to cater for students who do not necessarily have extensive prior business experience and therefore emphasises the business context and relates ideas to basic business transactions and other business functions and financial events. It also emphasises the environment within which businesses operate and discusses the use of important economic information that is normally beyond financial statements.

### Assessment

- Assignment (2000 words) 20%
- Assessment 2 (Group of 5 students) Written assignment (3000 words) 30%
- Examination (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MPD914 – Thesis Results Reporting

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Stuart Orr*

*Trimester 2 Unit Chair: Stuart Orr*

*Trimester 3 Unit Chair: Stuart Orr*

*Cohort rule: For students enrolled in M900, M800 and M901*

*Prerequisite: Completion of all eight stage 1 DBA coursework units or enrolment as a HDR candidate*

*Corequisite: MMD916 or MPD912*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning resources are via CloudDeakin*

### Content

This unit is designed to assist students write up findings from a doctoral-level research project. The output can be an article suitable for publication in a practitioner or academic journal or an academic conference or the results and/or findings and/or discussion chapters of your thesis. Purely conceptual articles are also acceptable. Students must consult with their supervisor and the unit chair to ensure that they choose the most appropriate document to write and plan an appropriate set of drafts leading to the final document. Candidates may be required to attend writing seminar sessions.

The unit is normally undertaken after the candidate has collected the data for the research project and is at 'write-up' stage.

*Note: Students wishing to enrol in this unit must contact the DBA Director via [blresearch@deakin.edu.au](mailto:blresearch@deakin.edu.au).*

Online teaching methods require internet access.

### Assessment

- Written Assignment 1 3000 words 40%
- Written Assignment 2 6000–7000 words 60%

## MPE707 – International Banking and Finance

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MEE707*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Xuan Nguyen*

*Trimester 2 Unit Chair: Xuan Nguyen*

*Prerequisite: MPE781*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops*

### Content

This unit will provide participants with the ability to identify the major issues associated with the globalisation of financial markets and to understand the functions of the international financial and banking systems. Topics include internationalisation of banking and finance, foreign exchange markets and the balance of payment accounts, international parity conditions, the international monetary system, exchange rate arrangements and government intervention, foreign exchange derivatives, foreign exchange exposure and management, international banking and global financial markets and country risk analysis and debt crisis.

### Assessment

- Assignment (Individual) 40%
- Examination 2 hours 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MPE711 – Global Trade and Markets

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MEE711*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Cong Pham*

*Trimester 2 Unit Chair: Aaron Nicholas*

*Prerequisite: MBA703/MBT703 or MBA712 or MPE781 plus three postgraduate business units.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops*

### Content

This unit will provide you with basic tools for analysing economic issues in the world today using an analytical framework, with an emphasis on the economics of international trade and the development of markets. This view emphasises the role of government and studies the interactions between political and private actors in relation to markets. Topics include the law of comparative advantage, economic growth and redistribution, privatisation and migration. As managers and students of business economics you will be equipped with a toolbox of concepts and ideas that will allow you to analyse and adapt to the ever changing environment of the global economy. The analytical approach, combined with the research essay assessment item will emphasise the ability to understand and apply theories, as well as recognise their limitations.

### Assessment

- Assessment 1 (Group of 2–4) – Group Presentation (12 minutes) – 20%
- Assessment 2 (Group of 2–4) – Research Essay (2000 words) – 40%
- Examination (2 hours) – 40%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MPE781 – Economics for Managers

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MEE781*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shuddha Rafiq*

*Trimester 2 Unit Chair: Xuan Nguyen*

*Trimester 3 Unit Chair: Chi-Chur Chao*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA712, MPT781*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning including 3 scheduled online workshops*

### Content

The unit covers the policy and strategic aspects of business management and also provides a practical and pragmatic approach to policy issues. Topics include the dynamics of market behaviour, including a discussion of different market structures and the impact of macroeconomic policies in a changing world economic environment on the economy in general and the student's business in particular.

### Assessment

- Assignment 40%
- Examination 2 hours 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MPF753 – Finance

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MAF753*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mong Shan Ee*

*Trimester 2 Unit Chair: Robert Xiao*

*Trimester 3 Unit Chair: Xiaoyang Li*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MAF740, MBA722, MPT753*

*Recommended: It is recommended that students without prior exposure to elementary statistics undertake MIS771 prior to studying this unit.*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 scheduled online seminars*

### Content

This unit is designed as an introduction to the theoretical principles of finance and the practical requirements of financial management within for-profit corporate organisations. The aim of this unit is to provide students with an understanding of the types of financial decisions that need to be taken in order to create value within the firm beyond that which shareholders could create on their own; and in doing so ensure the long term sustainability of the firm. Students will develop analytical skills for making key financial management decisions, including time-value-of money and risk-return analytics. It envelopes investment, financing, capital structure and payout decisions within the context of the Australian and international financial institutional frameworks. The unit will help students to develop an ability to apply basic mathematics to solve real-world financial decision problems. The unit will offer useful 'take-home' skills and knowledge relevant both for students who are running (or are planning to run) their own businesses as well as those employed (or seeking employment) in managerial positions within large companies.

*Note: A financial calculator is recommended.*

This unit is available in study tour mode.

### Assessment

- Assignment 40%
- Examination 2 hours 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MPK701 – Research Design and Analysis

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ho Yin Wong*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar (recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (recordings provided) per week + 4 x 2 hour online seminar (livestreamed with recordings provided) per trimester*

### Content

The unit will develop students' knowledge of the scope of research in business, together with the processes and techniques used in business research. Specific topics include an introduction to research in business, problem definition, research design, qualitative and quantitative methods, data collection instruments, qualitative and quantitative data analysis, univariate and multivariate statistical analysis, the development of business models, reporting and presentation of results. Applications of business research concepts in various business areas such as strategic management, marketing management, human resources management and other business disciplines will also be discussed.

### Assessment

- Assessment 1 – Written Assignment 4000 words 40%
- Assessment 2 – Examination 2 hours 60%

## MPK704 – Sustainable Environmental Marketing

*Enrolment modes: Trimester 3: Burwood (Melbourne) Intensive, Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MPM704*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Mehdi Taghian*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPT704*

*Scheduled learning activities – cloud (online): 1 x 4 hour seminar (livestreamed with recordings provided) each day of the teaching intensive as per the day and dates provided*

*In-person attendance requirements: Burwood (Melbourne) Intensive offering:*

*Unit is taught face to face intensively in blocks during the trimester; that is, classes are not held on a weekly basis. Attendance is required at each extended hour seminar.*

### Content

Sustainable Environmental Marketing is designed to give students an integrated understanding of environmental sustainability issues as they relate to business management. The unit will provide managers with a conceptual framework for analysing and developing a strategic response to environmental issues and an understanding of the potential business case for sustainability. An integrated overview of human, business and ecological sustainability is presented during the course. Students will address a series of environmental issues and analyse case studies. A problem-based learning approach will guide students to examine critically current business principles and practices as they relate to environmental sustainability.

### Assessment

- Essay (1500) words 15%
- Environmental Sustainability (document) audit report (2500 words) 25%
- Examination (2 hours) 60%

### Hurdle requirement

Submit all assessment tasks, and achieve at least 50% of the available marks for assignment 1 and assignment 2 combined and achieve at least 50% of the marks available on the examination.

## MPK713 – Consumer Behaviour

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: Nil*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jeffrey Rotman*

*Prerequisite: Nil*

*Corequisite: MBA704/MBR704 or MBA720/MBT720 or MPK732/MPT732*

*Incompatible with: MPK712*

*Scheduled learning activities – campus: 1 x 3 hour seminar (livestreamed with recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (livestreamed with recordings provided) per week*

### Content

Understanding the behaviour of consumers and the factors that influence their behaviour is critical to successful marketing managers, CEOs, and company directors. This unit examines consumer behaviour in a broad frame, and considers consumer behaviour from a critical and practical perspective. Students will be challenged to think broadly in the context of consumer behaviour and its application to marketing. We use multiple media platforms to examine how consumer behaviour is used and can be used in successful, contemporary commercial, government, and non-profit contexts. The disciplines of psychology, social psychology, behavioural economics, philosophy and sociology will form the foundation for topics examined in this unit.

### Assessment

- Assessment 1 (Group of 2–4) Project proposal, 500 words, 5%
- Assessment 2 (Group of 2–4) Written assignment (Case study analysis) 3000 words, 30%
- Assessment 3 (Group of 2–4) Five minute digital presentation (either a short film/documentary or audio podcast) 15%
- Time-based assignment (Business case study/ Problem solving analysis) 2500 words, 7 days or 168 hours, 50%

### Hurdle requirement

Achieve at least 50% of the marks available in Assessment 4.

# MPK732 – Marketing Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMK732*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ho Yin Wong*

*Trimester 2 Unit Chair: Michael Valos*

*Trimester 3 Unit Chair: Pandora Kay*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA720, MPR732, MPT732*

*Scheduled learning activities – campus: 1 x 3 hour seminar (livestreamed with recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (livestreamed and recordings provided) per week + 3 x 1.5 hour online seminar (livestreamed with recordings provided) per trimester*

## Content

This unit examines the transformative and integrative marketing management process. A variety of topics are addressed to provide participants with key tools to take away from this exciting discipline. These include marketing strategy and planning; marketing research; segmentation, targeting and positioning; consumer behaviour; pricing considerations and approaches; integrated marketing communications; product strategy and new product development; managing place; and marketing evaluation/metrics. Marketing Management introduces participants to core marketing concepts and techniques, and importantly encourages the application of these to real world contexts.

## Assessment

- Assessment 1 (Group of 2–3) – Case study exercise (3000 words) – 30%
- Blogging (1600 words) – 20%
- Examination: (2 hours) – 50%

## Hurdle requirement

Achieve at least 50% of the marks available on the examination.

# MPK733 – Applied Strategic Marketing

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Pandora Kay*

*Trimester 2 Unit Chair: Mehdi Taghian*

*Prerequisite: For M758 students only: MPK732/MPT732/MPR732, MPK701, plus any six other units in M788*

*For all other students: MPK732/MPT732 or MBA720/MBT720, plus any seven other postgraduate units*

*Incompatible with: MMK733*

*Scheduled learning activities – campus: 1 x 3 hour seminar (livestreamed with recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (livestreamed and recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week*

## Content

This is the capstone unit for the Master of Marketing. It provides an overview of the analytical framework for strategic market planning; the nature of strategic market planning, analysing market opportunity and competitive capability. It requires students to combine strategic theory with an integrated understanding of marketing theory and applied research skills gained throughout the course and apply it in a competitive business simulation. Student teams will be competing against other teams for markets, market share, sales, and ultimately profit through the successful management of product lines and other corporate resources. The overall objective of the unit is to demonstrate an ability to analyse markets, evaluate opportunities, and create corporate value through the application of marketing theory.

## Assessment

- Marketing plan (3500 words) 40%
- Oral presentation (20 minutes) 20%
- Weekly report (500 words per week) 10%
- Assessment 4 (Group 4–6) Simulation performance, 30%

## MPK736 – International Marketing

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMK736*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mehdi Taghian*

*Prerequisite: Nil*

*Corequisite: MBA704/MBR704/MBT704 or MBA720/MBT720 or MPK732/MPT732*

*Incompatible with: MPT736*

*Scheduled learning activities – campus: 1 x 3 hour seminar (livestreamed with recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (livestreamed with recordings provided) per week*

### Content

The purpose of this unit is to examine the key elements in the formulation and implementation of international marketing strategy. The unit analyses the stages through which the firm moves in formulating its global strategy; initial entry; local market expansion; and global rationalisation. The formulation and implementation of strategy is discussed within the context of increasing interdependence of country markets and regional market integration.

*Note: This unit is available in study tour mode.*

### Assessment

- Written Assignment 1 (1000 words) – 10%
- Written Assignment 2 (2500 words) – 30%
- Examination (2 hours) – 60%

### Hurdle requirement

Achieve a passing grade on the assignments (1 and 2 combined) and at least 50% of the marks available on the examination.

## MPL700 – Leadership Practice with Impact

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Melanie Kan*

*Trimester 2 Unit Chair: Melanie Kan*

*Trimester 3 Unit Chair: Huong Le*

*Cohort rule: This unit is only available to students enrolled in M597 – Graduate Certificate of Professional Practice (Leadership), M597 – Graduate Certificate of Leadership, M797 – Master of Leadership, M797 – Master of Professional Practice (Leadership)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPM771*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including online content for each topic which is available on demand.*

### Content

This unit is designed for students undertaking studies in leadership. The purpose of the unit is to deliver a thorough grounding in the main leadership theories, concepts, and issues. It is intended as an introduction to leadership and will be the theoretical foundation upon which other leadership units are built. As such, it would normally be the first leadership unit that students take. It is delivered wholly online, so students take full responsibility for their own learning and progress. Through readings, online lectures and podcasts, interactive discussion boards, and individual activities, students will engage with leadership theories and to apply them to their own workplaces.

*Note: This unit uses the FutureLearn online learning platform.*

### Assessment

- Assessment 1 – Individual – Topic tasks, 5% each task – Eight topics/tasks in total adding up to 40% (500 words per task)
- Assessment 2 – Individual – Consolidation of online portfolio and report, 60% (5000 words)

## MPL701 – Leadership Challenges

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Melissa Parris*

*Trimester 2 Unit Chair: Andrew Creed*

*Trimester 3 Unit Chair: Huong Le*

*Cohort rule: For students enrolled in: M597, M797, M701, M538, M738, D713*

*Prerequisite: MPL700 or MBA730/MBR730 or MBA706/MBR706*

*Corequisite: Nil*

*Incompatible with: MPM773*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including online content for each topic which is available on demand.*

### Content

This unit is designed for students undertaking studies in leadership. The purpose of the unit is to explore the relevance of leadership theory to students' experience of leadership issues in the workplace. In particular, this unit will focus on issues such as power and influence, leading teams, diversity, ethics, leading under crisis and leadership development. Students will develop an enriched case study of contemporary issues that allow them to apply course theories and explore leadership in 'real' situations. It is delivered wholly online so students take full responsibility for their own learning and progress. Through readings, online lectures and podcasts, interactive discussion boards, and individual activities, students will engage with leadership theories and to apply them to their own circumstances.

*Note: This unit uses the FutureLearn online learning platform.*

### Assessment

- Assessment 1 (Individual) Portfolio- 6 topics/tasks of 500 words each (total 3000 words) 50%
- Case Study (3000 word report, plus 5-minute video) 50%

## MPM701 – Business Process Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mike Bengough*

*Trimester 2 Unit Chair: Mike Bengough*

*Trimester 3 Unit Chair: Mike Bengough*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA710, MPC701, MPM701A*

*Scheduled learning activities – campus: 1 x 2 hour class per week.*

*From Trimester 2 2019: 1 x 2 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including a minimum of 3 scheduled online workshops*

### Content

This unit provides foundation skills and knowledge about the management of business processes and emphasises the importance of their links to organisational strategies. It considers the role of information and communication technologies in supporting business processes and it introduces enterprise systems and the ways in which these can automate processes and report on the goals and objectives of the organisation. The unit highlights that business process management (BPM) is applicable in all industries, for example, manufacturing, wholesale and service sectors, and that it is pertinent to business organisations of all sizes. The unit introduces business processes from architectural, problem scoping, modeling, methodological and measurement perspectives. The unit prepares students to develop and enhance professional careers in industry, government, and the not-for-profit sector.

*Note: This unit is also available in Start Anytime mode.*

### Assessment

- Presentation 10%
- Assessment 2 (Group of 3) – Written Assignment (2000 words) 40%
- Examination (2 hours) 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MPM701A – Business Process Management

*Enrolment modes: Start Anytime*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Mike Bengough*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA710, MPC701, MPM701*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including online content for each topic which is available on demand.*

### Content

This unit provides foundation skills and knowledge about the management of business processes and emphasises the importance of their links to organisational strategies. It considers the role of information and communication technologies in supporting business processes and it introduces enterprise systems and the ways in which these can automate processes and report on the goals and objectives of the organisation. The unit prepares students to develop and enhance professional careers in industry, government, and the not-for-profit sector.

### Assessment

- Written response and BPMN diagramming for 'As Is' analysis and some additional complex diagramming (maximum of 3000 words plus business diagrams) – 40%
- Written response and BPMN diagramming for 'To Be' analysis (maximum of 3000 words plus business diagrams) – 60%

## MPM703 – Business Strategy and Analysis

*Enrolment modes:*

*Trimester 1 Burwood (Melbourne), Cloud (online)*

*Trimester 2 Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MDM703*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Banjo Roxas*

*Trimester 2 Unit Chair: Steve Jaynes*

*Prerequisite: Nil.*

*From Trimester 2 2019: M751 students: Must have completed MPM731, MPM732, MMH733 and MIS770. All other students: Must have completed any six postgraduate units.*

*Corequisite: Nil*

*Incompatible with: MPM706, MPR706*

*Scheduled learning activities – campus: 1 x 3 hour class per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities (recordings provided) including 6 x 1 hour scheduled online seminars.*

### Content

This unit introduces students to the role of business strategy in developing and sustaining competitive advantage. The broad aim of this unit is to equip students with an introductory knowledge of business strategy concepts and tools, together with an ability to apply this knowledge to a variety of macro environment, industry, and business situations.

### Assessment

- Written Assignment 3500 words 40%
- Examination 2 hours 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MPM705 – Retailing

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Alvin Lee*

*Prerequisite: Nil.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar (livestreamed with recordings provided) per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar (livestreamed and recordings provided) + 1 hour online seminar (livestreamed with recordings provided) per week*

### Content

Retailers are the final link in the supply chain, they present and sell goods and services to the final product users. Although retailing seems like a simple activity, the industry has become highly complex, competitive and challenging. Retailing is also among the largest industry sectors in the economy. You will learn the basic elements of retailing. The unit is future focused, concentrating on the changing retail-field to help students prepare for careers in the industry.

### Assessment

- Assessment 1 (Group of 4) – Written Assignment (4000 words) – 50%
- Examination (2 hours) – 50%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MPM712 – Managing Innovation

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Andrea Howell*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPT712*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour class per week (recordings provided)*

### Content

This unit focuses on the notion of ‘intrapreneurship’ and the processes by which innovative ideas are turned into commercial advantage. Innovation can occur in products/services, processes and systems, business models, or in business operations. Hence, the unit focuses on the innovation process itself, management strategies that foster innovation, and how innovation models and theory can be applied to each of these areas, resulting in sustainable competitive advantage. Topics to be addressed in this unit include: mental models of the management process; models of appropriate control; quality assurance; improving performance; innovation strategies; and leading people in an environment of innovation.

### Assessment

- Assessment 1a (Group of 4) Written report – 4000 words 40%
- Assessment 1b (Individual) Video recording – 5 minutes 10%
- Discussion board contribution (10 unique contributions throughout the trimester) 10%
- Written reflection and establishment of tool kit for the management of innovation (4000 words) 40%

## MPM715 – Management and Organisational Consulting

*Enrolment modes: Trimester 2: Burwood (Melbourne) Intensive*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Stuart Orr*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPD915*

*In-person attendance requirements: Unit is taught face to face intensively in blocks during the trimester; that is, classes are not held on a weekly basis. Attendance is required at both seminars.*

### Content

Management and Organisational Consulting is designed to encourage students' understanding of the nature and purpose of management consulting and to equip them with skills and attitudes needed to work in the management consulting field. The unit will integrate theory from several fields of management study – organisational psychology, organisational change and business-to-business services marketing – and will draw on research and case studies which specifically address management consulting.

### Assessment

- Assignment 1: 1500 words 30%
- Assignment 2: (Group/up to 3 students) 3000 words, plus a formal presentation 40%
- Assignment 3: 2000 words 30%

## MPM716 – Merchandise Management

*Enrolment modes: Not offered in 2019*

*EFTSL value: 0.125*

*Prerequisite: MPM705*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 3 hour seminar per week (recordings provided)*

### Content

Merchandise is the critical activity for retail businesses and encompasses buying, ranging, distributing, pricing, promoting, managing inventory, markdown management and shrinkage. The unit introduces you to principles and practices of contemporary merchandise management and develops critical understanding of the relationship between product, positioning, promotion and profit. In addition, this unit explores the critical relationships and synergies that exist between retailers and suppliers, which increasingly define the effectiveness of merchandise management strategy across key supply chain stages including distribution, data exchange, shopper marketing, category captaincy and range planning.

### Assessment

- Written assignment (3000 words) 40%
- Examination (2 hours) 60%

## MPM722 – Human Resource Management

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne) Intensive, Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMM722*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shaung Ren*

*Trimester 3 Unit Chair: Bruce Hearn Mackinnon*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPR722, MPT722*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week. Students will be also be provided with recorded classes and e-live sessions*

*Scheduled learning activities – cloud (online): Learning resources are via CloudDeakin. Students will be also be provided with recorded classes and e-live session*

*In-person attendance requirements: TRIMESTER 3 ONLY:*

*Burwood (Melbourne) Intensive:*

### Content

The unit content focuses on the strategic management of people in the workplace. It is designed for managers or aspiring managers to be able to understand the potential of strategic HRM in the macro context to build a strategic competitive advantage for organisations.

It uses a mix of local and global examples to illustrate these points. Specific attention is given to issues of strategic alignment and developing a HR strategy, talent management, human resources planning, talent development, and managing for performance. Students will also develop practical skills in HRM topics that they will be able to utilise in their workplaces.

*Note: Cloud (online) enrolled students are also welcome to attend Intensive offering sessions.*

## Assessment

- Written Assignment (Individual) 3000 words plus 500 words from a related blog discussion on the theory associated with the research question on Cloud Deakin, 50%
- Examination: (2 hours), 50%

## Hurdle requirement

Achieve 50% of the marks available on the examination.

## MPM731 – Business Communication for Managers

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Siewmee Barton*

*Trimester 3 Unit Chair: Siewmee Barton*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPR703*

*Scheduled learning activities – campus: 1 x 2 hour class session plus 1 x 1 hour seminar per week*

*Scheduled learning activities – cloud (online): 1 x 2 hour class (recorded) and 1 x 1 hour online seminar per week*

## Content

The aim of the unit is to develop the abilities of students to communicate effectively both academically at the Masters level and in business environments. Specifically, the unit is designed to provide students with the ability to utilise and choose appropriate communication techniques for different scenarios. The ability to articulate key messages using appropriate techniques and channels is a critical skill for managers facing multiple communication challenges in the 21st century.

## Assessment

- Written research report and analysis (1500 words) – 20%
- Assessment 2 (Group of 4 and individual) – Group report (4000 words 30%) and Individual written self-reflection (500 words 10%) – 40%
- Public Communication (Written communication (1500 words 20%); Embedded podcast (5 minutes 10%) Blog (1000 words 10%)) – 40%

## MPM732 – Critical Thinking for Managers

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Steve Ogden*

*Trimester 2 Unit Chair: Stuart Orr*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities (recordings provided) including a minimum of 3 scheduled online seminars.*

## Content

The critical thinking unit aims to introduce students to the level of thought and critical analysis required to complete Masters level units successfully. It will introduce students to concepts including analytic and synthetic thinking, the development of hypotheses, construction and deconstruction of argument, credibility and the use of evidence, explanations and inferences, and the process of evaluation.

The unit will help bridge the gap for students who have completed bachelor degrees using traditional learning techniques to enable them to advance into critical thinking and analysis at a level suitable for Masters level units.

## Assessment

- Written paper (1500–2000 words) – 30%
- Podcast or webcast (equivalent to 1000 words) – 30%
- Examination (2 hours) – 40%

## MPM735 – International Business Management

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMM735*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Doren Chadee*

*Trimester 2 Unit Chair: Doren Chadee*

*Trimester 3 Unit Chair: Doren Chadee*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPT735*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities (recordings provided) including a minimum of 3 scheduled online seminars.*

### Content

This unit covers the role and issues of management in the international environment. The principal aim is to provide students with the requisite knowledge and skills that will enable them to manage in a complex and foreign business environment. The unit also provides an overview of the international economic, political, legal and cultural environments within which international businesses have to operate. The main thrust of the unit, however, is upon international business management strategy.

*Note: This unit is available in study tour mode.*

### Assessment

- International business research report (3000 words) – 35%
- Assessment 2 (Group of 3) – Applied international business strategy research project (3000 words) – 35%
- Examination (2 hours) – 30%

### Hurdle requirement

Each student must achieve at least 50% of the final examination mark.

## MPM755 – Building Success in Commerce

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Steve Ogden*

*Trimester 2 Unit Chair: Steve Ogden*

*Trimester 3 Unit Chair: Harsh Suri*

*Prerequisite: Must have passed 7 units including MPA701, MPE781/MPT781, MPF753/MPT753, MPM701, MPM731*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week*

*Scheduled learning activities – cloud (online): 3 x 1 hour class per week (recordings provided) plus 3 x 1 hour online seminars*

### Content

Integrated and linked with core units, the capstone unit provides students with the opportunity to scope a business challenge, and through considered research, provide a solid foundation to identify priorities for decision-making in the context of setting up a business. Students will develop a proposal for setting up a new business entity. Along the way, students will be able to demonstrate their ability to research the issue at hand, identify different solutions, taking into account personal, team and societal issues/challenges so that a recommendation/solution can be proposed. This will require students to utilise their skills in accounting, economics, finance, business process management, and business communication to develop a coherent and aligned business plan and resourcing strategies that contribute to business success in a dynamic, global business environment. Students will be required to explain and justify their decisions. Business decision-making is underpinned by ethics and cultural understanding, and students will identify and reflect on their approach to decision-making and how they perceive business success in this context.

### Assessment

- A critical analysis of a chosen discipline based factors that affect business success (2000 words) – 30%
- Assessment 2 (Group – 4 students) – Group business proposal (5000 words) – 50%
- Individual reflection (1500 words) – 20%

## MPM773 – Contemporary Issues in Leadership

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Jon Billsberry*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: Burwood (Melbourne) Intensive: This unit will be taught in intensive mode at Burwood (Melbourne) on the following dates between 9.00am and 5.00pm. Students will devote this time to study and complete assessments in various forms. Between each teaching block, students will prepare their case studies to be presented at the following class. In addition, students will need to do some pre-reading before coming to the first class. These details are explained on CloudDeakin.*

### Content

This unit is designed for students undertaking studies in leadership. The purpose of the unit is to explore the relevance of leadership theory to students' experience of real world issues. In particular, this unit will focus on leadership under pressure, in times of crisis, and in response to global issues such as sustainability, terrorist activity, and the ethical behaviour of leaders. The unit will be taught in three blocks of two days so that contemporary leadership events can be tracked to explore their dynamic nature and emerging complexity. Students will be encouraged to develop enriched case studies of contemporary issues that allow them to apply course theories and explore leadership in 'real' situations.

*Note: Further information about the unit is available from: TBA*

### Assessment

- Case presentation 1 (pairs) 35%
- Case presentation 2 (pairs) 35%
- Individual assignment 30%

### Hurdle requirement

In normal circumstances, students will have to attend and participate in all three blocks to satisfy the requirements of the unit.

## MPM775 – Personal Leadership

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Prerequisite: Must have passed 3 units in MBA730, MBR730, MPM771, MPR771, MPM772, MPR772, MPM773*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: Burwood (Melbourne) Intensive offering:*

*Unit is taught face to face intensively in blocks during trimester 2. Classes are not held every week, but attendance is required across the trimester:*

### Content

The aim of this unit is to retrieve, integrate, reinforce, extend, and intensify the learning benefits from studying the core units in the Master of Leadership.

### Assessment

- Written Report (3000 words) – 360-Degree Leadership Re-Assessment – 30%
- Assessment 2 (in pairs) – Leadership Assessment Task lasting 4 hours that assesses current leadership skills and gaps for further improvement – 30%
- Personal Leadership Video Documentary (max 30 mins) – 40%

## MPM792 – Operations Management

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Stuart Orr*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities (recordings provided) including a minimum of 6 scheduled online seminars.*

## Content

The unit considers operation management as a transformative, cross-functional process. It covers both manufacturing and service contexts and is based upon learning from case studies, simulations and examples. Topics include: operations and supply chain strategy; quality management; product and process design; capacity planning; scheduling; and materials and inventory management. A holistic approach is taken, and the emphasis is on dealing with individual aspects of operations within an overall strategic framework for business effectiveness.

## Assessment

- Assessment 1 (group/3 students) – Written Assignment (3000 words) – 40%
- Research Report (4000 words) – 60%

## MPP701 – Research Project 1A

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*  
*Trimester 2: Burwood (Melbourne), Cloud (online)*  
*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kerrie Bridson*  
*Trimester 2 Unit Chair: Kerrie Bridson*  
*Trimester 3 Unit Chair: Kerrie Bridson*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPP704*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin*

## Content

Students will complete a comprehensive research study under the guidance of a supervisor, who must be a member of academic staff at Deakin University. The study will require students to identify and define a problem, review relevant literature, design a study method, present findings, interpret results and present conclusions and recommendations.

*Note: Special enrolment procedure applies – please contact a buslaw student adviser for further details.*

## Assessment

Written Research Report (10,000 words) 100%.

For students completing both MPP701 and MPP702: Research proposal and literature review (individual or group of 2–4) up to 10000 words, 100%.

## MPP702 – Research Project 1B

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kerrie Bridson*

*Trimester 2 Unit Chair: Kerrie Bridson*

*Trimester 3 Unit Chair: Kerrie Bridson*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPP704*

*Scheduled learning activities – campus: This unit requires no formal class attendance; however, it will involve a minimum of 22 hours supervised contact.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin*

## Content

Students will complete a comprehensive research study under the guidance of a supervisor, who must be a member of academic staff at Deakin University. The study will require students to identify and define a problem, review relevant literature, design a study method, present findings, interpret results and present conclusions and recommendations.

*Note: Special enrolment procedure applies – please contact a buslaw student adviser for further details.*

## Assessment

Written Research Report (10,000 words) 100%.

For students completing both MPP701 and MPP702: Written Research Report (individual or group of 2–4) up to 15,000 words, 100%.

## MPP703 – Leadership Research Project

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 2*

## MPR705 – Entrepreneurship (Residential)

*Enrolment modes: Residential: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: MMR705*

*EFTSL value: 0.125*

*Unit chair: Heather Round*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: This Residential unit requires students to attend six days of intensive study at the Waurin Ponds Estate, Geelong.*

*Residential Dates: Sunday 21 July to Friday 26 July 2019*

### Content

The unit introduces participants to the concept and processes of entrepreneurship. Students gain an understanding of venture start-ups through the development of a venture proposal into a venture plan. In this way practical experience of the entrepreneurial process is gained. The unit requires students to examine the skills that entrepreneurs and intrapreneurs need, in small business and in larger organisations. Participants are exposed to techniques and tools necessary to new venture development, as well as to entrepreneurs who share their experience.

*Note: Conference fees for residential units are in addition to the tuition fee and vary depending on the type of accommodation chosen. For further information please visit the Residential Units webpage.*

*Please note: The final result for this unit will be released on the same date as Trimester 2 results – Thursday 7 November 2019 from 6pm.*

### Assessment

- Ideas Market: Individual poster presentations with three minute 'idea pitches' to peers, 20%
- Assessment 2 (Group of 4–6) twenty minute presentation and follow up report (4000 words) 50%
- Essay (3000 words) 30%

### From Residential period 4 2019

- Presentation (3 minutes) – 20%
- Assessment 2 (Group 4–5, two parts) 50% total
  - Part 2A: Presentation (20 minutes) – 20%
  - Part 2B: Written Report (4000 words) – 30%
- Assessment 3 (Individual) – Essay (3000 words) – 30%

## MPR779 – Leadership in the Real World

*Enrolment modes: Residential: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: MMR703, MPR703*

*EFTSL value: 0.125*

*Unit chair: John Molineux*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: This Residential unit requires students to attend six days of intensive study at the Waurin Ponds Estate, Geelong.*

*Residential Dates: Sunday 23 June to Friday 28 June 2019*

### Content

This is an intensive experiential program designed to capitalise on principles of adult learning. Students participate in a series of interactions designed to reproduce the dynamics of communication within organisations as well as communication between the organisation and its environment. The intensive residential program addresses interaction of individuals, groups, and larger social units. Topics addressed include handling of media crises, understanding the importance of interpersonal communication and storytelling, and negotiation and mediation skills. Students learn by dealing with problem situations and by reflecting on their performance. Concepts and techniques are provided through appropriate readings, situational practice, and extended exposure to communication and media professionals.

*Note: Conference fees for residential units are in addition to the tuition fee and vary depending on the type of accommodation chosen.*

*Please note: The final result for this unit will be released shortly after Trimester 1 result release.*

### Assessment

- Assignment 1 (Group Presentation 3–5 students) 30%
- Assignment 2 (Group 3–5 students) 30%
- Assignment 3 (2000 words) 40%

## MPT712 – Managing Innovation (Tour)

*Enrolment modes: Trimester 3: Overseas Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Heather Round*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPM712*

*In-person attendance requirements: The study tour is a full 10 day trip of which 7 days have activities arranged from 8am through to 5pm.*

### Content

In this unit students visit an innovative ecosystem (such as Silicon Valley in the USA or Chilcon Valley in Chile) and spend 10 days visiting key organisations in the chosen entrepreneurial hub in order to learn more about managing innovation. A wide range of organisations will be selected as part of the study tour in order to develop comprehensive knowledge about 'intrapreneurship' and the processes by which innovative ideas are turned into commercial advantage. Innovation can occur in products/services, processes and systems, business models, or in business operations. Hence, the unit focuses on the innovation process itself, management strategies that foster innovation, and how innovation models and theory can be applied to each of these areas, resulting in sustainable competitive advantage. As part of the study tour students will have the opportunity to learn from the leaders in the area of innovation and also to expand their own networks in order to continue to develop their own innovation skills in future.

### Assessment

- Assessment 1 (Group of 4) Written report – 4000 words 40%
- Discussion board contribution (10 unique contributions throughout the trimester) 10%
- Written reflection and establishment of tool kit for the management of innovation (5000 words) 50%

## MPT732 – Marketing Management (Tour)

*Enrolment modes: Trimester 2: Overseas Study Tour*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Hall*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPK732, MPR732*

*In-person attendance requirements: This unit requires students to attend a supervised study tour*

### Content

The unit introduces marketing as an integrative management function. It draws together the activities of every area of an organisation concerned with the planning, development, distribution, promotion and pricing of goods and services. The unit will examine the comprehensive perspective essential to marketing decision-making, through relationships with customers, suppliers, competitors, society, and other organisational functions. This unit covers the significant areas within marketing, such as research, buyer behaviour, product planning, marketing planning, pricing, and distribution, focusing on managing these elements within an overall integrated marketing strategy.

*Note: Special enrolment procedure applies. Enrolment in this program is by application only.*

### Assessment

- Test(s) 20%
- Written assignment 1 (group) 4000 words 40%
- Written assignment 2 (individual) 4000 words 40%

## MPT735 – International Business Management (Tour)

*Enrolment modes: Trimester 3 (Overseas Study Tour)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Doren Chadee*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MPM735*

*Scheduled learning activities – campus: There will be 20 hours of classes and 10 hours of seminars. In addition, the experiential learning component will include visits to international businesses, related to themes of the course. These visits will involve approximately 18 hours.*

*In-person attendance requirements: This unit requires students to attend a supervised study tour.*

## Content

This unit covers the role and issues of management in the international environment. The principal aim is to provide students with the requisite knowledge and skills that will enable them to manage in a complex and foreign business environment. The unit also provides an overview of the international economic, political, legal and cultural environments within which international businesses have to operate. The main thrust of the unit, however, is a focus upon international business management strategy.

## Assessment

- Written Assignment 1 1500 words 20%
- Written Assignment 2 3000 words 40%
- Written Assignment 3 3000 words 40%

## Hurdle requirement

Achieve a passing grade on each piece of assessment.

# MPT736 – International Marketing

*Enrolment modes: Trimester 2: Overseas Study Tour*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Hall*

*Prerequisite: Nil*

*Corequisite: MBA704/MBR704 or MBA720 or MPK732/MPT732*

*Incompatible with: MPK736*

*In-person attendance requirements: This unit requires students to attend a supervised study tour*

## Content

International marketing focuses on the nature of the international marketplace and the decisions facing international marketing managers. International marketing is the process of planning and conducting transactions across national boundaries to create exchanges and satisfy the objectives of the parties involved in the exchange. International marketing is a sub-set of international business.

International marketing takes many forms ranging from exporting to wholly owned subsidiaries. The unit deals with the marketing activities and the management of those activities in foreign markets. The depth and breadth of a business' involvement in marketing activities in foreign markets depends on many factors, e.g., its size, resources and extent of international experiences. International marketing is concerned with a wide range of organisations, from businesses that export to only one market, to large global companies marketing their products across many countries and managing the marketing activities through their own subsidiaries.

International marketing issues relating to small firms and exporting will be emphasised throughout the course of this unit. Marketing theory, international trade and international business management principles provide the foundation for this unit. The theoretical frameworks form the basis of explaining international marketing decisions, including market selection, mode of market entry, the management of marketing activities, and market coverage.

*Note: Please refer to Study Tour link below for further information:*

## USA Study Tour

Special enrolment procedure applies.

Enrolment in this program is by application only. Applications for 2019 programs will open on the following dates:

- T2 2019 programs – Dates to be advised
- T3 2019 programs – Dates to be advised

Please add yourself to our expression of interest list and we will contact you when applications open. For further information on international study opportunities please see Deakin's website.

## Assessment

- Written assignment 1 (group) 4000 words 40%
- Written assignment 2 (individual) 4000 words 40%
- Test(s) 20%

## Hurdle requirement

1. Attendance for all visits.
2. A Group Daily report. These represent the Group's responses after the discussion of the set questions addressed at the conclusion of the daily visits.
3. A copy of the Individual Daily Journal that will be emailed to the Leaders on a regular basis.

From T2 2019: NIL

## MPT781 – Economics for Managers (Study Tour)

*Enrolment modes: Trimester 3 (Study Tour)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Munirul Nabin*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MBA712, MBT712, MPE781*

*In-person attendance requirements: There will be 20 hours of classes and 10 hours of seminars. In addition the experiential learning component will include visits to international businesses related to themes of the course. These visits will involve approximately 18 hours.*

### Content

This unit covers the policy and strategic aspects of business management and also provides a practical and pragmatic approach to policy issues. Topics include the dynamics of market behaviour, including a discussion of different market structures and the impact of macroeconomic policies in a changing world economic environment. The unit has a practical focus as evidenced by the application of theory to international business.

*Special enrolment procedure applies.*

Please add yourself to our expression of interest list and we will contact you when applications open. For further information on international study opportunities please see Deakin's website.

### Assessment

- Assessment 1 (individual) – Case study report (less than 3000 words) – 40%.
- Examination (Individual) – 2 hours Take home exam – 60%

### Hurdle requirement

Achieve at least 50% of the marks available on the examination.

## MRA908 – Discipline Reading Unit (Accounting)

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: This unit is only available to students enrolled in M900 – Doctor of Philosophy*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hours class per week*

### Content

This unit provides students with the requisite discipline knowledge and skills in research to enable them to analyse critically the research domain that is pertinent to their area of research. Students will also develop skills to evaluate critically research undertaken by others. As part of this unit, students will further expand on their discipline knowledge related to the topic area of their research.

### Assessment

- Written assignment (4000 words) – 40%
- Written assignment (5000 words) – 60%

## MRI908 – Discipline Reading Unit (Isba)

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: This unit is only available to students enrolled in M900 – Doctor of Philosophy*

*Prerequisite: Nil*

## MSC401 – Research Report 1

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

The unit requires students to make significant progress towards developing their research programs and designing their research. Students work with their individual supervisors to identify and refine their research topic.

## Assessment

Satisfactory progress towards 15,000–20,000 word thesis.

## MSC402 – Research Report 2

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

The unit requires students to make significant progress towards developing their research programs and designing their research. Students work with their individual supervisors to identify and refine their research topic.

## Assessment

Satisfactory progress towards 15,000–20,000 word thesis.

## MSC403 – Research Report 3

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

The unit continues investigations commenced in MSC401.

## Assessment

Satisfactory progress towards 15,000–20,000 word thesis.

## MSC404 – Research Report 4

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

The unit continues investigations commenced in MSC401. Completion of the unit requires the submission of an honours thesis of approximately 15,000 words.

## Assessment

Thesis (15,000 words) 100%.

## MSC411 – Research Paradigms and Contemporary Issues in Information Systems

*Offering information: To be advised*

*Enrolment modes: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: (For Bachelor of Commerce (Honours) students only)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): This unit is taught via cloud (online) mode and by individual supervision and mentoring.*

### Content

This unit will provide students with advanced literature review and literature analysis. The main purpose of the review is to gain skills in the preparation of a literature review and a deeper appreciation of the IS discipline and scholastic endeavour. Students are asked to select a literature review topic that may be related to but not on their chosen thesis topic. Reviewing and discussing contemporary theoretical and methodological developments are encouraged. Students may choose their research supervisor or another staff member to mentor this review. Students will present their review to a selected group of staff. Students will also be asked to provide a reflection on the process of researching and writing on their topic as part of their final paper and presentation.

### Assessment

- Written Assignment 1 1500 words 25%
- Written Assignment 2 2000 words 25%
- Assignment 4000 words 50%

## MWL101 – Professional Insight

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2\*: Burwood (Melbourne), Warrnambool, Waterfront (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Micaela Spiers*

*Trimester 2 Unit Chair: Micaela Spiers*

*Trimester 3 Unit Chair: Wayne Read*

*Previously: Personal Insight*

*Prerequisite: Completion of 3 credit points of study*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour seminar per week with an additional 4 x 1 hour class to run in weeks 1, 3, 5, and 8.*

*Scheduled learning activities – cloud (online): 1 x 2 hour seminar per week (livestreamed with recordings provided) with an additional 4 x 1 hour recorded class to run in weeks 1, 3, 5, and 8.*

### Content

The Professional Insight unit is a compulsory unit offered in Deakin's Bachelor of Commerce program and is also available to students from other programs and faculties within the University. The University recognises the importance of students gaining professional identity skills to enable them to apply for and effectively participate in the business environment. The unit aims to broaden students' self-awareness and understanding of their career preparation, develop tools and actions plans, and range of communication capabilities necessary to be successful in both their business and personal lives.

### Assessment

- Assessment 1: (Individual) My opportunities – industry and capabilities analysis, 2000 words, 20%
- Assessment 2: (Individual with groups of 3–4 work) My Profile – Action Plan, Professional Profile – 1-minute video and reflection, 1500 words, 30%
- Assessment 3: (Individual with groups of 3–4 work) My Application – application, mock interview and reflection, 2500–3000 words, 50%

### Hurdle requirement

Students must successfully complete the online 'Introduction to Professional Identity' module before they can attain access to Assessment 2.

## MWL201 – Community Based Volunteering

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wayne Read*

*Trimester 2 Unit Chair: Wayne Read*

*Trimester 3 Unit Chair: Marion Steel*

*Prerequisite: Completion of 4 credit points (excluding Recognition of Prior Learning) prior to commencing placement.*

*Corequisite: Nil*

*Incompatible with: MIS291*

*In-person attendance requirements: This unit is an experiential learning unit which will involve approximately 100 hours of placement plus 20 hours for individual reflection and associated assessment tasks.*

*This unit requires no formal class attendance though some programs may conduct a compulsory briefing/orientation session (4 hours).*

### Content

This unit provides students with an opportunity to undertake appropriate and relevant experiential learning within their studies. The unit aims to provide students with an opportunity as part of their course to take part in a community based volunteering placement with a not-for-profit organisation as a means for developing citizenship, generic skills and graduate attributes that enhance future employment.

*Note: This unit requires students to complete an online application form and submit a current resume and signed course map. For more information and to complete the application process please [click here](#). Students cannot enrol in the unit or commence a placement without written approval. Placements can be completed in Australia or overseas.*

### Assessment

Assessment – Learning Portfolio – 100%.

## MWL202 – Team Projects

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wayne Read*

*Trimester 2 Unit Chair: Wayne Read*

*Trimester 3 Unit Chair: MARION STEEL*

*Prerequisite: Completion of 6 credit points (including RPL) prior to starting the unit.*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: This unit is an experiential learning unit which will involve approximately 100 hours of teamwork plus approximately 20 hours for individual reflection and associated assessment tasks. Contact hours in formal class attendance will vary depending upon the team project and are included in the 100 hours of teamwork.*

### Content

The purpose of this unit is to give you the opportunity to undertake an authentic project to facilitate learning within a team structure. This 100–160 hour placement has been designed for you to learn in and with the team, with the intention of critically reflecting on your placement, your graduate attributes and employability competencies through continuous assessment processes. Opportunities to undertake this unit are Faculty sourced and promoted. Special workshops may be offered for students.

### Assessment

Assessment – Learning Portfolio – 100%.

## MWL203 – Work Based Learning

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wayne Read*

*Trimester 2 Unit Chair: Wayne Read*

*Trimester 3 Unit Chair: Marion Steel*

*Prerequisite: Completion of 8 credit points prior to enrolling in this unit. A student must also have been working with their current organisation for more than six months.*

*Corequisite: Nil*

*Incompatible with: MIS293*

*In-person attendance requirements: This unit is an experiential learning unit which does not require formal class attendance however, it will involve a minimum of fortnightly contact with teaching staff.*

### Content

This unit aims to provide students in regular employment with an opportunity to develop and demonstrate the application of knowledge acquired in their degree by undertaking a project located at their existing workplace.

*Note: This unit requires students to complete an online application form and submit a current resume and signed course map. For more information and to complete the application process: Work Based Learning.*

Students cannot enrol in the unit or commence a placement without written approval. Placements can be completed in Australia or overseas.

### Assessment

Assessment – Learning Portfolio – 100%.

## MWL204 – Global Business Experience

*Enrolment modes:*

*Trimester 1: Overseas business experience (Intensive)*

*Trimester 2: Overseas business experience (Intensive)*

*Trimester 3: Overseas business experience (Intensive)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wayne Read*

*Trimester 2 Unit Chair: Wayne Read*

*Trimester 3 Unit Chair: Marion Steel*

*Prerequisite: Completion of 8 credit points prior to enrolling in this unit*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: 10–24 days of overseas business experience plus approximately 20 hours for individual reflection and assessment tasks. A compulsory briefing session(s) (min 4–5 hours) will be conducted prior to commencement of overseas experience.*

### Content

MWL204 Global Business Experience is an experiential learning unit. It will involve between 10–24 days of overseas experience plus approximately 20 hours for individual reflection and associated assessment tasks. This unit will provide an authentic learning and professional experience which should increase student awareness and understanding of the skills and tasks required as a global business graduate. Students will critically reflect on their involvement in the international experience, their graduate attributes and employability competencies through a continuous assessment process.

### Assessment

Assessment – Learning Portfolio – 100%.

Students must abide by the Deakin Student Code of Conduct.

## MWL301 – Team Internship

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wayne Read*

*Trimester 2 Unit Chair: Wayne Read*

*Trimester 3 Unit Chair: Marion Steel*

*Prerequisite: Completion of 8 credit points (including RPL) prior to starting the placement.*

*Corequisite: Nil*

*Incompatible with: MIS392*

*In-person attendance requirements: This unit is an experiential learning unit which will involve approximately 100 hours of team placement plus 20 hours for individual reflection and associated assessment tasks. This unit requires no formal class attendance though some programs may conduct a compulsory briefing/orientation session (4 hours).*

### Content

This unit aims to provide students with an opportunity, as part of their course, to take part in a team-based placement within, or for, an organisation as a means to develop and evaluate competency in teamwork tasks.

*Note: This unit requires students to complete an online application form and submit a current resume and signed course map. For more information and to complete the application process go to: WIL PROGRAMS. Students will be required to attend a compulsory briefing/orientation. Placements can be completed in Australia or overseas.*

*Please note: Self-sourced team internships are not available. Only Faculty-approved experiences will be eligible for this unit.*

### Assessment

Assessment – Learning Portfolio – 100%.

## MWL303 – Business Internship

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wayne Read*

*Trimester 2 Unit Chair: Wayne Read*

*Trimester 3 Unit Chair: Marion Steel*

*Prerequisite: Completion of 12 credit points (including RPL) prior to starting placement.*

*Corequisite: Nil*

*Incompatible with: MIS390, MMI301*

*In-person attendance requirements: This unit requires no formal attendance; however, it will involve a minimum of 100 hours supervised contact.*

### Content

This unit aims to provide students with an opportunity to undertake an internship, with an approved organisation, as a means to develop the student's knowledge, generic skills and graduate attributes that enhance future employment.

*Note: Deakin coordinates a range of experiences that can count for credit under this unit. Students can also source their own placements. More information can be found on Deakin's website.*

Students cannot enrol in the unit or commence a placement without written approval. Placements can be completed in Australia or overseas.

### Assessment

Assessment – Learning Portfolio – 100%.

## MWL311 – Industry Based Learning (3mth)

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Wayne Read*

*Trimester 2 Unit Chair: Wayne Read*

*Trimester 3 Unit Chair: Marion Steel*

*Prerequisite: Completion of 16 credit points (including RPL) prior to starting placement*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: This unit requires no formal attendance; however, it will involve a minimum of 3 months supervised contact.*

### Content

The unit aims to provide students with an opportunity, as part of their course, to take part in a three month paid full-time work placement within an organisation as a means to develop student's knowledge, generic skills and graduate attributes that enhance future employment.

*Note: This unit requires students to complete an online application form and submit a current resume and signed course map. More information can be found on Deakin's website.*

Placements can be completed in Australia or overseas. Students cannot enrol in the unit or commence a placement without written approval.

### Assessment

Assessment – Learning Portfolio – 100%.

## MWL312 – Industry Based Learning (6mth)

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 1 Unit Chair: Wayne Read*

*Trimester 2 Unit Chair: Wayne Read*

*Trimester 3 Unit Chair: Marion Steel*

*Prerequisite: Completion of 16 credit points (including RPL) prior to starting placement*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: This unit requires no formal attendance; however, it will involve a minimum of 6 months supervised contact.*

### Content

The unit aims to provide students with an opportunity as part of their course to take part in a six-month paid full-time work placement within an organisation as a means to develop student's knowledge, generic skills and graduate attributes that enhance future employment.

*Note: This unit requires students to complete an online application form and submit a current resume and signed course map. More information can be found on Deakin's website.*

Placements can be completed in Australia or overseas. Students cannot enrol in the unit or commence a placement without written approval.

### Assessment

Assessment – Learning Portfolio – 100%.

## MWL701 – Business Internship Experience

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sue Davey*

*Trimester 2 Unit Chair: Mokhtarul Wadud*

*Trimester 3 Unit Chair: Harsh Suri*

*Prerequisite: Completion of 6 post graduate units before commencing the placement*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: Students are required to attend on-campus from 9am-5pm one day per week, with some field work (off-campus) also required.*

### Content

This innovative program is a business internship simulation (not an external internship) developed by industry professionals and delivered entirely at the Burwood campus. It provides a simulated business experience working within a team on a real-life industry project, through to presentation of project outcomes to a management board.

You will work in a team to engage with a real company to develop a solution for a business problem they have identified within their business. You will receive academic supervision assisting you to successfully develop and present your project and/or proposal to the company.

*Note: For further information and how to apply: Business Internship Experience*

### Assessment

Assessment – Learning Portfolio – 100%.

## MWL702 – Business Practicum

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sue Davey*

*Trimester 2 Unit Chair: Mokhtarul Wadud*

*Trimester 3 Unit Chair: Harsh Suri*

*Prerequisite: Completion of 6 post graduate units before commencing the placement*

*Corequisite: Nil*

*Incompatible with: MPI700*

*In-person attendance requirements: This unit requires no formal class attendance; however it will involve a minimum of 100 hours supervised contact.*

### Content

This unit aims to provide students with an opportunity to undertake an internship, of graduate-level work, with an approved organisation, as a means to develop the student's knowledge, generic skills and graduate attributes that enhance future employment.

*Note: Deakin coordinates a range of experiences that can count for credit under this unit. Students can also source their own placements. More information can be found on Deakin's website.*

### Assessment

Assessment – Learning Portfolio – 100%.

## MWL703 – Team Internship

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mark Olynyk*

*Trimester 2 Unit Chair: Mokhtarul Wadud*

*Trimester 3 Unit Chair: Harsh Suri*

*Prerequisite: Completion of 6 post graduate units before commencing the placement*

*Corequisite: Nil*

*Incompatible with: Nil*

*In-person attendance requirements: This unit is an experiential learning unit which will involve approximately 100 hours of teamwork plus 20 hours for individual reflection and associated assessment tasks. This unit requires no formal class attendance though some programs may conduct a compulsory briefing/orientation session (4 hours).*

## Content

The unit aims to provide students with an opportunity to undertake a team-based placement within, or for, an organisation as a means to develop and evaluate competency in teamwork tasks as well as student's knowledge, generic skills and graduate attributes that enhance future employment.

*Note: This unit requires students to complete an online application form and submit a current resume and signed course map. For more information and to complete the application process go to: WIL PROGRAMS. Students will be required to attend a compulsory briefing/orientation. Placements can be completed in Australia or overseas.*

*Please note: Self-sourced team internships are not available. Only Faculty-approved experiences will be eligible for this unit.*

## Assessment

Assessment – Learning Portfolio – 100%.

# MWL704 – Work Based Learning

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sue Davey*

*Trimester 2 Unit Chair: Mokhtarul Wadud*

*Trimester 3 Unit Chair: Harsh Suri*

*Prerequisite: Completion of at least 4 postgraduate units. A student must also have been working with their current organisation for more than six months.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: This unit requires no formal class attendance; however it will involve a minimum fortnightly contact with teaching staff.*

*Scheduled learning activities – cloud (online): This unit requires no formal class attendance; however it will involve a minimum fortnightly contact with teaching staff.*

*In-person attendance requirements: This unit requires no formal class attendance; however it will involve a minimum fortnightly contact with teaching staff.*

## Content

This unit aims to provide students in regular employment with an opportunity to develop and demonstrate the application of knowledge acquired in their degree by undertaking a project located at their existing workplace.

*Note: For further information and how to apply: Work Based Learning*

## Assessment

Assessment – Learning Portfolio – 100%.

# SEB101 – Engineering Physics

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: John Long*

*Trimester 3 Unit Chair: Julius Orwa*

*Prerequisite: Middle-level VCE Mathematics*

*Corequisite: Nil*

*Incompatible with: SEP101*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour seminar per week, 5 x 3 hour practical per trimester. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester intensive week.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 2 hours of class per week (recordings provided), 1 x 1.5 hour online seminar per week and 1 x 9 hour practical per trimester, 8 hours of at home practicals per trimester. Students are required to attend and participate in project-based activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

## Content

The unit will commence with a calculus treatment of kinematics of motion in one, two and three dimensions, including parabolic motion. The application of Newton's laws to a wide variety of phenomena will be investigated and the concepts of work, energy and the conservation laws discussed. Rotational kinematics and dynamics will be introduced, including the concepts of moment of inertia, torque, moment of a force. Also introduced are electrical concepts of charge, field, and voltage. Other topics to be covered are vectors, statics, centre of mass and centroids.

## Assessment

- Examination 50%
- 5 x laboratory reports 30%
- 3 x online multiple choice quizzes (6%, 7%, 7%) 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the laboratory reports and a mark of at least 40% on the examination.

## Prescribed texts

Halliday et al, 2018, Fundamentals of Physics Extended + Wileyplus Registration, 11th Ed (or 10th Ed), John Wiley and Sons, New York, USA

# SEB121 – Engineering Practice

*Enrolment modes: Not available from 2017*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: Only available to students enrolled in Bachelor of Engineering and associated combined degrees.*

*Unit chair: Simon Cavenett*

*Prerequisite: Nil*

*Corequisite: SEE010*

*Incompatible with: MMM132*

## Content

This unit provides the central foundation to the methodology of professional engineering upon which students will build and expand upon as they progress through the engineering course program. In this unit we actively implement a general engineering design process (Whole System Design) that incorporates sustainability objectives and is compatible with most major disciplines of professional engineering. Along the way we will not only examine the engineering design process but also the related topics of the relationship between engineering and society; digital literacy and communication skills; professional ethics; and

sustainability (of the built and natural environments). After successful completion of this unit you should have a practical understanding, experience, and demonstrated competency in team-based problem solving and engineering design.

## Assessment

- Four assignments (2 x 10%, 2 x 20%) 60%
- Examination 40%

To be eligible to obtain a pass in this unit students must achieve a mark of at least 40% in the examination and a mark of at least 40% in the summative assignment 3 (design project video).

# SEB223 – The Professional Environment for Engineers and Scientists

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Simon Cavenett*

*Prerequisite: SEB121 or (MMM132 for Commerce/Engineering and combined courses students only)*

*Corequisite: Must be enrolled in S460.1, S461.1, S462.1, S463.1*

*Incompatible with: Nil*

## Content

The focus is on the significant human-related forces and factors typically present in an engineer's professional environment and typically requiring direct and effective leadership and management competencies to be possessed by the professional engineer. In this unit we further develop your knowledge and skills, systems theory and abilities to apply a systematic approach to the human-related demands of contemporary engineering practice specifically the management of organisations, the management of human resources, and the management of work health and safety.

## Assessment

- Business proposal (group) 20%
- Business pitch presentation (group) 10%
- Practical 10%
- Case study 20%
- Examination 40%

To be eligible to obtain a pass in this unit students must achieve a mark of at least 40% in the examination and achieve a mark of at least 40% for the practical.

## SEB324 – Project Management

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Simon Cavenett*

*Prerequisite: For single degree students: SEB223 and must have completed 15 credit points from S% coded units. For Engineering combined degree students: SEB223 and must have passed 8 credit points from S% coded units.*

*Corequisite: Only available to students enrolled in Bachelor of Engineering and associated combined degrees.*

*Incompatible with: SEB322*

### Content

The scope of this unit is engineering project management, i.e., knowledge skills and competencies relevant and commonly required to proficiently manage projects that typically involve or are encountered in professional engineering practice. Accordingly this unit relies extensively on two bodies of professional knowledge; the Project Management Body of Knowledge (PMBOK®) which is internationally accepted and widely used in the profession of engineering (and others) and the general professional engineering body of knowledge. The unit therefore concentrates on three main concepts: preparation and planning required for a project; the activities associated with managing the project including resource management and human management; and the evaluation of project status and completion.

There is a specific emphasis in this unit on developing knowledge, skills, and competencies required of a graduate (and professionally inexperienced) engineer as required by the profession in Australia and as typically expected by industry-based employers in Australia. Accordingly the unit not only covers the general theories and principals involved in engineering project management but also specific commonly used methods and tools used by professional engineers in engineering project management work such as Gantt Charts, Net Present Value (NPV) analysis of project options, and Microsoft® Project software.

### Assessment

- Project charter (group) 10%
- Project deliverable (group) 30%
- Project debrief report 10%
- Project methods 30%
- Project case study 20%

To be eligible to obtain a pass in this unit students must achieve a mark of at least 40% for the project deliverable (requires campus attendance and participation in group presentations of their project deliverable at the Geelong Waurin Ponds campus during the intensive week) and students must achieve a mark of at least 40% for the case study.

## SEB711 – Managing and Developing Innovation

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Moshe Goldberg*

*Trimester 3 Unit Chair: Moshe Goldberg*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week throughout the trimester.*

*Scheduled learning activities – cloud (online): Online and collaborative learning activities including 1 x 2 hour class per week (recordings provided) throughout the trimester.*

### Content

This unit covers fundamentals common and necessary to successful enterprise-based innovation development. We will learn the theories of creativity and idea generation, examine the role of technology in goal-setting and strategy development of an organisation, how to create innovative ideas for marketing new products and how to successfully manage enterprise based innovation. With a special focus on learning the tools for implementing your innovative ideas. We will also examine how innovation-seeking activities are typically funded and how the results of innovation development are measured in terms of enterprise valuation. We will also look at the way innovation development impact the business.

### Assessment

- Analytical report 25%
- Technical report 25%
- Oral presentation 25%
- Final report 25%

## SEB723 – Engineering Project Management

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Mayuri Wijayasundara*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week and 2 x 2 hour seminars per week throughout the trimester.*

### Content

The unit covers the general theories and principals involved in project management as well as specific commonly used methods and tools used by professional project managers such as Gantt Charts, Net Present Value (NPV) analysis of project options, and Microsoft® Project software. The unit also covers the ten knowledge areas of project management in Project Scope Management, Project Time Management, Project Cost Management, Project Quality Management, Project Human Resources Management, Project Communications Management, Project Stakeholder Management, Project Risk Management, Project Procurement Management, and Project Integration Management.

### Assessment

- Interim report 25%
- Oral presentation 25%
- Project management plan 50%

## SEB724 – Engineering Leadership

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Farid Christo*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week and 1 x 2 hour workshop per week throughout the trimester.*

### Content

The unit covers effective methodologies to devise real solutions for challenges faced by today's engineering managers and leaders. It also covers processes, operations and understanding company infrastructure and developing flexibility for change. The unit will involve engaging in a real engineering environment and acquiring the skills and knowledge for a successful technical leader.

### Assessment

- Interim report 25%
- Oral presentation (students work in teams) 25%
- Engineering project leadership plan 50%

## SEB725 – Engineering Entrepreneurship

*Enrolment modes:*

*Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Hamid Abdi*

*Trimester 3 Unit Chair: Hamid Abdi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 class per week and 1 x 2 hour workshop per week throughout the trimester.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 hour of class per week (recordings provided) and 1 x 2 hour online seminar per week.*

### Content

This unit of study aims to introduce graduate engineering students from all disciplines to the concepts and practices of entrepreneurial thinking and to learn about the new ventures in engineering industries as well as to examine the nature of entrepreneurial behaviour and its role in both small and large organisations. The unit will introduce concepts and practices of entrepreneurship and will offer the foundation by providing knowledge and skills relevant to the creation and leadership of entrepreneurial ventures. Engaging in this unit, students will learn various processes by which successful new ventures are created by developing their own enterprise proposal within small groups.

Student will be able gain knowledge on how to launch, lead and manage a viable business starting with concept validation to commercialisation and successful business formation, how to manage intellectual property and how to manage enterprise-based product and service development.

### Assessment

- Research paper 30%
- A report on managing intellectual property 30%
- Business plan presentation and report (group) 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 50% in the business plan presentation and report (group).

## SED102 – Engineering Graphics and CAD

*Enrolment modes: Not available from 2017*

*Credit point(s): 1*  
*previously coded as: SED101*  
*EFTSL value: 0.125*  
*Unit chair: Paul Collins*

*Prerequisite: Nil*  
*Corequisite: Nil*  
*Incompatible with: SRC221*

### Content

Topics in this unit include engineering design, digital information exchanging formats, introduction to rapid prototyping, sketching, planar projections and pictorial views, multi-view drawings, auxiliary and section views, Computer Aided Design (CAD) software packages, part and assembly modelling, generating engineering drawings and an introduction to Geometric Dimensioning and Tolerancing for technical drawings.

### Assessment

Four individual assignments (25% each) 100%.

## SED202 – Mechanical Design and CAM

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*  
*EFTSL value: 0.125*  
*Unit chair: Michael Pereira*

*Prerequisite: SED102*  
*Corequisite: SEE010 or SEJ010*  
*Incompatible with: SRC221*

### Content

The unit covers the following areas: seminar safety aspects, basic fitting and machining operations, CNC operations, introduction to metal and plastic fabrication; an overview of bearings and the selection and specification of rolling element bearings; cams and cam profile design; spur gear geometry; CAM packages; and Product Development. The student will understand the product development process and how concept development and rapid prototyping fit into this schedule. The student will demonstrate theory and practice of mechanical design on base mechanical components.

### Assessment

- Individual CAD assessment 20%
- Individual CAM assessment 15%
- Team Assembly and Operation assessment 20%
- Team Summary Report 25%
- Individual theory assignment (online quiz) 20%

## SED302 – Computer Aided Engineering

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*  
*EFTSL value: 0.125*  
*Unit chair: Mariana Paulino*

*Prerequisite: SED102 and SEM223*  
*Corequisite: Nil*  
*Incompatible with: Nil*

## Content

Topics to be addressed in this unit include the role of CAE in the product development (target setting, optimisation, performance analysis, manufacturing analysis); computer aided design (solid modelling, data management and transfer, CAD modelling for CAE); finite element analysis (basic principles and applications, building models, boundary conditions, solvers, interpreting results); multi-body dynamics; computational fluid dynamics.

## Assessment

- Assignment 1 (technical report) 25%
- Assignment 2 (technical report) 25%
- ePortfolio 10%
- CAE group design project (technical report 30%, oral presentation 10%) 40%

To be eligible to obtain a pass in this unit students must achieve a mark of at least 50% in both assignments.

You will put theory into practice through an intensive industry based project which all assessment will link. The ultimate goal of this class is to work as a team to develop a product for a client. This unit will follow the entire design and product development process, from concept generation, customer validation and development of prototypes for testing.

## Assessment

- Progressive product development report 70% (progressive submission 30%, final submission 40%)
- Team oral presentation 20%
- Team self and peer review 10%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a combined mark of at least 50% on the report submission.

## SED304 – Product Development

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SED402*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kaja Antleij*

*Prerequisite: One unit from SEJ101 or SED102 and completion of 14 credit points of 5% coded units*

*Corequisite: Nil*

*Incompatible with: SEM721*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 2 x 2 hour seminar (studio) per week. Students must attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online): Weekly team meetings for at least 1 hour per week, 1 x 1 hour class and 1 x 1 hour online seminar per week. Students are required to attend and participate in practical activities at the Geelong Waurn Ponds Campus on the scheduled day during the trimester intensive week.*

## Content

In this unit we shall explore Design Methodologies and Product Development; you will be exposed to several theories on design and product development, practices as well as hear from industry experts.

## SED402 – Advanced Design Methodologies

*Enrolment modes: Not available from 2017 (replaced by SED304)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Paul Collins*

*Prerequisite: SED302*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

The unit has three modules: Design for Assembly – introduces the concept of designing products for ease of manufacture and assembly. Design for Disassembly – discusses reusability and recyclability and encourages a cradle to grave mentality when assessing the financial and environmental impact of products and processes. Failure Modes and Effects Analysis – techniques are used extensively by designers and engineers in industry. The method and its underlying principles will be covered.

## Assessment

- Two assignments (group – 30%, individual 30%) 60%
- Project 40%

To be eligible to obtain a pass in this unit students must achieve a mark of at least 50% in the group assignment.

## SEE010 – Safety Induction Program

*Enrolment modes: Not available from 2017  
(replaced by SEJ010)*

*Credit point(s): 0  
EFTSL value: 0.000  
Unit chair: Matthew Joordens*

*Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil*

### Content

This zero credit point unit is a program of safety information for students involved in mechanical and electronics laboratory work. The program encompasses mechanical and electronic hazards, building evacuation procedures, laboratory accident management and first aid procedures and safety work procedures particular to laboratory and fieldwork.

### Assessment

Multiple choice test 100% (Minimum pass rate of 70%).

The unit then has a focus on circuit analysis using voltage dividers, KCL and KVL, voltage and current sources, Thevenin's theorem. Semiconductor devices are then introduced and the characteristics and application of diodes, rectifiers, bipolar-junction transistors and op-amps are considered.

### Assessment

- Examination 50%
- Practical reports 25%
- Online test and problem-solving assignment (12.5% each) 25%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 50% in the unit, at least 40% in the examination, and a minimum of 40% on the practical reports.

## SEE202 – Digital Electronics

*Enrolment modes: Not available from 2017  
(replaced by SEE216)*

*Credit point(s): 1  
Previously coded as: SEE302  
EFTSL value: 0.125  
Unit chair: Mehdi Seyedmahmoudian*

*Prerequisite: SEE103  
Corequisite: SEE010  
Incompatible with: Nil*

### Content

This unit introduces topics in the theory and applications of combinatorial and sequential logic circuits and systems. These will include standard SSI and MSI devices from flip-flops, counters and registers to memory devices. Electronic systems that can be built from these components such as state machines and arithmetic units will also be covered. The unit studies how all these digital devices can be described in a HDL so that digital circuits can be devised and simulated in the computer and then placed into a single, reprogrammable device.

### Assessment

- Assignment work 20%
- Practical reports 20%
- Examination 60%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 50% in the practical reports.

## SEE103 – Electrical Systems

*Enrolment modes: Not available from 2017*

*Credit point(s): 1  
Previously coded as: SEE200  
EFTSL value: 0.125  
Unit chair: Julius Orwa (Trimester 2), Matthew Joordens (Trimester 3)*

*Prerequisite: Nil  
Corequisite: SEE010  
Incompatible with: SEJ102 and SEJ103*

### Content

The unit introduces students to the fundamentals of electrical systems. The unit begins by introducing the concepts of electric charge, electric fields and electric potential. Capacitance, resistance, inductance and EMF are then covered. This is followed by a study of alternating current and resistor-capacitor, resistor-inductor, resistor-inductor-capacitor circuits.

## SEE205 – Analogue Electronics

*Enrolment modes: Not available from 2017  
(replaced by SEE216)*

*Credit point(s): 1*

*Previously coded as: SEE305*

*EFTSL value: 0.125*

*Unit chair: Hieu Trinh*

*Prerequisite: SEE103*

*Corequisite: SEE010*

*Incompatible with: Nil*

### Content

The unit will investigate the operation and applications of amplifiers and related devices. It will cover small-signal amplifiers based on bipolar-junction transistors and field-effect transistors. Then large-signal amplifiers, feedback, and frequency response of amplifiers will be studied. The unit will also discuss practical op amps and applications, comparators, timers, oscillators, thyristors, opto-electronic devices, filters, voltage regulators and power supplies.

### Assessment

- Examination 50%
- Laboratory exercises 20%
- Assignment work 30%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 50% on the laboratory exercises.

*Scheduled learning activities – cloud (online):  
Independent and collaborative learning activities including 2 x 1 hours of classes per week (recordings provided), 1 x 1 hour online seminar per week. Students are required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

### Content

The unit focuses on the concepts of measurement processes and instrumentation systems and considers the experimental errors in physical measurement methods. It provides a description of general measurement systems, characteristics of measuring instruments, classification of sensing devices, transducers and bridge circuits, measurement of key physical parameters of engineering significance such as temperature, pressure, flow, and strain, classification of measurement noises and noise reduction techniques, data analysis and supervisory control and data acquisition concepts. The requirements for design and interfacing of common measurement devices are examined in theory, and also in practice through laboratory sessions.

### Assessment

- Examination 50%
- Engineering problem solving task (2 x 10%) 20%
- Practical exercises 30%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 50% in the practical exercises.

## SEE206 – Measurement and Instrumentation

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Asma Aziz*

*Prerequisite: SEE103 or SEJ102*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 1 hour seminar per week, 4 x 3 hour practicals per trimester. Students are required to attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

## SEE207 – Power Engineering Design

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Apel Mahmud*

*Prerequisite: SEE103 and SIT194*

*Corequisite: Nil*

*Incompatible with: SEE210*

### Content

The areas covered in this unit will include: Basic concepts used in power system analysis, i.e. complex power, power factor, three-phase circuits, balanced three-phase power, per-unit system.

Transformer theories that include working principle of power transformer, equivalent circuit, performance, auto-transformers, three-phase transformer connections. Electrical generation, distribution and transmission system. Introduction to power electronics that includes power semiconductor diodes, rectifiers, power transistors, thyristor, switching of power electrical circuits, AC-DC, DC-AC, and DC-DC conversions. The students will also be involved in a project on power generation design.

## Assessment

- Engineering problem solving task 20%
- Laboratory report 20%
- Group project report 20%
- Final examination 40%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 50% in the laboratory report.

## SEE208 – Modern Power Generation Systems Design

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Shama Islam*

*Prerequisite: Must have completed 6 credit points of study*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

This unit introduces students to a range of modern power generation systems with the main focus on different types of renewable energy sources. Student will gain practical experience about the characteristics of various renewable energy systems. Student will also be able to design a modern power system by using various types of renewable energy sources covered in this unit.

## Assessment

- Individual problem solving tasks (2 x 10%) 20%
- Laboratory report (students work in groups) 30%
- Examination 50%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 50% in the laboratory report.

## SEE210 – Power Engineering Design

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Apel Mahmud*

*Prerequisite: SEB101 and SIT194 and one unit from SEJ102 or SEE103*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEE207*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 2 x 2 hour seminars per week, 1 x 2 hour studio per week and participate in project-based activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hours of class per week (recordings provided), 2 x 2 hour online seminars per week, 8 hours of self-directed online studios per trimester. Students must attend and participate in project-based activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

## Content

SEE210 is a project/design-based unit. Students have the opportunity to engage in a Power Engineering Design Project. Students will investigate from power sources, transformers, transmission and distribution through to the final consumer.

Students are required to work in a team of 3–5 students facilitated by an academic staff member. Students will be learning in teams and will be assessed both individually and as a team.

## Assessment

- Project design plan (group) 15%
- Design problem solving tasks (2 x 15% each) 30%
- Project validation presentation 30%
- Final report (group) 25%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a minimum of 50% in the project validation presentation assessment task.

## SEE213 – Distributed Generation System Design

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Sajeeb Saha*

*Prerequisite: SIT194 and one unit from SEJ102 or SEE103*

*Corequisite: STP010 and one of SEE010 or SEJ010*

*Incompatible with: SEE208*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 2 x 2 hour seminar per week, 1 x 2 hour studio per week. Students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hours of class per week (recordings provided), 2 x 1 hours of online seminars per week (recordings provided) and 2 x 1 hour blackboard sessions per week. Students are required to attend and participate in project oriented design-based learning activities at the Geelong Waurin Ponds Campus at scheduled sessions during the trimester intensive week.*

### Content

SEE213 is a project-oriented design-based learning (PODBL) unit. Students will be engaged with the design of a distributed generation system. During this design process, students will investigate different types of distributed energy sources such as wind, solar photovoltaic, etc. along with energy storage system and associated loads. Students are required to work and learn in a team environment. Students will be assessed via both individual and team tasks.

### Assessment

- Project design plan (group) 15%
- Design problem solving tasks (2 x 15% each) 30%
- Project validation 30%
- Final report (group) 25%

### Hurdle requirement

To be eligible for a pass in this unit, student must achieve a minimum of 50% on the project validation assessment task.

## SEE216 – Analogue and Digital Systems

*Enrolment modes:*

*Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Soheil Arastehfar*

*Trimester 3 Unit Chair: Ronny Kutadinata*

*Prerequisite: SEJ102 or SEE103*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEE202 or SEE205*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week, 4 x 3 hour practical per trimester. Students are required to attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 1 x 2 hours of class per week (recordings provided), 1 x 1 hour online seminar per week. Students are required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

### Content

This is a knowledge and skill-based unit focusing on analogue and digital systems. The unit is a core unit within the Bachelor of Mechatronics Engineering (Honours) (S463) and Bachelor of Electrical and Electronics Engineering (Honours) (S461) course. The first part of the unit covers the theory and applications of combinatorial and sequential logic circuits and systems. These will include standard SSI and MSI devices from flip-flops, counters and registers to memory devices. The second part of the unit covers the operation and applications of amplifiers and related devices. It will cover small-signal amplifiers based on bipolar-junction transistors. The unit will also discuss practical op amps and applications.

### Assessment

- Problem solving tasks 30%
- Laboratory report 20%
- Examination 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 50% on the laboratory reports.

## SEE307 – Systems and Signals

Enrolment modes: Trimester 1: Waurn Ponds (Geelong), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 1 Unit Chair: Suiyang Khoo

Prerequisite: SIT172 and one of SIT294 or SEP291

Corequisite: Nil

Incompatible with: Nil

Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 1 hour seminar per week.

Scheduled learning activities – cloud (online):  
Independent and collaborative learning activities including 2 x 1 hour of classes per week (recordings provided), 1 x 1 hour online project meeting per week.

### Content

The aim of this subject is to provide students with an introduction to electrical signals, systems and signal processing. Topics studied in this unit include: properties of continuous signals and systems, linear time invariant (LTI) systems and convolution, differential and state equations and frequency response of LTI systems, periodic signals and Fourier series, the Fourier transform and the Laplace transform, transfer functions, the design of analogue and digital filters and the use of MATLAB and its toolboxes in analysis and design of continuous systems.

### Assessment

- 2 x problem solving exercises (25% each) 50%
- Examination 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve an overall mark of at least 40% on the examination.

### Prescribed texts

Phillips et al, 2014, Signals, Systems and Transforms Global Edition, 5th Ed, Pearson Education, USA

## SEE308 – Electrical Machines and Drives

Enrolment modes: Trimester 2: Waurn Ponds (Geelong), Cloud (online)

Credit point(s): 1

EFTSL value: 0.125

Trimester 2 Unit Chair: Ameen Gargoom

Prerequisite: SEE207 or SEE210

Corequisite: Nil

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 1 hour seminar per week, 1 x 2 hours practical and project work per week. Students are required to attend and participate in project and laboratory-based activities for this unit at scheduled sessions on multiple days during the trimester.

Scheduled learning activities – cloud (online):  
Independent and collaborative learning activities including 1 x 1 hour class per week (recordings provided), 1 x 1 hour online seminar per week. Students are required to attend and participate in project and laboratory-based activities at the Geelong Waurn Ponds Campus on the scheduled day during the trimester intensive week.

### Content

This unit aims to provide students with principles of magnetic circuits, single phase and three phase transformers, real and reactive power, characteristics of electrical machines and drives (generator and motors) and power electronics fundamentals which are all used for many industrial applications such as utility power system, wind power generation, electric vehicle applications, power plants, and many industrial processes. This unit will also introduce variable speed motor drives and associated power electronic converters.

### Assessment

- Examination 50%
- Individual laboratory reports (5 x 5% each) (students work in teams) 25%
- Group project report 25%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the final examination and a mark of at least 50% in laboratory reports.

## SEE309 – Power Systems Protection and Relaying

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Mohammad Arif*

*Prerequisite: SEE208*

*Corequisite: Nil*

*Incompatible with: SEE333*

### Content

This unit covers the design and operation of electrical energy protection systems for the generation, transmission and distribution systems of electrical energy. It covers principles and types of protection systems; application of protection to generators, motors, transmission lines, transformers, busbars, and distribution; lightning impact on transmission and distribution networks; electrical studies for design of protection systems; and power system communications for protection application.

### Assessment

- Topic tests (1 x 10%, 1 x 20%) 30%
- Laboratory reports (5 x 6%) 30%
- Examination 40%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 40% in the laboratory report.

*Scheduled learning activities – cloud (online):*

*Independent and collaborative learning activities including 2 x 1 hours of class per week (recordings provided), 1 x 1 hour online seminar per week. Students may be required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

### Content

The unit provides an understanding in the basic principles of data communications and computer networking. The fundamental importance concerning the technology and architecture of this field, as well as the state-of-the-art technology, will be examined in-depth. The unit will address the TCP/IP network model with an emphasis on layers, computer communications architecture, data encoding, error detection and correction, medium access control, local and wide area networks, bridging and routing, congestion control, node-to-node communications and end-to-end protocols. Introduction to emerging high-speed technologies, such as ATM and TCP/IP suite of protocols that are used on the Internet will also be studied.

### Assessment

- Quizzes (2 x 10% each) 20%
- Laboratory report 20%
- Examination 60%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination.

### Prescribed texts

Stallings, 2013, Data and Computer Communications, 10th Ed, Pearson Education, Harlow, United Kingdom

## SEE312 – Data Communication

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Pubudu Pathirana*

*Prerequisite: SEE216 or SEE202*

*Corequisite: Nil*

*Incompatible with: SIT202*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 1 hour seminar per week, 3 x 1 hour practicals per trimester. Students may be required to attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

## SEE320 – Microcontroller System Design

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Benjamin Champion*

*Prerequisite: SEE215 or SER202*

*Corequisite: Nil*

*Incompatible with: SEE316 and SER300*

## Content

This unit introduces the student to the design of a micro controller based system, which will interface with external devices. Topics to be addressed include: specification, hardware and software design, interfacing via I/O to external devices, peripherals, project construction, testing and documentation. The choice of micro controllers is reviewed but the unit will be taught using the AVR ATmega2560 micro controller using the C programming language. Students may however use a micro controller and programming language of their own choice to complete the required tasks.

## Assessment

- Assignment 1 (progress written report) 20%
- Assignment 2 (project demonstration) 50%
- Assignment 3 (final written report) 30%

To be eligible to obtain a pass in this unit students must achieve at least 50% in the project demonstration and construction (this includes an oral component that must be passed).

## SEE321 – Electro-Mechanical Systems

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SEE322, SEM331, SEM432*

*EFTSL value: 0.125*

*Unit chair: Asma Aziz*

*Prerequisite: SEE103 or SEJ103 and one unit from SEP101 or SEB101*

*Corequisite: Nil*

*Incompatible with: SER301*

## Content

Topics to be addressed in this unit will include: circuit theory, operational amplifiers for analogue signal processing; programmable logic controllers (PLCs) and ladder logic; sensors-position, velocity, encoders, optical pneumatic and hydraulic systems, mechanical actuation; motors-DC, stepper, motor control and computer interface.

## Assessment

- Written assignment 15%
- Written report 10%
- Written assignment 15%
- Examination 60%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination.

## Prescribed texts

Bolton, 2015, Mechatronics, 6th Ed, Pearson Education, Harlow, United Kingdom

## SEE326 – Artificial Intelligence for Autonomous Systems

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Matthew Joordens*

*Prerequisite: SIT172*

*Corequisite: Nil*

*Incompatible with: SEE435*

*Scheduled learning activities – campus: 3 hours of class/seminar per week (weeks 1–5) and 1 x 3 hour practical per week (weeks 6–11).*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including pre-recorded videos and sample code.*

## Content

This unit introduces the fundamentals behind Artificial Intelligence (AI) and the different AI applications. It examines the various AI methods including: “A\*” and other path finding systems, reactive and dynamic, goal based, fuzzy logic, rule-base, probability, behaviour and finite state machine techniques. It then looks at the practical application of AI.

## Assessment

- Progress report 20%
- Project 50%
- Final report 30%

## SEE332 – Transmission and Distribution System Design

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Enamul Haque*

*Prerequisite: SEP291 and one unit from SEE210 or SEE207*

*Corequisite: Nil*

*Incompatible with: SEE405*

*Scheduled learning activities – campus: 2 x 2 hours seminars per week, 1 x 2 hour studio per week. Students are required to attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 1 x 2 hour online seminar per week, 8 hours of self-directed online studios per trimester. In addition, recorded materials will be made available throughout the trimester. Students are required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the particular scheduled days during the intensive Week.*

### Content

This is a project oriented designed based learning (PODBL) unit, which aims to provide students the opportunity to gain a solid understanding of the operating principles and design of power transmission and distribution systems. Students will engage in a Transmission and Distribution System Design Project. They will explore transmission and distribution line parameters, line modelling and performances, transmission line compensation techniques and HVDC system. Students will also develop skills in computer modelling and practical implementation of their design to analyse the system performances.

### Assessment

- Project plan and progress report (team) 15%
- Project validation demonstration 25%
- Problem solving skill and knowledge tests (2 x 15% each) 30%
- Team final report (75% group, 25% individual) 30%

### Hurdle requirement

To be eligible to pass this unit students must achieve a mark of at least 40% in the project validation task.

## SEE333 – Power System Protection Design and Safety

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Mohammad Taufiqul Arif*

*Prerequisite: SEE210 and SEP291*

*Corequisite: Nil*

*Incompatible with: SEE309*

*Scheduled learning activities – campus: 2 x 1 hour classes, 1 x 2 hour seminars, 1 x 3 hour studio per week. Students are required to attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes (pre-recorded) and 2 hour online seminar per week. Students are required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the particular scheduled days during the intensive week.*

### Content

This is a project oriented design based learning (PODBL) unit. Students are required to work and learn in a team and will be assessed both individually as well as a team.

Students have the opportunity to engage in a Power System Protection Design Project to ensure safety in a power network. Students will investigate faults in power system networks particularly in the areas of generation, transmission, transformers and loads. Students then explore various protection schemes for each network area to design a safe power network. The learning in this unit will require the prior knowledge gained from SEE210 (Power Engineering Design).

### Assessment

- Project plan (team) 10%
- Project design (team) 15%
- Project validation (team) 20%
- Problem solving and knowledge tests (2 x 15% each) 30%
- Final report (individual) 25%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of at least 40% in the combined problem solving and knowledge tests and 50% in practical project validation (team).

## SEE344 – Control Systems

*Enrolment modes:*

*Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Hieu Trinh*

*Trimester 3 Unit Chair: Asma Aziz*

*Prerequisite: SEP291 or SIT294*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hours of class per week (recordings provided), 1 x 1 hour online seminar per week.*

### Content

The theory and application of control engineering will be discussed. System Modelling: Linear, nonlinear, time invariant, regulator and servomechanisms. Modelling system dynamics by transfer functions, block diagrams, state models. System Response: Transient response of second order systems. Steady state response, steady state errors, frequency response. Stability: simple stability tests, Routh Hurwitz, root locus, Bode and Nyquist. Methods used for design and compensation of control systems such as PID, Ziegler-Nichols tuning rules, lead and lag compensator will be examined. MATLAB software package will be used for control system design and analysis.

### Assessment

- Assignment 1 (problem based assignment) 10%
- Assignment 2 (problem based assignment) 15%
- Assignment 3 (problem based assignment) 15%
- Examination 60%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination.

### Prescribed texts

R.C. Dorf and R.H. Bishop, 2010, Modern Control Systems, (12th edition), OR 2017, Modern Control Systems Global Edition (13th edition), McGraw Hill

## SEE405 – Smart Generation and Transmission

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Sajeeb Saha*

*Prerequisite: SEE207*

*Corequisite: Nil*

*Incompatible with: SEE332*

### Content

Unit SEE405 aims to provide adequate knowledge for understanding the operation principles and characteristics of different power generation technologies and power transmission systems. Students will also be introduced to HVDC (high voltage DC) transmission system and smart grid technologies.

### Assessment

- Final examination 50%
- Laboratory reports 25%
- Project report 25%

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the final examination and a mark of at least 40% in the laboratory reports.

## SEE406 – Power System Analysis

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ameen Gargoom*

*Prerequisite: One unit from SEE207, SEE210 or SEE332.*

*For students enrolled in S752: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 2 hours practical and project work per week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 1 x 1 hour class per week (recordings provided), Cloud (online) students can attend weekly blackboard sessions for tutorial and project work.*

## Content

This unit covers electrical power system modelling, symmetrical components, load flow analysis using various types of load flow methods, balanced and unbalanced fault calculations, power system stability and control.

## Assessment

- Assignment 1 (individual) – problem solving task 30%
- Assignment 2 (individual) – project report 30%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination.

## Prescribed texts

Glover and Overbye, 2016, Power System Analysis and Design, SI Edition (6th edition), Cengage Learning US

## SEE407 – SCADA and PLC

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shama Islam*

*Prerequisite: SEE344 and SEE312. For students enrolled in S752: Nil*

*Corequisite: Nil*

*Incompatible with: SEE412*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 6 x 3 hour laboratory activities and 6 x 1 hour seminars throughout the trimester. Students are required to attend and participate in laboratory activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 1 x 1 hour of class per week (recordings provided), 1 x 1 hour online seminar per week. The learning resources for the practicals will be available online via DeakinSync. Students are required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the particular scheduled day during the trimester intensive week.*

## Content

This unit provides a theoretical background of Supervisory Control and Data Acquisition (SCADA) and programmable logic controller (PLC). Students will

have the opportunity to use SCADA and PLC for the automation and control of industrial systems through practical experiences.

## Assessment

- Individual problem solving tasks (2 x 10% each) 20%
- Laboratory reports 30%
- Final examination 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of at least 50% in the laboratory reports and a mark of at least 50% in the examination.

## SEE409 – Energy Efficiency and Demand Management

*Enrolment modes: Not available from 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Shama Naz Islam (Trimester 1),*

*Apel Mahmud (Trimester 3)*

*Prerequisite: Must have passed 12 credit points of SE-coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

SEE409 provides students with the opportunities to design and build a sustainable energy system through energy efficiency and demand management activities. The activities related to energy efficiency and demand management will involve energy audit, energy conservation, building energy efficiency and load demand analysis. From these activities, students will be required to provide justified recommendations for the stakeholders. Students will engage with industry standard tools and reporting methods to communicate recommended improvements in terms of energy efficiency and demand management for residential, commercial and industrial applications.

## Assessment

- Problem solving tests (2 x 20% each) 40%
- Practical reports (5 x 6% each) 30%
- Project report 30%

To be eligible to obtain a pass in this unit students must achieve a mark of at least 50% in the practical reports and a mark of at least 50% in the project report.

## SEE410 – High Voltage Engineering

*Enrolment modes: Not available from 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Asma Aziz*

*Prerequisite: Two units from SEE332 and SEE333 OR two units from SEE207 and SEE309*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

This unit introduces concepts of high voltage phenomena in the context of design and testing of electrical power plant. It presents electrical insulation properties and characteristics, insulator selection, insulation co-ordination in electric energy networks, sources of overvoltage, lightning impact on transmission and distribution networks, surge propagation theory, circuit interruption theory and circuit breaker operation. It also offers asset management solutions for modern transmission and distribution electricity networks.

### Assessment

- Topic tests (3 x 10% each) 30%
- Laboratory reports 30%
- Examination 40%

To be eligible to obtain a pass in this unit students must achieve a mark of at least 50% in the laboratory report and a mark of at least 40% in the final examination.

## SEE412 – Industrial Data Communication

*Enrolment modes: Not available from 2018 (replaced by SEE407)*

*EFTSL value: 0.125*

*Unit chair: Shama Islam*

*Prerequisite: SEE312 or SIT202*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

This unit aims to provide students with adequate technical knowledge about industrial data communication and design technologies used for industrial networks, automotive industries and

smart grids. Different industrial data communication technologies such as industrial programmable device network, standard industrial protocols, fieldbus, profibus, communication security mechanisms and SCADA will be covered in this unit.

### Assessment

- Topic tests (2 x 10% each) 20%
- Project work (laboratory activity 10%, project design and report 20%) 30%
- Examination 50%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and 40% in the project work (including laboratory activities).

## SEE700 – Safety Induction Program

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Matthew Joordens*

*Trimester 2 Unit Chair: Matthew Joordens*

*Trimester 3 Unit Chair: Matthew Joordens*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): This unit is completely run in Cloud campus mode. There is no compulsory campus attendance requirement.*

### Content

This zero credit point unit is a program of safety information for postgraduate students involved in mechanical, electronics and electrical and renewable energy laboratory work. The program encompasses mechanical and electronic hazards, building evacuation procedures, laboratory accident management and first aid procedures and safety work procedures particular to laboratory and fieldwork.

### Assessment

Multiple choice test 100% (Minimum pass rate of 70%).

## SEE701 – Control Systems Engineering

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Assumed Knowledge: Knowledge of basic control principles*

*Trimester 1 Unit Chair: Hieu Trinh*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 1 hour seminar per week.*

### Content

This unit investigates, in-depth, the theory and design of linear finite-dimensional systems using state space description. The emphasis is on analysis and control of more complex systems, i.e. large and multivariate systems. The topics addressed in this unit are: state space representation of physical systems; controllability, observability and stability of systems; solutions of state equations and model decomposition; state feedback control and pole placement; state observers; reduced-order observers; linear functional observers and output feedback control. Applications of the above theory will be illustrated using problems from energy, robotics and aerospace and will use MATLAB software for control system design and analysis.

### Assessment

- Examination 60%
- Problem based assignment 20%
- Problem based assignment 20%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination.

## SEE705 – Energy Efficiency and Demand Management

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong)*

*Trimester 3: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shama Islam*

*Trimester 3 Unit Chair: Apel Mahmud*

*Prerequisite: For S460, S461, S462, S463, S465 students: completion of 22 credits points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour project work per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour class per week (recordings provided), 1 x 1 hour online seminar per week*

### Content

Unit SEE705 provides students with an overview of energy efficiency and demand side management systems and the strategies to develop sustainable energy systems. Students will be required to complete energy efficiency calculations, analyse data, and apply their understanding of demand management to make recommendations to stakeholders. Students will engage with industry standard tools and reporting methods to communicate recommended improvements in terms of energy efficiency and demand management for residential, commercial and industrial building applications.

### Assessment

- Topic tests (2 x 25%) 50%
- ePortfolio (includes project work) 50%

## SEE710 – Instrumentation and Process Control

*Enrolment modes:*

*Trimester 2: Waurn Ponds (Geelong)*

*Trimester 3: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Asma Aziz*

*Trimester 3 Unit Chair: Sui Yang Khoo*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class/seminars per week*

### Content

Topics covered will include sensors and transducers, their application to force, pressure, displacement, and temperature measurements. Process and instrumentation diagrams, process characteristics, examples of control loops, feedback and feed-forward control, dynamic behaviour of low-order, higher-order systems and time-delay systems, modelling of industrial processes including least square methods and Kalman filter for estimations, implementation of control algorithms, discrete time control, discrete finite-time control (dead-beat control), fundamental concept of robust control theory, and robust sliding mode control for high-order uncertain nonlinear industrial systems.

### Assessment

- Problem solving exercises (2 x 25% each) 50%
- Group research project 50%

## SEE711 – Sensor Networks

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Soheil Arastehfar*

*Prerequisite: For S463 students: SEE312 and completion of 22 credits points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 4 x 3 hour practicals per trimester.*

### Content

This unit explores the recent advances in the area of wireless networking for sensory devices. There have been developments in both sensing and wireless networking at a remarkable rate in the past few years. Modern day requirements have fuelled the amalgamation of these traditionally separate technologies and resulted widespread commercial and research interest in the subsequent, rapidly emerging area of wireless sensor networks. This unit will look at the underlying issues related to implementations in the combined area such as localization and network design. Commercially available systems will be introduced and the overall unit will be presented in a cohesive and application oriented manner.

### Assessment

- Laboratory report 20%
- Laboratory assessment (which includes an oral presentation) 20%
- Examination 60%

## SEE712 – Embedded Systems

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Abbas Kouzani*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Weeks 1–5: 2 x 2 hour class per week, 1 x 1 hour seminar per week. Weeks 6–11: 1 x 1 hour seminar per week, 1 x 2 hour practical per week.*

### Content

This unit introduces students to the principles and practices of embedded systems design and development using advanced programmable controller devices, peripherals and programming tools. Topics include embedded design approaches, programmable controller devices, design tools, programming language, system realisation, and test.

### Assessment

- Problem solving task 20%
- Project 50%
- Oral presentation 10%
- Report 20%

## SEE716 – Electrical Systems Protection

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mohammad Taufiqul Arif*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical activities per week. Students are required to attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

### Content

This unit covers the design and operation of electrical systems protection schemes for the generation, transmission and distribution systems of electrical energy. It covers advanced principles and types of protection systems, application of protection to generators, motors, transformers, and electrical system communications for protection application.

### Assessment

- Topic tests (3 x 10% each) 30%
- Laboratory reports (students will work in groups) (5 x 6% each) 30%
- Portfolio 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a minimum of 50% in the laboratory reports.

## SEE717 – Smart Grid Systems

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sajeeb Saha*

*Prerequisite: For S461 students: completion of 22 credits points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class and 1 x 2 hour seminar per week.*

### Content

This unit covers advanced methods for smart grid systems. It includes the generation of electrical energy from conventional sources, renewable resources, and looks at how these operate off-grid as well as on-grid.

### Assessment

- Topic tests (3 x 10% each) 30%
- Laboratory demonstrations (demonstration 10%, report 20%) 30%
- ePortfolio (group) 40%

## SEE718 – Renewable Energy Systems

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Enamul Haque*

*Prerequisite: For S461 students: completion of 22 credits points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hours Laboratory work or project work per week.*

### Content

The aim of this unit is to provide students with sufficient knowledge about renewable energy technologies such as wind, solar, hydro, tidal, geo-thermal and biomass. Wind and photovoltaic energy systems will be covered in detail. Students will be introduced with distributed generation, micro grid system and energy storage system. Power electronic converters and controllers for wind and photovoltaic power generation systems will be covered in this unit. Students will be able to practice their design skills in renewable energy systems thorough modelling and implementation.

### Assessment

- Topic tests (2 x 20% each) 40%
- 6 x laboratory reports (includes pre-laboratory quizzes) (6 x 5% each) 30%
- Project report 30%

## SEJ010 – Introduction to Safety and Project Oriented Learning

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Matthew Joordens*

*Trimester 2 Unit Chair: Matthew Joordens*

*Trimester 3 Unit Chair: Matthew Joordens*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in S460, S461, S462, S463 or S464, S465*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. 1 compulsory 50 minute online introduction to project oriented design based learning and safety conducted at the beginning of the trimester. No compulsory campus attendance requirement.*

### Content

This zero credit point unit will provide students entering into an undergraduate Engineering program with an introduction to the premise of the project oriented design based learning (PODBL) pedagogy and how it is incorporated within the undergraduate Engineering programs. It will introduce students to the 7 step design process. It will also give an introduction to information literacy as used in PODB.

This unit also includes safety information for students involved in mechanical and electronics laboratory work. The program encompasses mechanical and electronic hazards, building evacuation procedures, laboratory accident management and first aid procedures and safety work procedures particular to laboratory and fieldwork.

### Assessment

This unit is assessed on a pass/fail basis. Multiple-choice on-line test (50 minutes) 100% (minimum pass rate of 70%). Multiple attempts of the on-line assessment are permitted.

## SEJ101 – Design Fundamentals

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Paul Collins*

*Prerequisite: Nil*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEB121 and SED102*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week, 2 x 2 hour studio per week, 10 x 20 min case study videos to be viewed via online resources. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester relevant to your campus.*

*Scheduled learning activities – cloud (online):*

*Independent and collaborative learning activities including 1 x 1 hour class per week (recordings provided), 3 x 1.5 hour seminar sessions delivered via DeakinSync, recorded classes and case study videos. Students are required to attend and participate in project oriented design-based learning activities at the Geelong Waurin Ponds Campus at scheduled sessions during the trimester intensive week.*

### Content

SEJ101 focuses on the principles and practice of design. Design is an essential characteristic of professional practice and requires unique knowledge, skills and attitudes common to a number of disciplines. In this unit, students will explore the process of design ideation, definition, prototyping and testing by working on authentic real world problems. The unit will allow students the opportunity to examine humanitarian problems in disadvantaged communities. Learning and assessment activities in this unit will require students to use creative processes to conceive, test and reflect on ideas. Students will be encouraged to view design problem from holistic and atomistic perspectives, paying attention to detail, and showing empathy for biases, values and needs of clients and users. Students will investigate design thinking and strategies, and modelling techniques to generate, evaluate and specify products in order to develop solutions to identified problems.

## Assessment

- Humanitarian design project (group) 20%
- Oral presentation (individual) 10%
- Design portfolio (individual) 50%
- Case study report (individual) 20%

## Hurdle requirement

To be eligible for a pass in this unit, students must achieve a minimum of 50% on the portfolio and group report.

# SEJ102 – Electrical Systems Engineering Project

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurm Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Andrew Price*

*Prerequisite: Nil*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEE103 and SEM111*

*Scheduled learning activities – campus: Weeks 1 – 5: 2 x 2 hour class per week, 1 x 2 hour studio session per week, 1 x 1 hour seminar per week, and 2 hours of weekly digital laboratory experiences undertaken via Cloud Deakin with accompanying optional allocated laboratory time.*

*Weeks 6–11: 2 x 2 hour seminar per week, 1 x 2 hour studio session per week. Campus students are required to participate in project-based activities at the Geelong Waurm Ponds Campus during the trimester intensive week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including Classes, Seminars, and Studio sessions via DeakinSync. The optional allocated laboratory time accompanying the digital laboratory experiences is available throughout the trimester or the intensive week. Cloud students are required to participate in project-based activities at the Geelong Waurm Ponds Campus during the trimester intensive week.*

## Content

This is a project and design-based unit which introduces students to the fundamentals of electrical systems, covering three main topics; electricity basics including capacitance, resistance, inductance and EMF; electric circuits; and semi-conductor devices. The unit will also introduce students to elements of professional practice including OHS, professional ethics and sustainability in the context of engineering projects. Students will work in groups, using their knowledge gained through classes, studios and practical experiences, the concepts covered in the seminar sessions, as well as knowledge gained from self-directed learning to complete their design of an electrical systems project meeting specified requirements. Students will communicate the considerations taken in their design in a variety of forms including written assessments tasks and a group presentation.

## Assessment

- Online tests 20%
- Group design proposal 25%
- Group presentation 10%
- Individual portfolio 45%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must receive at least 40% in the group presentation, at least 50% in the individual portfolio and an overall mark of at least 50%.

## Prescribed texts

Floyd & Buchla, 2013, Electronics Fundamentals: Circuits Devices & Applications, 8PNIE, Pearson Education

# SEJ103 – Materials Engineering Project

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurm Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Estela Oliari Garcez*

*Prerequisite: VCE Mathematical Methods 3 and 4 or equivalent*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEE103 and SEM111*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week, 1 x 2 hour studio (structured) per week, 1 x 2 hour studio (facilitated/unstructured) per week. Campus students are required to attend and participate in project-based activities at the Geelong Waurin Ponds Campus during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 1 x 2 hour class per week (recordings provided), 1 x 2 hour studio per week (structured, information provided and online seminars provided), 1 x 2 hour practical (relevant recording will be provided in weeks 2, 3, 4 and 5), 1 x 2 hour online studio per week (unstructured, project oriented sessions will be held in week 2–7 and 9–10). Students are required to attend and participate in project-based activities at the Geelong Waurin Ponds Campus during the trimester intensive week.*

## Content

This unit introduces students to the main classes of materials that are typically used in structural applications. Initially, emphasis will be given on appropriate understanding of mechanical properties of various types of materials through combinations of theoretical, practical and case study analysis of engineering applications. Students will learn the significance of the basic mechanical properties that play key roles in engineering design. Students will also learn the basic principles for determining various types of stresses, and the relevant engineering design principles to tackle those stresses using an appropriate combination of material and geometric properties of a structural element. Students are expected to learn how basic engineering principles can be applied to achieve the best possible outcome from a material by combining an appropriate structural shape for a given set of stresses.

## Assessment

- Quiz 30% (during intensive week – students are required to achieve a mark of at least 80% in Part A)
- Problem task 20%
- Analysis task (group) 20%
- Design report and presentation 30%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 50% and a mark of at least 50% in the design report and presentation.

## Prescribed texts

# SEJ201 – Structural Design

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*Previously coded as: SEM201*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Mariana Paulino Santos*

*Prerequisite: Must have passed SIT199 and must have passed 1 unit in (SEP101 or SEB101) and must have passed 2 credit points in (SEJ103, SEE103, SEM111)*

*Corequisite: STP010*

*Incompatible with: SEM222, SEM223 and SEM201*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 2 hour seminar per week, 2 x 2 hours studio per week, 2 x 2 hour practicals per trimester. All students are required to attend and participate in project oriented design-based activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour class per week (recordings provided), 2 x 1 hour online seminar/studio per week, 2 x 2 hour practicals per trimester. Students are required to attend and participate in project oriented design-based activities at the Geelong Waurin Ponds Campus at scheduled sessions during the trimester intensive week.*

## Content

SEJ201 introduces and explores the fundamental concepts of mechanics of structures most relevant to Civil and Mechanical Engineering students. This unit builds on concepts introduced in Engineering Fundamentals and Materials in first year and prepares students to continue their studies into Advanced Stress and Structural Analysis. The unit will address concepts and skills in loading and force systems, section properties, shear force and bending moments, basic structural analysis and member selection with skills applied in a real world structural design project context.

## Assessment

- Quizzes/tests (individual), 20%
- Project design brief (group) 20%
- Response to constraint (individual) 20%
- Final project report (individual) 40%

## Hurdle requirement

To be eligible for a pass in this unit, students must achieve a minimum of 50% averaged over all quizzes and a minimum of 50% on the response to constraint and the final project report.

## Prescribed texts

Hibbeler, 2014, Statics & Mechanics of Materials: Si Edition, 4th edition, Pearson Education

## SEJ344 – Technology Project

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Paul Collins*

*Prerequisite: Must have completed 12 credit points of study in S% units*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

The unit consists of an individual project of suitable standard to enable students to develop skills in experimental research and/or the application of product, sports and medical engineering design principles.

### Assessment

- Project proposal (including planning and safety documentation) 20%
- Oral presentation 20%
- Final year project 60%

To be eligible to obtain a pass in this unit students must achieve a minimum of 50% in the final year project report.

## SEJ440 – Engineering Project

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Norton*

*Trimester 2 Unit Chair: Paul Collins*

*Trimester 3 Unit Chair: Tim Hilditch*

*Prerequisite: One of SEJ343, SEB322 or SEB324 plus the completion of 19 credit points of S% coded units.*

*Corequisite: Must be enrolled in S460, S461, S462, S463*  
*Incompatible with: SEJ443 and SEJ441*

*Scheduled learning activities – campus: Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Other learning experiences are via CloudDeakin. Students will attend the oral presentation for this unit on a single scheduled day during the trimester intensive week.*

*Scheduled learning activities – cloud (online): Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Other learning experiences are via CloudDeakin. Students will attend the oral presentation for this unit on a single scheduled day during the trimester intensive week.*

### Content

In this unit students will develop a detailed proposal for an engineering research project. The unit uses the concept of research methodologies as a vehicle for student self-directed learning and prepares them for tackling an extended engineering project from conception through to realisation. Students will work with an academic supervisor to formulate a proposal that clearly defines the objectives, scope and justification for the project and incorporates consideration of any key stakeholder requirements, as well as safety, risk and ethical factors. The proposal will allow students an opportunity to obtain advanced theoretical and technical knowledge in their project area during the development of the methodology that will be used to conduct the project in the subsequent unit (SEJ442 or SEJ446).

*Note: Enrolment into this unit is subject to Unit Chair approval.*

### Assessment

- Initial proposal 20%
- Final project proposal 60%
- Oral presentation 20%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of at least 50% in the final project proposal report and a mark of at least 50% in the presentation.

## SEJ441 – Engineering Project A

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Waurin Ponds (Geelong), Cloud (online)\**

*Credit point(s): 2*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Norton*

*Trimester 2 Unit Chair: Paul Collins*

*Trimester 3 Unit Chair: Tim Hilditch*

*Prerequisite: Completion of both third year two-credit point PODBL units within S460, S461, S462, S463, S465 or SEB324 plus the completion of 19 credit points of 5% coded units.*

*Corequisite: Must be enrolled in S460, S461, S462, S463, S465*

*Incompatible with: SEJ443 and SEJ440*

*Scheduled learning activities – campus: Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Other learning experiences are via CloudDeakin. Students will attend the oral presentation for this unit on a single scheduled day during the trimester intensive week.*

*Scheduled learning activities – cloud (online): Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Other learning experiences are via CloudDeakin. Students will attend the oral presentation for this unit on a single scheduled day during the trimester intensive week.*

### Content

In this unit, students will develop a detailed proposal and undertake preliminary or proof-of concept tasks for an engineering research project. The unit uses the concept of research methodologies as a vehicle for student self-directed learning and prepares them for tackling an extended engineering project from conception through to realisation. Students will work with an academic supervisor to formulate a proposal that clearly defines the scope, objectives, justification and methodology for the project and incorporates consideration of any key stakeholder requirements, as well as safety, risk and ethical factors. The proposal will allow students an opportunity to obtain advanced theoretical and technical knowledge in their project area during the development of the methodology. Students will also design and conduct initial project work to demonstrate that the methodology or initial concepts are viable and that project objectives can be met. The project proposal and preliminary project work undertaken in this unit will be continued and completed in SEJ446.

*Note: \* Enrolment in trimester 3 is subject to Unit Chair approval.*

### Assessment

- Initial proposal 20%
- Final project proposal and progress report 60%
- Presentation 20%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of at least 50% in the final project proposal and progress report.

## SEJ442 – Engineering Project 2

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Paul Collins*

*Cohort rule: Available to students enrolled in D373*

*Bachelor of Engineering/Bachelor of Commerce only.*

*Prerequisite: SEJ441*

*Corequisite: Nil*

*Incompatible with: SEJ443*

*Scheduled learning activities – campus: Students are required to attend a two-week residential.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. Students are required to attend a two-week residential.*

### Content

This unit consists of the final part of an individual project of suitable standard and length to enable students to develop skills in experimental research and/or the application and synthesis of engineering design principles to a project schedule.

### Assessment

- Project management 20%
- Final project report – thesis 50%
- Project exhibition 30%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of at least 50% in each of the three unit learning outcomes (ULOs).

## SEJ446 – Engineering Project B

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Waurin Ponds (Geelong), Cloud (online)\**

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Michael Norton*

*Trimester 2 Unit Chair: Paul Collins*

*Trimester 3 Unit Chair: Tim Hilditch*

*Prerequisite: SEJ441 or SEJ440*

*Corequisite: Must be enrolled in S460, S461, S462, S463, S465*

*Incompatible with: SEJ442*

*Scheduled learning activities – campus: Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Attendance to complete project work will be dependent on the nature of the project. Students will attend the project exhibition for this unit on a single scheduled day at the end of trimester.*

*Scheduled learning activities – cloud (online): Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Attendance to complete project work will be dependent on the nature of the project. Students will attend the project exhibition for this unit on a single scheduled day at the end of trimester.*

### Content

This unit is a capstone project for students immediately prior to them leaving for their chosen career. Students will undertake project work proposed in SEJ440 or SEJ441, and then critically analyse and evaluate the results prior to communicating the project outcomes. It encompasses a number of technical engineering skills and an understanding of professional context in their discipline gained during the degree, and thus is a reflection of what they can anticipate when entering employment as a graduate engineer. Projects will have a research element to them in the justification of the approach and critical evaluation of results, although some may not necessarily be research-based, but rather industry specific. The learning style is predominantly student-led with direction from a supervisor through face-to-face or on-line meetings.

*Note: \* Enrolment in trimester 3 is subject to Unit Chair approval.*

### Assessment

- Project completion and management 30%
- Project exhibition 30%
- Final project thesis 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must demonstrate a satisfactory performance (a mark of at least 50%) in each of the four unit learning outcomes (ULOs).

## SEJ451 – Materials Performance and Durability

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SEM329, SEM401*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mike Tan*

*Prerequisite: One unit from SEM216, SEM212, SEV300, SEE332 or SER300*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week. Students may be required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the particular scheduled day during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 1 x 2 hour class per week (recordings provided), 1 x 1 hour online seminar per week. Students may be required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the particular scheduled day during the trimester intensive week.*

### Content

Building on fundamental knowledge acquired during previous years in various engineering fields including mechanical, civil, electrical and mechatronics, students will learn and apply materials performance and durability knowledge to solve real-life industry issues on the reliability, durability, sustainability and maintenance of engineering materials and infrastructure. Project-oriented learning methods will be used in the teaching and learning of the unit.

## Assessment

- Three assessments (consisting of a quiz and a written report on a selected engineering issue 20% each) 60%
- Group design project 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve an overall mark of at least 50% in the group design project.

# SEL703 – Internship – Engineering

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong)*

*Trimester 2: Waurin Ponds (Geelong)*

*Trimester 3: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bidur Kafle*

*Trimester 2 Unit Chair: Bidur Kafle*

*Trimester 3 Unit Chair: Bidur Kafle*

*Prerequisite: Student must have passed SEB711, SEB725, SET721 and SEN700. A WAM of 70 is also required to apply.*

*Corequisite: STP710 and must be enrolled in S751*

*Master of Engineering (Professional)*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Placement: Students will be required to complete a minimum of 120 hours (maximum 160 hours) within a relevant, course-related organisation.*

## Content

This unit enables students to complete a placement of 120–160 hours (typically as a 4–6 week unpaid placement or as a 12 week unpaid placement) in an Engineering-related position. Students will be required to undertake advanced level course-relevant work so as to gain experience as a specialised Engineer and to apply discipline-specific expert level professional skills and knowledge. In order to enrol in this unit, student needs to go through the selection process which involve high academic records and a face-to-face interview.

*Note: Delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

## Assessment

Each student will be assigned an academic supervisor and an industry supervisor during the placement period, both of whom will contribute to the learning and assessment of the unit. Continuous performance management and the submission of an Internship/ Placement portfolio at the conclusion of the placement form the key elements of the assessment for the unit. The portfolio comprises: professional communication documents (10%), problem-solving and discipline specific evidence of placement goals and outcomes (25%), reflections (45%), and a mid and end-of-placement assessment by the industry supervisor (10% each) (20%).

# SEM111 – Engineering Materials 1

*Enrolment modes: Not available from 2017*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Junior Nomani*

*Prerequisite: VCE Mathematical Methods 3 and 4 or equivalent*

*Corequisite: SEE010*

*Incompatible with: SEI102 and SEI103*

## Content

This unit covers the main classes of materials, their basic structure and the way in which the structure determines their mechanical and functional properties. Case-studies will be used to highlight the basis for selecting a material and how the structure can be manipulated to improve performance in specific applications. The unit will also introduce students to research processes through independent learning activities associated with engineering materials.

## Assessment

- Design-based assignment 25%
- Literature research assignment 25%
- Examination 50%

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the examination and a mark of at least 40% in the literature research assignment.

## SEM200 – Machine Design

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Michael Pereira*

*Prerequisite: SIT172 plus one unit from SEB101 or SEP101; 2 credit points from SEB121, SED102, SEJ101 and 2 credit points from SEE103, SEJ103, SEM111 OR 2 credit points from SEE103, SEJ102, SEM111*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: For S463 Incompatible with SEB223 and SEM223. For S462 Incompatible with SEB223 and SED202*

*Scheduled learning activities – campus: 3 x 1 hour classes per week (weeks 1–6), 1 x 1 hour class (weeks 8–11), 1 x 2 hour seminar per week, 2 x 2 hour studio per week. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 3 x 1 hour classes per week (weeks 1–6, recordings provided), 1 x 1 hour class (weeks 8–11, recordings provided), 1 x 2 hour seminar per week (recordings provided), 1 x 2 hour online studio per week. Students are required to attend and participate in project oriented design-based learning activities at the Geelong Waurin Ponds Campus at scheduled sessions during the trimester intensive week.*

### Content

SEM200 is a project and design based unit that will allow students to continue to develop technical and professional practice skills relevant to machine design. Students will build on fundamental knowledge previously acquired in engineering design, engineering fundamentals, project management and professional communication. The main project for this unit will be centred on the design of a mechanical-based machine that must perform a defined set of tasks with a defined set of criteria/rules. Students will be required to develop and apply knowledge in the following five main technical areas: product development and machine design; machine elements; electronic control and programming basics; engineering drawings and tolerancing; and prototyping and rapid manufacturing.

The project will aim to reflect a real-world engineering project environment, and therefore students will also be required to demonstrate and develop skills relating to professional communication, teamwork, ethics, standards, OHS and management. Students will communicate their design process, considerations and trade-offs and outcomes in a variety of forms, including written assessments tasks, group presentations and physical and virtual prototypes.

### Assessment

- Team project plan 10%
- Individual online tests (2 x 5% each) 10%
- Team project gateway presentation 10%
- Individual project gateway report 15%
- Team product demonstration/showcase 20%
- Individual final project portfolio 35%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a minimum of 50% in each of the team project gateway presentation and individual project gateway report assessment tasks.

## SEM202 – Thermodynamics

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SEM314*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Subrat Das*

*Prerequisite: SIT199 and SIT194; and one unit from SEB101 or SEP101*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour classes per week, 1 x 1 hour class per week, 1 x 1 hour seminar per week, 1 x 5 hour practical class per trimester. All students are required to attend and participate in practical activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 3 hours of classes per week (recordings provided), 1 x 1 hour online seminar per week and 1 x 5 hour practical sessions per trimester. Students must attend and participate in practical activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

## Content

This unit introduces fundamental concepts, laws and definitions relevant to thermodynamics. Case studies will be used to demonstrate how to apply equations and tools commonly used in this field to practical problems, such as engines and steam power plants. Students will learn experimental techniques to determine important thermodynamic measurements and reinforce fundamental concepts.

## Assessment

- Examination 60%
- Two problem-based assignment (10% each) 20%
- Practical work and report 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 40% in the practical work and report.

## Prescribed texts

Cengel & Boles, 2010, Thermodynamics: An Engineering Approach (Si Units), 7th edition, McGraw Hill

# SEM212 – Materials 2

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Junior Nomani*

*Prerequisite: SEM111 and SIT194*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: Nil*

## Content

This unit will cover how materials fail and how we can select materials to avoid failure through an understanding of component geometry, loading conditions and the material properties. The unit will address important mechanical failure types including yielding, creep, wear, corrosion, fatigue and fracture, as well as the important equations that describe their behaviour and the way micro-structures can be manipulated to improve performance in these instances.

## Assessment

- Examination 50%
- Assignment 1 (Portfolio) 30%
- Assignment 2 (literature research) 20%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination.

# SEM216 – Stress and Failure Analysis

*Enrolment modes: Trimester 2: Waurm Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Akif Kaynak*

*Prerequisite: One unit from SEM111 or SEJ103; plus one unit from SEB101 or SEP101*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEM222*

*Scheduled learning activities – campus: 3 x 1 hour classes per week, 1 x 1 hour seminar per week, 2 x 3 hour practicals per trimester. All students are required to attend and participate in practical activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 3 x 1 hours of class per week (recordings provided), 1 x 1 hour online seminar per week and 2 x 3 hour practical sessions per trimester. Students are required to attend and participate in project-based activities at the Geelong Waurm Ponds Campus on the scheduled day during the trimester intensive week*

## Content

This unit will include detailed analysis of various loading conditions in members including axial, multi-axial, pure bending, bending of composite beams, elasto-plastic bending, elastic and elastoplastic torsion, stress concentrations, transverse shear stresses in beams, shear flow and combined loadings and appropriate selection of materials to avoid failure through understanding of loading conditions and material properties. The unit will also address failure types including yielding, creep, fatigue, corrosion and structure-property relationships.

## Assessment

- Online quizzes (2 x 10% each) 20%
- Practical report (2 x 10% each) 20%
- Examination 60%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 50% in the practical report.

## Prescribed texts

Hibbeler, 2017, *Mechanics of Materials in SI Units*, 10th edition (or 8th edn or higher), Pearson Education

# SEM218 – Fluid Mechanics

*Enrolment modes:*

*Trimester 1: Waurrn Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Subrat Das*

*Trimester 3 Unit Chair: Sara Vahaji*

*Prerequisite: SIT194 and one unit from SEP101 or SEB101*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour classes per week, 1 x 1 hour seminar per week, 1 x 5 hour practical class per trimester. All students are required to attend and participate in practical activities for this unit at scheduled sessions during the trimester intensive week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 3 x 1 hours of class per week (recordings provided), 1 x 1 hour online seminar per week and 1 x 5 hour practical class per trimester. Students are required to attend and participate in practical activities at the Geelong Waurrn Ponds Campus on the scheduled day during the trimester intensive week.*

## Content

This unit provides an introduction to fluid mechanics, the study of the behaviour and motion of fluids, both liquid and gases. It covers concept of ideal and real fluids, basic equations of fluid statics, hydrostatic forces, buoyancy and surface tension and relative equilibrium. Application of fluid mechanics range from studying laminar and turbulent flows, drag and lift, pressure losses in various fluid handling systems. The unit deals with the physics of fluid flow (the underlying principles and theory) as well as the engineering aspects (application to everyday problems).

## Assessment

- Examination 60%
- Two problem solving tasks (10% each) 20%
- Laboratory work 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 40% in the laboratory work.

## Prescribed texts

*Credit point(s): 1*

*Previously coded as: SEM224*

*EFTSL value: 0.125*

*Unit chair: Akif Kaynak*

*Prerequisite: One of SIT199, SIT194 or SIT190 and one unit from SEP101 or SEB101*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEM201, SEJ201*

## Content

This unit includes: Statics – Introductory concepts, forces and force vectors, force system resultants, equilibrium, structural analysis, geometric properties and distributed loads; Dynamics – kinematics of a particle, kinetics of a particle – force and acceleration, kinetics of a particle – work and energy, kinetics of a particle – impulse and momentum.

## Assessment

- Examination 60%
- 2 x online quizzes 20%
- Two laboratory reports (10% each) 20%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 40% in the two laboratory reports.

## SEM300 – Thermo-Fluid System Design

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*Previously coded as: SEM405*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Jorg Schluter*

*Prerequisite: Five units from SEM200, SEJ201, SEM201, SEM218, SEP291, SEM202 or Four units from SEM218, SEB223, SEM202, SEP291*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Weeks 1–5: 3 hours of classes per week (2 hours online, 1 hour face-to-face), 1 x 2 hour seminar per week (1 hour seminar, 1 hour online seminar), 1 x 1 hour studio per week.*

*Weeks 7–11: 2 x 1 hour structured studios and 4 hours of unstructured studios per week. All students are required to attend and participate in project based activities for this unit at scheduled sessions during the trimester including intensive week.*

*Scheduled learning activities – cloud (online): Weeks 1–5: 3 hours of classes per week (2 hours online, 1 hour online consultation), 1 x 2 hour seminar per week (1 hour online seminar, 1 hour online consultation), 1 x 1 hour online studio per week.*

*Weeks 7–11: 1 x 1 hour online structured studio and 4 hours of unstructured project work per week. Students are required to attend and participate in project based activities at the Geelong Waurin Ponds Campus on the particular scheduled days during the intensive week.*

### Content

In this unit students will be introduced to heat transfer principles such as conduction, convection and radiation. Understanding of these principles will be utilised in conjunction with previously acquired fundamental knowledge of thermodynamics and fluid mechanics in undertaking a thermo-fluid system design project. The unit revolves around a group-based project to determine the appropriate approach to design problem, the type of solution (analytical, numerical), selection of material, sizing of thermal system and optimisation of heat transfer rates.

### Assessment

- Project 1 (team) 20%
- Project 2 (30% group component, 30% individual component) 60%
- Quizzes (2 x 10% each) 20%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of at least 50% overall and a mark of at least 50% for the total of the individual components of this unit.

### Prescribed texts

Cengel, 2014, Heat & Mass Transfer (Si Units), 5th Ed, McGraw Hill, Singapore

## SEM301 – Industrial Control

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Michael Norton*

*Prerequisite: SEM200, SEJ201, SEP291 or SEP291, SEB223, SIT172*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Weeks 1–6: 3 x 1 hour classes per week, 3 x 1 hour seminars per week. Weeks 7–11: 6 hour studio per week. Students are required to attend and participate in project oriented activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 3 x 1 hours of class per week (weeks 1–6 recordings provided), 1 x 1 hour online seminar per week. Students are required to attend and participate in project oriented activities at the Geelong Waurin Ponds Campus on the particular scheduled day during the trimester intensive week.*

### Content

This is a project/design based unit which aims to integrate the knowledge gained in mechanical systems control within the Bachelor of Engineering (Mechanical) course. The unit will also expose students to control concepts and technologies used in industry, including Programmable Logic Controllers, sensor/actuator systems, process (continuous) and sequential (discrete) control.

The unit revolves around a group-based project where students will be given a problem that has a specific industrial control context. Each problem will have unique components that will ensure each group provides a specific solution. They must identify a controllable medium, understand the sensor

requirements and constraints in relation to the actuator system, propose a suitable control model, simulate and demonstrate the solution(s). The aim will be to develop an automated solution that will require a complex (multi) sensor/actuator approach with high-level control model support, backed up by an industrial PLC system. Emphasis will be on developing an approach from the problem definition phase all the way through to a demonstrated solution.

### Assessment

- Design brief and project review (team) 10%
- Online tests (individual) 20%
- Project portfolio (team) 20%
- Project demonstration/showcase (team) 10%
- Final report (individual) 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of at least 40% in project portfolio (team) and a mark of at least 50% in the final report (individual).

## SEM302 – Advanced Stress Analysis

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SEM422*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mathew Joosten*

*Prerequisite: SEJ201, SEM216, SEP291 or one unit from SEM222, SEM322*

*Corequisite: Nil*

*Incompatible with: SEM318*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hours of class per week (recordings provided), 1 x 1 hour online seminar per week*

### Content

In this unit students will extend their knowledge of basic stress analysis concepts introduced in second year units to more complex situations. Several new concepts/approaches will be introduced including energy methods, stress transformation and failure analysis. Students will learn how to apply these analytical approaches to real-life/industry-based problems,

including examples where they are required to apply engineering judgement to simplify the analysis and understand the limitations of the analytical tools. By the end of this unit students will be able to confidently design engineering structures using classical analytical techniques.

### Assessment

- Problem solving tasks (3 x 15% each) 45%
- Examination 55%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of at least 40% in the examination.

### Prescribed texts

Hibbeler, 2017, Mechanics of Materials in SI Units, 10th edition (or 9th edn), Pearson Education

## SEM313 – Manufacturing

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nolene Byrne*

*Prerequisite: SEM216 or SEM212*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour studio per week. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester intensive week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hours of class per week (recordings provided), 1 x 2 hour online seminar per week. Students are required to attend and participate in project-based activities at the Waurn Ponds (Geelong) campus on the scheduled day during the trimester intensive week.*

### Content

This unit will take a practical approach to understanding the role of the manufacturing process in controlling the quality and cost of a component. The impact of processing variables such as pressure, time and temperature in attaining specified property and quality requirements during the manufacture of commonly used materials will be examined.

## Assessment

- Studios 40%
- Case study 20%
- Project report 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit, all students must achieve a minimum of 50% on the combined case study and project report mark.

# SEM327 – Dynamics of Machines

*Enrolment modes:*

*Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SEM318*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ali Zolfagharian*

*Trimester 3 Unit Chair: Ali Zare*

*Prerequisite: SEM200 or SEM223*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 1 hour seminar per week, 2 x 3 hour practicals per trimester (CAD lab). Students are required to attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hours of class per week (recordings provided), 1 x 1 hour online seminar per week and 2 x 3 hour practicals per trimester. Students are required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the particular scheduled day during the trimester intensive week.*

## Content

This unit addresses the following topics: dynamics of machines – kinematics analysis of planar mechanisms, dynamics analysis of planar mechanisms, balancing of rotating machinery; mechanical power transmission systems – gear trains, friction clutches and belt drives; vibrations – lumped parameter models and equivalent systems, free vibration spring-mass model, damped vibration, forced vibration, vibration of multi-degree-of-freedom systems.

## Assessment

- Calculation based assessment (2 x 30%) 60%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of at least 40% in the examination.

## Prescribed texts

Norton, 2011, Design of Machinery with Student Resource DVD, 5th edition, McGraw Hill.

# SEM329 – Materials Selection and Performance

*Enrolment modes: Not available from 2017 (replaced by SEJ451)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Mike Yongjun Tan*

*Prerequisite: SEM212 and SEM223*

*Corequisite: Nil*

*Incompatible with: SEM413*

## Content

Topics to be addressed in this unit include:

- Materials selection and its impacts on the environment: Material related eco-issues, materials embodied energy and carbon footprint, life-cycle assessment and the environment and eco-informed material choice.
- Environmental effects on materials performance and selection: Corrosion and materials degradation, stress corrosion cracking, corrosion fatigue and corrosive wear, corrosion control techniques, failure analysis, prevention and control.
- Case studies and projects using materials performance index and materials selection tools.

## Assessment

Three assessments (consisting of written reports and quizzes) 60% (20% each), group design project (consisting of literature study, engineering design, and other required project work components) 40%.

To be eligible to obtain a pass in this unit students must achieve an overall mark of at least 50% in the design project (consisting of literature study, engineering design, and other required project work components).

## SEM400 – Computational Fluid Dynamics

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jorg Schluter*

*Prerequisite: SEM218, SEP291 and one unit from SEM202, SEM314. For students enrolled in S752: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Week 1–7: 2 x 1 hour class per week (face-to-face/online), 1 x 2 hour seminar per week, Week 8–11: 2 x 2 hour seminar per week (CAD lab)*

*Scheduled learning activities – cloud (online): Week 1–7: 2 x 1 hour class per week (online), 1 x 1 hour seminar per week (online), Week 8–11: 1 x 1 hour seminar per week (online).*

### Content

There has been considerable growth in the development and application of computational fluid dynamics (CFD) and has become a standard tool in many process industries. This course aims to introduce the basics of computational fluid dynamics (CFD), the importance of flow phenomena and various numerical tools and how CFD can be applied for solving multi-physics problems. It covers a broad range of field from aerodynamics, magnetohydrodynamics, multiphase flows and haemodynamics and fluid-structure interaction. This unit will cover several topics of numerical modelling as applied to CFD simulations, particularly in cross-disciplinary environment. The unit will utilise and build upon the knowledge you have gained in your previous studies on fluid mechanics, heat-transfer, material behaviour, and solid modelling (CAD). The topic will cover different partial differential equations (NS equations), wall effects, modelling of two phase flow (simple cases), interface tracking methods and fluid-structure interaction. The main objective is to develop a skill how to combine different physics in their modelling approach.

### Assessment

- Project 1 20%
- Project 2 60%
- Quiz (2 x 10% each) 20%

## SEM401 – Materials Performance and Durability

*Enrolment modes: Not available from 2018 (replaced by SEJ451)*

*Credit point(s): 1*

*Previously coded as: SEM329*

*EFTSL value: 0.125*

*Unit chair: Mike Tan*

*Prerequisite: SEM216 or SEM212*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

Building on fundamental knowledge acquired during previous years, such as engineering materials, stress and materials, structure design and manufacturing, students will learn and apply materials performance and durability knowledge to solve real-life industry issues on the reliability, durability, sustainability and maintenance of engineering materials and infrastructure. Project-oriented learning methods will be used in the teaching and learning of the unit.

### Assessment

- Three assessments (consisting of a quiz and a written report on a selected engineering issue 20% each) 60%
- Group design project (consisting of literature study, engineering design, and other required project work components investigating a major industry issue) 40%

To be eligible to obtain a pass in this unit students must achieve an overall mark of at least 50% in the design project (consisting of literature study, engineering design, and other required project work components).

## SEM402 – Advanced Manufacturing

*Enrolment modes: Not available from 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Michael Norton*

*Prerequisite: SEM313*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

This unit delivers to the student the modern trends, advanced manufacturing technologies and built upon well-established engineering theories and principles which are generally complex and academically challenging. The content covers application issues; theoretical underpinning; mathematical modelling of the processes; environmental, sustainability and economic factors and is delivered, where appropriate, through real world case studies and research experience.

## Assessment

- Technical research paper 25%
- Feasibility case study 25%
- Oral presentation 15%
- Report 35%

## SEM405 – Heat Transfer

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Subrat Das*

*Prerequisite: SEM218 and one unit from SEM314 or SEM202*

*Corequisite: Nil*

*Incompatible with: SEM414 and SEM300*

## Content

Building on fundamental knowledge previously acquired during thermodynamics and fluid mechanics in heat transfer mechanisms including conduction, convection and radiation. Students will use knowledge gained to apply theoretical and numerical approaches to solve real-life heat transfer problems. Students will use experimental methods to reinforce fundamental concepts and to validate analytical solutions to case-studies.

## Assessment

- Examination 60%
- Online Logbook 40%

## Prescribed texts

Cengel, 2014, Heat & Mass Transfer ( Si Units ), 5th Ed, McGraw Hill, Singapore

## SEM406 – Advanced Modelling and Simulation

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Bernard Rolfe*

*Prerequisite: SEM327 and one unit from SEM302, SEM422 or SED302*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour seminar per week (CAD lab), 2 x 3 hour practicals per trimester.*

*Scheduled learning activities – cloud (online):*

*Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided), 1 x 2 hour online seminar per week 2 x 3 hour practicals per trimester (recordings, information and/or data provided to allow students to conduct practical activities away from the campus).*

## Content

This unit will study advanced aspects of modelling and simulation related to mechanical engineering. The unit will utilise and build upon the knowledge you have gained in your previous studies on material behaviour, dynamics, solid mechanics, and computer aided engineering (CAE). The main topics covered are: modelling of mechanical multi-body dynamic (MBD) systems, and finite element analysis (FEA). Via a project-based approach, you will develop fundamental understanding of these two key simulation areas, as well as the ability to use this knowledge for the analysis of real world problems. In the practical classes, students will also use experimental methods to provide context to and validation of the numerical analyses conducted during this unit. The mix of theoretical, numerical and experimental work will provide a good base for future career development in the advanced CAE area.

## Assessment

- Finite Element Analysis (FEA) project report 30%
- Multi-Body Dynamic (MDB) project report 30%
- MBD and FEA project report (consisting of team project report 25%, individual project report 15%) 40%

## SEM422 – Advanced Stress Analysis

*Enrolment modes: Not available from 2017 (replaced by SEM302)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Jeong Yoon*

*Prerequisite: SEM222 or SEM322*

*Corequisite: Nil*

*Incompatible with: SEM318*

### Content

In this unit students will extend their knowledge of basic stress analysis concepts introduced in second year units to more complex situations. Several new concepts/approaches will be introduced including energy methods, stress transformation and failure analysis. Students will learn how to apply these analytical approaches to real-life/industry-based problems, including examples where they are required to apply engineering judgement to simplify the analysis and understand the limitations of the analytical tools. By the end of this course students will be able to confidently design engineering structures using classical analytical techniques.

### Assessment

- 2 x written reports (30% each) 60%
- Examination 40%.

To be eligible to obtain a pass in this unit students must achieve an overall mark of at least 50% and a minimum of 40% in the examination.

## SEM433 – Mechatronic Design

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Benjamin Champion*

*Prerequisite: SEE321 and one unit from SEE316 or SEE320*

*Corequisite: Must be enrolled in S460, S461, S462, S463*

*Incompatible with: SEM332*

### Content

This unit integrates the knowledge gained in the electrical, electronic, microprocessor, mechanical and control units of the Bachelor of Engineering (Mechatronics) course. It covers locomotion, PCB design, power requirements, autonomous control and sensor design and application. Students are required to design and construct an autonomous robot project.

### Assessment

- Two reports (20%, 30%) 50%
- Project demonstration 40%
- Project construction 10%

To be eligible to obtain a pass in this unit students must achieve at least 50% in both of the project demonstration and construction assignments (this includes an oral component that must be passed).

## SEM711 – Product Development Technologies

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ali Zare*

*Prerequisite: For S462 students: completion of 22 credits points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week*

### Content

The aim of this unit is to provide insight into the development of complex, multi-faceted products. Students will be taken through the complete product development cycle and will be afforded the opportunity to design, construct and test a product of their own creation. Lecture topics in this unit include: the product development process, engineering design, digital manufacturing, experimental design, measurement technology, product verification and data analysis.

### Assessment

- Report 30%
- 3 x in-class quizzes (multiple choice and short answers – 10% each) 30%
- Group report and presentation 40%

## SEM712 – CAE and Finite Element Analysis

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mathew Joosten*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week*

### Content

The aim of the unit is to provide students with the necessary skills to perform structural analysis using the Finite Element Method (FEM). The unit will cover the underlying theory of the FEM and cover truss, beam, plane stress, shell and solid elements as well as various boundary conditions for common designs. An introduction to the software package Abaqus is given as well as the pre-processor Abaqus/CAE.

In this unit we will focus on applying the Finite Element theory to solve practical engineering problems. FEM builds upon your knowledge of statics, solid mechanics and strength of materials and allows you to investigate complex problems that may be difficult to solve using analytical approaches. An emphasis will be placed on understanding the limitations of your chosen modelling approach and validating your model to understand the accuracy of your chosen modelling approach.

### Assessment

- Individual report on the response of a simple structure 15%
- Group assessment involving stress and vibration analysis of a 3D structure 25%
- In-class test 1 10%
- In-class test 2 10%
- Final examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit student must achieve an overall mark of at least 40% in the final examination.

## SEM721 – Product Development

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong)*

*Trimester 3: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kaja Antleij*

*Trimester 3 Unit Chair: Clara Usma-Mansfield*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SED304*

*Scheduled learning activities – campus: 1 x 1 hour class per week (week 1–4), 1 x 2 hour seminar per week, 1 x 2 hour studio per week.*

### Content

In this unit we shall explore Design Methodologies and Product Development; you will be exposed to several theories on design and product development, practices as well as hear from industry experts. You will put theory into practice through an intensive industry based project, which all assessment will link. The ultimate goal of this class is to develop a product for a client. This unit will follow the entire design and product development process, from concept generation, customer validation and development of prototypes for testing.

### Assessment

- Progressive product development report 70% (30% progressive submission, 40% final submission)
- Team oral presentation 20%
- Team self and peer review 10%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a combined mark of at least 50% on the report submission.

## SEM722 – Advanced Manufacturing Technology

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Matt Jennings*

*Prerequisite: For S462 students: SEM313 and completion of 22 credits points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour of class per week, 3 x 3 hour practicals per trimester.*

### Content

This unit delivers to the student the modern and emerging trends of advanced manufacturing. Built upon well-established engineering theories and principles which are generally complex and academically challenging, this unit will investigate areas such as subtractive and additive manufacturing technology. The content covers application issues; theoretical underpinning; environmental, sustainability and economic factors and is delivered, where appropriate, through case studies and research experiences.

### Assessment

- Technical report 25%
- Case study report 25%
- Major assignment (technical report 35%, oral presentation 15%) (Students work in teams) 50%

## SEM723 – Additive Manufacturing Processes and Applications

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Wei Xu*

*Prerequisite: Prerequisite for students enrolled in S462: Completion of 22 credit points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour studio per week.*

### Content

This unit will provide an understanding of Additive Manufacturing (AM, also referred to as 3D Printing) and its applications. There are several sub-classifications of AM and multiple sectors that lead to a wide range of applications and subsequent considerations. These areas will be explored in detail along with an analysis of how AM integrates with other technologies to provide a wide range of product development solutions.

### Assessment

- Technology report 15%
- Design proposal 35%
- Team report 30%
- Oral presentation 20%

## SEM724 – Design for Additive Manufacturing

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jennifer Loy*

*Prerequisite: Prerequisite for students enrolled in S462: Completion of 22 credit points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour studio per week.*

### Content

This unit explores how products can be designed to exploit the key features of Additive Manufacturing (AM). The layer-based manufacturing approach used in AM makes it possible to create products that are somewhat independent of their geometric complexity. It is therefore possible to create parts that have internal, bespoke, mathematically defined and topology optimised features without concern over the difficulties of manufacture. Furthermore, it is possible to build parts with multiple material functionality that can exhibit different mechanical, thermal, electrical or other properties but built in a single stage. This unit will consider some of the techniques that can be applied to exploit these features as well as some of the outcomes that can be achieved using design for AM.

### Assessment

- Case study report 25%
- Design report 35%
- Project demonstration and oral defence 40%

## SEM725 – Materials for Additive Manufacturing

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wei Xu*

*Prerequisite: Prerequisite for students enrolled in S462:*

*Completion of 22 credit points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour studios per week.*

### Content

Materials for Additive Manufacturing will introduce the student to the unique process-structure-property relationships displayed by additive manufactured (AM) metal alloys, polymers/composites and bio-materials. This unit will explain material selection principles applied to current materials for 3D printing and understand the motivations for the latest in alloy/material development for additive manufacturing. In the context of additive manufacturing, in-depth material science concepts will be covered and key advanced material testing and characterisation tools will be introduced.

### Assessment

- Written report and presentation (report 30%, presentation 10%) 40%
- Written report and presentation (report 30%, presentation 10%) 40%
- Research report on emerging materials 20%

## SEN700 – Research Methodology

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong)*

*Trimester 3: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tim Bodisco*

*Trimester 3 Unit Chair: Svetlana Stevanovic*

*Prerequisite: Nil; For students enrolled in S460, S461,*

*S462, S463: Completion of 22 credit points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week.*

### Content

This unit provides students with a structured program to develop skills required to scope, plan, implement and evaluate an engineering research project. Students will be required to engage actively in planned learning activities, including (but not limited to): literature review techniques, methodological approaches to collect data, and evaluation, analysis and communication of research findings.

### Assessment

- Annotated bibliography 15%
- Literature review 25%
- Statistical data collection and interpretation 20%
- Research proposal (includes report and presentation) (group) 40%

## SEN719 – Project Initiation

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong)*

*Trimester 2: Waurin Ponds (Geelong)*

*Trimester 3: Waurin Ponds (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Sara Vahaji*

*Trimester 2 Unit Chair: Siva Krishnan*

*Trimester 3 Unit Chair: Siva Krishnan*

*Prerequisite: SEN700*

*Corequisite: SEE700, STP710 and must be enrolled in one of the following specialisations: Mechanical Engineering Design (SP-S000049), Mechatronics and Control Engineering (SP-S000051), Electrical and Renewable Energy Engineering (SP-S000076), Additive Manufacturing (SP-S000085), Civil Engineering (SP-S000086)*

*Incompatible with: SEN730 and SEN731*

*Scheduled learning activities – campus: 1 x 1 hour class per week.*

### Content

SEN719 enables students to develop a detailed plan and proposal for an engineering project. Teams of students will work with their academic supervisor/industry supervisor to formulate a project proposal that clearly defines the objectives, scope and justification for the project and incorporates consideration of any key stakeholder requirements, as well as safety, risk and ethical factors.

This project requires research investigation involving critical review and interpretation of literature on a selected topic, a proof of concept or preliminary results and provides an opportunity for the practical application and integration of the professional skills studied in other units of the Master degree. A University-allocated supervisor prior to commencement of work must formally approve research project proposals. The project proposal developed during SEN719, will be implemented in the subsequent unit SEN720 Project Implementation and Evaluation.

## Assessment

- Literature review and project proposal (individual and team components) (10% team proposal, 10% literature review) 20%
- Report – project proposal and proof of concepts (individual and team components) (30% individual report, 30% team report) 60%
- Oral presentation and defence (individual and team components) (10% team presentation, 10% individual oral defence) 20%

## SEN720 – Project Implementation and Evaluation

*Enrolment modes:*

*Trimester 1: Waurm Ponds (Geelong)*

*Trimester 2: Waurm Ponds (Geelong)*

*Trimester 3: Waurm Ponds (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Sara Vahaji*

*Trimester 2 Unit Chair: Siva Krishnan*

*Trimester 3 Unit Chair: Siva Krishnan*

*Prerequisite: SEN719*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week.*

## Content

SEN720 Project Implementation and Evaluation enables students to implement and evaluate their planned project proposal from the previous unit SEN719. Students will work closely with their academic/industry supervisors to implement the project plan as detailed in their proposal.

The project implementation and evaluation will provide students an opportunity to integrate engineering professional skills. The outcomes of their project will be disseminated to their peers, project supervisor and other external stakeholders via project report, project posters and an oral presentation.

## Assessment

- Project progress report (2 x 10%) 20%
- Final project report (individual and team components) (30% individual report, 20% team report) 50%
- Project exhibition and oral presentation (team) 30%

## SEN725 – Urban Stormwater Management

*Enrolment modes: Trimester 2: Waurm Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Abdol Ghafouri Rouzbehani (Mohjo)*

*Prerequisite: Nil*

*For S460 students: completion of 22 credits points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 1 hour seminar per week.*

## Content

This unit provides students with an overview of urban storm water management. Both quantity and quality aspects will be covered. The Unit comprises theoretical coverage of the rainfall-runoff and water quality transformation concepts in the context of an urban environment and modelling applications. Students will be taught the mathematical formulations for overland and channel flow, hydrological concepts to derive runoff and the application of these concepts in modelling. Empirical formulations for modelling the water quality transformation process will be introduced and adopted for the modelling of water quality in urban runoff with emphasis on conservative transport. Students will be required to demonstrate their understanding through tests and project work.

## Assessment

- Test 20%
- Preliminary project report and oral defence (15% and 15%) 30%
- Project report 50%

## SEN727 – Advanced Geomechanics

*Offering information: Offered from 2020 (subject to approval)*

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bre-Anne Sainsbury*

*Prerequisite: Nil. For S460 students: SEV362 Geotechnical Engineering and completion of 22 credits points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week.*

### Content

This unit extends existing knowledge of geomechanics particularly in relation to the systematic design of excavations in rock. It explores the variability of rock masses and provides techniques engineers can use to develop and manage safe and efficient excavation designs.

### Assessment

- Simulation Report 15%
- Laboratory interpretation report 15%
- Design report 35%
- Design presentation and defence 35%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 50% in the presentation.

## SEN728 – Transportation Infrastructure Systems

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ashim Debnath*

*Prerequisite: Nil. For S460 students: SEV402 and completion of 22 credits points. For S752 students: SEV402*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week.*

### Content

Designing and managing transportation infrastructure systems form a major part of civil engineering profession. To equip students with an advanced knowledge in and understanding of design and management of complex transportation infrastructure systems, this unit covers an overview of transportation systems and transportation modes, air and rail transportation, public transportation systems, intelligent transportation systems, urban transportation planning, transport demand management, models of traffic flow and car following theory, and transportation safety analysis techniques. Advanced knowledge and skills achieved in this unit are essential for transportation professionals for highly skilled works and/or further learning. Students work on problems and projects so that they are experienced to the real world of transport engineers.

### Assessment

- Problem solving task 1 (air and public transportation – individual) 30%
- Project (Travel demand management and traffic flow modelling – team) 40%
- Problem solving task 2 (transport safety and intelligent transport systems – individual) 30%

## SEN730 – Engineering Management Case Study

*Enrolment modes:*

*Trimester 1: Waurn Ponds (Geelong)*

*Trimester 2: Waurn Ponds (Geelong)*

*Trimester 3: Waurn Ponds (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Siva Krishnan*

*Trimester 2 Unit Chair: Kris Law*

*Trimester 3 Unit Chair: Mayuri Wijayasundara*

*Cohort rule: Must be enrolled in unit set SP-S000077*

*Engineering Management.*

*Prerequisite: SEN700*

*Corequisite: SEE700, STP710, SEB723, SEB724*

*Incompatible with: SEN719, SEN720*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour studio per week.*

### Content

Engineering management case study is a preparatory unit for the final capstone project unit that Master of Engineering (Professional) – Engineering Management students will do in order to effectively complete their degree.

Students will be taken through topics such as business case analysis, project scoping cost benefit analysis and economic theory. Students will be placed into teams with designated roles and will apply the topics learnt to a case study.

### Assessment

- Literature review and case study analysis (individual and team components) 20%
- Final case study report 60%
- Oral presentation and defence (individual and team components) 20%

## SEN731 – Engineering Management Project

*Enrolment modes:*

*Trimester 2: Waurm Ponds (Geelong)*

*Trimester 3: Waurm Ponds (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Kris Law*

*Trimester 3 Unit Chair: Mayuri Wijayasundara*

*Prerequisite: SEN700, SEN730*

*Corequisite: Must be enrolled in unit set SP-S000077*

*Engineering Management.*

*Incompatible with: SEN719, SEN720*

*Scheduled learning activities – campus: Weekly meetings with supervisory team.*

### Content

This unit enables students to implement knowledge and experience gained in the previous unit SEN730 Engineering Management Case Study. Teams will work closely with their academic/industry supervisors to implement an engineering project management solution to a real-world engineering business requiring strategic and change management direction. The outcomes of their project will be disseminated to their peers, project supervisor and other external stakeholders via Project Progress and Final Reports, Project Posters and an Oral Presentation.

*Note: From 2020 this unit will be offered Trimester 1, 2 and 3 at the Geelong Waurm Ponds Campus.*

### Assessment

- Project progress report 20%
- Final project report (individual and team components) 50%
- Project exhibition and oral presentation (team) 30%

## SEN769 – Advanced Structural Design

*Offering information: Offered from 2020 (subject to approval)*

*Enrolment modes: Trimester 1: Waurm Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kazem Ghabraie*

*Prerequisite: Nil. For S460 students: SEV300 and SEV320 and SEV323 and completion of 22 credit points.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour studio per week.*

### Content

This unit addresses advanced topics in structural design of concrete, steel, or composite structures according to the Australian design codes. It examines various design parameters and construction materials to ensure their efficient use in structural applications. Relevant design rules/codes will be thoroughly covered to make students aware of the ongoing changes as new technologies emerge. Theories will be covered with a focus on practical applications. Fundamental concepts of design procedures will be introduced through design seminar and projects.

### Assessment

- Concept report (team) 20%
- Draft design report and oral defence 40%
- Final design report 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the oral defence and a mark of at least 40% in the final design report.

## SEP122 – Physics for the Life Sciences

*Enrolment modes: not available from 2017 (replaced by SLE123 Physics for the Life Sciences)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Chris Lim*

*Prerequisite: Nil*  
*Corequisite: Nil*  
*Incompatible with: Nil*

## Content

Topics addressed in this unit are: the basis of physics concepts, energy, sound and waves, the properties of atoms, electric fields and their effects, optics and vision, thermal properties, fluid properties and mechanics. Applications in biological and medical fields are discussed.

## Assessment

- Examination 60%
- Laboratory work 20%
- Two problem-based assignments (10% each) 20%

## SEP291 – Engineering Modelling

*Enrolment modes:*

*Trimester 1: Waurm Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Van Thanh Huynh*

*Trimester 3 Unit Chair: Van Thanh Huynh*

*Prerequisite: SIT194*

*Corequisite: Nil*

*Incompatible with: SIT294*

*Scheduled learning activities – campus: Students are required to engage in 2 x 1 hour classes per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided), 1 x 1 hour online seminar per week. Students are required to attend and participate in practical activities at the Geelong Waurm Ponds Campus on the particular scheduled day during the trimester intensive week.*

## Content

This unit provides a fundamental understanding in the use of mathematical concepts in the design and analysis of engineering systems.

## Assessment

- 2 x problem solving exercises (25% each) 50%
- Quizzes (5 x 2% each) 10%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination.

## Prescribed texts

Glyn James, 2015, Modern Engineering Mathematics, 5th Ed, Pearson Education, Harlow, United Kingdom

## SEP490 – Engineering Work Experience

*Offering information: From 2018, SEP490 has been replaced by SEP499 Professional Engineering Practice (1 credit point).*

*Enrolment modes:*

*Trimester 1: Waurm Ponds (Geelong), Cloud (online)*

*Trimester 2: Waurm Ponds (Geelong), Cloud (online)*

*Trimester 3: Waurm Ponds (Geelong), Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Mahbube Subhani*

*Trimester 2 Unit Chair: Mahbube Subhani*

*Trimester 3 Unit Chair: Mahbube Subhani*

*Prerequisite: Nil*

*Corequisite: Only available to students enrolled in Bachelor of Engineering and associated combined degrees.*

*Incompatible with: SEP499*

*Scheduled learning activities – campus: As organised with the Unit Chair. No compulsory campus attendance requirement.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. As organised with the Unit Chair. No compulsory campus attendance requirement.*

## Content

Before students are eligible to graduate from the undergraduate Engineering courses, they must undertake a minimum cumulative total of at least 60 working days of suitable practical experience during their course program. This experience may be in an engineering workplace or laboratory, where the student will be exposed to professional engineers and engineering associates carrying out the duties. The experience need not be gained at a single organisation or in a single block of time.

Students typically enrol in this unit in the trimester during which, or immediately after, the minimum cumulative total of working days of work experience is achieved. The objective of the work experience requirement is so that students learn about real situations in engineering practice from their personal experience of participation and observation in an engineering workplace, develop or enhance a direct understanding of how organisations operate, and enhance their understanding of the engineering profession prior to graduate professional practice.

*Note: Delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

## Assessment

Two assessment tasks (Occupational Health and Safety (OHS) questionnaire 50%, engineering work experience report 50%).

# SEP499 – Professional Engineering Practice

*Enrolment modes:*

*Trimester 1: Placement*

*Trimester 2: Placement*

*Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: David Morton*

*Trimester 2 Unit Chair: David Morton*

*Trimester 3 Unit Chair: David Morton*

*Prerequisite: STP010 and completion of at least 12 credit points (including RPL) of study in the currently enrolled undergraduate engineering course. For students enrolled in S752: STP710 and completion of at least 8 credit points.*

*Corequisite: Nil*

*Incompatible with: SEP490*

*Scheduled learning activities – campus: Professional engineering practice experience undertaken as a vocational placement or employment placement with a host organisation. Students to achieve a cumulative total of 60 working days minimum (nominally 12 fulltime working weeks) by a placement (or multiple placements) proposed, approved, and undertaken while enrolled in this unit.*

## Content

This unit enables students studying an undergraduate accredited engineering course to engage in work integrated learning through professional engineering practice experience totalling 60 working days (450 hours) with a suitable organisation (or organisations). Placements must be approved by the Unit Chair before commencement and must be for a minimum of 20 working days. Thus the course requirement of 60 working days can be completed in up to three separately approved professional engineering practice placements.

This practice-based experience for students is intended to enable the development and advancement of knowledge and skills typically sought from graduate professional engineers (as defined by the Australian engineering profession). All associated learning and assessment activities for this unit are cloud-based (online).

*Note: This unit requires students to complete and submit documentation for placement approval. For more information and to complete the application process: please refer to the Professional Engineering practice or email [eng-professionalpractice@deakin.edu.au](mailto:eng-professionalpractice@deakin.edu.au)*

Students cannot enrol in the unit or commence a placement without written approval. Placements can be completed in Australia or overseas.

Delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.

## Assessment

- Journal diary portfolio 50%
- Final report 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must fulfil the 60 days (450 hours) of work placement and must achieve a mark of at least 50% on the journal diary portfolio and a mark of at least 50% on the final report.

## SEP701 – Introduction to Engineering Professional Practice

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tim Bodisco*

*Trimester 2 Unit Chair: Tim Bodisco*

*Trimester 3 Unit Chair: Tim Bodisco*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in S788, S688*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online):*

*Students are required to engage in online learning for approximately 3 hours per week over 11 weeks. Additionally, there will be 1 x 1 hour scheduled online seminar per fortnight to provide students feedback and support for their learning.*

### Content

Not only are employers seeking engineering graduates with good technical knowledge, they are also demanding that they have well-developed professional skills. Even though you may have been working in the industry for a number of years, professional skills are a living skill, requiring ongoing improvement. SEP701 is designed for students who have experience working in industry for some time but need further development in evidencing professional skills. Students will identify professional skills that they have developed through their work activities in the field of Engineering and explore what constitutes evidence and how to document evidence for credentialing purposes.

### Assessment

- Reflective report 40%
- Career professional development report 45%
- Online discussion and quizzes 15%

## SEP702 – Mastery of Engineering

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Tim Bodisco*

*Trimester 2 Unit Chair: Tim Bodisco*

*Trimester 3 Unit Chair: Tim Bodisco*

*Prerequisite: SEP701 Introduction to Engineering Professional Practice, plus satisfactory achievement of at least 6 credentials.*

*Corequisite: Must be enrolled in S788*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online seminar per fortnight to provide students feedback and support for their learning.*

### Content

In SEP702, students will be required to utilise their knowledge and experience from the workplace to contribute to and advance trends and practices in their field of engineering. This unit is designed for the student to demonstrate mastery through the design and development of an industry standard training program or by theorising practice through a publication as described in the pathways below.

#### Teaching Path (i.e. industry training)

Students will demonstrate mastery by developing a training program for an engineering organisation. This will require scholarly work describing the content of the training activity and effectively communicating knowledge and skills to other individuals.

#### Publication Path

Student will be required to write a paper ready for publication in a journal in the engineering discipline.

In order to judge the holistic vision of the student, there will be a requirement for a presentation to an assessment panel.

## Assessment

### Teaching path

- Needs analysis report 5%
- Learning contract 15%
- Poster presentation 20%
- Training and assessment material 40%
- Showcase portfolio 20%

### Publication path

- Needs analysis report 5%
- Learning contract 15%
- Poster presentation 20%
- Professional paper (for journal) 40%
- Research portfolio 20%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% of the available marks in the training and assessment material task (for teaching path) or the professional paper (for publication path).

*Scheduled learning activities – cloud (online):*

*Independent and collaborative learning activities including for weeks 1–5: 2 x 2 hour classes per week (recordings provided), 1 x 1 hour online seminar per week, for weeks 6–11: 1 x 1 hour online seminars per week. Students are required to attend and participate in project-based activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

## Content

This unit introduces the student to the design of a micro controller based system, which will interface with external devices. Topics to be addressed include: specification, hardware and software design, interfacing via I/O to external devices, peripherals, project construction, testing and documentation. The choice of micro controllers is reviewed but the unit will be taught using the Arduino micro controller using the C programming language. Students may however use a micro controller and programming language of their own choice to complete the required tasks.

## Student equipment purchases

Learning experiences and assessment activities in this unit require that students have access to specific computing mechatronics components/equipment, such as an Arduino Mega 2560 microcontroller and other components that vary from year to year. The expected cost of this equipment for this unit is approximately \$100. This component will also be usable in subsequent units.

## Assessment

- Design brief 20%
- Mechatronics skills practical assessment (4 x 5% each) 20%
- Project demonstration 40%
- Final report 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the demonstration (this includes an oral component that must be passed)

# SER201 – Embedded System Design

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Benjamin Champion*

*Prerequisite: One unit in SIT172 and one unit from SEP101, SEB101 and two credit points from SEJ101, SEB121 or SED102 and two credit points from SEJ102, SEE103 or SEM111*

*Corequisite: STP010 and one unit from SEE010 or SEJ010*  
*Incompatible with: SEE320*

*Scheduled learning activities – campus: For weeks 1–5 students are required to engage in 2 x 2 hour class per week, 1 x 3 hour studio per week and 1 x 1 hour seminar per week. For weeks 6–11 students are required to engage in 2 x 3 hour studio per week. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester.*

## SER202 – Programming for Embedded Systems

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Abbas Kouzani*

*Prerequisite: SIT172 and one unit from SEE103 or SEJ102*

*Corequisite: SEE010 or SEJ010 and must be enrolled in S461 Bachelor of Electrical and Electronics Engineering (Honours) or S463 Bachelor of Mechatronics Engineering (Honours)*

*Incompatible with: SEE215*

*Scheduled learning activities – campus: For weeks 1–5 students are required to engage in 1x3 hour class and 1 x 3 hour seminar per week. For weeks 6–11 students are required to engage in 1 x 3 hour of practical and 1 x 3 hour of self-directed practical per week. Students must attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including for weeks 1–5, 1 x 3 hour class per week (recordings provided), and for weeks 1–11: 1 x 1 hour online seminar per week. Students are required to attend and participate in project-based activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

### Content

This unit introduces the basic concepts involved in the operation of microcontrollers and microcontroller-based systems. Some examples of microcontrollers are listed. One specific microcontroller is introduced and studied in detail in respect to both hardware system design and software programming aspects. Basic inputs and outputs, serial communications, interrupts, timers/counters and other peripherals as well as their programming are discussed. Also, covered are some simple applications.

### Student equipment purchases

Learning experiences and assessment activities in this unit require that students have access to specific computing mechatronics components/equipment, such as an Arduino Mega 2560 microcontroller and other components that vary from year to year. The expected cost of this equipment for this unit is approximately \$100. These components will also be usable in subsequent units.

### Assessment

- Problem solving task 20%
- Practical 60%
- Report 20%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 50% and a mark of at least 40% in the practical.

## SER300 – Mechatronic Design

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Benjamin Champion*

*Prerequisite: SER201*

*Corequisite: Nil*

*Incompatible with: SEE320 and SEM433*

*Scheduled learning activities – campus: For weeks 1–5 students are required to engage in 1 x 2 hour class per week, 1 x 1 hour seminar per week, 1 x 3 hour studio per week. For weeks 6–11 students are required to engage in 6 hours of studio per week. Students are required to attend and participate in project-based activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including prerecorded videos. Students are required to attend and participate in project-based activities for this unit at scheduled sessions on multiple days during the trimester.*

### Content

The aim of this unit is to study the design and management of a mechatronic project. The unit develops the skills to apply mechanical and electronic knowledge to build a managed mechatronic project. The project will be an autonomous robotic build which will include the electronic control of a mechanical system. Engineering consideration of managed projects is included.

### Assessment

- Design brief 15%
- Progress presentation 10%
- Showcase 50%
- Final report 25%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 50% in the showcase (this includes an oral component that must be passed) and 40% in the progress presentation.

# SER301 – Electromechanical Systems Design

*Enrolment modes: Trimester 2: Waurm Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Pubudu Pathirana*

*Prerequisite: SER201 and SEE206, two credit points from SEM200, SEB223 or SEM223, plus one unit from SER202 or SEE215 plus one unit from SEE202 or SEE216*

*Corequisite: Nil*

*Incompatible with: SEE321*

*Scheduled learning activities – campus: For weeks 1–5: 3 x 1 hour classes per week, 1 x 3 hour seminar per week. For weeks 7–11: 2 x 3 hours studio per week. Students are required to attend and participate in project-based activities for this unit at scheduled sessions and on multiple days during intensive week during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including for weeks 1–5, 3 x 1 hour classes per week (recordings provided), 1 x 3 hour online seminar per week (recordings provided) for weeks 7–11: 1 x 1 hour online seminar per week. Students are required to attend and participate in project-based activities at the Geelong Waurm Ponds Campus on the scheduled days during the trimester intensive week.*

## Content

This is a project oriented design based learning (PODBL) unit, which aims to integrate the knowledge gained in the electrical, electronic, microprocessor, mechanical and mechatronics units of the Bachelor of Mechatronics Engineering (Honours) course. The unit will provide in-depth experience in sensing, signal processing and electromechanical concepts and associated technologies used for industry focussed Raspberry Pi environments. Kinematic sensors are used to explain data acquisition and filtering concepts. Different control principals are covered in a practical sense by implementing the design concepts in the Raspberry Pi environment. Mechanical actuation and output control concepts will be addressed through considering motor control.

The unit revolves around projects where students will be given a problem emerging from an application context. The generic problem will have unique components that will ensure each activity provides a solution. The aim will be to develop an automated solution that will require the implementation of complex sensing, control and actuator paradigms in the industry standard MATLAB environment deployed to a microcontroller-based platform. Emphasis will be placed on developing an approach or solution beginning from the problem definition phase and continuing through to a demonstrable prototype. The unit will cover elements of professional practice relating to budgeting and cost management, and communication of technically challenging complex concepts. In particular, tighter emphasis will be placed on implementing complex techniques on associated hardware and software.

## Assessment

- Design proposal (team) 25%
- Project review presentation (team) 10%
- Online tests (2 x 10%) 20%
- Individual portfolio 45%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must receive at least 40% in the team-based assessment as well as 50% in the individual portfolio.

# SER400 – Virtual and Augmented Interfaces

*Enrolment modes: Trimester 2: Waurm Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Andrew Price*

*Prerequisite: Students undertaking a Bachelor Degree in the School of Engineering – SIT172 and a minimum of 16 credit points. Students undertaking a Bachelor Degree in the School of IT – a minimum of 12 SIT Course Grouped Units. Students undertaking a different course of study – a minimum of 24 credit points. For students enrolled in S752: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour of class per week, 1 x 1 hour of seminar per week, and 2 hours of practical per week. Students are required to attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online):  
Independent and collaborative learning activities including 1 x 1 hour classes per week (recordings provided), 1 x 1 hour online seminar per week. Students are required to attend and participate in practical activities at the Geelong Warrn Ponds Campus on the particular scheduled day during the trimester intensive week.*

## Content

The unit introduces students to the principles and applications of virtual and augmented interfaces, as well as how to critically review the technology and propose new solutions. The unit will begin by introducing the principles of Human Computer Interaction (HCI) and relevant modern technologies. The unit will then consider case studies of recent technological advances in virtual and augmented interfaces, and students will be required to critically review the introduction of these technologies. Finally students will work in teams to propose a solution to an existing problem and present their proposed solution in the form of a mock-up or prototype using an appropriate technological platform.

## Assessment

- Literature review 20%
- Team demonstration 50%
- Report 30%

## SET401 – Advanced Topics in Engineering 1

*Enrolment modes: Not available from 2017*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Moshe Goldberg*

*Prerequisite: SEB322 or SEB324*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

This unit will enable students to study one of a selection of engineering subject specialisms at an advanced technical level and gain an awareness of the latest developments in that topic. Although it is anticipated that for most students, topic selection would be in line with their engineering discipline, subject to topic pre-requisite requirements students would be free to select any one of the available topics.

*Note: Highly recommended elective for Engineering students.*

## Assessment

- Project research report 20%
- Project presentation 20%
- Project demonstration 30%
- Project final report 30%

## SET402 – Advanced Topics in Engineering 2

*Enrolment modes: Not available from 2017*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Moshe Goldberg*

*Prerequisite: SEB322 or SEB324*

*Corequisite: Nil*

*Incompatible with: Nil*

## SET404 – Engineering Design: International Study Tour

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Lloyd Chua*

*Prerequisite: Completion of at least 20 credit points of study*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Study Tour: A pre-departure program, followed by 2 weeks international study tour.*

### Content

SET404 allows students to engage in a structured program of study, usually involving short project work overseas at an organisation or institution pre-arranged by Deakin's School of Engineering. In this unit, students will gain discipline specific technical expertise and will be challenged to develop personal qualities and attitudes that enhance their international outlook and global competence. Detailed information about the study tour will be provided to students via the unit CloudDeakin site as well as the pre-departure seminar, which students undertaking the study tour must attend.

*Note: Entry into this unit is via application and interview. Students are required to fund their own travel and accommodation costs and activities undertaken in this unit.*

### Assessment

- Project review report 40%
- Oral presentation 20%
- Project report 40%

## SET721 – Engineering Sustainability

*Enrolment modes:*

*Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Moshe Goldberg*

*Trimester 3 Unit Chair: Julius Orwa*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 1 x 2 hour class per week (recordings provided).*

### Content

Sustainable engineering is a rapidly growing multidisciplinary branch of engineering that promotes a need for understanding trends, future perspectives, limits, boundaries, risks, resilience and long-term future thinking. Using holistic and multi-disciplinary approaches, students will evaluate infrastructure, and develop an integrated knowledge of key aspects of infrastructure systems including water, energy, transportation and communication which deliver sustainable outcomes. They will be able to critically analyse the sustainability of current and future manufacturing processes and materials resources and devise, implement and manage solutions involved with the natural and built environment.

### Assessment

- Group report 30%
- Problem solving task 30%
- Written report 40%

## SEV101 – Global Environmental Systems

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Svetlana Stevanovic*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1x 1 hour seminar per week. Additionally students can choose to attend a 1 x 1 hour online workshop or 1 x 1 hour campus studio each week. These workshops/studios provide students with feedback and support their learning. All students are required to attend and participate in team based learning activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes (recordings provided), 1 x 1 hour online seminar and 1 x 1 hour online workshop each week. These workshops/studios provide students with feedback and support their learning. All students are required to attend and participate in team based learning activities for this unit at scheduled sessions during the trimester.*

### Content

This unit has been developed to give students broad understanding of global environmental issues such as climate change, ozone depletion, population stress, ocean pollution and loss of biodiversity from a systems perspective and how they may influence the natural and human environment. Students will be asked to consider the impacts of these global issues at local, regional and global levels and understand how environmental engineering plays a role in delivering solutions for a sustainable future. Students will work individually and in teams to identify, understand and analyse local contexts of complex global issues and identify the risks and future implications of those issues. At the completion of the unit students will be able to assess and critique current solutions and directions from an environmental engineering perspective and recognise the complexity of the problem.

### Assessment

- Initial report 30%
- Team-based assessment 20%
- Final report 50%

### Hurdle requirement

To be eligible to obtain a pass this unit, a student must achieve a mark of at least 40% on the initial report and a mark of at least 50% on the final report.

## SEV200 – Geotechnical Investigation and Design

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Kazem Ghabraie*

*Prerequisite: Must have passed SIT199 and must have passed one unit in SEP101 or SEB101 and must have passed two credit points in SEJ101, SEB121 or SED102 and must have passed two credit points in SEJ103, SEE103 or SEM111*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEV252*

*Scheduled learning activities – campus: 8 hours per week of class, seminar and laboratory project work per trimester. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester intensive week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided), 1 x 2 hour online seminar per week. Students are required to attend and participate in project-based activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

### Content

Engineering geology and soil mechanics are essential for locating, designing, constructing and managing any civil engineering infrastructures. To equip you with a valuable knowledge in and understanding of engineering geology and soil mechanics, this project-based unit covers topics on engineering geology, geotechnical site investigation, soil classification, compaction and consolidation, seepage, stress distribution and settlement, and an introduction to foundation design. The unit integrates the theory, site studies, and laboratory investigations utilising a basic design framework that allows team synthesis of data to formulate a professional level design folio.

## Assessment

- Quizzes (4 x 5% each) 20%
- Geotechnical engineering report (students work in teams) 35%
- Design project 45%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the geotechnical engineering report and a mark of at least 40% in the design project.

# SEV201 – Environmental Health Engineering

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.25*

*Trimester 2 Unit Chair: Ellen Moon*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour seminar per week. Additionally students can choose to attend 2 x 1 hour online workshops or 1 x 2 hour campus studios per week. These workshops/studios provide students feedback and support their learning. All students are required to attend and participate in practical learning activities in addition to the town hall meeting for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes (recordings provided), 2 x 1 hour online workshops per week. Online learning for approximately 4 hours a week over 11 weeks. These workshops/studios provide students feedback and support for their learning. All students must attend and participate in practical learning activities in addition to the town hall meeting for this unit at scheduled sessions during the trimester intensive week.*

## Content

This unit has been developed to familiarise students with the intersection between the environment and human health through engineering projects represented in three scenarios: humanitarian improvement, addressing contamination and energy production. While the technical content will reflect on foundations of these issues, significant emphasis will be placed on the approach to finding a solution and its communication rather than the solution itself.

## Assessment

- Humanitarian engineering report 35%
- Group town hall meeting 20%
- Community engagement poster (group) 15%
- Report on suitable energy sources 30%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% on the group town hall meeting.

# SEV210 – Construction Engineering

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Susanga Costa*

*Prerequisite: Nil*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEV217*

*Scheduled learning activities – campus: 2 x 1 hours of class per week, 1 x 2 hour seminar per week, 1 x 2 hour practical per trimester. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided), 1 x 2 hour online seminar per week. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester intensive week.*

## Content

This unit aims to provide students with the understanding of construction engineering within the broader project discipline of project management as applicable to the civil engineering profession. Students will be able to apply basic construction engineering management principles including site preparation and construction work planning, quantity and cost estimation, project scheduling and site management as practicing engineering professionals. An introduction will be provided to the use of Building Information Models (BIMs) to generate constructability reports, coordinate, plan, schedule and provide estimates. Students will also be required to develop a portfolio showing how they developed their outcomes.

## Assessment

- Project management overview (group) 20%
- Site evaluation, survey and work plan (group) 25%
- Quantity and cost estimation report 25%
- Construction tender document and journal portfolio 30%

## Hurdle requirement

To be eligible to obtain a pass this unit, students must achieve a mark of at least 50% on the construction tender document and journal portfolio and a mark of at least 50% on the quantity and cost estimations report.

- Water collection and distribution – surface water collection, groundwater collection, water transmission systems, water distribution systems; pipeline and valves – hydraulics of pipelines, network of pipelines, valves and appurtenances, pumps and pumping installations;
- Wastewater collection systems – collection of sewage and stormwater; sewer materials and appurtenances; flow measurements in sewers; sewer installations and testing;
- Hydraulics of sewer systems – quantities of wastewater flows, design of sewers, sewer materials, appurtenances and maintenance, alternative in wastewater collection systems;
- Urban runoff and road drainage design.

## Assessment

- Examination 60%
- Written report 15%
- Written report 25%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination.

## SEV215 – Water Systems

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Abdol Ghafouri Rouzbehani*

*Prerequisite: Nil (students are expected to have knowledge of basic concepts and related definitions in mechanics of fluids)*

*Corequisite: SEE010 and SEJ010*

*Incompatible with: Nil*

## Content

The unit introduces the fundamentals of water supply and water treatment operation and processes. This includes:

- Water supply systems – types of water supply systems, assessment of water demand, sources of water;
- Elements of hydrology – hydrological cycle, surface water hydrology, groundwater hydrology;

## SEV217 – Engineering Geology and Surveying

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Kali Prasad Nepal*

*Prerequisite: SEP101 or SEB101*

*Corequisite: SEE010 or SEJ010*

*Incompatible with: SEV210*

## Content

Engineering geology and surveying knowledge is essential for locating, designing, constructing and managing any civil engineering infrastructures. To equip you with a valuable knowledge in and understanding of engineering geology and surveying, this unit covers basic surveying principles of linear and angular measurements, civil engineering applications of surveying: control surveys, topographical maps and roadway curves, minerals and rock forming processes, geological structures and soil profile development, engineering properties of rocks and subsurface exploration and site selection.

## Assessment

- Practical work report – surveying (team) 20%
- Problem solving task- engineering geology 20%
- Examination 60%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 40% in the practical work report- surveying.

## SEV219 – Environmental Analysis

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SBC219*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nick Milne*

*Prerequisite: SLE133*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour seminar per week and 3 x 3 hour student-led laboratories per trimester. All students must attend and participate in practical activities for this unit during the trimester.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin which includes a 1 x 1 hour online seminar per week. All students must attend and participate in practical activities for this unit at scheduled sessions during the trimester intensive week.*

## Content

This unit extends and reinforces the basic concepts of chemistry and microbiology relevant to environmental processes and analysis. In particular it focuses on important aspects of soil chemistry, including groundwater, atmospheric chemistry and environmental microbiology. Students will be introduced to the basic chemical principles and processes in these environments with a specific focus towards qualitative and quantitative assessment methods. The unit includes a discussion of modern instrumental methods of analysis used in environmental assessment including techniques such as chromatography, atomic spectroscopy and mass spectrometry so that an informed choice of analysis techniques can be made to monitor soil and air samples.

Students will also be expected to understand the requirements for sustained, accurate analysis associated with monitoring, sampling, sample preservation and preparation, and calibration of instruments that is particularly relevant to environmental assessment programs.

## Assessment

Learning portfolio 100%

## SEV252 – Geo Mechanics 1

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: An-Jui Li*

*Prerequisite: SEP101 or SEB101*

*Corequisite: Nil*

*Incompatible with: SEV200 and SEV352*

## Content

During their study in SEV252, students will take a design-based approach that develops their understanding of soil physical properties, soil mechanical properties and geotechnical engineering associated with residential applications. Students will work according to Australian Standards to produce industry specific documentation and develop laboratory skills associated with soil testing.

## Assessment

- Group project brief 25%
- Teamwork (process) 5%
- Analytical report 30%
- Project final report 40%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 50% and a minimum of 40% on the analytical report.

## SEV254 – Road and Pavement Engineering

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Bidur Kafle*

*Prerequisite: SEB101*

*Corequisite: SEE010 or SEJ010 and must be enrolled in S460*

*Incompatible with: SEV354*

*Scheduled learning activities – campus: 1 x 2 hour classes per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided), 1 x 2 hour online seminar per week.*

### Content

Roads are a major component of civil engineering infrastructure systems. A significant proportion of civil engineering professionals are employed in designing and maintaining roads and pavements. To equip students with a valuable knowledge in and understanding of road and pavement engineering, this unit covers the overview of transportation infrastructure systems, road design principles and processes, design of roadside drainage systems and design of heavily-trafficked flexible and rigid road pavements so that advanced knowledge and skills for road and pavement engineering professionals or highly skilled work and/or further learning are achieved. Students will work on projects using relevant software so that they will be experienced to the real world of road and pavement engineers.

### Assessment

- Project – road and drainage design 25%
- Project – pavement design (team) 25%
- Examination 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a minimum of 40% on the final examination.

## SEV300 – Reinforced Concrete Design

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Riyadh Al-Ameri*

*Prerequisite: SEM222 and SEM223 or one unit from SEM201 or SEJ201*

*Corequisite: Nil*

*Incompatible with: SEV353 and SEV454*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week, 2 x 2 hour studio per week. 3 x 3 hour concrete lab sessions per trimester. Students are required to attend and participate in project oriented design-based activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 1 x 2 hour classes per week (recordings provided), 1 x 1 hour online studio and 1 x 1 hour online seminar per week. Students are required to attend and participate in project oriented design-based activities at the Geelong Waurin Ponds Campus at scheduled sessions during the trimester intensive week.*

### Content

This unit introduces the material properties and fundamental concepts for design procedures of concrete structures and the behaviour during service life according to the design codes. This includes introduction to the basic material properties and concrete mix design, structural design philosophies, flexural design of simply supported and continuous beams using Australian Design Code AS-3600, design of beams for shear, serviceability requirements, steel bond and development length, design of one way slabs, design of two way slabs, design of reinforced concrete columns, shear walls, and footings. Fundamental concepts of design procedures will be introduced through design studios and projects.

### Assessment

- Concept design report (team) 20%
- Tests (individual) (2 x 10%) 20%
- Final design report (individual) 40%
- Concrete lab report (team) 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a mark of 50% in the concrete lab report (team), and a mark of 50% in the final design report (individual).

## Prescribed texts

Al-Ameri, 2017, Properties and Design of Concrete Structures (Custom Edition), eBook only, Pearson Education

# SEV301 – Water Engineering Design

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Wendy Timms*

*Prerequisite: SEM218*

*Corequisite: Nil*

*Incompatible with: SEV328*

*Scheduled learning activities – campus: 2 x 1 hours of class per week, 1 x 2 hour seminar per week, 2 x 2 hours per week of studio, and 2 x 3 hours of laboratory tasks during trimester. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided), 2 x 1 hours of online seminars/workshops per week. All students are required to attend and participate in project-based activities for this unit at scheduled sessions during the trimester intensive week.*

## Content

Water Engineering Design introduces and explores the fundamental concepts behind water and wastewater processes, from collection through treatment to distribution and disposal. This project-based unit will build student's knowledge in the fields of fluid flow through open and closed systems and physical, chemical and biological processes to improve water quality to ensure its safe use or disposal. Students will be expected to develop an understanding of the regulatory environment for water and wastewater engineering and familiarise themselves with the various guidelines and Standards. The Unit will apply this knowledge and understanding to the design of real water systems within a new development.

## Assessment

- Group report – response to expression of interest 10%
- Group report – response to request for full proposal 30%
- Report – design of a water network 20%
- Report – design review of a water plant 20%
- Online quizzes (2 x 10% each) 20%

## Hurdle requirement

To be eligible to obtain a pass this unit students must achieve a mark of at least 50% on each of the online quizzes.

## Prescribed texts

# SEV311 – Air and Noise Pollution and Control

*Offering information: Offered from 2021 (Subject to approval)*

*Enrolment modes: Not offered in 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Lloyd Chua*

*Prerequisite: SEV219*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

In the past two decades, many countries around the globe have witnessed a growing need to restore environmental quality and protect the environment from the degrading effects of air, noise, solid waste and water pollution. In this unit, students will learn how different cutting-edge engineering processes and systems can be used to solve air and noise pollution problems. This unit is part of a series of environmental pollution control and management units in the environmental engineering course. This unit will allow students to develop knowledge of environmental analysis processes along with technical and economic evaluations.

Students will be expected to develop engineering solutions using fundamental principles of chemistry, physics and mathematics. Knowledge of best available technologies for air and noise pollution control including, design methods, installation and operation of various control processes, process equipment and systems are relevant and directly applicable for practice as an environmental engineer.

### Assessment

- Survey report 25%
- Mitigation system design proposal 35%
- Pollution transport and dispersion modelling 40%

## SEV320 – Theory of Structures

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Bidur Kafle*

*Prerequisite: One unit from SEM201, SEJ201, SEM222, SEM322 or SEM216*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 4 hours of seminar per week (week 1–4), 1 x 2 hour seminar per week (week 5–11), 2 x 1 hour practicals per trimester. All students are required to attend and participate in practical activities for this unit at scheduled sessions during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided) and 1 x 2 hour online seminar per week. Students are required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

### Content

This unit focuses on the fundamental analysis concepts and techniques required by engineers to study the behaviour of common structures. The unit will cover modelling and calculation methods necessary to describe and quantify member forces, deflections and reactions. The unit will address stability and determinacy and include analysis techniques for determinate and indeterminate structures such as beams, frames, trusses.

The unit will also focus on the construction of influence line for beam, truss and floor girder systems and analyse the effect of moving loads including concentrated loads, distributed loads and series of concentrated loads. Emphasis is placed on developing the student's ability to model and analyse a structure using prescribed methods and to experience a range of realistic applications for structural analysis which reflect those encountered in professional practice.

### Assessment

- Examination 50%
- Problem solving tasks (2 x 20% each) 40%
- Practical report 10%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the examination and a mark of at least 40% in the practical report.

### Prescribed texts

## SEV322 – Hydrology and Hydraulics

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Abdol Ghafouri Rouzbehani*

*Trimester 3 Unit Chair: James Gong*

*Prerequisite: SEM218*

*Corequisite: Nil*

*Incompatible with: SEV222*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour seminar per week, 2 x 2 hour practicals per trimester. All students are required to attend and participate in practical activities for this unit at scheduled sessions during the trimester intensive week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided) and 1 x 2 hour online seminar per week. Students are required to attend and participate in practical activities at the Geelong Waurin Ponds Campus on the scheduled day during the trimester intensive week.*

## Content

This unit will describe hydrological processes that are involved in earth's natural water cycle and the influence of those processes on catchments and engineering structures. It also will describe the hydraulic behaviours observed in open channel flows. Further, the unit will help to identify, define and use hydrological processes in practical situations such as catchment water balance, flood routing as well as hydraulic properties of flow in open channels when designing canals, sluice gates, energy dissipating structures etc. Classification of open channel flow surface profiles as well as measurements in a laboratory-scale flume will be carried out. Thus, this unit will provide knowledge to apply hydrology and hydraulic principles to real world engineering such as storm water management, water sensitive urban design, designing of irrigation channels etc.

## Assessment

- Examination 50%
- Problem solving tasks (2 x 15% each) 30%
- Laboratory reports (2 x 10% each, students work in groups) 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 50% in the laboratory reports.

## Prescribed texts

Ladson, 2008, Hydrology: An Australian Introduction, 1st Ed, Oxford Uni Press Australia and New Zealand

# SEV323 – Steel and Timber Structures

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mahbube Subhani*

*Prerequisite: One unit from SEM222, SEM201, SEJ201 or SEM216*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided) and 1 x 1 hour online seminar per week.*

## Content

This unit introduces the fundamental concepts for design procedures of steel and timber structures and their behaviour during service life and according to the valid design codes. This will enable students to understand various design philosophies, to apply the knowledge to design structural members, including tension and compression members, beams and connections design for both timber and steel structures. Design of beam-columns and frames will also be covered for steel structures.

## Assessment

- Examination 50%
- One design task on steel structure 30%
- One design task on timber structures 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the final examination.

## Prescribed texts

# SEV328 – Water and Wastewater Treatment

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Abdol Ghafouri Rouzbehani*

*Prerequisite: SEV215*

*Corequisite: Nil*

*Incompatible with: SEV301*

## Content

The unit will address the following areas:

- Introduction to Water treatment – Historical development of water treatment technology; health and environmental concerns; Evolution of water treatment technology
- Water quality – water pollutant and their sources; physical and chemical quality; characterization of water and sampling; Physical, chemical and microbiological characteristics; Australian Drinking Water guidelines and WHO guidelines for drinking water

- Water treatment processes – coagulation, rapid mixing, flocculation, sedimentation, flotation, filtration, ion exchange, adsorption, disinfection, aeration, water softening, membrane processes, Iron and Manganese removal, water plant residual management.
- Preliminary and primary wastewater treatment – Wastewater characteristics, pollutant loading, flow measurements, screening, grit removal, primary sedimentation.
- Secondary treatment processes – overview of biological treatment processes, wastewater microbiology, aerobic treatment processes, anaerobic treatment processes, biological nutrient removal, bio-solids – handling, processing, beneficial use.
- Natural treatment systems – pond treatment processes, aquatic treatment systems, land filtration, grass filtration, wetland.

### Assessment

- Examination 40%
- Problem solving tasks (2 x 20% each) 40%
- Laboratory reports (students work in groups) (2 x 10% each) 20%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 40% on each of the laboratory reports.

### Prescribed texts

Davis, 2010, Water and Wastewater Engineering – Design Principles and Practice, 1st edition, McGraw Hill

## SEV331 – Waste Management Systems

*Offering information: Offered from 2020  
(Subject to approval)*

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.25*

*Trimester 2 Unit Chair: Nick Milne*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SLE320*

*Scheduled learning activities – campus: 2 x 1 hour online workshop and 1 x 2 hour on-campus studios. All students are required to attend and participate in project based activities for this unit at scheduled sessions during the trimester.*

### Content

This unit has been designed to help students understand and investigate systems for the management of municipal and industrial solid waste, hazardous waste and consider industrial liquid waste management. It is part of a series of units looking at pollution and waste management within the environmental engineering program. Students will work through the evolution of waste management through an industry-based project that will allow students to develop a waste management plan and provide and evaluate the designs for a solid waste management system, such as a landfill or composting system. Through this process of design, implementation and evaluation of systems and procedures, students will learn the practice of resource and waste management in modern society.

### Assessment

- Waste classification survey 15%
- Preliminary design report 20%
- Solid waste design report (team) 40%
- Management plan webinar (team) 25%

## SEV353 – Reinforced Concrete Structures

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Riyadh Al-Ameri*

*Prerequisite: One unit from SEM222 or SEM216*

*Corequisite: Nil*

*Incompatible with: SEV300*

### Content

This unit introduces the material properties and fundamental concepts for design procedures of concrete structures and their behaviour during service life and according to the valid design codes. This includes introduction to the basic material properties and design parameters, flexural design of simply supported and continuous beams using Australian Design Code AS-3600, design of beams for shear and torsion, serviceability requirements, steel bond and development length, design of one-way slabs, design of two way slabs.

## Assessment

- One design project (6% group and 24% individual) 30%
- One laboratory report 20%
- Final examination 50%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination and a mark of at least 40% in the laboratory report.

## Prescribed texts

Al-Ameri, 2017, Properties and Design of Concrete Structures (Custom Edition), eBook only, Pearson Education

# SEV354 – Transportation Engineering

*Offering information: Not offered from 2019*

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Kali Prasad Nepal*

*Prerequisite: SEV217 or SEV210*

*Corequisite: Must be enrolled in S460.1 or S367*

*Incompatible with: SEV254*

## Content

A significant proportion of civil engineering professionals are employed in designing, analysing, operating and maintaining transportation systems. To equip students with a valuable knowledge in and understanding of transportation engineering, this unit covers the overview of transportation systems, road design principles and processes, design of roadside drainage systems, traffic system components and characteristics, analysis of roadway flows and queuing systems and importance of public and non-motorised transport.

## Assessment

- Design report 20%
- Problem solving task 20%
- Examination 60%

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 40% in the examination.

# SEV362 – Geotechnical Engineering

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kazem Ghabraie*

*Prerequisite: Must have passed one unit in SEV200, SEV252 or SEV352*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided), 1 x 1 hour online seminar per week.*

## Content

In nearly all civil engineering projects, engineers need to analyse the behaviour of the ground and prevent failure in soils. This unit builds on the basic knowledge of soil mechanics obtained in previous units and expands it by introducing topics related to shear strength of soils which are essential in understanding failure in soils. Applications of the covered soil mechanics theories will be studied in analysis and design of retaining structures, slopes, and shallow and deep foundations.

## Assessment

- Problem solving task 15%
- Design report 35%
- Examination 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the examination and a mark of at least 40% in the design report.

## SEV402 – Traffic and Transport Engineering

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ashim Debnath*

*Prerequisite: One unit in SEV254 or SEV354. For students enrolled in S752: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 1 x 2 hour class per week (recordings provided), 1 x 2 hour online seminar per week.*

### Content

Traffic and transportation engineering professionals work to solve complex and stochastic issues (safety, ubiquity, mobility, accessibility, economy and sustainability) and problems (crashes, delays, lack of sufficient funding and pollution) facing major cities and nations due to significant increase in motorised and non-motorised travel modes of transport. To equip students with a valuable knowledge in an understanding of traffic and transport engineering systems, this unit covers the overview of traffic and transport systems, major components of road traffic systems, transport modes, transport economics, urban transport planning, traffic flow theory and characteristics, analysis and design of roadway intersections, traffic studies, road safety, non-motorised and public transport systems, and Local area traffic management. Advanced knowledge and skills achieved in this unit are essential for traffic and transportation engineering professionals for highly skilled works and/or further learning. Students work on problems and projects so that they are experienced to the real world of traffic and transport engineers.

### Assessment

- Project (economic evaluation of transportation project – team) 25%
- Problem solving exercise (traffic engineering problems – individual) 25%
- Examination 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a minimum of 40% in the examination.

## SEV414 – Transportation Infrastructure

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Bidur Kafle*

*Prerequisite: SEV354*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

A significant proportion of civil engineering professionals are employed in designing, analysing, operating and maintaining transportation infrastructure. To equip students with a valuable knowledge in and understanding of transportation infrastructure, this unit covers the components of transportation infrastructure, flexible and rigid pavement design principles and processes, pavement management system, operational analysis and design of roadway intersections, traffic studies and road safety.

### Assessment

- Individual design project 60%
- Group design project 40%

## SEV415 – Infrastructure Engineering

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Carol Boyle*

*Prerequisite: Must have passed at least 22 credit points from S460, S461, S462, S463, S465. For students enrolled in S752: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour seminar per week. Students are required to attend and participate in practical activities for this unit at scheduled sessions on multiple days during the trimester.*

*Scheduled learning activities – cloud (online): Independent and collaborative learning activities including 2 x 1 hour classes per week (recordings provided), 1 x 1 hour online seminar per week. Students are required to attend and participate in practical activities at the Geelong Warrn Ponds Campus on the particular scheduled day during the trimester intensive week.*

## Content

This capstone unit will enable students to work in teams to design a complex infrastructure engineering project. Project management, stakeholder engagement, complex decision making and sustainability, environmental, social and life-cycle costs of integrated infrastructure design will be covered and incorporated into a real world engineering infrastructure development project.

## Assessment

- Project pitch and brief (team) 10%
- Design presentation and brief (team) 25%
- Final project design and document (team) 40%
- Professional engineering diary portfolio 25%

## Hurdle requirement

To be eligible for a pass in this unit, students must achieve a mark of at least 50% in the final project design and document (team) and a mark of at least 50% in the professional engineering diary portfolio.

# SEV454 – Advanced Structural Design

*Offering information: 2019 is the final offering of this unit*

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Riyadh Al-Ameri*

*Prerequisite: SEV353*

*Corequisite: Nil*

*Incompatible with: SEV300*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per week.*

## Content

The unit will address advanced topics in structural design of concrete structures including the design of reinforced concrete columns, shear walls, and footings. Fundamental concepts for design procedures will be introduced through design seminar and projects.

## Assessment

- Concept design report 1 (group) 10%
- Final design report 1 (individual) 40%
- Concept design report 2 (group) 10%
- Final design report 2 (individual) 40%

## Prescribed texts

Loo & Chowdhury, 2013, Reinforced & Prestressed Concrete, 3rd Ed (or 2nd Ed), Cambridge Uni Press, United Kingdom.

# SEV455 – Water System Design

*Offering information: 2019 is the final offering of this unit*

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nick Milne*

*Prerequisite: SEV328 and one unit in SEV222 or SEV322*

*Corequisite: Nil*

*Incompatible with: SEV301*

*Scheduled learning activities – cloud (online): Online independent and collaborative learning activities including 1 x 2 hour class per week (recordings provided), 1 x 1 hour online seminar per week.*

## Content

This unit will cover the design aspects of a water and waste water treatment plants, as well as water distribution and wastewater collection systems. Thus, this unit will provide knowledge to understand the design and skills to manage most of the water operations in an urban or peri-urban context.

## Assessment

- Preliminary design plan (group response to expression of interest) 10%
- Treatment plant design proposal (group) 30%
- Evaluation of a water system report 30%
- Water supply and wastewater reticulation modelling in integrated urban water design report 30%

## SHD201 – Creating Sustainable Futures

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sue Noy*

*Prerequisite: Must have completed 6 credit point units at Level 1 or higher*

*Corequisite: Nil*

*Incompatible with: SHD301*

*Scheduled learning activities – campus: 3 hours per week of seminars, 1 hour class per week.*

### Content

Students will work in a multidisciplinary team to draw on their respective fields of knowledge and background to address current and future sustainability problems as they impact on human, natural and built environments. The issues addressed include climate change, consumerism, clean energy and models for current and future sustainability.

The unit entails activity based learning, opportunities for creative expression and employment preparation relevant to the student's area of study.

### Assessment

- Individual report (minimum 1500 words) 30%
- Individual journal (minimum 2500 words) 35%
- Group oral presentation 35%

## SHD301 – Creating Sustainable Futures

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sue Noy*

*Prerequisite: Must have completed 6 credit point units at Level 2 or higher*

*Corequisite: Nil*

*Incompatible with: SHD201*

*Scheduled learning activities – campus: 3 hours per week of seminars, 1 hour class per week.*

### Content

Students will work in a multidisciplinary team to draw on their respective fields of knowledge and background to address current and future sustainability problems as they impact on human, natural and built environments. The issues addressed include climate change, consumerism, clean energy and models for current and future sustainability.

The unit entails activity based learning, opportunities for creative expression and employment preparation relevant to the student's area of study.

### Assessment

- Individual report (minimum 1500 words) 30%
- Individual journal (minimum 2500 words) 35%
- Group oral presentation 35%

## SIT001 – Cyber Security Fundamentals

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Nick Patterson*

*Trimester 2 Unit Chair: Nick Patterson*

*Trimester 3 Unit Chair: Nick Patterson*

*Cohort rule: Available to students enrolled in S334 Bachelor of Cyber Security and D380 Bachelor of Criminology/Bachelor of Cyber Security.*

*Prerequisite: SIT182*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): No compulsory campus attendance requirement. Students can access material to prepare for the certification assessment via CloudDeakin.*

### Content

This unit enables students to prepare and sit the ISACA's® Cybersecurity Nexus™ (CSX) Cybersecurity Fundamentals certificate. This certificate covers introductory concepts that frame and define the standards, guidelines and practices of the industry.

### Assessment

Multiple-choice test 100% with minimum passing grades as outlined by ISACA.

## SIT002 – Computer Hacking Forensic Investigator

*Enrolment modes:*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 2 Unit Chair: Damien Hutchinson*

*Trimester 3 Unit Chair: Damien Hutchinson*

*Cohort rule: Available to students enrolled in S334 Bachelor of Cyber Security and D380 Bachelor of Criminology/Bachelor of Cyber Security.*

*Prerequisite: SIT282*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): No compulsory campus attendance requirement. Students can access material to prepare for the certification assessment via CloudDeakin.*

### Content

This unit enables students to prepare and sit the EC-Council Computer Hacking Forensic Investigation certificate (see <https://www.eccouncil.org/programs/computer-hacking-forensic-investigator-chfi/>). Computer hacking forensic investigation is the process of detecting hacking attacks and properly extracting evidence to report the crime and conduct audits to prevent future attacks.

### Assessment

Multiple-choice test 100% with minimum passing grades as outlined by the EC-Council.

## SIT003 – Certified Ethical Hacker

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Frank Jiang*

*Trimester 2 Unit Chair: Frank Jiang*

*Trimester 3 Unit Chair: Frank Jiang*

*Cohort rule: Available to students enrolled in S334 Bachelor of Cyber Security and D380 Bachelor of Criminology/Bachelor of Cyber Security.*

*Prerequisite: SIT382*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): No compulsory campus attendance requirement. Students can access materials to prepare for the certification assessment via CloudDeakin.*

### Content

This unit enables students to prepare and sit the EC-Council Certified Ethical Hacker certificate. A Certified Ethical Hacker is a skilled professional who understands and knows how to look for weaknesses and vulnerabilities in target systems and uses the same knowledge and tools as a malicious hacker, but in a lawful and legitimate manner to assess the security posture of a target system(s). The CEH credential certifies individuals in the specific network security discipline of Ethical Hacking from a vendor-neutral perspective.

### Assessment

Multiple-choice test 100% with minimum passing grades as outlined by the EC-Council.

## SIT004 – Certified Security Analyst

*Enrolment modes:*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 2 Unit Chair: Lei Pan*

*Trimester 3 Unit Chair: Lei Pan*

*Cohort rule: Available to students enrolled in S334 Bachelor of Cyber Security and D380 Bachelor of Criminology/Bachelor of Cyber Security.*

*Prerequisite: SIT379 and SIT003*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): No compulsory campus attendance requirement. Students can access materials to prepare for the certification assessment via CloudDeakin.*

### Content

This unit enables students to prepare and sit the EC-Council Certified Security Analyst certificate. It is a pentest program that takes the tools and techniques learned in the Certified Ethical Hacker course (CEH) and enhances your ability into full exploitation by teaching you how to apply the skills learned in the CEH

by utilizing EC-Council's published penetration testing methodology. It focuses on pentesting methodology with an emphasis on hands-on learning.

## Assessment

Multiple-choice test 100% with minimum passing grades as outlined by the EC-Council.

## SIT010 – Safety Induction Program

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Damien Hutchinson*

*Trimester 2 Unit Chair: Damien Hutchinson*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students are expected to complete a safety induction program module on CloudDeakin. No compulsory campus attendance requirement.*

*Scheduled learning activities – cloud (online): Students are expected to complete a safety induction program module on CloudDeakin. No compulsory campus attendance requirement.*

## Content

This zero credit point unit is a program of safety information for students involved in information technology laboratory work. The program encompasses information technology hazards, building evacuation procedures, laboratory accident management and first aid procedures and safety work procedures particular to laboratory work.

*Note: A training video is available on CloudDeakin.*

## Assessment

Multiple-choice test 100%.

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a minimum mark of 70%. Multiple attempts of the on-line assessment are permitted.

## SIT101 – Fundamentals of Information Technology

*Enrolment modes: Not available from 2018*

*SIT101 Fundamentals of Information Technology and SIT104 Introduction to Web Development have been removed from offer and has been replaced by SIT124 Exploring I.T.*

*Students who have completed both SIT101 and SIT104 do not need to complete SIT124, although the unit will be available as an elective option.*

*Students who have only completed one of SIT101 or SIT104 should complete SIT124.*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Tianqing Zhu*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MIS101, SIT171 and SIT111*

## Content

SIT101 introduces students to key concepts in Information Technology. Students will explore computer hardware and software, communications and networks, system development, security, ethics and privacy, which are essential components of Information Technology Systems and Information Systems. While addressing the assessment requirements students develop knowledge of a number of software applications and tools including: word processing, spreadsheets, and electronic portfolios. In serving as a foundation within undergraduate IT degrees, this unit allows students to explore different career streams of IT Professionals, key skill sets and ethics in the world of business through the impact of information on industry and society.

## Assessment

- Practical assessment 20%
- Written presentation 15%
- Written report 15%
- Examination 50%

## SIT102 – Introduction to Programming

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Andrew Cain*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

Computing systems enable innovation and dramatic change in the world and the way we live in it. The capability of these systems evolve through people designing and developing new and innovative software solutions. Whether you are driving this revolution, or benefiting from it, you need to learn how computers work, and how people create software to drive computing processes. In this unit you will learn the fundamentals of structured programming and explore the mechanics of how these programs operate within the computer. The foundational knowledge and skills that you build in this unit will underpin both further programming units and your understanding of broader computing and communication systems in Information Technology contexts.

### Assessment

Learning portfolio 100%.

## SIT103 – Data and Information Management

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Arash Shaghaghi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit will provide a solid foundation for the design, implementation and management of database systems. Data modelling is introduced, focusing on entity-relationship (ER) modelling. The skills required to construct such ER diagrams will be explored, with a focus on ensuring that the semantics of the model match those of the real-world it is representing. The relational data model will be presented and the functionality it affords will be explored. The process of constructing, maintaining and retrieving information from the database using SQL will be a focus of this unit. Key implementation and management concepts, including transaction management and concurrency control, database backup and recovery, and security will be investigated.

### Assessment

- Examination 60%
- Survey report 20%
- Project documentation and data base 20%

### Prescribed texts

Coronel, 2018, Database Systems Design Implementation Management, 13th edition, Cengage Learning

## SIT104 – Introduction to Web Development

*Enrolment modes: Not available from 2018.*

*SIT101 Fundamentals of Information Technology and SIT104 Introduction to Web Development have been removed from offer and has been replaced by SIT124 Exploring I.T.*

*Students who have completed both SIT101 and SIT104 do not need to complete SIT124, although the unit will be available as an elective option.*

*Students who have only completed one of SIT101 or SIT104 should complete SIT124.*

*Credit point(s): 1  
EFTSL value: 0.125  
Unit chair: Shang Gao*

*Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil*

### Content

This unit introduces the techniques of creating static and dynamic web content using (X) HTML, style sheets, client side and server side scripting languages and databases. It focuses on developing the skills required for web programming with mark-up and scripting languages, such as building quality web pages, designing and maintaining a website. It introduces the concepts and technologies of the Web, the Internet and data networks, addresses how to use basic web programming tools, and discusses the potential future of web/internet applications.

### Assessment

- Website development project 20%
- Client-side validation project 15%
- Server-side development project 15%
- Examination 50%

To be eligible for a pass in this unit, all students must achieve a minimum of 50% on the examination.

## SIT105 – Thinking Technology and Design

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1  
EFTSL value: 0.125  
Trimester 1 Unit Chair: Nick Patterson*

*Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

In a world where technology is encompassing every part of our lives, the skill of thinking critically and solving problems can fall to the way side. Technology helps us to achieve a lot of things much more easily, which is great, but we need to control and shape it to fit our needs. If you do not exercise these skills, they will become fatigued and disappear but we need them to be paramount if we are to thrive in this technological world and design the next big thing. To be successful technologists, we need to be able to develop knowledge and confidence to think critically in order to analyse requirements of technological projects and synergise this with problem solving abilities to creatively respond to design challenges in order to get the best outcomes. The knowledge, understanding and skills you learn in this unit will aid in your ability to critically analyse information and design technologies with algorithms that will play a key role in enriching and transforming our society.

### Assessment

- Critical thinking task 15%
- Applied project 25%
- Online quiz 10%
- Examination 50%

## SIT106 – Fundamental Concepts of Mathematics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrnambool, Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Simon James*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week.*

### Content

The unit will consist of the following topics:

- The natural numbers, multiples, factors, prime numbers, divisibility tests, prime factorisation;
- Rational and irrational numbers and their representations as fractions, decimals and percentages;
- The stages of a statistical investigation: posing the question, collecting the data, summarising, analysing and presenting the data; interpreting the results;
- Techniques for carrying out statistical investigations;
- Regular polygons; regular and homogeneous tessellations;
- An analysis of some of the work of MC Escher; creating Escher-type tessellations in the plane;
- The Platonic solids and their duals.

### Assessment

- Examination 50%
- Three assignments (20%, 15%, 15%) 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 50% in the examination.

## SIT107 – Software Engineering 1: Connecting the Cyber and Physical Worlds

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 2*

*Previously coded as: Must be enrolled in S464 Bachelor of Software Engineering (Honours)*

*EFTSL value: 0.25*

*Trimester 2 Unit Chair: Atul Sajjanhar*

*Prerequisite: Nil*

*Corequisite: SIT010*

*Incompatible with: SIT123*

*Scheduled learning activities – campus: 1 x 2 hour class, 1 x 3 hour studio, 1 x 2 hour scheduled online seminar per week.*

*Scheduled learning activities – cloud (online): 1 x 3 hour online studio, 1 x 2 hour scheduled online seminar per week.*

### Content

This is a project-oriented and design based learning unit in which students investigate the fundamentals of cyber-physical systems and their application to problems dependent on sensing the environment and the entities within it. The themes within this unit encompass: ubiquitous sensor technologies, data capture protocols, data analysis and visualisation processes and how these underpin decision making, both by machines and humans. Application contexts will include smart homes and built environments, as well as personal health and lifestyle monitoring. Students will complete a project applying principles covered within this unit.

### Student equipment purchases

Learning experiences and assessment activities in this unit require that students have access to specific computing equipment, such as single board computers, microcontrollers and sensors. The expected cost of this equipment for this unit is \$150. This equipment will also be usable in subsequent units.

### Assessment

Learning portfolio 100%.

## SIT110 – Creative Coding

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shiva Pokhrel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week.*

### Content

This unit introduces students to fundamental coding and programming concepts by applying them to creative contexts.

Students will learn foundational coding processes and practises for a range of cases including digital and generative art, 3D virtual environments and interactive applications. Through a variety of projects, students will design and implement creative solutions to problem-solving challenges with a focus on learning through practical application. Students will produce a range of creative artefacts using modern technologies and gain the skills to plan, communicate and build innovative digital prototypes of their own design.

### Assessment

- Practical folio 30%
- Creative project proposal 30%
- Creative project 40%

## SIT111 – Algorithms and Computing Systems

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Seng Loke*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SIT101*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

Over the past 70 years computing systems and algorithms have revolutionised nearly every facet of modern life, from healthcare to education, manufacturing to transport, and entertainment to agriculture. Computing hardware and the algorithms encoded into software are thus vital to the continued growth of modern society, as are computer scientists – the professionals who design and develop algorithms and computational solutions to many of the world's problems. In this unit students will investigate some of the major computing system innovations over the past 70 years, to understand the role of computer scientists, computing hardware, algorithms and software as drivers of change and innovation. The unit will also look at recent developments and applications of computer science that are set to revolutionise our futures, such as digital currencies, intelligent machines, and the Internet of Things.

### Assessment

- Learning portfolio 30%
- Research report 20%
- Critical reflection and presentation 10%
- Examination 40%

## SIT112 – Data Science Concepts

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sergiy Shelyag*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SIT199*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

Data science is an emerging field and data scientists must be able to know how to make sense of data. In SIT112, students will develop knowledge of fundamentals in data science, in particular data manipulation and algorithms for analytics. The unit will also cover the practice of data science including ethical and responsible behaviour when crawling, cleaning, analysing, representing and repurposing the data.

Students will be able to obtain data, recognise data formats, summarise and visualise relationships in the data, perform exploratory data analysis tasks and build predictive models.

### Assessment

- Individual problem solving task 25%
- Group problem solving task 30%
- Data science project 25%
- 2 x quizzes (10% each) 20%

## SIT113 – Cloud Computing and Virtualisation

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Robert Dew*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

Cloud computing represents a significant shift in the delivery of Information Technology to end users by introducing the ability to deliver infrastructure, platforms, and software via the network. This unit explores the technologies, models, benefits and risks of cloud computing and includes a study of virtualization as one of the key building blocks of most cloud computing solutions. Upon completion of the unit students will have a clear understanding of cloud computing, the types of problems solved by cloud computing, and the issues that must be considered when deploying cloud technologies in an organisation.

### Assessment

- Online quizzes 20%
- Written report 10%
- Problem solving task 10%
- Examination 60%

### Prescribed texts

Erl et al, 2013, Cloud Computing: Concepts Technology & Architecture, 1st Ed, Pearson Education

## SIT114 – Introduction to Artificial Intelligence

*Offering information: Offered from 2020  
(Subject to final approval)*

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: TBA*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SIT112*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour workshop per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week*

### Content

This unit introduces you to the discipline of artificial intelligence (AI). You will explore diverse application domains where problems can benefit from AI solutions. You will develop conceptual understanding of major AI methods and know when and where to use them. In the practical components, you will implement simple AI algorithms.

### Assessment

Learning portfolio 100%.

### Prescribed texts

There are no prescribed textbooks for this unit.

## SIT120 – Introduction to Responsive Web Apps

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shiva Pokhrel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week, 1 x 1 hour scheduled online workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

In SIT120 students will develop foundational knowledge of and basic skills related to responsive web app design and development. Students will learn basic HTML, responsive CSS and JavaScript skills in order to build web apps both for desktop and mobile devices. Students will develop an understanding of how web design and web programming work together, as well as learn fundamentals of responsive web design, mobile UI design, licensing of media, mobile screen handling, touch events, and game concepts.

## Assessment

- Project analysis and design 30%
- Project implementation and presentation 40%
- Practical portfolio 30%

# SIT122 – Robotics Studio

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jan Carlo Barca*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour studio session per week.*

*Scheduled learning activities – cloud (online): 1 x 3 hour scheduled online studio session per week.*

## Content

This unit introduces the fundamental computational paradigms of robotic systems (sense-reason-act) in the context of a hands-on, studio based learning environment using the Nao robots. Students will learn and practice event-driven programming methods within Choregraphe, the visual programming environment for the Nao robot. Problems such as animating movement, responding to stimuli, and creating meaningful behaviours in constrained environmental contexts will form the basis of practical investigations of the robots capabilities and limitations, as well as the

design and development of programmatic solutions. Fundamental models of embodied and autonomous agents will be introduced through practical application of computing theory.

## Assessment

- Project and demonstration 40%
- Problem solving tasks 30%
- Report 30%

# SIT123 – Data Capture Technologies

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Feifei Chen*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SIT107*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 3 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

This unit will introduce students to ubiquitous and readily accessible devices for data capture, such as the sensor suite on a mobile smartphone, and those commonly used in homes, vehicles and current examples of cyber-physical systems. Students will be introduced to data capture protocols and methodologies, as well as data presentation and visualisation methods. Through practical investigations and analysis, students will investigate issues of robustness, reliability and validity of data and the effects of these on conclusions drawn from data.

## Student equipment purchases

Learning experiences and assessment activities in this unit require that students have access to specific computing equipment, such as single board computers, microcontrollers and sensors. The expected cost of this equipment for this unit is \$150. This equipment will also be usable in subsequent units.

## Assessment

- Project and poster presentation 30%
- Practical tasks 30%
- Examination 40%

## SIT124 – Exploring I.T.

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Elicia Lanham*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class each week and a 1 x 2 hour practical each week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

SIT124 is about exploring the current state of the IT Industry, enabling students to build an appreciation for the various IT employment opportunities. Case studies will explore current trends in technology from an emergent and disruptive perspective. Within SIT124 students will start to develop their professional identify and explore the requirements needed to gain employment within the field through case studies relevant industry employment information. Students will also explore and acquire skills in web design and development, in order to gain an understanding of the important role that the web plays in the delivery and storage of information within the IT industry.

### Assessment

- Professional preparation document 15%
- New technology website 15%
- Website development project (group) 20%
- Examination 50%

## SIT151 – Game Fundamentals

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Alexander Baldwin*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit is for students to study the concepts that define the design and development of games. Through the combination of practical application and theory, students will learn about designing games with a focus on engaging and refining their creative skills. Students will analyse existing games, learn about current processes of game design and development, and design a game implementation.

*Note: Students are expected to actively engage with SIT151 in CloudDeakin for a minimum of 1 hour per week.*

### Assessment

- Examination 40%
- Online quizzes 10%
- Written report 10%
- Game development and implementation 20%
- Research report 20%

## SIT153 – Introduction to Game Programming

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Alexander Baldwin*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SIT251*

### Content

This unit introduces students to the development of games software using the C++ programming language; the principle programming language used in the development of computer and video games. Core language knowledge and programming skills are developed in the context of games software development tasks. Students will learn to read, analyse, modify and develop code that produces components for interactive games using both procedural programming and object-oriented programming techniques. Additionally, students will apply software architectures and patterns to the design of computer games.

Topics covered in this unit include: the stack model, conceptual models of code execution, features of the C++ language, code analysis, program flow control, object-oriented design, game software architecture, robust programming practices. Upon completion of this unit students will be able to design, develop and analyse software applications written in C++ to implement simple computer games.

### Assessment

- Programming portfolio 40%
- Project 30%
- Examination 30%

## SIT161 – Principles of Interactive Media

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Elicia Lanham*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

Interactive media is one of the most rapidly developing areas in the computer industry; active and effective involvement in this field demands a thorough foundation in both the theory underlying the area, and the skills required of practitioners. This unit will provide media students with a theoretical and practical introduction to the field of interactive media. The unit will introduce the concepts of interactive and multimedia including its cultural and social context, and the foundations of games. The unit will examine the basic requirements for the creation and delivery of interactive media which effectively combines the digital formats of the 5 multimedia assets: text, images, sounds, video and animation, with the added element of interactivity provided by computer systems. It forms the theoretical basis for subsequent practical, organisational and theoretical inquiry into interactive media.

### Assessment

- Written report 20%
- Multimedia asset portfolio 30%
- Design document 10%
- Examination 40%

## SIT162 – Introduction to Creative Technologies

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shaun Bangay*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour online class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

The focus of this unit is to introduce students to the emerging field of creative technology, enabling students to build product that solve pressing social, community and creative problems. Students will explore applications of creative technology, investigating products from fields such as; Interactive media, Games, Virtual Reality and Augmented Reality. Students will apply their explorations into creative technologies to develop and deliver a cohesive product that achieves given specifications, while taking into consideration audience, suitable technology and interactive design components.

SIT162 will introduce students to the field of creative technology and the employment pathways for this profession.

### Assessment

- Case study 20%
- Report, product development and presentation (group) 40%
- Digital folio 40%

## SIT172 – Programming for Engineers

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jason Wells*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

Students entering the workforce as engineers will from time to time be expected to use, enhance or even develop software to complete their daily tasks solving engineering problems. This unit introduces students to the process of taking an engineering problem, identifying its components, and expressing a solution in computational terms. MATLAB and Excel are used to define, develop, analyse and solve engineering problems. Pseudo code and the C programming language is used to illustrate programming constructs, I/O basics, data types and storage, operators, control flow, repetition, functional decomposition, modularity and reuse.

On successful completion of this unit, students will have the ability to use a standard approach to problem definition, problem solving and program development, as well as understand the structure theorem and be aware of its consequences for algorithm design.

Students will develop the knowledge to enable them to analyse engineering problems, select the software tool or develop a software solution, process a solution and report results.

### Assessment

- Examination 50%
- 4 assignments (2 x 15% each, 2 x 10% each) 50%

## SIT176 – Mathematical Visualisation and Reasoning

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Simon James*

*Unit chair: Simon James*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour practical session per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

Numeracy is a priority area in Primary Education. SIT176 is one of the mathematics discipline units of the Mathematics/Numeracy specialisation, with content relevant for teaching primary mathematics. The unit aims to add to the mathematics content covered in SIT106 to give students more mathematical proficiency and preparation for their future teaching. Specifically, the unit will help students develop knowledge in measurement (units, area and volume), geometry (location and networks), interpreting functions and graphs, statistics (data analysis), mathematical reasoning and coding/programming.

### Assessment

- Online skills quizzes 25%
- Problem solving 25%
- Coding project and presentation 20%
- Examination 30%

## SIT182 – Real World Practices for Cyber Security

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Damien Hutchinson*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

In SIT182 students will learn the real world practices of cyber security by solving problems based on realistic case studies. Students will explore fundamental concepts of risks in managing communication networks and choose the appropriate means to manage these risks. The unit enables students to understand threats and vulnerabilities in the context of how systems can be compromised and how we can prevent harm to systems. There will be a practical focus on how we can detect and respond to cyber-attacks. The key to learning will be introducing students to practices through case studies.

### Assessment

- Problem solving task 20%
- Teamwork report 30%
- Examination 50%

### Prescribed texts

Ciampa, 2016, Security Awareness: Applying Practical Security In Your World, 5th Ed, Cengage Learning, Ohio USA.

## SIT183 – Application and Design of Virtual and Augmented Reality Systems

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Guy Wood-Bradley*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

### Content

This unit explores the design principles used in creating effective virtual and augmented reality applications. Virtual reality (VR) and augmented reality (AR) systems along with their areas of application (e.g., interactive educational experience, serious games, and immersive environments) are presented and analysed to form a foundation of basic design principles. The unit also provides a way to understand the interactive and cognitive functions of VR and AR systems and how these functions influence the design of assets for VR/AR systems.

### Assessment

- Investigative report 20%
- Analysis and design project 30%
- VR/AR portfolio 20%
- Examination 30%

## SIT190 – Introductory Mathematical Methods

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Trimester 2: Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michelle Cyganowski*

*Trimester 2 Unit Chair: Asef Nazari*

*Prerequisite: Students who have successfully completed VCE Maths Methods 3 and 4 and/or Specialist Maths 3 and 4 are not normally eligible to enrol in this unit.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour classes per week, 1 x 1 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

SIT190 aims to develop student understanding of the fundamental functions of applied mathematics, and to introduce calculus to students who have not previously studied it in secondary school. It is designed to prepare students from a number of different disciplines for learning tertiary level mathematics. Students will explore the algebra of polynomials, exponentials, logarithms and trigonometric functions and learn rules for differentiating and integrating these functions. Applications studied include graph sketching, maximisation and minimisation problems, areas and kinematics.

## Assessment

- Examination 60%
- Three problem solving tasks (10%, 15%, 15%) 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 50% in the examination.

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

Data is everywhere in the world. Without knowing how to interpret or use information from the data it would be difficult to understand its meaning. Statistics is both a method and a tool for interpreting information, testing hypotheses and analysing the inferences people make about the real-world. SIT191 aims to aid students develop knowledge in using statistics to summarise, describe and interpret numerical and graphical data and perform statistical inferences. In this unit, students will develop knowledge of the fundamentals of probability for reasoning real-world situations. Students will be required to use statistical software and calculators to analyse data and interpret results for tests on population means and proportions, chi-square tests, correlation and linear regression, and one-way ANOVA.

## Assessment

- Examination 60%
- Three problem solving tasks (10% each) 30%
- Practical tasks 10%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 50% in the examination.

## Prescribed texts

De Veaux et al, 2015, Stats Data & Models Global Edition, 4th Ed, Pearson Education, Harlow, United Kingdom

# SIT191 – Introduction to Statistics and Data Analysis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michelle Cyganowski*

*Trimester 2 Unit Chair: Musa Mammadov*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

# SIT192 – Discrete Mathematics

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Julien Ugon*

*Trimester 2 Unit Chair: Kerri Morgan*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour classes per week, 1 x 1 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

This unit provides students with the foundations in a range of areas in discrete mathematics, which is the basis for mathematical reasoning in applied sciences. SIT192 is designed to prepare students from a number of different disciplines for further study in the areas of linear algebra, number theory, graph theory, symbolic logic, set theory and combinatorics. These areas of study are vital for studying cryptography, networks, computer programming and analysis of algorithms.

*Note: Assumed knowledge: Year 12 mathematics or equivalent. The unit SIT190 is recommended for students who did not complete VCE Mathematical Methods 3 and 4.*

## Assessment

- Weekly problem solving tasks 20% (2% x 10 weeks)
- Report and presentation part 1 and part 2 20% (10% each)
- Examination 60%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the examination.

## Prescribed texts

Oscar Levin, 2016, Discrete Mathematics: An Open Introduction, 2nd Edition, Createspace Independent Publishing Platform (freely available online)

# SIT194 – Introduction to Mathematical Modelling

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: David Tay*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SQP122 and SIT193*

*Scheduled learning activities – campus: 4 x 1 hour classes per week, 1 x 1 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

This unit includes: functions and limits; derivatives and integrals of combinations of polynomials, exponential, logarithmic and trigonometric functions; sequences, series tests and power series; vectors, lines and planes; first order differential equations. Applications studied include approximations to solutions of equations and integrals and formulation of models to solve science and engineering problems.

*Note: Assumed knowledge: VCE Mathematical Methods 3 and 4 or equivalent, or SIT190 Introductory Mathematical Methods.*

## Assessment

- Examination 60%
- Problem solving tasks (2 x 10% each) 20%
- Problem solving tasks (presentation) (2 x 10% each) 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the examination.

# SIT199 – Applied Algebra and Statistics

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: David Tay*

*Prerequisite: VCE Maths Methods 3 and 4 or equivalent highly recommended*

*Corequisite: Nil*

*Incompatible with: SIT112*

*Scheduled learning activities – campus: 3 x 1 hour classes per week, 1 x 1 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

This unit includes: the algebra of complex numbers, matrices and sets; probability, and the major discrete and continuous probability distributions. The relationship between exponential functions, trigonometric functions and complex numbers is emphasised and applied to electrical networks. Solutions to systems of linear equations using matrices and determinants, and applications of set theory and symbolic logic are considered. The statistics techniques and examples studied are relevant to the sciences in general, and engineering in particular.

## Assessment

- Examination 60%
- Four assignments (10% each) 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 45% in the examination.

# SIT202 – Networks and Communications

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jinho Choi*

*Prerequisite: Two SIT coded units (excluding mathematics units coded SIT19-, SIT29-, SIT39-)*

*Corequisite: Nil*

*Incompatible with: SEE312*

*Scheduled learning activities – campus: 3 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

Computer networks, and the applications they support, have caused many significant changes to society in recent years. Books, newspapers, music, and video are now all either delivered differently or are being replaced by new media. Communication services such as postal mail, telephony, and television, are now undergoing significant changes and improvements resulting from improved computer networks.

New applications are also being driven by computer networks, such as the Internet of Things and Cloud Computing. In SIT202, students will learn how computer networks are constructed, how they work, and how modern applications use the services provided by modern computer networks. The concept of protocol layering will be explored to learn how computer networks operate, using the OSI model and TCP/IP protocol suite as examples, including an examination of the functionality and protocols provided by the different layers of these systems. Through practical tasks students will learn how to construct and configure computer networks and how various network protocols act and react to establish a functioning computer network.

## Assessment

- Three problem solving reports (15%, 15%, 10%) 40%
- Examination 60%

## Prescribed texts

Behrouz A. Forouzan, 2012, Data Communications and Networking, 5th edition, McGraw Hill

# SIT203 – Web Programming

*Enrolment modes: Not available from 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Shang Gao*

*Prerequisite: SIT103 and SIT104*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

SIT203 extends database and information retrieval and web development skills acquired in the prerequisite units. In this unit, students will build sophisticated websites and portals for small to medium businesses. The unit introduces students to the concepts of database connectivity as the basis for generating dynamic content and web pages. Students will learn advanced client side and server side programming to implement dynamic and interactive websites as well as apply security measures to enhance the usability of websites.

## Assessment

- Static website development project 30%
- Dynamic website development project 50%
- Secured website development project 20%

## SIT204 – Mathematics and Physics for Games

*Enrolment modes: Not available from 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Thanh Nguyen*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

This unit focuses on the development of problem solving and critical thinking skills and understanding of mathematics and physics techniques used to model a range of processes and systems commonly found in computer games. Students are introduced to mathematical representations of common phenomena in virtual worlds, as well as the techniques to solve computational problems that arise in the design and development of games. The skills developed in this unit underpin studies in game AI, computer graphics and gameplay design, and facilitate a clear understanding of the software tools commonly used in game development, such as 3D modelling packages and game engines.

### Assessment

- Tests (4 x 10% class test) 40%
- Mathematical modelling and analysis task 20%
- Examination 40%

## SIT205 – Thinking Systems and Cognition Science

*Offering information: 2018 is the final offering of this unit*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Thanh Nguyen*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

This unit will introduce history, current issues and research finding of cognitive science disciplines, including AI, linguistics, psychology, and philosophy. Students will be guided to explore the interactions among these disciplines, which leads to an enhanced understanding of the processes of intelligent systems. These systems can quickly adapt to a user's query and changing environment, have the ability of analysing available data and conducting automatic reasoning for decision-making. Example systems, such as IBM Watson, will be introduced to show how such a system is built on computational models to respond to a query in natural human language in order to provide answers that can be understood by users for assisting decision-making.

### Assessment

- Report 20%
- Project 30%
- Examination 50%

## SIT206 – iOS Programming

*Enrolment modes: Not available from 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Mohamed Abdelrazek*

*Prerequisite: SIT102 or SIT153 and one other SIT coded unit*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

SIT206 provides a practical introduction to developing applications for iOS devices. Students will be introduced to the iOS development environment, the iOS platform's design and the workflow of developing iOS apps in this unit. They will explore key concepts behind iOS apps, frameworks for constructing an application, and tools for developing, testing, and publishing software for the platform. The students will learn the basic iOS programming skills using Swift and Xcode, implementation of iOS frameworks on the app development, and skills to develop effective solution for real-world app services. Students will also gain hands-on experience in debugging iOS apps and the process of getting an app certified for deployment on iOS devices.

### Assessment

- Two projects (30%, 50%) 80%
- Portfolio 20%

## SIT207 – Android Programming

*Enrolment modes: Not available from 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Henry Larkin*

*Prerequisite: SIT102 or SIT153 and one other*

*SIT coded unit*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

In SIT207 students will explore the concepts behind Android, the framework for constructing an application, and the tools for developing, testing, and publishing software for the platform. In this unit, students will practice how to program using the Java language, develop mobile applications for Android, debug program code and decipher its meaning, summarise and articulate mobile programming topics and present a mobile application solution.

### Assessment

- Two projects (30%, 50%) 80%
- Portfolio 20%

## SIT208 – Advanced Data Science

*Enrolment modes: Not available from 2019*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Santu Rana*

*Prerequisite: One unit in SIT111, SIT112 or SIT191*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

This unit builds on SIT112, and introduces advanced concepts in relation to data management, distributed computation and associated techniques and programming skills. In this unit students will explore advanced techniques for unsupervised and supervised machine learning applications in data science. Students will apply machine learning, exploratory and confirmatory statistical methods to probe the data and making relatively large-scale, data-driven inferential conclusions.

This unit will equip students with a broad knowledge in the techniques used within the field of data science and big data analytics, in particular the use of clustering, dimensionality reduction and classification techniques through advanced programming.

### Assessment

- Individual problem solving task 25%
- Group problem solving task 30%
- Data science project 25%
- Two quizzes (10% each) 20%

## SIT209 – Software Engineering 2: Developing Internet-Of-Things Applications

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.25*

*Trimester 2 Unit Chair: Kevin Lee*

*Prerequisite: SIT107*

*Corequisite: Must be enrolled in S464 Bachelor of Software Engineering (Honours)*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Week 1–5: 2 x 2 hour classes per week, 1 x 3 hour studio per week. Week 6–11: 2 x 2 hour seminar per week, 1 x 3 hour studio per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

With increase capability and affordance of web2.0, web applications have become the primary platform for development of new applications. Many desktop applications have been moved to the World Wide Web which provides better accessibility through web browsers, better cross platform support, and more streamlined application development process. In this problem-oriented and design based learning unit students will be introduced to tools and techniques for web application development, to achieve practical knowledge and hands on experience on real world web applications within the context of cyber physical systems. Students will develop web application that can connect to selected sensors and devices, read data from them, send commands to actuators, and demonstrate the collected data on a web application front end.

Working as individuals and in teams within a project-based environment, students will be introduced to various aspects of web development including front end and back end web development and will apply specific techniques and tools at various stages of the development of a fully functional web application.

## Assessment

Learning portfolio 100%.

## SIT210 – Embedded Systems Development

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Iman Avazpour*

*Prerequisite: SIT102 and one of SIT123 or SIT107*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

Embedded devices are an inseparable part of modern computing systems. They monitor and control dedicated functionality of the systems. Examples of these systems include Anti-lock Brake Systems (ABS) and Airbags in cars to various Internet-of-things as Smart Home applications. This unit will focus on device level programming on devices such as the Particle Photon, AARM Mbed and Raspberry Pi, covering topics such as hardware interfaces and serial communications (GPIO, I2C, UART, SPI), real-time systems development, Open Systems Interconnection Model (OSI). Students will build and prototype embedded devices and systems to capture data, sense the environment, and trigger actions using a range of hardware devices and for a variety of real-world projects.

## Assessment

Learning portfolio 100%.

## SIT215 – Artificial and Computational Intelligence

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Chandan Karmakar*

*Prerequisite: SIT102*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 3 hour seminar per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

The development of intelligent systems has been a central quest of computer scientists for more than fifty years, with the objective of creating artificial systems that can solve problems traditionally achievable only by humans. This field is underpinned by a range of computational patterns and methods that cover problems such as searching, problem solving, reasoning, knowledge representation and learning. In this unit students will investigate, through a range of problem-based learning activities, a range of artificial and computational intelligence techniques that underpin modern, advanced intelligent systems such as autonomous vehicles, robotics, game-playing agents, and expert systems.

## Assessment

- Problem solving tasks (group) 40%
- Project 30%
- Examination 30%

## SIT216 – User Centred Design

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Guy Wood-Bradley*

*Prerequisite: Four SIT coded units (excluding mathematics units coded SIT19-, SIT29-, SIT39-)*

*Corequisite: Nil*

*Incompatible with: SIT365*

*Scheduled learning activities – campus: 1 x 2 hour class each week, 1 x 2 hour practical each week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

User-Centred Design (UCD) focuses on designing usable solutions and determining appropriate interactions between humans (users) and computational systems. It deals with the issues surrounding the design of interfaces to afford those interactions. Aspects of UCD also relate to the field of ‘Human Computer Interaction’ (HCI) which is more than just the “human” and the “computer”; it encompasses many facets including, interface and interaction design, affordance and usability, ergonomics and psychology. Specific attention to user needs and requirements through observation, analysis and investigation is essential for ensuring the resulting design of products, objects and systems are usable.

On completion of this unit, students will be able to critically analyse existing interfaces and use HCI and UCD principles to evaluate the systems they use. Consequently, a greater understanding of users in order to determine and analyse their interface needs is necessary. Lastly, being able to demonstrate applying HCI concepts to create, develop and enhance interactions and interfaces for clients and end-users which result in successful and engaging user experiences.

## Assessment

- Usability guidelines report 15%
- Usability evaluation report 15%
- Onterface design prototype (group) 30%
- Examination 40%

## SIT221 – Data Structures and Algorithms

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurm Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Richard Dazeley*

*Prerequisite: SIT131 or SIT232*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

SIT221 introduces students to in memory data modelling and computational trade-offs when developing software. Computing platforms from Internet-Of-Things (IoT) devices to supercomputers have limited or restricted resources available to software engineers in terms of memory, computational power, and energy consumption. Writing efficient and high-quality programs is the technical skill every technology company is after. This unit will extend student programming capabilities by exploring the application and implementation of different data structures and algorithms and considerations associated with appropriate selection of these tools to meet different system requirements.

## Assessment

Learning portfolio 100%.

## SIT222 – Operating Systems Concepts

*Offering information: 2018 is the final offering of this unit*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Xiao Liu*

*Prerequisite: Two SIT coded units (excluding mathematics units coded SIT19-, SIT29-, SIT39-)*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

This unit will familiarise students with the role and organisation of operating systems, which support programmers, program execution and efficient utilisation of computational resources. The management of logical and physical resources is discussed in detail. Students study process management, in particular their description, threads, concurrency and scheduling; memory management, in particular virtual memory; input/output management, including disk scheduling; file management, synchronisation and deadlock issues in multiprogramming environments; and security, in particular resource protection. The study covers Microsoft Windows, Linux and operating systems of PDAs and mobile phones as examples of the most commonly used operating systems. Factors influencing operating systems of mobile devices will be discussed. Some programming may be assigned as part of the assessment.

## Assessment

- Two take home tests and ten quizzes 40%
- Examination 60%

## Prescribed texts

Tanenbaum, 2014, Modern Operating Systems, 4th Ed, Pearson Education, Harlow, United Kingdom

# SIT223 – Professional Practice in Information Technology

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Iman Avazpour*

*Trimester 2 Unit Chair: Chathu Ranaweera*

*Prerequisite: Must have completed a minimum of two SIT coded units*

*Corequisite: STP010*

*Incompatible with: SIT301 and MIS231*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. Students are expected to participate in collaborative online seminars in CloudDeakin.*

## Content

Not only are employers seeking IT graduates with good technical knowledge, they are also demanding that they have well-developed professional skills. SIT223 exposes students to a range of such skills providing opportunities for developing and extending them in an IT context. The unit focuses on professionalism and critical thinking preparing students for work as IT professionals. Students will explore the impact of information technology in society, through the investigation of ethical and professional issues, and explore the modern IT workplace, including contracting, consulting, entrepreneurship, start-ups as well as the more traditional employee/employer relationship.

## Assessment

Learning portfolio 100%.

# SIT232 – Object-Oriented Development

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sergey Polyakovskiy*

*Prerequisite: One of SIT102, SIT153 or SIT172*

*Corequisite: Nil*

*Incompatible with: SIT131*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

SIT232 introduces students to object-oriented programming as the fundamental paradigm of modern programming languages and software development. Upon completion of the unit, the students will be ready to develop real-world software following the software design and structure best practices.

*Note: Students are expected to actively engage with training videos provided in CloudDeakin for a minimum of 1 hour per week.*

## Assessment

Learning portfolio 100%.

## Prescribed texts

Deitel & Deitel, 2017, Visual C# 2017 How To Program International Edition, 6th Ed, Pearson Education, Harlow, United Kingdom

## SIT253 – Audio and Visual Production

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Greg Bowtell*

*Prerequisite: Must have completed a minimum of two SIT coded units ((excluding mathematics units coded SIT19-, SIT29-, SIT39-)*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour online seminar, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per week.*

### Content

This unit aims to provide students with the ability to design and create audio and visual assets for creative productions such as video games and virtual reality. Students will design and build audio and visual elements appropriate to a given creative concept, and apply key concepts including; principles of good audio and visual asset design, representation, audio creation and manipulation, interactive audio, composition, lighting and colour, 3D modelling, and textures to the creation of assets. This hands-on unit will allow students to present their work in a professional portfolio and practice their oral presentation in front of an appropriate audience.

### Assessment

- Portfolio 60%
- Online test (multiple choice and short answer) 30%
- Oral presentation 10%

## SIT254 – Game Design

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sophie McKenzie*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SIT152*

*Scheduled learning activities – campus: 1 x 1 hour online seminar per week, 1 x 2 hour workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online seminar per week.*

### Content

This unit aims to provide students an appreciation of what it means to be a games designer. Students will explore the process of games design and apply key concepts including gameplay mechanics, rule design, play mechanics, game balancing and play testing in implementing a game. Students will also learn how to document a game design, apply professional standards and deliver an industry quality pitch for their game. This is a very hands-on unit, where students will create and implement a games design and critique their peers' creations to determine how best to create a game experience for specific audiences. In the process of creating games students will be required to use a variety of software technologies including industry-standard games engines. While prior programming experience would be beneficial, it is not a prerequisite to study this unit.

### Assessment

- Game pitch 20%
- Group computer game prototype and design documentation 40%
- Examination 40%

## SIT255 – Game Development Patterns

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Thuong Hoang*

*Prerequisite: SIT153, SIT102 or 232. From 2020: SIT232*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour studio session per week.*

*Scheduled learning activities – cloud (online): 1 x 3 hour scheduled online studio session per week.*

### Content

This unit builds on the outcomes of previous programming and object-oriented development units, investigating software design patterns and professional programming techniques used to architect software for games and virtual environments. A specific focus of the unit is on the entity-based software systems commonly found in game engines, and the artificial intelligence techniques that support agent-based games. Through studies in this unit students will develop an understanding of modern game engine software, and an ability to develop, extend and modify such software to create complex game systems. Students will also gain valuable experience working with modern software development environments and tool sets used by professional software developers, in a collaborative, project-oriented and design-based learning context.

### Assessment

- Game development project (Stage 1 (group) – 30%, Stage 2 – 30%) 60%
- Learning portfolio 40%

## SIT264 – Authoring of Interactive Media

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SIT262, SIT363*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Somaiyeh MahmoudZadeh*

*Prerequisite: Two SIT-coded units or 2 ADD/ADT coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

The design and development of interactive media systems involves; complex system analysis and design, the application of project management principles, and the integration of diverse content through interactive media authoring. This unit focuses on the authoring stage of this process. The authoring stage is a vital part of the development of interactive media systems and involves bringing together the multimedia assets and interaction processes. The authoring process is supported by a wide variety of tools, ranging from simple presentation systems such as Microsoft PowerPoint, to more complex authoring systems such as Adobe Director. This unit will discuss the merits application of these different authoring tools, as well as identifying and discussing the different authoring processes which can also be applied. On completing this unit, students will be able to: analysis existing authored solutions and suggest revised outcomes, author multimedia content for digital delivery, and apply scripting languages where appropriate to extend the basic functionality of authoring programs.

### Assessment

- Skills portfolio 15%
- Design document and prototype 20%
- Group development project 25%
- Examination 40%

## SIT272 – Enterprise Network Construction

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Justin Rough*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SIT701*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

### Content

This unit introduces the concepts and technologies used in modern computer networks. Topics studied include number systems and the mathematics of networks, addressing and subnetting in IPv4 and IPv6 networks, VLANs, static and dynamic routing, private networks, and access control lists for providing basic firewall functionality. Students will learn how to construct such networks by undertaking a study of the Cisco Academy CCNA curriculum.

### Assessment

- Two multiple choice tests (15% each) 30%
- Two practical tests (35% each) 70%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must complete all CISCO unit requirements.

### Prescribed texts

Cisco Networking Academy, 2016, Introduction To Networks V6 Companion Guide, 1st Ed, Pearson Education, USA

Cisco Networking Academy, 2016, Routing And Switching Essentials V6 Companion Guide, 1st Ed, Pearson Education, USA

## SIT277 – Enterprise Network Management

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SIT377*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shang Gao*

*Prerequisite: SIT272*

*Corequisite: Nil*

*Incompatible with: SIT377 and SIT702*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 2 hour practical per week.*

### Content

This unit examines the management of modern computer networks and the application of WAN technologies for interconnecting networks. Topics studied include redundancy, aggregation, monitoring, security, and troubleshooting aspects for network management. Students will also learn how to interconnect networks using WAN technologies including point-to-point, frame relay, and broadband connections. Students will learn how to manage and interconnect such networks by undertaking a study of the Cisco Academy CCNA curriculum.

### Assessment

- Two supervised multiple choice tests (15% each) 30%
- Two practical tests (35% each) 70%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must complete all CISCO unit requirements.

### Prescribed texts

Cisco Networking Academy, 2017, Scaling Networks V6 Companion Guide, 1st edition, Pearson Education

Cisco Networking Academy, 2017, Connecting Networks V6 Companion Guide, 1st edition, Pearson Education

## SIT281 – Cryptography

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Leo Zhang*

*Prerequisite: SIT192*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour classes per week, 1 x 1 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

In SIT281 students will learn the fundamental mechanisms of classic and modern cryptographic systems, which span from Caesar cipher of Roman times to Advanced Encryption Standard (AES) cipher invented in the early 21st century. Students will encrypt and decrypt messages by using modern symmetric encryption schemes including DES and AES, stream ciphers used in mobile phone networks and pay TVs, as well as the most well-known public key cipher RSA. The unit will also provide students the opportunity to explore the cryptographic applications.

### Assessment

- Problem solving task 30%
- Project 20%
- Examination 50%

### Prescribed texts

Trappe & Washington, 2005, Introduction to Cryptography with Coding Theory, 2nd edition, Pearson Education

## SIT282 – Computer Crime and Digital Forensics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Damien Hutchinson*

*Prerequisite: 2 level 1 SIT-coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

In SIT282 students will learn how crime is manifested in the IT world, the laws that govern the IT domain, and approaches to investigating cyber-crime and cyber-terrorism using digital forensic techniques. Students will examine both criminal and terrorist activities, the nature of these activities and the people that initiate them. The unit enables students to develop knowledge of laws that have been recently enacted to counter computer crime and terrorism as well as the institutions responsible for implementing those laws. Students will investigate techniques such as acquisition, verification, extraction, reconstruction and reporting. The key focus of SIT282 is on introducing students to computer crime, forensic techniques, digital evidence and retrieval of information. In addition, students will explore ethical implications of crime and terrorism.

### Assessment

- Investigation report 20%
- Case investigation and recommendation report 20%
- Examination 60%

### Prescribed texts

Nelson et al, 2018, Guide to Computer Forensics and Investigations, 6th Ed, Course Technologies, USA.

## SIT283 – Development for Virtual Reality

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Thuong Hoang*

*Prerequisite: Nil*

*Corequisite: SIT183*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

### Content

This unit provides a comprehensive introduction to the development processes specific to the creation of effective virtual reality applications. Programming concepts and techniques appropriate to the creation of elements of virtual environments are taught using industry standard development facilities. Data types and manipulation patterns appropriate to the representation of virtual spaces allow students to solve typical problems including those related to responding to user actions, incorporating physical interactions between virtual objects and presenting the virtual world using computer graphics and other forms of output.

### Assessment

- VR problem solving 50%
- VR development challenge 25%
- Examination 25%

## SIT284 – Cyber Security Management

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jemal Abawajy*

*Prerequisite: SIT182*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit provides students with the foundations required to learn cyberspace safety and security, and security management at corporate level. In SIT284 students will learn how security assessment is methodologically and procedurally conducted with business operational constraints. Students will examine both business and security operations. The unit enables students to develop contingency planning, risk assessment, risk management and compliance standards for various businesses. The key focus of SIT284 is on introducing students to IT security policy development and human security management. Students will also explore legal and ethical issues in the context of security management and audit.

### Assessment

- Group planning report 30%
- Case investigation report 20%
- Examination 50%

### Prescribed texts

Whitman, © 2019, Management of Information Security, 6th edition, Cengage Learning

## SIT291 – Mathematical Methods for Information Modelling

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gleb Beliaikov*

*Prerequisite: SIT194*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

SIT291 focuses on the concepts of differentiation and integration for the multi variable functions. Students will learn various techniques for solving constrained and unconstrained multivariate optimization problems as well as second order ordinary differential equations. Students will explore the applications of these mathematical techniques to the modelling of motion in space, optimization in business and economics, various forces in physics, periodic processes in mechanics, electric circuits and biology.

## Assessment

- 3 x problem solving tasks (10%, 15%, 15%) 40%
- Examination 60%

## Hurdle requirement

To be eligible to pass this unit, students must obtain at least 40% in the total mark allocated for the examination.

## Prescribed texts

Stewart, 2009, Multivariable Calculus: Concepts & Contexts, 4th Ed, Cengage Learning, USA.

# SIT292 – Linear Algebra for Data Analysis

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Guillermo Pineda-Villavicencio*

*Prerequisite: SIT192*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour classes per week, 1 x 1 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

Linear algebra is the foundation for many sophisticated mathematical and computational methods. In SIT292 students will learn the basics of linear algebra, and solve systems of linear equations. This unit extends students ability apply mathematical formulae and to operate with complex mathematical objects. SIT292 introduces students to vector spaces, matrix theory, systems of linear equations and methods for solving them, eigenvalues and eigenvectors, and their application to similarity of diagonal matrices. The techniques that students learn from this unit will enable them with the analysis of complex data and ensuring its reliability in studies of cryptography.

## Assessment

- Three problem solving tasks (10%, 15%, 15%) 40%
- Examination 60%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve 50% of the total marks allocated for examination.

# SIT302 – Project Delivery

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jan Carlo Barca*

*Trimester 2 Unit Chair: Greg Bowtell*

*Trimester 3 Unit Chair: Dhananjay Thiruvady*

*Prerequisite: SIT374 (students enrolled in D371 must complete MIS398)*

*Corequisite: Nil*

*Incompatible with: MIS399*

*Scheduled learning activities – campus: 1 x 2 hour workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 2 hour scheduled online workshop per week.*

## Content

SIT302 is the second of two capstone units within undergraduate IT programs at Deakin University. In this unit, students will extend their experiences of IT projects by executing a real-world industry project and synthesise knowledge and technical skills and other professional skills acquired during their course. Students will apply agile project management methods to iteratively design and build unique IT product, service or solution in a highly flexible and interactive manner. Knowledge of agile is particularly useful, as this project management methodology is widely used in engineering, information technology and other business areas. Together the capstone units will guide students to effectively communicate most important project factors to stakeholders, equip students to keep focussed on the goal of landing their project smoothly, enabling them to manage IT projects within define scope, schedule and budget.

*Note: Students are expected to undertake SIT374 and SIT302 in consecutive trimesters. Students should seek advice from the unit chair if they are unable to complete SIT374 and SIT302 consecutively.*

## Assessment

- Group project report 10%
- Project demonstration and presentation 30%
- Project showcase 40%
- Professional portfolio 20%

## SIT305 – Android and iOS Mobile Programming

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Henry Larkin*

*Prerequisite: SIT206 and SIT207. From 2020: SIT232 and SIT221*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 2 hour practicals per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

The aim of this unit is to provide students with code-sharing, organisation and teamwork skills to develop complex and attractive mobile applications in teams in the platform of their choice (iOS or Android). The major focus will be on building professional mobile apps by collaborating with one other student to create larger projects than would be possible alone. In this unit, students will practice how to work with code collaboration systems, work in teams to create mobile application solutions, program using advanced mobile app development skills, publish apps to app stores, how to pitch app ideas to interested parties, and present a mobile application solution. There will also be a very strong focus on independent learning.

### Assessment

- Professional plan and presentation 30%
- Group project and presentation 50%
- Report 20%

## SIT306 – IT Placement

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Elicia Lanham*

*Trimester 2 Unit Chair: Mengmeng Ge*

*Trimester 3 Unit Chair: Sophie Mckenzie*

*Prerequisite: STP010, SIT223 and must have passed at least seven SIT-coded units*

*Corequisite: Nil*

*Incompatible with: STP351*

*Scheduled learning activities – campus: Internship: Minimum of 100 hours in industry. Students are required to attend a compulsory pre-internship workshop on-campus in the week prior to the start of trimester.*

*Scheduled learning activities – cloud (online): Internship: Minimum of 100 hours in industry. Cloud (online) students are required to attend a compulsory online pre-internship workshop before placement start date.*

### Content

Integrating study and work experience in a systematic way is essential for forging close links between the university education process and the workplace. In SIT306 students will have the opportunity to gain professional work experience with an approved host organisation for a minimum of 100 hours. The exact nature, activities and emphasis in each internship/ placement will vary according to the context, resources and expertise of staff as well as the experience, qualities and aspirations of the student. However, this systematic opportunity will provide students with experiences with which they can learn about and with an organisation, critically reflect on their Course and Graduate Learning Outcomes, and discipline-specific and generic competencies in the context of work. There are many benefits to students and employers from undertaking relevant work placements/internships during study. The key benefit is that it prepares students for work. Learning and assessment activities in this unit will help students develop an appreciation for work-life and make decisions about personal and professional development.

Most importantly, it will provide students relevant evidence when applying for future work. In preparation for the internship, students will attend a pre-internship workshop that aims to: ensure they are work-ready (what to expect, managing risks etc.); use reflective practice on the job; navigate the assessment requirements; and finalise assessments 1 and 2, Me in a Minute and Learning Contract.

*Note: Please note: Enrolments after the dates below is subject to Unit Chair approval.*

- *Trimester 1 2019: Friday 15 February 2019*
- *Trimester 2 2019: Friday 21 June 2019*
- *Trimester 3 2019: Friday 25 October 2019*

*Note also that delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

## Assessment

- 'Me in a minute' transcript 5%
- Formal learning contract 25%
- Performance evaluation 20%
- Professional portfolio 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must demonstrate that they are working to the satisfaction of the host organisation (including skill competency levels, professional code of conduct and project output requirements) at both the mid and end of placement phases.

# SIT307 – Data Mining and Machine Learning

*Offering information: Offered in Trimester 1 from 2020*

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SIT372*

*EFTSL value: 0.125*

*Assumed Knowledge: Knowledge of basis statistics is recommended*

*Trimester 2 Unit Chair: Musa Mammadov*

*Prerequisite: One unit from SIT112, SIT191 or SIT199*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

This unit introduces students to methods and technologies for supervised and unsupervised machine learning, exploratory and confirmatory statistical methods, and predictive analytics. Problems such as clustering, classification, dimensionality reduction, statistical inference and maximum likelihood estimation will be investigated in applications across a range of industries. A particular focus of the units is modern data science problems arising from the Internet-of-Things, such as streamed data analysis and machine visions.

## Assessment

- Problem solving tasks 30%
- Data analysis project (group) 25%
- Machine learning challenge (group) 25%
- Quizzes (2 x 10%) 20%

# SIT308 – Human Behaviour and Computer Interaction

*Offering information: 2019 is the final offering of this unit*

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Glory Lee*

*Prerequisite: SIT205*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

Intelligent systems integrate the recent development of different disciplines of cognitive science, such as psychology, linguistics, and neuroscience. This unit provides students with an opportunity to study a range of models and methodologies used in intelligent systems for interacting with human users and their queries.

Students will study how a system is able to make intelligent decisions based on the available data, to understand user requests, and to develop solutions via automatic reasoning through topics such as natural language processing, knowledge representation, object recognition, and automatic reasoning.

### Assessment

- Individual research report 40%
- Project report for portfolio (students work in teams) 40%
- Team oral presentation 20%

## SIT309 – Data Visualization and Decision Making

*Enrolment modes: not available from 2018 (replaced by MIS372 Predictive Analytics in 2018 and MIS272 Predictive Analytics from 2019)*

*Credit point(s): 1*  
*EFTSL value: 0.125*  
*Unit chair: Guangyan Huang*

*Prerequisite: SIT112 or SIT205*  
*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit will present models and techniques that intelligent systems used for information visualization and data analysis for decision making. Topics cover data visualization, statistic inference, and Bayesian decision theory. Advanced practice will be introduced with platforms such as D3j, or IBM Watson.

The content is designed to allow student to understand principles and methodologies in the area of data visualization and data analytics. The assessment tasks are designed to help students to develop skills and knowledge to utilize visualization and analytics tools to turn data into visual insight, which helps in making informed decisions.

### Assessment

- Project work 40%
- Project report for portfolio 40%
- Oral presentation 20%

## SIT310 – Robotics Application Development

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*  
*EFTSL value: 0.125*  
*Trimester 1 Unit Chair: Kevin Lee*

*Prerequisite: SIT122 and SIT210*  
*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 3 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

In this unit students will develop low level software for robotics applications, covering problems such as sensing the environment (using sonar, vision, LIDAR, etc.), navigation and movement control (locomotion and non-collision trajectories, steering, route planning), and actuation (gripping, manipulation). A range of software platforms will be used/available, including: Nao Humanoid Robots, Tracked and wheeled rovers, multi-rotors and UAVs. Extensive use of simulation and testing environments will be used.

### Student equipment purchases

Learning experiences and assessment activities in this unit require that students have access to specific computing equipment, such as single board computers, microcontrollers and sensors. In this unit, some of the required equipment is shared amongst other IT units and may have been purchased previously (to the approximate value of \$150). Additional equipment to the value of \$200 will be required.

### Assessment

- Practical tasks 40%
- Prototype 30%
- Report 30%

## SIT311 – Software Engineering 3: Designing User-Centric Internet-Of-Things Application

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.25*

*Trimester 2 Unit Chair: Arkady Zaslavsky*

*Prerequisite: SIT232*

*Corequisite: Must be enrolled in S464 Bachelor of Software Engineering (Honours)*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar each week for 5 weeks, 1 x 3 hour studio per week for 6 weeks.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online workshop per week*

### Content

This is a problem-oriented and design-based learning unit with a focus of introducing students to principles of user-centred design, within the area of Internet-of-Things (IoT). Using contemporary practices and tools, students will apply user-centred design concepts to plan, implement and evaluate IoT enabled applications. Key focus areas will include: challenges of enabling usability, interaction design, and forms of user acceptance testing for the IoT domain. This unit integrates concepts in IoT and software development covered in the pre-requisite units, while also applying principles of usability covered within this unit.

### Assessment

Learning portfolio 100%.

## SIT312 – System Design and Prototyping

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Niroshinie Fernando*

*Prerequisite: SIT123 or SIT107*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit will introduce students to methods and practices in system design, prototyping and testing, and business and funding models relevant to small start-ups and “Kickstarters”. Students will demonstrate a synthesis of knowledge, practical and professional skills developed throughout their studies of the Robotics and Cyber-physical Computing major, working in small teams to develop and prototype a product with commercial potential, using agile development practices.

### Student equipment purchases

Learning experiences and assessment activities in this unit require that students have access to specific computing equipment, such as single board computers, microcontrollers and sensors. In this unit, some of the required equipment is shared amongst other IT units and may have been purchased previously (to the approximate value of \$150). Additional equipment to the value of \$200 will be required.

### Assessment

- Design proposal 20%
- Prototype 60%
- Exhibition 20%

## SIT313 – Developing Client-Server Web Applications

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Hasan Ferdous*

*Prerequisite: One of SIT202, SIT207 or SIT206*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

In this unit, students will get hands-on experience in building cross-platform native mobile apps using Xamarin. Students should have prior knowledge in developing mobile apps using Android and/or iOS as well as C# programming experience. Students will learn key architecture and design patterns to use, how to develop cross-platform app UI, how to reuse/share code across different platforms, how to test and debug apps, how to access data, web/REST services and location/maps.

### Assessment

- Two projects (individual – 25%)
- Group – 50%) 75%
- Portfolio 25%

## SIT314 – Developing Scalable Internet-Of-Things Applications

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kevin Lee*

*Prerequisite: SIT232*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit introduces students to key challenges and principals when architecting large-scale applications for the Internet-of-Things (IoT). Students will learn and use different architecture patterns including layered architectures, message-bus style, event-driven, micro-services. Students will also learn different deployment models, quality of service attributes and trade-offs and testing requirements and frameworks.

### Assessment

Learning portfolio 100%.

## SIT315 – Programming Paradigms

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mohamed Abdelrazek*

*Prerequisite: SIT232 or SIT210*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

Programming languages are many and varied, and like natural languages they encompass different styles (or paradigms). These different programming paradigms provide for a variety of ways to tackle computational problems and thus some languages are better suited to certain problems than others. In this unit students will expand their study of programming paradigms beyond procedural and object-oriented methods covered in earlier units, investigating functional and parallel programming, as well as real-time systems programming. Through both study of theoretical aspects of programming languages and practical investigations of program development, students will develop an understanding of, and appreciation for, the fundamental design of programming languages.

### Assessment

Learning portfolio 100%.

## SIT316 – Optimisation and Constraint Programming

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Julien Ugon*

*Prerequisite: SIT102 and SIT192*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour seminar per week.*

*Scheduled learning activities – cloud (online): 2 x 1 hour scheduled online workshop per week.*

### Content

This unit explores the commonly used computational skills for real-life optimization, planning, and decision making problems, such as routing, scheduling, machinery workflow, network design, logistics, staff rostering, resource allocation, and supply chain optimization with applications in industries including airline, mining, healthcare, science, education, wholesale and retail, as well as other government, and civic services.

Students will learn the concepts of combinatorial optimisation and constraint satisfaction by studying a number of classic problems, concepts of modelling, practical considerations, algorithms and packages, decision support and expert systems.

### Assessment

- Learning portfolio 80%
- Examination 20%

## SIT317 – Enterprise, Entrepreneurship and Innovation

*Offering information: Available from 2020 (subject to approval)*

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (Online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Michael Hobbs*

*Prerequisite: At least 8 SIT coded units. For A344 – at least 2 SIT coded units (one at Level 1 and one at Level 2) and 6 ADD/ADT coded units.*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

This unit will explore technology entrepreneurship, focusing on what it means to engage in a process of innovation, scaling ideas from pipedreams to enterprise solutions for both profit and NGO's. To extend the reach of entrepreneurship activities, this unit will focus on enterprise level technology and explore the ways in which large and distributed organisations use disruptive technologies to support business. Through a series of case studies and recent research, students will investigate what it means to provide enterprise solutions as well as what is required to create a successful start-up. The case studies will enable students to explore entrepreneurial leadership on both small and large scales, discovering how to develop collaborative partnerships that support today's technological and social problems.

Through an industry-centred problem-based approach to learning, students will explore how to discover opportunity, while critically reflecting on their entrepreneurship-self that informs their career plan. This unit will provide mentor-guided workshops featuring a range of industry guest speakers, immersing students in local and global case studies to explore the nuances of innovation and entrepreneurship, suitable for both small- and enterprise-scale situations. Specific topics covered include: enterprise organisations; venture formation; business strategies; marketing approaches; organisational behaviour; legal and financial aspects; and innovation. This unit focuses on understanding the start-up entrepreneurship culture, particularly in enterprise-level technologically based areas of the economy.

### Assessment

- Case study report 40%
- Start-up presentation 10%
- Start-up plan and presentation (group) 50%

## SIT318 – Innovation Design and Prototyping

*Enrolment modes: not available in 2019*

*(In 2019, students are to undertake SIT374 Project Design and SIT302 Project Delivery concurrently however students are encouraged to complete these units in consecutive trimesters if possible.)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Alessio Bonti*

*Prerequisite: Must have completed 6 level 2 SIT coded units, which must include SIT210 and SIT232*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 2 x 3 hour practicals per week (weeks 1–4); 1 x 1 hour class per week, 1 x 3 hour practicals per week (weeks 5–11).*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online class per week, 2 x 3 hour online practicals per week (week 1–4), 1 x 1 hour online class per week, 1 x 3 hour online practicals per week (weeks 5–11).*

### Content

This unit introduces students to methods and practices in system design, prototyping and testing, as well as business and funding models relevant to small start-ups and “Kickstarters”, and professional practices relevant to technology innovation. Students will engage with industry practitioners, partners and academic supervisors to propose new computing products and innovations having commercial potential. Students will then demonstrate a synthesis of knowledge, practical and professional skills developed throughout their studies in computer science, working in small teams to formalise a product design, and to develop and test a prototype of this product, employing agile development practices and modern development tools.

### Student equipment purchases

Learning experiences and assessment activities in this unit require that students have access to specific computing equipment, such as single board computers, microcontrollers and sensors. In this unit, some of the required equipment is shared amongst other IT units and may have been purchased previously (to the approximate value of \$150). Additional equipment to the value of \$200 will be required.

### Assessment

- Design proposal 20%
- Prototype 60%
- Exhibition 20%

## SIT321 – Software Engineering Methods

*Offering information: 2019 is the final offering of this unit*

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Feifei Chen*

*Prerequisite: Two SIT coded units (excluding mathematics units coded SIT19-, SIT29-, SIT39-)*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour classes per week, 1 x 1 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

In SIT321, students will learn the principles and concepts involving software engineering and software development. The unit will allow students to explore the influence of customer and project requirements and resources for the selection of a suitable software development process model and quality software. In this unit students will develop professional judgement and decision-making skills including trade-offs between project scope, quality, cost and time with a view to choose appropriate methods for software development and management of the software development process. Assessment tasks in the unit will require the student to plan and estimate large and small projects using industry standards as well as by developing internal standards. It will also require the student to elucidate and analyse requirements, perform object-oriented analysis and usability testing.

### Assessment

- Group project (project planning 20%, systems analysis and design 20%, and software system implementation 10%) 50%
- Examination 50%

## Prescribed texts

Pressman + Priestley, 2017, Software Engineering (8th Ed) + Practical Object Oriented Design Using UML, McGraw Hill, Australia.

## SIT322 – Cloud Systems

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Seng Loke*

*Prerequisite: SIT221 or SIT232*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

Cloud computing has become a billion dollar business and has helped fuel the development of the IT industry in recent years. Many large tech giants have invested heavily into cloud computing, with millions of users worldwide. This unit aims to introduce students to the motivating forces, underlying principles, concepts, design, and architectures of modern cloud systems, including examining example systems. Different types of cloud systems, including vehicular clouds, and state-of-the-art developments in cloud computing, namely, fog computing and edge computing, will also be examined. The subject will provide an understanding of cloud systems, not only in the technical aspects but also from the cloud-user perspective.

### Assessment

- Programming projects (20%, 15% and 15%) 50%
- Examination 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 40% of the total allocated mark for the examination.

## SIT323 – Cloud Application Development

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Robert Dew*

*Prerequisite: One of SIT113, SIT131, SIT153, SIT232 or SIT251. From 2020: SIT113 and SIT232*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit complements other units in the cloud major. These focus on designing and building cloud systems. However, students must develop and demonstrate coding skills in order to implement a design of a cloud applications. SIT323 will extend students' skills in implementation so that a given implementation is carried out to professional standards. Concepts on advanced techniques of implementation, validation, searching and optimisation will allow students to acquire skills required to write industrial-strength applications,

### Assessment

Two programming tasks (40%, 60%) 100%.

## SIT340 – Research and Development in Information Technology

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Guangyan Huang*

*Prerequisite: Nil*

*Corequisite: Any two level 2 SIT coded units*

*Incompatible with: Nil*

## Content

Research and development is one of the ways by which businesses forecast and experience future growth within the IT sector. Whether it is Apple developing a new product or Google acquiring a business to expand their operations, investigative opportunities provide businesses with the opportunities and processes to lead and deliver change. While research and development is often through as synonymous with high-tech firms that are on the cutting edge of new technology in developing new products, many established firms invest a large amount of money and effort in improving existing products. Research and development encompasses a set of strategic, proactive, catalytic and capacity-building activities designed to facilitate growth. This unit focuses on the building of knowledge and skills in research and development for Information Technology. In SIT340, students will learn about strategic research advancement activities for example, product review and market review and engage in structured processes such as survey and review of literature to make value judgements and critical evaluation of certain technologies or technology areas for further development. Learning and assessment activities in this unit will aid the student to develop capacity for learning how to research and communicating research and research opportunities for a variety of purpose for example, to report, to publicise, to raise the profile and to add to visibility or impact.

## Assessment

- Literature review 20%
- Research and development report 60%
- Oral presentation 20% (for Cloud (online) students: PowerPoint presentation with voice overlay)

## SIT352 – Creative Production

*Offering information: Available from 2020 (subject to approval)*

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (Online)*

*Credit point(s): 1  
EFTSL value: 0.125*

*Unit chair: Michael Hobbs*

*Prerequisite: 8 SIT Coded Units  
Corequisite: Nil*

## Content

This unit shows students how to work in a creative production environment, with the goal to produce and publish a digital product. Students will learn about multidisciplinary teams that exist within creative technology production, and demonstrate their ability to work in these environments by designing, developing, testing and publishing a digital product for a specific audience. To achieve this, students will learn about the stages of creative production, as applicable to a variety of situations, and engage with digital application publishing processes such as: methods of digital distribution, content ratings, virtual currency and gambling issues, legal and licensing issues and international publishing standards. Underlying creative technology production will be strong consideration of the user experience, with authentic 'play-testing' conducted throughout the teaching period to support quality assurance of any digitally distributed product. Students will have the opportunity to focus assessment tasks on products relevant to their specific course and interests while learning and engaging with the broader field of digital production.

## Assessment

- Skills self-assessment 10%
- Creative production plan and prototype (15%, 15%) 30%
- Digital application production 60%

## SIT353 – Multiplayer and Networked Games

*Offering information: 2019 is the final offering of this unit*

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1  
EFTSL value: 0.125  
Trimester 2 Unit Chair: Michael Hobbs*

*Prerequisite: Must have completed 4 units from the following: SIT102, SIT151, SIT152, SIT153, SIT251, SIT252, SIT253, SIT254, SIT255, SIT352 or SIT354  
Corequisite: Nil  
Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour online seminar per week, 1 x 2 hour on-campus workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online seminar per week.*

## Content

The unit covers the architecture of large-scale multiplayer computer games (MCGs) and investigates the client-server and peer-to-peer patterns. Multiplayer and networked games rely on a number of common communication patterns. Communication patterns used in games and virtual worlds that will be explored include: common networking protocols, node level communication patterns, reliable communication, and flow control. In addition, representation and manipulation of large-scale virtual environments will be explored. Within this benchmarking and support for the social, economic and political structures that form in MCGs is examined. Network architectures for games that include wireless networks and issues of cheating are also considered.

## Assessment

- Networked game design and development challenges 20%
- Multiplayer game design and development project 30%
- Examination 50%

## SIT354 – Real-Time Graphics and Rendering

*Offering information: 2019 is the final offering of this unit*

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Hobbs*

*Prerequisite: One unit from SIT192 or SIT204 and one unit from SIT102 or SIT153*

*Corequisite: Nil*

*Incompatible with: SIT252*

*Scheduled learning activities – campus: 1 x 1 hour online seminar per week, 1 x 2 hour on-campus workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online seminar per week.*

## Content

This unit is for students to further develop their practical skills and knowledge in game programming and their understanding of software architectures for implementing computer games. Building on their knowledge of C++, as well as maths and physics for

games, students study 3D graphics and visualisation techniques, including representation and use of 3D models, lighting, camera systems, animation of 3D models, graphics APIs and data structures for the creation of complex game environments. Upon successful completion of this unit students will be able to program complex visual representations of 3D environments using advanced, industry-relevant 3D graphics programming techniques.

## Assessment

- Problem solving and communication assignment 30%
- Project: interactive application development 20%
- Examination 50%

## SIT361 – Interactive Technology Application

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Somaiyeh MahmoudZadeh*

*Prerequisite: Two SIT coded units (excluding mathematics units coded SIT19-, SIT29-, SIT39-)*

*Corequisite: SIT264 or SIT363*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

## Content

SIT361 introduces students to multimedia compression principles and standards and a number of multimedia processing and analysis methods, including point processing, neighbourhood processing, colour processing and morphological processing. Students will develop hands-on skills in Matlab, a scripting language that will allow them to quickly implement image-processing techniques. Students will have the opportunity to adopt recent technologies into the processing and analysis of digital multimedia. The primary focus of this unit is on improving student understanding of digital multimedia, and developing a range of skills that will enable them to work effectively with digital images.

## Assessment

- Practical tests 10%
- Problem-solving task 40%
- Group task – creative work 30%
- Portfolio 20%

## SIT365 – Human-Computer Interaction

*Enrolment modes: Not available from 2019*

*Credit point(s): 1*

*Previously coded as: SIT263*

*EFTSL value: 0.125*

*Unit chair: Guy Wood-Bradley*

*Prerequisite: SIT162 or SIT120 or at least 4 SIT coded units (excluding mathematics units coded SIT19-, SIT29-, SIT39-)*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

Human-Computer Interaction (HCI) is focused on designing interactions between humans (users) and computational systems. It deals with the issues surrounding the design of interfaces to afford those interactions. However, HCI is more than just the “human” and the “computer” as it encompasses many facets including, interface and interaction design, affordance and usability, ergonomics and psychology.

Building effective user-centred systems requires that developers combine the right content with an interface that meets the needs, expectations and characteristics of the target users. Such interfaces must be built with a clear understanding of the established (and evolving) principles of interface design and usability that form the basis of human-computer interaction (HCI). Interaction and interface design draws on the experiences of designers, current trends in input/output technology, cognitive psychology, human factors (ergonomics) research, guidelines and standards, and on the feedback from evaluating working systems. Usability is the application of ergonomic principles to software and web design and is now accepted as a critical determinant of the success of such systems.

On completion of this unit, students will be able to critically analyse existing interfaces and use Human-Computer Interaction (HCI) principles to evaluate the systems they use. In addition, to have a greater understanding of users in order to determine and analyse their interface needs. Lastly, be able to apply HCI concepts to create, develop and enhance interactions and interfaces for clients.

### Assessment

- Usability guidelines report 15%
- Usability evaluation report 15%
- Interface design prototype (group) 30%
- Examination 40%

## SIT374 – Project Design

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jason Wells*

*Trimester 2 Unit Chair: Dhananjay Thiruvady*

*Trimester 3 Unit Chair: Chathu Ranaweera*

*Prerequisite: Must have completed 15 credit points of study*

*Corequisite: Must be enrolled in S303, S306, S326, S333, S334, S464, D320, D375, D380*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

SIT374 is the first of two capstone units within the undergraduate IT programs at Deakin University. This unit along with SIT302 Project Delivery allows students to culminate academic and intellectual experiences through the design and execution of a real-world industry project. Projects are work activities with a beginning and an end to create a unique product, service or solutions for a defined purpose. In this unit, students will learn prominent project management methodologies, with a particular emphasis on agile project management for the development of IT solutions. Students’ engagement in the process of planning, organising and delineating responsibility for the completion of an organisation’s specific IT goals will enable them to gain hands-on experience in using industry-standard agile toolset for future work.

*Note: Students are expected to undertake SIT374 Project Design and SIT302 Project Delivery in consecutive trimesters. Students should seek advice from the unit chair if they are unable to complete SIT374 and SIT302 consecutively.*

### Assessment

- Project proposal 20%
- Progress demonstration and presentation 40%
- Learning portfolio 20%
- Project handover document 20%

## SIT379 – Ethical Hacking

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Amani Ibrahim*

*Prerequisite: SIT103, SIT182 and SIT202*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hours class per week, 1 x 3 hour workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit introduces ethical hacking and penetration testing techniques to students. Students will be able to solve problems in ethical hacking. That is, students will perform cyber attacks to machines and applications with certain security vulnerabilities. Students will also have opportunity to participate in security challenges and competitions at the national and international levels. Students will be assessed on the basis of their technical capabilities in ethical hacking, their communication skills in speaking and writing, their team-working skills and awareness of ethical and legal constraints.

### Assessment

Learning portfolio 100%.

## SIT382 – System Security

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Frank Jiang*

*Prerequisite: SIT182 and SIT202*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

The key focus of SIT382 is on enabling students to develop practical and working tactics to achieve digital security. In this unit, students will learn the security for operation systems, databases and servers in various aspects including designs, implementations, and configurations in order to apply security measures and principles to protect these systems. Students will explore the framework of cyber security and safety principles and guidelines and the various tools used to enforce security and privacy. The unit will cover mechanisms and prominent techniques to tackle sophisticated attacks. Students will perform guided exploitation attacks in practical sessions to experiment popular practice in hacking.

### Assessment

- Research essay and presentation 20%
- Technical report 30%
- Examination 50%

## SIT383 – Augmented Reality Systems

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shaun Bangay*

*Prerequisite: SIT283 or SIT255*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

### Content

This unit teaches the creation of augmented reality (AR) and mobile virtual reality applications. AR applications allow flexible and novel ways of interacting with the physical world and with other participants in the shared environment. The unit covers the design principles and development processes relevant to the mobile platforms, peripherals and application areas including education, simulation and entertainment that are used for augmented reality solutions.

### Assessment

- Portfolio of AR prototypes 30%
- Project management and implementation 30%
- Project showcase 40%

## SIT384 – Cyber Security Analytics

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shang Gao*

*Prerequisite: SIT103, SIT105 and SIT182*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

In SIT384 students will learn about the various data analytical methodologies used to investigate cyber security problems. In particular, we will focus on processing and analysing data relevant to cyber security systems and applications. You will be introduced to the scripting techniques and solutions required for data analytics in the context of cyber security. Applying appropriate data analytical methods and solving cyber security problems will be a key practical element of this unit.

### Assessment

Learning portfolio 100%.

### Prescribed texts

Müller and Guido, 2017, Introduction to Machine Learning with Python: A Guide for Data Scientists, 1st Ed, O'Reilly Media

## SIT392 – Public-Key Cryptography

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Lynn Batten*

*Prerequisite: SIT281 or SIT292*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

SIT392 extends content of the unit SIT281 Cryptography. In SIT392 students will learn the latest development of attack methods on modern cryptographic systems. Students will work on RSA-based systems that underpin the electronic transactions used in e-commerce, online stores and banks. The unit enables students to apply knowledge of fundamental mathematical calculations to implement modern cryptographic systems. Students will investigate the real-world implementation issues including computational constraints in time and space. The key focus of SIT392 is on enabling students to analyse the mathematical design and structure, and security level of ICT systems that use public key-based ciphers to protect the secrecy and nonrepudiation of communication. Furthermore, students will use the Maple software, which is used for modifying cipher systems.

### Assessment

- Problem solving tasks (10%, 10%, 20%) 40%
- Examination 60%

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 40% in the examination.

## SIT396 – Complex Analysis

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Vicky Mak*

*Prerequisite: Two units chosen from SIT291, SIT292, SIT294*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour online seminar per week, 1 x 2 hour workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online seminar per week.*

### Content

The unit builds on the techniques of applied mathematics developed in level 2 mathematics units and prepares students for continued studies in applied mathematics and investigations of advanced modelling approaches. It explores theory and applications of complex number analysis. The topics covered include complex algebra and functions, analyticity, contour integration, Taylor and Laurent series, Cauchy's integral formula, classification of singularities, conformal mappings and residue theory, as well as applications of residue theory to the evaluation

of real integrals. Complex Analysis provides us with a tool to solve hard definite integrals, and has extensive applications in science (in particular physics), and engineering (e.g., electrical engineering).

## Assessment

- Weekly online quizzes 20%
- Written problem solving tasks part 1 and part 2 (15% each) 30%
- Examination 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 40% of the total marks allocated for the examination.

# SIT399 – Optimization Modelling and Decision Analysis

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Vicky Mak*

*Prerequisite: One unit from SIT291, SIT292, SIT281*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour practical per week.*

*Scheduled learning activities – cloud (online): 2 x 1 hour scheduled online workshop per week.*

## Content

Students taking this unit will have an opportunity to see how decision-making problems in industry, business, and civic services can be solved using modern mathematical modelling and algorithmic techniques. In SIT399, students will learn how to make better decisions through mathematical methods in optimization problems such as: production planning, management and logistics, machine scheduling, robotics/vehicle routing, staff scheduling, network design, and resource allocation. Techniques covered include linear and integer models as well as game theory models.

## Assessment

- Weekly online quizzes (10 x 2%) 20%
- Oral presentation 15%
- Written report 15%
- Examination 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 40% of the total marks allocated for the examination.

# SIT420 – Research Methods and Practices in Information Technology

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Sasan Adibi*

*Cohort rule: This unit is restricted to students enrolled in S470 and S464*

*Prerequisite: S464: Must have completed at least 20 credit points of study.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 5 x 2 hour workshops.*

*Scheduled learning activities – cloud (online): 5 x 2 hour online workshops.*

## Content

Research methods and practices are an essential part of scientific and industry research. This unit provides broad coverage of the issues, concepts, methods, skills and techniques associated with information technology. It introduces students to major research philosophies and paradigms, the principles of research design, research ethics, library and literacy skills, data collection and analysis techniques, academic writing and communication skills. It will also look to explore the role of research in industry and academia and examine pathways from Honours to PhD and into industry. Upon the completion of this unit, students will be prepared to conduct and communicate their own research, be critical interpreters of others' research, as well as be knowledgeable for future research and development careers.

## Assessment

- Research Methodology and Ethics: 30%
- Research Paper and Thesis Critique: 50%
- Research Seminar: 20%

## SIT421 – Advanced Information Technology Coursework

*Enrolment modes: Not available from 2019*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Semester 1 Unit Chair: Sasan Adibi*

*Semester 2 Unit Chair: Jingyu Hou*

*Cohort rule: (This unit is restricted to students enrolled in S325, S470)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## SIT422 – Honours Information Technology Thesis A

*Enrolment modes: Semester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Semester 1 Unit Chair: Jingyu Hou*

*Semester 2 Unit Chair: Jingyu Hou*

*Cohort rule: (This unit is restricted to students enrolled in S325, S470)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## SIT423 – Honours Information Technology Thesis B

*Enrolment modes: Semester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Semester 1 Unit Chair: Jingyu Hou*

*Semester 2 Unit Chair: Jingyu Hou*

*Cohort rule: (This unit is restricted to students enrolled in S325, S470)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## SIT424 – Advanced Topics in Information Technology

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Arkady Zaslavsky*

*Prerequisite: S470: Nil. Other: Must have completed at least 20 credit points of study.*

*Corequisite: S464, S470: Nil. Other: SIT374 or SIT302*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Regular contact with an agreed supervisor, and 5 x 2-hour workshops.*

*Scheduled learning activities – cloud (online): Regular contact with an agreed supervisor, and 5 x 2-hour online workshops.*

### Content

This research unit is for Honours students to explore the up-to-date development of technologies, theories and advanced topics in IT areas. Due to the nature of IT areas, a wide range of exploration activities can be offered to students. Students will be guided by their supervisor to plan, design, and conduct their exploration activities, such as summarizing significant techniques and theories in the prior study to generate new future study/research resources, or reading representative and state-of-the-art research papers or reports that are relevant to their research areas and project. Details of the activities for each student will be determined individually by the student after consultation with the supervisor. Assessment comprises the presentations of the exploration achievements.

### Assessment

- Initial presentation: 20%
- Progress presentation: 30%
- Final report and presentation: 50%

## SIT430 – Honours Research Project A

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Jean-Guy Schneider*

*Trimester 2 Unit Chair: Guy Wood-Bradley*

*Prerequisite: For S464: Must have completed at least 20 credit points of study. For S470: Nil*

*Corequisite: Must be enrolled in S464 or S470*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 7 x 2hr workshops, 1 day for final presentations, and regular contact with academic supervisors. (Delivered concurrently on campus and online).*

*Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Students will attend the oral presentation for this unit on a single scheduled day during the trimester.*

*Scheduled learning activities – cloud (online): 7 x 2hr online workshops, 1 day for final presentations, and regular contact with academic supervisors. (Delivered concurrently on campus and online).*

*Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Students will be strongly encouraged to attend the final presentations for this unit on a single scheduled day during the trimester. Oral presentation could be done on campus, via online communication, or via voice recordings.*

### Content

This unit is a research project unit. Students are required to undertake research on a well-defined area, which may include designing solutions for clear problems identified as part of their project proposal. Students will work with an academic supervisor to formulate a proposal that clearly defines the scope, objectives, justification and methodology for the project and incorporates consideration of any key stakeholder requirements, as well as safety, security, risk and ethical factors. The proposal will allow students an opportunity to obtain advanced theoretical and technical knowledge in their project area during the development of the methodology.

Students will also design and conduct initial project work to demonstrate that the methodology or initial concepts are viable and that project objectives can be met using the proposed project plan. The project proposal and preliminary project work undertaken in this unit will be continued and completed in SIT431 – Honours Research Project B.

### Assessment

Showcase Portfolio 100%.

## SIT431 – Honours Research Project B

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Jean-Guy Schneider*

*Prerequisite: SIT430*

*Corequisite: Must be enrolled in S464 or S470*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 6 x 2hr workshops, 1 day for final presentations, and regular contact with academic supervisors. (Delivered concurrently on campus and online).*

*Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Students will attend the oral presentation for this unit on a single scheduled day during the trimester.*

*Scheduled learning activities – cloud (online): 6 x 2hr online workshops, 1 day for final presentations, and regular contact with academic supervisors. (Delivered concurrently on campus and online).*

*Students are expected to maintain regular contact with their academic supervisor either face-to-face or online. Students will be strongly encouraged to attend the final presentations for this unit on a single scheduled day during the trimester. Oral presentation could be done on campus, via online communication, or via voice recordings.*

## Content

This unit is a research project unit. Students are required implement their research project proposed in SIT430 Honours Research Project A. Students will undertake research on a well-defined area, and develop solutions within an identified scope, to meet defined goals and stakeholder requirements. Students will work with an academic supervisor to plan project milestones, adhering to ethical conduct, design validation and verification protocols as well as taking into consideration safety, security and risk factors. The project implementation/development tasks will enable students to gain advanced theoretical and technical knowledge in their project area.

## Assessment

Showcase Portfolio 100%.

## SIT432 – Developing Secure Internet-Of-Things Applications

*Offering information: Available from 2020  
(subject to approval)*

*Enrolment modes: Trimester 1: Burwood (Melbourne),  
Cloud (online)*

*Credit point(s): 1  
EFTSL value: 0.125  
Unit chair: Mohamed Abdelrazek*

*Prerequisite: SIT311  
Corequisite: Nil  
Incompatible with: Nil*

## Content

This unit introduces students to potential security threats, vulnerabilities and attacks in Internet-of-Things and Robotics systems. Students will use and apply state of the art security analysis tools to pinpoint flaws and bugs in system designs and system implementation. Moreover, they will learn and apply the best security practices and secure patterns when developing their applications.

## Assessment

Learning portfolio 100%.

## SIT490 – Honours Mathematics Research 1

*Enrolment modes: Semester 1: Burwood (Melbourne),  
Waurin Ponds (Geelong)*

*Credit point(s): 2  
EFTSL value: 0.250  
Semester 1 Unit Chair: Julien Ugon  
Cohort rule: (This unit is restricted to students enrolled  
in S400)*

*Prerequisite: Nil  
Corequisite: Nil  
Incompatible with: Nil*

## Content

This unit comprises the research project component of the Bachelor of Science (Mathematical Modelling) Honours course. Students will do an individual research project over 8 months, supervised by one or more academic staff in Mathematics. Students will be involved in the design of the project (including sampling or experimental programs), collection and analyses of quantitative or qualitative information, and the interpretation of the results in the context of relevant literature on the research topic. The project is assessed by two seminars presented to students' peers and a final thesis that presents the results and interpretation of the research. The research project is worth 75% (6 credit points) of your final Honours mark, with the remainder allocated to your two coursework units.

## Assessment

- Thesis 80%
- Two seminars presentations to an audience of peers 20%

## SIT491 – Honours Mathematics Coursework

## SIT701 – Enterprise Network Construction

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Longxiang Gao*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SIT272*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 2 hour practical per week*

### Content

This unit introduces the concepts and technologies used in modern computer networks. Topics studied include number systems and the mathematics of networks, addressing and subnetting in IPv4 and IPv6 networks, VLANs, static and dynamic routing, private networks, and access control lists for providing basic firewall functionality. Students will learn how to construct such networks by undertaking a study of the Cisco Academy CCNA Routing and Switching curriculum and also explore more advanced networking concepts such as converged networking, quality of service, and network design, in the context of solving real world problems.

## Assessment

- Examination 60%
- Two multiple choice tests (5% each) 10%
- Two practical tests (15% each) 30%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must complete all CISCO unit requirements and at least 40% of the available examination marks.

## Prescribed texts

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 2 hour practical per week*

## Content

This unit extends the studies of the prerequisite unit by examining the concepts and technologies used in large scale computer networks. On completion of this unit students will be able to plan, design and configure both local area networks (LANs) and wide area networks (WANs). Topics studied include applying redundancy and load balancing for improved throughput and reliability, securing network devices, wireless networking, routing using dynamic gateways, WAN construction and associated technologies, securing network devices and protocols, and troubleshooting. Students will learn how to construct such networks by undertaking a study of the Cisco Academy CCNA Routing and Switching curriculum and also explore more advanced networking concepts such as virtual private networks, hierarchical network design, and network management in the context of solving real-world problems.

## Assessment

- Examination 60%
- Two multiple choice tests (5% each) 10%
- Two practical tests (15% each) 30%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must complete all CISCO unit requirements and at least 40% of the available examination marks.

Cisco Networking Academy, 2017, Connecting Networks V6 Companion Guide, 1st edition, Pearson Education

# SIT703 – Advanced Digital Forensics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Lei Pan*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

## Content

This unit will allow the student to explore various options available to organisations in investigating problems and attacks on their computer systems. Students will consider a range of computer forensic frameworks and generate their own framework in order to assist organisations with systematically documenting, analysing and solving cyber security issues. In SIT703, students will study exploitation techniques including shellcode, DLL hooking and authentication eavesdrop. They will learn how to use system log files, domain authentication and registry mechanisms to acquire digital evidence. They will identify the existence of rootkits and learn how to prevent attacks. The key focus of SIT703 is on identification, preservation, analysis and presentation of digital evidence related to a misuse or intrusion to an enterprise-level system.

## Assessment

- Technical report 20%
- Case investigation report 20%
- Examination 60%

## SIT704 – Advanced Topics in Digital Security

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jesse Laeuchli*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2-hour face-to-face workshop each week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

## Content

In SIT704 students will learn how digital security control mechanisms are implemented in the cyber space, that is, access control mechanisms, identity management, system security, and the latest safety and security issues of cyberspace. Students will examine contemporary cyber security theories and their applications in the real-world applications and systems. The unit enables student to develop knowledge and skills in prominent threats, vulnerabilities of applications and systems. Students will investigate techniques that mitigates security threats. Students will also explore malware, ransomware and advanced threats.

## Assessment

- Group research report and presentation 20%
- Security testing report 20%
- Examination 60%

## SIT705 – Research Methods for IT

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Sasan Adibi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

SIT705 will introduce students to research design focusing on scholarly or practice-based skills that serves as a foundation for undertaking research. Students will explore a variety of methodologies that are commonly used for scientific, qualitative and quantitative research investigations in a field of IT. They will be required to plan and design research for execution of professional practice or scholarly research projects.

## Assessment

- Expression of interest proposal 20%
- Research design and methodology paper 40%
- Research portfolio 30%
- Three-minute oral presentation 10%

## SIT706 – Cloud Computing Technologies

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Morshed Chowdhury*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

Cloud computing offers a new model for the delivery of IT services to end users by introducing the ability to deliver infrastructure, platforms, and software via the network. This unit explores the technologies, models, benefits and risks of cloud computing. Technologies that will be examined as part of our studies of cloud computing include virtualisation, cloud management systems, storage systems, networking technologies, and public cloud options offered by commercial organisations. Upon completion of the unit students will have a clear understanding of cloud computing, the technologies used in provisioning clouds, the application of cloud computing to solve problems, and the issues that must be considered when deploying cloud technologies in an organisation.

## Assessment

- Group project proposal and presentation 20%
- Group project demonstration and report 20%
- Examination 60%

## Prescribed texts

Erl et al, 2013, Cloud Computing: Concepts Technology & Architecture, 1st Ed, Pearson Education

## SIT707 – Software Quality and Testing

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Niroshinie Fernando*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

Modern software development faces complex and frequently changing requirements. As a result, the quality of the software often suffers, impacting the reliability, security, and reputation of the software product. In this unit we examine the field of software testing including the role of testing throughout the software lifecycle, processes and standards for testing,

and tools and technologies for testing and issue tracking. The role of software testing in the overall process of software quality assurance is also considered.

## Assessment

- Software testing report 1 20%
- Software testing report 2 20%
- Examination 60%

## Prescribed texts

Jorgensen, 2013, Software Testing: A Craftsmans Approach, 4th edition, Auerbach Publications

## SIT708 – Mobile Systems Development

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Henry Larkin*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour practical per week, plus 1 x 1 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

SIT708 focuses on the concepts and skills related to mobile application planning and development. In this unit, students will investigate, design and practice how to understand the requirements in building mobile apps. Students will develop basic and complex mobile applications using open-source tools, as well as debug and derive the meaning of program code. Students will also summarise, articulate and communicate theoretical mobile programming topics. Students will explore how app ideas are conceptualised, commercialised and marketed. Students will gain an understanding of how to analyse mobile apps, mobile User Interface (UI) design, licensing of media, mobile screen handling, touch events, and basic game concepts for mobile devices.

## Assessment

- Professional plan 30%
- Project and presentation 40%
- Portfolio 30%

## SIT709 – Internship – Information Technology

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Keshav Sood*

*Trimester 2 Unit Chair: Vicky Mak*

*Trimester 3 Unit Chair: Keshav Sood*

*Prerequisite: STP710 and Must have successfully completed 8 credit points of study in level 7 SIT-coded units and must be enrolled in S778 Master of Information Technology, S779 Master of Information Technology (Professional), S735 Master of Cyber Security (Professional) or S777 Master of Data Analytics.*

*Corequisite: Nil*

*Incompatible with: STP701*

*Scheduled learning activities – campus: Placement (Internship): Students will be required to complete a minimum of 120 hours (maximum 160 hours) within a relevant, course-related organisation.*

### Content

This unit enables students to complete a placement of 120–160 hours (typically as a 4–6 week unpaid placement or as a 12 week unpaid placement) in an IT-related position. Students will be required to undertake advanced level course-relevant work so as to gain experience as a specialised IT professional and to apply discipline-specific expert level professional skills and knowledge.

*Note: Students must contact their enrolment officer prior to enrolling in this unit in order to meet the pre-selection requirements by emailing [sebe-wil@deakin.edu.au](mailto:sebe-wil@deakin.edu.au).*

Delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.

### Assessment

Each student will be assigned an academic supervisor and an industry supervisor during the placement period, both of whom will contribute to the learning and assessment of the unit. Continuous performance management and the submission of a Placement Portfolio at the conclusion of the placement form the key elements of the assessment for the unit.

The portfolio comprises: professional communication documents (10%), problem-solving and discipline specific evidence of placement goals and outcomes (25%), reflections (45%), and a mid and end-of-placement assessment by the industry supervisor (20%).

## SIT716 – Computer Networks and Security

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Justin Rough*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

### Content

Computer networks are becoming fundamental in modern life, providing a platform for the delivery of health, education, commerce, and entertainment. In recent years, computer networks have progressively replaced other networks such as voice and video, replaced physical media for news and entertainment, and provided the platform for new important applications in the areas of the Internet of Things and Cloud Computing. Unfortunately computer networks are also used by attackers to gain access to confidential information, conduct identity or intellectual property theft, and disable or even take control over remote systems. In SIT716, students will learn how computer networks function, how they are both targeted by and used as a vehicle for conducting security attacks, and how we secure and defend them. Key protocols at each layer of the protocol stack will be reviewed, known security vulnerabilities examined and countermeasures identified and explained, and emerging security issues in computer networking will also be considered. Through practical tasks students will gain experience working with network protocols and learn how security attacks involving network infrastructure can be identified.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

## Assessment

- Bi-weekly reports (5 x 4%) 20%
- Protocol demonstration and report 10%
- Security incident report 10%
- Examination 60%

## SIT717 – Enterprise Business Intelligence

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Assumed Knowledge: Knowledge appropriate to the topic*  
*Trimester 2 Unit Chair: Thanh Thi Nguyen*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

The unit will begin with an introduction to the standard data mining processes such as CRISP-DM, then explain the requirements of business intelligence, in the context of customer relationship management. Methods to be taught in this unit include variants of association rule discovery (for basket analysis); prediction techniques such as inductive inference of decision trees and Bayes models (for market prediction), clustering techniques such as self-organization maps (for market segmentation), but with emphasis on real world applications. A selection of recent real world business intelligence case studies will be incorporated in this unit to illustrate the introduced techniques.

## Assessment

Projects (30%, 50%, 20%) 100%.

## Prescribed texts

Shmueli et al, 2016, Data Mining for Business Analytics, 3rd edition, John Wiley & Sons

## SIT718 – Real World Analytics

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Maia Angelova Turkedjieva*

*Trimester 2 Unit Chair: Ye Zhu*

*Trimester 3 Unit Chair: Thanh Thi Nguyen*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online seminar per fortnight.*

## Content

This unit introduces students to two concepts at the heart of real world analytics: optimisation and multivariate data aggregation. Students will learn how decision-making problems in industry, business, and civic services can be solved using modern modelling and solution techniques. Students will learn how to make better decisions through mathematical methods in optimisation problems such as: production planning, time-tabling management, human resource rostering, sports program scheduling, robotics/vehicle routing, network design, and resource allocation. On the topic of aggregation, students will learn how to apply the concepts of multivariate functions in order to summarise datasets that involve several interrelated variables. They will be able to reasonably analyse datasets by interpreting the parameters associated with commonly used multivariate functions.

*Note: Enrolments after commencement of trimester is subject to Unit Chair approval.*

*This unit uses the FutureLearn online learning platform.*

## Assessment

- Three problem-solving tasks (25%, 30%, 25%) 80%
- Five online quizzes (4% each) 20%

## SIT719 – Security and Privacy Issues in Analytics

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jesse Laeuchli*

*Trimester 2 Unit Chair: Zubair Baig*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2-hour face-to-face workshop each week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

### Content

This unit aims to provide students with the potential privacy and security issues associated with large data sets and the results obtained from analytics on such data. Ethical, regulatory and governance aspects of analytics systems will be covered. Security and its governance have now become key issues for all organisations. In this unit students will learn to examine how organisations and professionals operate securely in the Information Age and understand the importance of developing structures, policies, procedures, processes and controls to protect data and information.

Within this unit students will explore information security risks and different approaches that organisations and even individuals can use to mitigate these risks and implement security plans and processes. You will also examine the role of governance from both a technological and organisational perspective, for example understanding the issue of complying with governance standards and synthesising this knowledge into understanding how policies are developed with governance in mind.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

### Assessment

- Privacy and security issues report 20%
- Technology assessment report 30%
- Examination 50%

## SIT720 – Machine Learning

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Chandan Karmakar*

*Prerequisite: SIT718 or SIT771. For students enrolled in S577: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour scheduled online seminar per fortnight, 1 x 2 hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour of scheduled online seminar per fortnight.*

### Content

Machine learning is an important tool in analytics, where algorithms iteratively learn from data to uncover hidden insights, without being directly programmed on where to find such information. SIT720 will allow students to explore machine-learning techniques such as data representation, unsupervised learning (clustering and factor analysis) methods, supervised learning (linear and non-linear classification) methods, concepts of suitable model complexity for the problem and data at hand. Students will have the opportunity to apply these techniques in solving real-world problem scenarios presented to them in the unit.

*Note: This unit uses the FutureLearn online learning platform.*

### Assessment

- 2 x problem-solving tasks (25% each) 50%
- Project 30%
- 2 x quizzes (10% each) 20%

## SIT725 – Software Engineering

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shamsul Huda*

*Trimester 3 Unit Chair: Shamsul Huda*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit covers advanced approaches of applying software engineering to web application development, including the web application formulation and planning, analysis and design models, relationship between UML models and web application designs, and the web application testing. The unit will also cover other advanced topics and methodologies in software engineering, as well as recent developments.

### Assessment

- Written group analysis report 20%
- Written group design report 20%
- Examination 60%

## SIT735 – Communications Network Security

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Assumed Knowledge: Computer networks*

*Trimester 2 Unit Chair: Adnan Anwar*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

### Content

SIT735 provides students with theoretical knowledge and practical training in information security for application in communication networks. Students will explore concepts and issues pertaining to network security, and examine methods and technologies for securing communications systems using network security standards. Students will assess threat models and vulnerabilities of communication networks and their corresponding defence mechanisms.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

### Assessment

- Online quiz 10%
- Technical report and presentation 30%
- Examination 60%

## SIT737 – Service Oriented Architectures and Technologies

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Assumed Knowledge: Operating systems and computer networks*

*Trimester 1 Unit Chair: Alessio Bonti*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

SIT737 introduces the concepts, mechanisms and applications of service oriented architectures (SOA), and the key focus is to deploy a real-world SOA web service application. This unit defines the notion of “service” in the field of IT and describes various categories of services from which the concept of service oriented architectures are formed. Students will work on case studies involving business strategies and business needs, and then evaluate the feasibility whether the business can be migrated to a service oriented architecture design. Students will also develop and implement a SOA-compliant web service for a particular business.

Students will conduct programming practices in the Microsoft Visual Studio environment. SIT737 also discusses the SOA management issues including the ethical, legal and regulatory implications.

## Assessment

- Case study teamwork report 20%
- Programming project 20%
- Examination 60%

## SIT740 – Research and Development in Information Technology

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jinho Choi*

*Trimester 2 Unit Chair: Sasan Adibi*

*Trimester 3 Unit Chair: Sunil Aryal*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, and 1 x 1-hour face-to-face workshop each week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

## Content

Many different sectors of the economy including health and transportation are being impacted by potentially game-changing IT innovations, fuelled by IT Research and Development. Indeed, IT has pervaded into myriad fields of endeavour, including science, healthcare, humanities, architecture, economics, governance, commerce and everyday life. IT application in different fields has also sparked research and development at the intersection of Computer Science and other fields. This unit will be an introduction to the processes, issues and trends in IT R&D, including case studies in technologies and researching software tools in areas such as Internet of Things, Intelligent Transport Systems, and AI and Robotics.

Students will learn IT R&D methodology and problem-solving processes, from conception to deployed systems and critically examine digital ethics to understand the ethical challenges that IT R&D can raise.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

## Assessment

Learning portfolio 100%.

## SIT741 – Statistical Data Analysis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Trimester 1 Unit Chair: Wei Luo*

*Trimester 2 Unit Chair: Ye Zhu*

*Prerequisite: MIS770 or SIT718. For students enrolled in S577: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

The aim of this unit is to provide students with the opportunity to develop advanced working knowledge in statistical modelling and statistical programming. Students will learn how to apply advanced statistical theories such as generalised additive modelling to model real-world data problems. They will also learn about advanced statistical programming using the R language, to perform simulation, model development, model checking, and result interpretation.

Upon successful completion of this unit, students will be able to apply the right statistical models, including generalised linear models and generalised additive models, to solve problems of real-world complexity. They will know how to use R to transform untidy data to tidy data, to perform exploratory data analysis, to develop and check models, and to communicate the analysis results.

## Assessment

- Problem solving task 1 – 25%
- Problem solving task 2 – 40%
- Quizzes 5%
- Examination 30%

## SIT742 – Modern Data Science

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gang Li*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

In this unit, students will have the opportunity to learn fundamental aspects of data science, modern methods, techniques and applications of data science. Upon successful completion of study, students will be able to use distributed storage and computing platform to process and analyse big data, and use modern techniques in data analytics.

Learning activities in this unit are designed for students to develop knowledge and skills in reviewing tabular data such as relational database, distributed storage and computing platforms with materials on Apache Spark. In learning data analytics, students will use feature selection, data reduction and machine learning methods. Students will also have the opportunity to learn advanced concepts in prediction including linear regression, logistic regression and decision tree classifiers, and to learn frequent pattern discovery using association rule mining algorithms.

### Assessment

- Critical analysis 25%
- Project 40%
- Quizzes 5%
- Examination 30%

## SIT743 – Multivariate and Categorical Data Analysis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sutharshan Rajasegarar*

*Trimester 2 Unit Chair: Sutharshan Rajasegarar*

*Prerequisite: SIT718*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

This unit provides the opportunity for students to equip themselves with a strong background in the analysis of multivariate and categorical data. Students will be able to model, analyse and extract complex patterns from multivariate, correlated datasets and apply their learning in data science, machine learning and data mining tasks.

In this unit, students will be able to apply advanced techniques in machine learning to analyse multivariate and categorical data. Concepts such as probability theory, Bayesian modelling and probabilistic graphical models form the core knowledge of this unit.

### Assessment

- Problem solving task 25%
- Project 40%
- Quizzes 5%
- Examination 30%

## SIT744 – Practical Machine Learning for Data Science

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Wei Luo*

*Trimester 2 Unit Chair: Jianxin Li*

*Prerequisite: SIT720 or SIT742*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

### Content

Machine learning provides core underlying theory and techniques to data science. This unit is for students to develop practical knowledge of machine learning and how they can be used for data analysis tasks. Learning activities will focus on designing machine learning systems, a broad landscape of supervised and unsupervised learning methods, techniques to deal with temporal data and deep learning for data analytics.

Students will have the opportunity to understand and apply machine learning within the context of data science discipline. Concepts such as probability theory, Bayesian and statistical inference, and optimization that form core knowledge in this unit will be introduced. Students will learn about core components of a machine learning system and appropriate learning methods to be used from a practical perspective. Students will also learn about deep learning techniques for data analytics such as neural networks and neural embedding methods which are rapidly used in science and industry.

### Assessment

- Problem solving task 25%
- Project 40%
- Quizzes 5%
- Examination 30%

## SIT750 – Mastery of Information Technology

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Nick Patterson*

*Trimester 2 Unit Chair: Adnan Anwar*

*Trimester 3 Unit Chair: Elicia Lanham*

*Prerequisite: Must be enrolled in the Master of Professional Practice (Information Technology) S789 and must have completed SIT740, SIT752 and all credentials.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Students are expected to attend regular meetings with their academic supervisor (either in person or via the cloud).*

### Content

Students will be required to engage in dissemination of professional skills and abilities integrating knowledge and experience from the workplace with a view to contribute to and advance trends and practices in a field of IT. This unit is designed for the student to demonstrate mastery in theorising practice through a publication as described below.

The student will be required to write a draft paper ready for publication in a journal, conference or for a technical audience in the IT discipline.

In order to judge the holistic vision of the student, there will be a requirement for a presentation to the supervisor and/or panel.

*Note: This unit uses the FutureLearn online learning platform.*

### Assessment

- Research proposal 25%
- Professional paper (for journal, conference or technical audience) 50%
- Poster presentation 25%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% of the available marks in the professional paper.

## SIT752 – Introduction to IT Professional Practice

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Hobbs*

*Trimester 2 Unit Chair: Nick Patterson*

*Trimester 3 Unit Chair: Marek Gagolewski*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in S789, S689 or S589*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online seminar per fortnight.*

### Content

Not only are employers seeking IT graduates with good technical knowledge, they are also demanding that they have well-developed professional skills. Even though you may have been working in the industry for a number of years, professional skills are a living skill, requiring ongoing improvement. SIT752 is designed for students who have experience working in industry for some time but need further development in evidencing professional skills. Students will identify professional skills that they have developed through their work activities in the field of IT and explore what constitutes evidence and how to document evidence for credentialing purposes.

*Note: This unit uses the FutureLearn online learning platform.*

### Assessment

- Reflective report 40%
- Professional portfolio 60%

### Prescribed texts

Cottrell, 2015, *Skills for Success*, 3rd Ed, Palgrave, Basingstoke, United Kingdom. This book is available electronically via the Deakin Library.

## SIT755 – Interaction and Design for Virtual Reality and Augmented Reality

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Guy Wood-Bradley*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

### Content

This unit explores the design principles used in creating effective virtual and augmented reality applications. Virtual reality (VR) and augmented reality (AR) systems along with their areas of application (e.g., interactive educational experience, serious games, and immersive environments) are presented and analysed to form a foundation of basic design principles. The unit also provides a way to understand the interactive and cognitive functions of VR and AR systems and how these functions influence the design of assets for VR/AR systems.

### Assessment

- Investigative report 20%
- Analysis and design project 30%
- VR/AR portfolio 20%
- Examination 30%

## SIT756 – Development for Virtual Reality

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Thuong Hoang*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

## Content

This unit provides a comprehensive introduction to the development processes specific to the creation of effective virtual and augmented reality applications for a range of platforms. Programming concepts and techniques appropriate to the creation of elements of virtual environments are taught using industry standard development facilities. Data types and manipulation patterns appropriate to the representation of virtual spaces allow students to solve typical problems including those related to responding to user actions, incorporating physical interactions between virtual objects and presenting the virtual world using computer graphics and other forms of output.

## Assessment

- VR problem solving 50%
- Report on VR development challenge 25%
- Examination 25%

## SIT757 – Content Creation for Virtual Reality

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Shiva Pokhrel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

## Content

This unit explores the content creation process used in creating effective virtual and augmented reality content for Virtual reality (VR) and augmented reality (AR) applications. The tools and platforms used to design and develop content are presented to provide a practical grounding in VR and AR application design and development. This unit also provides a way to apply the interactive and cognitive functions of VR and AR systems to the design and development of assets for these systems.

## Assessment

- Portfolio 60%
- Online test (multiple choice and short answer questions) 30%
- Oral presentation 10%

## SIT758 – Virtual Reality On Mobile Platforms

*Enrolment modes: Trimester 1: Burwood (Melbourne), Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Shaun Bangay*

*Trimester 2 Unit Chair: Shaun Bangay*

*Prerequisite: Nil*

*Corequisite: SIT756*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour practical per week.*

## Content

This unit teaches the creation of mobile virtual reality (VR) and augmented reality (AR) applications. Mobility offers significant advantages particularly for AR applications by allowing flexible and novel ways of interacting with the physical world and with other participants in the shared environment. The unit explores design principles and development processes that exploit mobile platforms and peripherals to create VR and AR applications suitable for a range of different purposes, including education, simulation and entertainment.

## Assessment

- Case study 20%
- Mobile information processing prototypes 30%
- Training manual 20%
- Analysis and application of training manual 30%

## SIT759 – Virtual Reality Professional Practice

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 2 Unit Chair: Shaun Bangay*

*Trimester 3 Unit Chair: Hasan Ferdous*

*Prerequisite: STP710 and must have completed SIT755, SIT756, SIT757 and SIT758*

*Corequisite: Must be enrolled in S679, S778, S779*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Placement: Approximately 450 hours working in industry.*

## Content

Integrating study and work experience in a systematic way is essential for forging close links between the university education process and the workplace. In SIT759 students will have the opportunity to apply skills developed during previous VR and AR units, and gain professional work experience in the Virtual Reality (VR) and Augmented Reality (AR) disciplines in collaboration with an approved industry partner. The exact nature, activities and emphasis in each industry placement will vary according to the context, resources and expertise of staff as well as the experience and capabilities of the student, though commonly the student will be engaged in VR/AR-related projects. This systematic opportunity will provide students with experiences during which they can develop and demonstrate autonomy, well-developed judgement, adaptability and responsibility. Concurrently they can learn about and with an organisation, critically reflect on their professional development with respect to Course and Graduate Learning Outcomes, and discipline-specific and generic competencies in the context of VR/AR application and content development.

## Assessment

- Project pitch 10%
- Written progress reports 25%
- Reflective performance evaluation 20%
- Professional portfolio 25%
- Presentation and defence 20%

## SIT763 – Cyber Security Management

### Enrolment modes:

*Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Assumed Knowledge: Basic operating system concepts and computer networks*

*Trimester 1 Unit Chair: Matthew Warren*

*Trimester 3 Unit Chair: Rolando Trujillo Rasua*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

## Content

The key focus of SIT763 is on introducing students to IT security policy development and human security management. Students will learn how security assessment is methodologically and procedurally conducted within business operational constraints. The unit enables students to develop contingency planning, risk assessment, risk management and compliance standards for various businesses. Students will also explore legal and ethical issues in the context of security management and audit.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

## Assessment

- Problem solving task 1 10%
- Problem solving task 2 10%
- Group case investigation report 20%
- Examination 60%

## SIT764 – Project Analysis and Design

### Enrolment modes:

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Assumed Knowledge: General principles of information technology*

*Trimester 1 Unit Chair: Alessio Bonti*

*Trimester 2 Unit Chair: Jean-Guy Schneider*

*Trimester 3 Unit Chair: Chandan Karmakar*

*Prerequisite: Must have completed 3 level 7 SIT-coded units*

*Corequisite: Must be enrolled in S777, S778, S779, S735, S734*

*Incompatible with: MIS798*

*Scheduled learning activities – campus: 1 x 2 hour scheduled workshop per week (from week 1 to week 5).*

*Scheduled learning activities – cloud (online): 1 x 2 hour scheduled online workshop per week (from week 1 to week 5).*

## Content

SIT764 covers project analysis, design and management methodologies, including agile and lean methodologies, in the context of building IT solutions. Students will work on a team based project where they will learn team work, applying project management techniques and

developing a working prototype to a given real world problem. Students will develop hands-on experience in using industry-standard agile toolsets to analyse requirements, plan projects, design solutions, execute sprints, monitor project progress and productivity, and reflect on sprint and project outcomes.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

## Assessment

Learning portfolio 100%.

# SIT771 – Object-Oriented Development

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Thanh Nguyen*

*Trimester 2 Unit Chair: Mengmeng Ge*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2-hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

## Content

In this unit students learn to construct computer programs using iterative development processes and object oriented analysis, design, and programming techniques. The unit assumes no prior knowledge and introduces students to fundamental programming principles, programming abstractions, control mechanisms, and how these operate within the computer. Students learn to build programs that use objects and classes, variables, methods, parameters, types, libraries, control flow, and associated statements. In addition to these fundamentals, students also learn to apply the object-oriented principles of abstraction, encapsulation, inheritance and polymorphism to analyse, design, and implement object oriented programs. This includes use of programming language libraries and features that support these principles.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

## Assessment

Learning portfolio 100%.

# SIT772 – Database and Information Retrieval

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jianxin Li*

*Trimester 2 Unit Chair: Jianxin Li*

*Trimester 3 Unit Chair: Zubair Baig*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2-hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

## Content

The unit will cover two important foundational but related methods for capturing, representing, storing, organising, and retrieving structured, unstructured or loosely structured information. Firstly, the unit will focus on the fundamentals of data modelling and database technology. The relational data model will be investigated and the process of constructing database tables and related entities will be explored in depth. The second focus of the unit is information retrieval: the process of indexing and retrieving text documents. As a critical aspect of Web search engines, the field of Information Retrieval includes almost any type of unstructured or semi-structured data. Students will explore how search engines work, why they are successful, and to some degree how they fail.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

## Assessment

- Report 30%
- Problem solving task 30%
- Examination 40%

## SIT773 – Software Requirements Analysis and Modelling

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Guangyan Huang*

*Trimester 2 Unit Chair: Duc Thanh Nguyen*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2-hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

### Content

The aim of this unit is to develop students' skill and provide training essential for information systems development through the application of methodologies, techniques and professional practices of system analysis. Students will study a set of core and contemporary concepts, principles and development approaches of system analysis. Students will also apply those on real world requirement analysis and system modelling activities by using emerging industry standard Computer Aided Software Engineering (CASE) tools and practices. Students will be able to incorporate and apply knowledge, skills and professional practices attained in this unit to substantial real world information system development projects in workplaces. Hands on experience (HOE) achieved in this unit will help students to apply and become an effective system analyst in business organizations. Completion of this unit will also help students to continue further study on advanced units of systems analysis and design.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

### Assessment

Learning portfolio 100%

## SIT774 – Web Technologies and Development

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jingyu Hou*

*Trimester 2 Unit Chair: Jingyu Hou*

*Prerequisite: Nil*

*Corequisite: SIT771 and SIT772*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2-hour face-to-face workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per fortnight.*

### Content

Web technologies and the development of web applications are an integral part of the way contemporary applications are built. This unit is a part of the foundation units in the postgraduate Information Technology courses at Deakin, in which students will learn to develop web applications using latest technologies. Learning experiences in this unit will help students understand how web applications work and will give students the opportunity to conceptualise and implement web related solutions for a range of scenarios. The solutions student develop in this unit will take into account client and server side programming requirements and appropriate techniques. Students will build on learning from the associated programming and database units by learning how to use client and server side programming language to create small data driven web applications.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

### Assessment

Learning portfolio 100%.

## SIT775 – IT Services in Organisations

*Enrolment modes: Not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Matthew Warren*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

In this unit students will study the role of IT services in organisations, and current strategic IT issues. The unit explores strategic management and planning for information technology, competitive advantage, information management, and critical success factors and information resource planning. Professional and ethical issues directly related to the topic are addressed during the unit study. In addition, IT consultancy skills will be developed. These topics will be studied with the use of case studies with some online resources.

### Assessment

- Examination 60%
- Two assignments (20% each) 40%

### Content

SIT780 explores internet technologies for enterprise applications development such as, the use of XML schemas including DTD and XSD in creating XML documents, models of distributed computing in the high-level design of enterprise applications, XML web services which is a significant paradigm in distributed computing and the role of open standards, such as SOAP and WSDL, for the development of web services. Methods for the publishing and consuming of web services in B2B systems are also explored. In addition, there will be a major focus on server-side technologies such as PHP, J2EE and .net with an emphasis on components development. Security issues in enterprise applications will also be identified. On completion of this unit, students will be able to identify key aspects of enterprise applications and gain practical experience in the use of technologies for the design and development of effective enterprise applications.

On completion of this unit, students will be able to identify key aspects of esystems and gain practical experience in the use of technologies for the design and development of effective esystems.

### Assessment

- Group research report 20%
- Website project 40%
- Examination 40%

## SIT780 – Enterprise Applications Development

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Assumed Knowledge: Computer networks, principles of system analysis and design*

*Trimester 1 Unit Chair: Atul Sajjanhar*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## SIT782 – Project Delivery

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Assumed Knowledge: General principles of project management and knowledge appropriate to the chosen topic*

*Trimester 1 Unit Chair: Mohamed Abdelrazek*

*Trimester 2 Unit Chair: Dhananjay Thiruvady*

*Trimester 3 Unit Chair: Jan Carlo Barca*

*Prerequisite: SIT764*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour scheduled workshop per week (from week 1 to week 5), 1 x 1 hour online seminar per fortnight.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week (from week 1 to week 5), 1 x 1 hour online seminar per fortnight.*

## Content

SIT782 is a capstone unit that will draw on the area of the student's study and continue directly from SIT764 which allows the students to demonstrate the synthesis of knowledge, methodologies and professional skills acquired during their study of IT. Skills will include communication and teamwork skills, implementation techniques, system testing and quality control, writing skills and project management skills. The outcome of the project could be a software artefact in the case of a computer science and software development project, a model in the case of a security project, or a multimedia package in the case of an interactive media project for example, though multi-disciplinary teams and projects are also encouraged.

Students will have the opportunity to learn how to formulate and implement a project. Students will identify a potential problem or technical gap and experience how to solve it using methods, algorithms and techniques pertinent to the field of IT. Students will be required to further formulate necessary design and/or development strategies, work collaboratively with peers to manage and conduct the implementation of the project and demonstrate outcomes achieved against project goals and targets.

*Note: The Cloud Campus offering of this unit uses the FutureLearn online learning platform.*

## Assessment

Learning portfolio 100%.

## SIT787 – Mathematics for Artificial Intelligence

*Offering information: Offered from 2020  
(Subject to final approval)*

*Enrolment modes:*

*Trimester 1: Waurin Ponds (Geelong), Cloud (online)*

*Trimester 2: Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Asef Nazari*

*Trimester 2 Unit Chair: Asef Nazari*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 1 x 1 hour workshop per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week*

## Content

This unit provides the fundamental mathematical and statistical knowledge to understand important concepts in Artificial Intelligence (AI) and Data Science (DS). The contents of the unit are selected carefully to cover the most frequent mathematical and statistical tools and techniques to help students easily learn technical topics in AI and DS, enabling students to obtain enough experience to expand their knowledge into new directions if required. The unit builds a strong bridge between simple and core mathematical and statistical concepts and advanced techniques that are used in developing modern algorithms in AI and DS.

## Assessment

- Examination 60%
- Three problem solving tasks (10%, 15%, 15%) 40%

To be eligible to obtain a pass in this unit, students must achieve a mark of at least 50% in the examination.

## SIT788 – Engineering AI Solutions

*Offering information: Offered from 2020  
(Subject to final approval)*

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: TBC*

*Prerequisite: SIT771 and SIT773*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour workshop per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week*

## Content

AI is changing the world we live in and every new technology advance is based on the advances of machine learning. In this unit you will go beyond the algorithms and learn how to build, develop and deploy AI solutions. A core characteristic of AI is understanding how it differs from traditional software projects and the different tasks that are required throughout the software development lifecycle. Due to the inherently probabilistic nature of AI Solutions, practitioners need new tools and approaches to assist them in building robust solutions. In this unit you will learn how to manage challenges that arise when building AI Solutions and gain a deep understanding of how to overcome these challenges. Throughout the

course you will learn how to plan for and design the core elements of an AI Solution and guided through the development from concept all the way through to a deployable artefact. These skills will prepare you for the workforce ensuring that you have a strong vocabulary for communicating efficiently with project stakeholders including research engineers, software engineers and project managers. At the conclusion of this unit you will be equipped to make strong contributions to the development of new AI technologies.

## Assessment

Learning portfolio 100%.

## SIT789 – Applications of Computer Vision and Speech Processing

*Offering information: Offered from 2020  
(Subject to final approval)*

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong),  
Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Antonio Robles-Kelly*

*Prerequisite: SIT771, SIT787*

*Corequisite: Nil*

*Incompatible with: SIT720*

*Scheduled learning activities – campus: 1 x 2 hour class  
per week, 1 x 2 hour seminar/workshop per week*

*Scheduled learning activities – cloud (online): 1 x 1 hour  
scheduled online workshop per week*

## Content

Computer Vision and Speech Processing are fields of Artificial Intelligence that look to extract information from images, videos, and audio to better help computers interact with the real world. In this unit you will explore the application of computer vision and speech processing algorithms to solve real world problems. You will draw upon current research and state of the art tools to propose and develop novel solutions involving computer vision and speech processing.

## Assessment

Learning portfolio 100%.

## Prescribed texts

There is no prescribed textbook for this unit.

## SIT790 – Major Thesis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Trimester 3: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 1 Unit Chair: Jingyu Hou*

*Trimester 2 Unit Chair: Jingyu Hou*

*Trimester 3 Unit Chair: Sunil Aryal*

*Prerequisite: Must have successfully completed 8 credit points of study in level 7 SIT-coded units and must be enrolled in S779 Master of Information Technology (Professional), S735 Master of Cyber Security (Professional) or S777 Master of Data Analytics with a minimum 70% average.*

*Corequisite: Nil*

*Incompatible with: SIT791, SIT792 and SIT793*

*Scheduled learning activities – campus: Students are expected to participate in regular weekly or fortnightly meetings as agreed with their thesis supervisor.*

*Scheduled learning activities – cloud (online): Students are expected to participate in regular consultation sessions as agreed with their thesis supervisor.*

## Content

Research and development skills and abilities are highly in-demand in the IT industry. In SIT790, students will have the opportunity to embark on a research or practice project and develop skills and abilities for informed evidence-based practice. Through research training and mentoring, the unit offers students the opportunity to find and generate information/data, and to use appropriate tools and technologies. Students will learn how to evaluate scholarship and/or practice, gain the confidence to prepare publications and develop skills to become independent researchers. The unit provides scope for further research and higher degree study or professional practice.

*Note: Note also that delays in completing the thesis could mean that the course will take longer to complete than the stated duration.*

## Assessment

- Project proposal 15%
- Three-minute oral presentation 10%
- Literature synthesis 20%
- Thesis 45%
- Poster presentation 10%

## SIT791 – Professional Practice

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne)*

*Trimester 2: Burwood (Melbourne)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 1 Unit Chair: Sergiy Shelyag*

*Trimester 2 Unit Chair: Kerri Morgan*

*Trimester 3 Unit Chair: Arash Shaghaghi*

*Prerequisite: STP710. Must have successfully completed 8 credit points of study in level 7 SIT-coded units and must be enrolled in S779 Master of Information Technology (Professional), S735 Master of Cyber Security (Professional) or S777 Master of Data Analytics with a minimum 70% average.*

*Corequisite: Nil*

*Incompatible with: SIT790, SIT792 and SIT793*

*Scheduled learning activities – campus: Approximately 480 hours working in industry. Students are expected to attend meetings with their internship supervisor and the academic supervisor.*

### Content

Integrating study and work experience in a systematic way is essential for forging close links between the university education process and the workplace. In SIT791, students will have the opportunity to gain professional work experience with an approved host organisation. The exact nature, activities and emphasis in each industry placement will vary according to the context, resources and expertise of staff as well as the experience, qualities and aspirations of the student. This systematic opportunity will provide students with experiences with which they can learn about and with an organisation, critically reflect on their Course and Graduate Learning Outcomes, and discipline-specific and generic competencies in the context of work. There are many benefits to students and employers from undertaking relevant work placements / industry placements during study. The key benefit is that it prepares students for work. Learning and assessment activities in this unit will help students develop an appreciation for work-life and make decisions about personal and professional development. Most importantly, it will provide students relevant evidence when applying for future work.

*Note: Students must contact their enrolment officer prior to enrolling in this unit in order to meet the pre-selection requirements by emailing [sebe-wil@deakin.edu.au](mailto:sebe-wil@deakin.edu.au).*

*To be eligible to study this unit, students must participate and succeed in the interview process for securing a placement position.*

*Note also that delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

### Assessment

- 'Me in a minute' recording 5%
- Formal learning contract 25%
- Performance evaluation 20%
- Professional portfolio 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must:

- achieve at least 50% of the total mark allocated for the professional portfolio assessment task; and
- demonstrate that they are working to the satisfaction of the host organisation (including skill competency levels, professional code of conduct and project output requirements) at both the mid and end of placement phases.

## SIT792 – Minor Thesis

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Cloud (online)*

*Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Jingyu Hou*

*Trimester 2 Unit Chair: Jingyu Hou*

*Prerequisite: Must have successfully completed 8 credit points of study in level 7 SIT/MIS-coded units and must be enrolled in S779 Master of Information Technology (Professional), S735 Master of Cyber Security (Professional) or S777 Master of Data Analytics.*

*Corequisite: Nil*

*Incompatible with: SIT790, SIT791*

*Scheduled learning activities – campus: Students are expected to participate in regular meetings as agreed with their thesis supervisor.*

*Scheduled learning activities – cloud (online): Students are expected to participate in regular consultation sessions as agreed with their thesis supervisor.*

## Content

The IT industry appreciates and demands graduates who have competence in conducting research and development, which differentiates an expert from a group of practitioners. Consequently, many research and development expert-led projects impact people's lives and the modern living styles. Furthermore, scholarly calibrated research projects bridge the gap between latest results published by field experts and inadequate practice of the reality. The benefits of carrying out these Master research projects include accelerating the deployment and the use of latest IT inventions, disseminating results and outcomes to peers, contributing to the body of knowledge, and transforming knowledge into practices.

*Note: Delays in completing the thesis could mean that the course will take longer to complete than the stated duration.*

## Assessment

- Project proposal 15%
- Three-minute oral presentation 10%
- Literature synthesis 20%
- Thesis 45%
- Poster presentation 10%

## SIT794 – Services Management

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sasan Adibi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour practical per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

The growth and globalisation of services requires a rethink of services management strategies. This unit is the cornerstone unit of the IT Services specialism and introduces an inter-disciplinary approach to services management and the development of the critical skills required to succeed in a services-led economy. Students will develop an understanding of the “science” of services with topics addressed including, the role

of services in the economy, the nature of services and the service strategy. The design and management of service enterprises and service operations are covered with particular emphasis on the role of technology in services and service entrepreneurship. In addition, capacity planning and queuing models and the management of capacity, demand and waiting lines will be discussed. This unit aims to bring together ongoing work in computer science, operations research, business strategy, management sciences and social and cognitive sciences and will include detailed case studies and relevant theoretical perspectives including the latest developments in services science.

## Assessment

- Project 50%
- Examination 50%

## Prescribed texts

Fitzsimmons, 2013, Services Management: Operations Strategy & Operations, 8th edition, McGraw Hill

## SLE010 – Laboratory and Fieldwork Safety Induction Program

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Waurn Ponds (Geelong)*

*Trimester 2: Burwood (Melbourne), Warrnambool, Waurn Ponds (Geelong)*

*Trimester 3: Burwood (Melbourne), Warrnambool, Waurn Ponds (Geelong)\**

*Credit point(s): 0*

*Previously coded as: SBS010*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Steve Cheung*

*Trimester 2 Unit Chair: Jillian Healy*

*Trimester 3 Unit Chair: Kieran Lim*

*Cohort rule: SLE010 Laboratory and Fieldwork Safety Induction Program is a co-requisite for all SLE-coded units, except units without fieldwork or laboratory component(s). Trimester 3 enrolments are restricted to students enrolled in Trimester 3 SLE-coded units with fieldwork or laboratory component(s).*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 compulsory 50-minute safety training session conducted at the beginning of trimester.*

## Content

In SLE010, students will develop an awareness of safety measures and protocols to be followed in scientific laboratory work and fieldwork. The unit encompasses information about biological and chemical hazards, building evacuation procedures, laboratory accident management, first aid procedures and safety work procedures. Attendance in all practical classes and/or field trips may be restricted unless you have passed the online quiz with a mark of 70% or greater. Results for all units requiring the completion of SLE010 as a co-requisite may not be released until the quiz is passed and unit is completed.

*Note: \* Students are strongly advised to complete SLE010 in Trimester 1. For Warrnambool, there is generally only one training session in Week 1 of trimester. For the Burwood (Melbourne) and Waurn Ponds (Geelong), multiple Trimester 1 sessions are held during Orientation Week. See the Orientation Week program or the Faculty of Science, Engineering and Built Environment Safety Induction Program website for more details. Trimester 3 enrolments are restricted, please contact your course advisor.*

## Assessment

Online multiple-choice test 100%.

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a minimum mark of 70%. Multiple attempts of the on-line assessment are permitted.

## SLE101 – Techniques in Environmental Science

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mark Warne*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: SQB122 and SQE131*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 1 x 3 hour practical per week*

## Content

This unit emphasises skills for the collection of environmental data in the field. Field skills developed will include animal and/or plant identification and the use of keys, field survey and monitoring methods, and

quantitative assessment techniques. Methods for the analysis of environmental data, interpretation and presentation will also be covered. Newer techniques such as global positioning systems (GPS), geographic information systems (GIS) and remote sensing will be discussed.

## Assessment

- Practical reports (4x 10%) 40%
- Group work (report 20%, presentation 10%) 30%
- Examination 30%

## SLE102 – Physical Geography

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQA102*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mark Warne*

*Campus contact: Mark Warne (B), Nick Porch (G)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 4 x 2 hour practicals per trimester.*

## Content

This unit will examine interactions between the major components of planet Earth – the geosphere, hydrosphere, biosphere and atmosphere. A particular emphasis is placed on the study of natural disasters and extreme natural events. Major topics will include the formation and subsequent evolution of the earth; plate tectonics; soils, weathering and erosion; the hydrological cycle – including interactions between oceans, rivers, groundwater and polar ice; Earth weather. Minor topics will include studies in the origin of the universe and solar system; the relationship between earth landforms and climate, global environmental change and the earth's energy and mineral resources.

## Assessment

- Two class tests (30% each) 60%
- Two online practical quizzes (10% each) 20%
- Essay 20%

## Prescribed texts

Skinner, 2011, Blue Planet – Binder Ready Version, 3rd edition, John Wiley & Sons

## SLE103 – Ecology and the Environment

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Warrnambool Ponds (Geelong)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQA101*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tricia Wevill*

*Trimester 3 Unit Chair: Bill Borrie*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Trimester 1: 2 x 1 hour class per week, 5 x 2 hour seminars per trimester.*

*Trimester 3: Burwood (Melbourne) students are required to attend intensive study blocks (4 days of 3 hour seminars held each week for a three-week period, beginning the first week of Trimester 3)*

### Content

SLE103 introduces students to the science of ecology, investigating relationships between organisms and the environment. In this unit, students will also explore climate change and energy issues. They will learn about the nature of science and the scientific method and how to use a systems framework to investigate environmental issues. This will equip students with the capacity to study key environmental issues such as climate systems and ecological systems and make a difference.

### Assessment

- Group poster presentation 15%
- Online multiple choice test 20%
- Written report 25%
- Examination 40%

### Prescribed texts

SLE103 Custom Publication, 2018, Ecology and the Environment Custom Publication (5th Ed) OR 2014, SLE103 Ecology and the Environment Custom Publication (4th Ed), McGraw Hill, North Ryde, NSW.

## SLE104 – The Blue Planet: Water and Life

*Enrolment modes:*

*Trimester 2: Warrnambool*

*Trimester 3: Warrnambool Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQP101*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Alex Rattray*

*Trimester 3 Unit Chair: Craig Sherman*

*Prerequisite: Nil*

*Corequisite: SLE010 and must be enrolled in S399*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Trimester 2 (Warrnambool): Students will be expected to engage in 2 x 1 hour class per week, 4 x 1.5 hour seminar per trimester, 4 x 3 hour practical (or fieldwork equivalent) per trimester.*

*Trimester 3 (Warrnambool Ponds (Geelong)): 6 week intensive run at the Warrnambool Ponds (Geelong) campus. Students will be expected to attend a 5 day field trip based at Queenscliff in week 2, and 6 hours of seminars in weeks 1 and 3.*

### Content

In SLE104 students will explore the distribution of water on earth; the physical structure of the world's oceans and processes governing ocean currents, waves and tides; the nature of light and sound propagation in water, the ecological importance of these energy forms. Students will learn various techniques to survey the marine environment; density, viscosity buoyancy and stratification; weather, oceans and climate; coastal processes of erosion and marine deposition. Hydrological physical and chemical processes are explored in various aquatic environments, through which students will gain appropriate skills in aquatic science field and laboratory measurement techniques to connect theory with practice.

### Assessment

- Literature review 25%
- Scientific report 35%
- Examination 40%

### Prescribed texts

Trujillo & Thurman, 2013, Essentials of Oceanography, 11 PNIE, Pearson Education

## SLE105 – Marine Pollution

*Enrolment modes: Trimester 2: Warrnambool, Warrnambool Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQP105*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Patricia Corbett*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 1 x 3 hour field trip*

### Content

SLE105 introduces students to the nature of physical, chemical and biological pollution in today's industrialised and industrialising world. Students will investigate the global nature of pollution, its sources, transport and ecological effects. Learning and assessment activities in this unit provide students the opportunity to explore and examine the sources, activity and potential impacts of the major forms of pollution. The unit will be delivered in three self-contained modules: Transport and behaviour explores the basic models of pollution, classification of hazardous substances, physical processes of pollution transport and dispersal in air, water and in soil, and an introduction to aquatic toxicology. Organic pollutants introduces students to the nature, sources, and aquatic ecosystem effects of organic pollutants, including naturally occurring organic contamination. Inorganic pollutants discusses the nature, sources and aquatic ecosystem effects of inorganic pollutants, including metallic pollutants, radionuclides and other inorganic pollutants. Students are expected to research available information from the scientific literature, and review and analyse the evidence to identify and differentiate between contamination and pollution at the local and global scales.

### Assessment

- 3 x in-class tests (20% each) 60%
- Literature review 15%
- Scientific essay 25%

### Prescribed texts

Laws, Edward A., (2017), *Aquatic Pollution: An Introductory Text*, 4th Edition, John Wiley & Sons, New York (eBook available)

## SLE107 – Marine Environments

*Offering information: Offered from 2020 (subject to approval)*

*Enrolment modes: Trimester 1: Warrnambool Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Prue Francis*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 5 x 1 hour seminar per trimester, 1-day fieldtrip at the Queenscliff Marine Research Centre.*

### Content

This unit will provide foundations in marine biodiversity in a range of ecosystems with a particular focus on temperate environments. Students will gain an understanding of the biota found in many marine habitats (e.g. sandy beaches, rocky shores, Open Ocean, kelp forests), how the organisms interact with their physical environment and discover the natural and anthropogenic threats to marine biodiversity in these habitats. Students will obtain work-integrated learning skills from a hands-on fieldtrip on a marine vessel; where students will investigate the local biota of Port Phillip Bay. This unit will also provide students the opportunity to build their employability skills by interacting with industry guest speakers and implementing a career plan.

### Assessment

- Two online quizzes (10% each) 20%
- Fieldwork report 40%
- Group video assignment 40%

## SLE108 – Ocean Processes

*Offering information: Offered from 2020  
(subject to approval)*

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Prue Francis*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 1 hour seminar per week, 3 x 3 hour practicals per trimester, 2 x 1-day fieldtrips at the Queenscliff Marine Research Centre.*

### Content

In this unit, students will learn about the physical and chemical process of oceans and coasts. This includes an understanding of the distribution and key characteristics of the world's major oceans and seas. Other fundamental topics covered in this unit include the physico-chemical environment (e.g. electrical conductivity, buoyancy, viscosity, mixing processes and stratification), geomorphology, generation of tides, currents and waves and the importance of environmental gradients (e.g. changes in light and pressure with depth and changes in salinity along an estuarine gradient). The importance of these fundamental topics and concepts are then related to the biology and ecology of marine biota. Examples include an understanding of conditions that lead to the perfect wave, relationship between electrical conductivity of seawater and propagation of electricity generated by electric eels and rays and the propagation of sound in water and its applications for SONAR and communication among marine animals.

### Assessment

- Two scientific reports (30%, 50%) 80%
- Practical test 20%

### Prescribed texts

Trujillo & Thurman, 2014, Essentials of Oceanography, 11th Ed, 11 PNIE, Pearson Education.

## SLE111 – Cells and Genes

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Waurin Ponds (Geelong)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SBB111*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jillian Healy*

*Trimester 3 Unit Chair: Jillian Healy*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Trimester 1: 3 x 1 hour class per week, 5 x 3 hour practicals per trimester.*

*Trimester 3 (Intensive): Taught in intensive blocks at the Burwood (Melbourne) campus. 2–3 x 2 hour class per week, 5 x 3 hour practicals per trimester.*

### Content

In this unit, students will be able to study the characteristics of life that are fundamental for every field in biology. Upon successful completion of Cells and Genes, students will be able to explore, examine and describe the characteristics of prokaryotic and eukaryotic cells and their molecules, including cell reproduction and communication, membrane organization and metabolism, and apply this knowledge to solve problems and perform and report on the results of experiments. This understanding of molecular cell biology forms the basis for interpreting patterns of inheritance, mechanisms and control of gene expression and the principles of DNA technologies – all of which form the second part of the unit.

### Assessment

- Online test 15%
- Bioinformatics assignment 7%
- Practical exercises 33%
- Examination 45%

### Hurdle requirement

To obtain a pass in the unit, students must submit and pass at least 4 of the 5 practical class assessments.

### Prescribed texts

Campbell, 2017, Campbell Biology (Australian and New Zealand edition), 11th Ed, Pearson Education, Frenchs Forest, NSW.

## SLE112 – Fundamentals of Forensic Science

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBF111*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Annalisa Durdle*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 3 x 3 hour practicals per trimester*

### Content

SLE112 is a fundamental forensics unit, during which students will explore forensic science in an Australian context and learn the challenges and differences of forensic science in a global context. This includes some of the key principles used to study the science, including Locard's exchange principle, principle of individuality, comparative analysis, and class and individual characteristics. Students will engage in activities that will require them to apply forensic processes from a forensic laboratory to the court. It will also require them to apply introductory forensic analysis including chemical, biological and physical techniques and learn about the legal system including how law is developed, criminal vs civil law, and the laws of evidence.

### Assessment

- Two in-class tests (15% each) 30%
- A reflective report 25%
- Practical report and practical skills demonstration (3 x 15%) 45%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the practical report and practical skills demonstration assessment.

### Prescribed texts

Saferstein, 2014, Criminalistics: Introduction to Forensic Science Global Edition, 11th edition, Pearson Education

## SLE114 – Introduction to Parks and Wildlife Conservation

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQE114*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Raylene Cooke*

*Cohort rule: Must be enrolled in S393. Please note that entry to this unit for S398 students is via application on merit and requires approval of the Unit Chair.*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Intensive: 5-day class series in the three-week period prior to the commencement of trimester 2, 1 x 4 day field trip, 2 x 2 hour seminar per trimester.*

### Content

Introduction to Parks and Wildlife Conservation provides students with the opportunity to experience first-hand the issues associated with park management. This unit introduces students to an interdisciplinary approach to managing parks and reserves and legislation associated with park management. The unit includes a field trip to Cape Conran Coastal Park where students gain first-hand experience using different field techniques and how to apply these techniques to park management situations.

### Assessment

- Field trip workbook 50%
- Topic test 50%

## SLE115 – Essential Skills in Bioscience

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Peter Beech*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SLE113 and SLE141*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 8 x 1 hour seminar per trimester.*

## Content

This unit is the first of a sequence of professional practice units designed specifically for students in the first year of biosciences. The unit will focus on development of generic skills and will draw upon and extend the scientific content of other core first year units and utilise this context for skill-building exercises. These exercises will include data analysis and presentation, library research methods, scientific writing and referencing, mathematics and statistics.

## Assessment

- Mid-trimester test 20%
- Literature search 10%
- Careers report 20%
- Group presentation 10%
- Examination 40%

## Prescribed texts

Harris, 2013, Catch Up Maths & Stats For The Life And Medical Sciences, 2nd Ed, Scion, United Kingdom.

## SLE121 – Environmental Sustainability

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SQE121*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Anthony Rendall*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 2 hour workshop per week.*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online workshop per week.*

## Content

The aim of SLE121 is to examine the scientific, social and cultural factors that are all integral components of Environmental Sustainability, on International, National and Local scales. This will necessitate a review of what definitions of sustainability there are and how they inter-relate in regards to environmental, social and economic management.

The unit aims to develop the ability to: appreciate the diversity and complexity of environmental issues, identify environmental impacts due to human activities, appreciate the range of stakeholders and their viewpoints in relation to particular issues, understand the necessary measures and associated problems in achieving effective sustainable environmental management and understand the principles and applications of sustainable development.

## Assessment

- Reflective journal and report 30%
- Sustainability communication tasks (online debate 10%, written report 30%) 40%
- Examination 30%

## SLE123 – Physics for the Life Sciences

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SEP122*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Chris Lim*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Students can choose to attend either a 1 x 1 hour scheduled online seminar per week, or 1 x 1 hour campus seminar per week.*

## Content

Students of the life sciences have a growing need to acquire an effective working knowledge of the physical sciences. In this unit, physics concepts such as energy, sound and waves, the properties of atoms, electric fields, optics, fluids and mechanics will be explored and related to biology and medicine. Students will use evidence to demonstrate and evaluate knowledge of fundamental physics principles, and will also have the opportunity to design and conduct their own experiments to evaluate how physics enables life.

## Assessment

- 10 x weekly quizzes 20%
- Experimental demonstration 35%
- Examination 45%

## Prescribed texts

Giambattista et al, 2015, Physics, 3rd edition, Mcgraw Hill

## SLE132 – Biology: Form and Function

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrnambool, Warrnambool Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBB132*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Peter Beech*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 3 hour practicals per trimester.*

### Content

SLE132 introduces students to animal and plant biology. Students will explore the relationships between animal structures and their functions, and investigate the physiological processes that enable animals to adjust to environmental changes. They will also learn aspects of animal diversity and behaviour. As students progress learning in this unit, they will study the evolutionary diversity of plants, their structure and functions, morphology and growth, reproductive biology, nutrient acquisition and transport, and their applications in biotechnology, with an emphasis on flowering plants. Examples from other plant groups and the non-plant eukaryotes, fungi and algae, will also be used for comparison and as examples during discussion.

### Assessment

- Online mid-trimester test 15%
- Practical exercises 35%
- Scientific report 10%
- Examination 40%

### Prescribed texts

Urry et al, 2017, Campbell Biology Book Only ANZ Edition, 11th edition, Pearson Education

## SLE133 – Chemistry in Our World

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Warrnambool Ponds (Geelong)*

*Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SLE150*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Damien Callahan*

*Trimester 3 Unit Chair: Damien Callahan*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: SLE131 and SLE150*

*Scheduled learning activities – campus:*

*Trimester 1: 3 x 1 hour class per week, 1 x 1 hour seminar per week, 3 x 3 hour practicals per trimester.*

*Trimester 3: Burwood (Intensive): Taught in one intensive 6-week block at the Burwood (Melbourne) Campus. 2 x 2 hour and 1 x 1 hour class per week, 1 x 2 hour seminar per week, 3 x 3 hour practicals per trimester.*

### Content

SLE133 is a foundation unit designed to develop and consolidate student understandings and skills in basic chemistry. The learning and assessment activities provide students with the opportunity to study atoms, molecules, and ions, how they change during a chemical reaction and how bonding affects properties like intermolecular interactions, boiling points, ease of evaporation and the ability of substances to dissolve in water. Students will engage in laboratory work in order to develop their hands on skills in chemical safety and measurement and their ability to perform calculations related to substance measurement. Students will then apply these concepts of bonding, chemical change and measurement to determine the acidity and basicity of substances and the formation of buffers.

This unit can be taken as a stand-alone unit for students who need some awareness of chemistry to broaden their degree, or can be taken as a foundation for further studies in biochemistry, chemistry, and related areas like food and nutrition, molecular biology and science education.

### Assessment

- Learning reflection 10%
- 3 x practical reports (10% each) 30%
- 10 x online quiz (2% each) 20%
- Examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the practical component.

### Prescribed texts

McMurry et al, 2014, Fundamentals Of General & Organic Chemistry Custom Publication, 3rd Ed (or 2nd Ed), Pearson Education, Australia.

## SLE134 – Recreational Fisheries Science

*Enrolment modes: Trimester 3: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Justin Rizzari*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Intensive:*

*Intensive mode unit run over 10 days (weeks 4 and 5) at Waurin Ponds (Geelong) and at the Queenscliff Marine Research Centre which will include a combination of classes, seminars and fieldwork.*

### Content

This unit is designed to develop student's knowledge of recreational fisheries from the perspectives of the target species and of the human element. Unit content will be delivered by guest presenters from the recreational fisheries sector. Information and experiences will be provided from the target species' perspective and will address: welfare, stress, trauma, pain and ethical treatment; post-release survival and recreational fishing impacts; habitat requirements and movement behaviour; visual perception and response to artificial baits/lures; recreational fishing induced disruptions to life cycles; and the creation, restoration, enhancement and protection of recreational fisheries.

From the human perspective, content will focus on: the fishing experience, well-being and end user satisfaction; human health and food safety; post-capture processing and storage; sensory attributes and how best to prepare and store your catch; monitoring and adaptive management of populations; illegal fishing and compliance/protection regulations; conflicts with commercial fisheries and environmental and animal welfare groups; the social and economic benefits/trade-offs to communities; triple-bottom line development of recreational fisheries; traditional recreational fisheries; funding, research models and stocking practices (or requirement thereof) for sustaining recreational fisheries; tourism; technology, fisher specialisation, and generational attitudes.

### Assessment

- Online quiz 20%
- Group video assignment 50%
- Audio-visual seminar 30%

## SLE136 – Life On An Evolving Planet

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQE136*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Liz Weldon*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 5 x 3 hour practical sessions per trimester.*

### Content

Life on our planet continues to evolve and change. In SLE136, students will explore these changes in the biosphere and how they have influenced and relate to changes in ecosystems over deep geological time and into the future. Students will experience hands-on learning using the fossil record in classes, practical sessions and a visit to the museum. During classes, practical sessions, and designated learning activities in the Cloud students will develop techniques to use a professional database to create a scientific methodology to test a given hypothesis and write a scientific report. Learning activities in the unit will involve students exploring and discussing the role of science in society.

### Assessment

- Workbook 30%
- Scientific report 20%
- Scientific poster presentation 20%
- Examination 30%

### Prescribed texts

Cowen, 2013, History of Life, 5th edition (paperback), Blackwell Oxford

## SLE151 – Biodiversity: A Global Perspective

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQB143, SQB151*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Anthony Rendall*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 3 x 3 hour practicals per trimester.*

### Content

This unit includes: Extinction; speciation; rarity and threatened species; conservation strategies; plant and animal diversity; threatening processes; human cultural attitudes to wildlife exploitation and conservation; genetic diversity and molecular techniques in biodiversity conservation.

### Assessment

- Essay on biodiversity 20%
- Scientific report 15%
- Group oral presentation 10%
- Communicating biodiversity research 15%
- Examination 40%

## SLE155 – Chemistry for the Professional Sciences

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Gaetan Girard*

*Prerequisite: VCE Chemistry units 3 and 4 or SLE133. Students undertaking this unit as part of H718 Master of Dietetics pre-requisites must pass SLE155 and SLE133 at Deakin. Credit will not be granted for VCE Chemistry units 3 and 4.*

*Corequisite: SLE010*

*Incompatible with: SLE152*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 1 x 1 hour seminar per week, 5 x 3 hour practicals per trimester.*

### Content

SLE155 builds on the student's previous chemistry knowledge about atoms, molecules, properties, reactions, measurement and acidity. Students will extend their knowledge to more advanced chemical naming, structures, and hypervalent bonding. They will be introduced to additional topics such as, chemical equilibria, solution chemistry, simple organic compounds, chirality and thermochemistry.

This unit will lead to further studies in biochemistry, chemistry, and related areas like food and nutrition, molecular biology and science education. This unit can also be taken as an elective unit for students who want a broader knowledge of chemistry to enhance their degree.

### Assessment

- Practical reports (5 x 8% each) 40%
- 10 x online quiz (2% each) 20%
- Examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the practical component, in addition to the normal requirement of at least 50% overall for the unit.

### Prescribed texts

Blackman et al, 2018, Chemistry, 4th edition, John Wiley & Sons

## SLE162 – Marine and Coastal Environmental Communications

*Enrolment modes: Not available in 2019*

*Credit point(s): 1*

*Previously coded as: SQB162*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: John Donald*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Intensive: Students are required to attend 1 x 5 days intensive study block at the Waurin Ponds (Geelong) campus in week 8.*

## Content

This unit will introduce students to the importance of marine and freshwater environments, their biodiversity and conservation issues. Students will engage with the principles of environmental communication from the perspective of the marine and freshwater environments. In doing so, students will be equipped with the skills to undertake a broad range of environmental communication and interpretation activities with a range of audiences, communication strategies and interpretive media. This unit has no assumed knowledge of biology or environmental science, and is suitable for any student with a passion for the environment and motivation to make a difference. The skills and knowledge learn in this unit are applicable to other environments and students from non-science disciplines (eg. education).

## Assessment

- Design concept report 40%
- Multimedia portfolio 60%

## SLE200 – Communicating Science Ideas

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Susanna Venn*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week 1 x 2 hour seminar per fortnight.*

## Content

The dissemination of scientific information is a critical component for a range of areas including industry, government, research institutes, museums and public interest groups. This unit will introduce and develop key skills required for science communication through fora such as print, radio, television and social media. The course will be delivered in a context highlighting why science communication is important in our society and how best practice science communication can add significant value to scientific research. The unit will establish an understanding of practical and theoretical aspects in science communication studies.

The unit will bring together an overview of science communication in the public sphere including public attitudes, political engagement and ethical considerations. The unit will enhance critical evaluation of contemporary science in the media and will enable student to develop skills in preparing media content.

## Assessment

- Media ethics assessment 30%
- Press release based on the work of a Deakin University scientist 40%
- Media portfolio (group task) 30%

## SLE201 – Society and Environment

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SQA201*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kelly Miller*

*Prerequisite: SLE103 or SLE121*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 1 hour on-campus class per week at the Burwood (Melbourne) Campus, or 1 x 1 hour online class per week.*

## Content

Complex environmental problems require creative, multidisciplinary approaches, and many environmental professionals argue that the management of those problems is primarily about understanding and working with people. Whatever your interest is, be it coastal planning, wildlife conservation, pollution or waste management, climate change adaptation, or simply linking sustainability with other disciplines, skills in environmental social science will be invaluable for your future career. In this unit we will explore how social science can help us understand diverse socio-economic perspectives on environmental issues; tools for stakeholder and community engagement, conflict and dispute resolution; and how to develop powerful and effective strategies for fostering sustainable behaviours.

## Assessment

- Social research design 35%
- Behaviour change program 35%
- Online discussion and reflection 10%
- Online test 20%

## SLE202 – Landscape Evolution

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Nick Porch*

*Prerequisite: SLE102*

*Corequisite: Nil*

*Incompatible with: SQB341 and SQE347*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 4 x 3 hour practicals per trimester and a full day field trip to the Mornington Peninsula.*

### Content

The unit will include an introduction to landscape materials, including sediments, as well as soil classification in relation to soil forming processes, studies on earth surface processes that influence landform/landscape development, and on general geomorphic systems. It will examine techniques used in the assessment of the landscape palaeo-environmental history, and the contribution that this information/data has to understanding the originals and evolution of the Australian landscape (including biota), human impacts on the environment, and to longer term understanding of climate change. This unit involves studies of geological and of remote sensed imagery applicable to geo-environmental problems.

### Assessment

- Practical test 30%
- Research report 30%
- Examination 40%

## SLE203 – Plant Biology

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SBB203*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Susanna Venn*

*Prerequisite: One of SLE103, SLE111, SLE132 or SLE151*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class, plus 1 x 1 hour class per week, 6 x 3 hour practicals per trimester.*

### Content

Plant diversity in an Australian context is examined with emphasis on plant structure and function, growth and development, ecophysiology and ecology, floral structure, reproduction and identification, taxonomy and nutrition. Specifically ecophysiology is examined in terms of adaptations to environment in the context of Climate Change. The fungi, lichens and algae also are examined.

### Assessment

- Practical work (assignment 1 – 10%, assignment 2 – 20%) 30%
- Practical test 30%
- Theory (2 x in-class tests (20% each) 40%

## SLE204 – Animal Diversity

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBB204*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Anneke Veenstra*

*Prerequisite: SLE111 or SLE132*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 6 x 3 hour practical classes per trimester.*

### Content

This course of animal evolution is illustrated by examining aspects of the biology of a range of animal phyla. Major themes are: the development of multicellularity; important aspects of body plan including body layers, body cavities and metameric segmentation; and adaptation to particular environments and lifestyles. The evolutionary succession of major invertebrate and vertebrate animal groups is discussed. During laboratory practical classes' students will examine and dissect specimens from the following animal groups: cnidarians, flatworms, annelids, arthropods, molluscs, echinoderms and chordates.

### Assessment

- Practical test 40%
- Pre-lab quizzes 10%
- Mid-trimester test 25%
- Final test 25%

### Prescribed texts

Hickman et al, 2016, Integrated Principles Of Zoology, 17th Ed, McGraw Hill, USA

## SLE205 – Vertebrate Structure and Function

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBB205*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Anneke Veenstra*

*Prerequisite: SLE132*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 5 x 3 hour practicals per trimester*

### Content

This unit is designed to enable students to: gain an understanding of the major anatomical and functional developments throughout vertebrate evolution and their influence on the life history characteristics, ecology and diversity of this animal group; further develop skills in analysing, interpreting and critically evaluating scientific data; and gain experience in writing scientific reports and making an oral presentation.

### Assessment

- Online quizzes (5 x 3%) 15%
- Oral presentation 25%
- 2 x class tests (30% each) 60%

### Prescribed texts

Hildebrand & Goslow, 2001, Analysis of Vertebrate Structure, 5th edition, John Wiley

## SLE206 – Cell Biology

*Enrolment modes:*

*Trimester 2: Burwood (Melbourne)*

*Trimester 3: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBB206*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Chris Lim*

*Trimester 3 Unit Chair: Aaron Schultz*

*Prerequisite: SLE111*

*Corequisite: SLE010*

*Incompatible with: SLE331*

*Scheduled learning activities – campus:*

*Trimester 2 Burwood (Melbourne): 3 x 1 hour classes per week, 5 x 3 hour practicals per trimester.*

*Trimester 3 Waurn Ponds (Geelong) (Intensive): 3 x 3 hour classes per week (weeks 1–4), 2 x 3 hour practicals per week (weeks 1–3). The unit will run one week prior to the start of the trimester.*

### Content

This unit will focus on biological processes occurring within cells and between cells and their environment. Topics will include basic cell structure and evolution of cells, the structure and function of the cytoskeleton, membrane structure and function, cell signalling and signal transduction, the control of the cell cycle and techniques used in research on cell function.

### Assessment

- Final test 45%
- Mid-trimester test 25%
- 1 x practical report 20%
- Practical test (online quiz) 10%

### Prescribed texts

Alberts, 2019, Essential Cell Biology, 5th edition, Garland Publishing, OR Alberts, 2013, Essential Cell Biology, 4th edition, Garland Publishing

## SLE207 – Environmental Planning and Impact Assessment

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQE202*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Clare Binek*

*Cohort rule: Must be enrolled in S398*

*Prerequisite: SLE103 or SLE121*

*Corequisite: Nil*

*Incompatible with: SEV318, SQE315 and SLE319*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 6 x 4 hour practicals per trimester*

### Content

This unit provides an introduction to land use planning and environmental impact assessment. In particular, the unit examines strategic and statutory planning for sustainable cities, nature conservation, industry and heritage, examining current roles and responsibilities of government agencies, interest groups and communities at international, national and local levels.

Current legislative and administrative procedures in Victoria are evaluated and compared with procedures in other states and countries. The unit also examines environmental impact assessment techniques and the role of impact assessment in the planning system.

## Assessment

- Sustainable communities and planning schemes report 30%
- Environmental impact assessment report 30%
- VCAT hearing report and group oral presentation 20%
- Class test 20%

## SLE208 – Forensic Biology

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBF208*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Michelle Harvey*

*Prerequisite: STP010 and any four level one units*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week, 4 x 3 hour practical classes per trimester*

## Content

This unit will focus on a range of biological topics relevant to forensic science, which will include forensic serology, botany, entomology, biological techniques other than DNA analysis, laboratory examination of biological evidence, and modern approaches to DNA analysis. Students will engage in activities that will require them to apply forensic processes from a crime scene to the court.

## Assessment

- Critical essay 20%
- Forensic investigation portfolio 35%
- 2 x online quizzes (10% each) 20%
- Practical test 25%

## Prescribed texts

Gunn, 2019, Essential Forensic Biology, (3rd edition), John Wiley & Sons OR Gunn, 2009, Essential Forensic Biology, (2nd edition), John Wiley & Sons

## SLE209 – History and Philosophy of Science

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Adam Cardilini*

*Prerequisite: Must have passed 4 credit points*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 1 hour scheduled online seminar per fortnight, or 1 x 1 hour campus seminar per fortnight.*

## Content

Students often see science as a set of facts and not as a process for making sense of the natural and physical world. Today's science is built on ways of thinking that were developed centuries ago. The purpose of this unit is for students to develop knowledge of the history and philosophy of science and the relationship between science and the society. Students will review controversies in science, examine science as a human endeavour, explore different values and attitudes to science and explain how science influences our world. Learning assessment activities in this unit will allow students to recognise the evolution of science and its role in the advancement of our society. Students will research, collect and analyse information around how people enact science from discovery through to practice, through to application, through to understanding. They will learn the importance of the scientific process, and methods in the development ideas and theories.

## Assessment

- Weekly quizzes 20%
- Individual report to a media group 30%
- Learning portfolio 50%

## SLE210 – Chemistry the Enabling Science

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Angel Torriero*

*Prerequisite: SLE152 or SLE155*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 4 hour practicals per trimester.*

### Content

SLE210 will build on the student's level-one chemistry knowledge. The aim of this unit is to broaden knowledge and understanding of a range of chemistry concepts and to develop practical skills as a member of a team in a chemistry laboratory. Topics covered in this unit include nuclear chemistry, organic reactions, applications of chemical equilibria, and introductory spectroscopy.

### Assessment

- Practical task x 3 (5%, 10%, 5%) 20%
- Practical test 40%
- Examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the practical assessments.

### Prescribed texts

Blackman et al, 2015, Chemistry + Wileyplus Access Card, 3rd Ed, John Wiley & Sons, Milton QLD.

Beer et al, 1999, Supramolecular Chemistry, 1st Ed, Oxford University Press, United Kingdom.

## SLE211 – Principles of Physiology

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBB211*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Chris Lim*

*Prerequisite: One of SLE111, HBS109 or SLE132*

*Corequisite: SLE010*

*Incompatible with: SBB232*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 3 hour practicals per trimester.*

### Content

This unit introduces students to the basic language and concepts of physiology in relation to the function of humans. The unifying theme throughout this unit is homeostasis. Physiology is investigated as a group of interacting systems, each of which itself has a number of structural and functional levels of organisation. Topics include homeostasis and the internal environment, the nervous system, skeletal and smooth muscle physiology; and gastrointestinal, endocrine and reproductive physiology.

### Assessment

- 1 x class test 25%
- Practical work (1 x group assignment 20%, 1 x individual practical assignment 15%; practical tests 5%) 40%
- Examination 35%

### Prescribed texts

Sherwood, 2014, Human Physiology: From Cells To Systems, 9th Ed, Cengage Learning, USA

## SLE212 – Biochemistry

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBB212*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Stuart Linton*

*Prerequisite: SLE152 or SLE155*

*Corequisite: SLE010 and recommended study of SBB111 or SLE111*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 3 hour practicals per trimester.*

### Content

Biochemistry is the study of biological molecules that are related to living organisms. In SLE212 students will apply their fundamental knowledge of chemistry, biology and mathematics to describe the structure, chemistry and biology of various classes of biomolecules (amino acids, proteins, enzymes, carbohydrates, fatty acids and nucleic acids). Students will learn about the structure function relationship of proteins and the principles of enzymatic catalysis. They will explore the

influence of thermodynamic principles on biochemical processes that sustain life. In practical sessions, students will learn essential skills in biochemical experimentation. They will be required to apply knowledge of chemical and physical principles to investigate how biochemical reactions are dependent upon the chemistry of water, buffers and pH. Classes will complement student learning of the structure-function-interaction of biomolecules.

### Assessment

- 4 x practical worksheets 40%
- Group assignment and presentation 20%
- Examination 40%

### Prescribed texts

Moran & Horton, 2013, Principles Of Biochemistry, 5th (Pearson New International) Ed, Pearson Education, Harlow, United Kingdom

## SLE213 – Introduction to Spectroscopic Principles

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBC211*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Neil Barnett*

*Prerequisite: One of SLE152 or SLE155*

*Corequisite: SLE010*

*Incompatible with: SBC231*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 4 x 4 hour practicals per trimester.*

### Content

Spectroscopy, in its many and varied forms, is employed extremely widely in all areas of the physical, natural and life sciences. SLE213 provides an introduction to the fundamental principles and applications of modern spectroscopy incorporating both the elucidation of molecular structure and the determination of chemical concentration.

### Assessment

- Three in-class tests (20% each) 60%
- Practical report 40%

### Prescribed texts

Christian et al ( Editors ), 2013, Analytical Chemistry, 7th Ed, John Wiley & Sons

## SLE214 – Organic Chemistry

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBC214*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Madeleine Schultz*

*Prerequisite: SLE152 or SLE155*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 1 x 1 hour seminar per week, 5 x 4 hour practical classes per trimester (4 in chemistry laboratories, one in interactive learning environment)*

### Content

SLE214 encompasses the typical reactions of the common functional groups (alkenes, alkynes, benzene, alkyl halides, alcohols, ethers, amines, carboxylic acids and carboxylate derivatives) as well as theoretical aspects of organic chemistry (including structure, bonding, resonance, stereochemistry and the mechanisms that underpin the conversions).

### Assessment

- Three in-class tests (20% each) 60%
- Scientific report 10%
- Series of practical activities 30%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the practical component.

### Prescribed texts

McMurry, 2017, Organic Chemistry, 9th edition, Cengage Learning

## SLE215 – Ecotourism and Environmental Interpretation

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SQE212*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kelly Miller*

*Prerequisite: Nil*  
*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 1 hour on-campus class per week at the Burwood (Melbourne) Campus, or 1 x 1 hour online class per week.*

## Content

Ecotourism and sustainable tourism are rapidly expanding fields of tourism globally, and given society's growing interest in the environment, are anticipated to grow. In this unit we critically examine the key components and principles of ecotourism and sustainable tourism; and the associated positive and negative social, environmental and economic impacts. Interpretation, one key element of ecotourism and sustainable tourism is investigated, using case studies involving cultural and natural heritage to understand the effectiveness of different interpretative techniques. The management of negative interactions will be explored and examined in relation to social and economic benefits/costs to host communities and the environment.

## Assessment

- Review of environmental interpretation 35%
- Ecotour design and communication 45%
- Online quiz 10%
- Online discussion and reflection 10%

## SLE216 – Bushfire Management

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*  
*Previously coded as: SQB216*  
*EFTSL value: 0.125*  
*Trimester 2 Unit Chair: Tricia Wevill*

*Prerequisite: SLE103*  
*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 5 x 3 hour practical sessions per trimester plus a one day field trip, requiring attendance from approximately 8 am–6 pm.*

## Content

This unit focuses on fire behaviour, fire management, the ecological impacts of fire on fauna and flora, and the impact of fire on the community.

Topics include fire behaviour in grass and forest, risk assessment, factors affecting loss of lives and assets, community expectations and education, fuel reduction burning, ecological responses of flora and fauna to both planned and unplanned fire, and current policy approaches to fire management planning.

## Assessment

- Class test 40%
- 2 x reports (15%, 20%) 35%
- Field trip report 25%

## SLE217 – Aquaculture Nutrition and Seafood Quality

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*  
*Previously coded as: SQB262*  
*EFTSL value: 0.125*  
*Trimester 2 Unit Chair: David Francis*

*Prerequisite: SLE111*  
*Corequisite: Nil*  
*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour face-to-face seminars per fortnight*

## Content

In SLE217 students will develop a sound understanding and technical knowledge of nutritional biochemistry and physiology principles in the context of aquaculture nutrition and industry practices. Assessing aquaculture feeds, feed management, feeding processes and stock performances, students will explore the constraints and potentialities in relation to seafood quality, markets and their role in human health benefits and risks. Learning and assessment activities in this unit challenge the student to explore a variety of sector specific technical and ethical professional practices including certification schemes, social, environmental and economic issues. While honing their knowledge of diverse communities, markets and culture in a global context, students will be expected to analyse and synthesise information, connecting theory to practice, critically thinking and developing applied skills for problem solving in the aquaculture industry.

## Assessment

- In-class test 30%
- Literature review report 30%
- Examination 40%

## SLE218 – Indigenous Engagement: Natural Resource Management

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Janine McBurnie*

*Prerequisite: SLE121*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 3 hour seminar per week (which may include field trips)*

### Content

This unit will examine the historical and contemporary context of Indigenous people's engagement in natural resources management. By exploring different ontological understandings of the relationships to the natural environment, students will be required to critically reflect on how different ways on knowing have influenced natural resource management in Australia, and on a global scale.

### Assessment

- Ontological perspective essay 25%
- In-class test 30%
- Indigenous resource management report 3000 words 45%

### Content

In SLE219, students will learn how to distinguish between key groups of marine invertebrates; and how to recognise and classify various biological aspects of form and function. Learning and assessment activities provide students with the opportunity to explore both living and preserved specimens from coastal environments surrounding the Great Ocean Road and Port-Phillip Bay. Students acquire the necessary discipline knowledge during a series of practical sessions and a half-day fieldtrip. Students are required to attend and engage in practicals and fieldwork exercises. This enables students to connect theory with taxonomic practice, which includes identifying and recognising key features of various marine invertebrates and to explore different biological aspects associated with form and function. The living specimens allow students to observe animals' behaviour and movement.

*Note: Practical activities for students enrolled at the Waurin Ponds (Geelong) campus will be conducted at the Queenscliff Marine Station.*

### Assessment

- 2 x practical tests (30% each) 60%
- 1 scientific report 40%

### Prescribed texts

Pechenik J, 2014, *Biology Of The Invertebrates*, 7th Ed, McGraw Hill

## SLE219 – Marine Invertebrates

*Enrolment modes: Trimester 1: Warrnambool, Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ty Matthews*

*Prerequisite: SLE111 and SLE132*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 9 x 1 hour practicals per trimester, 9 x 3 hour practicals per trimester, a half-day fieldtrip (weather permitting).*

## SLE220 – Wildlife Ecology

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQB220*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Euan Ritchie*

*Prerequisite: SLE103 or SLE132*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour class per week*

### Content

The objective of this unit is to enable students to develop a strong understanding of theoretical population ecology, and its applications. Students will cover key concepts and topics including: individual variations, population estimation, population change and demographics, dispersal, niches, competition, predation, harvesting and conserving wildlife.

An understanding of these will then be used to examine how we currently manage wildlife populations. Different approaches to wildlife management will be discussed in relation to theoretical population ecology. Students will then be encouraged to critically examine our current management practices and attempt to develop their own philosophy towards the management of our wildlife resources.

## Assessment

- Mid-trimester test 20%
- Literature review 40%
- Examination 40%

## SLE221 – Systems Physiology

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBB221*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jan West*

*Prerequisite: One of SLE111, HBS109 or SLE132*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 hours of classes per week (3 x 1 hour classes per week), 5 x 3 hour practical classes per trimester.*

## Content

Physiology is a subfield of biology that focuses on the study of human body function, including how major processes work together at the cellular and molecular level to maintain homeostasis. Systems physiology involves learning about the organs within the various systems of the body. Although the primary focus of systems physiology is on function, frequent references are made to the anatomy of individual organs, which is important for understanding the function of the individual structures.

This unit will explore how organ systems, organs, cells and bio-molecules carry out specific functions in the human system. It will also focus on the structure and function of blood; the cardiovascular and respiratory systems; the processes involved in excretion of wastes from the body; the significance and maintenance of acid-base and fluid balance. Students will learn how individual systems work and in synchrony with each other e.g. the neural control of cardiovascular response to maintain heart rate and blood pressure. This is of particular importance when discussing disturbances that occur in normal function as a result of a physiological challenge or in disease states.

## Assessment

- Class test 20%
- Practical test 30%
- Practical discussions 10%
- Examination 40%

## Prescribed texts

Sherwood, 2016, Human Physiology: From Cells to Systems, 9th edition, Cengage Learning

## SLE222 – Biochemical Metabolism

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBB222*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Bernhard Dichtl*

*Prerequisite: SLE152 or SLE155*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 3 hours practicals per trimester*

## Content

Biochemical metabolism is the study of chemical processes within and relating to living organisms. In this unit, students will apply their fundamental knowledge of chemistry, physics, math and biology to understand the chemistry, as well as the energetic and regulatory principles that govern biochemical pathways. Students will analyse catabolic and anabolic pathways of carbohydrates and fatty acids and the overlapping biochemical concepts of cellular respiration and photosynthesis. Likewise, they will dissect how energy consuming reactions are coupled to energy releasing reactions in order to drive the synthesis of biological macromolecules. The central role played by photosynthesis to enable life in our world will be highlighted. The interconnectedness of pathways and their combinatorial regulation via hormone signalling in humans will be evaluated at the level of cells, tissues and the entire organism. In practical sessions, students will learn essential skills in biochemical experimentation. They will be required to apply knowledge of chemical and physical principles to investigate the chemistry of biomolecules in food, the role of coenzymes as carriers of cellular energy, key metabolites that serve as diagnostic markers in health and disease and photosynthetic pigments in plants.

Classes will complement student learning of the principles underlying biochemical metabolism.

### Assessment

- Practical worksheets (4 x 10%) 40%
- Examination 40%
- Team presentation 20%

## SLE223 – Water Quality and Ecological Health

*Enrolment modes: Trimester 2: Warrnambool, Waurn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SLE306*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Tim Tutt*

*Prerequisite: One of SLE133, SLE155 or SLE150*

*Corequisite: SLE010*

*Incompatible with: SQP205 and SQP305*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 4 x 3 hour practicals per trimester, 1 day field trip.*

### Content

This unit enables students to examine water quality and the basic physico-chemical parameters important for ecosystem health. Students will assess ecosystem health with regard to water quality, including, dissolved ions (salinity), dissolved gases and nutrients (nitrogen, phosphorus and silicon), particulates, pollutants and other contaminants. They will study processes governing the loading and transformation of these materials for a wide range of water bodies including rivers, lakes, estuaries, beaches, oceans, groundwater, sewage treatment and aquaculture systems. The nature, role, interpretation and application of national water quality guidelines will need to be applied in the fieldwork. Students will explore common physico-chemical analysis tools and techniques for water quality analysis.

*Note: Practical activities for students enrolled at the Waurn Ponds (Geelong) campus will be conducted at the Queenscliff Marine Station.*

### Assessment

- In-class test, 20%
- Group practical report 10%
- Group field report and brochure 30%
- Examination 40%

## SLE224 – Animal Behaviour

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Peter Biro*

*Prerequisite: SLE132*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 3 x 3 hour practicals per trimester*

### Content

The unit will be presented as a series of modules (2-5 classes each) which will examine explanations for the evolution of the diverse array of behavioural strategies we see in animals today. Topics include Proximate and ultimate causes of behaviour; How does behaviour develop?; Control of behaviour : endocrine control mechanisms; Function of behaviour – foraging; Migration and navigation behaviour; Proximate control of mating behaviour; and Evolution of human behaviour. Topics will be covered by staff which show internationally recognised research outputs within these areas, making the coverage both relevant and up to date.

### Assessment

- Examination 45%
- Online test 10%
- Practical reports 45%

## SLE225 – Global Environmental Placement

*Enrolment modes: Trimester 3: Placement*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Raylene Cooke*

*Prerequisite: Must have completed at least 8 credit points of study*

*Corequisite: STP010*

*Incompatible with: MIS390, MIS391 and SLE227*

*Scheduled learning activities – campus: Placement: Half day seminar before departure. Minimum of 80 hours of placement with an approved international host organization.*

## Content

Environmental Science is an increasingly global discipline, and as such it is desirable for students to engage in their discipline in a more globally relevant fashion. This unit, Global Environmental Placement, requires students to locate a course-related international organisation in which they secure and satisfactorily complete a placement. The international environmental placement is a situated learning activity that provides students with the opportunity to apply and develop their learning about globalization, international cultural issues and the role of cultural diversity in how environmental solutions are approached. The integration of the placement with academic learning will allow students to help solve authentic environmental problems or address real issues faced by organisations operating in the international environmental sphere. Placements are for a minimum two-weeks or for a negotiated period to a minimum of 80 working hours.

*Note: Entry to this unit is via application (students are required to demonstrate an interest in environmental studies) through the Deakin University Applicant Portal and is subject to availability. Once the placement has been approved, students will be enrolled into the unit.*

## Assessment

- Host organisation evaluation 30%
- Reflective learning report 40%
- Placement symposium presentation 30%

## SLE226 – Environmental Team Based Research

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQB226*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John White*

*Prerequisite: SLE103 and one of SLE101 or SLE132*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 6 x 3 hour practicals per trimester, 4 day field trip to the Grampians.*

## Content

The design of experiments, analysis of environmental data and working effectively in a team based situation are critical skills required by all environmental scientists.

This unit is devised to step students through the process of environmental research from initial project conception through to presenting the findings of research in a professional format. This unit comprises a series of classes and practicals aimed at developing skills in experimental design, data analysis (using statistical software) and data presentation. A major component of this unit involves students working in a team to design, conduct and report on their own environmental research project. This unit aims to develop strong analytical skills, research skills, communication skills and team work skills.

*Note: Students will be required to meet their own expenses while on a 4 day field study trip.*

## Assessment

- Practical work 10%
- Data analysis assignment 20%
- Data analysis test 30%
- Group research poster 25%
- Teamwork evaluation 15%

## SLE228 – Forensic Genomics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrnambool (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Annalisa Durdle*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 3 hour practicals per trimester.*

## Content

Advances in genomic techniques have allowed genetic data to be obtained faster, cheaper, and in greater volume than ever before. It also means genetic information can now be obtained from minute amounts of biological material. This has significant implications for forensic science. Forensic biologists are now able to not only identify individuals from DNA, but can also use it for a myriad of forensic applications, including predicting how a person looks, determining cause of death, genealogical relationships and distinguishing between twins. DNA data can also be used in investigations in the food industry to identify bacterial contaminants in processed and unprocessed food items, species substitutions in the seafood industry and in wildlife forensics to identify protected species or their

products. Such information can be critical in criminal investigations. This unit covers both contemporary forensic DNA analysis, and emerging applications and techniques, and aims to provide students with important theory and basic skills in the acquisition, analysis and interpretation of forensic DNA data.

The unit includes both theoretical and practical components. Students will learn how DNA is currently analysed in criminal investigations, include vetting of cases, Short Tandem Repeat and fragment analysis, DNA profile interpretation, and Bayesian statistical analysis and presentation of data. Advanced techniques using next generation sequencing, and the interpretation of these data, will also be covered. Forensic applications of both contemporary and next generation sequencing techniques, and the advantages and limitations of each, will be discussed.

### Assessment

- Practical report 50%
- Online quizzes 20%
- Forensic case report 30%

## SLE229 – Introduction to Separation Science

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBC229*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Neil Barnett*

*Prerequisite: SLE152 or SLE155*

*Corequisite: SLE010*

*Incompatible with: SBC231*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 4 x 4 hour practicals per trimester.*

### Content

SLE229 develops student understandings and practical skills in: classification of chromatographic processes (adsorption, partition and ion exchange); thermodynamic and kinetic theory of chromatography; separation performance (resolution versus retention time); instrumentation for capillary GC (columns, injectors, detectors and temperature programming); instrumentation for HPLC (columns, detectors and gradient elution); and capillary electrophoresis and applications of both GC and HPLC to separation and quantitation of priority substances.

### Assessment

- Three in-class tests (20% each) 60%
- Practical report 40%

### Prescribed texts

Christian et al (Editors), 2013, Analytical Chemistry, 7th edition, John Wiley & Sons

## SLE231 – Hydrology and Water Resources Management

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Liz Weldon*

*Prerequisite: One of SLE101 or SLE102*

*Corequisite: Nil*

*Incompatible with: SQE331 and SQP211*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 3 hour practical per week (includes field activities)*

### Content

This unit includes: an overview of water properties as a fluid and limited natural resource and the hydrological cycle; a detailed study of the types and characteristics of groundwater, surface water, stream flow regimes and channel-forming processes and catchment hydrology, and surface-water/groundwater and soil-water-organism interactions; a detailed examination and case studies of the techniques used in assessing and managing stream and catchment health (including the assessment and management of salinisation and acidification) and environmental flows.

### Assessment

- Two-part field based assignment (group) 50%
- Field excursion report 30%
- 2 x online tests 20%

### Prescribed texts

Gordon, 2004, Stream Hydrology: An Introduction For Ecologists, 2nd Ed, John Wiley & Sons, United Kingdom.

## SLE234 – Microbiology

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Lee Hudek*

*Prerequisite: SLE111 or for students enrolled in H300 – SLE111 or HMM102 and HMM103*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 4 x 1 hour seminars per trimester, 6 x 3 hour practicals per trimester.*

### Content

Microbiology is the study of microscopic unicellular organisms, which are the prokaryotes (such as bacteria), eukaryotes (such as algae) and the viruses. It will cover the study of the structure of microorganisms, how they function, grow and reproduce, the relationship between microorganisms and their environment and the ability of bacterial gene expression to respond to prevailing environmental signals. In this unit, students will explore the history of the discipline of microbiology and the cell structure of prokaryotes, unicellular eukaryotes and viruses. We will investigate the very important role that microorganisms have in human health and disease but also in the environment and how the environment impacts on their ability to grow and divide. The incredible increase in understanding of bacterial genomes will be explored and how this has allowed us to make large strides in medical microbiology, pharmaceutical and industrial biotechnology and food and agricultural microbiology.

### Assessment

- 4 x practical report 20%
- In-class test 15%
- Practical test 15%
- Examination 50%

### Prescribed texts

Martinko, 2018, Brock Biology Of Microorganisms Global Edition, 15th Ed (or 14th Ed), Pearson Education.

## SLE235 – Chemical Systems

*Enrolment modes: Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SBC232*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Kieran Lim*

*Prerequisite: SLE155*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Intensive: Students are required to attend an intensive mode short course (classes/seminars and laboratories) taught in first four weeks of Trimester 3 at Burwood (Melbourne) 4 x 3 hour classes/seminars per week (weeks 1 and 2), 2 x 3 hour classes/seminars per week (weeks 3), 4 x 4 hour laboratory classes per trimester (weeks 1–4).*

### Content

Chemical systems are governed by the interactions between molecules, their bonding and their reactivity. This unit will build on concepts introduced in level-1 chemistry. Topics will include the nature of chemistry, green chemistry, bonding, thermodynamics, electrochemistry, kinetics, equilibrium and control of chemical reactions. Examples will be drawn from biomedical science, food science and industrial applications.

### Assessment

- Laboratory reports (4 x 10% each) 40%
- Critique 15%
- Case study (part 1) 15%
- Case study (part 2: final version) 30%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the laboratory component, in addition to the normal requirement of at least 50% overall for the unit. The critique and case study are due throughout the seven weeks after the intensive face-to-face class sessions.

## SLE236 – Marine Microbiology

*Offering information: Offered from 2020  
(subject to approval)*

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Prue Francis*

*Prerequisite: SLE111*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 6 x 3 hour practicals per trimester.*

### Content

With more than a billion microorganisms living in each litre of seawater, it is important to understand how they interact with ocean processes and the role they will play in a rapidly changing planet. This unit will provide students with an understanding of the evolution, structure, chemistry, biology and ecology of marine microbes. The unit will also consider the importance of microbes in marine biosecurity and disease, food production, biotechnology, marine communities and interactions and remediating climate change. Students will gain key practical skills in the field of marine microbiology with particular focus on genomics and bioinformatics.

### Assessment

- Two practical reports (10% each) 20%
- Two in-class tests (15% each) 30%
- Practical skills test 25%
- Podcast 25%

## SLE237 – Biogeography

*Enrolment modes: Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQB237*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Nick Porch*

*Prerequisite: One of SLE102, SLE103, SLE111, SLE115, SLE132, SLE136 or SLE151*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Intensive:*

*This unit is taught over a two week period. Students are required to attend 3–5 hours of classes per day, 4 x 3 hour practicals per trimester and a half day field trip. A two hour test will take place at the end of the third week.*

### Content

Biogeography is the study of the spatial and temporal distribution of plants and animals. In SLE237 students will integrate their own observations, and concepts they have learned about biology, geography and the environment to identify and explain the patterns and processes responsible for the changing spatial and temporal distribution of organisms across marine and terrestrial environments. The classes and practicals will include activity based learning and there will be particular emphasis on drawing examples from the Australian biota. Students will also experience applied learning from presentations by guest scientists working in the field of biogeography.

### Assessment

- In-class quizzes 20%
- Workbook 30%
- Essay 30%
- Class test 20%

## SLE238 – Marine Biology

*Offering information: Offered from 2020  
(subject to approval)*

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Prue Francis*

*Prerequisite: One of SLE107, SLE111 or SLE132*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 3 hour practicals per trimester, 1-day fieldtrip.*

### Content

In this unit students will explore the diversity of algae, angiosperms and animals that inhabit our oceans and learn identification skills that will enable them to identify common species in the field. The unit will also cover biology and life histories of marine species, dispersal dynamics and roles organisms play in community and ecosystem function.

## Assessment

- Career action plan 10%
- Species hunt report 20%
- Problem solving tasks (5 x 6%) 30%
- Practical test 40%

## Prescribed texts

Levinton, J.S. 2017. *Marine Biology – Function, Biodiversity, Ecology* (4th ed). Oxford University Press, New York.

## SLE239 – Introduction to Geographic Information Systems

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SQE239*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Blake Allan*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 3 x 1 hour online seminars per week. Optional 1 x 8 hour support session at Burwood campus in the intra-trimester break.*

## Content

Geographic Information Systems are increasingly being used across a range of fields including environmental research, monitoring, and management as well as public health, urban planning, mining, infrastructure management etc. This unit aims to provide students with important theory and basic skills in GIS including data acquisition, storage, analysis and presentation; and basic competency in commonly-used GIS software.

The unit introduces the basic principles of GIS, and includes both theoretical and practical components. The unit covers basic mapping theory, data display and manipulation, simple spatial analysis, and the application of GIS to environmental research and monitoring. Students will achieve basic competency in the use of widely-used GIS software through practical exercises.

## Assessment

- 3 x GIS skills assessment (20% each) 60%
- Scientific report using spatial data and priority assessment techniques 40%

## SLE240 – Analysing Marine Dynamics

*Offering information: Offered from 2020 (subject to approval)*

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Prue Francis*

*Prerequisite: SIT190 or SIT194*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week.*

## Content

In this unit, all students will be brought up to a basic level of specialized computing skill. Students will be taught how to use a well-known statistics package (R) to provide basic skills in the use and application of these software packages, especially related to marine problems. The unit will cover why dynamics is important in a marine context. This is a hands-on problem-solving unit where students will be solving ecological problems, guided through practical lab exercises. A case study approach will be used to build R capacity in students and will cover topics such as basic programming logic, data structures, debugging, reporting strategies, and plotting basics. It is assumed students will already have a solid understanding of basic parametric statistics (ANOVAs, t-tests, Chi-squared, regression, correlation), a review of these topics will be covered in the R framework. The unit will then move on to statistical model fitting and basic simulation modelling.

## Assessment

- Mandatory practical report 10%
- Practical reports (3 x 30%) 90%

## SLE242 – Quantitative Marine Ecology

*Offering information: Offered from 2020  
(subject to approval)*

*Enrolment modes: Trimester 3: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Prue Francis*

*Prerequisite: SLE240*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Intensive:  
4 week intensive unit (1 x 1 hour class per week; 3 x 3  
hour practicals; 1 x 4 day field and practical classes, 1 x 3  
hour workshop)*

### Content

In this unit, you will learn about the features and function of marine systems with particular focus on life histories, dispersal, migrations and population, community, ecosystem and landscape ecology. The unit will also explore the techniques and methods of undertaking marine ecological research, including experimental and sampling design, data collection, and statistical analysis of data and presentation of the research results. Students will participate in a group project to design, execute, analyse and interpret observational and experimental studies of marine animals in field and laboratory settings.

### Assessment

- Research portfolio (group oral presentation 10%, individual report 20%, group statistical analysis 30%, reflection 20%) 80%
- Online quiz 20%

## SLE244 – Aquatic Ecology

*Enrolment modes: Trimester 2: Warrnambool,  
Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQB244*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Eric Trembl*

*Prerequisite: SLE103 or SLE144*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class  
per week, 1 x 1 hour seminar per week, equivalent of 5 x  
3 hour practicals and a field trip per trimester.*

### Content

In SLE244 students will develop key conceptual principles and associated issues in ecology and illustrate their applications to real-world problems in marine and aquatic environments. Learning and assessment activities in this unit will provide students with the opportunity to explore population dynamics and links to conservation and management of key species. Students will study the interactions between species and their environments, including restoration ecology, impacts of disturbances, ecosystem science, landscape/seascape ecology, and spatial and temporal processes in ecosystem management. They will also examine the logic behind the design, implementation and data analyses of ecological investigations.

*Note: Practical activities for students enrolled at the Waurin Ponds (Geelong) campus will be conducted at the Queenscliff Marine Station.*

### Assessment

- Online quizzes 15%
- 2 x in-class tests (20% each) 40%
- Group project presentation 15%
- Scientific report 30%

## SLE251 – Research Methods and Data Analysis

*Offering information: To be offered at Burwood (Melbourne), Waurm Ponds (Geelong) and Warrnambool from 2020*

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurm Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBS251*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Marina Telonis-Scott*

*Prerequisite: Any 2 level one science course-grouped units*

*Corequisite: STP010 for Faculty of Science, Engineering and Built Environment students*

*Incompatible with: HPS201 and HPS301*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 5 x 2 hour computer practicals per trimester.*

### Content

Data is everywhere in the world. Without knowing how to interpret or use information from the data it would be difficult to understand its meaning. Scientific methods are techniques for investigating a phenomenon, acquiring new knowledge or correcting and integrating previous knowledge. SLE251 aims to aid students develop knowledge in using statistics to summarise, describe and interpret scientific data and perform statistical inferences. In this unit, students will develop knowledge of the fundamentals of scientific research methodologies and analytical techniques for answering real-world questions. This will involve learning about the principles of hypothesis testing and experimental design. Students will also be required to use statistical software to analyse data and interpret results using tests of population means, analysis of variance, chi-square tests, correlation and linear regression. They will also learn through career education how to articulate that the skills they have acquired are relevant and appropriate to future employers.

### Assessment

- Online test 10%
- Practical reports 20%
- Scientific report 40%
- Examination 30%

## SLE254 – Genetics and Genomics

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurm Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Beata Ujvari*

*Prerequisite: SLE111 or SLE144*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 4 x 3 hour practicals per trimester.*

### Content

The basic principles of genetics will be examined in this unit and topics covered will span the basis of heredity through to evolution and genetic diversity. This unit will cover Mendelian genetics, chromosomal structure, mutation and DNA repair, sex determination, the Hardy-Weinberg principle, recombination, linkage and disequilibrium, natural selection, genetic drift, and inbreeding and non-random mating. Additionally, students will develop laboratory techniques/skills relevant to researching genetics, in a group environment, and ascertain how research projects are undertaken in this discipline.

### Assessment

- Examination 50%
- Practical projects 30%
- 2 x in-class tests (10% each) 20%

## SLE261 – Diversity of Fishes

*Enrolment modes: Trimester 2: Warrnambool, Waurm Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQB261*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Ty Matthews*

*Prerequisite: One of SLE111, SLE132, SLE103 or SLE144*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 3 x 3 hour practicals per trimester.*

## Content

SLE261 introduces students to the diversity of fishes by focusing on body form and function, ecology, evolution, phylogeny and taxonomy and the biology of sharks (elasmobranchs) and fishes (teleosts). Taxa present in both marine and freshwater systems are covered and various adaptations to different ecosystems and habitats are discussed. Students experience the great diversity of fish body form via a series of practicals that include the handling and dissection of fresh specimens. Learning about fish body form is important for understanding fish movement, swimming and feeding. Aspects of fish body form can also provide clues about the habitat occupied by different specimens (e.g. benthic versus pelagic species).

*Note: Practical activities for students enrolled at the Waurin Ponds (Geelong) campus will be conducted at the Queenscliff Marine Station.*

## Assessment

- Case study report 25%
- Practical report 25%
- 2 x in-class tests (25% each) 50%

## SLE262 – Aquaculture and the Environment

*Enrolment modes: Trimester 2: Warrnambool, Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQB161, SLE161*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: David Francis*

*Prerequisite: Nil*

*Corequisite: SLE010*

*Incompatible with: SLE161*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 5 x 3 hour practicals per trimester, 3 x 3 hour fieldwork activities per trimester.*

## Content

The overall purpose of this unit is to develop student's knowledge of aquaculture in a global context, both from human and animal perspectives, and to develop their understanding of the positive and negative effects various aquaculture systems can have on the environment and the inter-dependence of aquaculture with commercial fisheries.

*Note: Practical activities for students enrolled at the Waurin Ponds (Geelong) campus will be conducted at the Queenscliff Marine Station.*

## Assessment

- Investigative report 25%
- Group practical report 25%
- Class tests (2 x 15%) 30%
- Online quizzes (4 x 5%) 20%

## SLE263 – Marine and Coastal Ecosystems

*Enrolment modes: Trimester 1: Warrnambool, Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQB263, SQB336*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Patricia Corbett*

*Prerequisite: One of SLE103, SLE144 or SLE132*

*Corequisite: SLE010 and STP010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour face-to-face seminar per fortnight, 1 weekend fieldtrip during the trimester (8 hours per day over 2 days).*

## Content

SLE263 introduces students to the functioning of marine ecosystems and the adaptations of biota to their physical environment. Students will explore the conceptual basis for ecosystem ecology as well as the characteristics of key coastal ecosystems (rocky, sandy and muddy shores, mangroves, saltmarshes, estuaries), continental shelves, oceanic, deep-sea and polar ecosystems, and tropical coral reefs. Learning and assessment activities in this unit will provide students with the opportunity to explore commonalities and differences in major marine and coastal ecosystems and test their ability to incorporate, apply and communicate their knowledge in a real-world context. Students must work collaboratively; research and assimilate information; engage in field and laboratory work; collect, analyse and synthesise data; and connect theory with ecosystem structure.

*Note: Students may be required to meet their own expenses for the fieldtrip.*

*Students enrolled at the Waurin Ponds (Geelong) campus are required to attend a weekend fieldtrip at the Queenscliff Marine Station.*

Students enrolled at the Warrnambool campus are required to attend a weekend fieldtrip at the Warrnambool campus.

### Assessment

- Field report 30%
- Review poster 20%
- Examination 50%

## SLE265 – Marine Botany

Enrolment modes: Trimester 1: Warrnambool, Waurn Ponds (Geelong)

Credit point(s): 1

Previously coded as: SQB265

EFTSL value: 0.125

Trimester 1 Unit Chair: Alecia Bellgrove

Prerequisite: One of SLE106 or SLE111, and one of SLE132 or SLE144

Corequisite: SLE010

Incompatible with: Nil

Scheduled learning activities – campus: 10 x 1 hour practicals per trimester, 8 x 3 hour practicals per trimester, 2 x 1 day fieldtrip (weather permitting), 1 x 6 hour workshop.

### Content

SLE265 will allow students to explore key concepts in marine botany. Students will have the opportunity to learn how to recognise key characteristics of different groups of marine plants and identify and preserve specimens. Students will investigate the evolution and diversity of marine plants and the roles plants play in marine ecosystems, global carbon budgets, and aquaculture and commercial applications. The unit will provide interactive and hands-on laboratory, and field-based practicals, which will enable students to develop skills in recognising the influence of anthropogenic factors that threaten marine plants.

*Note: Practical activities for students enrolled at the Waurn Ponds (Geelong) campus will be conducted at the Queenscliff Marine Station.*

### Assessment

- Group project report and oral presentation 15%
- Practical task 25%
- 4 x online quizzes 20%
- Practical examination 40%

## SLE266 – International Marine Study Tour

Enrolment modes: Trimester 3: Study Tour

Credit point(s): 1

EFTSL value: 0.125

Trimester 3 Unit Chair: Alecia Bellgrove

Prerequisite: Must have completed at least 8 credit points of study

Corequisite: Must be enrolled in S320, S321, S369, S393, S398, S399

Incompatible with: Nil

Scheduled learning activities – campus: The study tour experience will commence on 13 November–1 December 2019. Students will be expected to participate in a 2 day full day pre-departure workshop.

### Content

This unit will take students on an international marine study tour where they will gain the opportunity for hands-on marine and/or aquaculture experiences beyond what they can participate in at their home campus. International tour destinations will enable students to apply and develop their learning about globalization, international cultural issues and the role of cultural diversity in how marine resources are exploited and managed. Students will engage with staff and students from home and partner institutions and develop skills in communication with a range of audiences. Students will be expected to work both individually and as members of teams to develop their skills in independent learning and effective team work.

*Note: Entry to this unit is via application and interview. Students are required to fund their own travel and accommodation costs and activities undertaken in this unit. Scholarships are available to assist in 2018 and 2019.*

### Assessment

- Preparation and performance 40%
- Group oral presentation 20%
- Written report 40%

## SLE301 – Professional Practice

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrnambool, Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQA301*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Raylene Cooke*

*Cohort rule: This unit is only available to students enrolled in S369, S393, S394, S398, S382, S399*

*Prerequisite: STP010 and must have completed 12 credit points of study*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 6 x 2 hour compulsory classes per trimester.*

### Content

Integrating study and work experience in a systematic way is essential for forging close links between the university education process and the workplace. In SLE301, students will have the opportunity to gain professional work experience with a course-related host organisation, approved by the unit chair, for a minimum of 80 hours. Students will develop generic, employment-related professional skills in the field of environmental science through a combination of preparatory seminar sessions together with a minimum 80-hour work placement. There are many benefits to students and employers from undertaking relevant work placements during study. The key benefit is that it prepares students for work and a career in the field of environmental science. Learning and assessment activities in this unit will help students to develop an appreciation for work-life and to make decisions about personal, professional and career development. Most importantly, it will provide students with relevant evidence of experience and skills when applying for future work.

*Note: Enrolments after commencement of trimester is subject to Unit Chair approval.*

*Note also that delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

### Assessment

- Job application package 30%
- Mock interview 15%
- Work placement performance evaluation report 15%
- Professional portfolio 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must complete 80 hours of placement to the satisfaction of the host organisation.

## SLE302 – Wildlife Field Studies

*Enrolment modes: Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQB302*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Mike Weston*

*Prerequisite: SLE220 and SLE226*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Intensive: To be held over the inter-trimester break between Trimester 2 and into Trimester 3. There will be 6 days of classes and practicals (7 hours each day) and a 6 day field trip. Some assessment will be due during Trimester 3.*

### Content

This unit focuses on how wildlife populations are studied in the field. Students will learn, through hands-on experience, how to survey for wildlife using techniques such as trapping, pitfall trapping, observational surveys and camera-based surveys. Field studies will focus on the interrelationships between flora and fauna and how this understanding can be used in management. This unit aims to develop strong practical field techniques. The unit will also further develop written and oral communications skills, experimental design, data analysis and teamwork skills.

### Assessment

- Literature review on survey techniques 35%
- Individual presentation on survey techniques 20%
- Manuscript (group) 45%

## SLE303 – Managing Environmental Projects

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQE301*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Madeleine Johnson*

*Prerequisite: Any two level 2 SLE coded units OR one level 2 SLE coded unit plus MMP222 OR SHD201/301 plus MMP222*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 2 hour seminar per week.*

### Content

This unit addresses the planning, management and evaluation of projects and contracts in the environmental industry. The unit places an emphasis on working within the current public sector planning and budgetary contexts. It also addresses management processes generally and processes, procedures and perspectives operating in private enterprises within the environmental management sector. There are two major themes in the subject matter: professional practice in environmental management, and project and contract management in the environmental industry. These themes are addressed in tandem and weave together throughout the unit. Projects and contracts are the subject matter. Professional practice is the way the material is acted upon. Relationships between the client, customers, stakeholders, the project manager and the project team are discussed. The importance of organisational style and human resources management to those relationships is also identified.

### Assessment

- Two tests (25%, 20%) 45%
- A three-part environmental project planning assessment task – part A background to the project (6%), part B project plan (34%), part C gantt chart (15%) 55%

## SLE304 – Geographic Information Systems: Uses in Aquatic Environments

*Enrolment modes: Trimester 1: Warrnambool, Warrnambool Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQP302*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Alex Rattray*

*Prerequisite: Any 2 level two science course-grouped units*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week*

### Content

SLE304 will allow students to develop and demonstrate knowledge and skills of geographic information systems (GIS) including the GIS software, types of data, database management, geospatial data manipulation, geospatial data interpretation and presentation and critical evaluation of processes and results. Applying the principles of remote sensing and knowledge of GIS software, students will manipulate GIS layers; collect and correct GPS data, querying and presenting GIS data; analyse spatial and temporal patterns; and identify the role, benefits, limitations and applications of GIS in studying aquatic ecosystems and water resources. In this unit, students will be required to acquire significant practical and theoretical knowledge of geospatial systems and analysis through extensive problem solving and practical application in geospatial tasks. This is a level-three unit and students are expected to work independently and as part of collaborative groups to solve problems and present work. The work must provide a synthesis of geospatial and be presented in a coherent, understandable and structured form.

### Assessment

- Geospatial remote sensing report 30%
- Complex geospatial remote sensing report 30%
- Multivariate geospatial remote sensing applications report 40%

## SLE305 – Integrating Marine, Coastal and Catchment Management

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQE305*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Janine McBurnie*

*Cohort rule: Must be enrolled in S398*

*Prerequisite: Any two level 2 SLE-coded units*

*Corequisite: Nil*

*Incompatible with: SLE755*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 3 hour practical per week*

### Content

Global concepts and the theoretical basis of integrated land and sea management, e.g. Integrated Catchment Management and Integrated Coastal Zone Management are introduced. A case study of a global leader in integrated coastal zone and catchment management (Victoria) is used to illustrate the implementation of the concepts. Approaches taken to the integrated management of catchments and coasts and the roles of government, semi-government and local government authorities, and non-government organisation and the community in management are described and discussed. Overlaps of responsibility, possible conflicts of interest, and unclear boundaries of responsibility are identified. The State of Victoria is to be used as a case study of an attempt to integrate catchment and coastal management. The logic of the catchment as an area for both management and planning purposes is discussed. Methods used to evaluate the social, biophysical and land-use characteristics and to develop community awareness and involvement in problems with catchment associated with catchments and coasts are described.

*Note: Students may be required to meet their own expenses while on fieldwork.*

### Assessment

- Two in-class tests 30%
- A group report (includes oral presentation) 40%
- Essay 30%

## SLE307 – Behavioural Ecology

*Enrolment modes: Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: John Arnould*

*Prerequisite: SLE204*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Intensive: Students are required to attend an intensive mode short course (classes and seminars) taught in last week of January and first week of February at Burwood (Melbourne). Some assessments due after intensive short course finishes PLUS exam.*

### Content

This unit is designed to enable students to: gain an understanding of the basic principles of behavioural ecology and how the environment influences animal behaviour; further develop skills in analysing, interpreting and critically evaluating scientific data; gain experience in writing scientific reports and making an oral presentation.

### Assessment

- Group research project (literature search and hypothesis generation 10%, study design 10%, data collection and analysis 10%, write-up 10%) 40%
- Oral presentation 10%
- Examination 50%

## SLE308 – Policy Instruments for Sustainability

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQE302*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Brett Bryan*

*Prerequisite: Any two level 2 units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week.*

## Content

Topics to be addressed in this unit include, the interaction of policy at the international, national, state, local and industry levels; the roles and responsibilities of individuals, community groups, industry, institutions and various levels of government and authorities in policy processes; the role of political and social factors in the development of policy; the range of processes which lead to policy formulation and implementation; the use of educational, economic and regulatory policy instruments to achieve environmental goals; evaluation of the effectiveness of policies; techniques for conducting environmental audits; use of life cycle analysis as a decision making tool; implementation of environmental management systems.

## Assessment

- Environmental debate (group) 15%
- Policy analysis exercise (group) 30%
- Policy preparation and case study 40%
- Online test 15%

## SLE309 – Wildlife Conservation

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQB309*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mike Weston*

*Prerequisite: SLE220 plus one level 2 SLE-coded unit*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 x 1 hour class per week.*

## Content

This unit will focus on developing students' knowledge and understanding of Australian wildlife, particularly in relation to the major issues concerning the conservation and utilisation of these species and their habitats. The unit examines the theoretical and practical applications of conservation biology with an emphasis given to conservation problems and their potential solutions in an Australian context. Topics covered include endangered species recovery programs; wildlife policy, laws and management plans; wildlife management and population modelling; applied problems in wildlife conservation, including harvesting/exploitation of wildlife, control of overabundant native wildlife and conservation of threatened species; and human dimensions of wildlife management and decision making.

## Assessment

- Impact assessment 10%
- Group workshop 10%
- Group essay (2000 words) 40%
- Examination 40%

## SLE310 – Pest Plants and Animals

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQB310*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Desley Whisson*

*Prerequisite: Two level 2 SLE-coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 2 hour class per week, 1 x 1 day field trip.*

## Content

The damaging impacts of pest plants and animals on natural and productive systems are widely recognised, and in native ecosystems they pose a serious threat to the conservation of biodiversity. This unit focuses on the ecology and management of pest plants and animals, especially introduced species. Topics covered include reproduction, distribution and persistence of pest species, and the relevant state and national legislation. Control strategies, including biological, chemical and mechanical techniques will be examined, and integrated pest management will be emphasised using case studies. A 1 day field trip to an urban reserve will be undertaken to observe pest problems and to consider the challenges of management.

*Note: Students may be required to meet their own expenses while on fieldwork.*

## Assessment

- Evaluation of a pest plant management strategy 30%
- Pest animal management strategy (group) 30%
- Examination 40%

## SLE311 – Chemical Hazards

*Enrolment modes: not available from 2019*

*Credit point(s): 1*

*Previously coded as: SBC311*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Trevor Thornton*

*Prerequisite: SLE212 or SLE222 or one level 2 or level 3 chemistry unit*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit covers the chemistry of hazardous substances; fire and explosion; oxidants; corrosive agents; gases and vapours; toxic substances; biohazards; regulatory aspects; legislation; exposure standards; material safety data sheets; air sampling and applications of chemical analysis, including spectrometry, chromatography, asbestos counting, direct reading instruments and quality control in chemical analysis, biological monitoring and biohazards. It also provides the basis for understanding of the investigation of accidents and crime involving chemicals such as fire and explosion.

### Assessment

- Examination 60%
- 3 x online quizzes (multiple choice and short answer) (10% each) 30%
- Online practical 10%

## SLE312 – Toxicology

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SBC312*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Trevor Thornton*

*Prerequisite: One level 2 chemistry or biology unit must have been completed (one of SLE212, SLE222, SLE211, SLE221, SLE234) or (one of SLE210, SLE213, SLE214, SLE233, SLE235). Biology – particularly physiology and biochemistry, would be an advantage.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit introduces students to the basics of toxicology by explaining how toxic substances are absorbed and interact with biochemical systems and how this leads to clinical effects. The unit is taught with the aid of numerous case studies of actual poisoning in a variety of settings.

Topics addressed include basic toxicology; absorption, distribution, metabolism and excretion of toxins; chemical interactions in biological systems; biochemical interactions in toxicology; mechanisms of toxicity; and target organs, poisons and venoms, toxic chemicals in the environment.

### Assessment

- Two online quizzes (10% each) 20%
- Report 40%
- Examination 40%

## SLE313 – Forensic Analysis and Interpretation

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBF313*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Xavier Conlan*

*Prerequisite: SLE112, SLE155 and one of SLE111 or SLE132. A level 2 or level 3 chemistry unit is recommended.*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 1 hour seminar per week, 1 x 6 hour practical per trimester (Crime Scene House), 2 x 4 hour practical session per trimester.*

### Content

This unit includes: Forensic chemistry and toxicology; including trace chemical evidence, arson and explosives investigations, analysis of illicit drugs, introduction to forensic toxicology. Application of analytical methods in forensic science including uncertainty of measurement, statistic and interpretation of evidence are covered. Management and quality assurance, including quality control, traceability, management of forensic science provision, professional ethics are another focus. Laws of evidence relating to the admissibility of expert evidence will be illustrated by selected case studies.

## Assessment

- Two in-class tests (20% each) 40%
- Practical crime scene house analysis 30%
- Oral presentation – moot court 15%
- Showcase portfolio 15%

## Prescribed texts

Siegel & Houck, 2015, Fundamentals of Forensic Science, 3rd edition, Academic Press

## SLE314 – Research Project

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrnambool, Warrnambool (Geelong)*

*Trimester 2: Burwood (Melbourne), Warrnambool, Warrnambool (Geelong)*

*Trimester 3: Burwood (Melbourne), Warrnambool, Warrnambool (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBS311*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Paul Jones*

*Trimester 2 Unit Chair: Paul Jones*

*Trimester 3 Unit Chair: Paul Jones*

*Prerequisite: Students would normally be expected to have a weighted average mark of 70% for all completed units, please contact the Unit Chair prior to enrolling in this unit.*

*Corequisite: Must be enrolled in S382, S393, S398, S321, S323, S324, S320, S399, S394, S369, D311, D321, D351, D372, D331, or D329*

*Incompatible with: SQA302, SLE344*

*Scheduled learning activities – campus: Students are expected to attend meetings with the Unit Chair and/or supervisor.*

## Content

This unit involves a substantial piece of independent research conducted under the supervision of a member of staff. Students will not be permitted to take more than one credit point, within the School of Life and Environmental Sciences, from this offering.

## Assessment

- Written report 50%
- Oral presentation 20%
- Supervisor mark 20%
- Research project proposal 10%

## SLE315 – Marine Animal Physiology

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Luis Afonso*

*Prerequisite: One of SLE204, SLE211, SLE219, SLE265, SLE232, SLE255 or SLE221*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 hour seminar per module will be delivered via Cloud Deakin.*

## Content

This unit focusses on the physiology of marine animals in the context of their environment. Examples are drawn from a range of taxa, with a focus on the challenging environments in which they live; such as polar regions, deep oceans, estuaries and the tropics. Topics include feeding and digestion, respiration, salt and water balance, temperature regulation, metabolism and animal size, locomotion and migration, and sensory organs.

## Prescribed texts

Moyes & Schulte, 2015, Principles of Animal Physiology, 3rd edition, Pearson Education

## SLE316 – Analytical Chemistry

*Enrolment modes: Trimester 1: Warrnambool (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBC316*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Neil Barnett*

*Prerequisite: SLE213 and SLE229*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 4 x 6 hour practicals per trimester.*

## Content

This unit builds upon prior chemical knowledge, in relation to spectroscopy and separation science, and introduces the fundamental principles and applications of certain analytical techniques, which are at the cutting edge of instrumental development.

Additionally, there is a significant emphasis on the utilisation of such techniques for solving real problems in chemical measurement. Areas of study will include: luminescence spectroscopy; atomic emission spectroscopy; 2D chromatography; mass spectrometry and automation/miniaturisation of chemical analysis.

### Assessment

- Three in-class tests (20% each) 60%
- Practical problem solving task 15%
- Poster presentation 25%

### Prescribed texts

Christian et al ( Editors ), 2013, Analytical Chemistry, 7th Ed, John Wiley & Sons

## SLE317 – Australian Vegetation and Its Management

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Tricia Wevill*

*Prerequisite: Two level 2 SLE-coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 4 x 3 hour practical sessions per trimester plus 1 three-day field trip.*

### Content

SLE317 will provide a practical and theoretical introduction to the ecology of major terrestrial vegetation groups of Australia. Critical issues in their conservation and management, including threatening processes, climate change, rare, threatened and vulnerable communities, the science underpinning ecological restoration and assessing vegetation quality will be explored. Students will develop skills in the identification of major Australian plant families and vegetation sampling techniques, which are necessary to manage Australian vegetation.

*Note: Students may be required to meet their own expenses while on fieldwork.*

### Assessment

- 1 x practical test 10%
- 2 x written reports (30, 20%) 50%
- 2 x in-class tests (20% each) 40%

## SLE318 – Synthetic and Medicinal Chemistry

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrnambool (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBC318*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Fred Pfeffer*

*Prerequisite: SLE214 and at least four other level 2 units*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 6 hour practical class per trimester.*

### Content

SLE318 will develop the ability to predict the chemical properties of organic molecules and propose sensible mechanisms to account for their transformations. Students will be introduced to medicinal chemistry with an emphasis on pharmaceuticals that target cell wall receptors and enzymes. Antibiotic function will also be explored, in particular agents that target bacterial cell walls. This unit is intended for students in forensic science, biotechnology, chemistry and biomedical science.

### Assessment

- Three in-class tests (1 x 20%, 2 x 15% each) 50%
- Research paper 30%
- Poster presentation 20%

## SLE319 – Environmental Protection and Planning

*Enrolment modes: Trimester 2: Warrnambool, Warrnambool (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQE315*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Madeleine Johnson*

*Prerequisite: Must have completed a minimum of 8 SLE or SEV-coded units*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week.*

## Content

Careful planning is essential to ensure sustainable management of both aquatic and terrestrial environments. SLE319 provides students with foundation knowledge in environmental planning by introducing them to planning legislation, government planning responsibilities, planning procedures and public participation. Students will explore real-world application of planning for environmental protection through local case studies. Environmental planning techniques, such as environmental impact assessments, will be examined and skills in using these techniques will be developed and tested. These skills are vital for application when providing environmental protection through the planning process. Particular emphasis in the unit will be on regional planning for offshore and coastal marine environments and the linkages between these and environments of water catchments. While undertaking this unit students will be expected to prioritize tasks and manage their time appropriately; demonstrate their written communication skills; use local case studies to collect, analyse, assess and make judgements regarding environmental impacts of proposals; demonstrate a sound knowledge in environmental planning; and collaborate with other students to explore and solve environmental planning problems.

## Assessment

- Case study report 25%
- Environmental effects statement 30%
- Practical tasks 15%
- Examination 30%

## Prescribed texts

Elliott & Thomas, 2014, Environmental Impact Assessment in Australia: Theory & Practice, 6th edition, Federation Press

## SLE320 – Resource Efficiency and Waste Management

*Enrolment modes: Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQE308*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Trevor Thornton*

*Prerequisite: Any 2 level 2 units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Intensive: Students are expected to attend an intensive mode short course taught over 5 days.*

## Content

Topics to be addressed in this unit include:

- Regulatory controls on waste management
- Techniques for conducting waste audits
- Use of life cycle analysis as a decision making tool
- Waste minimisation, reuse and recycling techniques
- Cleaner production techniques
- Waste management technologies
- Municipal waste management
- Development of waste management strategies
- Implementation of waste management systems

## Assessment

- Practical assignment 10%
- Essay (2000 words) 20%
- Scenario investigation (1000 words) 10%
- Case study 40%
- Class test 20%

## Hurdle requirement

To be eligible to receive a mark for summative assessment task 4 (case study) students must complete and submit the provided risk assessment form (off-campus activities safe work method statement) prior to undertaking the waste assessment at the selected organisation.

## SLE321 – Molecular Biology Techniques

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Steve Cheung*

*Prerequisite: One of SLE206, SLE221, SLE234 or SLE254*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 6 x 3 hour practicals per trimester.*

## Content

Molecular biology techniques are common methods used in cell and molecular biology which involve manipulation nucleic acid. SLE321 is designed for students to apply knowledge of molecular biology technique in the fields of biochemistry, genetics, and medicine.

In this unit, student will learn concepts and latest methodological advances in molecular biology and examine the varied applications of recombinant DNA techniques to forensics, medicine, agriculture and systematics and ecology. In practical sessions, students will learn essential skills in molecular biological experimentation. They will be required to apply knowledge that relates to modern molecular biology techniques to investigate the isolation and transformation of gene from different plasmids. They will also learn principles of gel electrophoresis, extraction and analysis of DNA, polymerase chain reaction (PCR)-mediated amplification and identification of DNA molecules, cloning and expression of DNA fragments or genes to explore the importance of gene expression and regulation.

### Assessment

- In-class test 20%
- Practical report 35%
- Examination 45%

## SLE322 – Landscape Ecology

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Emily Nicholson*

*Prerequisite: Two level 2 SLE-coded units*

*Corequisite: Nil*

*Incompatible with: SLE736*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 5 x 3 hour practicals per trimester, field work (up to 15 hours).*

### Content

Landscape ecology is the study of spatial patterns in the environment, how these patterns affect ecological processes, and the implications of pattern and process for land management and nature conservation. It integrates the study of flora fauna, physical environmental factors and the place of people in the landscape. In this unit we will address topics including: the structure of natural and modified landscapes; land transformation and habitat fragmentation; patch dynamics; edges; corridors and connectivity; land mosaics; major concepts used to describe and communicate the spatial dynamics of populations, and how plant and animal populations respond to landscape patterns.

We will give particular attention to the application of landscape ecology to sustainable land management and biodiversity conservation, using many national and international case studies.

### Assessment

- Examination 30%
- Video summary of literature 20%
- Major project report 35%
- Practical quizzes (3 x 5% each) 15%

## SLE323 – Advanced Topics in Biomedical Science

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrnambool (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Steve Cheung*

*Prerequisite: Any two of SLE221, SLE222, SLE254, or SLE234*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

SLE323 is designed for students to apply knowledge of biology and physiology in the fields of health, nutrition and fitness. In this unit, students will examine possible genetic and environmental causes of a limited number of common diseases: hypertension, stroke, myocardial infarction, hepatitis, peptic ulceration, arthritis and Alzheimer's disease. By applying scientific thinking, students will expand on their knowledge of body systems by exploring the causes of disease, the malfunctions that occur to these body systems in the presence of disease and the consequences of these changes at a molecular and cellular level. This unit covers current concepts, controversies and latest methodological advances in human biology, to develop graduates as professionals. Students will develop critical awareness of biomedical science concepts and the ability to exercise independent and scientifically justified views.

### Assessment

- Examination 45%
- Online quiz 15%
- Portfolio 40%

## SLE324 – Australian Vertebrates

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Kaori Yokochi*

*Prerequisite: SLE204*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 3 x 4 hour practicals per trimester.*

### Content

This unit is designed to enable students to gain an understanding of Australian vertebrate zoogeography, evolution, diversity, ecology, and conservation. Students will develop skills in the collection of ecological data, the field identification of different taxa, and interpretation and communication (oral and written reports) of scientific research.

### Assessment

- Oral presentation 10%
- Written report 30%
- Class test 20%
- Examination 40%

## SLE325 – Marine Ecotoxicology and Risk Assessment

*Enrolment modes: Trimester 2: Warrnambool, Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Julie Mondon*

*Prerequisite: SLE105 and one of SLE133, SLE150, SLE252, SLE306 or SLE223*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week (for 6 weeks), alternating with a 1 x 3 hour practical per week (for 5 weeks).*

### Content

SLE325 enables students to develop a multidisciplinary knowledge of the links between organisms and their response to physical and chemical contaminants and anthropogenic disturbance in the environment.

Learning and assessment activities in this unit will provide students with the opportunity to examine the conceptual basis for ecotoxicology and ecological risk assessment. Impacts linked to human activities such as mining, coastal development, waste discharges and exotic species will be investigated, and will be considered in the broader context of a changing climate. Students will be working independently and collaboratively to research and practice methods for assessing ecological/toxicological risks and identification of impacts through current case studies and applied field/laboratory exercises.

*Note: Practical activities for students enrolled at the Waurin Ponds (Geelong) campus will be conducted at the Queenscliff Marine Station.*

### Assessment

- 2 x in-class tests (25% each) 50%
- Practical report 25%
- Scientific report and oral presentation 25%

## SLE326 – Landscape Drones

*Enrolment modes: Trimester 3: Warrnambool*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Daniel Ierodiaconou*

*Prerequisite: Any two level 2 units (Demonstration of 2 years experience will also be considered for single subject enrolments).*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1-week intensive to be held at the Warrnambool Campus from Monday 2 December – Friday 6 December 2019.*

### Content

Unmanned Aerial Vehicles (UAVs) are an emerging and quickly growing industry, filling an important knowledge gap in the collection of remote sensing data in a range of fields including environmental research, monitoring, and management as well as urban planning, mining, infrastructure management, asset inspection etc. They are capable of capturing imagery faster and at a higher resolution than available for satellite imagery and allow for the creation of 3D models from relatively cost-effective platforms. This unit aims to provide students with important theory and basic skills in the use of UAVs for remote sensing data acquisition, as well as exploring data analysis, storage, and presentation in the most commonly-used industry software.

The unit introduces the basic principles of using UAVs for remote sensing data acquisition, and includes both theoretical and practical components. The unit covers basic UAV use, data display and manipulation and spatial analysis. Students will achieve basic competency in the use of UAVs through practical exercises. This course is specifically designed for researchers and managers wanting to take control in their imagery acquisition using UAV technology.

### Assessment

- Quizzes (4 x 5% each) 20%
- Flight competency test 30%
- Poster presentation 20%
- Knowledge test 30%

## SLE328 – Oceans, Coasts and Climate Change

*Offering information: Available from 2020*

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Kelly Miller*

*Prerequisite: Any two level 2 SLE-coded units*

*Corequisite: Nil*

*Incompatible with: SLE728*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin. Students are also required to attend 3 x 3 hour class per trimester at the Burwood (Melbourne) campus.*

### Content

The internationally accepted concept of integrated coastal management (ICM, termed ICZM – integrated coastal zone management in Australia) is introduced, described and analysed. International advances and initiatives in marine and coastal affairs such as conventions and agreements, for example the United Nations Convention on the Law of the Sea (UNCLOS), are described and analysed. The varying approaches adopted towards ocean and marine policy and implementation of chapter 17 of Agenda 21 (Rio Convention) will be covered. Australia's approach to marine and coastal policy and management will be concentrated on as an example of a national approach towards implementing integrated marine and coastal management. The dominant influence of climate change policy on marine and coastal policy will be described along with the increasing reference base on this subject area.

Other topics covered will include Australia's ocean policy and changes in Federal Government coastal policy in the last few years. An overview of the approaches taken in various Australian states towards implementing integrated coastal management will be described and analysed.

### Assessment

- Written report on international/national issue, concept or policy 30%
- Reading assignment 30%
- Essay 40%

## SLE329 – Aquatic Animal Health and Reproduction

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQB361*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Luis Afonso*

*Prerequisite: Any 2 level 2 SLE-coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 classes per week (1 x 1 hour and 1 x 2 hour), 4 x 3 hour practicals per trimester.*

### Content

In SLE329, students will learn about the health and reproduction of aquatic animals in an aquaculture context. It will primarily focus on finfish, crustaceans and molluscs, and will explore the major diseases affecting these animals, including a description of the pathogen, clinical signs, diagnostic techniques, treatments and disease management. This unit will also explore fish reproductive endocrinology, natural and hormone-induced reproduction, and techniques for sex control. Students will develop fundamental and applied skills applicable to different species cultured in freshwater and saltwater environments.

### Assessment

- In-class test 30%
- Group oral presentation 15%
- 2 x practical reports 15%
- Examination 40%

## SLE330 – Materials Chemistry

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gaetan Girard*

*Prerequisite: One unit in SLE210, SLE214 or SLE235*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 1 x 1 hour seminar per week, 3 x 4 hour practicals per trimester.*

### Content

The materials we use are so central to the advancement of human civilization that we use them to define our history (eg. stone age, iron age, silicon age). This unit will provide a basic introduction to materials chemistry using general theory and real world examples to give students an understanding of structure/property relationships, materials synthesis, materials characterization, and materials selection. The course will present concepts of basic materials science, macromolecular/polymer chemistry, surface and interfacial chemistry, nanotechnology, and biomaterials with a focus on how these materials are made, used, and selected to meet the material needs of modern technology.

### Assessment

- Assignment 1 – 10%
- Assignment 2 (group project) 20%
- 2 x class test (25% each) 50%
- 2 x laboratory exercises/reports (10% each) 20%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the laboratory component

## SLE332 – Geographic Information Systems for Environmental Scientists

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQB331*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Desley Whisson*

*Cohort rule: Must be enrolled in S320, S393, S398*

*Prerequisite: One of SLE239, SLE202 or SLE207*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 2 x 2 hour practicals per trimester.*

### Content

The principles of Geographic Information Systems (GIS) and their application to environmental science will be described. The unit will cover spatial data types and their collection, data manipulation and integration, spatial analysis and display. Student will complete practical exercises to achieve basic competency in widely used GIS software. They will then apply their knowledge and skills in GIS to address a real environmental issue or question.

### Assessment

- GIS exercises (5 x 4%) 20%
- GIS project 50%
- Examination 30%

## SLE334 – Medical Microbiology and Immunology

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrnambool (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Cenk Suphioglu*

*Prerequisite: SLE234*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 3 hour practicals per trimester.*

### Content

SLE334 allows students to explore aspects of microbiology and immunology relevant to understanding infectious disease. Students will be introduced to medical microbiology and immunology using anthrax as a model disease. Students will learn about biology of bacteria, viral and parasitic pathogens of global importance. The practical experience has been designed to replicate some of the investigative strategies and decision making processes used by medical microbiologists to identify potential pathogenic micro-organisms from various clinical specimens. Many of the techniques students will apply are those commonly used by practicing microbiologists in their routine work.

Learning and assessment tasks will enhance the students understanding of infectious diseases, the immune response to infectious disease, diagnosis, the development of candidate vaccines and the identification of pharmacological targets for antimicrobial therapeutics.

## Assessment

- In-class test 15%
- Infectious disease report 15%
- Practical work 20%
- Examination 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the laboratory component.

## Prescribed texts

Dockrell and Goering, 2018, Mims' Medical Microbiology, 6th Edition, Elsevier Science

Microbiological Laboratory Techniques Manual – University of Melbourne

# SLE338 – Electrochemistry for a Sustainable Future

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Angel Torriero*

*Prerequisite: One unit in SLE210, SLE214 or SLE235*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour scheduled online seminar per fortnight, 1 x 1 hour face-to-face seminar in alternate fortnights, 4 x 4 hours on-campus laboratory practical sessions.*

## Content

Electrochemistry is found in a large number of natural and industrial applications. In this unit, students will learn the fundamentals of electrochemistry, and the applications of electrochemical methods to develop sustainable solutions using chemical processes. They will study the potential and thermodynamics of cells; kinetics of electrode reactions; mass transport processes into electrochemical systems; potentiostatic and galvanostatic electrochemical techniques which forms the basis for work as an electrochemist who work in diverse industries including research, medicine, manufacturing and energy sectors specialising in sensing, chemicals, matter and energy.

## Assessment

- Practical reports 20%
- Practical assessment 30%
- Learning portfolio 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 50% in the practical assessments.

## Prescribed texts

Bard & Faulkner, 2000, Electrochemical Methods: Fundamentals and Applications, 2nd edition, John Wiley & Sons

# SLE339 – Human Genetics and Genomics

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mark Guthridge*

*Prerequisite: SLE254*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour class per week, 5 x 3 hour practicals per trimester.*

## Content

This unit concentrates on modern molecular aspects of genetic diseases using a case study approach. This will be valuable for students considering a clinical or medical research career. Various genetic diseases will be studied to illustrate principles of Mendelian and non-Mendelian genetics, mapping, linkage and isolation of human disease genes, mutation analysis, molecular pathology, prenatal diagnosis, gene therapy, carrier detection and ethical issues. Links to current research projects and clinical trials will be emphasised. Expert guest lecturers from other institutions will teach aspects of cytogenetics, genetic counseling and epigenetics.

## Assessment

- Examination 50%
- Practical projects 30%
- 2 x class tests (10% each) 20%

## Prescribed texts

Read, 2015, New Clinical Genetics, 3rd edition, Scion Publishing Ltd

## SLE340 – Genomes and Bioinformatics

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Beata Ujvari*

*Prerequisite: SLE254*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 3 hour practicals per trimester.*

### Content

Topics will include the theory and practise of Bioinformatics. This will include the analysis of sequence data using databases and the analysis of phylogenetic and population genetic datasets. In addition the unit will cover the process of molecular evolution and the application of this knowledge in understanding how genomes evolve. This genomic evolution will be discussed in relation to the resulting evolution in developmental processes. Molecular markers and their use in genetic mapping of both single and multiple genes that contribute to the production of traits and their use examined in phylogenetic reconstruction and population genetics will be discussed. Students will learn about high throughput next generation sequencing methods and genome assembly and annotation. Additionally, students will develop laboratory techniques/skills relevant to bioinformatics, in a group environment, and ascertain how research projects are undertaken in their discipline.

### Assessment

- Examination 45%
- Class test 25%
- Individual assignment 15%
- Group oral presentation 15%

### Hurdle requirement

In order to obtain a pass in this unit student must achieve 50% in the practical and presentation sessions.

## SLE341 – Ecological and Conservation Genetics

*Enrolment modes: Trimester 1: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Craig Sherman*

*Prerequisite: SLE254*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 3 hour practicals per trimester, 4 x 2 hour seminars per trimester, 1-day (7 hour) fieldtrip.*

### Content

In this unit students will cover the theory and practice of collecting and applying genetic data to ecological, evolutionary and conservation questions. Students will learn how genetic data can be used to understand ecological and evolutionary processes that occur at the species, population and individual levels. Topics covered include population genetics, molecular approaches to behavioural ecology, molecular and adaptive variation, phylogeography, speciation and hybridization, conservation genetics, epigenetics and phenotypic plasticity. Drawing on examples from animals, plants and micro-organisms, students will apply their knowledge to specific problem based learning activities and will gain hands on experience in the statistical analysis of ecological genetic data.

### Assessment

- 3 x online quizzes 15%
- Problem solving written report 15%
- Scientific report 30%
- Examination 40%

## SLE342 – Risks to Healthy Environments

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Trevor Thornton*

*Prerequisite: Must have completed one of HSH205, SLE102, SLE103, SLE121, SLE201 or SLE207*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 1 x 1 hour online seminar per week.*

### Content

This unit provides students with the knowledge and skills necessary to identify and address risks to healthy environments. Through case studies of urban, industrial, agricultural and/or natural environments at risk, students will assess the role of techniques such as indices of environmental health, epidemiology, toxicology and statistics and evaluate environmental and health concerns. They will also study the limitations associated with the various risk assessment techniques; approaches to risk management through policy, legislation, planning and management; risk management principles and planning; appropriate risk avoidance and minimisation; and integration of risk management with environmental management principles.

### Assessment

- Analysis of environmental risks 30%
- Case study 20%
- Group risk management exercise 50%

## SLE343 – Fisheries Management

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SQB335*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Justin Rizarri*

*Prerequisite: SLE261*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 hours of class per week, 1 day field trip.*

### Content

SLE343 provides students with a broad overview of domestic and global fisheries, fishing methods and varying tools for sustainable ecosystem-based fisheries management. Students will explore the science, policy and economics underlying management activities and the stakeholders involved. In this unit, students are provided the opportunity to interact with fisheries industry representatives and tap in to their professional expertise. This opportunity is invaluable for students as understanding the complexities associated with stakeholder engagement and handling the multifaceted issues that come with managing recreational and commercial fisheries and their associated habitats comes with years of experience in the field. Students are expected to work individually on assignment tasks and attend all lectures and field activities. The level of complexity of materials submitted by students for assessment should reflect a level three unit such that independent thought, evaluation of information and presentation of thoughts and ideas are commensurate with this level.

### Assessment

- Fisheries stock assessment 50%
- Fisheries management evaluation report 15%
- In-class test 35%

## SLE346 – Molecular Basis of Disease

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Agnes Michalczyk*

*Prerequisite: SLE212 and one of SLE206, SLE211, SLE222 or SLE214*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 x 1 hour class per week, 5 x 3 hour practicals per trimester, 1 x 3 hour seminar per trimester.*

### Content

Molecular Basis of Disease is the study of the pathology of human disease at a molecular and cellular level. Building on previous knowledge of biology and chemistry, students will learn general principles of cell pathology and examine the molecular and cellular changes that lead to diverse clinical features seen

in inherited syndromes and multisystem diseases. Fundamental concepts including toxic damage to cells, repair process within cells, cell ageing and mechanisms of cell death will be addressed in this unit. Students will apply knowledge of these fundamental concepts to study common disorders including cancer, diabetes and brain disease as well as explore how the environment can influence disease and the role of trace elements in human biology. During classes students will be exposed to current theories of the molecular basis of disease through articles from the primary scientific literature. In practical sessions, students will learn essential laboratory skills that will enable them to investigate some key concepts in cell biology and their relevance to diagnostic medicine. There will also be a component on medicine and ethical decision-making.

### Assessment

- 1 x in-class test 10%
- Practical reports 40%
- Science showcase 10%
- Examination 40%

## SLE348 – Freshwater Biology

*Enrolment modes: Trimester 1: Warrnambool, Waurn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SLE232*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Adam Miller*

*Prerequisite: SLE111 or SLE132*

*Corequisite: SLE010*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, four self-directed learning tasks, 4 x 3 hour practicals per trimester and a 1-day field trip.*

### Content

This unit includes: an overview of physical, biological, and ecological features of freshwater ecosystems (including rivers, lakes and wetlands from arid, temperate and tropical climates); insights into community compositions, life histories and functional roles of specific taxonomic groups (bacteria, algae, macrophytes, riparian vegetation, aquatic weeds, macroinvertebrates and vertebrates); physical and ecological processes shaping freshwater ecosystems (climate, geology, primary productivity, microbial cycling, detrital food chains); ecological consequences of human activity on freshwater ecosystems (salinisation, sedimentation, water extraction, riparian vegetation

loss, nutrient enrichment); strategies for effective environmental management (including restoration).

*Note: Practical activities for students enrolled at the Waurn Ponds (Geelong) campus will be conducted at the Queenscliff Marine Research Centre.*

### Assessment

- 2 x in-class tests (25% each) 50%
- Fieldtrip report 30%
- 2 x practical reports (10% each) 20%

## SLE350 – Marine Wildlife

*Enrolment modes: Trimester 3: Burwood (Melbourne)*

*Credit point(s): 1*

*Previously coded as: SQB350*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: John Arnould*

*Prerequisite: Two level 2 SLE-coded units.*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Intensive: Students are expected to attend an intensive mode short course run over two weeks (classes and practicals) commencing in the second week of trimester 3 at Burwood (Melbourne) including field trips visiting fur seal and sea bird colonies. Some assessments due after intensive short course finishes.*

### Content

Marine wildlife – marine mammals, birds and reptiles – present particular conservation challenges with many species currently listed as threatened. This unit covers the diversity of marine wildlife groups, the role of wildlife in marine systems, the ecological and physiological adaptations of wildlife to the marine environment (including life history traits and basic biology), and the threatening processes and major issues affecting the conservation of marine wildlife in Australia (e.g. commercial fisheries, human disturbance, marine debris). Field-based techniques for studying marine wildlife will also be covered.

### Assessment

- Group practical reports/individual literature review (5 x 10%) 50%
- Group oral presentation 10%
- Class test 40%

## SLE352 – Community Science Project

*Enrolment modes: Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 1*

*Previously coded as: SBS350*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jan West*

*Prerequisite: STP010 and must have completed 12 credit points of study*

*Corequisite: Nil*

*Incompatible with: SBS250*

*Scheduled learning activities – campus: 1 x 2 hour class per week for the first 4 weeks (Weeks 1–4), then a face to face class will be held every second week (Week 6, 8 and 10). In Weeks 5, 7, 9 no face to face classes will be held. The room will be available for you to use for team meetings. Teaching staff will be available for consultation during these class times. Additionally, students will be required to engage in project work as a team and participate in presenting the outcomes of their project through a community forum in week 11 or 12 of the trimester. This forum will be scheduled during class time, but the class will be extended in that week for Week 11, and during scheduled times in Week 12 (Study week – to be determined). Students will have the choice to present in Week 11 or Week 12.*

### Content

Community Science Project is a Professional Practice core unit within the Bachelor of Science. In this unit, students will apply scientific knowledge, processes and techniques in a team-based project and communicate the value of science to a range of audiences. They will develop professional skills that will allow them to articulate with evidence their graduate capabilities. Through their engagement in authentic projects, students will gain an increased self-awareness of their strengths, identify any weaknesses and learn how to strengthen their knowledge and skills particularly in teamwork and communication, which are highly sought after skills by employers of science graduates.

*Note: Enrolments after commencement of trimester is subject to Unit Chair approval.*

### Assessment

- Project brief 10%
- Learning contract 15%
- Project presentation 25%
- Project outcomes 30%
- Client evaluation 10%
- Response to selection criteria for a job interview 10%

### Hurdle requirement

In order to obtain a pass in the unit, the signed client evaluation form (assessment task 5) must be submitted before marks for the team members are released.

## SLE353 – Asian Conservation and Environment Sustainability: International Study Tour

*Enrolment modes: Trimester 3: Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: John White*

*Cohort rule: Must be enrolled in S320, S321, S369, S382, S393, S394, S398, S399*

*Prerequisite: Must have completed at least 12 credit points of study*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Study Tour: 4 day intensive pre-departure program, 2.5–3 week study tour of Borneo.*

### Content

Social context and cultural background are important drivers of how conservation and environmental sustainability are approached throughout the World. The development of a deeper understanding of the influence of these aspects is best achieved through immersion in a different culture. This unit will improve the understanding of the role of culture and social context in environmental decision making through a study tour of Borneo. Whilst on the tour students will meet with academics, researchers, government agencies and community groups, including local indigenous communities. Aspects such as wildlife conservation, sustainable urban planning, transportation and human/wildlife conflict will be investigated.

*Note: Entry to this unit is via application and interview. Students are required to fund their own travel and accommodation costs and activities undertaken in this unit.*

### Assessment

- Pre-departure seminar 30%
- Group audio-visual presentation 40%
- Reflective journal 30%

## SLE354 – Disease Ecology and Epidemiology

*Enrolment modes: Trimester 2: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Marcel Klaassen*

*Prerequisite: SLE251 and one of SLE204 or SLE205*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week and 4 x 3 hour practicals per trimester.*

### Content

This unit addresses the processes underlying the evolution and ecology of host-pathogen interactions and how these affect animal populations and communities. The unit will involve classes, supplemented by guest lecturers, seminars and small research projects. The unit starts off with addressing the fundamental question why pathogenic organisms are around and how evolutionary processes combined with design constraints in both hosts and the pathogens have shaped host-pathogen interactions in natural settings. Next we will scale up from host-pathogen interactions at the individual level to the impact of these processes at the level of animal populations, communities and ecosystems. Finally, we will identify how host-pathogen interactions (may) alter as a consequence of various global change processes (including climate change and increased human and domestic animal populations).

### Assessment

- Written report 40%
- Oral presentation 20%
- 2 x in-class tests (20% each) 40%

## SLE355 – Zoological Field Studies

*Enrolment modes: Trimester 3: Waurn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Tim Jessop*

*Prerequisite: SIT191 or SLE251 and one other SLE 2 level unit*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 x 3 hour class per week for 1 week (week 1), 4 x 3 hour seminars and field trip preparation (week 1), 1 x multi-day off campus field trip (week 2), 6 x 3 hour on campus practicals (2 practicals in week 1, 1 practical per week from weeks 3 to 6).*

### Content

Well-designed field studies that test important ecological and evolutionary theories remain a key approach for how zoologists understand the wonderment of wild animals. This unit aims to let students guided by important zoological theory and concepts design field studies that address how Australian animals function and persist in their natural environment. Field-based studies will cover topics such as animal-plant interactions, effects of habitat variation of animal diversity and abundance, and examine how adaptive processes influence animal responses to environmental variation or other vital ecological processes. A major focus of this unit will be for student's to advance their skills in the synthesis of scientific literature, research design, experimental methods, data analysis and visualization, critical evaluation, and scientific communication. Students will be required to undertake field studies by participating in an up to 7 day field trip located at an off-campus location in Victoria.

*Note: Students may be required to meet their own expenses on fieldwork.*

### Assessment

- 1 x report 35%
- Speed oral presentation 5%
- Group peer and self-reflective assessment 10%
- Field trip test 10%
- Mid-trimester class test 25%
- Individual practical assignments 15%

## SLE356 – Advanced Topics in Forensic Biology

*Enrolment modes: Trimester 3: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Michelle Harvey*

*Prerequisite: SLE208*

*Scheduled learning activities – campus: 4 x 1 hour class per week for six weeks, 6 x 3 hour practicals over an intensive six week period*

### Content

This unit covers current concepts, controversies and latest methodological advances in forensic biology, to develop graduates as professionals. Selection of advanced topics in forensic biology will be used to illustrate current challenges and developments. Students will develop critical awareness of forensic science subject areas and be able to exercise independent and scientifically justified views. Important characteristics of this unit will be the ability to express ideas both verbally and in written form and justify opinions.

### Assessment

- Weekly online quizzes (5 x 2%, 1 x 10%) 20%
- Report entomology 25%
- Report DNA 25%
- Literature review poster presentation 30%

## SLE360 – Australian Invertebrates

*Enrolment modes: Trimester 2: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Anneke Veenstra*

*Prerequisite: SLE204*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 6 x 3 hour practicals per trimester.*

### Content

The unit examines characteristics of invertebrates, together with their evolutionary origins, taxonomy and distribution in the Australasian region; insect success (including sociality) and the importance of invertebrate communities in both undisturbed and disturbed Australian ecosystems; and reproductive and physiological adaptations of invertebrates to Australian conditions. This unit will also address the assessment and control of invertebrate communities in Australia (especially of agricultural pests).

### Assessment

- Class test (2 x 20%) 40%
- Team oral presentation 15%
- Team project 45%

## SLE370 – Evolution

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Matthew Symonds*

*Prerequisite: One of SLE237, SLE204, SLE205 or SLE254 plus one other level 2 SLE-coded unit*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week.*

### Content

This unit covers the broad scope of evolutionary theory, and the evidence for evolution, addressing the major mechanisms of evolutionary change including natural selection and genetic drift. It will cover mutation and evolution at the genetic level; adaptation; sexual selection; the evolution of sex and social behaviour; speciation and biodiversity; the ecological causes of evolutionary change; reconstruction and the use of evolutionary trees; the major transitions in evolutionary history; and the evolution of humans. In addition to its central role in biology, the unit will address the implications of evolutionary theory to fields such as ecology, conservation; medicine, philosophy psychology and education.

### Assessment

- Essay 20%
- Written report 20%
- Oral presentation 10%
- Examination 50%

## SLE371 – Human and Animal Navigation

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Andy Bennett*

*Cohort rule: Nil*

*Prerequisite: At least two level 2 SLE-coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week during weeks 1–5 and week 11, 1 x 3 hour practical in week 3, 5 days of immersive learning (Monday 12 August–Friday 16 August) during the intra-trimester break in August 2019.*

### Content

SLE371 will provide students with the opportunity to study the principles of human and animal navigation. They will explore the theory of human and animal navigation in classes, and then do hands-on studies on the cues used by animals and humans to navigate. During these 5 days, students will receive most of the classes, workshops and practical projects, have much time to interact with staff, and benefit from working in teams with other students with a view to developing enhanced interpersonal, teamwork and communication skills.

### Assessment

- 2 x scientific papers (20% each) 40%
- Oral presentation 10%
- Examination 50%

## SLE390 – Professional Practice in Bioscience

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Sharon La Fontaine*

*Cohort rule: Must be enrolled in S320, S321, S323, D304, D311, D321, D331 or D372*

*Prerequisite: STP010 and must have completed 14 credit points*

*Corequisite: Nil*

*Incompatible with: HMM306*

*Scheduled learning activities – campus: 10 x 3 hour classes per trimester. Work experience (minimum of 80 hours) must be completed by the end of September (week 10).*

### Content

Integrating study and work experience in a systematic way is essential for forging close links between the university education process and the workplace. In SLE390, students will have the opportunity to gain professional work experience with a course-related host organisation approved by the unit chair for a minimum of 80 hours. Students will develop generic, employment-related professional skills in the fields of biological and biomedical science through a combination of preparatory in-class sessions together with a minimum 80-hour work placement. There are many benefits to students and employers from undertaking relevant work placements during study. The key benefit is that it prepares students for work and a career in the biosciences. Learning and assessment activities in this unit will help students to develop an appreciation for work-life and to make decisions about personal, professional and career development. Most importantly, it will provide students with relevant evidence of experience and skills when applying for future work.

*Note: Enrolments after commencement of trimester is subject to Unit Chair approval.*

*Note also that delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

### Assessment

- Job application package 30%
- Mock interview 15%
- Work placement performance evaluation report 15%
- Professional portfolio 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must complete 80 hours of work placement to the satisfaction of the host organisation.

## SLE395 – Palaeobiology

*Enrolment modes: Trimester 1: Burwood (Melbourne)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mark Warne*

*Prerequisite: One unit from SLE102, SLE136 or SLE103*

*OR two level 2 units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 6 x 3 hour practicals per trimester, 1 x half day field trip per trimester (weather dependent).*

### Content

This unit provides students with an opportunity to study deep-time aspects of the biological and environmental sciences. Class include:

- Fossils of the terrestrial realm and their environments of preservation;
- Fossils of the marine realm and their environments of preservation;
- Relative and absolute dating of fossils;
- Biological evolution and the fossil record, including discussions on radiation, convergence, rates of extinction and evolutionary trends;
- Precambrian, Palaeozoic, Mesozoic and Cenozoic life;
- Quaternary physical evolution of the earth and associated anthropological change;
- Microfossils as proxies of past oceanographic and climate change.

Practical work will involve 2 projects. The first project will involve the description and biostratigraphical or palaeoecological evaluation of invertebrate fossils from a limestone, sandstone or mudstone exposure in SE Australia. The second project will involve the use of invertebrate microfossils or macrofossils as proxies of past environmental change within a human occupation historical timescale. This project will involve the examination of fossils from sediment cores gathered within a modern aquatic setting.

This unit will also include a half day field trip (or online virtual field tour), or tour of museum fossil preparatory laboratories.

### Assessment

- Practical report 1 40%
- Practical report 2 40%
- Class test 20%

## SLE397 – Sensory Neurobiology and Behaviour

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Andy Bennett*

*Prerequisite: SLE211 or SLE204*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week, 2 x 1.5 hour seminars per trimester.*

### Content

This unit considers how, why and when animals transfer information to others and the impact on behavioural patterns. It addresses the mechanisms underlying these communication methods, the constraints acting on information transfer and the evolutionary implications of such constraints. Using guided reading and problem solving the students will be encouraged to think critically about experimental design and to evaluate the literature.

### Assessment

- Written assignment (assessing scientific literature) 30%
- Class test (small group work problem solving) 10%
- Reading test (online review test) 10%
- Written assignment (practice essay question) 10%
- Examination 40%

## SLE420 – Honours Biology Research 1A

*Enrolment modes:*

*Semester 1: Burwood (Melbourne), Warrnambool, Waurin Ponds (Geelong)*

*Semester 2: Burwood (Melbourne), Warrnambool, Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.250*

*Semester 1 Unit Chair: Gerry Quinn*

*Semester 2 Unit Chair: Matthew Symonds*

*Cohort rule: (This unit is restricted to students enrolled in S400, S401, S494)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

This unit comprises the research project component of the Honours courses in Life and Environmental Sciences. Students will do an individual research project over 9 months, supervised by one or more academic staff. Students will be involved in the design of the project (including sampling or experimental programs), collection and analyses of quantitative or qualitative information, and the interpretation of the results in the context of relevant literature on the research topic. The project is assessed by two seminars presented to students' peers, a 4 month progress report and a final thesis that presents the results and interpretation of the research. The research project is worth 75% (6 credit points) of your final Honours mark, with the remainder allocated to your two coursework units.

## Assessment

- Thesis 80%
- Two seminars presentations to an audience of peers 20%

## SLE421 – Honours Biology Research 1B

*Enrolment modes:*

*Semester 1: Burwood (Melbourne), Warrnambool, Warrnambool (Geelong)*

*Semester 2: Burwood (Melbourne), Warrnambool, Warrnambool (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.250*

*Semester 1 Unit Chair: Gerry Quinn*

*Semester 2 Unit Chair: Matthew Symonds*

*Cohort rule: (This unit is restricted to students enrolled in S400, S401, S494)*

*Unit chair: Gerry Quinn*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Semester 1 Unit Chair: Stuart Linton*

*Semester 2 Unit Chair: Stuart Linton*

*Cohort rule: (This unit is restricted to students enrolled in S400, S401, S494)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 full-day workshops (20 hours in total).*

### Content

This unit will develop an understanding of the ethics, integrity and professional processes that underpin Life and Environmental Science as a discipline. The aim of the unit is to engender understanding and appreciation of important concepts in science professionalism as broadly applied both within and outside science. The unit will comprise three workshops and cover topics such as: i) the concepts and processes of research ethics and integrity and how they are applied in research and the community (Workshop 1); ii) the process of critical review in science; peer review of papers and grant applications; how research quality and impact are assessed; issues in gender and science (Workshop 2); and iii) communication of science through professional, public and social media outlets (Workshop 3).

### Assessment

- Research ethics assignment (reflection) 15%
- Research ethics assignment (editorial) 25%
- Scientific research conference presentation via ePoster 30%
- Science communication digital production 30%

## SLE452 – Research Design and Data Analysis

*Enrolment modes:*

*Semester 1: Burwood (Melbourne), Warrnambool, Warrnambool (Geelong)*

*Semester 2: Burwood (Melbourne), Warrnambool, Warrnambool (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Semester 1 Unit Chair: Gerry Quinn*

*Semester 2 Unit Chair: Matthew Symonds*

*Cohort rule: (This unit is restricted to students enrolled in S400, S401, S494)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 24 hours (classes and workshops).*

### Content

Research design and data analysis is an essential part of scientific and industry research but many graduates in life and environmental sciences have only limited experience of applying it in this context. SLE452 aims to help research students develop the skills to design, implement and analyse quantitative outcomes from a research project across a broad range of settings. This unit will build on basic statistical knowledge from other units completed in their undergraduate degree. Students will learn how to design sophisticated sampling and experimental programs that maximise interpretability and efficiency, and with a focus on modern statistical models, understand the logic and assumptions underlying statistical analyses as applied in biological research, develop the practical ability to analyse data and interpret and present the results using modern software, and learn how to critically evaluate the data analyses used in the published literature.

### Assessment

- Research design quiz 20%
- Critical evaluation of statistical analysis in published research 30%
- Biostatistics test 50%

## SLE453 – Advanced Topics in Chemistry

*Enrolment modes: Semester 2: Warrnambool (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Semester 2 Unit Chair: Fred Pfeffer*

*Cohort rule: (This unit is restricted to students enrolled in S400, S401)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 6 x 1 day workshops.*

### Content

Students in the chemistry stream of honours embark on a specialist learning program to either enhance their employability in the scientific (chemistry related) industries or continue in higher degrees by research studies or. SLE453 aims to help students advance their theoretical knowledge in the core areas of spectroscopy as well as physical and organic chemistries while providing an understanding of relevant industrial practice. In this unit, students will learn how nuclear magnetic resonance (NMR) spectroscopy can be used to solve problems in relation to molecular structure and assembly; they will, with appropriate demonstration, understand recent developments in organic chemistry including the theory leading to recent Nobel Prize awards. They will also be introduced to the specific practical problems associated with chemistry at an industrial scale.

### Assessment

- Literature presentation 30%
- Advanced organic chemistry class test 30%
- Industrial chemistry class test 40%

## SLE454 – Advanced Topics in Forensic Science

*Enrolment modes: Semester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Semester 2 Unit Chair: Annalisa Durdle*

*Cohort rule: (This unit is restricted to students enrolled in S400, S401, S469)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 full-day workshops (18 hours in total).*

### Content

This unit will develop an understanding of the processes and concepts that are key to forensic science and its implementation in a professional context. The aim of the unit is to engender an understanding and appreciation of important concepts in forensic science professionalism and how they can influence the judicial process. The unit will cover topics such as expert evidence including the development and ethical implications to the court, legal communication through a moot court presentation, professional practice in the court procedure for forensic experts and understanding the legal implications of presenting forensic cases to the print and electronic media.

### Assessment

- Moot Court (oral presentation) 60%
- Expert evidence (includes expert evidence statement 20%, brief to counsel interview 10%, reflective statement 10%) 40%

## SLE703 – Agricultural Biotechnology

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: David Cahill*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week and consultations.*

### Content

This advanced unit embraces advanced topics in plant and animal biotechnology as it relates to agriculture. Topics covered include genomes and genome organisation, the regulation of gene expression, plant and animal cell and tissue culture, gene transformation techniques, the application of transgenic technology for crop and livestock improvement (including the production of transgenic plants resistant to abiotic and biotic stresses and with enhanced nutritional value) and the use of transgenic plants as bioreactors for the production of novel proteins in medicine and industry. There is emphasis in this unit on modern and cutting edge approaches to molecular biology and biotechnology including high throughput sequencing, gene editing technologies and the application of bioinformatics.

### Assessment

- Project reports 20%
- Poster and seminar presentation 20%
- Examination 60%

## SLE706 – Frontier Techniques in Biotechnology and Nanotechnology

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Wenrong Yang*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week.*

### Content

Commercial biotechnology plays a very important role in the modern world. Many new gadgets and sophisticated medical treatment methods utilise the benefits of biotechnology and nanotechnology. The purpose of this unit is to provide students the opportunity to study new and exciting advancement in the field of biotechnology and nanotechnology.

Students are required to engage in studying chemistry of materials, molecular diagnostics, nanomaterial application, use of biomolecules in templating, experimental techniques for applying knowledge of bio-nanotechnology in professional practice in the fields of bio-therapeutics and medical technology, agriculture biotechnology, food technology and applied science.

### Assessment

- Literature review 30%
- Research essay 30%
- Examination 40%

## SLE712 – Bioinformatics and Molecular Biology Techniques

*Enrolment modes: Trimester 1: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mark Ziemann*

*Prerequisite: Nil*

*Corequisite: SLE010 and one of SLE761, SLE703, or SLE706*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour practical per week.*

### Content

This practical-based unit provides students with fundamental skills in cellular and molecular biology which are essential for both research and commercial applications of Biotechnology. Students will be provided with the opportunity to individually and in groups undertake a variety of laboratory-based procedures. These include many sought after techniques in molecular biology involving DNA and RNA such as isolation, purification, amplification, restriction enzyme digestion, cloning, ligation, vector construction and agarose gel electrophoresis. In addition, students will also gain an understanding of the rapidly advancing field of Bioinformatics through computer-based practicals. Techniques required for protein analysis will include poly acrylamide gel electrophoresis and immuno-blotting.

### Assessment

- 3 x practical class reports (20% each) 60%
- Examination 40%

## SLE713 – Industrial and Analytical Techniques in Biotechnology

*Enrolment modes: Trimester 2: Waurin Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Yen Wong*

*Prerequisite: Nil*

*Corequisite: SLE010 and one of SLE701, SLE702, SLE703, SLE704, SLE705, or SLE706*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 hour practical classes per week.*

### Content

This practical-based unit provides students with exposure to advanced technical skills applicable to many fields within Biotechnology. This will include techniques commonly used in industrial and medical microbiology, agricultural biotechnology and nanotechnology. Analytical skills will be developed through practical classes relating to spectroscopy and separation science techniques such as capillary electrophoresis, luminescence spectroscopy, atomic emission spectroscopy, and sequential injection analysis. This unit will also feature the demonstration and use of industry-standard cutting edge instrumentation.

### Assessment

- 3 x practical class reports (20% each) 60%
- Examination 40%

## SLE720 – Risk Assessment and Control

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SBH715*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Trevor Thornton*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SBH732, SQE722 and SEV710*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

This unit is to be delivered in a modular approach. Students will complete a common core that provides students with an understanding of risk assessment and management principles. Following this common core, students will, based on their enrolments select one of the following modules: environment and occupational hygiene.

Students will discuss selection of the module with the course coordinator.

### Environment

This module provides a combination of theory and practical case studies, designed to provide students with the understanding and hands-on experience necessary to identify and address risks to healthy environments. This module includes: Case studies of urban, industrial, agricultural and/or natural environments at risk; the role of techniques such as indices of environmental health, epidemiology, toxicology and statistics in evaluating environmental and health concerns – data analysis and interpretation – the limitations associated with the various risk assessment techniques; approaches to risk management through policy, legislation, planning and management; risk management principles and planning; appropriate risk avoidance and minimisation for the case studies utilised; integration of risk management with environmental management principles.

This module is designed to enable environmental objectives to be identified and implemented within a broad range of industry sectors in line with ecological sustainability principles. Tools such as life cycle analysis and risk assessment, used to measure environmental performance will be described and opportunity provided to utilise these in the development of a site specific environmental management system. Systems that assist organisations meet environmental management requirements that are used internationally and within Australia will be examined as will the potential to link in with other management systems commonly used within organisations.

### Occupational hygiene

This module uses a simulated (multimedia) workplace to provide experience of conducting a walk through survey, undertaking a risk assessment, communicating the results, designing an exposure monitoring exercise, and designing a control strategy including engineering and non-engineering controls.

### Engineering

This module will enable students to understand risk issues associated with enterprises, understand the links between the environment and economics, understand how innovation and sustainable development

may impact on each other, apply the principles of sustainable development within an enterprise, and recognise the benefits, and the costs, associated with risk management and sustainable development. The topics addressed include risk management, ecologically sustainable development, green design, economics and sustainability, and population and sustainability.

*Note: This unit is a wholly online unit; there will be no face to face teaching.*

### Assessment

- 2 x individual risk assessment reports (20%, 30%) 50%
- Case study 50%

## SLE721 – Policy and Planning for Sustainable Development

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SQE721*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Trevor Thornton*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit focuses on the synthesis, interpretation and analysis of information in regards to environmental policy at all levels of government and other public or private organisations. The need for global co-operation and action in responding to environmental issues is becoming more important. Air quality, land management, resource use and water quality are some of the myriad of issues that can only be resolved with greater understanding of local issues to enable targeted responses at the global level. Due to lack of agreement in policy aims and specific objectives, it has been argued that the current approaches to environmental management have not been as effective in achieving desired environmental outcomes. Practitioners need to understand the process of policy development in order to fully realise the potential outcomes as well as to be able to input into the process to achieve sustainable outcomes. Policy objectives need to be fully cognisant of the environmental, political, economic and social influences that must be addressed if change is to occur.

## Assessment

- Two assignments (20% each) 40%
- Case study 30%
- Project report 30%

## SLE725 – Environmental Management Systems

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SQE723*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Trevor Thornton*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

This unit is designed to enable environmental objectives to be identified and implemented within a broad range of industry sectors in line with ecological sustainability principles. Tools such as life cycle analysis and risk assessment, used to measure environmental performance will be described and opportunity provided to utilise these in the development of a site specific environmental management system. Systems that assist organisations meet environmental management requirements that are used internationally and within Australia will be examined as will the potential to link in with other management systems commonly used within organisations.

## Assessment

- Two assignments (10% each) 20%
- Essay 20%
- Analysis exercise 20%
- Case study report 40%

## SLE728 – Oceans, Coasts and Climate Change

*Enrolment modes: Not available from 2017*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Geoffrey Wescott*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SLE328*

## Content

The internationally accepted concept of integrated coastal management (ICM) is introduced, described and analysed. International advances and initiatives in marine and coastal affairs such as conventions and agreements, for example the United Nations Convention on the Law of the Sea (UNCLOS), are described and analysed. The varying approaches adopted towards ocean and marine policy and implementation of chapter 17 of Agenda 21 (Rio Convention) will be covered. Australia's approach to marine and coastal policy and management will be concentrated on as an example of a national approach towards implementing integrated marine and coastal management. Topics covered will include Australia's ocean policy and the emphasis placed on community involvement, in particular through such approaches as the Marine and Coastal Community Network and Coastcare. An overview of the approaches taken in various Australian states towards implementing integrated coastal management will be described and analysed.

## Assessment

- Written report on international/national issue, concept or policy 30%
- Reading assignment 30%
- Essay 40%

## SLE730 – Industry-Linked Research Project B

*Enrolment modes: not available from 2017*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Unit chair: Colin Barrow*

*Prerequisite: SLE710 and students would normally be expected to have an approved academic standard of 65% and above and an available project and supervisor. Please contact the Unit Chair prior to enrolling in this unit.*

*Corequisite: Students must be enrolled in the Master of Biotechnology (Honours) S771*

*Incompatible with: Nil*

### Content

This applied biotechnology research project is designed for students to undertake following the successful completion of the Master of Biotechnology core units. Projects are conducted over two subsequent trimesters. Students will be required to undertake a significant body of work giving them an opportunity to apply knowledge gained through units of study. Each student will be assigned an academic supervisor and an industry supervisor during the project. The comprehensive assessment system includes the preparation of a final report, conducting a research seminar and being assessed by the industry and academic supervisors.

### Assessment

- Industry assessment 20%
- Presentation 20%
- Final report 60%

## SLE740 – Climate Change Adaptation and Mitigation

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Robert Faggian*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit will provide a broad introduction to climate change, climate change adaptation and mitigation from a scientific, societal and policy perspective. It will then focus on climate change in the context of regions and their natural resource base, including an exploration of linked issues such as sustainable food production, integrated water management (residential-industrial-environmental), land-use decision-making and common law liability, amongst others.

The unit will develop the knowledge and understanding required by professionals involved in natural resource management (including agriculture and food production, forest and resource management), spatial and economic planning, policy development, or anyone with an interest in climate change, to develop appropriate regional and local responses to the risks and opportunities posed by a changing climate.

Some of the topics covered include: climate science (global climate modeling, regional downscaling of projections, uncertainty); climate policy (including mitigation, decision-making, risk frameworks, uncertainty, no-regret policies); systems science (regional systems, resilience theory, adaptive capacity).

### Assessment

- Oral presentation 30%
- Written report 30%
- Examination 40%

## SLE741 – Regional Development Economics and Planning

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Victor Sposito*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 1 hour seminar per week plus 3 hours of problem-based exercises.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

This unit provides students the opportunity to learn about relevant regional development theories and models, their particular contribution to an understanding of regional and rural development processes and their applicability in practice in different contexts, both in Australia and overseas.

Upon the successful completion of this unit, students should be able to analyse the economic situation of any particular region through the application of relevant theories and models as well as suggest possible development policies for the region of interest.

Learning activities in this unit are organised for students to explore relevant theories and models including those related to economic growth (e.g. trade-led/exposed growth), uneven spatial development (e.g. spatial polarisation), endogenous territorial development, and ecological-economy models.

## Assessment

- Case study 25%
- Group oral presentation 35%
- Examination 40%

## SLE742 – Systems and Strategic Thinking

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Victor Sposito*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour class per week, 1 x 1 hour seminar per week plus 3 hours of problem-based exercises*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

This unit provides the opportunity for students to learn about new ways of thinking and problem solving, associated concepts, methodologies and methods that are applicable in most disciplines and professions as well as in academic research. This includes systems thinking and strategic thinking. Students will learn and apply holistic (i.e. systemic) approaches to tackle, usually ill-defined, problems in complex, uncertain and risky situations. Students will also learn and apply strategic planning approaches to identify the core (or strategic) issues in any problem situation and propose feasible solutions and ways of implementing them. Strategic thinkers have the ability to 'see' a possible future and act accordingly.

Students will be provided the opportunity to discuss key issues related to relevant approaches in systems thinking and strategic thinking and planning and their application in practice in various fields, such as natural resources planning (including land and water resources), sustainable regional development, spatial (urban and regional) planning, environmental planning, strategic management and organisational development.

## Assessment

- Critique essay 25%
- Group oral presentation 35%
- Examination 40%

## SLE743 – Regional Development Modelling

*Enrolment modes: Trimester 2: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Robert Faggian*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 3 hours per week of problem-based seminars (project exercises).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

The unit provides students with the opportunities to learn about Geographical Information Science (GIS), spatial analysis and modelling techniques to support decision-making for better guidance of regional and rural development through integration of social, economic and physical factors. A participatory, modelling approach that mixes data analysis with expert knowledge is introduced through the application of multi-criteria evaluation (MCE) and Analytical Hierarchy Process (AHP) techniques. Topics also include forecasting of climate change and its effects on agriculture.

Rather than try to turn students into experts, this unit makes a start by showing how to use GIS and spatial analysis where necessary, thereby enabling participants to ultimately become experts in the future through further practice. Emphasis is on the application of the techniques in several hands-on tutorial/project exercises which address various regional development issues. Students may select a project relating to regional issues in her/his own country (Australia or overseas).

After undertaking this unit students will be able to select and apply techniques for pursuing spatial analysis and modelling of the kind that practically supports decision making and policy generation within any regional, rural authority.

Presentation is organised around explanations of various applied spatial and modelling techniques within a holistic approach towards regional development, and GIS is employed as a major implementing platform for such techniques.

## Assessment

- 6 maps (5% each) 30%
- Group project report 30%
- Examination 40%

## SLE761 – Research Planning and Communication

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waurin Ponds (Geelong)*

*Trimester 2: Burwood (Melbourne), Waurin Ponds (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jim Rookes*

*Trimester 2 Unit Chair: Jim Rookes*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 1 hour classes per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

The aim of this unit is to introduce students to the principles of academic writing and broad presentation skills in science communication, along with developing an understanding of a range of topics related to research planning which include; scientific research policies and procedures, accessing scientific literature, research project planning, ethics and integrity. Students will also gain an understanding of intellectual property and research commercialisation.

## Assessment

- Problem solving tasks and essay (15% each) 30%
- Poster 30%
- Research proposal project 40%

## SLE762 – Research Impact and Management

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mark Ziemann*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): 2 x 1 hour online workshops per week*

### Content

This unit focuses on knowledge and skills required to successfully manage or evaluate a research group or unit and includes strategies to maximize or assess research impact, minimise risk and how to measure research quality. As such, this unit places research activities and outcomes in a broader organisational context, but also emphasises the key considerations that individual researchers need to take into account to maximise research outcomes for themselves and their organisation. Key topics will include the nature of “quality” and “impact” in research assessment and research risk management, how to identify and successfully publish in leading journals, measures of research impact, reach and influence using bibliographic and related on-line tools, the role and value of science research communication, including popular articles and use of on-line media. Other elements of this unit include the use of research management systems, the role and implementation of research codes of conduct, animal and human ethics and safety, commercialization of research at the institutional level, project evaluation methodologies, grant assessment and management and the kinds of national and international research assessment systems.

### Assessment

- Problem solving tasks and essay (15% each) 30%
- Research assessment essay 30%
- Research assessment project 40%

## SLE763 – Research Frontiers Project

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jim Rookes*

*Trimester 2 Unit Chair: Jim Rookes*

*Prerequisite: SLE761*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour meeting with supervisor per week.*

### Content

This unit is for students to apply critical analysis and logical reasoning skills in evaluating existing scientific knowledge in a selected field of study. Students will be expected to communicate in a clear and persuasive way, insights gained from critical review of literature, formulation of research question and proposing a research project for scientific investigation. Students will be required to work closely with advice from an academic supervisor to plan and implement a research project. Frequent feedback to the academic supervisor in the form of progress reports is essential. Assessment in this unit emphasises identification of a research question and formulating appropriate aims and objectives and discuss ways in which research can make a contribution to knowledge creation. This unit also provides the opportunity for students to develop depth of knowledge within an area of scientific study, methodologies for scientific research and scientific communication skills.

### Assessment

- Literature review 40%
- Research proposal report 40%
- Research proposal seminar 20%

## SLE764 – Research Thesis 1

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)

Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)

Credit point(s): 4

EFTSL value: 0.500

Trimester 1 Unit Chair: Jim Rookes

Trimester 2 Unit Chair: Jim Rookes

Prerequisite: Must have passed 7 level 7

SSC/SLE-coded units

Corequisite: Must be enrolled in S820, S772, S721

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 1 hour meeting with supervisor per week.

Scheduled learning activities – cloud (online): 1 x 1 hour online meeting with supervisor per week.

### Content

This unit is for students to develop independent research skills. Students will be required to work on their research project and undertake scientific inquiry following successful confirmation of candidature for a Master of Science (Research) program. Students are required to work closely with advice from their supervisor for the duration of their candidature. The research project is to be undertaken over two trimesters full time duration. At the end of their study in this unit students will be required to complete a major research thesis, which gives them an opportunity to apply and present knowledge gained through their research investigation in a chosen field of study. Assessment of student learning will include the submission of a major thesis that will be assessed by at least two examiners and presentation of research and research findings in a formal seminar.

### Assessment

- Major thesis 80%
- Research seminar 20%

## SLE765 – Research Thesis 2

### Enrolment modes:

Trimester 1: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)

Trimester 2: Burwood (Melbourne), Waurn Ponds (Geelong), Cloud (online)

Credit point(s): 4

EFTSL value: 0.500

Trimester 1 Unit Chair: Jim Rookes

Trimester 2 Unit Chair: Jim Rookes

Prerequisite: Must have passed 7 level 7

SSC/SLE-coded units

Corequisite: Must be enrolled in S820, S772, S721

Incompatible with: Nil

Scheduled learning activities – campus: 1 x 1 hour meeting with supervisor per week.

Scheduled learning activities – cloud (online): 1 x 1 hour online meeting with supervisor per week.

### Content

This unit is for students to develop independent research skills. Students will be required to continue work on their research project commenced in unit SLE764 – Research Thesis 1 and undertake scientific inquiry. Students are required to work closely with advice from their supervisor for the duration of their candidature. The research project is to be undertaken over two trimesters full time duration, with this unit forming the final trimester of study. At the end of their study in this unit students will be required to complete a major research thesis, which gives them an opportunity to apply and present knowledge gained through their research investigation in a chosen field of study. Assessment of student learning will include the submission of a major thesis that will be assessed by at least two examiners and presentation of research and research findings in a formal seminar.

### Assessment

- Major thesis 80%
- Final research seminar 20%

## SLE766 – Industry Practice

*Enrolment modes: Trimester 2: Burwood (Melbourne), Warrn Ponds (Geelong)*

*Credit point(s): 4*

*EFTSL value: 0.500*

*Trimester 2 Unit Chair: Colin Barrow*

*Prerequisite: STP710. Must have successfully completed 8 credit points of study in level 7 SLE-coded units and must be enrolled in S721, S772, S820*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Approximately 450–500 hours working in industry. Students are expected to attend meetings with their internship supervisor and the academic supervisor.*

### Content

Integrating study and work experience in a systematic way is essential for forging close links between the university education process and the workplace. Students will have the opportunity to gain professional work experience with an approved host organisation. The exact nature, activities and emphasis in each industry placement will vary according to the context, resources and expertise of staff as well as the experience, qualities and aspirations of the student. This systematic opportunity will provide students with experiences with which they can learn about and with an organisation, critically reflect on their Course and Graduate Learning Outcomes, and discipline-specific and generic competencies in the context of work. There are many benefits to students and employers from undertaking relevant work placements / industry placements during study. The key benefit is that it prepares students for work. Learning and assessment activities in this unit will help students develop an appreciation for work-life and make decisions about personal and professional development. Most importantly, it will provide students relevant evidence when applying for future work.

*Note: For this unit you are required to source your own course related placement.*

*Students must contact the Unit Chair prior to enrolling in this unit.*

*Note also that delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

### Assessment

- 'Me in a minute' recording 5%
- Formal learning contract 25%
- Performance evaluation 20%
- Professional portfolio 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must:

- achieve at least 50% of the total mark allocated for the professional portfolio assessment task; and
- demonstrate that they are working to the satisfaction of the host organisation (including skill competency levels, professional code of conduct and project output requirements) at both the mid and end of placement phases.

## SRA010 – Safety Induction Program

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Dominic Ahiaga-Dagbui*

*Trimester 2 Unit Chair: Stewart Seaton*

*Trimester 3 Unit Chair: Hong Xian Li*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Students are expected to complete a 90 minute online safety induction program module on CloudDeakin.*

### Content

SRA010 is designed for students to learn how to develop and maintain a safety culture within the University, including within the A+B workshop and studio spaces. In this unit students will examine occupational health and safety procedures required by Deakin University and the School of Architecture and Built Environment to ensure student safety and wellbeing during their studies. Students will develop an awareness of building evacuation procedures and industry requirements for visits to building sites as part of course requirements.

### Assessment

Multiple choice test 100%.

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a minimum mark of 70% in the online test.

## SRA143 – Art and Society

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Md Mizanur Rashid*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week (for 10 weeks); 1 x 2 hour seminar per week; a full day fieldtrip.*

### Content

SRA143 is the first unit in the sequence of history and theory units in the discipline of Architecture. Art and Society explores the human relationship with our natural and cultural environment since the dawn of time; creating place, seeking shelter and expressing beliefs. The unit focuses upon the history and theory of architecture, painting and sculpture and considers how distinct cultures have developed form, technique and their own iconography. This opens up the opportunity to discuss shared attitudes, ideas and to celebrate difference.

### Assessment

- Journal 55%
- Research paper 30%
- Group oral presentation 15%

### Prescribed texts

Roth, 2013, *Understanding Architecture: Its Elements, History and Meaning*, 3rd Ed, Hachette Livre, USA.  
Available as an e-Book in the Deakin Library.

Kleiner, 2014, *Gardners Art through the Ages*, 15th Ed, Cengage Learning, USA.

## SRA215 – Utopian Ideals in the Modern World

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Ursula de Jong*

*Prerequisite: SRA143*

*Corequisite: Nil*

*Incompatible with: SRA319*

*Scheduled learning activities – campus: 1 x 1 hour class per week (for 10 weeks); 1 x 2 hour seminar per week; a full day fieldtrip.*

### Content

Unit SRA215 builds on skills and concepts learned in SRA143 Art and Society. Utopian ideals have in one way or another characterised our modern western world since the mid-eighteenth century, as changing views of history led to shifting theoretical and philosophical frameworks, and extraordinary technological changes spurred architects into action and reaction. European and American art and architecture are studied in the contexts of the diverse, rich, and multifaceted developments, which have informed style and content. Modern architecture and meaning are examined, and modern movement ideas evaluated via the critical reactions to modernism.

### Assessment

- Literature review 40%
- Oral presentation 15%
- Essay 45%

### Prescribed texts

Frampton, 2007, *Modern Architecture*, 4th Ed, Thames & Hudson, London, United Kingdom.

## SRA224 – Austral-Asian Architecture

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Md Mizanur Rashid*

*Prerequisite: SRA143*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week*

### Content

The unit SRA224 builds on skills and concepts learned in SRA215 Utopian Ideals in the Modern World. Students will investigate the social, material and symbolic role of architecture in traditional, changing and contemporary Australian Pacific Island and Southeast Asian societies, developing an understanding of its social and philosophical underpinnings and an appreciation of its creativity. Students will learn about important aspects of architecture in the region; indigenous traditions and cultures, the influence of Hinduism, Buddhism and Islam, the effects of colonialism and imperialism, the relationship between architecture and postcolonial identity, modernism, regionalism and prospects for the future.

### Assessment

- Debate 20%
- Essay 40%
- Model 40%

## SRA323 – Contemporary Architecture

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Sanja Rodes*

*Prerequisite: SRA215 or SRA224*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week.*

### Content

This unit examines architecture as a cultural discipline from 1968 to the present day. It seeks to critically discuss and engage with particular architects and works of architecture from Europe, Australia, the US, and Asia. It also demonstrates the ways in which particular theoretical frameworks impact the direction and currents of architectural enquiry and production. These architects and works are critically analysed to enable students to develop their own understanding of the very nature of critical attitudes in architecture through selected books, essays, articles and other media outputs. The unit emphasises the essential role of critique in architecture and complements design studios by introducing the most relevant contemporary theories and concepts in architecture.

### Assessment

- Critique (video format) 30%
- Essay 40%
- Reflective portfolio 30%

### Prescribed texts

Nesbitt, 1996, *Theorizing a New Agenda for Architecture*, 1st Ed, Princeton Architect, New York, USA

Krista Sykes (Ed.), 2010, *Constructing a New Agenda: Architectural Theory 1993–2009*, 1st Ed, Princeton Architect, New York, USA

## SRA341 – The City

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRS341*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Yolanda Esteban*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit covers the origins of human settlement and the development of the city through history. Theories and issues regarding the sources of urbanization are presented as a means to understand influences that create and shape cities. The functions, forms and image of the city from prehistoric to contemporary periods and in diverse places and cultures are studied. Various ways of how the city is seen, described and understood by different cultures and in different time periods, are discussed.

### Assessment

- Poster presentation 30%
- Essay 30%
- Applied project 40%

## SRA710 – Safety Induction Program

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*Previously coded as: SRA010*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Dominic Ahiaga-Dagbui*

*Trimester 2 Unit Chair: Stewart Seaton*

*Trimester 3 Unit Chair: Hong Xian Li*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SRA010*

*Scheduled learning activities – cloud (online): Students are expected to complete a 90 minute online safety induction program module on CloudDeakin.*

### Content

SRA710 is designed for students to learn how to develop and maintain a safety culture within the University, including within the A+B workshop and studio spaces. In this unit students will examine occupational health and safety procedures required by Deakin University and the School of Architecture and Built Environment to ensure student safety and wellbeing during their studies. Students will develop an awareness of building evacuation procedures and industry requirements for visits to building sites as part of course requirements.

### Assessment

Multiple choice test 100%.

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve a minimum mark of 70% in the online test.

## SRA742 – Urban Perspectives

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Surabhi Pancholi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SRA442*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit is the study of ideas, forces and processes affecting the planning and making of cities. It includes the history and ideology of town planning, various processes for the generation of urban form and management of city functions and its design, taking into consideration both the physical and cultural contexts in the making of urban form. Principal topics include the built form of the city, the notion of the 'good' city, and the relationships between built form, culture and space.

## Assessment

- Structured image display 30%
- Visual display 30%
- Poster and narration (20% poster and 20% video/ PowerPoint voiceover narration) 40%

## SRA743 – Critical Futures

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Mirjana Lozanovska*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 19 hours of classes per trimester, 14 hours of seminars per trimester (students are expected to attend 3 hours per week)*

## Content

The unit examines critical positions developed within the history and theory of architecture. Once an understanding of these positions is gained they will be applied towards contemporary architecture examples for students to develop perspective in the profound changing conditions of society in the 20th Century. This perspective is used as a mechanism to explain how architecture participates in the contemporary world and to consider architecture in the 21st century. SRA743 Critical Futures, embedded in history and theory, is complemented by the conditions and processes of architectural and urban practices and aims to establish 'critical tools' for students to analysis of those practices on society.

## Assessment

- Exercises and structured bibliography (individual) 40%
- Either a critical essay 60% OR critical creative research project 60%

## SRA744 – Urban Patterns and Precedents

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Rollo*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 x 1 day seminars per trimester (6 hours per day).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

This unit covers patterns of human settlement with respect to historic and contemporary precedents. Theories and issues regarding the sources, functions, forms and image of urbanisation are presented and studied.

## Assessment

- Mapping exercise 30%
- Visual essay and presentation 30%
- Written essay 40%

## SRA760 – Urban Ecologies

*Enrolment modes: Not available in 2018, please refer to SRA760 Geo-Planning and Design*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Cohort rule: Students enrolled in S700 or S701 must enrol in campus mode*

*Unit chair: John Rollo*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

SRA760 involves an examination of the large scale urban development processes. Through the trimester the student is exposed and will experience the typical professional practice process involved in regional-scale designing and urban ecological inquiries that implicate prospective land identification, selection and evaluation as to its capacity to accommodate development including the environmental and aesthetic quality, physical and environmental carrying capacity and performance of land, its ability to economically and environmentally cater for and accommodate built environment developments and their associated infrastructure including a range of different built environment forms, densities, and land use typologies, and the scope as to staging, different environmental and economic values and attributes.. The unit as also includes a broad critical analysis of the contemporary social, economic and environmental challenges, theories and precedents that have shaped and currently inform the making of Australia's built environment including various strategies for forming new or regenerating existing urban territories.

The project-based format of the unit is scaffolded with classes that oversee the inquiry, its staging and its different levels and scales of inquiry, the use of geographic information systems (GIS) as a tool in research and modelling activities, while also addressing the theoretical parameters of urban ecology practice and theory. Students are presented with regional-scale extant or prospective urban contexts and conditions that introduce increasing complexity of physical, social, and environmental. Within this learning context, students are asked to critically consider contemporary greenfield/brownfield existing/prospective urban environments and their relation to differing ecologies.

## Assessment

- Morphological analysis (individual 15%, group 20%) 35%
- Strategic ecological considerations (group) 30%
- Speculative design 35%

## SRC163 – Drawing Studio

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Sharman*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SRM140*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour studio per week, 1 x 2 hour practical per week*

## Content

This unit allows students to develop creative thinking through design drawing. Learning and assessment activities in this unit will require the student to explore design media and techniques and develop a full range of skills necessary to imagine, generate, conceive, and analyse design ideas using the language of architecture, and its codes and conventions. Students will develop a critical understanding of the agency of drawing and modelling, which will enable alternate ways of conceiving, communicating and evaluating design ideas. Creative outcomes of students in this unit will be representative of their ability to reflect and critique the implications of proposed and existing architectural designs, which will complement their theoretical and historical perspectives.

## Assessment

- Creative work 40%
- Portfolio 60%

## SRC221 – Modelling Studio

*Enrolment modes:*

*Trimester 2: Waterfront (Geelong)*

*Trimester 3: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Chin Koi Khoo*

*Trimester 3 Unit Chair: Michael Sharman*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SED102 and SED202*

*Scheduled learning activities – campus:*

*Trimester 2: 1 x 1 hour class per week, 1 x 2 hour studio per week, 1 x 2 hour practical per week.*

*Trimester 3: (Intensive) Students are required to attend 5 x 5 hours of studio per trimester.*

## Content

This unit challenges students to creatively think through principles computer-aided modelling and design communication. Students will learn about and engage in specific methods to imagine, conceive and represent the spatial geometry and form between digital environments and tangible manifestations. They will be provided with the opportunity to learn and apply new platforms and software for the digital engagement of architectural representation. Learning and assessment activities provide the opportunity to pursue visualisation of models through both preliminary and resolved mediums. Alongside the designated creative outputs, students will be required to demonstrate the process they have engaged and to develop a mode of presentation as the means to reflection and learning for professional practice.

## Assessment

- Creative work: digital conceptualisation 50%
- Creative work: spatial realisation 50%

## SRC362 – Documentation Studio

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*Previously coded as: SRM462, SRP462*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Michael Sharman*

*Prerequisite: SRD264, SRC221 and SRT251*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour studio per week.*

## Content

This unit is a study of architectural development and detailing and its critical relationship with design implementation and progression to contractual enforcement in the management of a building project through process and product. Appropriate decision-making and transfer of information forms the framework for producing effective working documents through a process of information content development, and communication.

Research and speculation to refine project-specific construction knowledge is progressively evidenced in documentation from a basis of sound technical building practice. Students also engage with self-development of representation skills through assignment activity.

## Assessment

- Project design development (15% group, 15% individual) 30%
- Project documentation, detailing and scheduling 60%
- Reflection 10%

## SRD163 – Studio 01: Thoughtscapes

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Akari Nakai Kidd*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SRD161*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 4 hour studio per week*

## Content

Architectural design evolves through the exploration and reappraisal of a range of ideas and propositions that lead progressively to the eventual resolution of a coherent design proposal. SRD163 introduces students to Architectural Design by exploring the complex process of thinking, where experience, meaning and philosophy are positioned as essential to the aesthetic, spatial and physical resolution of design. Students must undertake study in areas of architectural enquiry including the language of Architecture (form and order, hierarchy, scale composition and proportion); the human body and anthropometrics; and drawing upon historical precedents evident in contemporary Architecture.

## Assessment

- Drawings 30%
- Design project 50%
- Design journal and folio 20%

## SRD164 – Architecture Design Studio 02: Matterscapes

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Lana Van Galen*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 5 hours studio per week.*

### Content

SRD164 Studio 02: Matterscapes is an architectural design unit with a focus of tectonic influences in design processes. Student learning in this unit will focus on materiality and tectonic understanding integration of conceptual spatial thinking with elemental technology and fabrication strategies, structural and spatial orders, constructional and envelope systems and immediate context analysis. Students will also engage with architecture representational conventions, as essential tools to develop and communicate design strategies and selective resolution.

### Assessment

- Tectonic concept design and presentation 30%
- Fabrication proposal and presentation 50%
- Reflection 20%

## SRD263 – Studio 03: Earthscapes

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Stewart Seaton*

*Prerequisite: SRD163 and SRD164*

*Corequisite: Nil*

*Incompatible with: SRD261*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 3 hour studio per week.*

### Content

Climate change and sustainability are increasingly significant factors in the design process. In this studio unit, students will explore architectural design with a major focus on the relationship between sustainable design, functional requirements, climate, and site conditions. Students will gain knowledge of design quality, which is a holistic balance between inputs and outcomes with regard to cultures and resources. Student exploration will include: the use of diagrams to communicate ideas, site analysis, and ecologically sustainable building. Learning and assessment activities will require students to consider cultural, social, material and environmental requirements, as well as the importance of historical precedent and designing collaboratively as part of a team.

### Assessment

- Investigative project 20%
- Group project design 30%
- Individual project design 50%

## SRD264 – Studio 04: Publicscapes

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Yolanda Esteban*

*Prerequisite: SRD163 and SRD164*

*Corequisite: Nil*

*Incompatible with: SRD261*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 5 hour studio per week.*

### Content

SRD264 Studio 04 Publicscapes is a studio-based unit. It comprises a series of set exercises that feed into a design problem. Studio is the central component in the education of an architect. It is the place where students do and discuss their designs. No designer works in isolation. Due to its particular complexity, urban design requires specific and continuous collaboration and cooperation. Students are expected to attend all studio sessions with all the necessary equipment.

### Assessment

- Urban and site analysis report 30%
- Design project and presentation 50%
- Design reflective folio 20%

## SRD363 – Studio 05: Hybridsapes

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Chin Koi Khoo*

*Prerequisite: SRD263 and SRD264*

*Corequisite: Nil*

*Incompatible with: SRD361*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 3 hour studio per week*

### Content

In SRD363, students will explore architectural design from the perspectives of complex, contradictory and hybrid environment within which contemporary Architecture performs. Learning and assessment activities in the unit will require students to investigate the influences of architectural design in dense urban contexts, in particular to comprehend 'vertical' relationships and arrangements of the architectural space through high-rise building typologies.

### Assessment

- Group work: research project and presentation 10%
- Design: conceptual design project and presentation 40%
- Design: detailed project and presentation 50%

### Content

This is the capstone design unit of the Architecture undergraduate courses. Students will select from a range of projects offered by specific staff members. All proposed projects will have similar scale, ambition and design complexity. Students will be required to demonstrate, through their design production, the integration and application of all the skills, capacities and knowledge learnt in previous design units, as well as the integration of knowledge gained in all other units of the course. Projects will emphasise the integration of the five major topics that have characterised the design studios in the Architecture courses: Architecture as a meaningful and relevant discipline strongly linked to the overall cultural and philosophical panorama; architectural compromise with materiality; environmental responsibility of the work of the architect in the built environment; the fundamental public role of Architecture; and physical and conceptual hybrid condition of the current urban environment.

Students will have the opportunity to select their main field of interest in architectural design (Thought, Matter, Earth, Public, Hybrid). Students will also integrate components from the remaining design inputs in their proposal, demonstrating the application of their individual approach to Architecture.

### Assessment

- Design: project analysis and concept development (includes oral presentation) 20%
- Design: project final presentation 50%
- Reflective portfolio 30%

## SRD364 – Superstudio

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Akari Nakai Kidd*

*Prerequisite: SRD263 and SRD264*

*Corequisite: Nil*

*Incompatible with: SRD361*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 4 hour studio per week*

## SRD741 – Architectural Design Research Studio

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong)*

*Trimester 3: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Tuba Kocaturk*

*Trimester 3 Unit Chair: Cecilia De Marinis*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour studio per week*

## Content

SRD741 aims to introduce ADR theory; use a range of ADR techniques to extend your design skills; and in the process generate schematic designs that you can develop in SRD766 Architecture Masterclass Studio.

A series of lectures introduce ADR theory and techniques, in support of the central activity of the unit – designing in the studio. ADR is a form of abductive reasoning, where a proposition is explored through a cyclic process of iterative design and critical reflection. You probably have used iteration process in other design units. The difference with this ADR studio is the range of techniques you will use and the explicit documentation of your design process and thinking.

For the first 8 weeks, each studio will involve intense drawing and modelling iteration sessions using different approaches to formulating a design idea. The approaches used will range from the theoretical and contextual to the functional and technical. In the final 3 weeks, you will select what you consider the most promising of your design iterations and extend these to propose a schematic design – diagrams, drawings and models that describe the essential aspects of an architectural project. This schematic design will form the starting point for SRD766 Architecture Masterclass Studio.

## Assessment

- Design exploration portfolio stage 1 30%
- Design exploration portfolio stage 2 30%
- Schematic design 40%

## SRD742 – Architectural Design Master Studio B

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Ross T Smith*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 3 hour class per week, 1 x 4 hour studio per week*

## Content

SRD742 Architectural Design Master Studio B introduces students to design studio practices at master level through three streams, of which students can select one for the duration of the unit: theory, urban or technology. All three streams and the design project briefs that each of them will undertake in the unit will:

- focus on the public and political agenda of architecture and
- holistically integrate sustainability approaches, concepts and principles considering project specific requirements.

Through a framework of quantitative and qualitative measures, the projects will be focused on the design of a building, a group of buildings, or any other type of complex architectural intervention in real and hypothetical scenarios that explore the programmatic richness and diversity of architecture and the urban context. The environmental agenda integrated in this studio will focus on the performance of materialisation of architecture, from the selection of building material to tectonics and analysis of specialised building envelopes. The context into which the conceptual, architectural or urban proposal is integrated will play a major role in both the analysis and synthesis phases of the design process. Conceptual, architectural, and urban spaces will be explored, defined and described through a wide range of architectural tools and documents.

## Assessment

- Analysis and project concept exploration 20%
- Project presentation 50%
- Environmental performance analysis portfolio 30%

## SRD760 – Geo-Planning and Design

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRA760*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Surabhi Pancholi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SRA760*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week, 1 x 3 hour practical for 5 weeks.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

SRD760 involves an examination of the large scale urban development processes. Through the trimester the student is exposed and will experience the typical professional practice process involved in regional-scale designing and urban ecological inquiries that implicate prospective land identification, selection and evaluation as to its capacity to accommodate development including the environmental and aesthetic quality, physical and environmental carrying capacity and performance of land, its ability to economically and environmentally cater for and accommodate built environment developments and their associated infrastructure including a range of different built environment forms, densities, and land use typologies, and the scope as to staging, different environmental and economic values and attributes.. The unit as also includes a broad critical analysis of the contemporary social, economic and environmental challenges, theories and precedents that have shaped and currently inform the making of Australia's built environment including various strategies for forming new or regenerating existing urban territories.

The project-based format of the unit is scaffolded with classes that oversee the inquiry, its staging and its different levels and scales of inquiry, the use of geographic information systems (GIS) as a tool in research and modelling activities, while also addressing the theoretical parameters of urban ecology practice and theory. Students are presented with regional-scale extant or prospective urban contexts and conditions that introduce increasing complexity of physical, social, and environmental. Within this learning context, students are asked to critically consider contemporary greenfield/brownfield existing/prospective urban environments and their relation to differing ecologies.

# SRD761 – Designing Urban Environments

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: John Rollo*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 4 x 1 day seminars per trimester (6 hours per day).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

This unit aims to provide a high level of design thinking regarding the foundations of the skill and knowledge base related to urban design. Students will be introduced to a range of processes applied to the analysis and synthesis of the urban environment. On completion of the unit students will be able to understand the urban condition through scale, built form, land-use and movement and have an appreciation for determining when a more innovative design might fit in better urban outcomes.

## Assessment

- Project work 60%
- Report 30%
- Generative journal 10%

## SRD762 – Interdisciplinary Planning and Design

*Enrolment modes: Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Surabhi Pancholi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 2 day seminars (from weeks 1–2 – 6 hours per day) as well as independent study.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit allows students to engage in critical discourse by working on cross-discipline strategic planning initiatives significant to Australia's future development. The aim of the unit is to facilitate problem identification/solving. Students will be expected to draw upon their experience and knowledge base from their respective disciplines for developing comprehensive innovative solutions and outcomes. On completion of the unit students should be able to facilitate a landscape of decision-making that stimulates an integrated approach to design and policy development within the metropolitan and regional urban contexts.

### Assessment

- Project work and presentation (group) 40%
- Scoping paper 20%
- Major report 40%

## SRD763 – Architectural Design Master Studio A

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Cecilia De Marinis*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SRD463*

*Scheduled learning activities – campus: 1 x 3 hour class per week, 1 x 4 hour studio per week*

### Content

SRD763 Architectural Design Master Studio A introduces students to design studio practices at master level through three streams that students can select From: theory, urban or technology. All three streams and the design project briefs that each of them will undertake in the unit will:

- focus on the human and social agenda of architecture and
- holistically integrate sustainability approaches, concepts and principles considering project specific requirements.

The projects will involve the development of an architectural intervention with a degree of programmatic complexity focussed on the social and residential challenges faced by contemporary urban context. The physical, historic, cultural and environmental contexts into which these architectural proposals are inserted will play a major role in the analysis and propositional phases of the design process. Projects are intended to express a critical position towards the sometimes conflictive and controversial situations that characterize urban coexistence and create a design that reflects environmental responsibility. Theoretical, architectural, and urban spaces will be explored, defined and described through a wide range of architectural tools and documents. The expectation of the unit is that each of the documents elaborated to communicate the projective reality that students propose, achieve a level of professionalism and persuasiveness in accordance with the masters level of the architectural course.

### Assessment

- Analysis and conceptual design proposal 20%
- Design project presentation 50%
- Environmental responsibilities portfolio 30%

## SRD764 – Urban Design Studio

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Rollo*

*Prerequisite: SRD761 (students enrolled in S700, S701 – nil)*

*Corequisite: Nil*

*Incompatible with: SRD464*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 3 hour studio per week*

## Content

The design projects undertaken in the unit will be based on urban design and strategic planning issues in three areas critical to the future growth of Australia's urban environment: metropolitan urbanism, urbanism on the periphery and regional urbanism. The unit allows students to identify the existing fabric of specific precincts in transition; analyse the artificial and natural boundaries which shape or limit their place setting; and propose a range of sustainable design strategies that resolve areas of discontinuity and open up options for stimulating urban renewal. On completion of the unit students should be able to develop an informed understanding of the place of architecture, landscape and planning within the context of the city, and to explore methodologies for evaluating and responding to an urban context with respect to environmental, economic, community, cultural, and heritage issues.

## Assessment

- Group collaborative design poster presentation 50%
- Individual design poster presentation 50%

## SRD765 – Architectural Design and Resolution

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong)*

*Trimester 3: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Scott Eldridge*

*Trimester 3 Unit Chair: Stewart Seaton*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 3 hour studio per week.*

## Content

In SRD765 students will investigate architectural design as a discipline of philosophic intention essentially coupled with compositional, structural, and material development. This will require students to undertake a process of architectural design development, where designs will be analysed and the design intentions developed through investigations into compositional and material methods alongside reference to the works of selected architects.

Students will be required to develop their design to a considerable level of resolution such that significant parts of the scheme are understood for their philosophic and material qualities. This will involve progressive investigation and production with parts of the scheme studied and developed up to a scale of 1:20.

## Assessment

- Mid-trimester project presentation 40%
- Final folio and demonstration 60%

## SRD766 – Architecture Masterclass Studio

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: Scott Eldridge*

*Prerequisite: Students enrolled in S700: 8 credit points of level 7 SR\* coded units including SRD763, SRD742 (or SRD764 if completed before 2017), SRD741 and SRD765. Students enrolled in S701: 3 credit points of level 7 SR\* coded units including SRD763. Students enrolled in S711: 6 credit points of level 7 SR\* coded units including 1 unit from SRD763 or SRD742 and SRD741, SRD765. (Note: It is strongly recommended that continuing S700 students complete SRD763, SRD742, SRD741 and SRD765 prior to commencing SRD766.)*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 4 hour studio per week*

## Content

This unit stands as the critical summation of the knowledge and capabilities developed in design for the Master of Architecture. Students are required to produce an architectural design project using an advanced design methodology underpinned by an essential theoretical intention. Each student shall formulate a project brief, and move to a position where a substantial body of work can be developed using a range of complex architectural factors and sophisticated principles of design. This will require students to integrate their body of knowledge and methods, and demonstrate the use of contextual, functional, technical and theoretical factors to explore, test and clarify their architectural design project. Each student will be appointed a supervisor with whom they will work with throughout the trimester, and with whom they will meet as a group on a weekly basis. The Progress Evaluation, Final Project Submission, and Formal Presentation constitutes the total grade for this unit.

## Assessment

- Progress Evaluation 20%
- Final project submission 60%
- Formal presentation 20%

## SRD768 – Landscape Design Masterclass

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 2 Unit Chair: David Jones*

*Prerequisite: Students enrolled in S703: 8 level 7*

*SR\* coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 4 hour studio per week.*

## Content

This unit stands as the critical summation and capstone of the knowledge and capabilities developed in design for the Master of Landscape Architecture course. Students are required to produce a landscape architectural design project using an advanced design methodology underpinned by an essential theoretical intention. Each student shall formulate a project brief, and move to a position where a substantial body of work can be developed using a range of complex landscape architectural approaches and sophisticated principles of design. This will require students to integrate their body of knowledge and methods, and demonstrate the use of contextual, functional, technical and theoretical factors to explore, test and clarify their landscape architectural design project.

Each student will work with the Unit Chair and the Tutors whom they will engage with throughout the trimester, and with whom they will meet with on a weekly basis. The Progress Evaluation, Final Project Submission, and Formal Presentation constitutes the total grade for this unit.

## Assessment

- Progress evaluation 20%
- Final project submission 60%
- Formal presentation 20%

## SRE170 – Construction Finance

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: John Kite*

*Trimester 3 Unit Chair: Nick Jahnecke*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

## Content

In SRE170, students will learn fundamental accounting principles and practices to financial transactions on building works and in construction companies. Students will identify how accounting is one of a number of systems which provide information to managers in the construction industry. Learning and assessment activities will focus on understanding financial statements, elementary financial analysis and cash management, taxation considerations including capital allowances, capital budgeting techniques and the obligations and cost of employing staff.

## Assessment

- Group research report 30%
- Accounting report 30%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRE270 – Building Economics

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Farnad Nasirzadeh*

*Prerequisite: SRE170*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

This unit explores macro and micro economic concepts as they apply to the construction and property industries. Topics include the behaviour of the Australian economy, macro economic theories, tools and policies available to influence the performance of the economy, supply prices and output decision-making and structure, market fluctuations, price mechanisms, concept of cost, profit maximising, market structures, government intervention and regulation, consumer behaviour and labour markets. Urban economics, including land as a factor of production, land rent, land use problems, location decisions, urban growth, transportation and public intervention are also discussed. An introduction to business planning is undertaken.

### Assessment

- Essay 25%
- Group research report 25%
- Examination 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRE272 – Building Measurement

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*Previously coded as: SRQ271*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Argaw Gurm*

*Prerequisite: SRT151 or SRT112*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

SRE272 introduces students to the principles and practices of building measurement in simple low-rise residential construction through the use of the Australian Standard Method of Measurement (ASMM). The distinct differences in roles and responsibilities between the quantity surveyor and the contractor's estimator will also be discussed. Students will also be introduced to the use of computer programs for the measurement of building works.

### Assessment

- Online quiz (2 x 10% each) 20%
- Group practical measurement task 40%
- Examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

### Prescribed texts

AIQS, 2016, Australian Standard Method of Measurement of Building Works, 6th Ed, Australian Institute of Quantity Surveyors

## SRE302 – Building Measurement and Estimating

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Argaw Gurm*

*Trimester 3 Unit Chair: Reza Taban*

*Prerequisite: SRE272 and SRT251*

*Corequisite: Nil*

*Incompatible with: SRE373*

*Scheduled learning activities – campus:*

*Trimester 1: 1 x 1 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online):*

*Trimester 3: Learning experiences are via CloudDeakin plus 3 x 1 hour online seminars per trimester. Students also have the option to attend half day seminars (8 hours in total) at the Waterfront (Geelong).*

## Content

SRE302 is designed for students to develop greater understanding of measurement and estimating principles and practices in commercial and industrial construction. Students will learn concepts including preliminaries, trade preambles, measurement and billing of quantities for a wide range of trades. They will develop and apply technical skills including the use of specialised computer software in compiling documentation and estimating of unit rates. The application of Building Information Modelling (BIM) for measurement and estimating is encouraged in this unit.

## Assessment

- 2 x online quizzes 20%
- Group practical measurement and estimating task 40%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## Prescribed texts

AIQS, 2018, Australian and New Zealand Standard Method of Measurement of Building Works, (2018 edition), Australian Institute of Quantity Surveyors  
OR AIQS, 2016, Australian Standard Method of Measurement of Building Works, (6th edition), Australian Institute of Quantity Surveyors.

## SRE372 – Measurement and Estimating 2

*Enrolment modes: Not available from 2017*

*Credit point(s): 1*

*Previously coded as: SRQ271*

*EFTSL value: 0.125*

*Unit chair: Roshani Palliyaguru*

*Prerequisite: SRE272*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

SRE372 is designed for students to develop greater understanding of measurement and estimating principles and practices in commercial and industrial construction. Students will learn concepts including preliminaries, trade preambles, measurement and billing of quantities for a wide range of trades. They will develop and apply technical skills including the use of specialised computer software in compiling documentation and estimating of unit rates.

## Assessment

- Online quiz (2 x 10% each) 20%
- Group practical measurement and estimating task 40%
- Examination 40%

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRE373 – Measurement and Estimating 3

*Enrolment modes: Not available from 2017*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Roshani Palliyaguru*

*Prerequisite: SRE372*

*Corequisite: Nil*

*Incompatible with: Nil*

## Content

SRE373 will allow students to develop a deep understanding of measurement and estimating practice for complex building works as well as the procedural rules that apply in practice. Students will be introduced to measurement of building services and civil engineering and to the role of Building Information Modelling (BIM) in the preparation of estimates and tender documents.

## Assessment

- Estimating practice report 20%
- Group practical measurement and estimating task 40%
- Examination 40%

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRE464 – Building Development Appraisal

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Dominic Doe Ahiaga-Dagbui*

*Prerequisite: SRE270 or MMP213*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week per trimester.*

### Content

This unit focuses on the role of property development and building professionals in driving construction. Topics include the analysis of property markets, methods of valuation for land and buildings, sources of financing, determination of market demand, effects of taxation on property development and ownership, and the role and responsibilities of developers. Feasibility studies, capital budgeting techniques and the assessment of investment risk are major components of this unit.

### Assessment

- Individual report 30%
- Group report 30%
- Individual research project 40%

## SRL731 – Landscape Narrating and Meaning

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: David Jones*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 6 x 1 day class/seminars (6 hours per day).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

SRL731 challenges students to consider the position, evolution and 'art' of designing landscapes (whether small or large) and the antecedents and thinking processes that were employed to chart and construct these places. But, unlike most landscape architectural history-theory units around Australia, while their emphasis is upon the history of place and designed landscapes, this Unit places a greater emphasis upon analysing the 'making' and 'narrating' of the designed landscape to enable you to question the logic behind the design, the intent and words of the designer(s) in ideating and crafting the place, and their attention to the qualities and post-design outcomes of the place.

This unit seeks to provide a foundational overview of the history, theory and practice of the evolution, exemplars and role of the profession of landscape architecture in Australia and internationally. The first part of this unit addresses theories inherent in landscape architecture including reviewing authors, precedent texts, and exemplars arising from these theories. A second part explores the historical evolution of the profession of landscape architecture internationally, and its foundations in Australia into a profession including its contemporary activities, proponents and key practices. A third part examines the ethos of the Australian landscape architecture profession including its advocates, key influencers and precedents, and the role and activity of the Australian Institute of Landscape Architects (AILA). The last part of the Unit considers the significant texts and projects that embody the aims and objectives of the Australian profession together with engaging in and appreciating the narrating of design, constructing designs, and illustrating designs.

### Assessment

- Individual visual diary (illustrative and textual) 20%
- Visual diary (illustrative and textual) 20%
- Individual narrated powerpoint 20%
- Individual illustrative essay and narrated powerpoint 40%

## SRL732 – Plants, Design and Ecologies

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: David Jones*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 6 x 1 day class/seminars (6 hours per day).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

SRL732 considers the role of plants and plant material in landscape design and landscape architecture. The thrust of this unit is upon planting design, and learning about plants and their applications and possibilities as a design medium. Planting design is the art and process of designing and creating plans for layout and planting of public domain areas, gardens, and landscapes.

This unit explores and reviews the realm of plant science and natural ecology as it pertains principally to the profession of landscape architecture. Part of the unit seeks to explore nomenclature, plant habitat and needs and plants generally in terms of their scientific and taxonomic use, language and peculiarities. A second part nurtures an individual appreciation and palette of plant materials pertinent to the practice of planting design. A third part explores fundamental concepts of ecological science including systems, scientific communities, the role of soils and geology, the links between plants and wildlife, and the food and medicinal properties of plants whether European, scientific and or Indigenous. A fourth part examines two select ecosystem types, for example coastal and riverine, as case studies in indigenous plant and ecological systems and the manner in which such systems have been appropriated and used in landscape architecture design, ecological restoration, rehabilitation, planning and or management projects as well as their despoliation, misuse, dilution by exotics and noxious species, fragmentation of corridors and patches, and the impact of human-driven land development activities. Lastly, the unit considers the use of plants as a medium in design culminating in a planting design exercise.

### Assessment

- Plant identification assignment 20%
- Plant research file 50%
- Site analysis 10%
- Planting design assignment and presentation 20%

## SRL733 – Indigenous Narratives and Processes

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: David Jones*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 6 x 1 day class/seminars (6 hours per day).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

SRL733 considers contemporary engagements and relationships with Australian and international Indigenous communities in design and planning practice and projects. Part of the unit examines Indigenous peoples and their cultural and spiritual relationships to land, territory, Country, language, name, knowledge transferal, sedentary patterns, custodianship, curatorship, alternate approaches to 'natural science', personal and environmental health and their symbiotic use and curatorship of natural resources as legitimate land design, planning and management tools and approaches. A second part examines a set of Australian and international exemplar case studies where Indigenous peoples have served either as client or consultant in the formulation of design and planning projects that have resulted in international and or highly significant, innovative and creative outcomes that demonstrate respect and cultural richness. A third part considers processes of managing cultural-rich projects including consultation, engagement and protocols. A fourth part draws upon on-site engagement with a place rich in Indigenous meanings, associations, history, myth, and provide a first-hand understanding of Indigenous protocols.

### Assessment

- Cultural protocol 30%
- Cultural project esquisse 30%
- Cultural project critique 30%
- Project oral presentation 10%

## SRM161 – Contract Administration 1

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*Previously coded as: SRP161*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dominic Ahiaga-Dagbui*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

SRM161 introduces students to the legal system and its role in society. Students will learn basic rules and conventions concerning the legislative and judicial systems, the principles of the law of contract in personal transactions and building organisations, building contract documentation and the law of tort. This will enable students develop knowledge of contractual and legal requirements, which they will apply to built environment projects.

### Assessment

- Business structure report 20%
- Legal principles report 40%
- Examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRM165 – Introduction to Building Information Modelling

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: M Reza Hosseini*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week*

### Content

Effective management of information is central to the success of construction projects. In SRM165, students will have the opportunity to gain knowledge of the concepts as well as hands-on experience with related information management systems and methodologies. The unit focuses on major aspects associated with adoption and implementation of information management systems for data creation, visualisation, usage and sharing on construction projects. Students will also be introduced to leading Building Information Modelling (BIM) packages.

### Assessment

- Report (including application of software tools) 20%
- Building Information Modelling (BIM) model development 30%
- Group BIM report (including presentation) 50%

## SRM181 – Project Management 1

*Enrolment modes:*

*Trimester 1: Burwood (Melbourne), Waterfront (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Linda Tivendale*

*Trimester 3 Unit Chair: M. Reza Hosseini*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour scheduled online class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

### Content

SRM181 provides students with an overview of all the essential knowledge required to operate successfully as a project manager in the construction industry. In this unit students will learn about purpose of project management and the context of project management within the Australian construction industry. Learning and assessment activities in the unit will allow students to discuss the lifecycle of a project with a particular focus on the initiation stage and planning stage. Students will also be introduced to project management activities of planning, monitoring and control.

## Assessment

- Project lifecycle poster presentation (group) 30%
- Project management essay 50%
- Research report and discussion (group) 20%

## SRM261 – Contract Administration 2

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Adam Krezel*

*Prerequisite: SRM161 or MLC101*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour scheduled online class per week, 1 x 1 hour seminar per week.*

## Content

SRM261 extends the study of the law related to building introduced within SRM161 Contract Administration 1. In this unit, students will examine standard form contracts and investigate the contractual responsibilities and obligations of the parties to a contract. They will learn about the contractual position with respect to time, cost, quality and scope in both residential and commercial contracts.

## Assessment

- Construction contract report 20%
- Group contract administration manual and poster presentation 40%
- Contractual resolution report 40%

## SRM281 – Project Management 2

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Farnad Nasirzadeh*

*Prerequisite: SRM181*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

## Content

In SRM281 students will extend the knowledge gained in SRM181 with a particular focus on the construction stage and finalisation stage of a project. They will learn about the tools, techniques and practices required to ensure successful delivery of a construction project and to meet client requirements.

## Assessment

- Discussion of individual project analysis 20%
- Project management report 30%
- Group PMP (project management plan) presentation 50%

## SRM310 – Project Planning and Scheduling

*Enrolment modes:*

*Trimester 2: Waterfront (Geelong)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Jun Wang*

*Trimester 3 Unit Chair: Hong Xian Li*

*Prerequisite: one of SRT151 or SRT112 and one of SRT251 or SRT214*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Trimester 2: 1 x 1 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online):*

*Trimester 3: Learning experiences are via CloudDeakin plus 3 x 1 hour online seminars per trimester. Students also have the option to attend half day seminars (8 hours in total) at the Waterfront (Geelong).*

## Content

SRM310 will provide students with knowledge and skills required for planning and scheduling of construction projects. Students will develop skills to prepare, read, monitor and adjust project schedules, using common tools and techniques. Students will be introduced to the use and benefits of Building Information Modelling (BIM) in planning and scheduling.

## Assessment

- Group project planning report and presentation 40%
- Individual scheduling assignment 20%
- Individual scheduling assignment with problem solving report 40%

## SRM381 – Project Management 3

*Enrolment modes:*

*Trimester 2: Waterfront (Geelong)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Adam Krezel*

*Trimester 3 Unit Chair: Abid Hasan*

*Prerequisite: SRM281*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

### Content

SRM381 builds on the knowledge gained in SRM181 and SRM281. In this unit, student learning will focus on the project management tasks of problem solving, communications and negotiation to ensure successful project delivery and to meet client requirements. Project management in practice is researched to provide an understanding of benchmark performance and innovation within the global construction industry.

### Assessment

- Presentation of group project management analysis 40%
- Research paper with poster 30%
- Interpersonal skills report and discussion (group) 30%

## SRM461 – Contract Administration 3

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gayani Karunasena*

*Prerequisite: SRM261*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week*

### Content

SRM461 completes the contract administration suite of units in the Bachelor of Construction Management (Honours). In this unit, students will learn about decision making and problem solving with respect to contracts in built environment projects. Student learning will particularly focus on procurement, risk and tender evaluations and dispute resolution. Students will also develop technical skills for the administration of construction contracts using specific software packages introduced within the unit.

### Assessment

- Individual strategic procurement report 20%
- Group tender evaluation and risk analysis report 30%
- Case study report 50%

## SRM489 – Professional Practice

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Asheem Shrestha*

*Prerequisite: 3 level 3 or 4 SR% coded units*

*Corequisite: Nil*

*Incompatible with: SRM570 and SRR512*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

In SRM489 students will investigate the current and future roles of professionals practice within the Australian construction industry. Student learning will focus on examining the application of key principles and professional ethics; social and environmental obligations of professionals; industry regulations, codes of conduct and practice, legal requirements and registration of building professionals practising in Australia. Learning and assessment activities will require students to explore the implications of employment laws and industrial relations on construction organisations and examine the impacts of internationalisation, globalisation, global economy, and cultural diversity.

### Assessment

- Individual research report 30%
- Group report and oral presentation 50%
- Learning outcome portfolio 20%

## SRM750 – Built Environment Professional Practice

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Igor Martek*

*Cohort rule: Students enrolled in S700, S701 or S711 must enrol in campus mode*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SRM470 and SRM591*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit has two purposes; the first is to introduce professional practice principles and the second is to explore the roles and functions of, and interactions between different types of built environment professionals. The unit has an emphasis on professional practitioner involvement in the building construction industry and the roles of architects, landscape architects and land use planners in working with the respective disciplines as well as urban designers, construction managers and other building industry professionals

In terms of principles, the students will explore the legal and ethical responsibilities of built environment professionals to clients, consultants and other parties. This exploration will enable students to contextualise professional practices, ensuring they are critiqued, understood and realised within economic, social, cultural and professional contexts. The unit also introduces the bases for professional competency and registration, principles of the law of contract, law of tort, copyright, moral rights and professional codes of conduct as they relate to built environment professionals.

Students will also learn about establishment and organisation of small practices; the collaboration process with clients; feasibility studies, negotiations with planning and building authorities, tendering, methods of building procurement (in particular the specifics of architect- or landscape architect- or planner-administered contracts), the control of the staging of pre-design, design, contract documentation and contract administration stages, and the broader relationship between the local and global contexts of professional practice.

### Assessment

- Project initiation 30%
- Planning work 30%
- Examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRM751 – Principles of Building Information Modelling

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: M. Reza Hosseini*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

### Content

The unit enables students to integrate work-based case studies with the theory and practice of management of an integrated multidisciplinary information system/model of a complex projects. The unit examines information creation, ownership, usage, development and management and for planning, modelling and simulation to support effective decision making using BIM methodology. The students will examine such themes as: software and hardware tools, data compatibility, interoperability, procurement strategies, model/system ownership, contractual obligations, legal frameworks and security. The relationship between managing intellectual capital through knowledge management systems will also be examined. Students are challenged in development of execution plans to support implementation of integrated project information system/model through adoption of BIM for a case construction project.

### Assessment

- Individual project 15%
- Individual essay 45%
- Group project and presentation 40%

## SRM752 – Advanced Project Management

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Adam Krezel*

*Trimester 3 Unit Chair: Adam Krezel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

### Content

The unit integrates the historical development of the project management profession with contemporary internationalised project management practice. A case study approach is used to examine project management theories, methodologies and techniques for large-scale, construction projects. Learning and assessment activities will enable students to explore strategic, tactical and operational challenges of project management and investigate appropriate methodologies and techniques used in successful delivery of complex construction projects. Students will investigate and evaluate various project organisational structures in the context of the case study project parameters. Learning through case study approach will aid students to develop leadership and project management skills enabling successful project initiation, planning, delivery and closeout.

### Assessment

- Critical analysis report 40%
- Project management plan 60%

## SRM771 – Work Place Assessment

*Enrolment modes: not available from 2018*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: John Rollo (Trimester 2), Scott Eldridge (Trimester 3)*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

This unit enables students to complete a built environment industry-based practice case study within a public or private sector organisation that provides planning, design and/or policy development expertise for the design of sustainable and health urban conscious environments. 'Industry' is defined as including both private (design, planning, development entities) and public (community activist, local government, state government, and quasi-government entities). Students will be required to review the organisation of a practice or department engaged in delivering professional based project work. Each student will be assigned an academic supervisor.

### Assessment

- Progress report 40%
- Final report 60%

## SRM772 – Built Environment Practical Assessment

*Enrolment modes: Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Yolanda Esteban*

*Trimester 3 Unit Chair: John Rollo*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

The work integrated learning strategies adopted in this unit include student-initiated through reflective and action learning and or applied practice-based experiences including professional creative work at approved venues. The application of these learning strategies is embedded in a guided program of assessable components that give students the opportunity to develop generic skills in career-related skills, aligned to their course discipline, as well as developing the specific skills and knowledge required of a built environment professional in practice. Involving formal learning, this practice-based experience for students is intended to enable the development and advancement of knowledge and skills typically sought from graduate professional built environment practitioners.

*Note: Entry to this unit is via application and approval of the Unit Chair.*

## Assessment

- Learning plan 10%
- Placement/practice-based project or creative work 60%
- Reflective journal 30%

## SRM777 – Construction Management Practice

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong), Cloud (online)*

*Trimester 2: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.25*

*Trimester 1 Unit Chair: John Kite*

*Trimester 2 Unit Chair: John Kite*

*Trimester 3 Unit Chair: John Kite*

*Prerequisite: 8 level 7 SR\* coded units*

*Corequisite: STP710 and must be enrolled in S792*

*Incompatible with: SRR724*

*Scheduled learning activities – campus: 2 hours of class/seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin, plus 5 x 1 hour online seminars per trimester.*

## Content

SRM777 provides students with an opportunity to gain a better understand of the construction industry workplace through real or simulated work placement. Simulated work placements will be offered through the use of the simulated work environment software program where students will form construction companies and work together to bid on projects, manage staff and stakeholders, make financial decisions and grow the wealth of their company. In this unit students will be required to apply discipline and course specific knowledge across a range of construction industry roles. Students will learn skills to improve their employability, build work ready professional capabilities and gain knowledge of the career development required of someone seeking to become a Built Environment Professional.

*Note: Most students undertake the simulated version of this unit and do not require a work placement. If you source your own placement, please note that delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

## Assessment

- Career development plan 20%
- Company brochure (group) 20%
- Report on work practices 40%
- Presentation 20%

## SRM781 – Managing Change and Innovation

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Yolanda Esteban*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 2 x 2 days intensive seminars (6 hours per day).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

The purpose of this unit is to provide participants with concepts and methods that will help them be successful leaders of change as they apply to cultivating and implementing policies and strategies in the design of sustainable and creative cities. The course draws upon the latest research and managerial studies on processes of: cultivating innovating thinking; dynamics of groups; facilitation processes; team formation; principles of project management; project implementation methods; place management and the implication of new change efforts.

## Assessment

- Essay 30%
- Urban change project 40%
- Critique presentation 30%

## SRP733 – Contemporary Planning and Design Challenges

*Offering information: 2019 is the final offering of this unit*

*Enrolment modes: Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: AIA718*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Surabhi Pancholi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: AIA718*

*Scheduled learning activities – campus: 4 x 1 day class/seminars per trimester (6 hours per day) as well as independent study.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin*

## Content

SRP733 challenges students to consider the historical nature of Western land use and the implications of planning and design practice. Notions of ethical planning and design practice and the public interest will be explored along with the idea of conflict of interest. Finally, the unit will focus on current issues, both legislative and those places and topics that are exciting the popular imagination including Smart Cities, Creative Cities and the Anthropocene.

## Assessment

- Essay (theory) 30%
- Essay (practice) 50%
- Oral presentation 20%

## SRP761 – Ecological Cities and Futures

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Phillip Roos*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 6 x 1 day classes/seminars (6 hours per day).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

Urban ecologies through the lens of creative vegetation use and practice, linked to water sensitive design and urban design, is increasingly becoming a tenet of built environment design internationally. This unit explores urban ecology history, theory and contemporary practice in the design and planning of the built environment, offering insights into new projects, new technologies and approaches that use vegetation to achieve sustainable outcomes at regional, metropolitan, local and specific building levels. This includes a review of urban ecology theory as it relates to urban environments, water systems, urban wildlife systems, coastal and riverine environments, wetland systems, and mono-cultural open spaces as habitat shapers, manipulators and healthy community indicators, and thereupon consideration of urban ecology in design applications including design properties, use in open space and streetscapes, human and wildlife habitat formation and manipulation through a design and planning lens. It also reviews the role and potential of plant materials and plants (trees, shrubs, ground covers, etc) in design and planning applications in mediating environmental effects, heat island mediation, offering environmental psychological benefits and quality environmental outcomes, therapeutic landscapes as place making, and in establishing the identity and distinctiveness of places whether historically or contemporary through a design and planning lens.

## Assessment

- Research essay 25%
- Critique essay 25%
- Planning/design proposal 35%
- Oral presentation 15%

## SRP781 – Planning Processes and Practice

*Offering information: 2019 is the final offering of this unit*

*Enrolment modes: Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: Surabhi Pancholi*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students are required to attend 4 x 1 day classes/seminars (6 hours per day).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit provides a robust understanding of the fundamentals and techniques of spatial 'plan-making' from neighbourhood to regional scales for a variety of purposes, along with the preparation and administration of land use management tools. It outlines strategic planning processes for gathering a diversity of information, identifying often conflicting objectives and aspirations for land use, engaging with stakeholders and community interests to articulate and reconcile priorities, then devise options that aim to resolve a shared future that can achieve political and community acceptance. The unit then explores the underlying principles and mechanisms utilised in the assessment and regulation of land use. These includes procedures requiring approval for the development of land or changes of use, assessing and balancing conflicting personal or societal objectives, resolution of disputes, review of decisions through appeal mechanisms, and reserve provisions enabling executive government to manage major or priority projects. These mechanisms and their underlying principles are illustrated utilising examples from across a range of jurisdictions, predominantly among Australian states, and the British and North American approaches they have drawn upon.

### Assessment

- Strategic and statutory planning appraisal (written critique) 60%
- Appraisal report (planning application) 40%

## SRP782 – Smart Cities and Infrastructure

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: David Jones*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Students are required to attend 4 x 1 day classes/seminars (6 hours per day).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

This unit provides a comprehensive overview of the economic, social, political and environmental influences upon the evolution, form and dynamics of settlement and cities. These influences shape urban settlements and cities and combine to make each urban place distinctive. In this unit, students will develop foundational knowledge in geographic and economic theories that explain the form and distribution of settlement and uses. Particular attention is paid, in this unit, to the forces that can influence urban change or that may be harnessed to pursue preferred future forms. This unit has particular relevance for addressing emerging scenarios as contemporary society recognises the prospect of low carbon future, climate change, oil supply vulnerability and changing demographic profiles. Students will also consider the capacity for – and limitations upon – planning and influencing change outcomes, and the issues surrounding governance and decision-making processes that can guide or modify the processes of urban change.

### Assessment

- Essay 20%
- Research paper 30%
- Case study report 50%

## SRQ301 – Building Cost Planning

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Nick Jahnecke*

*Prerequisite: SRE272 and SRT251*

*Corequisite: Nil*

*Incompatible with: SRQ462*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

SRQ301 students will consider the principles of design economics applied to buildings and the role of cost planning during design development. They will learn the purpose of and apply techniques of cost planning and control. Learning and assessment activities in the unit will focus on the examination of the effect of design constraints and variables on total building costs, and the accuracy of different estimating approaches.

### Assessment

- Preliminary estimate and budget 30%
- Group report 30%
- Examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRQ460 – Quantity Surveying Practice

*Enrolment modes:*

*Trimester 2: Waterfront (Geelong)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Abdul-Manan Sadick*

*Trimester 3 Unit Chair: Gayani Karunasena*

*Prerequisite: SRQ301 or SRQ462*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus:*

*Trimester 1: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online):*

*Trimester 3: Learning experiences are via CloudDeakin plus 3 x 1 hour online seminars per trimester. Students also have the option to attend half day seminars (8 hours in total) at the Waterfront (Geelong).*

### Content

In SRQ460 students will develop an understanding of Quantity Surveying practice in the construction industry. Students will learn relevant skills to enable them to provide advice on building design and management based on economic factors at various stages during a project's lifecycle. Consideration of building performance is also considered.

### Assessment

- Feasibility report 30%
- Pre-tender report 30%
- Group quantity surveying research report 40%

## SRQ462 – Building Cost Planning

*Enrolment modes: Not available from 2017*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Roshani Palliyaguru*

*Prerequisite: SRT351 and SRE272 (students enrolled in S346, D364, D365)*

*Corequisite: Nil*

*Incompatible with: Nil*

### Content

In SRQ462 students will methodically consider the principles of design economics applied to buildings and the role of cost planning during design development. They will learn the purpose of and apply techniques of cost planning and control. Learning and assessment activities in the unit will focus on the examination of the effect of design constraints and variables on total building costs, and the accuracy of different estimating approaches. Students will also develop an appreciation for life cycle costing and its importance in the assessment of environmental sustainability.

### Assessment

- Preliminary estimate and budget 30%
- Group cost plan report 30%
- Examination 40%

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRQ745 – Construction Company Management

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Asheem Shrestha*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

### Content

This unit investigates various innovative construction management approaches and management strategies developed by leading edge research and /or used by practitioners including: supply chain management, lean construction, benchmarking, constructability and re-engineering, and risk management.

### Assessment

- Company business plan 30%
- Group report and oral presentation on business activities for complex project 50%
- Construction industry portfolio 20%

## SRQ762 – Cost Planning

*Enrolment modes:*

*Trimester 2: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Farnad Nasirzadeh*

*Trimester 3 Unit Chair: Argaw Gurmu*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

### Content

In SRQ762 students will consider the principles of design economics applied to buildings and the role of cost planning during design development.

They will learn to analyse the influence of design decision making on project costs and how design constraints and variables impact on total building costs. Students will gain knowledge in their role in enabling sound economic decision making in early project phases and how to ensure cost accuracy for clients and other project stakeholders for the term of the project. Students will examine the concept of economically sustainable projects through the theory and practice of life cycle costing and evaluation.

### Assessment

- Individual professional report 20%
- Group professional cost plan and report 40%
- Examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRQ763 – Legal Risk Management

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Dominic Ahiaga-Dagbui*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

### Content

SRQ763 examines complex construction projects from a legal risk management framework perspective and its implications for projects' scope, quality, cost and time parameters. Students will learn about legal and business contexts of construction organisations and projects. Through learning and assessment activities students will engage in analysis of strategic approaches for risk allocation and contractual arrangements.

The unit introduces standard forms of contracts used in the Architecture, Engineering and Construction (AEC) industry including best practice in contract administration. Theories and practice of project conflict management, dispute avoidance and dispute resolution are investigated through precedence. Students will explore the remedies available for the various conflict pathways of identification, early intervention, claim, negotiation, arbitration and litigation. Learning through case study approach will aid students in developing skills and knowledge of risk identification, analysis and mitigation that integrates projects strategic objectives of risk and conflict avoidance.

## Assessment

- Individual essay 30%
- Group report 30%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve at least 40% in the examination.

## SRQ764 – Building Project Evaluation

*Enrolment modes:*

*Trimester 2: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Xin Hu*

*Trimester 3 Unit Chair: Olubukola (Bukky) Tokede*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Trimester 2: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

## Content

This unit examines the processes and techniques used in property development appraisal and the economic evaluation of building projects. Students will learn about the development process, property investment, feasibility studies, property markets, project finance, taxation and risk analysis. Students will analyse the multi-disciplinary nature of the development process and the relationship between design decisions and the

total cost of building projects as they prepare detailed development appraisals and feasibility studies within the context of property markets and the built environment business ecology. Learning and assessment activities will enable student's appreciation of the role that project financing arrangements play in influencing the size, scale and success of building project developments. The implications of various factors including taxation, regulation, international financial markets and social and business networks are examined in relation to development risk analysis and decision making.

## Assessment

- Group research report 30%
- Property valuation report 30%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRQ774 – Construction Measurement

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Reza Taban*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

## Content

In SRQ774 students will be able to develop a greater understanding of the principles and practice of measurement and estimating in low-rise and medium-rise construction. Learning and assessment activities will focus on construction documentation as a critical form of information transmission, the roles and uses of bills of quantities, builders' quantities and estimates, measurement and billing of quantities for a wide range of construction trades and estimating of unit rates. Students will be required to learn and apply appropriate computer software packages in this unit.

## Assessment

- Practical task 20%
- Group practical task 40%
- Examination 40%

## Hurdle requirement

In order to obtain a pass in this unit students must achieve a mark of 40% in the examination.

## Prescribed texts

AIQS, 2018, Australian and New Zealand Standard Method of Measurement of Building Works, (2018 edition), Australian Institute of Quantity Surveyors  
OR AIQS, 2016, Australian Standard Method of Measurement of Building Works, (6th edition), Australian Institute of Quantity Surveyors

## SRQ780 – Strategic Construction Procurement

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Gayani Karunasena*

*Trimester 3 Unit Chair: Nateque Mahmood*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

## Content

The unit examines contemporary international practice in relation to procurement strategies such as relational contracting, strategic project alliance and public-private partnerships within complex project team environments. The unit will challenge students to examine businesses which underpin strategic construction procurement decision making to achieve economic, environmental, social and cultural sustainable objectives. The interdependency between procurement strategy decisions – making on the characteristics of the construction industrial production sector is revealed and analysed through various workplace scenarios.

Unique construction procurement environments will be explored through various case studies allowing the students to examine key themes of relationship contracting, construction culture, ethical procurement, internationalisation and supply chain management. The unit shall engage students on the impact of procurement systems on project delivery as it applies to a global construction market.

## Assessment

- Critical review 20%
- Strategic procurement report 30%
- Critical analysis (group report) 50%

## SRR311 – Built Environment Research Project

*Enrolment modes: Trimester 3: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: James Doerfler*

*Prerequisite: Must have completed 8 credit points of study*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Minimum study commitment of 10 hours per week, the Unit Chair will clarify the exact scheduled learning activities (campus) on application.*

## Content

In consultation with the Unit Chair, students will be required to undertake activities including defining a research topic or project that examines a topic in the built environment. The tasks may involve planning a research program; delineation of a design process; undertaking a project as part of a domestic or overseas study tour; collecting and analysing data appropriate to the research topic or project; and documenting and/or expressing the results of the research in a range of suitable assessable media. The specific research or project topic and the details of the research or project are to be determined in consultation with the Unit Chair.

*Note: Entry to this unit is via application and/or interview and approval of the Unit Chair.*

## Assessment

- Research/project journal 50%
- Research/project report 50%

## SRR367 – Built Environment Study Tour

*Enrolment modes: Trimester 3: Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Susan Ang*

*Trimester 2 Unit Chair: Susan Ang*

*Trimester 3 Unit Chair: Susan Ang*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Study Tour: 3 x 2 hour pre-study tour seminar, 1 x 2 hour pre study tour travel safe workshop, minimum one week of study tour, 1 x 3 hour post study tour seminar.*

### Content

SRR367 is a study tour unit designed for undergraduate students that draws on the area of the student's study which may be drawn from any discipline or campus. The unit offers students collaborative, immersive and experiential learning opportunities. The study tour enables students to address topical challenges associated with real world problems and to engage first hand with design understanding of the built environment within diverse contexts and cultures. Skills will include cross cultural communication, personal goal setting, self-management and organisational skills, reflection, analysis and design, and development and implementation of study tour project. The substantive outcomes will vary according to the stream of study and will include exhibition quality presentation of both individual and collective effort.

*Note: Entry to this unit is via application and interview. Students are required to fund their own travel and accommodation costs and activities undertaken in this unit.*

### Assessment

- Pre study tour report 20%
- Study tour presentation 50%
- Post study tour reflection 30%

## SRR401 – Introduction to Construction Research

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong)*

*Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Linda Tivendale*

*Trimester 2 Unit Chair: Imriyas Kamardeen*

*Prerequisite: 3 level 3, 4, or 5 SR coded units*

*Corequisite: Nil*

*Incompatible with: SRR491*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 1 hour seminar per week*

### Content

SRR401 provide students with an introduction to research to assist in the development of a research topic for SRR402 – Construction Research Thesis. Students will learn about research problems and proposals, search for relevant literature and gain knowledge of contemporary research principles and methodologies that are relevant to research in construction management. Students will learn how to undertake a critical literature review, the ethics of data collection, how to prepare a research proposal, and research process and communications.

### Assessment

- Report on research topic and oral presentation 20%
- Research proposal 40%
- Literature review 40%

## SRR402 – Construction Research Thesis

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong)*

*Trimester 2: Waterfront (Geelong)*

*Trimester 3: Waterfront (Geelong)\**

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Olubukola (Bukky) Tokede*

*Trimester 2 Unit Chair: Jun Wang*

*Trimester 3 Unit Chair: Linda Tivendale*

*Prerequisite: SRR401*

*Corequisite: Nil*

*Incompatible with: SRR491*

*Scheduled learning activities – campus: Students are expected to attend campus for assignment presentations, 3 x 1 hour briefings per trimester with the Unit Chair and weekly meetings with their supervisor.*

## Content

SRR402 gives students the opportunity to undertake an in-depth investigation of a chosen topic. This topic will usually be chosen as part of your studies in SRR401. Students will be required to confirm their research proposal, identifying research objectives, performing research activities and communicate research results. This includes both oral and written communication. Students are encouraged to express their views, develop ideas and carry out such study and research as is necessary under the guidance of an appropriate supervisor.

Where data collection involves ethics approval, an application needs to have been approved by the University before fieldwork can begin. If final approval is not received by Week 4 then students must pursue an alternate methodology.

*Note: \*Trimester 3 enrolment is subject to approval by Unit Chair as part of agreed research project.*

*Note also that delays in completing the thesis could mean that the course will take longer to complete than the stated duration.*

## Assessment

- Project confirmation 5%
- Interim presentation 10%
- Written thesis with supervisor reports 60%
- Poster and oral defence 25%

## SRR711 – Thesis

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong), Cloud (online)*

*Trimester 2: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Astrid Roetzel*

*Trimester 2 Unit Chair: Angela Kreutz*

*Trimester 3 Unit Chair: Astrid Roetzel*

*Prerequisite: Students enrolled in S701 or S711 – SRR782 in addition to 2 level 7 SR\* coded units. Students enrolled in S700 – SRR782 in addition to 3 level 7 SR\* coded units. Students enrolled in S791 or S792 – SRR782 or SRR720 in addition to 3 level 7 SR\* coded units. Students enrolled in S703, S764, S702 or S795 – SRR782.*

*Corequisite: Must be enrolled in S700, S701, S702, S703, S711, S764, S791, S792 or S795*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week (weeks 1, 2, 3, 4, and weeks 9 and 10); (supervision to be arranged with supervisor, minimum study commitment of 20 hours per week).*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin (supervision to be arranged with supervisor, minimum study commitment of 20 hours per week).*

## Content

In this Unit students will undertake a Masters level thesis or research project related to their course of study, following one of two Inquiry Pathways: either a written research thesis, or a research exegesis (undertaken via a research project). By the end of the Unit students will have developed knowledge and skills to become independent researchers.

*Note: Also note that delays in completing the thesis could mean that the course will take longer to complete than the stated duration.*

## Assessment

- Feasibility study (outline thesis/exegesis) 20%
- Developed thesis/exegesis 65%
- Digital oral presentation 15%

## SRR720 – Construction Research Frontiers

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Asheem Shrestha*

*Trimester 3 Unit Chair: Linda Tivendale*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in S791 or S792*

*Incompatible with: SRR782*

*Scheduled learning activities – campus: Weeks 1–5: 1 x 1 hour class per week, 1 x 1 hour seminar per week. Weeks 6–11: 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin and includes 1 x 1 hour online seminar per week for 6 weeks.*

## Content

The unit provides students with the opportunity to explore key issues in construction management and the construction industry.

Students will learn how to search for relevant literature and undertake a critical literature review in order to identify the frontiers of existing knowledge on a given topic. Students will gain knowledge of contemporary research principles and methodologies that are relevant to research in construction management. They will develop an understanding of the research process, the ethics of data collection and analysis, and how to design research.

At the conclusion of this unit students will have developed a project proposal that can be undertaken in SRR721 Construction Research Project.

## Assessment

- Concept map 20%
- Research design 30%
- Project proposal 50%

## SRR721 – Construction Research Project

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong), Cloud (online)*

*Trimester 2: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Trimester 1 Unit Chair: Olubukola (Bukky) Tokede*

*Trimester 2 Unit Chair: Hong Xian Li*

*Trimester 3 Unit Chair: Adam Krezel*

*Prerequisite: SRR720 or SRR782 plus 3 level 7*

*SR-coded units*

*Corequisite: Must be enrolled in S791 or S792*

*Incompatible with: SRR711*

*Scheduled learning activities – campus:*

*Weeks 1, 5 and 8 – 1 x 1 hour class. 1 x 2 hour small group seminar per week for 11 weeks.*

*Scheduled learning activities – cloud (online):*

*Learning experiences are via CloudDeakin, including 2 x 1 hour online group seminars per week for 11 weeks.*

## Content

In this unit students will undertake an in-depth investigation of the topic of current importance to the construction industry that was identified in the prerequisite unit. Students will be required to establish research objectives, undertake research activities using an appropriate research method and communicate research results. Research results will be communicated through a fully documented written work and poster. By the end of the Unit students will have developed knowledge and skills to conduct independent research.

## Assessment

- Refined project proposal 20%
- Research report 60%
- Poster and oral presentation 20%

## SRR722 – Built Environment Research Project

*Enrolment modes: Trimester 3: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 3 Unit Chair: James Doerfler*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Minimum study commitment of 10 hours per week, the Unit Chair will clarify the exact scheduled learning activities (campus) on application.*

## Content

In consultation with the Unit Chair, students will be required to undertake activities including defining a research topic or project that examines a topic in the built environment. The tasks may involve planning a research program; delineation of a design process; undertaking a project as part of a domestic or overseas study tour; collecting and analysing data appropriate to the research topic or project; and documenting and/or expressing the results of the research in a range of suitable assessable media. The specific research or project topic and the details of the research or project are to be determined in consultation with the Unit Chair.

*Note: Entry to this unit is via application and/or interview and approval of the Unit Chair.*

## Assessment

- Research/project journal 50%
- Research/project report 50%

## SRR724 – Construction Research Paper

*Enrolment modes: Not available from 2019*

*Credit point(s): 2*

*EFTSL value: 0.250*

*Unit chair: Chunlu Liu (Trimester 1 and 2), Linda Tivendale (Trimester 3)*

*Prerequisite: One of SRR714, SRR711 or SRR721*

*Corequisite: Only available to students enrolled in S792*

*Incompatible with: Nil*

### Content

In this unit, students prepare research papers ready for submission to quality construction journals based on research results from SRR711/SRR714 Thesis or SRR721 Construction Research Project. Students integrate feedback from examiners of the thesis and presentation in SRR711/SRR714 Thesis or SRR721 Construction Research Project, expand their previous research works if necessary and present a specifically targeted journal paper based on original research involving theoretical, interpretative and analytical work, in consultation with appointed supervisors. Supervisors are normally the same for SRR711/SRR714 or SRR721 and SRR724. In this research unit, students not only carry out research tasks to develop new knowledge themselves but also communicate research findings through writing journal papers to advance the science of construction management.

*Note: Students would normally be expected to complete SRR711/SRR714 Thesis or SRR721 Construction Research Project and SRR724 Construction Research Paper in two successive trimesters. Enrolment into this unit is subject to a course minimum average mark of 65% and Unit Chair approval.*

### Assessment

- Expanded abstracts 20%
- Written papers 60%
- Poster presentation 20%

## SRR767 – Built Environment Study Tour

*Enrolment modes: Trimester 3: Study Tour*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Susan Ang*

*Trimester 2 Unit Chair: Susan Ang*

*Trimester 3 Unit Chair: Susan Ang*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Study Tour: 3 x 2 hour pre study tour seminar, 1 x 2 hour pre study tour travel safe workshop, minimum one week of study tour, 1 x 3 hour post study tour seminar.*

### Content

SRR767 is a study tour unit designed for the postgraduate student, which will draw on the area of the student's study irrespective of their discipline or campus. The unit offers students collaborative, immersive and experiential learning opportunities. The study tour enables students to address topical challenges associated with real world problems and to engage first hand with design understanding of built environment within diverse contexts and cultures. Skills will include cross cultural communication, personal goal setting, self-management and organisational skills, reflection, analysis and design, and development and implementation of study tour project. The substantive outcomes will vary according to the stream of study and will include exhibition quality presentation of both individual and collective effort.

*Note: Entry to this unit is via application and interview. Students are required to fund their own travel and accommodation costs and activities undertaken in this unit.*

### Assessment

- Context analysis report 20%
- Study tour presentation 50%
- Post study tour reflection 30%

## SRR782 – Research Methodology

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mark Luther*

*Trimester 3 Unit Chair: Astrid Roetzel*

*Prerequisite: Students enrolled in S700 or S701 must enrol in campus mode*

*Corequisite: Nil*

*Incompatible with: SRR481*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

The unit provides an introduction to research methodology typically undertaken in the architecture and built environment disciplines to enable progression to subsequent thesis and research units in Masters Courses in the School of Architecture and Built Environment. By the end of the unit students will have a critical understanding of research methodology in architecture and the built environment, and have developed a scholarly critical literature review for a research proposal for the subsequent thesis/exegesis.

### Assessment

- Outline research proposal 40%
- Developed research proposal 60%

## SRT112 – Sustainable Construction

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP112, MMP112*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Adam Krezel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MMP112 and SRT151*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

### Content

The aim of this unit is to introduce students to residential property construction techniques and the principles of building construction technology, materials and procedures and the key social, economic and environmental factors affecting sustainability. Students in this unit are introduced to sustainable building concepts – being increasing important in today's society and a key competency requirement for property and real estate professionals. The fundamentals of construction technology, materials and processes are linked to real world examples for residential developments. In particular, property and real estate professionals need to understand issues such as depreciation and the principles of building maintenance in the context of property value.

### Assessment

- 2 x written reports (25% each) 50%
- Examination 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 50% in the examination.

### Prescribed texts

Wilkie, 2011, Building Your Own Home (Revised edition with Green Supplement), 3rd Ed, New Holland, Chatswood NSW.

## SRT141 – Building Safety

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: John Kite*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

## Content

SRT141 provides the foundations for developing and maintaining a safety culture on building sites and other workplaces, and examines WorkCover requirements in accordance with the OH&S regulations and compliance codes following the Act of 2004, and occupational health and safety procedures and controls. Students will learn about fire safety and life safety principles, including basic first aid. Students will also learn about site safety and supervision of onsite operatives specifically with respect to site induction requirements and compliance requirements.

## Assessment

- Individual report on construction safety 30%
- Individual online quiz 20%
- Individual report on hazard analysis report 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must attain the OH&S construction induction card (white card) in this unit.

# SRT151 – Construction and Structures 1

*Enrolment modes: Trimester 2: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Glenn Costin*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SRT112*

*Scheduled learning activities – campus: 1 x 1 hour scheduled online class per week, 1 x 1 hour seminar per week.*

## Content

SRT151 introduces students to construction processes and structural systems. Students will learn about the building elements that comprise a simple residential building, such as footings, flooring, walls, roofs, and internal fit-out. Students will also learn about different structural systems in use, such as brick veneer, trusses and waffle slabs. Students will consider the engineering requirements that bear on house construction, such as loads, forces, fixing techniques, and material properties. Finally, students will be introduced to domestic building processes, such as site preparation, temporary structures, scheduling, safety, management, fabrication, equipment, permits and codes.

## Assessment

- Presentation of group case study analysis 40%
- 4 x online quizzes 10%
- Construction technology portfolio 10%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

# SRT153 – Building Materials Science

*Enrolment modes: Trimester 1: Burwood (Melbourne), Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Olubukola (Bukky) Tokede*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour scheduled online class per week, 1 x 1 hour seminar per week.*

## Content

SRT153 introduces students to the properties of materials used in a wide range of building applications. In this unit, students will learn about the chemical and physical properties and the procedures for selection of appropriate materials and their uses in buildings. Learning and assessment activities include the study of materials such as timber, concrete, metals, stone and ceramics, plastics and glass and the environmental significance of materials. Students will examine these material within the framework of sustainability and embodied energy.

## Assessment

- 5 online quizzes (2% each) 10%
- Building material report 20%
- Material comparison report 30%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## Prescribed texts

Ward-Harvey K, 2009, Fundamental Building Materials, 4th Ed, Ingram, USA

## SRT159 – Construction Projects 1

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Glenn Costin*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week (for 8 weeks), 1 x 2 hour workshop practical (for 3 weeks)*

### Content

SRT159 focuses on residential construction in terms of technical and regulatory requirements for design and construction. In this unit, students will gain an understanding of how Australian standards, National Construction Code (NCC) and other regulatory requirements are used in analysing construction drawings. They will gain practice in preparing and using construction drawings and documentation.

### Assessment

- Group report on analysis of regulatory requirements 20%
- Report on analysis of construction plans and process 50%
- Group construction of a model with report and presentation 30%

## SRT214 – Commercial Property Construction Studies

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRP214, MMP214*

*Trimester 1 Unit Chair: Adam Krezel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MMP214 and SRT251*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

### Content

Students progressively explore the methods and materials used on the construction of commercial, industrial and non-residential property, including procurement and contract administration, through an understanding of best practice procedures and legislative policy controls. Maintenance management strategies and principles are also discussed. Information about typical defects affecting different construction types and materials, underpins the unit and an awareness of effective repair options are also discussed. Information is provided in textual and graphical form.

### Assessment

- 2 x written report (25% each) 50%
- Examination 50%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 50% in the examination.

### Prescribed texts

Riley et al, 2014, Construction Technology 2 : Industrial & Commercial Building, 3rd Ed, Palgrave, United Kingdom.

## SRT251 – Construction and Structures 2

*Enrolment modes: Trimester 1: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Glenn Costin*

*Prerequisite: SRT151 or SRT112*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

This unit builds on the knowledge gained in the construction of simple residential building covered in SRT151, and develops that knowledge in the construction of larger, more complex, industrial and commercial buildings. Students will learn about the various structural solutions available to carry significant dead and live loads, and to span and cover wide areas, such as portal frames, and web truss systems. Students will also learn about the characteristics of various proprietary products, such as roofing materials, framing systems, walling components, and building services.

Structural processes and issues will also be covered in matters such as, site preparation, fabrication techniques, construction methodologies, as well as component detailing and joining.

### Assessment

- Presentation of group case study analysis 40%
- Online quizzes 10%
- Construction technology portfolio 10%
- Examination 40%

### Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## SRT257 – Building Environmental Studies 1

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Hong Xian Li*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

SRT257 allows students to investigate the climatic and environmental factors that influence the design and construction of buildings in the context of ecologically sustainable development. Students will be introduced to tools to rate the energy use of simple buildings. A trimester long project requires multi-disciplinary teams of architecture and construction management students to analyse and improve upon the resource efficiency of houses designed by local built environment professionals.

### Assessment

- 2 x individual reports (25% each) 50%
- Individual reflection 10%
- Energy performance re-appraisal (group) – video and report (video 12%, report 28%) 40%

## SRT259 – Construction Projects 2

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Kite*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

In SRT259 students will gain a detailed understanding of the regulatory environment of the Australian construction industry, National Construction Code (NCC) and associated standards for the construction of a range of low-rise buildings. Students will develop knowledge and skills in identifying, analysing and applying technical codes and materials standards in construction of low-rise residential and commercial buildings

### Assessment

- Individual report on regulatory compliance 20%
- Individual report on project control 30%
- Group regulatory report and presentation 50%

## SRT351 – Construction and Structures 3

*Enrolment modes: Trimester 2: Waterfront (Geelong)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Glenn Costin*

*Prerequisite: SRT251 or SRT214*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

### Content

SRT351 is the final unit in the construction and structures stream. Students will extend their knowledge from residential and low-rise commercial to the particular issues faced in the construction of multi-storey and high-rise buildings. Students will learn about constructing below ground floors, as well as working and building at height. Students will further investigate site preparation, equipment usage, erection and fabrication techniques, services provision, as well as the

material and structural demands on building elements. Students will learn about the integration of structure, enclosure, and services with building utility, and how various engineering systems, along with approaches to construction, impact these in terms of building speed, cost, quality and construction complexity.

## Assessment

- Technology portfolio 20%
- Group case study analysis report and presentation 40%
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

# SRT358 – Building Environmental Services

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong)*

*Trimester 3: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: SRT355, SRT356 and SRT458*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mark Luther*

*Trimester 3 Unit Chair: Mark Luther*

*Prerequisite: SRT257*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 1 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin, plus 5 x 1 hour online seminars per trimester.*

## Content

SRT358 allows students to investigate the range of building services used primarily in commercial buildings, including HVAC (heating, ventilation and air conditioning), electrical, vertical transportation and fire services. Students will learn about the spatial and location requirements as well as the component and installation principles, control systems, commissioning and testing requirements, and performance expectations. Alternative approaches with lower environmental impact and the roles and responsibilities of the various services consultants are also discussed.

*Note: \*In Trimester 3 students are expected to work in teams and to physically visit an Australian building as part of their major assessment. All learning materials are online.*

## Assessment

- Online quizzes 20%
- Preliminary group analysis and report 10%
- Interim group analysis and report 10%
- Final group analysis and report 20% (including video or similar)
- Examination 40%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 40% in the examination.

## Prescribed texts

Parlour, 2016, Building Services Engineering for Architects Building Design Professionals; A Guide to Integrated Design, 4th Ed, Integral Publishing

# SRT722 – Sustainable Construction Studies

*Enrolment modes: Trimester 1: Cloud (online)*

*Credit point(s): 1*

*Previously coded as: MMP722*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Adam Krezel*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: MMP722*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars per trimester.*

## Content

This unit has a focus on building studies in the context of sustainability and covers residential and non-residential (including high-rise) construction technology, building costs, plans and specifications, materials, depreciation and maintenance. The aim of this unit is to introduce students to the principles of building construction technology, materials and procedures and the key social, economic and environmental factors affecting sustainability.

## Assessment

- Two written reports (25% each) 50%
- Examination 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit students must achieve at least 50% in the examination.

## SRT750 – Sustainable Futures

*Enrolment modes: Trimester 2: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: Carlos Bartesaghi Koc*

*Cohort rule: Students enrolled in S700 and S711 must enrol in campus mode*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 2 hour class per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin, plus 5 x 1 hour online seminars per trimester.*

### Content

The building sector has significant potential for climate change adaptation and mitigation. This unit investigates contemporary building design in the context of its environmental responsibilities. Building design, building structure, envelope, services, fit-out and environmental technology as well as the impact of building occupants are evaluated holistically with regard to climatic suitability, resource usage and occupant comfort.

### Assessment

- Poster presentation 40%
- Environmental assessment report 60%

## SRT757 – Building Systems and Environment

*Enrolment modes: Trimester 1: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Mark Luther*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class for 10 weeks, 1 x 2 hour seminar for 10 weeks.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

### Content

The unit examines thermal, visual and aural environmental principles. Students will be able to evaluate and ascertain the salient problems occurring in building environments with respect to acoustics, energy and lighting. They will engage in a series of case studies to examine thermal, visual and aural environmental theoretical principles and practical application. The unit will challenge students to recognise the appropriate selection of environmental system principle to enhance thermal, visual and aural comfort. Students will analyse building envelope materials and assemblies to respond to climatic conditions in order to reduce capital equipment, energy costs and CO2 emissions. Students will appraise various lighting concepts as well as colour classifications. The unit will introduce the application of day light modelling and lighting installation design with specific emphasis on integration control, computational methods and software for lighting design to enable students to make informed judgments in relation to their role as built environment professionals. Students will engage in discussion of aural environment and acoustic design of rooms in regards to reverberation times, background noise and speech intelligibility. They will be able to select suitable materials, understand noise problems and sound transmission through structures. Computational methods are introduced for evaluation and assessment of acoustical environments to support effective decision making to improve built environment performance.

### Assessment

- Acoustic task 35%
- Energy task (group) 30%
- Lighting task 35%

## SRV499 – Built Environment Integrated Research

*Enrolment modes:*

*Trimester 2: Waterfront (Geelong)*

*Trimester 3: Waterfront (Geelong)*

*Credit point(s): 1*

*Previously coded as: SRV599*

*EFTSL value: 0.125*

*Trimester 2 Unit Chair: John Kite*

*Trimester 3 Unit Chair: John Kite*

*Prerequisite: 3 level 3, 4 or 5 SR%-coded units*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week.*

## Content

SRV499 is the capstone unit for the Bachelor of Construction Management (Honours). In this unit students will apply research skills to integrate the knowledge and skills required of a construction management graduate. In SRV499, students will be required to undertake analysis and evaluation of a range of aspects of an authentic, large-scale complex building project. They will be required to apply knowledge of the discipline and research alternative technologies, materials, processes and methodologies for use and recommend solutions aimed at adding value to a design and construction project.

## Assessment

- Research report and poster 20%
- Innovation research paper 30%
- Group design – build tender proposal and tender presentation 50%

## SRV799 – Built Environment Integrated Project

*Enrolment modes:*

*Trimester 1: Waterfront (Geelong), Cloud (online)*

*Trimester 3: Waterfront (Geelong), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Igor Martek*

*Trimester 3 Unit Chair: Igor Martek*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 1 x 1 hour class per week, 1 x 2 hour seminar per week.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin plus 5 x 1 hour online seminars.*

## Content

SRV799 integrates knowledge and skills developed during the course of study through the adaptation of the design of a complex architectural project within the context of international practice. Learning and assessment activities in the unit will build on the concept of urban ecologies and sustainable urban development as students synthesise social, cultural, environmental information and economic objectives within a design management process. Students will draw on the theory and practice in the field of design management from the perspective of the architecture and construction disciplines. Students will

use design collaboration methodologies and processes to create strategic and functional briefs that achieve client requirements informed by debate, discourse and critical thinking. Learning through case study approach will aid students to develop skills and knowledge, and the ability to integrate processes for application in project evaluation and strategic decision-making within the context of a multidisciplinary environment.

## Assessment

- Group video project progress presentation and accompanying report 25%
- Group video project progress presentation and accompanying report 25%
- Individual video project final presentation and accompanying report 50%

## SSC700 – Academic Writing and Communication

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Jane Allardyce*

*Trimester 2 Unit Chair: Jane Allardyce*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: SSC900*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

This unit will focus on the development of high level written and communication skills that are integral to the research process. Students will gain an understanding of the essential elements of academic and scientific writing, including clarity, precision and the use of discipline-specific structure and style. Effective writing and editing strategies will be examined and applied, including planning, drafting, editing and proofreading. Students will develop and implement skills in critical analysis of the relevant literature and will have the opportunity to be guided through the process of writing and refining a completed draft of a piece of writing relevant to their research.

## Assessment

- Writing exercises (4 x 10%) 40%
- Self-assessment journal 10%
- Written report 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 50% in the written report.

## SSC900 – Academic Writing and Communication

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Credit point(s): 0*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Jane Allardyce*

*Trimester 2 Unit Chair: Jane Allardyce*

*Prerequisite: Nil*

*Corequisite: Must be enrolled in a Higher Degree by Research Program*

*Incompatible with: Nil*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

This unit will focus on the development of high level written and communication skills that are integral to the research process. Students will gain an understanding of the essential elements of academic and scientific writing, including clarity, precision and the use of discipline-specific structure and style. Effective writing and editing strategies will be examined and applied, including planning, drafting, editing and proofreading. Students will be encouraged to begin writing early in their candidature through a series of writing exercises. They will develop and implement skills in critical analysis of the relevant literature and will have the opportunity to be guided through the process of writing and refining a completed draft of their literature review for the confirmation of candidature document.

This unit is a zero credit point unit and will be assessed as pass/fail. Satisfactory completion of all assessment tasks is required.

## Assessment

- Writing exercises (4 x 10%) 40%
- Self-assessment journal 10%
- Literature review 50%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve an overall mark of at least 50% in the literature review.

## SSC940 – Climate Change Adaptation and Mitigation

*Enrolment modes: Trimester 1: Burwood (Melbourne), Cloud (online)*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Trimester 1 Unit Chair: Robert Faggian*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: 3 face-to-face contact hours per week (2 x 1 hour class and 1 x 1 hour seminar) and 3 hours per week of problem-based exercises and/or reading.*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin.*

## Content

This unit will provide a broad introduction to climate change, climate change adaptation and mitigation from a scientific, societal and policy perspective. It will then focus on climate change in the context of regions and their natural resource base, including an exploration of linked issues such as sustainable food production, integrated water management (residential-industrial-environmental), land-use decision-making and common law liability, amongst others.

The unit will develop the knowledge and understanding required by professionals involved in natural resource management (including agriculture and food production, forest and resource management), spatial and economic planning, policy development, or anyone with an interest in climate change, to develop appropriate regional and local responses to the risks and opportunities posed by a changing climate.

Some of the topics covered include: climate science (global climate modeling, regional downscaling of projections, uncertainty); climate policy (including mitigation, decision-making, risk frameworks, uncertainty, no-regret policies); systems science (regional systems, resilience theory, adaptive capacity).

## Assessment

- 2 Assignments (30% each) 60%
- Examination 40%

## STP010 – Introduction to Work Placements

*Enrolment modes:*

*Trimester 1: Cloud (online) (Intensive)\**

*Trimester 2: Cloud (online) (Intensive)\**

*Trimester 3: Cloud (online) (Intensive)\**

*Credit point(s): 0*

*Previously coded as: STP710*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Adam Cardilini*

*Trimester 2 Unit Chair: Karen Hermon*

*Trimester 3 Unit Chair: Karen Hermon*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: STP710*

*Scheduled learning activities – cloud (online): (Intensive):*

*Learning experiences are via CloudDeakin (Between 4 and 6 hours).*

*\* Please note that this unit runs in the first six (6) weeks of each trimester.*

### Content

This zero credit point unit requires students to undertake and pass the introductory unit online prior to enrolling in a Faculty of Science, Engineering and Built Environment Professional Practice unit, Internship unit, Work Integrated Learning (WIL) project and or Industry Based Learning (IBL) unit.

### Assessment

This unit is assessed on a pass/fail basis.

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must complete the 3 assignments (baseline resume, capacity building plan and a 'Me in a Minute' script) and achieve a minimum mark of 70% in the online quiz. Three attempts to pass the quiz are permitted.

## STP050 – Academic Integrity

*Enrolment modes:*

*Trimester 1: Cloud (online)*

*Trimester 2: Cloud (online)*

*Trimester 3: Cloud (online)*

*Credit point(s): 0*

*Previously coded as: AAI018, MAI010, HAI010*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Anneke Veenstra*

*Trimester 2 Unit Chair: Anneke Veenstra*

*Trimester 3 Unit Chair: Anneke Veenstra*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: AAI018, MAI010, HAI010*

*Scheduled learning activities – cloud (online): Learning experiences are via CloudDeakin (approximately 3 hours). No compulsory campus attendance requirement.*

### Content

STP050 is a compulsory zero credit point unit in all courses in the Faculty of Science, Engineering and Built Environment. The unit learning and assessment activities provides students with guidance on what constitutes academic integrity. It will allow students to develop knowledge, skills and good practice principles to avoid plagiarism and collusion and thereby maintain academic integrity.

### Assessment

Multiple-choice test 100%.

### Hurdle requirement

To be eligible to obtain a pass in this unit, students must achieve a minimum mark of 85%. Students are allowed unlimited attempts of the on-line assessment.

# STP301 – Industry Based Learning

*Enrolment modes: Start Anytime*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Karen Young*

*Prerequisite: STP010 and Must have completed at least 12 credit points of study with a minimum average of 65%*

*Corequisite: Nil*

*Incompatible with: Nil*

*Scheduled learning activities – campus: Placement (Work Integrated Learning): This unit requires students to complete a placement (minimum of 6 weeks and a maximum of 12 weeks) with an approved organisation. In addition, students are required to complete the online Pre-placement Employability Modules.*

## Content

The purpose of the Work Integrated Learning (WIL) long-term 6–12 week full time paid placement unit is to provide students with an opportunity to work as a professional in their field by getting the ‘job done’ for an employer. The focus is on applying course knowledge and skills and to evidence development against Deakin’s Graduate Learning Outcomes in preparation for the next stage of their careers.

Approved placements must involve authentic tasks, the sum of parts of projects and other duties, and must be undertaken in a workplace so as to experience working within organisational cultures. Students must be mentored by an industry expert in their field of study so they can use their placement as context for integrating the material/concepts/skills and knowledge covered in the course, providing showcases of how the course learning outcomes and their experiences fit together to equip them for their next stage (either the final units of study or the workforce).

*Note: Students must contact their enrolment officer prior to enrolling in this unit in order to meet the selection requirements.*

*Note also that delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

## Assessment

- Goals 20%, work logs (4 x 5%) 20%
- Placement outcomes presentation 20%
- Placement evaluation 20%
- Employability skills reflection 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must demonstrate that they are working to the satisfaction of the host organisation (including skill competency levels, professional code of conduct and project output requirements) at both the mid and end of placement phases.

# STP341 – Career Placement

*Enrolment modes: Start Anytime*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Karen Hermon*

*Prerequisite: STP010 and successful completion of 6 units prior to the commencement of the placement.*

*Corequisite: Nil*

*Incompatible with: STP251 and STP351*

*Scheduled learning activities – campus: Placement (Work Integrated Learning): This unit requires students to complete a minimum of 112 hours – a maximum of 160 hours of placement. The work hours are to be undertaken over a minimum of a 4 week period (on average 28–40 hours per week) to a maximum of a 16 week period (on average 10 hours per week). In addition, students are required to complete the online Pre-placement Employability Modules.*

## Content

The purpose of this Work Integrated Learning (WIL) short term 112–160 hour placement unit is to provide students with an opportunity to work with others in an organisation to build work ready professional capabilities. The focus is on enhancing broad employability skills without a need to apply discipline/course-specific knowledge and skills. Approved placements must involve the sum of parts of projects and other duties, and must be undertaken in a workplace so as to experience working within organisational cultures.

Students must use their placement as context for integrating career development learning with their potential work ready skills, providing showcases of how their placement experience has provided an applied form of learning for preparing them for the next stage of study and the workforce.

This unit is designed for students who are not currently employed have an opportunity to develop their generic work ready and pre-graduation early professional skills via a non-course/discipline specific placement.

*Note: Students must contact their enrolment officer prior to enrolling in this unit in order to meet the selection requirements.*

*Note also that delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

## Assessment

- Goals 15%
- Work logs (4 x 5%) 20%
- Placement outcomes presentation 20%
- Placement evaluation 20%
- Employability skills reflection 25%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must demonstrate that they are working to the satisfaction of the host organisation (including skill competency levels, professional code of conduct and project output requirements) at both the mid and end of placement phases.

# STP381 – STEM Placement

*Offering information: Not available from April 2019*

*Enrolment modes: Start Anytime*

*Credit point(s): 1*

*EFTSL value: 0.125*

*Unit chair: Adam Cardilini*

*Prerequisite: STP010 and successful completion of 8 units prior to the commencement of the placement.*

*Corequisite: Nil*

*Incompatible with: STP251 and STP351*

*Scheduled learning activities – campus: Placement (Work Integrated Learning): This unit requires students to complete a 152–160 hour internship – minimum of a 5 week period (on average 30–32 hours per week) and a maximum of an 11 week period (14–15 hours per week). In addition, students are required to complete the online Pre-placement Employability Modules.*

## Content

The purpose of this Work Integrated Learning (WIL) short term 152–160 hour placement unit is to provide students with an opportunity to integrate discipline/ course-specific knowledge and skills in real world settings. The focus is on enhancing the re-shaping of course knowledge and skills by applying to a defined set of industry/profession-relevant employability skills.

Approved placements must involve authentic tasks, the sum of parts of projects and other duties, and must be undertaken in a workplace so as to experience working within organisational cultures. Students must be mentored by an industry expert in their field of study so they can use their placement as context for integrating the material/concepts/skills and knowledge covered in the course and providing showcases of how their placement has equipped them for their next stage of study and the workforce.

*Note: Students must contact their enrolment officer prior to enrolling in this unit in order to meet the selection requirements.*

*Note also that delays in completing the placement could mean that the course will take longer to complete than the stated duration. Attendance at the placement may be required outside the trimester dates.*

## Assessment

- Goals 20%, logs (4 x 5%) 20%
- Placement presentation 20%
- Placement evaluation 20%
- Reflection 20%

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must demonstrate that they are working to the satisfaction of the host organisation (including skill competency levels, professional code of conduct and project output requirements) at both the mid and end of placement phases.

# STP710 – Introduction to Work Placements

*Enrolment modes:*

*Trimester 1: Cloud (online) (Intensive)\**

*Trimester 2: Cloud (online) (Intensive)\**

*Trimester 3: Cloud (online) (Intensive)\**

*Credit point(s): 0*

*Previously coded as: STP010*

*EFTSL value: 0.000*

*Trimester 1 Unit Chair: Adam Cardilini*

*Trimester 2 Unit Chair: Karen Hermon*

*Trimester 3 Unit Chair: Karen Hermon*

*Prerequisite: Nil*

*Corequisite: Nil*

*Incompatible with: STP010*

*Scheduled learning activities – cloud (online): (Intensive):*

*Learning experiences are via CloudDeakin (Between 4 and 6 hours).*

*\* Please note that this unit runs in the first six (6) weeks of each trimester.*

## Content

This zero credit point unit requires students to undertake and pass the introductory unit online prior to enrolling in a Faculty of Science, Engineering and Built Environment postgraduate Professional Practice unit, Internship unit, Work Integrated Learning (WIL) project and or Industry Based Learning (IBL) unit.

## Assessment

This unit is assessed on a pass/fail basis.

## Hurdle requirement

To be eligible to obtain a pass in this unit, students must complete the 3 assignments (baseline resume, capacity building plan and a 'Me in a Minute' script) and achieve a minimum mark of 70% in the online quiz. Three attempts to pass the quiz are permitted.
