

ManuFutures Connect

Unlock
manufacturing
success

A unique product engineering service offered via the expert business incubation team at Deakin University's ManuFutures and external industry mentors.

Designed to help small to medium-sized manufacturers maximise their competitiveness and create new global market opportunities.

ManuFutures Connect provides a doorway to Deakin University's advanced equipment, and includes bespoke mentoring programs connecting multidisciplinary business, law and technology expertise.

ManuFutures Connect offers access to tenancies in the world-class and brand new ManuFutures facility in the Geelong Future Economy Precinct. Participants work beside leading advanced manufacturers with access to research, business mentors, university students and graduates.

With a unique proven track record of incubating high growth start-ups to become successful multi-million-dollar organisations, ManuFutures Connect helps design and implement advanced manufacturing capability to improve current production competitiveness.
