

# ManuFutures Accelerate

Accelerating  
manufacturing  
SUCCESS

A three-stage training and mentoring pathway offered via the ManuFutures expert business incubation team.

Supporting small teams of hand-picked entrepreneurs with great ideas and limited manufacturing experience, on a journey from ideas, to proof-of-concept, to commercial production to new ventures.

The only facility of this type in Australia, ManuFutures Accelerate provides a doorway to Deakin University's advanced capabilities and equipment, as well as multidisciplinary business, law and technology expertise.

Located within Geelong's Future Economy Precinct, participants work beside leading advanced manufacturers with access to research, business mentors, university students and graduates.

## The Accelerate progressive pathway:

- ▶ **ManuFutures Ignite** – A free 12-week workshop and mentoring program to rapidly mature business strategy and ideas.
- ▶ **ManuFutures Bootcamp** – 6 month mentoring program to further develop strategy, manufacturing testing and design and integrated business planning. Includes a \$50,000 voucher contribution from the Victorian Government.
- ▶ **ManuFutures Scale Up** – Virtual or real-life tenancy at ManuFutures, working beside leading advanced manufacturers with access to research, business mentors, university students and graduates to build commercialisation success.

**Numbers are limited:**
