Join the fastest-growing industry in Australia

Make a genuine difference to people’s quality of life by pursuing a career in health. Our health courses open the door to a range of job opportunities across the hospital, private practice, corporate and government sectors. Learn from teachers with strong industry links and gain a worldwide education by interning, volunteering and studying abroad during your degree.

Your future in health

Gain real-world experience in health
Our courses offer extensive placement opportunities, so you can gain valuable skills and experience under the supervision of qualified practitioners. For example, our social work degree incorporates over 1000 hours of practical fieldwork experience in settings including:
- schools
- hospitals
- clinics
- community health organisations
- industry.

Occupational therapy students experience extensive practicum placements beginning in year one. Our course is the only one of its kind in Victoria to provide extra placement hours over the minimum standard.

Rural and regional experiences
Get a broader perspective through a rural and regional focus to your course, helping to address the significant medical workforce shortage throughout rural, regional and outer metropolitan areas. Your rural and regional placements can complement knowledge and skills gained from metropolitan settings.

Broaden your understanding of other areas in health
Our multidisciplinary approach means that students in one area, like occupational therapy, have the chance to work with medicine, nursing, social work and dietetics students too. This experience of working in multidisciplinary teams will help you develop an understanding of the expertise and roles of different health professionals.

Study with the best
Deakin University’s School of Exercise and Nutrition Sciences has cemented its position as Australia’s best sport science school, coming in at number one for the third year running.

1 Shanghairankings’ Global Ranking of Sport Science Schools and Departments 2016–2018.

#1 university for skills development
Gain a competitive edge in the workplace with real-world expertise and practical skills. Deakin’s ranked the #1 university for skills development in Victoria, which means you’ll graduate highly skilled, work-ready and in demand from employers.

Your future in health

Our research is improving health and wellbeing
Research at Deakin is making a difference across the health spectrum in areas like:
- medicine
- ageing and chronic illness
- physical activity
- infant and child health
- nutrition
- disability
- social and mental health.

Our research feeds directly into the development of our undergraduate and postgraduate courses, which means that you’ll graduate with knowledge from the cutting edge of science. Here’s what our research currently focuses on:
- Deakin is a key partner in the Geelong Centre for Emerging Infectious Diseases, Australia’s first ‘One Health’ facility, which is taking a new, multidisciplinary approach to managing infectious diseases in people, animals and the environment.
- The Centre for Population Health Research (CPHR) contributes to health improvements for Australian and global populations through its research in disease prevention and control, disparities in health equity of healthcare delivery.
- For more research stories, visit deakin.edu.au/research.

Access our growing health precinct
The medical precinct at the Geelong Waurn Ponds Campus has had a significant boost with Epworth HealthCare’s 250-bed private hospital being built within walking distance of the campus. These facilities enhance your learning experience by offering a supportive environment for supervised clinical placements.

Get hands-on in industry-leading facilities
Experience our state-of-the-art facilities, modelled on those used in industry. For example, optometry students can use cutting-edge teaching facilities within the purpose-built Regional Community Health Hub (REACH), and medical imaging students can access our new medical imaging training unit, where they learn X-ray techniques, as well as complex medical imaging procedures.

Courses to careers
Visit explore.deakin.edu.au to kickstart your course and career exploration. With more than 600 paired courses and careers, it’s the perfect destination for you to discover your future career.

Disciplines

Environmental health
A branch of public health, this area of study focuses on all aspects of the natural and built environment that impact human health. It’s ideal if you’re passionate about healthy environments and healthy people, or if you wish to work in local health policy.

Food studies
Gain extensive food knowledge, from the science of food composition to community issues, such as genetically modified foods and food law. Pursue a range of careers, including in the food industry, health services, business and mass media.

Health promotion
Help to make it easier for individuals and communities to make healthier choices. Health promotion is a perfect fit if you’re a big-picture thinker and want to work in health policy, or prefer smaller-scale ideas and projects like health education and community engagement.

Health sciences
If you’re looking to discover your passion in the health and community sector, a course in health sciences lets you create a qualification that suits your unique career aspirations. Become a specialist in the health sector by hand-picking study areas that you’re passionate about.

Medical imaging
Our highly specialised course in this field lets you work as a registered diagnostic radiographer in Australia or overseas. Otherwise known as medical diagnostic radiography, medical imaging is the technique of creating visual representations of the internal organs of the body for clinical analysis and medical intervention.

Nutrition science
Gain an understanding of the nature of food, including its impact on health and the role of nutrition in disease prevention. Learn about human nutrition and the complexity of current issues relating to food and human health, as well as the nutrition and health implications of food composition and processing.

Occupational therapy
Pursue a career with a direct impact on people, by helping them to lead healthy and meaningful lives. We’ll equip you with the specialised knowledge to improve your clients’ lives – at home, at work and in the community.

Optometry
Get trained to care for others by managing the health and function of the eyes and visual system, and diagnosing and managing a range of ocular conditions.

Public health
Understand and act on the factors that cause poor health, and those that create and sustain good health. This field relies on diverse approaches, including community engagement, policy development, research, education and the media to address the causes of poor health within populations.

Social work
A diverse profession, social work focuses on human rights and social justice. You’ll work with individuals, families and communities – improving wellbeing, addressing inequality and enriching lives.

Sports nutrition
Help elite athletes get the most out of their bodies and performances through food and nutrition. Sports nutrition covers the specific macronutrient needs of athletes and provides practical nutrition considerations for before, during and after sports performance.

Your dream course starts here. Take a look through our disciplines (also known as study areas) to choose your area of expertise. Knowing which discipline you’re interested in helps career advisers find the best course for your interests. Corresponding courses are featured in the following pages, so you can learn more about what you’ll study, work experience opportunities and the types of careers you could pursue. When you choose a course, you can then pick which discipline to specialise in within that course. Visit deakin.edu.au for detailed discipline and course information, including a description of the units within each degree.

### Bachelor of Health Sciences

A rewarding career in a health-related field gives you the chance to reduce health disparity and to help people — whether in Australia or overseas — to lead fuller, healthier and happier lives.

As a Bachelor of Health Sciences graduate, you can be confident that you’ll get a solid grounding in multiple fields of health sciences, and be prepared for a successful career in the fastest growing employment sector in Australia.

### Careers

This flexible degree allows you to combine study areas that you’re passionate about, and benefit from workplace learning to become a specialist in the booming health sector. Depending on your majors, your health sciences degree can prepare you for work in the following roles and fields:

- case manager
- disability inclusion worker
- family/community/refugee/project officer
- environmental and sustainability officer
- policy advisor
- exercise specialist
- food and nutrition policy developer
- food scientist
- health educator or counsellor
- health and sports marketer or PR officer
- health policy development
- health promotion and communication officer
- international aid worker
- lifestyle and wellness professional
- medical biotechnology researcher
- nutrition and health promotion coordinator
- regional health service planner.

The health and human services sector is one of the largest and fastest growing industries in Australia and the world. With ageing populations and public health issues, such as obesity and chronic illness on the rise, and with governments around the world increasing emphasis on disease prevention, as well as treatment, employability in the sector is strong and continually increasing.

In Australia, the health and human services sector is projected to make the largest contribution to employment growth, increasing by 16.1% over the five years to May 2022.1

This major prepares you for further training towards becoming a registered psychologist. To practise as a psychologist, you must complete an undergraduate degree with a major in psychology followed by a fourth year of study in psychology, which is accredited by the Australian Psychology Accreditation Council (APAC).

### Work experience

Enhance your employment prospects and consolidate your knowledge and skills through an industry placement or volunteer unit. Depending on the majors and elective units you choose to study, this option may be available in your second or third year.

### Majors

**Disability and inclusion (C)**

Understand the importance of social inclusion, and apply your disability knowledge in a variety of occupations, by supporting people with disabilities to live the life of their choice and removing barriers to inclusion that exist in services and community.

**Environmental health (C)**

If you’re interested in working in public health policy, environmental health or related areas, this major is a great choice, focusing on healthy environments and healthy people.

**Exercise science (C)**

Understand the core sciences underpinning competitive sport and recreational physical activity. A variety of learning approaches is adopted, letting you integrate your sporting interests with your studies.

**Family, society and health (B)**

Explore the issues facing households and families, such as the link between healthy human development and healthy households, economic wellbeing and health, and the need for supportive environments.

**Food studies (C)**

Understand everything about food, from the science of food composition to community issues such as genetically modified foods and food law. You can pursue a career in settings including the food industry, health services, business and mass media.

**Health and sustainability (C)**

The health of the environment and the health of populations is inextricably linked. Learn about making a healthy environment, planning for and creating a sustainable future and developing resilient communities. Explore the scientific, social and cultural factors that are all components of environmental sustainability, on international, national and local scales.

**Health promotion (C)**

Develop a sound knowledge of the causes of health and illness and effective strategies for prevention of the latter, as well as practical skills in health education and communication, health planning and health management.

**Medical biotechnology (C)**

Medical biotechnology uses cells and cell materials to produce pharmaceutical and diagnostic products that help treat and prevent human diseases. This major gives you an understanding of the core sciences underpinning biotechnology for medical advancement.

**Nutrition (C)**

Learn about food and how it works in different bodies. By taking a nutrition major, you’ll gain knowledge of the biological basis of human nutrition and the relationship between diet, health and disease.

**Physical activity and health (C)**

Understand how behaviour influences health, with an emphasis on the relationship between physical activity and health across the lifespan. Explore the evidence of the independent roles physical activity and sedentary behaviour play in the prevention of chronic disease.

**Psychological science (C)**

This major prepares you for work in allied health areas such as community work, coaching and counselling individuals and groups, as well as health and human services consulting.

**Psychology for professional development (C)**

This major prepares you to work in allied health areas such as community work, coaching and counselling individuals and groups, as well as health and human services consulting.

---

1. Cloud Campus and Warrnambool Campus are not available to international students.
2. Trimester 3 is available at Melbourne Burwood Campus and Geelong Waurn Ponds Campus only. For international students, Melbourne Burwood Campus only.
4. This course structure should be used as a guide only and advice should be sought when selecting units.
5. Cloud Campus students will be required to attend some campus based activities.

Bachelor of Medical Imaging

This Bachelor of Medical Imaging has been developed to equip you with the latest knowledge in medical radiation science, and train you in techniques like ultrasound, magnetic resonance imaging (MRI) and computed tomography (CT). You’ll learn in our state-of-the-art facilities and take part in clinical placements in metro, rural and regional settings to ensure you graduate career-ready. This course will allow you to work as a registered diagnostic radiographer anywhere in Australia, New Zealand, the UK and Canada.

Medical Imaging Regional and Remote Entry Scheme

Workforce shortages in medical imaging exist in regional and remote areas of Australia. Deakin’s School of Medicine has addressed these shortages by introducing a Regional and Remote Entry Scheme, to attract more regional and rural students into the course. The Regional and Remote Entry Scheme has a separate VTAC code and eligible applicants may receive up to 10 bonus aggregate points towards their entry score for admission. deakin.edu.au/health/regional-and-remote-entry-scheme

Professional recognition

This course is designed to meet the requirements of the Australian Health Practitioners Regulation Agency (AHPPA). Deakin’s Bachelor of Medical Imaging has been awarded accreditation with conditions by AHPPA, with statutory direction provided by the Medial Radiation Practice Board of Australia (MRPBA).

Careers

Upon graduation, you’ll be prepared to pursue a career as a diagnostic radiographer. You could find yourself working in a radiology department in a hospital, private radiology practice or health department. As a graduate, you’ll be eligible to work as a skilled practitioner across the broad range of diagnostic medical imaging, including:

- general radiography
- CT
- fluoroscopy
- MRI.

Having an AHPPA/MRPBA Statement of Accreditation enables registered graduates to work in a range of settings, such as:

- small regional clinics
- large metropolitan imaging departments
- hospitals and specialist medical facilities in Australia, New Zealand, the UK and Canada.

Medical Imaging Practice 1

This course will allow you to work as a registered diagnostic radiographer anywhere in Australia, New Zealand, the UK and Canada.

Year 3

- Principles of Advanced Modality Imaging 2
- Medical Imaging Practice 6

Year 4

- Medical Imaging Practice 8

Bachelor of Nutrition Science

Study a Bachelor of Nutrition Science and develop an understanding of human nutrition and its impact on our population. Learn how to tackle challenges facing our society including disease prevention, lifestyle nutrition, obesity, the spread of misinformation, and the social and physiological effects of food on our wellbeing.

Professional recognition

Graduate with a Bachelor of Nutrition Science and you may be eligible for membership of the Nutrition Society of Australia (NSA). Registration will ensure you are recognised as a qualified nutrition professional in the field. Additionally, if you have completed this degree with a major in food innovation, you may also seek membership into the Australian Institute of Food, Science and Technology (AIFST).

Work experience

Students completing the food innovation major will be prepared for careers requiring knowledge of consumer behaviour, sensory analysis, product development, food quality and safety, as well as food manufacturing.

Pathways to dietetics

For those hoping to continue on to further study in dietetics, 60% of places available in Deakin’s Master of Dietetics are allocated to Deakin graduates.
Bachelor of Occupational Therapy

Through the Bachelor of Occupational Therapy, you’ll receive a cutting-edge and practical education that provides you with over 1000 hours of real-world experience. This course will prepare you to improve people’s quality of life, and to educate them on how best to transition back into the occupations that are meaningful to them. We’ll give you the expertise to provide personalised strategies to work collaboratively with people who have a range of health limitations, including those caused by injury, health conditions, delayed development or the effects of ageing. Take the next step towards a rewarding career helping people from all walks of life.

Professional recognition

The Bachelor of Occupational Therapy is accredited by the Occupational Therapy Council (Australia and New Zealand Ltd) and the World Federation of Occupational Therapists, which means you’ll be able to practise professionally in Australia and overseas.

Careers

Occupational therapy has experienced one of the strongest growth rates in the health industry over the past 10 years, with available jobs increasing from 8100 in 2007 to 16,700 in 2017.1

Through this course, you could find employment in areas as diverse as:

- acute, psychiatric or rehabilitation hospitals
- community health organisations
- government departments or agencies
- mental health services
- private practices
- research institutes
- primary and secondary schools
- workplace wellbeing, occupational health and safety, and rehabilitation services.

Our graduates have found employment with the following organisations, as well as many more:

- Alfred Health
- Barwon Health
- Bellarine Community Health
- Department of Education
- Karingal
- private occupational therapy practices
- primary and secondary schools
- Western District Health.

Work experience

You undertake a minimum of 1000 hours of practicum placements throughout the four years of this course, starting in year one. Placements are conducted in a range of settings, including schools, hospitals, clinics, community health organisations and industry.

Work placement requirements

In accordance with Department of Human Services policy2 all students are required to obtain a National Police Record Check each year before undertaking field placements, and a Working with Children Check3 at the start of their course.

Course structure

This course structure should be used as a guide only and advice should be sought when selecting units.

Practical placements gave us the opportunity to go out into our prospective work fields and put our theories into practice. These valuable experiences enabled me to build networks with future practitioners and develop the confidence to leave university and find a job: I now work as a Paediatric Occupational Therapist.’

Sophie Schultz

Bachelor of Occupational Therapy graduate
Ranked in the top 100 worldwide

Public Health at Deakin has been ranked in the top 100 in one of the world’s most prestigious international ranking systems.¹

¹ Shanghai Ranking’s Global Ranking of Academic Subjects 2018

Bachelor of Public Health and Health Promotion

Make a difference to people’s lives on a broad scale with a Bachelor of Public Health and Health Promotion. You’ll learn how to tackle minor and major health issues and boost the wellbeing of individuals, communities and populations. Combined approaches involving community engagement, policy development, research, education and the media will give you the expertise needed to address the causes of poor health and boost wellbeing throughout society.

Professional recognition

Graduates from the Bachelor of Public Health and Health Promotion may be eligible to become members of the Public Health Association of Australia (PHAA) and obtain professional accreditation as Health Promotion Practitioners with the Australian Health Promotion Association (AHPA).

CAREERS

Job growth in the health sector continues to increase as public health issues – such as obesity, heart disease, diabetes, food access, sedentary lifestyles and ageing populations – affect healthcare systems globally. These are just some examples, and with many other public health issues becoming more prevalent, you can mould your career around those that match your interests and passions in the health field. Throughout your degree, we frequently discuss different case studies to help spark ideas for your unique career pathway.

Career opportunities in government and private sector roles across Australia and internationally include:

- community development coordinator
- health policy developer
- health promotion officer
- health researcher
- program development coordinator
- program evaluator
- social planning officer
- women’s health officer.

You may find employment in a range of health areas including:

- tackling chronic illness (such as asthma, arthritis and heart disease), plus developing and implementing prevention strategies
- healthy eating
- mental health
- physical activity and environmental health
- social inclusion
- women’s health.

Work experience

Work integrated learning is a core feature of this course, and is embedded within all units, including assignments that replicate work in the field. Another key feature of this course is the capstone experience – a 120-hour field education placement that gives you an opportunity to transfer your knowledge and skills to a practical setting, where you can further your learning through realistic field experience. These placements help you to consolidate your skills under the supervision of qualified practitioners, so you can be work-ready after graduation.

Bachelor of Social Work

The Bachelor of Social Work equips you with the knowledge and skills to enhance the wellbeing of others through an understanding of policy, socioeconomic factors and social justice issues. If you’re passionate about human rights and have a strong sense of social justice, this is the perfect course to begin your journey towards a rewarding career in social work.

CAREERS

Social work is part of a growing human services field, with graduates working across local, state and federal government departments, in private and non-government human services organisations, and in various advocacy, policy making and tribal capacities.

After completing this course, you’ll be a sought-after graduate, ready to pursue a rewarding career in social work. You may work in many general and specialist areas of social work such as:

- activism
- advocacy
- community development
- consultancy
- counselling
- drug and alcohol counselling
- education
- facilitation
- family therapy
- health
- housing
- policy development and research
- program management and coordination
- refugee assistance and tribal capacities
- assisting groups such as the aged, women, youth or multicultural populations.

Examples of specific roles you may pursue include:

- careers counsellor
- case manager
- child and family counsellor
- child protection officer
- community development access officer
- community development and education officer
- disability support coordinator
- diversity officer
- drug and alcohol case manager
- family relationship adviser
- mental health coordinator
- school counsellor
- youth projects officer.

Work experience

Field education placements give you the experience of learning under the supervision of qualified social work practitioners. During the course there is a minimum of 1000 hours of fieldwork placements conducted in a variety of communities and workplaces in metropolitan and regional settings. As social work at Deakin has a rural focus, one of the two fieldwork placements will have a rural focus.

If you choose to study at the Cloud Campus you must attend 20 days at the Geelong Waterfront Campus, engaging in intensives and workshops to complete your degree. For a full-time student of the Bachelor of Social Work this will generally mean five (consecutive) days per year.

Work placement requirements

In accordance with Department of Human Services policy, all students are required to obtain a National Police Record Check each year before undertaking field placements. Students may also be required to obtain a Working with Children Check.

Course structure

Trimester 1

Year 1

Introduction to Aboriginal Studies
Understanding Health
Introduction to Social Work: Social Work Theory and Practice A

Year 2

Public Policy and Politics for Critical Social Workers
Social Work Research in Ethical and Political Contexts
Community Development: Social Work Theory and Practice D

Year 3

Social Work Field Education A

Trimester 2

Year 1

Introduction to Sociology B
Theories for Social Work Practice: Social Work Theory and Practice B
Health Behaviour OR Psychology A: Fundamentals of Human Behaviour

Year 2

Self and Society
Placement Readiness: Preparing for Supervised Social Work Practice

Year 3

Social Work Field Education B

Year 4

Critical Approaches to Social Work: Social Work Theory and Practice G
Administration and Policy Development: The Organisational Context
Working in Uncertainty: Social Work Theory and Practice H

Year 4 Honours

Social Work Research Methods
Critical Approaches to Social Work: Social Work Theory and Practice I
Social Work Honours Research Project A

Trimester 3

Social Work Field Education B
Research Focused

Social Work Honours Research Project B

1 I feel privileged to work at such a student-centred university, where staff are recognised for their teaching achievements, as well as their research achievements.

As a resident of outback Western Australia, I’ve experienced first-hand the lack of healthcare services available to people and communities living in remote areas and the negative implications this can have on health – physically and mentally. I chose optometry to give back to communities that are in need of eye care.

Sarah Mawdsley
Bachelor of Vision Science/ Master of Optometry student
Courses

Combined courses

Bachelor of Health Sciences / Bachelor of Arts

Build your foundation knowledge in nutrition science while understanding how business operates and guides Australia’s $20 billion food industry. With a Bachelor of Nutrition Science/Bachelor of Commerce, you’ll graduate with highly transferrable skills that allow you to understand and navigate the relationship between nutrition and business.

Bachelor of Health Sciences

The skills you’ll develop in the growing public health and health promotion area will qualify you to work in diverse areas, including:
- health education
- health and human services
- public health communication
- health policy development and implementation.

Your knowledge of the social and environmental factors that affect the health of individuals and populations will prepare you for a career in a range of clinical and community settings, such as:
- public health
- schools
- rehabilitation
- health education
- voluntary organisations
- patient support agencies
- working abroad.

Work experience
- You’ll develop skills in working abroad.
- You will be eligible to apply for registration as a registered nurse with public health and health promotion knowledge, you can pursue career opportunities around the world in a range of work settings, including:
  - hospitals
  - homes
  - hospices
  - aged care settings
  - clinics
  - schools
  - universities
  - community health centres
  - government agencies and private industries.

Clinical placement requirements
- In accordance with Department of Human Services policy, nursing students are required to undertake a National Police Record Check before work placements in each calendar year of their course. In accordance with the Working with Children Act 2005, all students are required to undertake a Working with Children Check at the start of their course. You will also be required to ensure your immunisations (vaccinations) are current and provide evidence to the School of Nursing and Midwifery before your clinical placement.

Course structure
- The Bachelor of Nursing/Bachelor of Public Health and Health Promotion consists of 28 units across four years of study. An honours year is available to eligible students, upon completion of this degree field.

1. Cloud Campus is not available to international students.
2. Available as a minor (6 credit point) unit sequence only.
3. Offered to Geelong Waurn Ponds Campus students by combination of online and campus-based learning.
4. A full major sequence in Chinese is not available at the Cloud Campus.

Professional recognition
- This qualification allows you to receive recognition from both nutrition and business professional bodies.
- Enrolled students and graduates may apply for membership of the Nutrition Society of Australia (NSA). Registration will ensure you’re recognised as a qualified nutrition professional in the field.
- Deakin’s Bachelor of Commerce is internationally recognised and EPAS accredited by the European Foundation for Management Development (EFMD). We are also the only Australian university with this accreditation, meaning you are graduating with a degree that is of a global standard.

Work experience
- The Faculty of Business and Law offers work integrated learning which covers business internships, community-based volunteering, industry-based learning and international study opportunities.
- Deakin.edu.au/buslaw/wil

Careers
- This combined course will give you a competitive edge when it comes to employment. You’ll not only have the understanding of how nutrition affects our population, but the business skills to critically analyse its relationship to commerce. Find yourself in roles including:
  - brand/product management
  - consumer education
  - consumer research
  - food and nutrition composition
  - food policy
  - food regulation
  - management
  - marketing and media
  - quality assurance
  - wholesale and retail.

Course structure
- 32 credit points = 16 credit points of nutrition science units and 16 credit points of commerce units, including a major in management, marketing, accounting, economics, finance, human resource management or management information systems.
- Deakin.edu.au/course/bachelor-nutrition-science-bachelor-commerce

Bachelor of Nursing/Bachelor of Public Health and Health Promotion

Gain a valuable qualification in nursing, along with a deep understanding of the contributors to population health and the skills needed to help people engage in healthier lifestyles. Deakin’s Bachelor of Nursing/Bachelor of Public Health and Health Promotion allows you to make a difference in health outcomes of individuals, communities and global populations.

Professional recognition
- On successful completion of your course, you’ll be eligible to apply for registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA). You may also be eligible to become a member of the Public Health Association of Australia (PHAA) and the Australian Health Promotion Association (AHPA).

Careers
- As a registered nurse with public health and health promotion knowledge, you can pursue career opportunities around the world in a range of work settings, including:
  - hospitals
  - homes
  - hospices
  - aged care settings
  - clinics
  - schools
  - universities
  - community health centres
  - government agencies and private industries.

The skills you’ll develop in the growing public health and health promotion area will qualify you to work in diverse areas, including:
- health education
- health and human services
- public health communication
- health policy development and implementation.

Your knowledge of the social and environmental factors that affect the health of individuals and populations will prepare you for a career in a range of clinical and community settings, such as:
- public health
- schools
- rehabilitation
- health education
- voluntary organisations
- patient support agencies
- working abroad.

Work experience
- From Trimester 1 of your first year of study, you’ll start clinical placements, developing clinical skills under the supervision of registered nurses – and working in multidisciplinary healthcare teams.

Courses

Combined courses

Bachelor of Public Health and Health Promotion/Bachelor of Commerce

Combines an education in health issues with a robust business foundation through the Bachelor of Public Health and Health Promotion/Bachelor of Commerce. You'll examine approaches to improve health systems and attitudes and gain practical skills through field-based programs.

Careers

As a graduate of this course, you'll be prepared for business, marketing and management roles within the health industry, as well as for health promotion and public health roles within the government, corporate, private and public sectors. Career opportunities include:

- allied health assistant
- cancer campaigner
- community health coordinator
- health educator
- health promotion officer
- health public relations officer
- health researcher
- medical marketing manager
- recreation officer

Work experience

A Public Health and Health Promotion Practicum unit offers an in-depth working understanding of public health and health promotion principles and approaches in the field. As part of the Bachelor of Commerce component of this course, the Faculty of Business and Law offers work integrated learning, which covers business internships, community-based volunteering, industry-based learning and international study opportunities.

deakin.edu.au/buslaw/wil

Bachelor of Exercise and Sport Science/Bachelor of Nutrition Science

This combined course gives you the opportunity to study two complementary fields and understand how the whole athlete works. Equip yourself with extensive knowledge of how an athlete’s body moves and works, as well as the fuel required to enable them to perform at their best. Discover wide-ranging career opportunities when you combine a drive for exercise and sports with a passion for food and nutrition.

Professional recognition

Current students are eligible to apply for student membership with the Nutrition Society of Australia (NSA), and apply as an ‘ordinary member’ upon graduating. Graduates are eligible to apply to become a Registered Associate Nutritionist with the:

- Nutrition Society of Australia
- Hong Kong Nutrition Association
- UK Association for Nutrition.

All graduates are eligible to apply for accreditation with Exercise and Sports Science Australia (ESSA) as an Accredited Exercise Scientist (AES).

Certificate III and Certificate IV in Fitness

As part of this course, you also have the opportunity to gain a Certificate III and Certificate IV in Fitness. This may be achieved after completing units aligned with the national fitness qualifications training package, in addition to some further study with an external registered training organisation. These additional qualifications will give you more options to take into employment.

Certificate III in Fitness allows you to work as an exercise instructor for group or gym programs, while the Certificate IV in Fitness enables you to work as a personal trainer.

Careers

As well as typical roles in the sport, exercise, coaching and fitness industries, you may pursue employment:

- sports administration
- facility management
- community health and wellness
- rehabilitation
- sport science.

Other employment opportunities include:

- elite, professional sporting clubs
- local and state government agencies
- professional sporting bodies
- local and community sporting clubs
- hospital and rehabilitation clinics
- fitness and aquatic centres
- private health and recreation centres
- large business organisations in corporate health.

You'll also be well prepared for a nutrition-focused career and can work in areas in the nutrition and food industry such as:

- food analysis
- food manufacturing
- food quality and safety
- food laboratories and research institutes
- food policy and regulation
- food wholesale and retail
- individual and population health
- nutrition research and education
- public health nutrition
- community nutrition
- consumer education and awareness campaigns
- nutrition and agribusiness
- product development
- sensory analysis.
