## Message from the Chancellor

On behalf of the Deakin University community, my warmest congratulations to you, your families and all who have supported you in realising this significant achievement.

Your Deakin qualification will be an asset as you explore the opportunities ahead. Your degree represents more than a credential – it reflects your capacity to think critically, adapt creatively and lead with purpose. It will empower you to pursue new opportunities with the confidence that you have the skills to make an impact, the readiness to succeed, and the resilience to navigate uncertainty.

As a graduate of Australia's largest university achieving balanced excellence across education and research, you have developed real-world skills through work-integrated learning and industry co-designed courses. Our researchers work on problems alongside those who need solutions – and this same approach means you leave Deakin ready to turn knowledge into action. We don't educate for the world as it is – we prepare you to serve the world as it will be, equipped to tackle what lies ahead and deliver change that matters.

Chancellor Mrs Claire Higgins

Your graduation marks the completion of your current academic journey and signals the start of a new phase of your life and career. Deakin is proud to have prepared graduates who will make meaningful contributions to the world. Your success is our success – the best measure of everything we do.

I encourage you to stay connected. Deakin's alumni community now exceeds 370,000 graduates worldwide who will be an invaluable resource as you embark on this next stage. You are part of our story, and we are immensely proud to be part of yours.

## Message from the Caretaker Vice-Chancellor

My sincere congratulations on your graduation from Deakin University.

Today, alongside family, friends and peers, we acknowledge your efforts, your sacrifices, and your success, and we welcome you to the Deakin alumni community. We should never underestimate the importance of a university journey, and the serious achievement of a student's graduation.

I hope you have enjoyed your time at Deakin, met and collaborated with talented and passionate people, made friends, were challenged, formed new perspectives and knowledge, and developed new skills.

A Deakin education is known for being innovative and inclusive and we want you to take these qualities into the world. The years ahead will require an open, flexible mind that can respond to change, find and create opportunities, and imagine new ways of doing things and solving problems.

We look forward to seeing where your Deakin degree takes you – the education we provide leads to lives of purpose. However, your learning did not begin with our University, and it does not end with your graduation.

Deakin Distinguished Professor,  
Matthew Clarke

I encourage you to be independent, lifelong learners, who contribute to regional, national and international communities. Indeed, Deakin's fundamental role is to deliver outcomes that benefit society. We do this by exploring and developing powerful ideas that create impact well beyond the boundaries of our institution. You, our graduates, are a big part of that future impact – you are the best measure of our success.

Congratulations to each of you and to your families. I wish you well, and I hope that one day, your career journey brings you back to Deakin as continuing students, as colleagues, as mentors, as supporters and as friends.

Matthew Clarke**

# The Graduation Ceremony

## 'Kim barne barre Wadawurrung Dja' Welcome to Wadawurrung Country

Deakin University would like to acknowledge the Wadawurrung People, the traditional custodians of the land and the Wathaurong community where this graduation ceremony is taking place. We pay our respects for their continued care of the land and further extend that respect to elders past and present.

## Order of Ceremony

Processional music heralds the arrival of the Academic Procession for the graduation ceremony.

At the commencement of this music, graduands and guests are asked to stand and remain standing for the National Anthem.

The Master of Ceremonies will open proceedings and the Chancellor (or representative) will deliver the opening address. The Vice-Chancellor (or representative) will then introduce the guest speaker who will deliver the occasional address.

The Chancellor (or representative) will then make a formal declaration conferring the awards of the University on the graduates, both present and *in absentia*, and will invite graduates to proceed to the stage according to the order published in the program.

A Faculty Executive Dean (or representative) will read out the names of graduates being presented to the Chancellor (or representative).

At the conclusion of the presentation of the graduates, a representative of the graduating students will deliver a brief response.

The Vice-Chancellor (or representative) will deliver the closing address. Following the closing address, there will be a musical performance.

At the conclusion of the ceremony guests are requested to stand while the stage party and graduates leave the hall.

Refreshments will then be served in the marquee in the John Hay Courtyard.

## The University Mace

Maces were originally medieval weapons carried by bodyguards to kings and sergeants-at-arms. Much later, the mace became of ceremonial rather than practical significance and organisations such as civic corporations and universities adopted the mace as a symbol of the rule of legal authority.

The University's mace is displayed at meetings of the University Council and on such ceremonial occasions as conferring ceremonies. The bearer of the mace, in academic processions, 'guards' the Chancellor. Deakin's mace was presented to the University by Mr Donald Thomson, Sir Wilfred Brookes and Mr Norman Stephen (Alcoa Australia).

# Academic Dress

Academic dress is an important reminder of the long history of universities in western civilisation. The three main elements of academic dress are the gown, the hood and the head-dress, which were all once articles of everyday outer dress. Both gowns and hoods, when in common use, were often lined and this lining was decorative, as well as practical. In medieval times, the higher the rank of the wearer, the more sumptuous the gown.

In universities there is still a difference in the apparel of scholars of various ranks reflecting the origins of the academic dress. Today's academic head-dress evolved from various hats and bonnets of earlier times. Deakin University's academic dress, like that of most Australian universities, derives from dress worn at the Universities of Oxford and Cambridge.

‘Understanding the Impact of Precipitate Distribution on the Portevin-Le Chatelier Effect in Aluminium-Magnesium Alloy Containing Scandium.’

This thesis examined how dispersoids size and spacing influence the Portevin-Le Chatelier effect in Aluminium Magnesium alloys. It demonstrated that controlled dispersoid distributions suppress strain localization, modify serration behaviour, and alter band propagation. The findings establish interparticle spacing as a key microstructural parameter for improving alloy strength, stability, and formability.

‘The Microstructure and Mechanical Properties of Rapidly Solidified Novel Biodegradable Zinc Alloys.’

This study investigated how combining various metals and using rapid cooling techniques affect the internal structure and strength of zinc alloys. This combination creates a refined material, with specific alloys containing copper, manganese, sodium, and yttrium showing excellent strength and flexibility. These findings support the development of medical devices that safely dissolve after assisting the healing process.

‘A Safe Sanctuary Microenvironment for Islet Transplants.’

This research developed and evaluated hydrogel biomaterials designed to support pancreatic islet transplantation for the treatment of type 1 diabetes. The findings showed that these hydrogels can recreate natural environmental cues that support insulin-secreting beta-cell survival and function, providing a promising platform for future regenerative medicine applications.

‘Depression and Cardiometabolic Diseases: Causal Association and Risk of Bias.’

This thesis examined the causality and the direction of association between depression and cardiometabolic diseases. Evidence from 21 Mendelian randomisation studies was pooled, and a tool was developed to assess risk of bias in these studies. The findings supported association from depression to cardiometabolic diseases, whereas the reverse association was less likely.

### Matthew Keisoglu

‘When Dogs Bark: An Enchained Memory of Destruction and Annihilation.’

This thesis explores how werewolf cinema can be used to depict the ongoing impact of the Armenian genocide and how creative practice conveys this trauma. It examines how sound, memory, and cinema lead to ‘When Dogs Bark’, a creative practice that employs the werewolf to represent genocide.

‘Neutrophil Function in Relation to Granulocyte-Colony Stimulating Factor Receptor Mutations in Zebrafish.’

This research examines neutrophil function in zebrafish embryos containing a granulocyte-colony stimulating factor receptor hyperactive mutation. Zebrafish embryos were infected with *E. coli* and infection kinetics were studied. The findings suggest that there is no difference in bacterial clearance however a neutrophil migration defect was apparent in the mutant. A transmembrane proximal mutant was attempted through genome editing techniques.

# NIKERI Institute

Deakin University is proud to have the largest number of Aboriginal and Torres Strait Islander students of any Victorian university.

The National Indigenous Knowledges Education Research and Innovation (NIKERI) Institute commenced in 1991 and offers programs that are structured around off-campus community-based delivery, supported by on-campus intensive study blocks and complemented by local tutors in their home communities.

This approach to course delivery promotes access and equity for Indigenous Australian students. Students from all areas of the country – rural, remote and metropolitan, and across all age ranges, particularly mature age – are able to undertake studies without compromising their family and community obligations.

In November 2019, the Institute won the prestigious Dreamtime Education Award for 'Education Institute of the Year'.
