Architecture, construction and property

Architecture
Construction management
Property and real estate

Acknowledgement of Country

Deakin University acknowledges the Traditional Custodians of all the unceded lands, skies and waterways on which Deakin students, staff and communities come together. As we learn and teach through virtually and physically constructed places across time, we pay our deep respect to the Ancestors and Elders of Wadawurrung Country, Eastern Maar Country and Wurundjeri Country, where our physical campuses are located. We also acknowledge the many First Nations from where students join us online and make vital contributions to our learning communities.

Artwork: *Learning Together, Growing Together* by Nathan Patterson.

Your future in architecture, construction and property

Gain work-ready skills

Study the built environment hands-on. From day one of your course, you will learn by doing, by making, by creating, by fixing and by taking things apart.

We aim to develop future professionals who think critically, solve problems with confidence and stay globally aware, while making an impact locally.

While studying, you'll experience practical learning in all aspects of the industry, including:

- design
- project management
- construction and building technology
- property markets and economics
- drawing, communication and BIM
- history and theory
- quantity surveying
- measurement and estimating.

Our architecture and construction management students work closely together, gaining a valuable understanding of both disciplines. These insights into each other's work are critical when our students graduate and begin to communicate, collaborate and work together in the fields of the building or built environment.

Join a booming industry

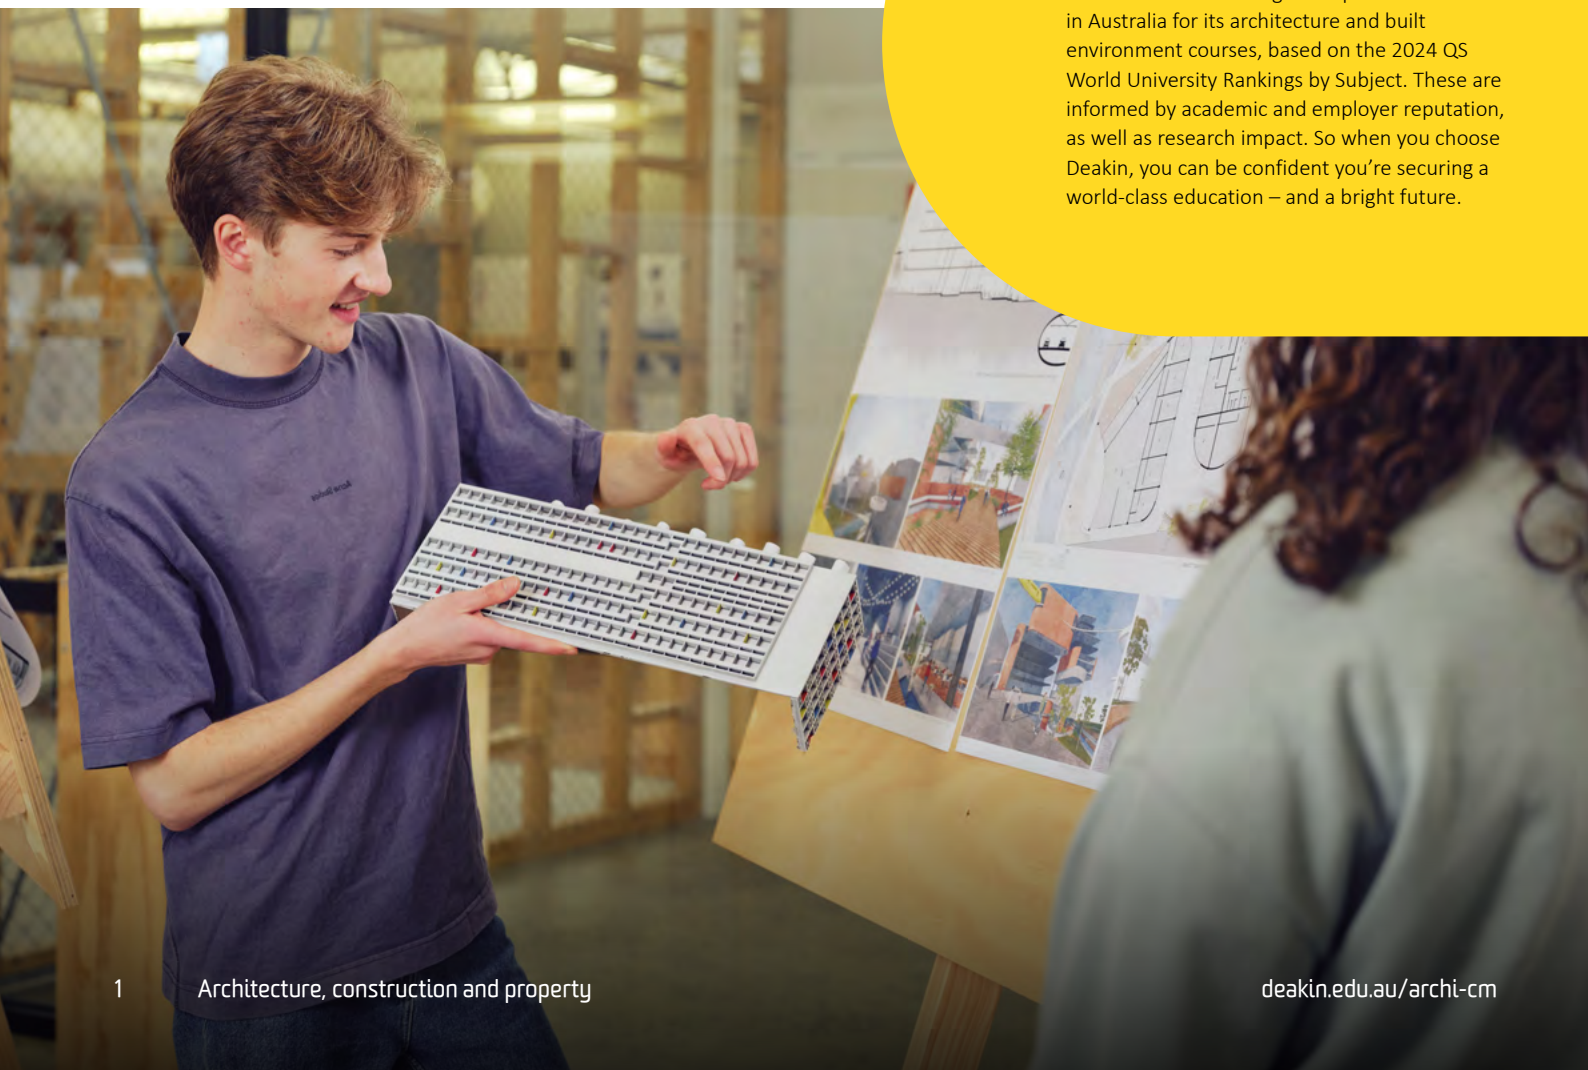

Study property and real estate and get the skills and knowledge to join one of the world's largest employment areas. Deakin's unique property and real estate courses lead to careers with long-term employment and great salaries. With strong industry links and international demand for graduates, property and real estate studies at Deakin focus on:

- investment
- property development
- property valuation
- market analysis
- property economics.

Popular specialisations include sustainability or business disciplines. Our courses are renowned for their global perspective, industry relevance and high graduate employability.

Get a world-class education

Deakin is ranked among the top 10 universities in Australia for its architecture and built environment courses, based on the 2024 QS World University Rankings by Subject. These are informed by academic and employer reputation, as well as research impact. So when you choose Deakin, you can be confident you're securing a world-class education – and a bright future.

Your future in architecture, construction and property

Get a career you can count on

The construction industry is set to employ over 1.5 million by 2034, while jobs for architects and landscape architects are projected to grow by 19% by 2034.¹

Our courses are designed so that you can step directly into your desired profession, whether that's in architecture, construction or property. In addition to building highly specialised technical knowledge, you will develop your critical thinking and communication skills, and become adept at problem-solving and teamwork.

Known for their adaptability, design expertise and technical knowledge, our graduates are well-regarded in their professions and have the initiative and ability to hit the ground running.

Our graduates find employment in a range of areas and industries, including:

- commercial
- contract administration
- industrial
- project management
- property development
- residential.

Our Bachelor of Design (Architecture) and associated double degrees are designed to meet the needs of students who want to complete the Master of Architecture and practise as a registered and qualified architect.

deakin.edu.au/archi-cm

Experience state-of-the-art facilities

The School of Architecture and Built Environment has undergone major refurbishment under the direction of Kerstin Thompson Architects. This has resulted in an inspiring learning space that has won three prestigious Australian Institute of Architects awards for design excellence. The A+B studio and workshop provide students, academics and researchers with a place to design and build models, encouraging experimentation with technology, materials and processes. The workshop is fully equipped with 3D printers, laser cutters, CNC routers, and traditional tools and machinery. The interdisciplinary space offers access to a variety of digital and analogue tools, with an open-plan studio design facilitating project collaboration.

Explore our industry connections

We have strong industry links within our courses, which can lead to field trips, site visits and guest lectures from built environment professionals. You will have a number of opportunities to gain valuable work experience during your studies, and form real professional networks that will help ensure you graduate work-ready. Recent students have undertaken industry experience with:

- Brookfield Multiplex
- DesignInc Architecture
- Grimshaw Architects
- Kane Constructions
- Peddle Thorp Architects
- Rendine Constructions.

Design and build architectural models in state-of-the-art facilities.

Do you want to register as an architect?

The Master of Architecture (page 14) is an Architects Accreditation Council of Australia (ACA) accredited academic qualification. After successfully completing this postgraduate degree, you will be on your way to becoming a registered architect. For more information about professional registration, please refer to the Architects Registration Board of Victoria (ARBV).

deakin.edu.au/course/S700

Skills to get you a job

At Deakin, every course is shaped by industry experts. You'll graduate with real-world expertise and practical skills, giving you a competitive edge in the workplace. Secure your future today at the #1 Victorian university for graduate employment² and course satisfaction.³

Gain professional recognition

Your Deakin qualifications are recognised nationally by industry through course accreditations. All of our courses are regularly examined by key professional groups, including the:

- Architects Accreditation Council of Australia (AACA)
- Australian Institute of Building (AIB)
- Australian Institute of Quantity Surveyors (AIQS)
- Australian Property Institute (API) for Certified Practising Valuer (CPV)
- Chartered Institute of Building (CIOB)
- Royal Institution of Chartered Surveyors (RICS).

Our Bachelor of Design (Architecture) and Master of Architecture are recognised internationally by the Board of Architects Malaysia. Through these courses, you'll also have the opportunity to undertake a discipline-specific industry placement, so you can get on-the-job training.

Benefit from international experience

Gain a global perspective on your chosen industry through faculty-led programs, international internships and volunteering opportunities.

These experiences enhance your global employability skills in areas like teamwork, critical thinking and intercultural communication, while immersing you in a new cultural and learning environment.

Intercultural Dialogue through Design (iDiDe) is an international design workshop where students work in studio groups with academics, architects and built environment professionals to collaboratively respond to a socially conscious architectural brief. Students have travelled to Malaysia, India, Thailand, Sri Lanka and Indonesia.

During your course, you may have the opportunity to apply to join this study group, where you will work within a different cultural context. The program seeks to create an international awareness in participants.

Build a successful career in property

Deakin's unique three-year Bachelor of Property and Real Estate has the highest level of accreditation for any property course by the Australian Property Institute (API) for Certified Practising Valuer (CPV) status. It is also accredited by the Royal Institution of Chartered Surveyors (RICS).

Study property at a top business school

Our property and real estate courses are taught by Deakin Business School which holds the prestigious and globally recognised AACSB and EQUIS accreditations. These accreditations attest to quality, academic and professional excellence, ongoing improvement, innovation and graduate employability.

Inspired and innovative learning spaces

Explore architecture and construction management facilities at our award-winning Geelong Waterfront Campus.

deakin.edu.au/ABspaces

Your future in architecture, construction and property

Join our peer support program

In your first study period, you'll be part of our Faculty of Science, Engineering and Built Environment's peer mentor program. You'll get support and guidance from more senior students in your course and learn about support services, facilities and study.

Be rewarded for your hard work

A Deakin scholarship is more than just a financial boost. It is our chance to acknowledge your accomplishments and reward your hard work, setting you on the path to success at university.

Our extensive scholarship program includes three key scholarships:

- Vice-Chancellor's Academic Excellence Scholarship
- Deakin Scholarship for Excellence
- Deakin Student Support Scholarship.

We also offer a range of donor and government-funded scholarships. Each is unique with differing criteria, rewarding aspiring students from diverse backgrounds.

deakin.edu.au/scholarships

Award-winning university career service⁴

DeakinTALENT will prepare you to secure the jobs of tomorrow. Our award-winning service is available to you from day one and will support you for the rest of your career. You'll have lifetime access to career coaching, industry networking opportunities, and a comprehensive suite of digital resources designed to help you become the most employable version of yourself.

deakintalent.deakin.edu.au

Showcase your talents

The School of Architecture and Built Environment annually exhibits outstanding student work at events throughout the year.

These exhibitions are an excellent opportunity for the public, students, staff, industry, family and friends to celebrate our students' achievements and hard work.

Discover what it's like to study with us at deakin.au/ABEstudy.

The Deakin Guaranteed ATAR

We are providing lower guaranteed ATARs for eligible Australian Year 12 students for most undergraduate courses. This will provide you with more certainty, reduce stress and ultimately give you greater opportunity to get into the course you really want.

To be eligible for the program, you will need to meet at least one of the following criteria, preference Deakin and remain opted-in for the 'personal information and location' category in VTAC equity schemes (SEAS):

- attend a Deakin under-represented school
- live or study in a regional or remote location, or
- be of Indigenous Australian descent.

Deakin's Bachelor of Design (Architecture) is a path of discovery that explores the creative possibilities of architectural design and its potential to make a positive impact on the built environment. Discover architectural ideas through cutting-edge content and develop your creativity. Gain a practical understanding of the built environment and its relationship with the community through meaningful and sustainable design, from houses to high-rise projects.

Professional recognition

This course forms step one of a five-year program comprising the three-year Bachelor of Design (Architecture) followed by the two-year Master of Architecture. When the five-year program has been successfully completed, you have an AACA (Architects Accreditation Council of Australia) accredited academic qualification and are on your way to becoming a registered architect via any state registration boards, such as the ARBV (Architects Registration Board of Victoria).

This course has also been validated and recognised by the Board of Architects Malaysia (Lembaga Arkitek Malaysia), and is included on their 'List of Recognised Architectural Programmes'.

Careers

Deakin architecture graduates work across the globe, from the UK, Berlin and Oslo to China, Dubai and the US.

Our graduates have pursued the following roles:

- 3D architectural modeller
- architectural consultant or designer
- design coordinator.

Graduates who wish to pursue a career as a registered architect can continue onto further studies in a Master of Architecture. Once you have completed postgraduate studies and gained your registration to practise, you can pursue a career as a practising architect and work in private architectural firms, government organisations, property development, or other building and design fields.

Develop an in-depth understanding of the business of construction, from economics and law to technology. Deakin's Bachelor of Construction Management (Honours) equips you with market-ready skills for construction management, quantity surveying and property development. Work confidently across projects large and small. With a strong focus on practical learning, you will develop the initiative and ability to hit the ground running.

Professional recognition

As a graduate of this course, you'll have completed the academic requirements for membership of:

- Australian Institute of Building (AIB)
- Australian Institute of Quantity Surveyors (AIQS)
- Chartered Institute of Building (CIOB)
- Royal Institution of Chartered Surveyors (RICS).

This course is recognised for practice in more than 50 countries, so you can take your career around the world.

Fast-track your studies

This course can be taken as an accelerated program. By taking selected units during Trimester 3, you can complete this course in three years of full-time study instead of four, so you can join the workforce sooner.

Careers

As a Bachelor of Construction Management (Honours) graduate, you'll find career opportunities in roles including:

- construction manager
- contract administrator
- estimator
- project manager
- quantity surveyor.

Work experience

There are opportunities to undertake a discipline-specific industry placement as an elective option as part of your course. You'll also participate in some core units with major assessments involving collaborative project work, such as Built Environment Integrated Research.

Why construction managers are shaping the future

Construction managers aren't just building structures — they're shaping the cities and communities of tomorrow. As our world changes, these professionals are leading the way with smart planning, new technologies and sustainable solutions.

From designing digital tools and advanced building methods to creating inclusive teams and reducing environmental impact, modern construction managers are driving progress across the industry. They blend technical skills with leadership to deliver projects that are efficient, collaborative and future-ready.

Skilled professionals in this field are in high demand. Deakin's Bachelor of Construction Management (Honours) is now available at both our Melbourne Burwood and Geelong Waterfront campuses.

Gain the expertise and industry experience to make an impact from day one.

Careers

Deakin architecture graduates work across the globe, from the UK, Berlin and Oslo, to China, Dubai and the US. Our Bachelor of Design (Architecture) graduates have gone on to work in the built environment across roles such as 3D architectural modeller, architectural consultant or designer, and design coordinator.

Graduates who wish to pursue a career as a practising architect after completing the Master of Architecture will be required to complete an additional two years of work experience under the supervision of a registered architect. Then, you will be on your way to registration with the Architects Registration Board of Victoria (ARBV).

Once registered, you can pursue a career as a practising architect and work in a private architectural practice, government organisations, property development or other building and design fields.

Course structure

This 40-credit-point course comprises 24 credit points from the Bachelor of Design (Architecture) (see page 5), plus an additional 16 credit points from the Master of Architecture (see page 14).

Master of Architecture S700 🕒 1.5-2⁷ 📅 T1, T2

CAMPUS	WF
--------	----

Expand your knowledge in architecture, design and innovative strategies. You will develop sought-after skills through the exploration of architectural studies, environmental resiliency, sustainable design, technological advancement, and social and theoretical issues. You will have access to our impressive A+B studio, an inspiring open plan space where you can work collaboratively to develop your projects.

Careers

You can pursue a career in a range of fields and work settings, such as:

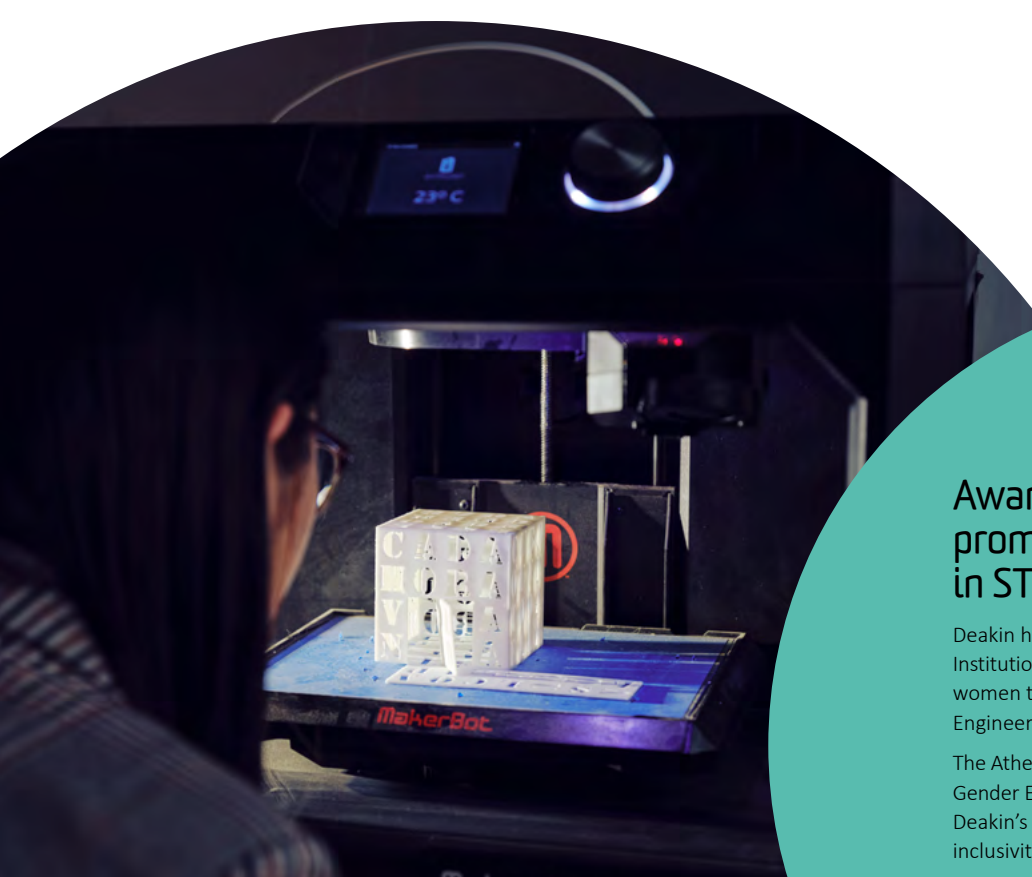

- government organisations
- private architectural practices
- property development.

Graduates who wish to pursue a career as a practising architect will be required to complete an additional two years of work experience under the supervision of a registered architect. This is a prerequisite for registration with the Architects Registration Board of Victoria (ARBV).

Course structure

The course comprises a total of 16 credit points, including 10 core units (13 credit points) and three course electives (3 credit points).

Award recipients for the promotion of gender equity in STEM

Deakin has received the prestigious Athena SWAN Bronze Institution Award for its programs that encourage more women to study, research and work in Science, Technology, Engineering, Mathematics and Medicine (STEMM).

The Athena SWAN program is run by Science in Australia Gender Equity (SAGE), and the Bronze award recognises Deakin's extensive work in promoting gender equity, inclusivity and diversity.

To progress into the Master of Architecture level of studies from undergraduate architecture, students must achieve a Weighted Average Mark (WAM) of 65. Students achieving a WAM between 55 and 64 have the opportunity to submit a portfolio of relevant work and personal statement for consideration to potentially progress into the masters level of studies. Students cannot progress to the postgraduate level of study without completing all 24 credit points at undergraduate level. Students who do not meet the requirements and have a WAM of less than 55 will exit with the award: S342 Bachelor of Design (Architecture).
